between the source and the principal investigator was essential to the investigation. Disturbed by Patterson's behavior at the meeting, Benson and Middleton went to Moriarty's office immediately after the meeting and created a memorandum of their recollection of events. Following are some excerpts from that document:

> Dennis became visibly angry, raising his voice. His body language changed (he began rocking in his chair); he began sneering at Doug and Tom; and his facial features changed—he was obviously "furious" in response to Doug's statements regarding the path forward in the investigation.
>
> At this point, Dennis lost his composure and became extremely agitated. He repeatedly made provocative, threatening comments to Doug and Tom, threatening that any action would have consequences.
>
> Dennis threatened Doug and Tom, saying "You know what 9 o'clock is going to bring. Do you know what the consequences will be to you and the company?" Later, Dennis stated, "BEA will pay!"—again the connotation being that the company would suffer consequences.
>
> Dennis was insubordinate, responding to Doug "You don't have the training or background to tell me how to run my program. You can't tell me to disclose the name of my confidential source. You can't tell me how to run my program." (Notably, in the meeting of April 16, 2007, Dennis told Doug and Tom that he had not promised confidentiality to his source.)
>
> Dennis became increasingly aggressive, saying "Middleton, you know me well enough to know what I'm going to do." (This was strange, because Dennis has had a long term relationship with Tom, and had never addressed him in this way before.)
>
> * * *
>
> Dennis continued to raise his voice, saying to Tom "Am I clear on this? You have not provided a credible reason for disclosing this person's identity."
>
> * * *
>
> After leaving the room, Dennis returned to make a final statement to Tom, stating in a derogatory tone "You're doing a great job as head of Safeguards & Security."

Ex. 92; BEA Brief at 67-68.

Late in the evening on April 24, 2007, Patterson sent an e-mail response, still refusing to name the source. However, he did state that the source was not a BEA employee. Ex. 93.

With this new information, Wise was able to determine the identity of the source via a seating chart.[8]

On April 25, 2007, Middleton experienced what he called a "disturbing encounter" with Patterson when Patterson cut off Middleton's car as he was backing out of his driveway to leave for work. BEA Brief at 78. Middleton found this disturbing because in the ten years that they were neighbors, they had never left for work simultaneously.[9] Patterson waited at a stop sign for what Middleton considered a prolonged period, with Middleton behind him, and did not move until another car approached. *Id.*; Tr. at 1291-4.

On April 25, 2007, Benson convened a PAAG. The PAAG members were Benson, Middleton, Zabala, Moriarty, and Mark Holubar, Zabala's manager. Tr. at 1198-99. The PAAG members decided that they needed additional managers present, and reconvened the next day with Olsen and Clark. *Id.* at 1199. The PAAG also had additional meetings. Zabala interviewed Patterson to get his version of the meeting, and she testified that Patterson felt intimidated by Middleton's presence at the meeting. Zabala considered Patterson to be hostile and condescending during their interview. Tr. at 1201. The PAAG members discussed his previous suspension where he was asked to cooperate with Security, and they felt a lack of confidence in his ability to continue in his position. *Id.* at 1202. The members of the PAAG considered terminating Patterson, but Benson suggested reassignment. *Id.* at 1203. Zabala searched company vacancies for a suitable position for Patterson, and ultimately placed him as a Management Systems Process Lead in Engineering Design. *Id* at 1204.

On June 7, 2007, Benson gave Patterson a zero merit increase. On June 13, 2007, Benson reassigned Patterson to the position of Management Systems Process Lead in Engineering Design. Patterson filed a "Third Addendum" (Fifth Complaint) on June 21, 2007, citing the zero merit increase and directed reassignment as acts of retaliation. As remedy, he requests: (1) a wage increase consistent with the average for those employees who received a top performance rating; and (2) reassignment to the position of Manager of the Employee Concerns and Business Ethics Office.

BEA Modifies the Employee Concerns Manager Position

In September 2007, Benson modified the position description for the Employee Concerns Manager, and renamed the position "Senior Auditor/Employee Concerns Program Manager." Ex. RR at 3; Tr. at 755-56. The new position was radically changed. Benson

[8] Wise ascertained the name of the second source and, during an interview, the source named other witnesses, which enabled Wise to complete the investigation. Wise substantiated the concern regarding political activity. Tr. at 1152, 1158.

[9] Middleton also testified about other behavior that Middleton considered "distressing," e.g., Patterson sits on his porch and glares at Middleton while Middleton works in his yard; Patterson does not speak to Middleton in the hall; and Patterson allegedly passes Middleton's office frequently and makes sure that Middleton sees him. Tr. at 1293-7.

converted a permanent position into a lower level, two-year rotational assignment.[10] According to Benson, the workload in Employee Concerns did not justify a full-time position, and he needed another auditor. Tr. at 757-58, 767-68, 902. At the time of the hearing, the position was temporarily filled by an employee from BEA Human Resources. *Id.*

On September 21, 2007, Shirley filed a formal complaint against Patterson with Zabala of Employee Relations. Tr. at 942-45; 1204-05; BEA Brief at 81. According to Shirley, Patterson followed him for approximately 100 yards in an INL office building to a cubicle area. When an occupant of the cubicle area asked Patterson if Patterson needed help, Paterson pointed to Shirley, causing the occupant to believe that Patterson and Shirley were together. Patterson then left the area. Shirley reported the encounter because he was concerned about Patterson's intentions "based on [Patterson's] actions of not speaking to Shirley or Shirley's co-workers, his frequent appearances in passing by the Security area, and because Shirley had conducted the investigations that resulted in Patterson's suspension." BEA Brief at 81 (citing Tr. at 945, 978). Zabala interviewed Patterson about the incident and described him as disrespectful, rude, and unprofessional during their meeting. Tr. at 1209-10. Patterson maintained that he followed Shirley intending to ask him a question but then changed his mind. Zabala informed Patterson that Shirley found his conduct "intimidating" and hoped that it would not happen again. BEA did not take any disciplinary action against Patterson. Tr. at 1221.

In November 2007, Patterson visited Zabala's office prior to Thanksgiving and said "Happy Thanksgiving. I'm looking forward to seeing you." Tr. at 1230. Zabala found this to be "intimidating" because she interpreted the remarks as pertaining to the hearing in this case. *Id*.

II. ANALYSIS

A. Did Patterson Engage in Protected Conduct?

Under the regulations governing the DOE Contractor Employee Protection program, the complainant "has the burden of establishing by a preponderance of the evidence that he or she made a disclosure, participated in a proceeding, or refused to participate, as described under § 708.5, and that such act was a contributing factor in one or more alleged acts of retaliation against the employee by the contractor." § 708.29. *See Joshua Lucero*, 29 DOE ¶ 87,034 (2007); *Ronald Sorri*, 23 DOE ¶ 87,503 (1993). The term "preponderance of the evidence" means proof sufficient to persuade the finder of fact that a proposition is more likely true than not when weighed against the evidence opposed to it. *See Lucero,* 29 DOE at 89,180 (citing *Hopkins v. Price Waterhouse*, 737 F. Supp. 1202, 1206 (D.D.C. 1990)). Patterson filed his first Part 708 complaint on June 1, 2006. In that complaint, Patterson alleged that he made protected disclosures when he sent e-mails to Benson indicating that BEA had violated its procedures by revoking the site access of the subcontractor employee. Patterson also alleged that he made a protected

[10] Under BEA, the functional position of "Employee Concerns Manager" was a Specialist 5 (with Specialist 6 as the highest level), but the new position was reclassified as a Specialist 3 or 4. Tr. at 567-69.

disclosure when he briefed Alvarez in August 2005 about the same issues.[11] He then filed four supplemental complaints on (1) September 19, 2006; (2) October 31, 2006; (3) February 20, 2007; and (4) June 26, 2007. Therefore, I find that Patterson engaged in protected conduct based on his participation in this Part 708 proceeding. As described below, I further find that this protected conduct was a contributing factor in one or more alleged acts of retaliation against Patterson by BEA.

B. Whether Protected Conduct Was a Contributing Factor in an Act of Retaliation

Section 708.2 of the Contractor Protection regulations defines retaliation as "an action (including intimidation, threats, restraint, coercion or similar action) taken by a contractor against an employee with respect to employment (e.g., discharge, demotion, or other negative action with respect to the employee's compensation, terms, conditions or privileges of employment) as a result of the disclosure of information." 10 C.F.R. § 708.2. In his complaint, Patterson maintains that BEA retaliated against him in the following ways:

1. Initiated two Security investigations, in July 2006 and in September 2006;[12]

2. Suspended him for three days without pay beginning October 16, 2006;

3. Gave him a "1" performance rating ("some key expectations not met") on a scale of "0" to "4" on his performance review dated January 10, 2007;

4. Gave him a zero merit increase on June 7, 2007, for his 2006 performance; and

5. Ordered a "directed reassignment" that involuntarily transferred him from his position as Employee Concerns Manager to a new position as Management System Process Lead in Engineering Design and Drafting on June 14, 2007.

In order to prevail in a Part 708 action, the complainant must show, by a preponderance of the evidence, that the protected disclosures or conduct were a contributing factor in the retaliation against him. In prior decisions of the Office of Hearings and Appeals, we have decided that:

---

[11] As noted in Section I.B., I dismissed this complaint on November 21, 2007, on procedural grounds. *See Dennis Patterson*, 29 DOE ¶ 87,035 (2007). Nonetheless it appears, based on the findings of the ROI, that there was substantive merit to the disclosures, which alleged an abuse of authority related to violations of company procedure. The focus of this Decision is not, however, on the allegations contained in the first complaint but on those alleged retaliatory actions that occurred after Patterson filed his first complaint, as the mere filing of this complaint constituted protected conduct under Part 708.

[12] In its Motion for Summary Judgment, BEA argued that the Security investigations cannot be considered retaliation because contractors have a duty to investigate allegations of misconduct. However, we concluded that the use of an investigation to punish or discipline an employee can be considered an act of retaliation. *See Dennis Patterson,* 29 DOE ¶ 87,035, Case No. TBZ-0047 (2007) (stating that the motive and intent behind the investigation determines whether an investigation has been used in a retaliatory manner).

> A protected disclosure may be a contributing factor in a personnel action where "the official taking the action has actual or constructive knowledge of the disclosure and acted within such a period of time that a reasonable person could conclude that the disclosure was a factor in the personnel action."

Charles Barry DeLoach, 26 DOE ¶ 87,509 (1997) (quoting *Ronald Sorri*, 23 DOE ¶ 87,503 at 89,010 (1993). If these conditions are met, the burden of proof shifts from the complainant to the contractor, which must then show by clear and convincing evidence that it would have taken the same actions against the complainant even in the absence of the protected disclosures. *Id.*

I find that the officials responsible for the alleged adverse personnel actions had actual knowledge of Patterson's protected activity. The record in this case describes a sequence of adverse personnel actions that occurred in the 12 months from July 2006 to June 2007. During that year Patterson filed four Part 708 complaints. It is clear from the testimony at the hearing that the BEA managers who were responsible for these adverse personnel actions had actual knowledge of his protected conduct--all members of the first PAAG knew that Patterson had filed a Part 708 complaint because that information was in the report that Shirley presented to the first PAAG. Tr. at 886-7. I further find that that there was temporal proximity between his protected conduct and the alleged acts of retaliation which occurred between July 2006 and June 2007. "[T]emporal proximity" between a protected disclosure and an alleged reprisal is sufficient to establish the required element in a prima facie case for retaliation. *See Casey von Bargen*, 29 DOE ¶ 87,031 at 89,167, Case No. TBH-0034 (2007) (stating that a showing that protected activity occurred proximate in time to the adverse personnel action is sufficient for complainant to meet the contributing factor test); *Dr. Jiunn S. Yu*, 27 DOE ¶ 87,556 (2000).

I recognize that this time period coincides with a period of corporate change at INL, and I do not minimize the reality that some employees weather change better than others. Despite documented evidence of friction between Patterson and some of his colleagues, I cannot conclude that his workplace behavior was the sole cause of the adverse personnel actions. A review of the relevant events, including the protected conduct and alleged retaliations, leads me to conclude that it is more likely than not that these were not "isolated occurrences." *See William Cor*, 28 DOE ¶ 87,026 at 89,212, Case No. VBH-0079 (2002). Therefore, I find that the temporal proximity between Patterson's protected conduct and the adverse personnel actions is sufficient to establish, by a preponderance of the evidence, that his protected conduct was a contributing factor to the alleged acts of retaliation.

C. Whether the Contractor Would Have Taken the Same Action in the Absence of the Protected Disclosures

Section 708.29 states that once a complaining employee has met the burden of demonstrating that conduct protected under § 708.5 was a contributing factor in the contractor's retaliation, "the burden shifts to the contractor to prove by clear and convincing evidence that it would have taken the same action without the employee's

disclosure, participation, or refusal." 10 C.F.R. § 708.29. "Clear and convincing evidence" requires a degree of persuasion higher than preponderance of the evidence, but less than "beyond a reasonable doubt." *See Casey von Bargen*, 29 DOE ¶ 87,031 at 89,163 (2007). If the contractor meets this heavy burden, the allegation of retaliation for whistleblowing is defeated despite evidence that the retaliation may have been in response to the complainant's protected conduct.

It is well settled that several factors may be considered in determining whether an employer has shown, by clear and convincing evidence, that it would have taken the alleged act of retaliation against a whistleblower in the absence of the whistleblower's protected conduct. The Federal Circuit, in cases interpreting the federal Whistleblower Protection Act (WPA), upon which Part 708 is modeled, has identified several factors that may be considered, including "(1) the strength of the [employer's] reason for the personnel action excluding the whistleblowing, (2) the strength of any motive to retaliate for the whistleblowing, and (3) any evidence of similar action against similarly situated employees . . . ." *Kalil v. Dep't of Agriculture*, 479 F.3d 821, 824 (Fed. Cir. 2007) (*citing Greenspan v. Dep't of Veterans Affairs*, 464 F.3d 1297, 1303 (Fed. Cir. 2006)).

1. Security Investigations

a. July 2006- Misuse of Government Equipment

On June 1, 2006, BEA requested that Security investigate Patterson for the alleged misuse of company time and resources. Ex. 121 at 1; Ex. 122. Security interviewed Patterson on July 13, 2006. Patterson contends that this investigation was in retaliation for filing Part 708 complaints, and BEA counters that it would have initiated the investigation despite the complaints. BEA states that its Standards of Conduct prohibit the use of company property for personal gain or personal causes.

> BEA's network and Internet connection is to be used for official use only. However, incidental personal use is permissible as long as it does not interfere with the operations of BEA, create additional costs, or interfere with employee's duties.
>
> * * *
>
> Use of BEA e-mail system and Internet connection for personal advertisement or gain; on behalf of outside business ventures; to leak confidential or privileged information or for personal, political, or religious causes is prohibited.

Standards of Conduct and Business Ethics, Ex. 66 at 9.

Patterson argues that other similarly situated employees were not subject to investigation. *See* Patterson Brief at 10-11. In the past, when Benson suspected misuse of equipment, he would counsel the employee or put that information into the employee's performance appraisal. Tr. at 888-9. Patterson alleges that his use of the office equipment was

incidental and, in the case of his Part 708 activity, permissible. Patterson notes that IHRC is listed as recommended dispute resolution program for employees in the BBWI handbook. Ex. Q at 1-2.

The IHRC sent Moriarty correspondence that referenced complainant's office contact information. This was credible information that Patterson had used company equipment to send the information to the IHRC, despite Moriarty's previous admonition. See Ex. 50 (e-mails from Patterson to IHRC in May 2006). As it turns out, the investigation substantiated Patterson's assertion that his use was incidental, and that he was permitted to use company equipment for his Part 708 complaint. Nonetheless, that does not negate BEA's duty to investigate possible misuse of government equipment. Prior to the investigation, Moriarty did not know the extent of Patterson's use of company equipment, and she requested an investigation to determine whether there was any misuse.[13] Even though the allegation of misuse was not substantiated, I find that BEA properly initiated the investigation. I agree with BEA that Moriarty had a duty to pursue an investigation once she suspected that an employee was using company resources for other purposes. BEA presented credible information that it had investigated 52 employees in 2006 and 2007 for possible misuse of company resources. Ex. 125. Thus, this was not an unusual action on the part of BEA. I find that BEA has presented clear and convincing evidence that it would have initiated an investigation against complainant despite his protected conduct.

b. September 2006- Bias during an Investigation

In September 2006, a BEA manager formally complained about Patterson's behavior during an investigation into alleged wrongdoing on the part of the manager.[14] The manager complained that Patterson showed bias in favor of the employee who filed the initial complaint. Benson testified that he had never found Patterson to be biased in the past. Tr. at 810, 880. When there was a complaint against Patterson in the past, Patterson's supervisor (first Denson, President of LIMITCO, and then Benson) would first review Patterson's investigation and findings. Tr. at 205-6. Benson also testified that in the two previous instances where an employee had accused Patterson of bias, Benson had handled the investigation himself. Benson met with the employees in those situations and resolved their issues informally. However, Benson argued that he deviated from procedure and transferred this case to Security because: (1) the manager had filed a formal complaint with Employee Concerns; and (2) Patterson had named Benson in his Part 708 complaint.[15] Benson testified that he assumed that Patterson would not be comfortable with Legal or Human Resources as investigators because those groups were represented in the PAAG that had disciplined him. Tr. at 656, 660. BEA argued that its

[13] I note that Shirley notified Moriarty of Patterson's Part 708 complaint before the complaint had been officially transmitted to BEA. BEA received Patterson's Part 708 complaint on July 5, 2006. Tr. at 1355.

[14] In an e-mail to Benson, the manager indicated that Benson may have overstated the complainant's concerns. Ex. 120; Tr. at 834.

[15] The investigation did not substantiate the allegation of bias against Patterson.

policy required investigation of the complaint, and that only Security and Human Resources could have conducted the investigation. BEA Brief at 103.

Benson's statement that only Legal or Human Resources could conduct the investigation was not credible because there is no evidence that Patterson would be more comfortable with Security, the organization that had just investigated him for the first time in his career. In fact, a review of the evidence suggests that Security would be the least likely group Patterson would choose to conduct this second investigation, given the controversy over the first. There were other characteristics of this investigation that were dissimilar to other BEA investigations. For instance, Security investigators were trained to investigate waste, fraud, and abuse, not issues such as bias. In similar situations in the past, the investigator had first reviewed Patterson's file to determine how he conducted his investigation. Tr. at 205, 210-11, 233. [16] In this investigation, Shirley did not review Patterson's file to determine how Patterson had conducted his investigation.[17] The clear and convincing evidence standard applicable to contractors is a difficult standard to meet and, based on the above, I conclude that BEA has not presented clear and convincing evidence that it would have taken the same action in the absence of Patterson's protected conduct.

2. Three-Day Suspension

On October 16, 2006, Benson suspended Patterson without pay for three days. The suspension notice listed the following four items of alleged misconduct: (1) refusal to cooperate with an investigation by misleading the investigator; (2) refusal to answer questions regarding misuse of government equipment; (3) failure to follow company protocol regarding employee concerns investigation; and (4) failure to follow direction from BEA Office of the General Counsel.

The first two items of alleged misconduct occurred during the September 2006 bias interview conducted by Shirley. Benson testified that he suspended Patterson primarily because of Patterson's statement to Shirley that he refused to answer a question in order to "to keep [Shirley] guessing and level the playing field," and also because of Patterson's refusal to cooperate with the bias investigation by refusing to answer Shirley's question about Patterson's access to Benson's e-mails. BEA Brief at 108. Benson considered this inappropriate during an investigation. According to Benson, Patterson should have answered the question, even though not related to the issue of bias, because he knew that it was inappropriate to access someone else's e-mail and because he was aware of the consequences of not answering an investigator's question. Benson also noted that Patterson had failed to follow company protocol when he did not allow an interviewee to review his notes, and that Patterson failed to follow the guidance of the Office of General Counsel regarding use of government equipment for personal litigation. BEA argues that the suspension was warranted because the BEA Employee Handbook

[16] Although Shirley was not trained in bias investigations, I find that he credibly testified about his substantial experience as an investigator.

[17] The investigator did tell Paterson that he had interviewed the employee who filed the complaint.

states that suspension without pay is warranted for "failure to cooperate with an investigation." Ex. O at 1-71; Ex. R at 51. BEA also argues that Patterson, who expected cooperation in the investigations conducted by his office, did not cooperate in his own investigation. The contractor contends that Patterson was treated no differently than similarly situated employees, and that the only other employee who refused to cooperate with an investigation was terminated on April 24, 2007. However, I find for the following reasons that the contractor has not shown by clear and convincing evidence that it would have suspended Patterson for three days absent his protected conduct.

Allegation of Refusal to Cooperate With an Investigation

The transcript of the interview is somewhat puzzling. It appears that Patterson first answered the question ("I'm not saying anything like that. No."), denying that the secretary had given him unauthorized access, but then later in the conversation clearly stated that he would not answer the question.

> TS: As far as e-mails that you are referring to, are you saying that [Bensons]'s secretary has come forward to you with information?
>
> DP: *I'm not saying anything like that. No*.
>
> TS: OK. Has she shared e-mails with you?
>
> DP: I'm not saying anything like that.
>
> TS: But, I'm asking you a question.
>
> DP: And I'm saying, I'm not saying anything like that.
>
> TS: So, you're saying she has not.
>
> DP: *I'm not answering your question*.
>
> TS: And, do you realize by not answering my question that . . . .
>
> DP: They can hold that against me.
>
> TS: OK. And you still choose to not to talk about that. OK.
>
> DP: Yes.

Ex. OO; Ex. 61 at 15-16 (emphasis added). Despite his initial answer, Patterson clearly stated his refusal, and Shirley had to then interview Benson's secretary. [18]

[18] Shirley's investigations did not substantiate improper e-mail access by anyone.

Although Patterson refused to answer one question during the interview, I find that this refusal did not impede the investigation. In fact, the investigator testified credibly that Patterson was otherwise cooperative, professional, and truthful, and the investigation did not substantiate any improper activity. Thus, I cannot conclude that the complainant was not cooperative with the investigation. Further, there are distinct differences between Patterson's punishment and the manner in which BEA treated the employee who was terminated for failure to cooperate with an investigation. First, that individual displayed a lack of cooperation so egregious that it cannot compare with Patterson's behavior. The terminated individual had engaged in ongoing and extensive fraud, using the office telephone and Internet for three hours out of each eight hour day. Ex. 125; Tr. at 1105. When questioned by investigators, he told them that he could substantiate his misuse, but became belligerent when they asked him for the information. In fact, the investigator had to ask the individual four times for the information – during an interview, on the telephone, and twice via e-mail, but the individual refused to cooperate. Tr. at 1054, 1103-4. After reviewing information regarding the individual who refused to cooperate in an investigation, it is clear that the failure to cooperate was not the basis for that employee's termination. He also engaged in time card fraud, a violation so egregious that the only other employee who committed that violation was suspended for 30 days, 10 times the length of Patterson's suspension. Ex. 125 at 5. Therefore, for the reasons set forth above, I conclude that the three-day suspension was excessive.

Allegation of Refusal to Answer an Investigator's Question

An examination of Patterson's testimony shows that Shirley called Patterson's cell phone on August 31, 2006, to ask him a few follow-up questions about the July 2006 investigation. Patterson testified that at the time of the call, he was at the hospital visiting a very sick friend. When Patterson kept asking Shirley "Is there anything else?," Shirley suspected that Patterson may have been advised that a second investigation was about to commence. Shirley asked Patterson if anyone had told him about the second investigation, and Patterson did not answer. At the September 2006 interview, Shirley again asked Patterson if anyone had warned him that he was going to be investigated again.

> TS: OK. On the particular, when I asked you before, you chose not to answer.
>
> DP: I did. I like to keep you guessing. Kinda keep the playing field even. (chuckles)
>
> TS: That's why I'm asking. So, why didn't you answer at that point? So you're just saying you wanted to keep me guessing at that point. OK.
>
> DP: First of all, I wasn't sure why you were asking the question. You kinda caught me off guard. Quite frankly, even though I knew the answer

was no, I decided to defer on answering that until today. But no, no one notified me of this.

Ex. 61 at 28.

As shown above, Patterson, although initially silent, truthfully answered the question about the second investigation during the interview, which took place a week after the phone call from Shirley. Although Patterson initially refused to answer, Shirley testified that Patterson was cooperative and professional throughout the interviews. He acknowledged that interview subjects are often stressed, but stated that Patterson maintained a professional demeanor. Further, Shirley testified that he believed that Patterson was truthful with him. In addition, it is not clear why Patterson should be required to answer questions about an investigation that had not yet officially opened.

A review of other BEA employee suspensions reveals some key differences that distinguish Patterson's treatment. BEA compares Patterson to an employee who was suspended without pay for four days for starting a nuclear reactor without approval. Ex. 125. There is a vast difference between Patterson's refusal to answer a question, and an individual who violated technical requirements and restarted a nuclear reactor without management concurrence and without determining the cause of the shutdown of a safety system. Yet, that individual was punished with only one more day without pay than Complainant. Patterson clearly refused to answer a question, but I cannot find that action of the same level of severity as the other actions, presented by the contractor in support of its position, that have warranted suspension at BEA. The other employees who were suspended committed more serious violations such as the misuse of government computer with "excessive use" involving sexually explicit material, pornography, and racially derogative materials, the exchange of offensive e-mails within a workgroup, inappropriate conduct in the workplace, and mistreatment of employees. *Id.* I further find that BEA could have fashioned a different punishment, because there is evidence in the record that BEA utilizes many other forms of discipline. BEA practices progressive discipline through documented verbal warnings, verbal counseling, and suspensions as short as one day. Ex. 125. For example, the BEA Personnel Security Manager, who did not cooperate with Benson's investigation into the site access revocation, was given a verbal warning that was documented and placed in her personnel file. Thus, I conclude that BEA did not present clear and convincing evidence that it would have suspended Patterson for three days absent his protected conduct. *See Curtis Hall*, 29 DOE ¶ 87,022 at 89,116-7 (2007) (contractor did not establish by clear and convincing evidence that the type of behavior exhibited by complainant in a workplace conflict generally resulted in the discipline applied to complainant).

3. Performance Rating and Zero Merit Increase

BEA argues that Patterson's rating of "1" ("some key expectations not met") was a proper rating given Patterson's marginal performance in 2006 that culminated in a three-day suspension in October 2006. *See* Ex. 79 (INL 2006 Performance Review). As a

result of his "1" performance rating, Patterson received no merit increase. The factors that caused the suspension were referenced in his 2006 review, and I find that such reference properly adhered to BEA policy. BEA argues that 250 BEA employees also did not receive a merit increase in 2007 and that at least 11 other BEA employees who received a performance rating of "1" also failed to receive a merit increase in 2007.

Patterson's rating of "1" in the areas of Security (8% of total rating), Teamwork (8% of total rating), Judgment (9% of total rating), and Ethics (12% of total rating) was based on many of the same events that were referenced in his suspension. *See* BEA Brief at 47-48. These areas comprise 37% of his total rating. However, the categories of "Adaptability" (8% of total rating) and "Communications" (8% of total rating) based their ratings on different events. Patterson received a rating of "1" in the area of Adaptability "based on his refusal to accept his role as Employee Concerns Program Manager after his job code was changed to Specialist, his insistence on identifying himself as a 'Specialist,' and his refusal to attend certain management meetings that Benson had asked him to attend." BEA Brief at 48, Tr. at 690-91. In the area of Communications, Benson gave Patterson a '1" for "unprofessional communications" – disclosing to counterparts at other facilities that he had filed a Part 708 complaint and posing a hypothetical that actually reflected his own litigation. Tr. at 692.

Patterson's function may have stayed the same, but his job classification had changed significantly. It is a significant change to remove a job from the ranks of management after 10 years. Patterson was reclassified as a Specialist, and it was reasonable to reject a title that he no longer held. There was no testimony that the management meetings were a required part of his job. Tr. at 690-2. A Part 708 complaint is not a confidential proceeding, so it is likely that his counterparts would have had knowledge of the complaint at some stage in the proceeding despite his communications.

Patterson's behavior was less than exemplary, especially in the areas of Teamwork (8%) and Judgment (12%), and this behavior will be reflected in any equitable remedy available to him. *See Robert Burd*, 28 DOE ¶ 87,025 at 89,201 (2002) (declaring that the ancient maxim of equity states that one who seeks equity must come into a court of equity with clean hands). These two categories comprise 20% of his rating. However, as stated above, BEA has not provided clear and convincing evidence that it would have suspended Patterson for three days had he not engaged in protected activity. Consequently, because the 2006 performance rating and zero merit increase were based on many of the same events as the suspension, I also find that BEA has not presented clear and convincing evidence that it would have given Patterson a "1" rating and a zero merit increase if he had not engaged in protected activity.

4. Directed Reassignment

BEA argues that the reassignment was a "good faith attempt to salvage [Patterson's] career at the INL and was not a negative personnel action." BEA Brief at 117. According to BEA, Patterson was reassigned due to inappropriate interaction during the April 24, 2007, meeting with Benson and Middleton "during which time he failed to treat

the managers with dignity and respect," his failure to cooperate with Wise's investigation and to tell her that the anonymous employee was not a BEA employee until April 24, 2007, his unwillingness to provide the name of the source, and refusal to take direction from Benson. The contractor contends that Patterson failed to follow Benson's instructions when he stated to Benson that Benson did not have the training or background to tell Patterson how to run his program. BEA Brief at 120. Patterson denies that he made this statement.

BEA states that discharge is the appropriate penalty for insubordination, according to its handbook. Members of the PAAG considered terminating Patterson for insubordination, but deferred to Benson's recommendation of a "directed reassignment." BEA Brief at 119; 73. According to BEA, the managers had lost confidence in Patterson's ability to perform as manager of Employee Concerns. Benson testified that Patterson's conduct at the April 24th meeting was the cause of his reassignment and, absent that conduct, Patterson's refusal to disclose the source would not have resulted in reassignment. Tr. at 900.

BEA argues that Patterson was insubordinate, and insubordination is grounds for termination at BEA. However, if Patterson's conduct truly warranted termination, then BEA should have terminated him at that time. It is disingenuous of BEA to state that he was reassigned in order to salvage his career. *See Curtis Hall*, 29 DOE at 89,116-7 (finding that contractor did not establish that the type of behavior exhibited by complainant generally resulted in termination of an employee at that company). By the time the reassignment was put into place, all of his senior management was aware of the tension between Patterson and Security, the Office of the General Counsel, and Benson. It is difficult to see how BEA "salvaged his career" by moving him to a job that does match his educational and professional background or his aspirations.

At the time Patterson was ordered to release the name of the source, the policy in place was that the source could elect to remain anonymous, and the source's identity would be protected to the maximum extent possible, *i.e.,* confidentiality was not guaranteed. Tr. at 802-3. However, it is not surprising that Patterson would try to protect the identity of his source because, in the 13 years that he had worked with confidential sources, he had never before been asked to reveal an identity. *Id.* at 270. In fact, Patterson testified that he considered the disclosure of a source to be a violation of company standards and procedures. *Id*. at 286. During conversations with management, Patterson stressed the negative impact on the company for taking what he considered an ill-advised action.

According to Patterson's job description, he was accountable to INL management to identify significant risk areas, and, as the former president of LIMITCO testified, the nature of Patterson's job caused him to sometimes step on management's toes. Tr. at 812. Although Patterson clearly could have been more diplomatic and tactful in his delivery, he nonetheless had a duty to convey the message.[19] During the April 24, 2007,

[19] Some of the complaints against Patterson's behavior seem exaggerated. Shirley filed a complaint against Patterson for allegedly following him into his office area and then leaving when asked, Middleton is disturbed when he and Patterson leave home for the office at the same time and Patterson engages in

meeting the complainant made sarcastic and hostile comments, and he became infuriated, but he did not raise his voice, or physically threaten anyone. Patterson may not have been a model employee, but he was not insubordinate as described in previous cases adjudicated by this office. *See*, e.g., *Casey Von Bargen*, 29 DOE ¶ 87,031 (2007) (complainant had general inability to work with anyone on a regular basis, hostility to suggestions, constant strife, attitude made resolution impossible despite attempts by EEO department to repair relations); *S. R. Davis*, 28 DOE ¶ 87,044 (2004) (complainant made inflammatory and disrespectful statements to and about others, rejected manager's direction, told management that she would not be available on nights and weekends, told managers that they did not have the authority to reverse her opinion); *William Cor*, 28 DOE ¶ 87,026 (2002) (complainant refused an order to return to work because he alleged mistreatment by his supervisor); *Dr. Jiunn S. Yu*, 27 DOE ¶ 87,556 (2000) (complainant consistently disregarded orders, distributed memoranda with unprofessional invectives, and displayed "repeated failure to abide by the reasonable and legitimate instructions of his managers").

BEA argues that Patterson's reassignment is similar to that of a BEA Fire Department Staff Officer who was reassigned in April 2006 based in part on inadequate performance and failure to meet goals and objectives. Tr. at 1066-68; Ex. 137. That employee had been placed on a Performance Improvement Plan and failed to improve. Two other managerial level fire department employees were given directed reassignments after safety issues resulted in injury to some of their employees. These situations, which resulted in injury and were a threat to public safety, are not comparable to Patterson's behavior.

In summary, although Patterson had an abrasive personality, it is telling that the BEA managers did not terminate him, even though BEA had terminated at least nine employees in 2006 and 2007. I conclude that BEA has not presented clear and convincing evidence that it would have given Patterson a "directed reassignment" absent his protected conduct. *See Joshua Lucero,* 29 DOE at 89,185-6 (finding that even though individual conducted himself in an immature, volatile manner, his protected conduct changed his relationship with his supervisors, and contractor did not prove by clear and convincing evidence that it would have terminated complainant despite his protected conduct).

III. CONCLUSION

As the foregoing Decision demonstrates, I find that Patterson has presented a preponderance of evidence that he engaged in protected conduct by his participation in this proceeding, and that this conduct was a contributing factor to acts of retaliation. I

(according to Middleton) odd behavior, Zabala is intimidated by a reference to Thanksgiving. I note that no allegations against Patterson were substantiated and Shirley's complaint resulted in no disciplinary action. The actions that BEA labels "aggressive" and "threatening" (including the driveway dance with Middleton, and the sarcastic and condescending behavior alleged by Zabala and other colleagues) appear to be expressions of anger or immaturity that were surprising to those who had known Patterson for years. There is no evidence in the record of aggressive, threatening behavior by Patterson. *See* BEA Brief at 48.

further find that BEA has not presented clear and convincing evidence that it would have taken the same actions at issue absent the protected conduct. Therefore, I find that the complainant is entitled to relief under Part 708. [20] I will direct BEA to reimburse Patterson's legal fees for this proceeding, to remove the disciplinary notices from his personnel file, to adjust his 2006 wage increase to an amount equivalent to the average of those employees who received a rating of "2" during the same evaluation period, and to reimburse him for lost pay and benefits relating to his activity in this case. [21]

Patterson shall submit a calculation in support of his claim for lost pay and benefits to BEA. As for his litigation expenses, attorney fees in Part 708 cases are generally calculated using the "lodestar" methodology described by the U.S. Supreme Court in *Blanchard v. Bergeron*, 489 U.S. 87 (1989). *See Sue Rice Gossett*, 28 DOE ¶ 87,028 (2002); *Ronald A. Sorri*, 23 DOE 87,503 (1993), *affirmed as modified*, 24 DOE 87,509 (1994); 10 C.F.R. § 708.36(4). I will direct Patterson to submit a calculation of attorney fees with evidence supporting the hours worked and the rates claimed. *See Sue Rice Gossett*, 28 DOE at 89,227 (citing *Webb v. Board of Education of Dyer County, Tennessee*, 105 S. Ct. 1923, 1928 (1985)).

Patterson also requested that BEA revise his 2006 appraisal to reflect his actual performance, and that BEA award him a wage increase consistent with the average for employees who received a top performance rating. Although BEA has not shown by clear and convincing evidence that it would have appraised Patterson as a "1"in 2006 despite his protected conduct, I cannot conclude that Patterson has presented evidence that he performed at the level of the average of employees who received the top performance rating for 2006 performance. His work on the site access issue in 2005 is admirable and was even recognized by BMI as a thorough investigation that revealed violations of procedure. However, the evidence relating to his 2006 performance shows some behavior towards his colleagues that is less than cooperative and is not representative of a top performer. *See S. R. Davis,* 28 DOE ¶ 87,044, Case No. VBH-0083 (2004) (Part 708 does not provide its complainants with protection from the ramifications of unacceptable behavior). Nonetheless, in order to place Patterson in the position that he would have occupied had he not engaged in protected conduct, I find that his increase should be adjusted to the equivalent of the average for those employees who received a rating of "2." *See Curtis Hall/Bechtel National, Inc.*, 30 DOE ¶ _____, Case Nos. TBA-0042/TBA-0064 (February 13, 2008) (stating that the goal of the restitutionary remedies in 10 C.F.R. § 708.36 is "to restore employees to the position that they would have occupied but for the retaliation").

---

[20] Patterson has requested the following remedies: reinstatement; back pay and benefits for the three-day suspension, the four days attending the hearing, one day spent at a deposition, and other uncompensated time off related to his participation in the Part 708 proceeding complaint; attorney fees; removal of retaliatory actions from his personnel file; an adjustment of his 2006 zero merit increase to the average of the wage increase for employees who received the highest rating; and a revision of his 2006 performance evaluation to reflect his actual performance. Tr. at 299-302.

[21] I will not order that his 2006 performance review be revised to reflect his actual performance because the wage increase (for a "2" rating) has abated the violation. 10 C.F.R. § 708.36 (a) (5).

In his complaint, Patterson requested reassignment to the position of Manager of the Employee Concerns and Business Ethics Office. Although I concluded above that BEA has not presented clear and convincing evidence that it would have reassigned Patterson absent his protected conduct, I cannot find that Patterson is entitled to reinstatement as Manager of the Employee Concerns and Business Ethics Manager because that position no longer exists. In September 2007, Benson changed the position to "Senior Auditor/Employee Concerns Manager." Benson testified that he modified the position because the Employee Concerns workload did not warrant a full time employee, and BEA presented credible evidence to support that argument.[22] BEA also maintains that the position was changed to a two-year rotation in order to provide career development and cross training for its employees. Reinstatement is an equitable remedy, and an examination of the evidence leads me to conclude that the equities weigh against reinstatement. *See Robert Burd*, 28 DOE at 89,201. According to Benson's testimony, the new position is a lower level (Specialist 3 or 4) than Patterson's current level (Specialist 5). An equitable remedy cannot put the complainant in a worse position than the position that he currently occupies.[23] As Senior Auditor/Employee Concerns Manager under Benson's new position, Patterson would be subject to an even lower salary scale, and would be effectively demoted. However, BEA should review all currently available vacancies in order to determine if a position comparable to Patterson's old position exists, for which Patterson qualifies. If there is a comparable position, and if Patterson is in agreement, BEA shall transfer Patterson to that position.

It Is Therefore Ordered That:

(1) The Request for Relief filed by Mr. Dennis Patterson under 10 C.F.R. § 708 is hereby granted as set forth below, and denied in all other respects;

(2) Within 30 days of its receipt of this Decision, BEA shall remove the notice of suspension and other notices of retaliatory actions from Mr. Patterson's personnel file;

(3) Within 30 days of receipt of this Decision, BEA shall revise Mr. Patterson's 2006 wage increase to the average of employees who were rated a "2" on their INL 2006 Performance Review;

---

[22] It is important to examine BEA's justification for radically changing Patterson's position after he filed his Part 708 complaints. Tr. at 882. A contractor should not dissolve a whistleblower's job in anticipation of, or as a barrier to, the possibility that OHA will order reinstatement of the whistleblower. However, an examination of the evidence finds that there is merit to BEA's argument that the position of Employee Concerns (EC) Manager does not require a full time employee. The EC Office investigated only a handful of concerns annually. Ex. 126. Further, BEA can determine its own corporate structure, and its actions (as well as those of its predecessor BBWI) show a preference for an EC Manager who is less visible and lower in the corporate hierarchy than LIMITCO. At LIMITCO, the EC Manager was a highly visible manager who reported directly to the president and who also had responsibility for the ethics function. Thus, I find that BEA has presented evidence to support the modification of the position.

[23] However if Patterson so chooses, he should be considered for rotation into this position, especially in light of BEA's expressed desire to salvage his career at INL.

(4) Within 30 days of receipt of this Decision, Mr. Patterson shall send BEA and the Hearing Officer a report setting forth the number of days of lost pay related to his participation in this proceeding;

(5) Within 30 days of receipt of this Decision, Mr. Patterson shall send BEA and the Hearing Officer a bill for attorney fees reasonably incurred to prepare for and participate in proceedings leading to the Initial Agency Decision. The fees shall be calculated using the lodestar approach;

(6) Within 30 days of this decision, BEA shall notify Mr. Patterson and the Hearing Officer if there is a vacancy comparable to Mr. Patterson's previous position;

(7) If a comparable position is identified and Mr. Patterson desires to transfer to that position, BEA shall transfer Mr. Patterson to that position within 30 days of his request for a transfer;

(8) The parties will have up to 30 days from the later of BEA's receipt of Mr. Patterson's bill for attorney fees or BEA's receipt of Mr. Patterson's calculation of the number of days of lost pay and benefits to discuss and negotiate any disputes regarding those two items. During the period of negotiation, both parties will provide reasonable information to the other party to facilitate the other party's understanding of the calculations;

(9) Within 30 days of the end of the period of negotiation, BEA shall reimburse Mr. Patterson for the lost pay and benefits related to his participation in this proceeding;

(10) Within 30 days of the end of the period of negotiation, BEA shall reimburse Mr. Patterson for his attorney fees reasonably incurred to prepare for and participate in proceedings leading to the Initial Agency Decision;

(11) Mr. Patterson's request for reinstatement to the position of Manager of the Employee Concerns and Business Ethics Office is denied;

(12) Mr. Patterson's request for a wage increase consistent with the average for those employees who received a top performance rating in their 2006 performance appraisal is denied; and

(13) Mr. Patterson's request that his 2006 Performance Review be revised to reflect his actual performance is denied.

(14) This is an Initial Agency Decision, which shall become the Final Decision of the Department of Energy unless, within 15 days of receiving this decision, a Notice of

Appeal is filed with the Office of Hearings and Appeals Director, requesting review of the Initial Agency Decision.

Valerie Vance Adeyeye
Hearing Officer
Office of Hearings and Appeals

Date: June 20, 2008

November 8, 2007

DECISION AND ORDER
OF THE DEPARTMENT OF ENERGY

Initial Agency Decision

Name of Petitioner: Frederick L. Higgs

Date of Filing: December 7, 2006

Case Number: TBH-0057

This Decision concerns a whistleblower complaint that Frederick L. Higgs (the complainant) filed under the Department of Energy's Contractor Employee Protection Program, 10 C.F.R. Part 708, against his former employer, Texas Environmental Plastics, Ltd. (TEP), a DOE subcontractor at the DOE's Savannah River Site in Aiken, South Carolina.[1] The complainant contends that he made a number of disclosures that are protected under Part 708, and that TEP retaliated against him for making those disclosures by terminating his employment. As relief from this alleged reprisal, the complainant seeks back pay and additional monetary compensation as well as reinstatement as a TEP employee in the position of "key" employee, a position he did not hold before his employment was terminated. After considering all the submissions by the parties and all the testimony received at the hearing held on this matter, I have concluded that the complainant has not made a disclosure protected under Part 708 and, therefore, is not entitled to relief.

I. Background

A. The Contractor Employee Protection Program

The DOE's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent fraud, mismanagement, waste and abuse" at DOE's government-owned, contractor-operated facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purpose is to encourage contractor employees to disclose information that they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers.

---

[1] TEP is a subcontractor of Tetra Tech EC, Inc., which is, in turn, a subcontractor of Washington Savannah River Company, the management and operations contractor of the Savannah River Site.

The regulations governing the DOE's Contractor Employee Protection Program are set forth at Title 10, Part 708 of the Code of Federal Regulations. The regulations provide, in pertinent part, that a DOE contractor may not discharge or otherwise discriminate against any employee because that employee has disclosed, to a DOE official or to a DOE contractor, information that the employee reasonably believes reveals a substantial violation of a law, rule, or regulation or a substantial and specific danger to employees or to public health. *See* 10 C.F.R. § 708.5(a)(1), (2). Employees of DOE contractors who believe that they have been discriminated against in violation of the Part 708 regulations may file a whistleblower complaint with the DOE and are entitled to an investigation by an investigator from the Office of Hearings and Appeals (OHA), an evidentiary hearing before an OHA Hearing Officer, and an opportunity for review of the Hearing Officer's Initial Agency Decision by the OHA Director. 10 C.F.R. §§ 708.21, 708.32.

B. Procedural History

On April 1, 2006, the complainant filed a whistleblower complaint with the Employee Concerns Program of the DOE's Savannah River Operations Office. After attempting to resolve the complaint through union arbitration, the Employee Concerns Program determined that those efforts had failed, and transmitted the complaint to the OHA, together with the complainant's request that the OHA Director appoint a Hearing Officer to conduct an administrative hearing regarding the complaint without a preceding investigation. I was appointed the Hearing Officer for this proceeding on December 20, 2006.

In his complaint, Mr. Higgs contended that his disclosures concerned a "biased safety practice" and that he was "unlawfully fired for bringing up concerns of health and safety." Complaint at 4, 5. In preparation for the hearing, I obtained statements from the complainant and from a number of other individuals who had knowledge of the events surrounding Mr. Higgs' disclosures. I identified five disclosures that Mr. Higgs alleged were protected under Part 708, and one alleged reprisal for those disclosures, his termination from employment with TEP. Four disclosures concerned the wearing of, or failure to wear, safety vests on the worksite. The fifth disclosure addressed the failure to service the portable toilets on the worksite.

At the hearing convened on February 21, 2007, I heard testimony from Mr. Higgs; Navann Chou, Mr. Higgs' supervisor; Crystal Smith, a fellow employee who had been appointed "safety person" for the TEP work crew; Sam Mangrum, an estimator for TEP who arranged for the company's labor needs at the Savannah River worksite; and Michael Estess, the senior project manager in remediation for Tetra Tech, and the individual responsible for the construction project on which Mr. Higgs worked. Both parties submitted additional documents at the hearing and after the hearing, which I have accepted into the record.

II. Findings of Fact

In this section, I will lay out the evidence received in this proceeding that has permitted me to determine facts, events and circumstances surrounding Mr. Higgs' alleged disclosures. Although I also received evidence concerning TEP's alleged acts of retaliation, I will not address this evidence. Because I find that Mr. Higgs did not make a disclosure that was protected under Part 708, I need not consider actions taken allegedly in retaliation for a protected disclosure.

Mr. Higgs was employed by TEP as a general laborer for a four-month period, from August 2005 to December 12, 2005. He was a union steward for the Laborers' International Union Local 515 during that time. Transcript of Hearing (Tr.) at 11, 36, 53. He worked under the direction of a supervisor on a construction site where heavy equipment shared the terrain with laborers working on the ground. *Id.* at 16, 46, 65. Due to the hazardous conditions of the worksite, all workers were required to wear protective gear, including high-visibility clothing. *Id.* at 15, 225.

A. The Disclosures

1. Disclosure to Annatah Vongtajack

In his complaint and at the hearing, Mr. Higgs asserted that his first protected disclosure occurred when he told Annatah Vongtajack, a co-worker, that he was not wearing a safety vest. *Id.* at 13, 37. The date of this event is uncertain, but it appears to have taken place in November 2005. Restatement of Complaint (January 30, 2007).

2. Disclosure to Thomas Brantley

Mr. Higgs then reported to Thomas Brantley that Mr. Vongtajack was refusing to wear a safety vest. Mr. Brantley is an engineer who was working for QORE, another subcontractor to Tetra Tech. *Id.* at 17-18. The evidence indicates that this disclosure was made later on the same day as the first disclosure. *Id.*

3. Disclosure at Safety Meeting

During the period of Mr. Higgs' employment, each morning on the site began with a safety training meeting which all workers on the site were required to attend, including his supervisor, Navann Chou. *Id.* at 195, 200. At one such meeting, Mr. Higgs raised issues concerning safety practices on the worksite, including Mr. Vongtajack's failure to wear a safety vest. *Id.* at 20, 144. The evidence is inconclusive with respect to other details of his speech. I have, however, determined that this event occurred at least a week after the first two disclosures and possibly as late as December 9, 2005. I have also determined that Mr. Higgs invoked the names of other workers whom he had observed not wearing safety vests, and that the gist of his speech was that enforcement of the rule

that required wearing safety vests was "biased," in that some workers were required to wear safety vests, while others were not. *Id.* at 20-21, 52.[2]

4. Disclosures to the Crystal Smith

In November 2005, Mr. Chou appointed Crystal Smith, a co-worker of Mr. Higgs, as a "safety person" for the TEP employees on the worksite. She received training for that role, and her duties included ensuring that the workers wore appropriate protective equipment, including safety clothing. *Id.* at 132, 138. Mr. Higgs testified that he spoke with Ms. Smith on December 12, 2005, less than an hour before he was given his separation notice, about two workers not wearing their safety vests, Thomas Skronski, a QORE engineer, and Tony Glenn, a TEP co-worker. *Id.* at 24-25. At the hearing, Ms. Smith recalled that Mr. Higgs spoke with her in November 2005 about two workers not wearing their safety vests, Mr. Skronski and Mr. Vongtajack. *Id.* at 132. Upon further questioning, she recalled that Mr. Higgs also spoke to her about safety vests, possibly on December 12, 2005, or possibly the week before, regarding the same individuals Mr. Higgs had mentioned. *Id.* at 147, 159. Although the witnesses' memories had faded by the time of the hearing, I can safely conclude that Mr. Higgs made at least one disclosure to Ms. Smith regarding the failure of some workers to wear safety vests, and that at least one such disclosure occurred no more than one month before, and possibly on the day of, his termination of employment.

5. Disclosure Concerning Portable Toilet Maintenance

Mr. Higgs testified that on December 12, 2005, he spoke to Ms. Smith, TEP's "safety person," about the fact that the portable toilets on the worksite had not been serviced over the weekend preceding that workday. He further stated that she informed him she would bring that matter to the attention of the safety committee. *Id.* at 55-56. This disclosure occurred in the same conversation with the fourth disclosure, discussed in the above paragraph. The evidence is unclear as to whether this disclosure occurred on December 12, 2005, or during the week before that date, but I can conclude for the purposes of this decision that Mr. Higgs made a disclosure to Ms. Smith regarding the condition of the portable toilets within a week of the day his employment was terminated.

It is clear from the summary of this evidence that there are factual inconsistencies regarding the dates on which Mr. Higgs disclosed his concerns about the wearing of safety vests and the maintenance of the on-site portable toilets. Nevertheless, there is sufficient evidence to support a finding that Mr. Higgs disclosed those concerns to a number of individuals.

---

[2] Despite this proclamation of bias during his disclosure, Mr. Higgs has not alleged that the bias itself was a violation of law, rule or regulation. Consequently, for the purposes of this proceeding, I have focused on whether his disclosure of the failure to wear safety vests, rather than the inconsistent enforcement of that requirement, constituted a protected disclosure.

B. Reasonable Belief that Disclosures Revealed a Substantial Violation of Law, Rule or Regulation or a Substantial and Specific Danger to Employees or to Public Health

At various stages of this proceeding, Mr. Higgs has contended that he believed his disclosures were protected under Part 708. I will next summarize the evidence regarding whether he reasonably believed the concerns he disclosed to these individuals revealed a "substantial violation of law, rule or regulation" or "a substantial and specific danger to employees or to public health," a requisite condition for the disclosures to be considered protected under the applicable regulations. 10 C.F.R. § 708.5(a)(1), (2).

Mr. Higgs described his concern in his April 1, 2006 complaint, as follows: "I believe that according to the laws of the contract under which I worked I was discriminated against and was unlawfully fired for bringing up concerns of health and safety which was my duty as steward to do. . . . I seek through DOE protection of 10 C.F.R. Part 708." Complaint at 5. Because Mr. Higgs was not represented by counsel at the hearing, I questioned him in an effort to assist him in building a record with respect to his five disclosures. As we discussed each disclosure, I asked him what his basis was for claiming that the disclosure was protected under Part 708. His responses can be summarized as follows. Regarding the first disclosure, made to Mr. Vongtajack, Mr. Higgs stated that he believed that not wearing a safety vest "violat[ed] the safety regulations." When asked what regulations had been violated, Mr. Higgs stated:

> That safety vest is to be worn in that area. There's a sign when we enter that gate each day to wear the proper PPE [personal protection equipment] with hard hat, safety vest, and safety shoes and safety glasses.

Tr. at 15. The actual content of that sign is not in evidence. On cross-examination, Mr. Higgs stated that he believed not wearing a safety vest was a violation but not a substantial violation. Tr. at 15, 39. Concerning his third disclosure, at a daily safety meeting, Mr. Higgs testified in a similar manner. He stated that he "believed it was a violation of the regulations and laws," but not a substantial one. Tr. at 22.

When testifying about his second disclosure, which he made to Thomas Brantley of QORE, he stated that Mr. Vongtajack's failure to wear a safety vest was a safety concern; he further stated that it was Mr. Vongtajack's safety that was at stake, not his. *Id.* at 19. As for the fourth disclosure about safety vests, made to Ms. Smith, when Mr. Higgs was asked who was at risk because Mr. Skronski was wearing a red and black hooded jacket but no safety vest, Mr. Higgs testified, "I imagine it would be a risk to him, or whoever he was working with where his visibility wasn't seen." *Id.* at 77. Finally, with respect to the fifth disclosure, Mr. Higgs did not cite any law, rule or regulation that set a minimum schedule for servicing portable toilets, but rather maintained that the failure was an "infringement of health" and "unhealthy." *Id.* at 27-28, 74. He also stated that shortly after this fifth disclosure, the portable toilets were serviced. *Id.* at 25.

TEP presented a great deal of evidence regarding the safety requirements on the worksite. Michael Estess, the senior project manager in remediation for Tetra Tech, and the individual responsible for the construction project on which Mr. Higgs worked, testified on this topic. According to his testimony, there was no law, rule or regulation that required that safety vests be worn. *Id.* at 197-98, 234-35. Tetra Tech imposed on itself and its sub-contractors a high-visibility clothing requirement for the specific site on which Mr. Higgs worked, because it was located along one of the main roads of the Savannah River Site and had a lot of traffic passing by. *Id.* at 199. The source of the requirement was a Task-Specific Plan (TSP) for that project, two versions of which TEP submitted into evidence at the hearing. Task Specific Plan (TSP) SSHASP for GSACU – TtFW Project 2919, dated August 15, 2005 and October 14, 2005. On the first page of each version, under "Required Safety Measures/PPE," the following appears: "Wear reflective and/or brightly colored vests or high-visibility clothing if working near traffic or equipment paths." He testified that high-visibility clothing is "[n]ot just the stuff we issue. But if they bring in something that qualifies as high visibility clothing, they've met out company procedure [sic] site specific health and safety plan." *Id.* at 224. Mr. Estess clarified that there was no requirement that safety vests specifically be worn; the TSP merely required some form of high-visibility clothing. *Id.* at 224-25.

Crystal Smith, the on-site safety person, and Mr. Higgs testified about the enforcement of the safety clothing requirement. The evidence indicates that Mr. Vongtajack, Mr. Skronski and Mr. Glenn were wearing red jackets or shirts at the time Mr. Higgs disclosed their failure to wear safety vests. *Id.* at 25, 52 (testimony of Mr. Higgs); 138-39 (testimony of Ms. Smith). Mr. Higgs stated that, after his disclosures, safety officials required Mr. Vongtajack and Mr. Glenn to put on safety vests, but did not require Mr. Skronski to do the same. *Id.* at 25, 44. Ms. Smith testified that Mr. Skronski had had his red jacket approved as high-visibility clothing. *Id.* at 135; *see also id.* at 201 (testimony of Mr. Estess). There is no evidence that Mr. Vongtajack or Mr. Glenn had done so. There is conflicting testimony regarding whether Ms. Smith or anyone else communicated to Mr. Higgs that Mr. Skronski's jacket had been approved as high-visibility clothing. *Id.* at 97 (testimony of Mr. Higgs), 135-36 (testimony of Ms. Smith). Finally, Ms. Smith testified that she was informed during November 2005 that the definition of "high-visibility clothing" was re-defined such that it could no longer be red, but had to be either bright green or bright orange. *Id.* at 139-40.

TEP produced evidence that shed light on Mr. Higgs' belief at the time of his disclosures. At the hearing, Mr. Estess testified that all workers are informed orally of the terms of the TSP for their work location at a meeting held before work activity begins on the site, at which they sign an attendance sheet. *Id.* at 235. While that statement indicates that Mr. Higgs was likely informed at that meeting about the safety equipment requirements, additional evidence demonstrates that he was informed specifically about what articles qualified as high-visibility clothing. In a statement submitted into the record on February 6, 2007, Mr. Estess wrote, "It was explain[ed] by myself and Harry Atwood, [Tetra Tech] Safety Manager, to Mr. Higgs that Mr. Skronsk[i] was wearing a High Visibility jacket that had been approved by the safety department and had been discussed in prior safety meetings." Letter from Michael Estess to Sam Mangrum, February 5,

2007. He also replied to Mr. Higgs' questioning at the hearing as follows: "[Y]ou turned the conversation on Mr. Skronski. At that point, the explanation given to you [about] the jacket just did not satisfy you. You kept calling that we were showing double standards on our project which was untrue." Tr. at 219. In addition, Ms. Smith testified that when the rules changed regarding which colors were permitted on high-visibility clothing, this change was communicated to the workers at daily safety meetings. *Id.* at 148.

III. Analysis

A. Legal Standards Governing This Case

The obligations on each of the parties to this proceeding are established in the governing regulations. One provision of the regulations defines what constitutes employee conduct that is protected from retaliation by an employer. The portions of that provision that are pertinent to Mr. Higgs' complaint require that an employee file a complaint that alleges that he has been subject to retaliation for disclosing, to a DOE official, a member of Congress, any government official who has responsibility for the oversight of the conduct of operations at a DOE site, or his employer or any higher tier contractor, information that he reasonably believes reveals a substantial violation of a law, rule, or regulation or a substantial and specific danger to employees or to public health. 10 C.F.R. § 708.5(a)(1), (2). A second provision sets forth the burdens on the respective parties. The portions of that provision that are pertinent to Mr. Higgs' complaint state that the employee who files the complaint has the burden of establishing by a preponderance of the evidence that: (1) he or she made a disclosure, as described in § 708.5 of the regulations, and (2) the disclosure was a contributing factor in one or more alleged acts of retaliation against the employee by the contractor. 10 C.F.R. § 708.29. If the employee meets this burden, the burden then shifts to the contractor to prove by clear and convincing evidence that it would have taken the same action without the employee's disclosure, participation, or refusal. *Id.* Accordingly, in the present case, if Mr. Higgs establishes that he made a protected disclosure, and that disclosure was a factor that contributed to his termination, he is entitled to relief, unless TEP convinces me that it would have taken the same actions even if he had not engaged in any activity protected under Part 708.

It is therefore my task, as the Hearing Officer, to weigh the sufficiency of the evidence presented by Mr. Higgs and TEP in this proceeding. Preponderance of the evidence, the burden applied to Mr. Higgs' evidence, has been defined as proof sufficient to persuade the finder of fact that a proposition is more likely true than not. McCormick on Evidence, § 339 at 439 (4th Ed. 1992). Clear and convincing evidence, which TEP must provide in order to prevail against those claims for which Mr. Higgs has met his burden, has been described as that evidence sufficient to persuade a trier of fact that the truth of a contested fact is "highly probable." *Id.*, § 340 at 442. This latter burden is clearly more stringent than the former.

B. The Disclosures

As discussed above, the first step in determining whether Mr. Higgs is entitled to relief under the Part 708 regulations is to determine whether any of his disclosures qualify for protection from retaliation by an employer. To reach that determination, I must consider, for each disclosure, first, whether Mr. Higgs made the disclosure to a person described at section 708.5 of the regulations. If I find that he made the disclosure to an appropriate individual, I must then consider whether, for each disclosure, Mr. Higgs reasonably believed that his disclosure revealed a substantial violation of a law, rule, or regulation or a substantial and specific danger to employees or to public health. If Mr. Higgs fails to meet his burden of establishing, by the preponderance of the evidence, that he made at least one disclosure to an appropriate individual and that he reasonably believed it revealed a substantial violation or a substantial and specific danger, then he has not made a *prima facie* case and his claim must be denied. If he does meet that burden, then he must prove that the disclosure was a contributing factor in the personnel action taken against him, that is, his termination of employment.

1. Whether Mr. Higgs Made a Disclosure to an Appropriate Individual

The Part 708 regulations, which govern this proceeding, require that a disclosure be made to an appropriate individual in order to be protected from retaliation by an employer. In the first of Mr. Higgs' disclosures, he alleges that he told his co-worker, Mr. Vongtajack, that he was not wearing a safety vest. Tr. at 13. Mr. Vongtajack was a co-worker and an employee of TEP. There is no evidence that Mr. Vongtajack held any position in TEP, such as a supervisor, from which I might infer that TEP had received notice of this disclosure. Rather, the evidence indicates that all workers on the site were encouraged to "challenge" each other when they observed a safety concern. *Id.* at 202-03 (testimony of Mr. Estess). It appears to me that it was in this spirit that Mr. Higgs made his first disclosure. At the hearing, Mr. Higgs testified that he also reported this matter to his supervisor, Navann Chou. *Id.* at 51. This disclosure was not reported, however, in his initial complaint to the Employee Concerns Program nor in the restatement of his complaint he provided to me on January 30, 2007, at my request. Furthermore, Mr. Chou testified that Mr. Higgs did not speak to him about this concern. *Id.* at 119. Elsewhere in their respective testimony, both Mr. Higgs and Mr. Chou were uncertain whether they had spoken about this issue. *Id.* at 50-51, 128. In light of this evidence, Mr. Higgs has not met his burden of showing that such a communication actually took place. Consequently, I conclude that Mr. Higgs' first disclosure was made only to Mr. Vongtajack. Because Mr. Vongtajack, as a co-worker, was not "a DOE official, a member of Congress, any government official who has responsibility for the oversight of the conduct of operations at a DOE site, [Mr. Higgs'] employer or any higher tier contractor," 10 C.F.R. § 708.5, this disclosure does not qualify as a protected disclosure under Part 708.[3]

[3] Even if I were to consider that a disclosure to Mr. Vongtajack, as an employee of TEP, constituted a disclosure to TEP, this disclosure would nevertheless not be protected under Part 708, for the reasons set forth below in the section analyzing Mr. Higgs' reasonable belief.

I reach the same conclusion with respect to Mr. Higgs' second disclosure. This disclosure also concerned Mr. Vongtajack's failure to wear a safety vest, and was made to Thomas Brantley, a QORE employee. Although Mr. Higgs testified that he did not know the contractual relationship between TEP and QORE, *id.* at 42, it is evident to me that he understood that Mr. Brantley and he worked for different employers. In any event, Mr. Brantley was not in fact "a DOE official, a member of Congress, any government official who has responsibility for the oversight of the conduct of operations at a DOE site, [Mr. Higgs'] employer or any higher tier contractor." 10 C.F.R. § 708.5. Consequently, this disclosure does not qualify as a protected disclosure under Part 708.

I find that the remaining three disclosures were made to individuals who meet the requirements of 10 C.F.R. § 708.5. Because all workers were required to attend the daily safety training meeting, it is more likely than not that Mr. Higgs' supervisor, Mr. Chou, was in attendance on the day that he made his third disclosure, in which he contended that the enforcement of safety practices was biased, in that some workers were required to wear safety vests and others were not. Mr. Higgs made his fourth and fifth disclosures to Crystal Smith, a co-worker employed by his employer and named the "safety person" for their work group. Because she had been given a responsibility for safety issues by their employer, his disclosures to her, particularly because they related to her official role, can reasonably be considered disclosures to the employer. Consequently, Mr. Higgs' disclosures to Mr. Chou and Ms. Smith constitute disclosures to his employer, TEP, which comports with one of the requirements set forth in 10 C.F.R. § 708.5. As a result, I will now consider whether Mr. Higgs reasonably believed that any of these disclosures met the additional requirements of that section.

2. Whether Mr. Higgs Reasonably Believed His Disclosures Revealed a Substantial Violation of a Law, Rule or Regulation, or a Substantial and Specific Danger to Employees or to Public Health

At various times during the hearing, Mr. Higgs testified that failure to wear safety vests on the worksite both violated a law, rule or regulation and posed a danger to employees. While unable to cite a specific law, rule or regulation by name, he testified that a sign posted at the entrance to the worksite stated that appropriate protective gear, including safety vests, must be worn. On the other hand, both Ms. Smith and Mr. Estess testified that vests *per se* need not be worn, but that high-visibility clothing must be worn. High-visibility clothing did not need to be a vest, but it did need to be brightly colored, in accordance with established rules that changed in minor respects during Mr. Higgs' period of employment. In addition, TEP entered into evidence a Task Specific Plan, which included among its safety measures the requirement that high-visibility clothing be worn on Mr. Higgs' worksite. The preponderance of the evidence presented in this proceeding is that high-visibility clothing, but not necessarily safety vests, were required to be worn on the worksite. The evidence before me also demonstrates that the three individuals Mr. Higgs identified in his disclosures as not wearing safety vests were wearing red shirts or jackets at the time he made his disclosures. Finally, the preponderance of the evidence received in this proceeding indicates that Mr. Higgs was

informed that certain brightly colored clothing articles had been approved as high-visibility clothing and deemed suitable protective equipment in lieu of safety vests. After considering all the evidence presented in this proceeding, I conclude that it was not reasonable for Mr. Higgs to believe that safety vests were inherently safer than high-visibility clothing in his particular working environment, nor that any rule in effect required that safety vests be worn.[4] Therefore, I have determined that Mr. Higgs has not demonstrated by the preponderance of the evidence that he reasonably believed his disclosures revealed a substantial violation of a law, rule, or regulation. Moreover, even if I were to assume that a law, rule or regulation required safety vests to be worn, the violations he alleged in his disclosures were not substantial: the purpose of any such rule would be to ensure the visibility of the workers, and the individuals about whom he made the disclosures were wearing bright clothing, regardless of whether it met the technical requirements of the rule. Consequently, I cannot find that Mr. Higgs demonstrated by the preponderance of the evidence that the danger he has alleged was substantial and specific.

As for his disclosure about the portable toilets, I find that Mr. Higgs did not reasonably believe that it revealed a substantial violation of a law, rule, or regulation or a substantial and specific danger to employees or to public health. Mr. Higgs' testimony in this regard was that he knew there must be some regulation that required portable toilets to be maintained periodically, but he could not identify any. He also testified that the lack of maintenance presented an "infringement of health" and was "unhealthy." It is not unreasonable for Mr. Higgs to assume that a law, rule or regulation exists that generally regulates the provision of sanitary facilities on a construction site. No evidence was presented in this proceeding, however, that demonstrated any requirement that the portable toilets be serviced on any specified time schedule. Consequently, I cannot find that Mr. Higgs' disclosure that the toilets had not been serviced over the preceding weekend reveals a "substantial" violation of any law, rule or regulation, even assuming the existence of a law, rule or regulation generally regarding sanitary facilities. Furthermore, without any evidence regarding the condition of the portable toilets at the time of the disclosure, Mr. Higgs' testimony alone fails to meet his burden of establishing that their condition presented a "substantial and specific" danger to employees or public health.

Because Mr. Higgs has not met his burden of establishing that he reasonably believed these disclosures revealed a substantial violation of law, rule or regulation, or a substantial and specific danger to employees or to public health, these disclosures do not comport with the description of protected activity under 10 C.F.R. § 708.5. Therefore, I

---

[4] As I noted in section II.A.3 above, at the time of his disclosures, it appears that Mr. Higgs was less focused on the danger or violation of rule inherent in the failure to wear safety vests and more concerned that the rule was being enforced in a "biased" manner, in that some workers were required to wear safety vests, while others were not. *Id.* at 20-21, 52. As the evidence has established, the alleged inconsistency in TEP's application of the protective clothing rule was merely a matter of perception and did not support a reasonable belief that its disclosure revealed a substantial violation of a law, rule or regulation or a substantial and specific danger to employees or public health.

find that Mr. Higgs has not engaged in activity protected from retaliation under that provision of the Part 708 regulations.

IV. Conclusion

As set forth above, I have concluded that the complainant has not met his burden of establishing by a preponderance of the evidence that he engaged in an activity protected under 10 C.F.R. Part 708. After a thorough review of the evidence offered in this proceeding, I find that Mr. Higgs made two disclosures that are not protected under Part 708 because he did not make them to his employer or any other person defined in the regulations as an appropriate person to receive a disclosure. Moreover, although Mr. Higgs made three disclosures to his employer, he could not reasonably have believed that his disclosures revealed a substantial violation of law, rule, or regulation, or a substantial and specific danger to employees or to public health. Consequently, he has failed to establish the existence of activity that would merit protection under the DOE's Contractor Employment Protection Program. Accordingly, I have determined that Mr. Higgs is not entitled to the relief he has requested in his complaint.

It Is Therefore Ordered That:

(1) The request for relief filed by Frederick L. Higgs under 10 C.F.R. Part 708 on December 7, 2006, is hereby denied.

(2) This is an initial agency decision that becomes the final decision of the Department of Energy unless a party files a notice of appeal by the 15th day after receipt of the decision in accordance with 10 C.F.R. § 708.32.

May 21, 2008

DEPARTMENT OF ENERGY

OFFICE OF HEARINGS AND APPEALS

Initial Agency Decision
Motion To Dismiss

Name of Case:	Richard L. Urie
Dates of Filing:	May 15, 2007 July 19, 2007
Case Numbers:	TBH-0063 TBZ-0063

This Decision concerns a Complaint filed by Richard L. Urie (hereinafter referred to as "Mr. Urie" or "the Complainant") against Los Alamos National Laboratory (hereinafter referred to as "LANL" or "the Respondent"), his former employer, under the Department of Energy's (DOE) Contractor Employee Protection Program regulations found at 10 C.F.R. Part 708. At all times relevant to this proceeding, LANL was a DOE contractor operating in Los Alamos, New Mexico. It is the Complainant's contention that during his employment with LANL, he engaged in protected activity and, as a consequence, suffered reprisals by LANL. Among the remedies that the Complainant seeks are reinstatement, back pay, and reimbursement for legal and other expenses. As discussed below, I have concluded that Mr. Urie is not entitled to the relief that he seeks.

I. Background

A. Regulatory Background

The DOE established its Contractor Employee Protection Program to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste, and abuse" at DOE's Government-owned or -leased facilities. *See* Criteria and Procedures for DOE Contractor Employee Protection Program, 57 Fed. Reg. 7533 (1992). The Program's primary purpose is to encourage contractor employees to disclose information that they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers. The Part 708 regulations prohibit retaliation by a DOE contractor against its employee because the employee has engaged in certain protected activity, including:

> (a) Disclosing to a DOE official, a member of Congress, . . . [the employee's] employer, or any higher tier contractor, information that [the employee] reasonably believe[s] reveals—
>
> (1) A substantial violation of any law, rule, or regulation;

(2) A substantial and specific danger to employees or to public health or safety; or

(3) Fraud, gross mismanagement, gross waste of funds, or abuse of authority.

57 Fed. Reg. 7541, March 3, 1992, as amended at 65 FR 6319, February 9, 2000, codified at 10 C.F.R. § 708.5.

An employee who believes that he or she has suffered retaliation for making such disclosures may file a complaint with the DOE. It is the burden of the complainant under Part 708 to establish "by a preponderance of the evidence that he or she made a disclosure, participated in a proceeding, or refused to participate, as described under § 708.5, and that such act was a contributing factor in one or more alleged acts of retaliation against the employee by the contractor." 10 C.F.R. § 708.29. If the complainant meets this burden of proof, "the burden shifts to the contractor to prove by clear and convincing evidence that it would have taken the same action without the employee's disclosure, participation, or refusal." *Id.*

B. Factual Background

The following facts are not in dispute. Mr. Urie is an experienced industrial hygienist who began working in LANL's Emergency Operations Division (EOD) in October 2003. He was the Team Lead for the Biological Emergency Support Team (BEST), which was a deployable air monitoring team that performed work for the U.S. Department of Homeland Security and other governmental organizations. During his tenure in EOD, the Complainant reported to William J. Flor, a group leader. During the period relevant to this case, Mr. Flor reported to Beverly A. Ramsey, the Acting EOD Director.

In the spring of 2005, Mr. Urie was transferred to the respondent's Health, Safety and Radiation Division (HSR). These employees were deployed, as needed, to do projects for other LANL offices. The complainant reported to Phillip Romero, who in turn reported to Barbara Hargis. Ms. Hargis' supervisor was John McNeel. During the period from February 6, 2006, until his departure from LANL in April 2006, Mr. Urie was detailed to Ms. Hargis. In May 2006, the Complainant began working for another company, Kellogg, Brown & Root, LLC (KBR). During his brief tenure with KBR, Mr. Urie worked on a project involving a LANL subcontractor, KSL Services Joint Venture (KSL). Mr. Urie left KBR in June 2006.

C. Procedural Background

On July 17, 2006, Mr. Urie filed a Part 708 Complaint with the Manager of the DOE's Office of Employee Concerns Program at the National Nuclear Security Administration Service Center in Albuquerque, New Mexico. LANL filed a response to this Complaint, conducted its own investigation, and then issued a report dated February 15, 2007. The Complaint was not resolved, and the Complainant requested that it be forwarded to the Office of Hearings and Appeals (OHA) for an investigation and hearing. The Employee Concerns Program Manager forwarded the Complaint to OHA on February 22, 2007, and the Acting OHA Director appointed an investigator. The OHA investigator interviewed Mr. Urie and three LANL employees and reviewed a large number of documents before issuing a Report of Investigation (ROI) on May 15, 2007.

On that same day, the Acting OHA Director appointed me as the Hearing Officer in this case. Given the findings of the OHA investigator, discussed in Section D below, I requested that the parties submit pre-hearing briefs concerning whether Mr. Urie's Complaint should be dismissed. [1] The parties submitted these briefs on July 9, 2007. I conducted a three-day hearing in this case in Los Alamos, New Mexico, beginning on October 15, 2007. As more fully explained below, I dismissed a portion of the Complaint before taking testimony at the hearing. Over the course of the hearing, 12 witnesses testified. The Complainant introduced 22 exhibits into the record, and the Respondent introduced 58 exhibits. On January 22 and 23, 2008, respectively, the Respondent and the Complainant submitted written closing arguments, at which time I closed the record in the case.

D. Mr. Urie's Complaint and the Report of Investigation

As previously stated, Mr. Urie alleges in his Complaint that he made protected disclosures during his tenure with EOD. Specifically, he reported to LANL management: (1) gross misconduct, sexual harassment and fraud committed by a fellow LANL employee, (2) the failure of Mr. Flor to act upon Mr. Urie's request for a "safety stand-down," and (3) the intentional deletion of the Complainant's e-mails by Mr. Flor. Mr. Urie repeated these allegations on multiple occasions, most recently in an e-mail to LANL management on January 19, 2006.

In retaliation for making these disclosures, Mr. Urie alleges that LANL management: (1) failed to take action to stop sexual harassment and gross misconduct toward Mr. Urie, (2) cancelled training that he was to take part in, (3) failed to compensate him for 27 weekend and holiday days worked, (4) deleted a number of his e-mails, (5) did not return his security questionnaire until after several requests, (6) initially refused to transfer him from the EOD, (7) created a hostile working environment by failing to give him work, which eventually forced him to resign from LANL, (8) forced him to resign from a subsequent job by communicating to the subsequent employer that the Complainant was a whistleblower, and (9) gave a negative reference to a prospective employer. As relief for these alleged retaliations, the Complainant requests reinstatement, back pay, reimbursement of legal expenses, restoration of time toward retirement, and an opportunity for advancement. *See* July 15, 2006, letter from the Complainant to Eva G. Brownlow, DOE Employee Concerns Program.

After reviewing this Complaint, interviewing Mr. Urie and three LANL employees and examining a large number of documents, the OHA investigator concluded that Mr. Urie had disclosed a number of matters to LANL management which were "probably protected disclosures." ROI at 8. However, the investigator also concluded that "Mr. Urie has not shown, by a preponderance of the evidence, that the Contractor took the alleged adverse actions or, if the Contractor took the actions, the actions

---

1/ Specifically, I asked them to address the issues of whether that portion of the Complaint relating to alleged retaliations that occurred prior to Mr. Urie's transfer to HSR in March 2005 should be dismissed as untimely, whether those retaliations are related to the post-March 2005 alleged retaliations or to the relief requested by Mr. Urie, whether LANL retaliated against Mr. Urie by withholding work assignments, whether his March 2006 resignation from LANL was "forced," whether LANL took retaliatory actions against the Complainant subsequent to his resignation and, if so, whether those actions were covered under the Part 708 regulations. *See* May 17, 2007 letter to Mr. Urie and to Pablo Prando, Counsel for LANL.

are relevant to the instant complaint." ROI at 9. With regard to the Respondent's alleged retaliations against the Complainant during his tenure in EOD, the OHA investigator opined that they "do not warrant further consideration" because "they have a tenuous relationship to the principal alleged retaliations (*i.e.*, the withholding of work and the related "forced" resignation from his position in HSR) and to the request for relief," and are time-barred. In this regard, the investigator noted that under 10 C.F.R. § 708.14, an employee has 90 days from the alleged retaliation to file a complaint, and that over a year had elapsed between the alleged retaliations that occurred prior to Mr. Urie's transfer from EOD in March 2005 and the filing of the Complaint. ROI at 10. With regard to the alleged retaliations that occurred after the Complainant's transfer to HSR in March 2005 (*i.e.*, the "forced" resignation from LANL in April 2006 caused by LANL's failure to assign him sufficient work and LANL's alleged negative references to two employers), the OHA investigator concluded that Mr. Urie had not established, by a preponderance of the evidence, that they occurred, or, if they did occur, that they were covered under the Part 708 regulations.

E. LANL's Motion to Dismiss

As previously mentioned, after reviewing the ROI, I requested that the parties submit briefs concerning whether Mr. Urie's Complaint should be dismissed. Considering LANL's brief as a Motion to Dismiss (Case No. TBZ-0063), I issued an oral ruling on this Motion at the beginning of the hearing. Hearing Transcript (Tr.) at 13-16. Specifically, I determined that LANL's Motion should be granted as to that portion of the Complaint pertaining to the alleged retaliatory actions that took place prior to Mr. Urie's transfer to HSR in March 2005. I concluded that earlier alleged retaliations had a "tenuous relationship to later alleged retaliations," including the primary claim of "forced," or constructive discharge, and "no meaningful relationship" to the requested relief. I reached these conclusions in part because the LANL management that allegedly retaliated against Mr. Urie during his tenure in EOD (*i.e.*, Mr. Flor and Dr. Ramsey) were not the ones who allegedly withheld work from Mr. Urie and allegedly forced him to resign from his position in HSR . I further found that "no useful purpose would be served by resolving those issues on a more complete record," and consequently, I dismissed that portion of the Complaint pertaining to the alleged retaliations prior to Mr. Urie's transfer to HSR in March 2005. Tr. at 14. [2]

However, I denied the Respondent's Motion with regard to that portion of the Complaint concerning the alleged constructive discharge of Mr. Urie by LANL in April 2006 and the related issue of whether LANL retaliated against the Complainant by withholding work assignments. I concluded that unresolved issues of fact remained regarding these claims, Tr. at 17, and that the goals of the

---

2/ I also agree with the OHA investigator that this portion of the Complaint should be dismissed as untimely. Under § 708.14 of the regulations, complaints must be filed within 90 days of the date that the complainant knew, or should have known, of the alleged retaliation. Mr. Urie filed his Complaint on July 17, 2006, more than 16 months after the alleged pre-March 2005 retaliations. The Complainant has not presented any justification for this lengthy delay.

Part 708 Contractor Employee Protection Program would best be served by resolving these issues on a more complete record. [3] Tr. at 15-16.

I also declined to dismiss at that time the portion of Mr. Urie's complaint having to do with the alleged retaliations that occurred after the Complainant left the Respondent's employ. I observed that the question of whether post-employment alleged retaliations were covered under the Part 708 regulations appeared to be "a question of first impression in our Office," and I stated that I wanted "further time to consider the matter and to do it on a more complete factual record." Tr. at 16.

II. Analysis

As stated in Section I.A above, in order to prevail in a Part 708 proceeding, an employee must show, by a preponderance of the evidence, that he made a protected disclosure or engaged in protected behavior, and that this was a contributing factor to one or more alleged acts of retaliation by the contractor against the employee. For the reasons set forth below, I find that Mr. Urie did make protected disclosures. However, I conclude that LANL did not retaliate against him. I therefore need not address the issue of whether the protected disclosures were a contributing factor to any retaliation, and I will accordingly deny the Complainant's request for relief.

A. The Protected Disclosures

As previously discussed, an employee of a DOE contractor makes a protected disclosure when he or she reveals to that employer, a higher-tier contractor, a DOE official, a member of Congress, or any other government official with oversight authority at a DOE site, information that the employee reasonably believes reveals (i) a substantial violation of a law, rule or regulation; (ii) a substantial and specific danger to employees or to public health or safety; or (iii) fraud, gross mismanagement, gross waste of funds, or abuse of authority. 10 C.F.R. § 708.5(a).

Based on these standards, I find that Mr. Urie's January 19, 2006, memorandum to Mr. Romero and Mr. McNeel, in which he states that Mr. Flor knowingly and deliberately ignored a request for a safety stand-down, thereby jeopardizing the safety of his personnel, constitutes a protected disclosure. Complainant's Exhibit 15.

With regard to this allegation, the record shows that the Complainant requested this stand-down because he believed that LANL had not supplied some of its employees with equipment and training called for under guidelines promulgated by the Center for Disease Control that would properly protect the employees from possible exposure to biological or chemical hazards. Complainant's Exhibit 4. Given these guidelines and the Complainant's training and experience in this area, he clearly had a reasonable belief that this disclosure concerned a substantial and specific danger to LANL employees.

With regard to the other alleged disclosures in Mr. Urie's January 19, 2006, e-mail, I have examined them in detail and I find that none of the other matters raised by Mr. Urie rise to the level of a "protected disclosure" under 10 C.F.R. § 708.5(a).

3/ For the same reasons, I also denied LANL's Motion for Partial Summary Judgement. Tr. at 16-17.

B. The Alleged Retaliations

Under the Part 708 regulations, "retaliation" means "an action (including intimidation, threats, restraint, coercion or similar action) taken by a contractor against an employee with respect to the employee's compensation, terms, conditions or privileges of employment) as a result of the employee's disclosure of information" or participation in protected conduct as described in 10 C.F.R. § 708.5.

In his Complaint, Mr. Urie alleges three post-March 2005 retaliations. First, he claims that LANL constructively discharged him from his position in April 2006. Second, he alleges that after his departure from LANL, Dr. Ramsey gave a negative reference to Dynamic Corporation, a company with whom Mr. Urie was seeking employment. Finally, the Complainant contends that he was constructively discharged from a position with a subsequent employer, KBR, because a LANL employee informed KBR that Mr. Urie was a whistleblower.

1. The Alleged Constructive Discharge

Mr. Urie claims generally that the Respondent created a hostile work environment by providing him with a substandard physical working environment, by not communicating with him, and by withholding work from him. I will address each of these claims in turn.

a. Substandard Physical Working Environment

Mr. Urie contends that he was forced to work under substandard physical conditions toward the end of his tenure in HSR. Specifically, he testified that after his return to LANL at the end of November 2005 from approximately six weeks of unpaid leave (during which he worked for KBR in Iraq), he found out that he had been moved from his office to a cubicle, that he had no trash can, and that his computer was "in pieces." Hearing Transcript (Tr.) at 187-189. These conditions continued for an unspecified period of time, and there is nothing in the record to contradict these claims. However, it does not appear that Phillip Romero, Mr. Urie's Group Leader, knew of the situation with the Complainant's computer, Tr. at 556-557, and there is nothing in the record to indicate that he knew about Mr. Urie's lack of a trash receptacle. Moreover, an e-mail sent by Mr. Urie from a LANL work station would seem to indicate that he had access to a working computer as of January 3, 2006, Tr. at 310, Respondent's Exhibit (Resp. Ex.) 14, and Ms. Hargis has stated that when Mr. Urie began working for her in February 2006, he was provided with a new computer. Resp. Ex. 32, tab 86H (Statement of Barbara Hargis).

b. Management's Lack of Communications with Mr. Urie

Second, the Complainant contends that LANL management was not communicating with him during this period. Tr. at 26. It does appear that after his return from Iraq at the end of November 2005, there was little or no communication from management to Mr. Urie until January 2006 despite at least one instance in which he complained to Mr. Romero that he needed work. Tr. at 555. However, it is also apparent that Mr. Urie did not have a working computer during this period, which, of course, would make it difficult to receive e-mails. Also, Mr. Romero explained that the pace of work at the laboratory tended to slow in the time leading up to the holidays, and he indicated that this was why he did not respond to Mr. Urie's communication about needing work. Tr. at 556. The record does indicate that Mr. Romero and Ms. Hargis did communicate with Mr. Urie to some extent after January 1, 2006.

Mr. Romero's communications with the Complainant in the early part of 2006 primarily concerned Mr. Urie's announced intent to resign from LANL for personal reasons, issues regarding time and attendance, and Mr. Romero's concern with Mr. Urie's personal problems. In a December 22, 2005, e-mail to Mr. Romero (with copies to Mr. McNeel and four other employees), Mr. Urie stated

> Friends, I have been at Los Alamos for five years now and find that I have failed miserably with my personal and career goals. Those of you that know me, understand that I really never fit well with government work. I respectfully submit my resignation. I will be in tomorrow to begin processing and follow up after the holidays. Please cancel my Q clearance processing - never felt right about the intrusions. I understand that my absenteeism of late is unaceptable [*sic*]. I beg your indulgence, as my family life is a disaster and I have been out of the home, trying to sort things out. It is very difficult to face anyone at this time.

Respondent's Exhibit 1.

In a January 3 e-mail, Mr. Urie wrote

> Folks, it has been a real pleasure to work with each of you. However, due to personal reasons, I have submitted my resignation and my last day will be January 20th, to allow for transitional needs. I plan to go back into private consulting (either NM or Colorado based), cauz [*sic*] despite all the talent here, the best boss I ever had was me! I apologize for the disruptions, as I had planned to make a go of it here, but circumstances beyond my control are in effect. I look forward to these last few weeks with you.

In an undated e-mail sent to Mr. Urie sometime between January 3 and January 9, 2006, Tr. at 559, Mr. Romero said

> We have been trying to get a! hold [*sic*] of you for your Time and Effort, please note I need to approve time for this past week by 9:00 and need your time. Thus, please call me or Arlene so we can enter your time, hope things are going okay with you and also did you get a chance to ever talk to Barbara Hargis and John McNeel.

On January 9, 2006, Mr. Urie responded

> Phil, I need to back out my time from last Thursday/Friday. As a fellow professional, I am placing myself on unfit for duty status due to depression - no exageration [*sic*]. Last week I was contacted by UC payroll and informed that the IRS is garnishing 95% of my take home pay effective immediately stemming from a 1995 business/divorce tax issue. In addition, if I am to terminate, the IRS will garnish my retirement/savings upon liquidation. In short, I am F'd. I hit the emotional wall and am seeking medical and legal help this week. I very much want to speak with John and Barbara, but frankly I need some time to regain some sense of control.

On that same day, Mr. Romero responded

> First hang in there. I know these are difficult times but rest assured I am here to help in any way I can. Please let me know how things are proceeding. In terms of your time I believe you've expended your vacation and sick leave which were charged to

> cover this past pay period. In addition I believe we had Arlene enter LWOP for a day or two but if we need to change it we can. Please call me so we establish a path forward for reporting your time in the immediate future, in addition you may want to talk with an HSR-2 fitness for duty coordinator or someone in the employee assistance program. In either case please take care of your self and let me know if there is anything we can do on this end.

Respondent's Exhibit 2. In an e-mail sent to Mr. McNeel the next day, Mr. Romero indicated that he had made "numerous attempts" to contact the Complainant.

> Not sure you got the opportunity to see the message from Rich Urie yesterday, after numerous attempts I finally connected with him via his home e-mail address. It appears he is not doing well and I am concerned, please note I responded to his message but it may be a good idea if you could send him a reply as well. As I mentioned I am concerned for his safety and I indicated to him that help is available from HSR-2 "FFD" or the "EAP" sources.

Respondent's Exhibit 49.

In a January 19, 2006, e-mail to Mr. Urie, Mr. Romero wrote

> Need to talk to you, hope things are okay. Specifically I need to ask you a couple of questions regarding time and effort and potential options based on your circumstances and desires. Again hope things are going okay and please call me as soon as you get this message. You can call me at home as well 455-3430 or work 667-8332.

Respondent's Exhibit 15.

At the hearing, Mr. Romero testified that he did not receive Mr. Urie's December 22 e-mail until after the holiday break in early January, and that the Complainant was then absent from the office "on various types of leave through most of January." On the "twenty-second or twenty-third," he "talked to Mr. Urie about potential other opportunities, and tried to get him back into the workplace in some productive manner." Tr. at 497. He did this, he said, because he didn't "want to lose a good resource," and he was concerned about the Complainant's well-being. Tr. at 564.

The Complainant's communications with Ms. Hargis were more limited in nature, as was the period of time that he reported directly to her. The record indicates that she met with Mr. Urie on January 23, 2006, to discuss the duties that she allegedly wanted him to perform. During the period from January 25 through February 3, Mr. Urie was on work-related travel and, on February 6, he began working under Ms. Hargis' direct supervision. Tr. at 695-696, Respondent's Exhibit 3. Approximately six weeks later, beginning on March 21, Mr. Urie took an extended "leave without pay," after which he left LANL. Tr. at 712, Respondent's Exhibit 3. During the period between February 6 and March 21, there is no evidence of any e-mails from Ms. Hargis to Mr. Urie. However, she stated that although she "didn't routinely have one-on-one meetings with Urie . . . I would sit with him on occasion . . . ." Statement of Barbara Hargis, Respondent's Exhibit 32. The record does not indicate what was discussed on these occasions.

In all, there was a lack of communication with the Complainant after he returned from Iraq in late November 2005 until January 2006. However, it is undisputed that the pace of work tended to slow

during the period leading up to the holidays, and the Complainant apparently did not have access to a working LANL computer during this period. I believe that these factors contributed to the lack of communications. During the period between January 2 and January 23, 2006, the record indicates that the Complainant was away from the office on various types of leave for fourteen days, making communications more difficult. Respondent's Exhibit 3. However, Mr. Romero was able to reach Mr. Urie on several occasions, as set forth above. Ms. Hargis' communications with Mr. Urie appear to have been limited primarily to her meeting with the Complainant on January 23, and it is the substance of that meeting that is central to the primary factor in the alleged hostile work environment: that toward the end of his tenure with the Respondent, LANL management, and particularly Ms. Hargis, withheld work from him, thereby forcing him to resign.

c. Withholding of Work

Mr. Urie's tenure in HSR of approximately one year was marked by periods of very heavy work and periods that were relatively "slow." Tr. at 270-277; 298-302. After his return from Iraq at the end of November 2005, however, and lasting until Mr. Urie went on leave on December 19th, it appears that the pace of work was not slow, but non-existent. Tr. at 141, 182, 189. The record also indicates that Mr. Romero was generally aware that Mr. Urie did not have sufficient work during this period. Tr. at 499, 555.

After the December 2005 holidays, as indicated above, the Complainant was on various types of leave on almost every working day between January 2nd and January 23rd. [4] After meeting with Ms. Hargis on the 23rd, Mr. Urie left on LANL-sponsored travel on January 25th, returning on February 3rd. Respondent's Exhibit 3. During at least a portion of this time, he was working "12 hr graveyard shifts." Respondent's Exhibit 17.

Upon his return, Mr. Urie's assignment under Ms. Hargis' supervision began. The two met on January 23rd to discuss the duties that Mr. Urie was to perform. The substance of that meeting is in dispute. Ms. Hargis testified that

> The assignment, the work that I needed to get done in terms of what I was trying to get done for the Laboratory, the Laboratory, in . . . some recent assessments, had received some deficiencies related to integrated work management. That's the way we get our work done at the lab.
>
> And one of the corrective actions that we had committed to Headquarters and others was that we would set up what we call and [*sic*] IWM Mentoring Program. So, that's Integrated Work Management mentors. So, what we did was we ran a pilot in C Division and in MST Division in which we assign some of our ES and H people into groups. And . . . their main job was to actually help the scientists and the researchers prepare their integrated work management documents to get through the process, and to do a better job of identifying hazards and controls.

4/ During her testimony, she stated that she met with the Complainant on "January 20 or 23." However, Mr. Urie was absent from work, on "leave without pay" on January 20. Respondent's Exhibit 3.

> So, when I met with [Mr. Urie], what we talked about was . . . . This pilot had been successful, and we wanted to proliferate it across the laboratory. So, what we needed to do was to set up a formal description of . . . the training that was needed, and whether we needed a qualification, and to start reaching out to some of the mentors to get an understanding of what they were doing out there, and then to finally identify champions in other divisions that we could start linking with so we could actually spread it across the laboratory.

Tr. at 689-690. More specifically, she stated that "he started to work on the project, reviewing material and touching base with other folks." Memorandum of telephone interview with Ms. Hargis, dated April 25, 2007. Ms. Hargis testified that the material that he reviewed "was the integrated work management - - It was called the M300, and it was the requirement out in the laboratory on how people were to do work." Tr. at 690.

Mr. Urie's recollection of this meeting and its aftermath was substantially different. He testified that

> [w]hen I met with Hargis . . . she initially said, "Here's a leader," and I think it was the IWD thing . . . and it was all . . . roughed out, and she said, "Please look . . . this over. Make it . . . readable. You know, polish it and . . . give me your ideas."
>
> ***
>
> And so I knocked it out . . . in about a week, four or five days. I . . . made changes electronically. I, I did physical changes, and then I sent her an e-mail with the changes, requesting feedback. "Would you like me to do an executive summary?" Because it was a big, complicated thing. And I said, "how do you feel about me extrapolating this thing?" And I didn't hear anything, so I put a sticky note on it with some comment and questions, and I walked up to her office and I put it in her in-box, and I left. And I never heard anything for two months, or nearly two months.

Tr. at 213. What is undisputed is that Mr. Urie was directed to review and "polish" a document. The record indicates that he did so, and placed it in her in-box on February 15, 2006, nine days after he began working for Ms. Hargis. *Id.*, Complainant's Exhibit 16.

d. Analysis

The OHA has previously found that a constructive discharge can form the basis for relief under Part 708. *See Richard Sena*, Case No. VBA-0042, November 1, 2001 (*Sena*). In that case, the OHA Director looked to federal cases brought under Title VII of the Civil Rights Act of 1964 for guidance in determining whether the Claimant in that case had established that a constructive discharge had occurred. [5]

5/ Specifically, OHA cited *Martin v. Cavalier Hotel Corp.*, 48 F.3d 1343 (4th Cir. 1995) (*Martin*) and adopted its holding that, in order to show a constructive discharge, a Claimant "must allege and prove two elements: (1) the intolerableness (hostility) of the working conditions, and (2) that the employer created the hostile environment in order to cause the employee to resign." *Sena, citing Martin*, 48 F.3d at 1354. However, in *Pennsylvania State*

(continued...)

In one such case, *Pennsylvania State Police v. Suders*, 124 S.Ct. 2342 (2004) (*Suders*), the U.S. Supreme Court stated that "[t]he inquiry [as to whether a constructive discharge has occurred] is objective: Did working conditions become so intolerable that a reasonable person in the employee's position would have felt compelled to resign?" *Suders*, 124 S.Ct. at 2351. Administrative agencies have also applied this "reasonable person" standard in determining whether "whistleblowers" have been constructively discharged in retaliation for their protected activities. *See, e.g., Heining v. General Services Administration*, 68 M.S.P.R. 513 (Merit Systems Protection Board, August 22, 1995) ; *See also Harris v. Forklift Systems, Inc.*, 510 U.S. 17, 21 (1998) (*Harris*) (working environment must be severely and pervasively hostile, one that a reasonable person would find abusive, and one that the Complainant perceives to be so). After reviewing these standards and the record as a whole, I find that Mr. Urie has failed to show, by a preponderance of the evidence, that his working conditions were intolerable. I further conclude that there is insufficient evidence to show that a "reasonable person" would have felt compelled to resign. With regard to the alleged intolerability of his working conditions, the record shows that Mr. Urie's environment in HSR was not severely and pervasively hostile, and that the conditions of which he complained at the hearing were remedied eventually by LANL management.

In fact, the evidence indicates that Mr. Urie was treated well and with compassion by Mr. Romero. As an initial matter, the only performance evaluation that Mr. Romero wrote for the Complainant, an undated one covering the period from August 2004 through July 2005, was a positive one. Respondent's Exhibit 47. Moreover, when Mr. Urie was experiencing personal difficulties in January 2006, as set forth above, Mr. Romero expressed his concern on multiple occasions and attempted to reach out to him to offer any assistance that he could. Mr. Romero's supportive posture is also reflected in the following exchange of e-mails, dated September 27, 2005. Mr. Urie wrote

> Phil, I continue to receive direct requests from the division office for special duties, which circumvent the standard chain of command through Jeff, Sean, etc. I am meeting with Jeanne Ball and Dan Cox this AM and thought I should suggest that they either run these through Sean/jeff or set me aside of that line management, so to stabilize reporting, auditing, and so forth. Any thoughts?

Mr. Romero responded, "Rich, I concur let me know their reaction and if I need to intercede on your behalf." Respondent's Exhibit 44. It is true that after Mr. Urie returned from a month-and-a-half in

---

5/ (...continued)
Police v. Suders, 124 S.Ct. 2342 (2004), discussed in the body of this Decision, the U.S. Supreme Court cast serious doubt on the validity of *Martin*'s requirement that Claimants must prove that the employer created the hostile environment in order to cause the employee to resign. In describing the Complainant's burden of proof in a constructive discharge case brought under Title VII, the Court used an objective, "reasonable person" standard, with no mention of any requirement that the Complainant show that the employer created the hostile environment in order to force the employee to resign. *Suders*, 124 S.Ct. at 2351. Indeed, at least one federal court has found that *Suders* overruled this requirement. *Cecala v. Newman*, 532 F.Supp. 2d 1118, 1168. I will therefore apply the *Suders* standard in determining whether Mr. Urie was the victim of a constructive discharge.

Iraq, a "leave without pay" that was approved by Mr. Romero at Mr. Urie's request, Respondent's Exhibit 45, Tr. at 540-542, he experienced a lack of work and communications, and substandard working conditions during the period leading up to the December 2005 holidays. However, as previously explained, communications improved and the substandard conditions were corrected in the new year. The record further indicates that the lack of work was due to the impending holidays, with Mr. Urie receiving an assignment in January 2006 after his return from various types of leave. Respondent's Exhibit 3.

The record also does not support Mr. Urie's contention that working conditions under Ms. Hargis were so intolerable that a reasonable person would have felt compelled to resign. As an initial matter, I did not find credible the Complainant's contention that the only work arising out of the January 23rd meeting with Ms. Hargis was to review and "polish" a single document. In an e-mail sent on that day to Mr. Romero, Ms. Hargis and others, Mr. Urie said, in pertinent part,

> Phil/Alice; per our discussion last week, I have elected to continue as an employee of UC-LANL and pursue new duties within the HSR Division. Per your request, I have contacted the Q Clearance representative and he is checking on the status of my L/Q paperwork. I recieved [*sic*] a call today from P-21 (Ricki Lopez) and am responding to a request for a short IH evaluation, which will be completed by mid morning tomorrow.
>
> Regarding future work, given a choice in the matter, I believe I am well suited to perform the duties outlined by Barbara Hargis in the IWM Mentoring Program and request the assignment.

Respondent's Exhibit 16. The clear implication of this e-mail is that an assignment was offered, and accepted, that involved certain duties regarding the mentoring program. I do not believe that Mr. Urie would have used this language if the work assigned consisted solely of editing a single document. Ms. Hargis indicated that Mr. Urie was also assigned to contact other employees in furtherance of the purposes of the program, *see* Memorandum of telephone interview with Ms. Hargis, dated April 25, 2007, and I find this statement to be credible. The record does not indicate that Ms. Hargis withheld work from Mr. Urie.

Furthermore, I believe that a reasonable person in the Complainant's position, who was not intent on leaving LANL, would have informed Mr. Romero of his lack of work in the hope of receiving additional assignments. Indeed, the record indicates that during a 2005 lull in Mr. Urie's workload, the Complainant did inform Mr. Romero and another LANL manager, and additional work was assigned. Tr. at 276-277. However, Mr. Urie did not inform Mr. Romero that he was not receiving sufficient work from Ms. Hargis. Tr. at 566.

It is true that Ms. Hargis was made aware of "slack" in the individual's schedule several weeks before he left LANL on unpaid leave, and did not assign him additional work. Respondent's Exhibit 20, 21; Tr. at 711. However, Ms. Hargis explained, credibly, that she believed that Mr. Urie would be leaving LANL soon and that she did not have any short-term, "filler" work that she could assign him in the interim. Tr. at 711. Ms. Hargis' belief finds support in the Complainant's e-mail to her and to Mr. McNeel dated February 22, 2006.

> Barbara/John: I have not yet heard back from KBR on the vacancies I am under consideration for (ES&H Manager for Middle East Ops and Middle East IH),

> although I expect to be traveling to DC for a day in the near future for a final interview. I will let you know as soon as things solidify. If I should accept a position, *I hope to leave LANL on good terms and leave the door open for a possible return in a year.* In that regard, I am concurrently working on the manufacturing of equipment developed by LANL under an approved no conflict of interest status. Is an Entrepreneur Leave of Absence a possibility in view of the contract change?
>
> *Thank you for your patience, as my finances are largely driving my interest in Iraq.*

Respondent's Exhibit 18 (italics added). I find it difficult to believe that the Complainant would write of leaving LANL on good terms and possibly returning in a year if he was being subjected to a work environment that was so severely and pervasively hostile that he was being forced to resign. Instead, this e-mail clearly suggests that he was leaving for what he considered to be a better opportunity with KBR. Based on the foregoing, I find, by a preponderance of the evidence, that Mr. Urie was not the victim of a constructive discharge.

2. The Alleged Post-Employment Retaliations

As previously stated, the Complainant also alleges that LANL retaliated against him after his departure from the Lab. Specifically, he alleges that after his departure from LANL, Dr. Ramsey gave a negative reference to Dynamic Corporation (Dynamic), a company with which the Complainant was seeking employment. In addition, Mr. Urie claims that he was forced to resign from a subsequent position with KBR because a LANL employee informed KBR that Mr. Urie was a "whistleblower." I need not determine, at this juncture, whether post-employment retaliations such as those alleged here are covered by the Part 708 regulations, because, as explained below, there is clearly insufficient evidence to support these allegations.

a. The Alleged Negative Reference

With regard to the alleged negative reference, the record indicates that subsequent to Mr. Urie's departure from LANL, Diana MacArthur of Dynamic contacted Dr. Ramsey to obtain information on several former LANL employees for possible future employment at Dynamic. Tr. at 592, 629-630. Two of the employees had already found jobs, so the one remaining employee was Mr. Urie. Tr. at 603. Ms. MacArthur testified that she discussed the qualifications that she was looking for in a prospective employee, that Dr. Ramsey informed her that Mr. Urie had those qualifications, and that she did not say anything critical of the complainant. Tr. at 593, 600-601. Dr. Ramsey testified that Ms. MacArthur informed her about the types of people Dynamic was looking for, and that the only information she provided about Mr. Urie was who he was, what his duties had been at LANL, and that he was a Certified Industrial Hygienist. Tr. at 630.

The Complainant makes much of the fact that, during LANL's internal investigation of Mr. Urie's Complaint, Dr. Ramsey stated that she told Ms. MacArthur "to check references carefully just as she would normally do," Respondent's Exhibit 32, Tab K. Mr. Urie suggests that this statement, when considered in conjunction with the fact that the other former employees that Ms. MacArthur asked about were unavailable, was made by Dr. Ramsey in order to cause Ms. MacArthur to draw unspecified negative inferences about Mr. Urie that would eventually lead to his failure to get the job.

I do not agree. As an initial matter, the statement complained of is neutral on its face. When asked during the hearing if she believed that Ms. MacArthur had asked her, a friend, about the former LANL employees in order to obtain more detailed information, she explained that she did not believe so, "because you simply do not walk across that friendship line to talk about individuals. You've got to go through your due diligence from one corporation to another and check people's references in the appropriate way." Tr. at 632. Moreover, the fact that Ms. MacArthur, who was able to witness Dr. Ramsey's intonations and facial expressions, later invited Mr. Urie to travel at company expense back to Dynamic headquarters in the Washington, D.C. area for further interviews suggests that there were no negative connotations to Dr. Ramsey's remarks.

It is true that after interviewing with Dynamic headquarters officials, Mr. Urie testified, he was informed that the company "didn't have any openings." Tr. at 227. Then, approximately one year later, he added, he saw advertisements for positions with Dynamic at Johnson Space Center, and submitted an application. He got a call from Dynamic's HR Director stating that they wanted to fly him in for an interview. He informed the HR Director of his earlier interview with a specific Dynamic official in the Washington, D.C. area and said that he was very interested in interviewing, but that he did not want to repeat his earlier experience of flying out for an interview just to be told that no jobs were available. Mr. Urie then received an e-mail from the official he interviewed with in the Washington, D.C. area saying that there were no positions available. Tr. at 227-228.

However, Ms. MacArthur adequately and credibly explained these occurrences. She testified that she was informed by the Dynamic headquarters interviewing officials that the reason that Mr. Urie was not offered a job is because the position that he was seeking required a "Top Secret" security clearance, and he did not have a security clearance. Tr. at 594. She explained that she did not ask Mr. Urie whether he had such a clearance before she invited him to company headquarters for further interviews because she was not one of Dynamic's regular recruiters and was therefore "not a very good interviewer." Tr. at 609. She assumed that Mr. Urie already had a security clearance because of where he was working and the field he was working in. Tr. at 610. Regarding the positions at the Johnson Space Center, Ms. MacArthur testified that Mr. Urie was not hired because they were looking for "entry-level people; you know, just out of college, maybe a year or so, that type of experience." Tr. at 596. There is nothing in the record that would indicate that these explanations were mere pretexts, and I cannot conclude, based on these facts, that Dr. Ramsey's suggestion that Ms. MacArthur follow normal procedures in evaluating applicants was intended as some type of warning about Mr. Urie. I therefore conclude that LANL did not retaliate against the Complainant by giving him a negative reference.

b. The Alleged Constructive Discharge from KBR

Equally unavailing are the Complainant's claims that he was constructively discharged from a subsequent job with KBR, and that LANL should be held liable for this discharge. Specifically, he alleges that he was forced to resign from KBR because LANL informed KBR of the individual's status as a whistleblower, and a KBR official subsequently informed Mr. Urie that she didn't think that his employment with KBR "was going to work." Tr. at 233.

The Complainant explained that after his hiring in May 2006, he traveled from New Mexico to KBR's offices in Arlington, Virginia at company expense in order to begin working. While there, he said, he informed KBR that he might have trouble getting a corporate credit card from the

company's provider, American Express, because he owed them approximately $30,000 stemming from a failed business venture prior to his employment with LANL. KBR allegedly told Mr. Urie to apply anyway, and told him that they had other options if his application was denied. Mr. Urie then returned to New Mexico to move into a new house, but did not have sufficient funds to return to KBR. KBR became upset at Mr. Urie's failure to return and at difficulties that they had had in contacting him, he stated. Prior to his return to KBR, Mr. Urie learned that his application for a KBR American Express Card had been denied. When he returned the following week, he continued, Mr. Urie was told that his employment with KBR would not "work out" because of his credit problems. *See* memorandum of April 26, 2007 telephone conversation between Mr. Urie and Janet Freimuth, OHA Investigator. However, because KBR allegedly knew of his credit problems before his application was denied and indicated to him that such a denial would not be a problem, the Complainant contends that the real reason for his inability to retain the KBR position was that LANL management informed KBR that Mr. Urie was a whistleblower, that as a result, he was forced to resign from KBR, and that LANL should be held liable for this alleged constructive discharge.

These contentions fail for several reasons. First, the relevant case law in this area focuses on the actions of the employer whose allegedly hostile environment the employee is leaving, and not on those of any previous employer. *See, e.g., Suders, Harris, Sena.* The Complainant has not cited, nor am I aware, of any legal authority that would allow me to find LANL liable under a theory of constructive discharge for Mr. Urie's departure from KBR.

Second, the record does not support Mr. Urie's claim that his resignation was forced. In a June 12, 2006, e-mail from Mr. Urie to KBR senior management, he stated

> Ladies, so we are clear on recent events, I had no choice but to terminate in view of my home purchase and moving expenses compounded by an oversight by KBR to direct pay DC expenses and house me adjacent to the office, as promised. Mistakes were made by all and a few days would have allowed me to re-calibrate my funds and work with a clear focus.

Respondent's Exhibit 23. This e-mail strongly suggests that Mr. Urie resigned because of his recent expenditures and because of travel difficulties caused by his poor credit.

Third, even if his resignation was forced, there is nothing in the record to indicate that the reason given by KBR was a pretext, or that LANL management conveyed in any way to KBR that the Complainant was a whistleblower. Mr. Urie suggests that Randy Sandoval, a LANL manager, may have informed officials of KSL, a company involved in a partnership with KBR at LANL, about the Complainant's whistleblower status, and that KSL then conveyed this information to KBR. However, the only information produced by Mr. Urie in support of this theory is that during his brief tenure with KBR, he saw Mr. Sandoval in the vicinity of KSL's offices at the LANL site, Tr. at 232. Mr. Sandoval testified that he did not recall ever talking with anyone at KSL about Mr. Urie. Tr. at 735. There is nothing in the record that would indicate that LANL management was in any way responsible for the Complainant's departure from KBR.

Given the factors mentioned above, I do not need to address the issue of whether the Part 708 regulations cover allegations of post-termination retaliations. I will, therefore, grant the Respondent's Motion to dismiss this portion of Mr. Urie's Complaint.

III. Conclusion

For the reasons set forth above, I conclude that although Mr. Urie did make protected disclosures, LANL did not retaliate against him. I therefore find that he is not entitled to any of the relief that he seeks.

It Is Therefore Ordered That:

(1) The Motion to Dismiss filed by Los Alamos National Laboratories on July 19, 2007 (Case No. TBZ-0063), is hereby granted with respect to that portion of Mr. Urie's Complaint concerning alleged retaliations that occurred after his resignation from the Respondent in April 2006, and is denied with respect to that portion of the Complaint concerning LANL's alleged constructive discharge of Mr. Urie.

(2) The Request for Relief filed by Richard Urie under 10 C.F.R. Part 708 is hereby denied.

(3) This is an Initial Agency Decision, which shall become the Final Decision of the Department of Energy unless a party files a notice of appeal by the fifteenth day after the party's receipt of the Initial Agency Decision, in accordance with 10 C.F.R. § 708.32.

Robert B. Palmer

Office of Hearings and Appeals

Date: May 21, 2008

September 3, 2008

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Initial Agency Decision

Name of Petitioner: David L. Moses

Date of Filing: October 2, 2007

Case Number: TBH-0066

This Initial Agency Decision involves a whistleblower complaint filed by Dr. David L. Moses ("Moses" or "the complainant") under the Department of Energy (DOE) Contractor Employee Protection Program, 10 C.F.R. Part 708. The complainant was an employee of UT-Battelle, LLC, the firm employed by DOE to manage and operate the Oak Ridge National Laboratory (ORNL), where he was employed as a Senior Program Manager for ORNL's Nuclear Nonproliferation Program until May 2007. On February 23, 2007, he filed a complaint of retaliation against UT-Battelle with the DOE Office of Employee Concerns. In his complaint, Moses contends that he made certain disclosures to officials of UT-Battelle and DOE and that UT-Battelle retaliated against him in response to these disclosures. The complainant seeks monetary damages based upon his failure to receive a salary increase and his subsequent loss of employment.

I. Background

A. The DOE Contractor Employee Protection Program

The DOE's Contractor Employee Protection Program was established to safeguard public and employee health and safety; ensure compliance with applicable laws, rules, and regulations; and prevent fraud, mismanagement, waste and abuse at DOE's government-owned, contractor-operated facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purposes are to encourage contractor employees to disclose information which they believe exhibits unsafe, illegal, fraudulent, or wasteful practices, and to protect those "whistleblowers" from consequential reprisals by their employers. 10 C.F.R. Part 708. Under the regulations, protected conduct includes:

> (a) Disclosing to a DOE official, a member of Congress, any other government official who has responsibility for the oversight of the conduct of operations at a DOE site, [the] employer, or any higher tier contractor, information that [the employee] reasonably believes reveals –
>
> (1) A substantial violation of a law, rule, or regulation;

> (2) A substantial and specific danger to employees or to public health or safety; or
>
> (3) Fraud, gross mismanagement, gross waste of funds, or abuse of authority; or
>
> (b) Participating in a Congressional proceeding or an administrative proceeding conducted under this part; or
>
> (c) Subject to § 708.7 of this subpart, refusing to participate in an activity, policy, or practice if you believe participation would-
>
> (1) Constitute a violation of a federal health or safety law; or
>
> (2) Cause you to have a reasonable fear of serious injury to yourself, other employees, or members of the public.

10 C.F.R. § 708.5.

Part 708 sets forth the proceedings for considering complaints of retaliation. The DOE's Office of Hearings and Appeals (OHA) is responsible for investigating complaints, holding hearings, and considering appeals. See 10 C.F.R. §§ 708.21-708.34.

B. Procedural Background

Moses filed a complaint ("Complaint") with the DOE's Oak Ridge Diversity Programs and Employee Concerns Office (DOE/OR) on February 23, 2007. DOE/OR provided a copy of the Complaint to UT-Battelle, after which Moses and UT-Battelle agreed to attempt to resolve the matter through mediation. After the parties failed to resolve the complaint through mediation, DOE/OR informed Moses that he had the option to request either a hearing or an investigation followed by a hearing. Moses requested that the Complaint be forwarded to OHA for an investigation and hearing.

The OHA investigator interviewed Moses and other ORNL employees and reviewed a large number of documents before issuing a Report of Investigation (ROI) on October 2, 2007. On that same day, the OHA Director appointed me as the Hearing Officer in this case. On October 18, 2007, I requested that the parties submit statements discussing the ROI and specifying "the parts of the document with which you agree and those parts of the document with which you disagree." E-mail from Steven Goering, OHA, to Alan M. Parker, UT-Battelle, and David Moses, *et al.* (October 18, 2007).

On October 24, 2007, UT-Battelle filed Motion to Dismiss a portion of the Complaint as untimely filed. After considering the Motion, and replies and cross-replies thereto, I granted the Motion in part, dismissing the complaint as to one of the alleged acts of retaliation. Letter from Steven Goering, OHA, to Alan Parker, UT-Battelle, and David L. Moses (November 5, 2007).

I subsequently convened a hearing in this case in Oak Ridge, Tennessee, over a three-day period from December 11-13, 2007. Both parties submitted exhibits. UT-Battelle presented exhibits into the record which were numbered Exhibit 1 through Exhibit 22, and Moses submitted exhibits lettered Exhibit A through Exhibit Q. UT-Battelle presented eight ORNL management employees as witnesses. Moses testified on his own behalf, and also called an ORNL management employee as a witness. On January 29, 2008, I reconvened the hearing for purposes of taking the testimony of one additional witness, a DOE official, called by the individual. The parties submitted post-hearing briefs on March 20, 2008.

C. Claim of Attorney-Client Privilege Regarding Certain Hearing Exhibits

Two of the exhibits submitted at the hearing, Exhibit 22 and Exhibit A, were provided by UT-Battelle with portions redacted based upon a claim of attorney-client privilege.[1] On March 26, 2008, I ordered that UT-Battelle submit to me unredacted copies of Exhibit A and Exhibit 22 for *in camera* review and a decision as to whether the redacted information is protected under the attorney-client privilege. Letter from Steven Goering, OHA, to Alan Parker, UT-Battelle (March 26, 2008). I allowed the parties until no later than April 25, 2008, to file arguments regarding the applicability of the attorney-client privilege, after my receipt of which I closed the record in this case.

In its brief, UT-Battelle argues that "the federal common law on the attorney-client privilege should be applied" in this case, and cites the following elements of the privilege as set forth by the U.S. Court of Appeals for the Sixth Circuit:

> (1) Where legal advice of any kind is sought (2) from a professional legal adviser in his capacity as such, (3) the communications relating to that purpose, (4) made in confidence (5) by the client, (6) are at his instance permanently protected (7) from disclosure by himself or by the legal adviser, (8) unless the protection is waived.

Reed v. Baxter, 134 F.3d 351, 355-56 (6th Cir. 1998); UT Battelle's Motion and Brief for a Protective Order to Protect Attorney-Client Privilege Communications (April 18, 2008) at 2.

I agree with UT-Battelle that the federal common law of attorney-client privilege is applicable in this case. The Part 708 regulations provide that, while "[f]ormal rules of evidence do not apply, . . . OHA may use the Federal Rules of Evidence as a guide; . . ." 10 C.F.R. § 708.28(a)(4). The Federal Rules of Evidence state that "the privilege of a witness, person, government, State, or political subdivision thereof shall be governed by the principles of the common law as they may be interpreted by the courts of the United States in the light of reason and experience." Fed. R. Evid. 501.[2]

---

[1] Exhibit A was a document submitted by Moses that he had obtained from UT-Battelle.

[2] The Merit Systems Protection Board, in cases under the Whistleblower Protection Act, and the Department of Labor, under whistleblower authority analogous to the DOE's under Part 708, have both applied the federal common law in interpretations of the attorney-client privilege. *See, e.g., Grimes v. Dep't of Navy*, 99 M.S.P.R. 7, 12 (2005) (decision of Merit Systems Protection Board); *Willy v. Coastal Corp.,* No. 98-060, 2004 WL 384741, at *20 (2004) (decision of Department of Labor Administrative Review Board); *Welch v. Cardinal*

Though this office has not previously ruled on the application of the attorney-client privilege in the context of a Part 708 proceeding, we have addressed this issue in cases arising under the Freedom of Information Act, 5 U.S.C. § 552, as implemented by the DOE in 10 C.F.R. Part 1004. In those cases, applying the federal common law as to the privilege, we have found that the privilege "covers facts divulged by a client to his or her attorney, and also covers opinions that the attorney gives the client based upon those facts. The privilege permits nondisclosure of an attorney's opinion or advice in order to protect the secrecy of the underlying facts." *Washington Electric Cooperative/Downs Rachlin Martin PLLC,* 29 DOE ¶ 80,264 (2006) (citing *Mead Data Central, Inc. v. Department of Air Force*, 566 F.2d 242, 252 (D.C. Cir. 1977)) (citation omitted).

Under the interpretation of the courts in both *Reed* and *Mead,* the attorney-client privilege protects facts communicated by a client to his or her attorney. *Reed,* 134 F.3d at 355-56 ("communications . . . by the client"); *Mead*, 566 F.2d at 254 (privilege "covers facts divulged by a client to his or her attorney"). The court in *Mead* found that the privilege also "covers opinions that the attorney gives the client based upon those facts . . . in order to protect the secrecy of the underlying facts." *Mead*, 566 F.2d at 252, 254. Thus, the privilege protects "communications by the lawyer to his client," but only to the extent that "those communications reveal confidential client communications." *U.S. v (Under Seal)*, 748 F.2d 871, 874 (4th Cir. 1984).

With these principles in mind, I have reviewed the material that UT-Battelle has claimed are protected by the attorney-client privilege. I find that certain of the material, specifically that marked "Attorney-Client Privilege 0001" in Exhibit 22, is protected by that privilege, but that the remainder of the information redacted from the two exhibits in this case is not so protected. The information I find is not protected consists of communications by counsel for UT-Battelle that I cannot find would reveal confidential facts communicated by the client, UT-Battelle, to its counsel. Unless UT-Battelle files a notice of appeal by the fifteenth day after its receipt of this initial agency decision, a copy of the information that I have found is not protected will be released to the complainant.

D. Factual Background

Moses, immediately prior to his filing his complaint, was Senior Program Manager for Nuclear Nonproliferation Programs at ORNL. Moses' whistleblower complaint is based on disclosures made in 2004 and 2005 in various messages (all by e-mail with the exception of one sent by facsimile transmission) he sent to DOE and/or ORNL officials and to a French government official regarding DOE contracting practices, and allegations made in 2006 about wasteful spending relating to a research project to use Low Enriched Uranium and Molybdenum to fabricate both proliferation-resistant research reactor fuel and targets to produce a radioactive isotope, Molybdenum-99 (Mo-99).

Bankshares Corp., No. 2003-SOX-15, 2003 WL 25316943, at *4 (2003) (decision of Department of Labor Office of Administrative Law Judges).

1. Messages from March 2004 through March 2005 and Concerns Raised by DOE Regarding Moses' Communications

In 2004 and part of 2005, Moses was the ORNL Lead Program Manager on DOE's Fissile Materials Disposition Program (FMDP),[3] a program sponsored by the National Nuclear Security Administration's (NNSA) Office of Fissile Materials Disposition (NA-26). During this period, Moses sent various e-mails to DOE officials, including Norman Fletcher, an NNSA employee who was Moses' point of contact at NA-26, and Robert Boudreau, who replaced Fletcher as Moses' NA-26 point of contact in February 2005. Ex. 1. These e-mails referenced, among other things, possible violations of the "Anti-Bribery and Books & Records provisions of the Foreign Corrupt Practices Act (FCPA), 15 U.S.C. § 78dd-2," the Federal Acquisition Regulations (FAR), and the Department of Energy Acquisition Regulations (DEAR).[4]

On February 27, 2005, Moses sent a message by facsimile to Bruno Sicard (Sicard), a French representative to a multi-national effort to modify Russian VVER-1000 reactors. In the message, Moses stated that Rosenergoatom (REA), a Russian quasi-governmental firm, would not give ORNL cost and effort proposals to do work. Moses stated that, without such proposals, ORNL would be unable to create contracts that "comply with federal contracting requirements avoiding the appearance of violations of the Foreign Corrupt Practices Act." Ex. 1; Electronic Mail from David Moses to Richard Cronin, OHA (May 8, 2007) (containing full text of Moses' message to Sicard).

After learning of Moses' facsimile message to Sicard, Boudreau spoke with Dr. Lawrence J. Satkowiak, Director of ORNL's Nuclear Nonproliferation Office, to whom Moses had reported since August 2004. Boudreau expressed "concerns about [Moses] continuing to lead the Fissile Material Disposition Program," referencing Moses' message to Sicard and Moses' previous e-mails, a copy of which Boudreau e-mailed to Satkowiak. Tr. at 372.

Satkowiak discussed these concerns with Moses and decided, with Moses' agreement, that Brian Cowell, who worked for Moses, would replace Moses as FMDP Lead Program Manager, and Moses would continue to work as a Senior Advisor to the program. *Id.* at 148-49. According to Satkowiak, though DOE was "incensed" at Moses for contacting Sicard, DOE officials agreed with this new arrangement because Cowell would replace Moses as the point of contact between DOE and ORNL on matters related to the FMDP. *Id.* at 270-71.

On April 4, 2005, Satkowiak issued a memorandum announcing Cowell and Moses' new roles. Ex 2. The same day Moses sent a copy of the memorandum along with the following e-mail to Sterling Franks, an NNSA employee at the DOE's Savannah River facility:

> The reward for complaining about Norman Fletcher's ill treatment of my staff, complaining about his attempts to defraud the US government with pay-off

[3] The FMDP is a project to assist in the disposal of weapons-grade plutonium in the United States and in Russia. ORNL and Moses were working to support this project.

[4] These e-mails are described in greater detail in the October 2, 2007, ROI. As discussed below, UT-Battelle has conceded that these e-mails contained disclosures protected under Part 708. Hearing Transcript (Tr.) at 13-14.

> contracts to skim money to his friends in the Rosenergoatom International Department, and my telling our reputed French partners on VVER-1000 modifications that they need to make sure that their often expressed concerns about delays in contracting caused by Norman's promises to his REA buddies are communicated to Mr. Boudreau.

Ex. 3. Franks, concerned that the message referenced possible violation of law, forwarded the message to Kenneth M. Bromberg, Acting Assistant Deputy Administrator for Fissile Material Disposition, NNSA, on April 11, 2005. *Id.*

On April 12, 2005, Bromberg sent an e-mail message to Satkowiak stating, in relevant part, "Given his unhappiness with my staff and his unsupported allegations, I think it's time to remove David from any and all work on the Department's plutonium disposition program. I would appreciate if you would advise me what action Oak Ridge National Laboratory plans to take." *Id.* Bromberg again asked Satkowiak in an April 25, 2005, e-mail what actions were being taken with respect to Moses. *Id.* On April 26, 2005, Satkowiak responded by e-mail that Moses had been removed from "all NA-26 duties and assignments." He also stated that he had counseled Moses about his statements and that he had been "reassigned" to another activity unrelated to FMDP and NA-26. *Id.* The same day, Bromberg replied to Satkowiak's e-mail, stating, "At this point, I just want him off any of the work that NA-26 is sponsoring." Ex. 3. Also in April 2005, Moses provided to Satkowiak an 11-page document reiterating his concerns about, among other things, what he described as "[i]rregular/illegal subcontracting direction" by DOE, again referencing the Foreign Corrupt Practices Act. *See* E-mail from David Moses to Richard Cronin, OHA (May 22, 2007) (attaching copy of 11-page document); Tr. at 704-710.

2. September 6, 2006, E-mail

After Moses' removal from all work sponsored by NA-26 in April 2005, Satkowiak tried to find a project for Moses to work on. Satkowiak asked Moses to work with Jeff Binder to see if they could find work for ORNL in the DOE's Reduced Enrichment for Research and Test Reactors (RERTR) program sponsored by the NNSA's Office of Global Threat Reduction (NA-21).[5] Moses began working on a project that sought to use a LEU and molybdenum foil target in a nuclear reactor to produce Mo-99 for medical purposes. One significant problem in this process was the migration of the uranium atoms from the foil (because of heat and the fission of uranium atoms) to the aluminum casing which held the foil.[6]

[5] The RERTR program seeks to develop the technology necessary to enable the conversion of civilian nuclear reactors to utilize low enriched uranium (LEU) instead of high enriched uranium (HEU).

[6] Such migration would produce problems in removing the LEU and molybdenum foil to process the newly created Mo-99. Initially, a nickel barrier was used to prevent uranium atoms from migrating to the aluminum casing that held the uranium and molybdenum foil target. Using nickel as a barrier to prevent diffusion of uranium to the aluminum casing which held the foil created a problem since the nickel would itself become radioactive. One radioactive isotope of nickel, Ni-63, produced in the process had a half-life of 103 years and another, Ni-59, had a half life of 76,000 years. Consequently, use of nickel as a barrier would create a significant radioactive waste problem.

Moses developed an idea to mitigate this problem using a diffusion barrier made of a specific aluminum-and-silicon alloy instead of nickel. On September 1, 2006, Moses shared his idea via an e-mail addressed to Charlie Allen at the University of Missouri Research Reactor Center (MURR) and George Vandergrift at Argonne National Laboratory (ANL). Ex. M.

On September 6, Moses and Allen exchanged two further e-mails regarding Moses' idea, each of which was also addressed to Vandergrift. *Id.* On the same day, Vandergrift sent an e-mail to Moses and Allen in a response to Moses' idea, stating that "Ni [nickel] foil is a fission-recoil barrier and must be there or foil will bond to target walls during irradiation. Al [aluminum] barrier will work but will not dissolve in nitric acid." *Id.* Moses became upset with Vandergrift's response and sent another e-mail to Vandergrift and Allen later on September 6, 2006, stating in part:

> What you call a "fission recoil barrier" to prevent the aluminum clad foil from bonding to the U-Mo target is what Atomics International (AI) called a diffusion barrier in its testing work in the late 1950s and early 1960s . . . . with U-Mo fuel clad with aluminum using a nickel diffusion barrier to prevent the interdiffusion of uranium and aluminum. . . . Don't you guys in the RERTR Program at ANL ever do any literature research? I had assumed that you picked nickel because of the earlier AI work in using it as a diffusion barrier between uranium-molybdenum and aluminum. Who came up with this "fission recoil barrier" terminology as opposed to diffusion barrier? Does calling it by a new name make it a new discovery? Much of the work in the 1950s and 1960s focused on correlating thermally/temperature-induced diffusion with fission-induced diffusion mechanisms.
>
> It truly amazes me from reading the papers in the RERTR annual meetings starting in about 1997-1998 that you in the LEU Mo-99 target production development work were exploring options for "fission recoil barriers" while the LEU fuel development activities at ANL, without apparently ever talking to you all in Mo-99 target work, worked diligently on U-Mo LEU fuel forms with aluminum matrix and clad without realizing the need for a diffusion barrier between the U-Mo and the aluminum. Apparently, neither side talked to each other or listened to each other's presentation at the RERTR annual meetings or did their literature research for precedential R&D work like every graduate student at a top-flight university (such as Missouri) must surely be taught to do.
>
> . . . .
>
> I find that ANL and now ANL-INL have indeed made this into not only a full-employment science program but a bad science program principally consisting of doing lots of high-priced work that leads to a rediscovering of that which should have been recognized or known by a decent and diligent literature search back in 1997-1998. How much taxpayer money has been wasted since 1998 to now on this bad science?

My apologies for possibly being overly dramatic in making my points.

Id. Moses' September 1 e-mail, and each of the subsequent September 6 e-mails from Moses, Allen, and Vandergrift, were also copied to, among others at ANL and ORNL, Satkowiak, Ralph Butler, Director of MURR, and Parrish Staples, Moses' point of contact at NA-21. *Id.*

When Satkowiak came to work on September 7, he found that Butler had left a voice mail message telling Satkowiak, "you've got a problem. Better look at your e-mail." Tr. at 281-82. Upon reading Moses' September 6 e-mail, Satkowiak "was kind of stunned at the language. . . . It was the, the unprofessional manner; the, the, the way he was treating colleagues; and the fact that he was doing it in what I considered a public forum." *Id.* at 282.

Over the next few days, Satkowiak contacted some of the individuals on the e-mail's distribution list "to get their read on it" and found that "they were surprised he used that tone." *Id.* at 285. None of the feedback he received touched upon the technical issues Moses raised in his e-mail. *Id.* On September 8, Satkowiak also forwarded a copy of the e-mail to his supervisor, Dana Christensen, Associate Laboratory Director for Engineering and Science. *Id.* at 286. Christensen thought the e-mail "sounded very unprofessional. It sounded like a ranting-and-raving type of e-mail about concerns, and [Satkowiak] brought it to me because of the extensive distribution list that was on the e-mail." *Id.* at 604.

After several discussions with his management and with Katherine Finnie, an ORNL Human Relations official, *id.* at 289, Satkowiak met with Moses and Finnie on September 15, 2006. Ex. J (minutes of meeting taken by Finnie). At the meeting, Satkowiak told Moses that he would be suspended with pay, during which time he would not have access to the ORNL computer system. *Id.* at 3. Moses remained on administrative leave with pay for one week, from September 18 through September 22, 2006. Tr. at 294, 303.

By a memorandum dated September 22, Satkowiak issued a "disciplinary written warning" to Moses in which he characterized Moses' September 6 e-mail as having a "highly insulting, completely unprofessional and totally unacceptable tone toward colleagues in a collaborative program that involves efforts by ORNL and scientists from other national laboratories. Regardless of any merit to your technical points, you demonstrated egregiously poor judgment in deciding to communicate your observations in the manner you chose." Ex. E. Noting that ORNL had placed Moses "in a position of considerable responsibility," Satkowiak stated that Moses failed to demonstrate the "tact and skillful communication strategies" his job demanded. *Id.* Finally, Satkowiak stated that he did "not want to inhibit any efforts" to bring to light "concerns regarding fraud, waste and abuse," but that "insulting and belittling colleagues is unacceptable." *Id.* On September 24, 2006, Moses sent an e-mail to the recipients of his September 6 e-mail expressing his "sincerest apologies for the tone and substance of the e-mail . . . ." Ex. 11.

During the week of September 25 through September 29, 2006, Satkowiak traveled to DOE Headquarters for several meetings, and intended to talk to Parrish Staples and the DOE official to whom Staples reported, Nicole Nelson-Jean, the director of DOE's Office of North and South American Threat Reduction within NA-21. Tr. at 312. Staples was not in his office when

Satkowiak arrived, and while he was in a hallway speaking to another DOE official, Nelson-Jean saw Satkowiak, grabbed his arm and said "Larry, I need to talk to you right now." *Id.* at 313.

Satkowiak and Nelson-Jean then met in Nelson-Jean's office. Satkowiak testified that he told Nelson-Jean that he hoped she had seen Moses' written apology, and described Moses as an "incredibly bright guy" and a "great nuclear engineer" and that "it would be an asset to keep him on the [RERTR] program." *Id*. at 313-14; *see* Transcript of January 29, 2008 Hearing Testimony of Nicole Nelson-Jean (Nelson-Jean Tr.) at 12 (corroborating Satkowiak's testimony that he offered support for Moses in their meeting and recommended that he continue working on the RERTR program). Nelson-Jean responded that she no longer wanted Moses working on the program, and Satkowiak asked that this direction be provided to him in writing. Tr. at 314-16.

On September 27, 2006, Nelson-Jean sent an e-mail to Satkowiak in which she stated: "I am writing in Reference to Dr. David Lewis Moses and his participation in the GTRI Conversion Program (RERTR). As I have discussed with you in detail, the GTRI Conversion Program will no longer support, financially or otherwise, the participation of Dr. Moses in the program." Ex. C.

On October 5, 2006, Satkowiak sent a memorandum to Moses referencing Nelson-Jean's September 27 e-mail, and stating that Moses' "position as a Senior Program Manager within the Nuclear Nonproliferation Programs is predicated upon your ability to develop/manage projects/programs and build/maintain healthy and productive DOE sponsor relationships. In addition, one of the key performance expectations for all band 4 researchers at ORNL is to secure funding for their time." Ex. D. The memorandum stated that Satkowiak would continue Moses' employment "until the end of November to allow you time to find other funding within the laboratory. During this time period your main focus will be securing funding. In addition, I will provide you with miscellaneous assignments within the laboratory." *Id.* Finally, the memo stated that if, "at the end of November you have not located funding sponsorship, your employment with ORNL will be terminated for your failure to meet the performance requirements of your job." *Id.*

Satkowiak and Finnie met with Moses on November 5, 2006 to discuss his progress in obtaining funding, at which time Satkowiak was "very hopeful" as it "sounded like he had some leads." Tr. at 334; Ex. 13 (minutes of meeting taken by Finnie). On January 25, 2007, Satkowiak completed Moses' 2006 Performance Assessment, in which he rated Moses as "Not Fully Contributing." Ex. B. In a January 29, 2007, e-mail to Finnie, Satkowiak stated that "[a]t David's performance review we discussed his situation. I agreed, in light of the continuing resolution, to continue to fund him until the end of February giving him additional time to find other funding sources." Ex. 14.

On February 2, 2007, Satkowiak issued a Performance Improvement Plan (PIP) to Moses. Ex. 15. The PIP described as "performance to be improved" Moses' "behavior [that] led to a loss of funding by NA-20 sponsors"[7] and listed as goals to "[e]xhibit professionalism in all written and verbal communication" and "secure funding to fully cover employee labor so no longer

[7] NA-20 is the office of the NNSA's Office of Defense Nuclear Nonproliferation, within which are seven program offices, including NA-21 and NA-26.

dependent on NNP [ORNL Office of Nuclear Nonproliferation] funding." *Id.* The document noted that Moses "was initially given 2 months of NNP funding to secure funding. This was extended 3 more months with a new end date of February 28, 2007." *Id.* Finally, the plan further required "[w]eekly detailed, status reports, first one due February 9, 2007, documenting progress toward acquiring alternate funding. It should identify the date/time, project/program manager, source of funds, amount funding, and percentage covered." *Id.*

On February 23, 2007, Satkowiak sent Moses an e-mail reminding him about the requirement for weekly reports in the PIP, Ex. 5 at 2, as he had received no such report as of that date. Tr. at 347. Moses responded the same day by e-mail with a one paragraph summary of his current progress in finding funding, to which Satkowiak responded by e-mail, also the same day, thanking him for the information, but telling him that his response did not "contain the detail requested in the signed PIP, see text below. We would like to have a short meeting Monday morning to review your prospects in detail. Please come prepared with the details in writing." Ex. 5 at 1-2. On February 25, Moses sent an e-mail with a more detailed report attached, stating that he had "enough work to carry me into March but not much beyond." Ex. 5 at 1.

After receiving this e-mail and concluding that he had provided Moses enough time to secure funding, Satkowiak consulted Katherine Finnie to see what his options were. Tr. at 350. Finnie suggested the possibility of submitting Moses' case to an ORNL Suspension/Termination Review Committee (STRC). *Id.* at 350-51. Satkowiak decided on this course of action, and recommended to the STRC that Moses be terminated due to lack of funding. *Id.* at 352.

The STRC was composed of three ORNL "Level 1" managers: Dana Christensen, the Level 1 manager above Moses and Satkowiak, Lori Barreras, ORNL's Director of Human Resources, and Reinhold Mann, ORNL's Associate Laboratory Director for Biological and Environmental Sciences, who served as the "neutral" Level 1 manager on the STRC. *Id.* at 470-71.

The STRC met on March 12, 2007. According to the minutes of that meeting, Satkowiak and Finnie presented the facts of Moses' case, after which the members of the committee discussed whether Moses had been given an adequate period of time to find funding. Ex. A at 2-3. Satkowiak indicated that Moses had become eligible for early retirement as of the end of January 2007. *Id.* at 2. The minutes reflect the committee's decision that Satkowiak discuss with Moses the option of taking early retirement, and that if he did not elect retirement, Satkowiak had the committee's approval for termination. *Id.* at 3. Satkowiak met with Moses a "couple of days" after the STRC meeting, and offered him the opportunity to choose retirement in lieu of termination. Tr. at 363. A "day or so later" Moses informed Satkowiak that he was choosing to retire, which he did, effective May 31, 2007. *Id.* at 30, 363.

II. Analysis

A. Did Moses Engage in Protected Conduct?

Under the regulations governing the DOE Contractor Employee Protection program, the complainant "has the burden of establishing by a preponderance of the evidence that he or she made a disclosure, participated in a proceeding, or refused to participate, as described under

Section 708.5, and that such act was a contributing factor in one or more alleged acts of retaliation against the employee by the contractor." 10 C.F.R. § 708.29. The term "preponderance of the evidence" means proof sufficient to persuade the finder of fact that a proposition is more likely true than not when weighed against the evidence opposed to it. *See Joshua Lucero*, 29 DOE ¶ 87,034 at 89,180 (2007) (citing *Hopkins v. Price Waterhouse*, 737 F. Supp. 1202, 1206 (D.D.C. 1990)).

As noted above, Moses' alleged protected disclosures fall into two discrete categories: (1) those made in 2004 and 2005 regarding DOE contracting practices; and (2) those made in 2006 alleging wasteful spending relating to a research project to use Low Enriched Uranium and Molybdenum to fabricate both proliferation-resistant research reactor fuel and targets to produce Mo-99.

1. 2004-2005 Disclosures Regarding DOE Contracting Practices

During the pre-hearing telephone conference held in this matter on November 20, 2007, I asked Moses to specifically identify the disclosures he made that he is alleging were protected under Part 708. With respect to the first category of disclosures, Moses identified 17 e-mail messages, the first on January 10, 2004, and the last on April 4, 2005. Memorandum of Pre-Hearing Telephone Conference (November 20, 2007).[8] UT-Battelle agrees that Moses' communications during this period regarding DOE contracting practices included disclosures protected under Part 708. Tr. at 13-14. Thus, I find that Moses' disclosures during this period were protected,[9] with the exception of Moses' facsimile transmission to French official Bruno Sicard, since in order to be protected under Part 708, a disclosure must be made "to a DOE official, a member of Congress, any other government official who has responsibility for the oversight of the conduct

[8] On November 21, 2007, I sent a copy of this memorandum to Moses and UT-Battelle, asking them to notify me if they found any errors or omissions in the document. The parties noted no omissions in response to my message, and the only errors noted were regarding the names of two ORNL personnel. E-mail from Steven Goering, OHA, to Alan M. Parker, UT-Battelle, and David Moses, *et al.* (November 21, 2007); E-mail from David Moses to Steven Goering, OHA, and Alan M. Parker, UT-Battelle, *et al.* (November 25, 2007) (noting "two minor changes with names of personnel"). In this regard, I note Moses has previously stated that he communicated concerns to the DOE Office of Inspector General in August 2005, September 2005, and September 2006. Electronic Mail from David Moses to Richard Cronin, OHA (October 8, 2007). However, during the pre-hearing conference, Moses did not identify these communications as disclosures that he was alleging to be protected under Part 708. In any event, there is no evidence in the record that the ORNL officials responsible for taking the personnel actions against Moses that are alleged to be retaliatory had actual or constructive knowledge of these communications at the time of the personnel actions. Had Moses alleged that his communications to the IG included protected disclosures, he would have had to prove that these officials had such knowledge of the communications in order to meet his burden of showing that they were contributing factors to the personnel actions taken against him. *See infra* Section II.B.

[9] Included in the communications I find to be protected is the 11-page document Moses provided to Satkowiak in April 2005, as discussed in Section I.D.1 above. Though Moses did not specifically identify this as an alleged protected disclosure during the pre-hearing conference, I do not find that UT-Battelle would be prejudiced by my consideration of this communication as a protected disclosure. First, UT-Battelle has already agreed that Moses' communications regarding alleged illegal contracting practices were protected under Part 708. Tr. at 13-14. Further, the Report of Investigation in this case specifically discussed this document as an alleged protected disclosure. ROI at 8-9.

of operations at a DOE site, your employer, or any higher tier contractor, . . ." 10 C.F.R. § 708.5(a).[10]

2. September 6, 2006, E-mail

With respect to the second category of disclosures, during the pre-hearing conference Moses identified his September 6, 2006, e-mail as an alleged protected disclosure. Memorandum of Pre-Hearing Telephone Conference (November 20, 2007). The OHA Investigator in this case concluded that the September 6 e-mail was a disclosure protected under Part 708. ROI at 9. This conclusion was based in part on a stipulation by UT-Battelle that (1) it would have been reasonable for Moses to believe that a literature search should have been conducted concerning fission recoil barriers and that such a literature search would have identified a solution to the research problem concerning the barrier; and (2) the potential savings in research costs that could have been achieved if a proper literature search had been conducted in a timely manner would have ranged from "$100,000 to several hundred thousand dollars." *Id.* (citing E-mail from Jeff Guilford, Counsel, UT-Battelle to Richard Cronin, Assistant Director, OHA (August 7, 2007)).

In its statement discussing the Report of Investigation, UT-Battelle took issue with the OHA Investigator's conclusion, first because the September 6 e-mail "was not directed at a DOE official or other individual described in Section 708.5(a)," and second, because "the purpose of the email was to berate colleagues on what Dr. Moses believed to be an unprofessional approach to scientific research rather than to make protected disclosures to company or DOE officials." UT-Battelle's Statement Discussing the Report of Investigation at 5 (November 19, 2007).

I find both of these arguments to be without merit. The Part 708 regulations includes as protected conduct the disclosure of information "to a DOE official" or the individual's "employer, . . ." 10 C.F.R. § 708.5(a). UT-Battelle's argument rests on the fact that Moses' September 6 e-mail was addressed to individuals at MURR and ANL, while others, including Satkowiak and DOE official Parrish Staples, received the e-mail by virtue of being included on the "cc:" line. It is clear, however, that the September 6 e-mail was received by Satkowiak and Staples, and that therefore the information contained in the e-mail was "disclosed to a DOE official" and to Moses' "employer," and UT-Battelle offers no basis for reading an additional requirement into Section 708.5(a) that the information be primarily "directed at a DOE official or other individual described in Section 708.5(a)."

Neither does Section 708.5(a) require that information be disclosed with a particular purpose or intent. The DOE made this explicit when, in revising Section 708.5(a) to remove the requirement that a disclosure be made "in good faith," it stated that it "did not intend to place the employee's state of mind into issue." Criteria and Procedures for DOE Contractor Employee Protection Program, 65 Fed. Reg. 6314, 6317 (February 9, 2000). Even under the previous

[10] Moses contends that because, in his message to Sicard, he "encouraged" Sicard to discuss his concerns with DOE official Robert Boudreau, and Sicard provided a copy of Moses' message to Boudreau, his message to Sicard should be treated as a protected disclosure made through a "third-party conduit" to a DOE official. Letter from David Moses to Steven Goering, OHA (November 29, 2007). Moses offers no support from the plain language of the Part 708 regulations or from prior Part 708 cases for such an interpretation of 10 C.F.R. § 708.5(a), and I find none.

wording of Section 708.5(a), the OHA Director held that, "in evaluating whether a person has made a disclosure in good faith, the person's motivations for making the disclosure are irrelevant." *Diane E. Meier*, 28 DOE ¶ 87,004 at 89,041 (2000).

Finally, at the hearing in this matter, counsel for UT-Battelle acknowledged that "Moses did believe there was a gross waste of funds, and I think he reasonably believed that there was gross waste of funds. . . ," but then raised the issue of whether, in the September 6 e-mail, a "statement of gross waste of funds had been made. It only asks a question, and there is never, in the communication trail, an answer to the question, or any declaration thereafter." Tr. at 494. However, the Part 708 regulations do not require that an employee make an affirmative declaration that a "gross waste of funds" has occurred in order to qualify for protection from retaliation. Rather, Section 708.5(a) merely requires that a disclosure be of "information" that the employee "reasonably believes reveals," among other things, "gross waste of funds, . . ." 10 C.F.R. § 708.5(a).

In this case, there is no dispute that Moses reasonably believed that there was a gross waste of funds, ROI at 9; Tr. at 494, and I find that it would have been reasonable for Moses to assume that his September 6 e-mail conveyed his belief and the basis thereof. In the e-mail, after explicitly expressing his belief, which UT-Battelle has acknowledged was reasonable, that there should have been a "literature research for precedential R&D," Ex. M, Moses concludes by characterizing the RERTR program as "a full-employment science program . . . principally consisting of doing lots of high-priced work that leads to a rediscovering of that which should have been recognized or known by a decent and diligent literature search," and then asks, in what is by all appearances a rhetorical question, "How much taxpayer money has been wasted since 1998 to now on this bad science?" *Id.*

After considering the arguments raised by UT-Battelle, I conclude that Moses' September 6, 2006, e-mail did disclose, to a DOE official and to his employer, information that he reasonably believed revealed a gross waste of funds, and that therefore the September 6 e-mail included a disclosure protected under Part 708.[11]

B. Whether Protected Activity Was a Contributing Factor in an Act of Retaliation

In order to prevail in a Part 708 action, the complainant must show, by a preponderance of the evidence, that the protected activity was a contributing factor to a retaliatory action taken against him. Section 708.2 of the Contractor Employee Protection regulations defines retaliation as "an

[11] During the pre-hearing conference, Moses identified four other disclosures pertaining to the RERTR program, made prior to the September 6, 2006, e-mail, that he contends are protected under Part 708. Memorandum of Pre-Hearing Telephone Conference (November 20, 2007). In addition, at the hearing in this matter, Moses characterized two other documents, also predating his September 6 e-mail, as being protected disclosures. Tr. at 69, 73, 107; Ex. F; Ex. G. As I have already found Moses' September 6 e-mail contained a protected disclosure, and I find below that Moses has met his burden of showing that this protected disclosure was a contributing factor in the alleged retaliatory actions at issue in this case, I need not consider whether these earlier disclosures are also protected under Part 708. For the same reason, at the pre-hearing conference I found that it would not be necessary to take the testimony of five witnesses proposed by Moses as to the validity of his concerns pertaining to the RERTR program "as UT-Battelle has conceded that disclosure protected as to the substance . . . ." Memorandum of Pre-Hearing Telephone Conference (November 20, 2007).

action (including intimidation, threats, restraint, coercion or similar action) taken by a contractor against an employee with respect to employment (e.g., discharge, demotion, or other negative action with respect to the employee's compensation, terms, conditions or privileges of employment) as a result of the disclosure of information." 10 C.F.R. § 708.2. At the pre-hearing conference, Moses identified the following actions by ORNL as alleged retaliations:

1. The September 2006 decision to place him on one week of paid administrative leave, without access to his work computer;

2. The denial of a merit increase based upon his fiscal year 2006 performance assessment;

3. The March 2007 decision to offer him the choice of termination or early retirement.

Memorandum of Pre-Hearing Telephone Conference (November 20, 2007).[12]

Regarding UT-Battelle's decision to place Moses on a week of paid administrative leave, UT-Battelle presented the hearing testimony of Katherine Finnie, a Senior Resource Manager in ORNL Human Relations. Tr. at 423. Ms. Finnie testified that administrative leave is not considered a "disciplinary action" within ORNL's Human Resources system, and that Moses lost no pay, benefits, or seniority as a result of the action. *Id.* at 427-28. Citing this testimony, UT-Battelle argues in its post-hearing brief that this action "did not constitute an act of 'retaliation' as that term is used in 10 C.F.R. § 708.2" as it "was not a 'negative action with respect to the employee's compensation, terms, conditions or privileges of employment.'" UT-Battelle Brief at 32 (quoting 10 C.F.R. § 708.2).

First, the definition of retaliation in Section 708.2 is clearly not limited to a "negative action with respect to the employee's compensation, terms, conditions or privileges of employment." Rather, such an action is provided in the text only as an example of an "action . . . taken by a contractor against an employee with respect to employment." 10 C.F.R. § 708.2.

Moreover, in his testimony, Satkowiak stated that, as a result of Moses' September 6, 2006, e-mail, his "recommendation for discipline was let David sit at home, think about what he did, and then have him come back to the office after, after a week." Tr. at 295. Thus, Satkowiak saw the administrative leave as "discipline," and whether or not ORNL officially regarded it as such,[13] this was clearly an "an action . . . taken by" UT-Battelle "against" Moses "with respect to employment." 10 C.F.R. § 708.2. In addition, though Finnie testified that the denial of Moses' access to his official e-mail was "pretty much standard procedure when a person went on administrative leave pending an investigation . . . of improprieties," Tr. at 428, this action was clearly a negative one with respect to the "terms, conditions, or privileges" of Moses employment. 10 C.F.R. § 708.2. Therefore, both of these actions would fall within the definition of "retaliation" under Section 708.2, if taken as a result of his disclosures. *Id.*

[12] Moses did not identify the September 22, 2006, written warning as an alleged retaliation. In any event, I note that ORNL HR official Katherine Finnie testified at the hearing that the written warning is no longer in Moses' personnel file. Tr. at 434.

[13] When asked whether "suspension with pay" is considered by ORNL to be a "disciplinary action," Satkowiak responded, "I don't know. Is it?" *Id.*

I find that in this case the placement of Moses on paid administrative leave, particularly when viewed in conjunction with the denial of access to his work computer, was an action taken by UT-Battelle against Moses with respect to his employment, even though it had no effect on his compensation.

1. Whether Protected Disclosure in Moses' September 6, 2006, E-mail Was a Contributing Factor in the Alleged Acts of Retaliation

In prior decisions, OHA has found that:

> A protected disclosure may be a contributing factor in a personnel action where "the official taking the action has actual or constructive knowledge of the disclosure and acted within such a period of time that a reasonable person could conclude that the disclosure was a factor in the personnel action."

Charles Barry DeLoach, 26 DOE ¶ 87,509 (1997) (quoting *Ronald Sorri*, 23 DOE ¶ 87,503 at 89,010 (1993).

a. Administrative Leave and 2006 Performance Assessment

The record indicates that Lawrence Satkowiak took the first two personnel actions alleged to be retaliatory on September 15, 2006 (the placement of Moses on administrative leave without access to work computer) and January 25, 2007 (Moses' 2006 performance assessment). Satkowiak was copied on Moses' September 6, 2006, e-mail, and became aware of the e-mail the following day. Thus, Satkowiak took these two personnel actions within eight days, and five months, respectively, of when he gained actual or constructive knowledge of the protected disclosures contained in Moses' September 6 e-mail. Based solely on the temporal proximity between the e-mail and these two alleged retaliations, I find that a reasonable person could conclude that Moses' protected disclosure in the September 6 e-mail was a factor in both of these two personnel actions. *Luis P. Silva*, 27 DOE ¶ 87,550 (2000) (eight months sufficiently proximate in time); *Barbara Nabb*, 27 DOE ¶ 87,519 (1999) (eight months); *Robert Gardner*, 27 DOE ¶ 87,536 (1999) (six months); *Frank E. Isbill*, 27 DOE ¶ 87,513 (1999) (six months).

b. Decision to offer Moses Choice Between Termination and Early Retirement

As for the last alleged retaliation, the members of the STRC, Lori Barreras, Dana Christensen, and Reinhold Mann, decided at their March 12, 2007, meeting to offer Moses the choice between early retirement and termination. Ex. A. Prior to the meeting, ORNL HR official Katherine Finnie compiled a notebook for purposes of the meeting that was provided to each member either the day of or the business day prior to the meeting. Tr. at 499, 560, 577. Included in the notebook was a copy of Moses' September 6, 2006, e-mail. Ex. 22 at Tab "2006 E-Mails".

Although neither Barreras nor Mann testified as to any specific recollection of having read the September 6 e-mail, and both recalled the notebook being referenced as background material regarding Moses' loss of funding, Tr. at 560, 579, I find that the inclusion of the September 6 e-

mail in the notebook was sufficient to provide both Barreras and Mann at least constructive, if not actual, knowledge of Moses' September 6, 2006, protected disclosure.

This finding is further supported by the minutes of the March 12, 2007, STRC meeting, which includes a statement that "Kathie [Finnie] and Larry [Satkowiak] reviewed the 'Synopsis of Issues and E-Mail communication 2004-2006.'" Ex. A. This synopsis was also included in the notebook prepared for the STRC meeting, and contains the following regarding Moses' September 6, 2006, e-mail:

- 9/6/2006 (9:44 PM) Moses > Vandergrift et. al

  > "what you call a "fission recoil barrier" to prevent the aluminum clad foil from bonding ….is what Atomics International (AI) called a diffusion barrier in its testing work in the late 1950's and early 1960's...Don't you guys...ever do any literature research? ...My word, INL,-ANL, has rediscovered what Oak Ridge and Hanford knew in the late 1940's....made into a bad science program principally consisting of doing lots of high priced work that leads to rediscovering of that which should have been recognized or known by a decent and diligent literature search….how much tax payer money has been wasted since 1998 to now on this bad science?

Ex 22 at 11 (ellipses in original). There is no evidence in the record that either Barreras or Mann were aware of the September 6 e-mail prior to being provided a copy of the STRC meeting notebook. However, Dana Christensen, the third member of the STRC, clearly had previous knowledge of the contents of the September 6 e-mail, as Satkowiak testified that he forwarded a copy of the e-mail to Christensen on September 8, 2006, Tr. at 286, and Christensen recalled reading it. *Id*. at 603-04.

Thus, all three officials responsible for deciding that Moses would be offered the choice between termination and retirement had either actual or constructive knowledge of the contents of Moses' September 6 e-mail, Barreras and Mann first gaining that knowledge either the business day prior to or the day of the meeting at which they made the decision, and Christensen first being made aware of the September 6 e-mail approximately six months prior to the meeting. Based solely on this temporal proximity, I find that a reasonable person could conclude that Moses' protected disclosure in the September 6 e-mail was a contributing factor in the STRC's decision.[14]

[14] Though it is common in cases applying the "temporal proximity" analysis to measure the proximity between the date of the protected disclosure and the personnel action at issue, the standard itself is silent as to how the "period of time" is to be measured and, as has been noted by the OHA Director in a prior Part 708 Appeal decision, "[a]pplying a reasonable-person standard to this issue requires considering the circumstances of each case." *Kaiser-Hill Company, L.L.C.*, 27 DOE ¶ 87,555 at 89,300 (2000). Thus, for example, in a case where a protected disclosure was made to the DOE Inspector General, the Hearing Officer considered the proximity in time between the point at which the official taking the action became aware of the protected disclosure (as opposed to the date of the disclosure itself) and the personnel action at issue. *Elaine M. Blakely*, 28 DOE ¶ 87,039 at 89,273 (2003), *aff'd*, 28 DOE ¶ 87,043 (2004).

2. Whether Protected Disclosures in Moses' 2004 and 2005 Communications Were Contributing Factors in the Alleged Acts of Retaliation

a. Administrative Leave and 2006 Performance Assessment

Of the disclosures during 2004 and early 2005 that I find above to be protected, the most recent is the 11-page document that Moses provided to Satkowiak in April 2005. As noted above, Satkowiak took the first two alleged retaliatory actions on September 15, 2006 (the placement of Moses on administrative leave without access to work computer) and January 25, 2007 (Moses' 2006 performance assessment). Thus, Satkowiak took these two actions approximately 17 months and 21 months after the most recent protected disclosure from the 2004 to 2005 period. Based solely on these facts, I do not find that a reasonable person could conclude that the April 2005 disclosure, and those that preceded it, were contributing factors in these two personnel actions. *Donald Searle*, Case No. TBU-0079 (July 28, 2008) (twelve months between protected conduct and alleged retaliation "an unusually extended period of time" which does not amount to "even a perfunctory showing of a contributing factor").

Thus, Moses must rely on other evidence in order to meet his burden of establishing, by a preponderance of the evidence, that his protected disclosures from 2004 and 2005 were contributing factors in the two actions. With regard to Satkowiak's September 15, 2006, decision to place Moses on administrative leave, Moses offers no evidence that would establish this, and I find none.

As for the 2006 Performance Assessment, Moses cites the following statement by Satkowiak in the assessment: "Mr. Moses has repeatedly demonstrated his inability to interact professionally with our NNSA/NA-20 sponsors." Ex. B at 3. Satkowiak testified at the hearing that this statement referred to events with respect to both NA-21 in 2006 and NA-26 in 2005. Tr. at 42-43. Nonetheless, as discussed below, the preponderance of the evidence in the record supports a finding that Satkowiak's statement regarding Moses' "inability to interact professionally" referred not to Moses' disclosure of information regarding DOE contracting practices in 2004 and 2005, but rather to the manner in which he raised those issues.

Satkowiak testified that, after Moses began to report to him in the summer of 2004, he got involved in " a limited sense" in the issues being raised by Moses in 2004, and that he supported Moses in reporting those concerns. *Id.* at 263-64. When asked at the hearing whether Satkowiak and UT-Battelle "fully supported" him in making his concerns known to DOE in 2004, Moses responded, "I presume so. I really didn't discuss a lot of this with Dr. Satkowiak." *Id*. at 143. It appears therefore that Satkowiak was aware that Moses was raising concerns at the time he completed his first Performance Assessment of Moses on January 25, 2005. Ex. 22, "Performance Reviews" Tab at 1. Yet, in that assessment, Moses received the highest possible rating of 6, and Satkowiak commended Moses for doing an excellent job . . . during what, at best, could be described as a difficult year." *Id.* at 15. Satkowiak further cited Moses' ability to act "as a buffer between the frustrations of junior technical staff and the sponsors, whose motivations are sometimes politically driven rather than guided by logic, . . ." *Id.*

Moses' 2005 Performance Assessment, for the year ending September 30, 2005, was completed on February 7, 2006, after the events of early 2005 leading to Moses' loss of funding from NA-26. Satkowiak gave Moses a rating of 4 out of a possible 6. Ex. 22, "Performance Reviews" Tab at 1. However, the only negative comments in the assessment reference not the fact that Moses raised issues, but the manner in which he raised them: "Mr. Moses' relationship with NA-26 has been tumultuous during the past year. Although I agreed with many of the issues raised by David, I found his approach to address the issues lacking in the finesse necessary in these delicate situations." *Id.* at 9.

Indeed, the testimony of Satkowiak, and more importantly Moses, indicates that Satkowiak supported Moses in his continued communications with DOE officials throughout 2005, both before the loss of NA-26 funding, and afterward, when he began to work with, and raise concerns with, NA-21 officials in his new work for ORNL on the RERTR program. Tr. at 161-62, 171-72. Specifically with regard to the issues relating to NA-26, Satkowiak testified that he raised at least some of the issues set forth in the 11-page document Moses provided to him in April 2005 in a meeting with DOE officials in Washington later in the spring, one of the purposes of which was to try to convince DOE officials to restore NA-26 funding for Moses. *Id.* at 706-709. Satkowiak's support of Moses' communications after he was no longer funded by NA-26 is further reflected in the following exchange between counsel for UT-Battelle and Moses:

> Q. . . . You began raising these [RERTR] issues in 2005?
> A. Um-hum.
> Q. And you sent e-mails to Dr. Satkowiak. Does he take any action against you?
> A. No.
> Q. Does he criticize you because you've raised these issues?
> A. No.
> Q. Did he continue to support you while you raised these issues?
> A. Yes.

Tr. at 171,72. Satkowiak's support continued, according to Moses' testimony, through the summer of 2006, prior to the September 6, 2006, e-mail. *Id.* at 175-76.

Given this context, I cannot find that Satkowiak's reference in Moses' 2006 Performance Assessment to unprofessional interactions is sufficient to prove, by a preponderance of the evidence, that Moses' 2004 and 2005 disclosures were contributing factors to the rating Moses received on that assessment.

b. Decision to offer Moses Choice Between Termination and Early Retirement

I found in Section II.B.1.b above that the three members of the STRC, who decided that Moses would be offered the choice between termination and retirement, had either actual or constructive knowledge of the contents of Moses' September 6 e-mail, based upon the inclusion of the e-mail in the notebook compiled for the purpose of the March 12, 2007, STRC meeting. I find the same

is true for the protected disclosures contained in Moses' e-mail communications of 2004 and 2005, which were also included in the notebook. Ex. 22 at Tab "2005 E-Mails," Tab "2004 E-Mails." Also, as in the case of the September 6 e-mail, Moses' e-mail communications in 2004 and 2005 are summarized in the "Synopsis of Issues and E-Mail communication 2004-2006" contained in the notebook, the summary of the 2004 communications presented under the heading "Issue - Moses alleges DOE mismanagement of contracts; ineffectiveness of sponsor, (Fletcher) bribery, corruption, DOE'S lost credibility, conflict of interest" and the 2005 communications under the heading "Issue - DOE has handled subcontracts inappropriately, improper management - particularly on the part of Norman Fletcher." Ex. 22 at 6-9. Specifically included in the synopsis, among other things, is Moses' reference to possible violations of the Foreign Corrupt Practices Act. *Id.* at 6. Further, there is no evidence that the three committee members were aware of Moses' 2004 and 2005 protected conduct prior to receiving the notebook either on the day of the meeting or the business day preceding it. Based on the close proximity in time between when these three officials gained knowledge, either actual or constructive, of Moses' 2004 and 2005 protected disclosures, and the date of the STRC's decision, I find that a reasonable person could conclude that those disclosures were contributing factors in that decision.

In sum, for the reasons set forth above, I find that Moses has not established, by a preponderance of the evidence, that his protected disclosures in 2004 and 2005 were contributing factors in either his placement on administrative leave on September 15, 2006, or his 2006 Performance Assessment and the resulting lack of a merit increase in 2007. However, I find that Moses has established by a preponderance of the evidence that the September 6, 2006, disclosure was a contributing factor in the decision to place him on administrative leave and in his 2006 Performance Assessment, and that both the 2006 disclosure and Moses' protected disclosures in 2004 and 2005 were contributing factors in the decision by the STRC to offer Moses the choice between retiring or being terminated. Thus, the burden shifts to UT-Battelle to prove by clear and convincing evidence that (1) Satkowiak would have placed Moses on administrative leave and given Moses the same rating on his 2006 Performance Assessment in the absence of his September 6, 2006 protected disclosure, and (2) that the STRC would have reached the same decision to offer Moses the choice between retiring and being terminated in the absence of both his 2004 to 2005 protected disclosures and his September 6, 2006, protected disclosure.

C. Whether the Contractor Would Have Taken the Same Actions in the Absence of the Protected Disclosures

Section 708.29 states that once a complaining employee has met the burden of demonstrating that conduct protected under § 708.5 was a contributing factor in the contractor's retaliation, "the burden shifts to the contractor to prove by clear and convincing evidence that it would have taken the same action without the employee's disclosure, participation, or refusal." 10 C.F.R. § 708.29. "Clear and convincing evidence" requires a degree of persuasion higher than preponderance of the evidence, but less than "beyond a reasonable doubt." *See Casey von Bargen*, 29 DOE ¶ 87,031 at 89,163 (2007). If the contractor meets this heavy burden, the allegation of retaliation for whistleblowing is defeated despite evidence that the retaliation may have been in response to the complainant's protected conduct.

It is well settled that several factors may be considered in determining whether an employer has shown, by clear and convincing evidence, that it would have taken the alleged act of retaliation against a whistleblower in the absence of the whistleblower's protected conduct. The Federal Circuit, in cases interpreting the federal Whistleblower Protection Act (WPA), upon which Part 708 is modeled, has identified several factors that may be considered, including "(1) the strength of the [employer's] reason for the personnel action excluding the whistleblowing, (2) the strength of any motive to retaliate for the whistleblowing, and (3) any evidence of similar action against similarly situated employees . . . ." *Dennis Patterson*, 30 DOE ¶ 87,005 at 89,040 (2008) (quoting *Kalil v. Dep't of Agriculture*, 479 F.3d 821, 824 (Fed. Cir. 2007)).

1. Whether Satkowiak Would Have Placed Moses on Administrative Leave in the Absence of His September 6, 2006, Protected Disclosure

As an initial matter with regard to this issue, I note the Part 708 regulations protect, among other things, the disclosure of certain "information." 10 C.F.R. § 708.5. It is therefore the disclosure of particular information contained in a communication that is protected, not the communication in its entirety. Thus, in the present case, I have found above that Moses' September 6, 2006, e-mail *contained* information the disclosure of which is protected under Part 708, not that the e-mail as a whole is protected.

This distinction is of particular importance in the present case, since there is little doubt that had Moses not sent the September 6 e-mail, he would not have been placed on administrative leave on September 15, 2006. That, however, is not the issue before me. Rather, the proper question in the present case is whether Satkowiak would have placed Moses on administrative leave had Moses' September 6 e-mail not contained information the disclosure of which is protected under Part 708. The Federal Circuit's 2007 decision in *Kalil*, cited above, and its 2006 decision in *Greenspan v. Department of Veteran Affairs*, are helpful to my analysis in this regard. *Greenspan v. Dep't of Veteran Affairs*, 464 F.3d 1297 (Fed. Cir. 2006).

In *Greenspan*, the agency issued a letter of reprimand to an employee doctor after his statement to an agency executive at a meeting, basing its decision on its characterization of the statement as "unfounded" and "defamatory." *Id.* at 1305. The court found that the discipline was improper, as the charges were "anchored in the protected disclosures themselves."

In *Kalil*, however, the court rejected an interpretation of *Greenspan* advanced by the employee that "once a disclosure qualifies as protected, the character or nature of that disclosure can never supply support for any disciplinary action." 479 F.3d at 825. Thus, after setting forth the factors listed above that "may be considered," the court in *Kalil* held that "the character of the disclosure itself supplie[d] clear and convincing evidence that the Agency met its burden of proof." *Id.*

Applying the analysis of *Kalil* and *Greenspan* to the present case, I turn to the first of the three factors set forth in those cases, the strength of the employer's reason for the personnel action excluding the whistleblowing. Here, the only contemporaneous evidence of the basis for the decision to place Moses on administrative leave is the notes of the September 15, 2006, meeting between Moses, Satkowiak, and ORNL HR official Katherine Finnie. Ex. J. These notes begin with Satkowiak's statement that the September 6 e-mail created "a very sensitive situation the

next day" and mentions "[c]alls from [Parrish] Staples and [Ralph] Butler," two of the recipients of the e-mail. *Id.* at 1. Moses responds by discussing the merits of the issues raised in the e-mail, and characterizing it as a "[f]raud, waste, and abuse accusation." *Id.* Satkowiak immediately responds that " [r]eporting fraud, waste and abuse not the problem. It was the wording." *Id.* Moses later states, "Technically what we said is correct," to which Satkowiak responds, "I assume you are correct." *Id.*

The notes include Satkowiak's statement that Moses' "job as a senior program manager is to think about the bigger picture. How do we get things done without jeopardizing funding?" and that the problem was not "what was said but what was implied. Personal. When emotional no e-mail is good advice." *Id.* at 2. Finally, Satkowiak's states that his boss, Dana Christensen, viewed

> this very seriously. New to lab. Main concern is with reputation to lab. As a consequence will go ahead and suspend you with pay pending further investigation. Compromised lab.
>
> David: By pointing out fraud, waste and abuse?
>
> Kathy [Finnie]: No. By the manner in which you did this report.

Id. at 3.

From these notes, it is clear that in the present case, unlike in *Greenspan*, Satkowiak's objection to Moses September 6 e-mail was not "anchored in the protected disclosures themselves." *Greenspan*, 464 F.3d at 1305. In fact, again in contrast to the contention of the agency in *Greenspan* that the employee's allegations were "unfounded," Satkowiak explicitly stated in the September 15 meeting that he assumed what Moses alleged was "correct." Ex. J at 1.

Further, as the court held in *Kalil*, the "character of [a] disclosure itself" can "suppl[y] clear and convincing evidence" in support of a employer's personnel action. 479 F.3d at 825. Here, Satkowiak and Finnie made clear in the September 15, 2006, meeting that they saw the problem as the "wording" and the "manner" of Moses' e-mail, not any report of waste, fraud, or abuse. Examples of the tone of Moses' September 6 e-mail, longer portions of which are quoted above, can be found in statements such as:

- Don't you guys in the RERTR Program at ANL ever do any literature research?
- Who came up with this "fission recoil barrier" terminology as opposed to diffusion barrier? Does calling it by a new name make it a new discovery?
- Apparently, neither side . . . did their literature research for precedential R&D work like every graduate student at a top-flight university (such as Missouri) must surely be taught to do.

- [W]e were privileged to hear from ANL's Dr. Hofman how INL-ANL has "rediscovered" the magic properties of silicon when added to aluminum to arrest the interdiffusion of uranium and aluminum. My word, INL-ANL has rediscovered what Oak Ridge and Hanford knew in the late 1940s and Knolls Atomic Power Laboratory (KAPL) and the UKAEA-Harwell studied in more detail along with ORNL in the 1950s.

The court in *Greenspan* made clear that disclosures do not lose protection when they are "stated in a blunt manner." 464 F.3d at 1299. Thus, in this case, had Moses' September 6 simply expressed his reasonable beliefs in a way that was direct and straight to the point, even if those beliefs touched on uncomfortable truths, it would be difficult for UT-Battelle to claim that Satkowiak would have taken the same action in the absence of protected disclosures.

However, *Greenspan* makes equally clear that "wrongful or disruptive conduct is not shielded by the presence of a protected disclosure, . . ." *Id.* at 1305. As is evident from the excerpts above, Moses' e-mail went well beyond being merely blunt, and became sarcastic and gratuitously insulting to his fellow scientists. The September 15 meeting notes indicate that Satkowiak considered the possible negative repercussions of this behavior, telling Moses that he needed to "think about the bigger picture. How do we get things done without jeopardizing funding?" Satkowiak's concern was understandable, given Moses' loss of NA-26 funding the previous year. In short, Moses' e-mail was not only rude in tone, but gave Satkowiak good reason to be concerned that it would be disruptive in its consequences, a concern that was proven to be well-founded when NA-21 decided later that month that it could no longer fund Moses' work. Accordingly, in applying the first factor set forth in *Kalil*, I find strong reasons for Satkowiak's decision completely apart from Moses' protected activity.

In applying the second factor, the strength of any motive to retaliate for the whistleblowing, I find no evidence of any such motive on the part of Satkowiak, such as would be the case if Moses' protected disclosures were in any way critical of Satkowiak or ORNL. Rather, the targets of Moses' allegations were officials at other DOE laboratories and at DOE Headquarters. *See Carr v. Soc. Security Admin*, 185 F.3d 1318, 1326 (Fed. Cir. 1999) (those with motive to retaliate "not 'agency officials' recommending discipline").

As for the third factor, UT-Battelle offers no evidence of similar action taken against other ORNL employees situated similarly to Moses, though it would not be surprising if there were no such employees, given the nature of Moses' actions that resulted in his placement on administrative leave. In any event, it is clear under the Federal Circuit's application of these factors that an employer can meet its clear and convincing evidentiary burden despite the lack of such evidence. *Kalil*, 479 F.3d at 825 (finding clear and convincing evidence based upon "character of [the] disclosure itself"); *Carr,* 185 F.3d at 1326-27 (upholding finding of clear and convincing evidence where lack of evidence of similar action against similarly situated employees).

Based on all of the above considerations, I find that UT-Battelle has proven by clear and convincing evidence that Satkowiak would have place Moses on administrative leave on September 15, 2006, in the absence of the protected disclosure in his September 6, 2006, e-mail.

2. Whether Satkowiak Would Have Given Moses a "Not Fully Contributing" Rating on His 2006 Performance Assessment in the Absence of His September 6, 2006, Protected Disclosure

In considering whether UT-Battelle has shown by clear and convincing evidence that Moses' 2006 Performance Assessment rating of "Not Fully Contributing" would have been the same in the absence of his September 6, 2006, disclosure, I again turn to the three factors set forth in *Kalil*. Regarding the first factor, the strength of the employer's reason for the personnel action, the only contemporaneous evidence of the basis for the rating is found in Satkowiak's summary comments in the 2006 Performance Assessment:

> Mr. Moses has repeatedly demonstrated his inability to interact professionally with our NNSA/NA-20 sponsors. This is unacceptable as a senior program manager within the Nuclear Nonproliferation Program office who has as a primary function interfacing with the sponsor. As a result he has been asked to find "other" funding outside of NNP Office funding. On October 4, 2006, Mr. Moses was directed to secure this funding by the end of November, however, I extended this deadline until the end of February understanding the difficulty of the task given the general funding uncertainty associated with the continuing resolution.

Ex. 22, "Performance Reviews" Tab at 5.

In Section II.B.2.a above, I found that Moses had not met his burden of proving that his 2004 and 2005 disclosures were contributing factors to the 2006 Performance Assessment, in part because, though the Performance Assessment clearly references Moses' communications in 2004 and 2005, Satkowiak was referring to the manner in which Moses raised issues regarding DOE contracting practices in 2004 and 2005, not to the disclosure of this information, *per se*. For the same reasons discussed therein, although the proximity in time between Moses' September 6, 2006, disclosure and the 2006 Performance Assessment provided sufficient circumstantial evidence to prove the disclosure was a contributing factor in the performance assessment, the direct evidence in the record supports a finding that Satkowiak's statement as to Moses' "inability to interact professionally" in the performance assessment was based not upon the disclosures contained in Moses' September 6 e-mail, but rather to the manner in which the e-mail presented those disclosures.

Thus, as with Satkowiak's understandable concern regarding the character of Moses' September 6 e-mail as expressed in the September 15, 2006, meeting, Satkowiak's criticism of Moses' "inability to interact professionally" in the 2006 Performance Assessment is evidence of the strength of Satkowiak's reason, completely apart from any protected activity, for rating Moses as "Not Fully Contributing." The same is true of Satkowiak's comments in the assessment regarding Moses' lack of funding, since by the time of the assessment, DOE had removed Moses from NA-21 funding, presenting Satkowiak with the same problem he faced when Moses was removed from NA-26 funding in April 2005. Indeed, the problem had become even worse, as two of the primary sources of potential funding for Moses, NA-21 and NA-26, were now effectively off-limits. Tr. at 241-49 (testimony of Satkowiak regarding possible sources of DOE-

sponsored funding). Given these circumstances, with regard to the 2006 Performance Assessment, "the strength of the . . . reason for the personnel action excluding the whistleblowing," *Kalil,* 479 F.3d at 824, is clearly evident.

Regarding the second factor to be considered, I have already found above that there is no evidence that Satkowiak had any motive to retaliate against Moses for his September 6, 2006 disclosure by placing him on administrative leave. The lack of any such motive is just as relevant here as to Satkowiak's decision to rate Moses "Not Fully Contributing" on his 2006 Performance Assessment.

Applying the third factor set forth in *Kalil* to Satkowiak's 2006 rating of Moses, I note that UT-Battelle again offers no evidence of similar action against similarly situated employees. However, for the same reasons set forth in the preceding section regarding the placement of Moses on administrative leave, I find that this lack of evidence does not necessarily preclude UT-Battelle from meeting its clear and convincing evidentiary burden regarding the 2006 Performance Assessment.

Considering all three relevant factors, I find it most significant that Satkowiak's reason for the rating he gave Moses on his 2006 Performance Assessment was stronger still than the basis he had for placing Moses on administrative leave in September 2006. By January 2007, when Satkowiak completed the assessment, Moses' September 6, 2006, e-mail had resulted in the loss of his funding from NA-21, and had therefore seriously disrupted Moses' ability to do his job. I note here that the first of the three "Objectives" set forth in the 2006 Performance Assessment was to "Manage the ORNL [RERTR] Program," Ex. 22, "Performance Reviews" Tab at 3, a task made impossible by the loss of NA-21 funding. The second objective, "Technical and program management support to the NNPO," is described as serving as "Senior Program Manager," including by "Providing customer interface," with Moses' performance to be measured by whether he is "judged responsive and responsible by the Director [Satkowiak], his senior management, his outside sponsors, and his peers in serving the needs of the office and in advancing the programs' agendas and growth." *Id.* at 4. These two objectives together accounted for 75 percent of the weight of his assessment. Satkowiak testified as follows regarding the basis for his "Not Fully Contributing" rating of Moses:

> [Y]ou can be winning a race, but if you trip and fall and come in, or don't even finish coming in at the end of, at the end of the race, all of the hard work that you did during the race is very, is, is nice, but . . . because he lost his funding, and essentially soured that relationship with NA-21, he failed to meet the objectives that he agreed to.

Tr. at 339-40.

Based upon the evidence regarding the strength of Satkowiak's reason for the 2006 Performance Assessment, and the lack of any apparent retaliatory motive for Satkowiak's action, I find that UT-Battelle has proven by clear and convincing evidence that Satkowiak would have rated Moses "Not Fully Contributing" on his 2006 Performance Assessment in the absence of any protected disclosure in his September 6, 2006, e-mail.

3. Whether the STRC Would Have Decided to Offer Moses the Choice Between Retiring and Being Terminated in the Absence of Both His 2004 and 2005, and September 6, 2006, Protected Disclosures

Regarding the decision of the STRC to offer Moses the choice between retirement and termination, I find that all three of the factors set forth in *Kalil* support a conclusion that the STRC would have reached the same decision in the absence of Moses' protected disclosures, for the reasons set forth below.

Moses acknowledged at the hearing that, after NA-21 decided in September 2006 that it would no longer fund Moses, it was his responsibility to find other funding. Tr. at 206-07.[15] Satkowiak testified that, while Moses was trying to find direct funding from, for example, a DOE sponsor such as he had previously from NA-26 and NA-21, he was able to fund Moses' employment from an "indirect account," which was funded by a "tax" on the direct funding his office receives from all DOE NA-20 offices, including NA-26 and NA-21. *Id*. at 325-26. This was of some concern to Satkowiak, since using this account meant that NA-21 and NA-26 would still be funding Moses, albeit indirectly and to a much smaller degree. *Id.* at 326; *see also id.* at 506-13 (testimony of ORNL Director of Accounting regarding charging of employee time as indirect versus direct cost).

As noted above, five months after Moses' loss of funding from NA-21, Moses stated in a February 25, 2007, e-mail to Satkowiak that he had "enough work to carry me into March but not much beyond." Ex. 5 at 1. Moses, responding affirmatively to questions from counsel for UT-Battelle, acknowledged that he didn't "have in place adequate long-term funding" and that the "prospects were very poor." Tr. at 223. Satkowiak testified credibly that he was, at this point, "disappointed. I thought, I thought this would have done it. I thought he would have, would have been able to find the, the funding that he needed to find. . . . It put me at a, in a position where I had to make a bad, a difficult decision." Tr. at 348. After consulting with ORNL HR official Katherine Finnie, Satkowiak decided to initiate an STRC review of Moses' case, with the recommendation that Moses be terminated.

The minutes of the March 12, 2007, STRC meeting reflect a discussion as to whether five months was a "reasonable" amount of time within which Moses could be expected to find funding, with the conclusion that it was reasonable. Ex. A at 2. The minutes further indicate that Satkowiak's superior and STRC member Dana Christensen sought and received confirmation

[15] The October 5, 2006, memorandum Satkowiak issued to Moses, discussed in section I.D.2 above, stated that "[u]ntil further notice, you are no longer permitted to have direct contact of any manner, including personal, email and verbal, with our DOE/NNSA NA-20 sponsors." *Id.* At the hearing, Moses stated that the effect of the memorandum was that "he was not allowed to market though NA-20, period." Tr. at 67. However, Moses did not take issue with the testimony of Satkowiak that Moses could have inquired as to funding opportunities from NA-20 through one of "Customer Interface Managers" within ORNL's Nuclear Nonproliferation Program Office (NNPO). Ex. 7 (NNPO organization chart). Satkowiak testified that he "just didn't want David, being as enthusiastic as he is, I didn't want him running up to DOE without engaging the Customer Interface Managers, because it puts them in a, in a very difficult position, because they don't know what's going on in their own area." Tr. at 252; Ex. 8 (August 8, 2005 e-mail from Satkowiak designating specified NNPO employees as Customer Interface Managers). In fact, Moses testified that he talked to at least two of the Customer Interface Managers in his attempt to find funding. Tr. at 126-27, 252-53.

that Satkowiak's recommendation for termination was "based on the lack of success in attracting funding to do work . . ." *Id.* at 3. The hearing testimony of all three committee members, and others in attendance, confirmed that Moses' lack of funding was the primary focus of the meeting. *See, e.g.,* Tr. at 63, 359-60 (testimony of Satkowiak), 448-49 (Finnie), 474-75, 563-63, 565 (Barreras), 572-73, 582-84 (Mann), 618-20 (Christensen).

The minutes also reflect that following statements at the meeting:

> Larry [Satkowiak] discussed that . . . [Moses'] behavior has been more out-of-the-box, and sponsors do not want to deal with him. David must have good customer relations to do his job; but he has alienated the Washington DOE offices. This is of great concern and could impact whether DOE Washington will want to work with ORNL in general.
>
> . . . .
>
> Larry discussed that he was trying to find a spot for David to land – apparently the Washington offices talk to one another, and no one wanted to work with David. Larry said that David is a talented individual, but people are afraid of what he might do to their program. Kathie [Finnie] discussed David's fraud, waste, and abuse concerns and that the fact that he voiced his concerns was not a problem – it was the manner in which he did it.

Ex. A at 2. These excerpts could be read to reflect a discussion of something other than Moses' lack of funding. However, read in context, their connection to the funding issue is clear, as an explanation of why Moses' lost funding and how the opinion of certain DOE officials might affect his ability to obtain funding in the future.

Thus, applying the first factor set forth in *Kalil*, the strength of the reason for the personnel action, the record as a whole, with respect the STRC's decision and the events leading up to it, clearly supports a finding that the reason for the decision was Moses' lack of funding. Further, the undisputed fact that five months had passed since Moses' loss of NA-21 funding and that prospects for future funding were dim certainly is evidence of the strength of the reason for the committee's decision.

As for the strength of any motive on the part of the STRC committee to retaliate against Moses for his protected activity, there is no direct evidence of any such motive since, as discussed above, the targets of Moses' protected disclosures were officials at DOE headquarters and at other DOE laboratories, not ORNL in general or any of the committee members in particular.

In finding a lack of retaliatory motive, I have considered the evidence in the record that after STRC committee member Dana Christensen first read Moses' September 6, 2006, e-mail a few days after it was sent, Christensen wanted to take an action against Moses stronger than putting him on administrative leave and issuing a written warning. Finnie testified that she recalled Christensen being "quite angry that a person of your stature and your background could write an inflammatory e-mail such as that." Tr. at 672. Satkowiak testified that Christensen "was

disturbed that a professional at the laboratory would act like that in a public forum. So, yeah, he was upset. And, yeah, he . . . said something like, 'Why don't we get rid of the guy? Why, why are we keeping this trouble-maker?'" *Id.* at 696-97. Finnie and Satkowiak both testified that, after they had proceeded to discuss Moses' "value to the program" and the fact the he was "sincerely sorry," Christensen agreed with the recommendation of Finnie and Satkowiak for the less severe action that was ultimately taken. *Id.* at 672-73, 697. However, this same testimony indicates that Christensen's anger was not based upon the substance of Moses' protected disclosure, but rather the "inflammatory" nature of the e-mail, and whether there "was going to be a problem with [the DOE] customer." *Id.* at 672, 697; *see also id. at* 623-28, 632-36 (testimony of Christensen). I therefore do not consider this testimony to be evidence of Christensen's motive to retaliate against Moses for his protected activity.

Finally, regarding the third factor set forth in *Kalil*, UT-Battelle submitted a document at the hearing which it contends shows that it has taken similar action against other ORNL employees similarly situated to Moses. Ex. 17. ORNL HR official Katherine Finnie testified at the hearing that she compiled this document using information she had gathered regarding ORNL employees "who would be expected to form their own funding; that is, Researchers, Senior Researchers, and Program Managers . . . who experienced an immediate loss of major funding, and they were charging to the indirect account greater than 50 percent in the last six months of their employment." Tr. at 450, 451. According to Finnie's testimony, the document reflects information regarding nine ORNL employees so situated who were ultimately terminated, and indicates the length of time between when the employee lost direct funding and the date the employee was terminated, the length of time ranging from zero to seven and one-half months, and averaging approximately three and one-half months. Ex. 17; Tr. at 462-63.

In addition, Reinhold Mann, ORNL's Associate Laboratory Director for Biological and Environmental Sciences and one of the three members of the STRC, testified regarding another employee who appears to have been similarly situated to Moses with respect to loss of funding. That employee was, according to Mann, a "pioneer" in the field of cryobiology at the laboratory in the late 1990s. Tr. at 575. Mann received guidance that there would no funding for cryobiology at the laboratory in fiscal year 1998. *Id.* at 574. He testified that ORNL gave the employee approximately five or six months to obtain other funding, but ultimately ended his employment when he was unable to do so. *Id.* at 576.

In comments on the Report of Investigation that Moses submitted to the OHA investigator, he refers to two other ORNL employees that he contends should be considered as similarly situated to him vis-à-vis lack of funding. Ex. 21. At the hearing, UT-Battelle presented the testimony of the ORNL officials for whom these two individuals worked.

The testimony of one of the officials, the Director of ORNL's Nuclear Science and Technology Division, described how one of the employees at issue was hired by ORNL for the purpose of doing "program development," and was paid from indirect funds that were budgeted into his division's overhead account for that specific purpose. Tr. at 518-19.

The other official, for whom the second ORNL employee at issue worked, was at the time the Director of ORNL's Engineering, Science and Technology Division (ESTD). *Id.* at 537. He

testified to "second-hand" knowledge that the employee was removed from her position as Director of ORNL's Energy Efficiency and Renewable Energy Programs at the request of the DOE, after which she became the ESTD Deputy Director. *Id.* at 540. The ESTD Director testified that this employee, in her new Deputy Director position, was paid from "indirect" funds, and was not asked to "develop her own direct funding," though by the time she left ORNL approximately 13 months later, she was working on climate change programs that allowed her charge about half of her time to direct funds. *Id.* at 541-43.

Based on the testimony of these two officials, I do not find either of the employees at issue to have been similarly situated to Moses. Although there is evidence that one of the employees in question was removed from her position at the request of DOE, neither appears to have been in a position similar to Moses, who does not dispute that his position as a "band 4 researcher" required him to secure direct funding for his time. *Id.* at 208; Ex. D.

Considering all of the relevant factors as applied to the evidence discussed above, I am convinced that, given Moses' lack of funding and his lack of prospects for future funding, the STRC would have decided to give Moses the choice between retirement and termination, regardless of whether he had engaged in any activity protected under Part 708. Therefore, I find that UT-Battelle has proven, by clear and convincing evidence, that the STRC committee would have reached the same decision in the absence of Moses' protected disclosures in 2004, 2005, and September 2006. [16]

IV. Conclusion

In the present case, there is no dispute that Moses' communications resulted in a loss of DOE funding support of Moses twice, from NA-26 in April 2005 and from NA-21 in September 2006. The record further reflects that UT-Battelle was not responsible for DOE's decisions, and that in fact Moses' supervisor Satkowiak attempted in both instances to keep Moses working on the DOE-funded programs. Tr. at 267-68, 312-16. On this point, Moses offered the following testimony:

> I know that in this discussion it has been brought out that Larry [Satkowiak], you know, tried his best to keep me employed, but I do stay very concerned about the Contractor's responsibility to initiate investigations when disclosures are made, whether they have responsibilities under [DOE Order 442.1A and 221.1] to either pursue a concern when a legitimate concern about fraud, waste, abuse, abuse of authority, mismanagement arise, other than just

[16] Moses asked questions at the hearing regarding whether the STRC considered offering Moses part-time employment as an alternative to the action it took. Tr. at 478-79, 667-67. Although Moses has not argued that the STRC should have offered him this additional option, I note here the testimony of ORNL HR official Barreras that part-time status would customarily be requested by the employee, *id.* at 481, and the testimony of Moses that he did not request it because it "didn't occur to me to request it, and it wasn't offered as an option." *Id.* at 667. Further, Satkowiak testified that if Moses "was part-time, he'd still have the same requirement to be funded or not." *Id.* at 737. Finally, I note that since retiring, Moses has worked as a subcontractor for ORNL at a higher hourly rate than he earned as an ORNL employee. *Id.* at 668-70. In any event, the issue before me is not whether UT-Battelle should have offered Moses another alternative to retirement or termination, but rather whether it would have taken the action it did take in the absence of Moses' protected disclosures.

> going, talking to the Program Office and have them say, "Well, there's nothing there," because to the best that I can determine, both in the NA-26 disclosure and the NA-21 disclosure, these were just summarily dismissed by Headquarters.
>
> There was no investigation, either by the Lab or by the Headquarters, of the substance of the disclosure.

Tr. at 233-34. It is clear from this and other testimony by Moses that he believes DOE removed him from NA-21 and NA-26 funding in retaliation for his protected disclosures, and that UT-Battelle did not fulfill what Moses believes was the contractor's obligation to "initiate investigations" or otherwise "pursue" the substance of concerns raised by its employees. *See, e.g.,* Tr. at 18.

However, whether the DOE took actions against Moses in retaliation for disclosures is not an issue within the scope of Part 708. *See Ronald E. Timm,* 28 DOE ¶ 87,015 (OHA lacks jurisdiction to consider Part 708 complaint filed against DOE). The ultimate issue in this case is whether *UT-Battelle's* actions were taken in retaliation for Moses' protected disclosures. In this regard, whether UT-Battelle is obligated by legal authority other than Part 708 to initiate investigations regarding the substance of a protected disclosure or raise these concerns to higher levels within the DOE is, again, not an issue in this case. Finally, Part 708 does not provide a forum for a consideration of the merits or validity of the substance of a protected disclosure, beyond the issue of whether the complainant "reasonably believed" that the information revealed is of such a nature that the disclosure would qualify for Part 708 protection. Once the complainant has met this burden, as Moses did in the present case, and proven that the disclosure was a contributing factor in the action taken against him, the only remaining issue is whether the contractor would have taken the same action absent the disclosure. For the reasons set forth above, after careful consideration of the record,[17] I find that UT-Battelle, faced with a set of circumstances out of its control, took actions that I am convinced it would have taken had it faced the same circumstances in the absence of Moses' protected disclosures. I will, therefore, deny the present complaint.

It Is Therefore Ordered That:

(1) The complaint filed by Dr. David L. Moses under 10 C.F.R. Part 708, OHA Case No. TBH-0066, is hereby denied.

(2) An unredacted copy of Exhibit A and the portion of Exhibit 22 marked "Attorney-Client Privilege 0002" will be released to the Complainant unless UT-Battelle files a notice of appeal by the fifteenth day after its receipt of the initial agency decision.

[17] In Section I.B above, I found certain information UT-Battelle redacted from two of the exhibits submitted at the hearing to be protected under the attorney-client privilege. I note here that, were I to consider as evidence all of the information that was redacted from the two exhibits, included that which I find is privileged, I would reach the same relevant legal conclusions and the same ultimate decision as I do without considering as evidence any of the privileged material.

(3) This is an initial agency decision that becomes the final decision of the Department of Energy unless a party files a notice of appeal by the fifteenth day after the party's receipt of the initial agency decision.

Steven J. Goering
Hearing Officer
Office of Hearings and Appeals

Date: September 8, 2008

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Initial Agency Decision

Name of Petitioner: Dean P. Dennis

Date of Filing: August 14, 2008

Case Number: TBH-0072

This Initial Agency Decision concerns a whistleblower complaint (the "Complaint") filed by Dean P. Dennis (Mr. Dennis or the "Complainant") against his former employer, National Security Technologies, LLC (hereinafter referred to as "NSTec"), under the Department of Energy's (DOE) Contractor Employee Protection Program regulations set forth at 10 C.F.R. Part 708. At all times relevant to this proceeding, NSTec managed and operated the Nevada Test Site and other satellite facilities for the DOE's National Nuclear Security Administration's (NNSA) [1] Nevada Site Office. Mr. Dennis alleges in his Complaint that during his employment tenure with NSTec he made several disclosures protected under 10 C.F.R. Part 708 and that NSTec terminated him in retaliation for his having made those protected disclosures. Mr. Dennis seeks monetary damages, reimbursement of medical bills for a one-year period beginning from the date of his termination, an offer of re-employment with NSTec, an apology letter, a letter of recommendation, the deletion from his personnel and personnel security files of any reference to his "termination for cause" and a notation in his personnel and personnel security files of "layoff" to explain his absence from the workplace after June 6, 2007. As discussed below, I have determined that the Complainant is not entitled to relief under 10 C.F.R. Part 708.

I. Background

A. The DOE's Contractor Employee Protection Program

The DOE's Contractor Employee Protection Program was established to "safeguard public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste and abuse" at DOE's government-owned, contractor-operated facilities. 57 Fed. Reg. 7533 (March 3, 1992).[2] Its primary purpose is to encourage contractor employees to disclose information which

[1] NNSA is a semi-autonomous agency within the DOE which Congress established in 2000.

[2] The DOE has amended the Part 708 regulations a few times since its original promulgation of the regulations. *See* 64 Fed. Reg. 12,862 (March 15, 1999) (interim final rule), amended, 64 Fed. Reg. 37,396 (1999), amended and finalized, 65 Fed. Reg 6314 (2000), 65 Fed. Reg. 9201 (2000) (technical correction).

they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers. 10 C.F.R. Part 708. Under the Part 708 regulations, protected conduct includes:

> (a) Disclosing to a DOE official, a member of Congress, any other government official who has responsibility for the oversight of the conduct of operations at a DOE site, [the employee's] employer, or any higher tier contractor; information that [the employee] reasonably believes reveals-
>
> (1) A substantial violation of a law, rule, or regulation;
> (2) A substantial and specific danger to employees or to public health or safety; or
> (3) Fraud, gross mismanagement, gross waste of funds, or abuse of authority; or
>
> (b) Participating in a Congressional proceeding or an administrative proceeding conducted under this regulation; or
>
> (c) Subject to § 708.7 of this subpart, refusing to participate in an activity, policy, or practice if [the employee] believe[s] participation would –
>
> (1) Constitute a violation of a federal health or safety law; or
> (2) Cause you to have a reasonable fear of serious injury to yourself, other employees, or members of the public.

The Part 708 regulations set forth the process for considering complaints of retaliation filed pursuant to those regulations. The DOE's Office of Hearings and Appeals (OHA) is responsible for investigating Part 708 complaints, convening evidentiary hearings, issuing Initial Agency Decisions, and considering appeals. *See* 10 C.F.R. §§ 708.21-708.34.

B. Procedural Background

On August 10, 2007, Mr. Dennis filed a Part 708 Complaint against NSTec with the local DOE Employee Concerns Program (ECP) Office. After efforts to engage in mediation proved unsuccessful, the ECP Office transferred the Complaint in October 2007 to OHA for an investigation, followed by an administrative hearing. The OHA investigation was delayed for several months due to the potentially classified nature of Mr. Dennis' Part 708 concerns, and the resulting need to make arrangements to allow the OHA investigator to conduct interviews and store documents in a secure environment. On August 14, 2008, the OHA Investigator issued his Report of Investigation (ROI) in this case, and I was appointed the Hearing Officer in the matter on August 19, 2008.

On October 21 and 22, 2008, I convened an unclassified hearing on Mr. Dennis' Complaint and heard testimony from eight witnesses. Counsel for Mr. Dennis submitted seven documents into the record which he labeled as Exhibits A through G; Counsel for

NSTec tendered four documents which he designated as Exhibits 1 through 4. These exhibits will be referred to in this Decision as "Ex." followed by the appropriate numeric or alphabetic designation. The hearing transcript in this case will be referred to as "Tr."

C. Mr. Dennis' Part 708 Complaint

Under the Part 708 regulations, a complaint must specifically describe the disclosures that the complainant believes gave rise to the alleged retaliation. 10 C.F.R. § 708.12 (a)(2). In his Complaint, Mr. Dennis stated that he was terminated for "informing my management that I needed to disclose security problems" at the RSL. Complaint at 1. Mr. Dennis related that the details of his security concerns were classified and for this reason he did not articulate them in his Complaint. *Id.* In his Complaint, Mr. Dennis generally described his protected disclosures as revealing "gross mismanagement relating to security practices and major security vulnerabilities in a facility and relating to classified computer security within the DOE in general." *Id.*

In the ROI, the OHA investigator stated that Mr. Dennis' failure to specifically describe his disclosures in his Part 708 Complaint would ordinarily result in his Part 708 action being dismissed. *See* ROI at 4. The OHA investigator found, however, that it was reasonable and necessary for Mr. Dennis to withhold the specifics of his disclosures until he could convey them to an investigator in a secure setting because the substance of the disclosures could potentially be classified. *Id.* Accordingly, Mr. Dennis was permitted to correct the procedural deficiencies in his Complaint when he met face-to-face with an OHA investigator who held a security clearance.

After meeting with Mr. Dennis, the OHA Investigator identified six possible protected disclosures, four related to security matters and two related to management issues. *Id.* at 4-5. Specifically, those disclosures in the former category include: (1) alleged ineffective security procedures related to ACREM, (2) alleged inefficiencies and security problems related to security logs, (3) the alleged presence of tracker software of unknown origin on a classified computer, and (4) alleged inadequate security procedures for escorting workers performing construction repairs in the Sensitive Compartmented Information Facility (SCIF). As for those disclosures in the latter category, they pertained to: (1) NSTec's alleged failure to provide Mr. Dennis with software so he could efficiently and effectively conduct reviews of security logs, and (2) NSTec's change in the access rules for the SCIF and the alleged negative impact that change had on Mr. Dennis's productivity.

The OHA Investigator concluded based on the evidence gathered during his investigation that, with the exception of the alleged "tracker software" issue, Mr. Dennis could not reasonably have believed that any of the other five alleged protected disclosures revealed "a substantial and specific danger to public health and safety." *See* ROI at 11.

At the hearing, I allowed Mr. Dennis to provide documentary and testimonial evidence on all six alleged disclosures. In this Decision, I have reviewed all of Mr. Dennis' disclosures not only to determine if any of them can be characterized as revealing "a

substantial and specific danger to public health and safety," but also to determine whether any of the disclosures revealed a "substantial violation of a law, rule or regulation," or "fraud, gross mismanagement, gross waste of funds, or abuse of authority."

II. The Legal Standard

As noted above, the regulations set forth at 10 C.F.R. Part 708 provide an administrative mechanism for resolving whistleblower complaints filed by employees of DOE contractors. The regulations specifically describe the respective burdens imposed on the Complainant and the contractor with regard to their respective allegations and defenses, and prescribe the criteria for reviewing and analyzing the allegations and defenses advanced.

A. The Complainant's Burden

It is the burden of the Complainant under Part 708 to establish, by a preponderance of the evidence, that he or she made a protected disclosure, participated in a proceeding, or refused to participate as described in 10 C.F.R. 708.5, and that such act was a contributing factor to a retaliatory action. 10 C.F.R. § 708.29. The term "preponderance of the evidence" means proof sufficient to persuade the finder of fact that a proposition is more likely true than not when weighed against the evidence opposed to it. *See Joshua, Lucero*, Case No. TBH-0039 (2007),[3] *citing Hopkins v. Price Waterhouse*, 737 F. Supp. 1202, 1206 (D.D.C. 1990). In the present case, Mr. Dennis must make two showings in connection with his Part 708 Complaint. First, he must show that he disclosed information to NSTec management that he "reasonably" believed revealed, either "a **substantial** violation of law, rule or regulation," "a **substantial** and specific danger to employees or to public health and safety" or "fraud, **gross** mismanagement, gross waste of funds, or abuse of authority (emphasis added)." 10 C.F.R. § 708.5. If Mr. Dennis meets this threshold showing with regard to any of his alleged protected disclosures, he must next prove that at least one of his disclosures was a contributing factor to his termination. One way a complainant can meet this evidentiary burden is to provide evidence that "the official taking the action has actual or constructive knowledge of the disclosure and acted within such a period of time that a reasonable person cold conclude that the disclosure was a factor in a personnel action." *See David Moses*, Case No. TBH-0066 (2008), *Ronald Sorri*, Case No. LWA-0001 (1993).

B. The Contractor's Burden

If the Complainant satisfies his evidentiary burden, the burden then shifts to the Contractor to show, by clear and convincing evidence, that it would have taken the same action absent any protected disclosures. "Clear and convincing evidence" requires a degree of persuasion higher than preponderance of the evidence, but less than "beyond a reasonable doubt." *See Casey von Bargen*, Case No. TBH-0034 (2007). OHA Hearing

[3] Decisions issued by the Office of Hearings and Appeals (OHA) are available on the OHA website located at http://www.oha.doe.gov. The text of a cited decision may be accessed by entered the case number of the decision in the search engine located at http://www.oha.doe.gov/search.htm.

Officers have recently relied on the Federal Circuit for guidance in evaluating whether the contractor has met its evidentiary burden in a Part 708 case. *See David Moses*, Case No. TBH-0066 (2008), *Dennis Patterson*, Case No. TBH-0047 (2008). Specifically, the Federal Circuit, in cases interpreting the federal Whistleblower Protection Act (WPA), upon which Part 708 is modeled, examines: (1) the strength of the [employer's] reason for the personnel action excluding the whistleblowing, (2) the strength of any motive to retaliate for the whistleblowing, and (3) any evidence of similar action against similarly situated employees . . ." *See Kalil v. Dep't of Agriculture*, 479 F.3d 821, 824 (Fed. Cir. 2007).

III. Findings of Fact

Mr. Dennis holds a Bachelor's degree in finance and an MBA degree in management. Tr. at 25. He has worked for a number of DOE contractors at different locations since 1990. *See* Complaint at 1, Ex. 1. For most of his employment history before joining NSTec, he had little, if any, experience working in matters relating to security or intelligence activities. Mr. Dennis worked at the Nevada Site Office beginning in September 2003 as an employee of another contractor. Ex. 1. The record reflects that sometime in the fall of 2006, the contractor that preceded NSTec at the Nevada Site Office reorganized. Tr. at 27, 278, 374. The position occupied by Mr. Dennis at the predecessor contractor was abolished and that contractor placed him in a position so he could stay employed. *Id.* at 374, Ex. 1. Mr. Dennis' position after the reorganization was that of a Senior Operations Specialist working in the Special Programs Department at the Remote Sensing Laboratory (RSL) located on Nellis Air Force Base. *See* Complaint at 1. On March 21, 2006, the Field Intelligence Element (FIE) Director at the RSL asked Mr. Dennis to assume additional duties as an Information Systems Security Officer (ISSO) at the Sensitive Compartmented Information Facilities (SCIF)[4] at the RSL and the Nevada Intelligence Center. *See* Ex. D. Mr. Dennis testified that he had no background or training for either Senior Operations Specialist position or the ISSO position. Tr. at 28, 56.

NSTec became the management and operating (M&O) contractor for the NNSA's Nevada Test Site and the Nevada Site Office on July 1, 2006. *Id.* at 40, 46. NSTec elected to maintain the organizational structure established by the previous contractor at the site, a structure which included the position encumbered by Mr. Dennis. Tr. at 28. The previous contractor's FIE Director also assumed the same job responsibilities and title with NSTec that he held with the previous contractor. According to the record, NSTec management recognized that Mr. Dennis had no background in the positions that he occupied but nonetheless believed that he was qualified for his positions with "some on-the-job training."[5] *Id.* at 375.

---

[4] A SCIF is an "accredited area, room, group of rooms, or installation where Sensitive Compartmented Information Facility may be stored, used, discussed, and/or electronically processed." *See* DOE Order 5639.8A at http://www.directives.doe.gov.

[5] Between March 2006 and his termination in June 2007, Mr. Dennis completed seven training courses, some of them multi-day, which covered cyber security and other security-related topics. See Ex. C.

During his tenure with NSTec, Mr. Dennis' responsibilities included completing System Security Plans for computer systems at the RSL and another location;[6] serving as one of two custodians for Accountable Classified Removable Electronic Media (ACREM) in the RSL;[7] reviewing print-outs showing activity for computer terminals for access denials or some sort of irregularity (hereinafter referred to as "security logs") at the RSL and another location; and performing Derivative Classifier (DC) functions for NSTec. *See* Performance Review at Ex. 1, Tr. at 57, 62, 104-105, 356-357.

NSTec operated as a "matrix" organization, meaning that employees supported the activities of, and reported to, a number of different supervisors and managers at the facility. Tr. at 118. As a result, Mr. Dennis' actions were subject to the scrutiny of several NSTec officials. Mr. Dennis' supervisor of record was Ron Gross, the Manager of Special Programs. Tr. at 275. Mr. Dennis' supervisor for technical matters relating to information security was Jeff Harvey, the Information Systems Security Manager (ISSM). *Id.* at 93. Mr. Dennis' supervisor for the functions that he performed in the SCIF at the RSL, was Loretta DeVault, the Deputy FIE Director and Special Security Officer. *Id.* at 226-227. When Ms. DeVault was absent, her assistant, Rhonda Fulkerson, a Security Specialist and Alternate Special Security Officer, acted in her stead. *Id*. at 328. All of Mr. Dennis' supervisors reported to Alan Will, the Deputy Director of the RSL and the Director of FIE. *Id.* at 381. These reporting chains are important to determining whether Mr. Dennis raised any protected disclosures to a person in a position superior to his own at NSTec.

Sometime in the winter or spring of 2007, a number of events occurred that are relevant to understanding and appreciating some of the issues in this case. First, NSTec, at the direction of the DOE, implemented new procedures for handling ACREM in response to an incident that had occurred at another DOE facility. *Id* at 235. Next, NSTec, again at the direction of the DOE, decided to enhance the security at its site by reducing the number of persons who could access the SCIF without an escort. *Id.* at 257. Among those no longer allowed unrestricted access to the SCIFs as a result of the access changes were Mr. Dennis and his supervisor of record. *Id.* at 302. Third, NSTec decided to prohibit all thumb-drives, personal and company-owned, from the work site. *Id.* at 266, 289.

The record indicates that Mr. Dennis did not react well to the security enhancements noted immediately above. With respect to the ban of thumb drives, Mr. Dennis approached his supervisor of record four or five times and tried to convince him that he needed the company-owned thumb drive to do his job. *Id.* at 289. Mr. Dennis even raised the issue to the FIE Director in an attempt to "get his thumb drive" back, but to no avail. *Id*. at 267. As for the restricted access to the SCIF, one witness described Mr. Dennis as being "very unhappy, very aggravated" when he learned that he no longer had unrestricted access to the SCIF. *Id.* at 239-240. Another witness related she had

---

6 By his own report, this task required him to understand the requirements of a Director of Central Intelligence Directive, DCID 6/3. Ex. 1.

7 According to Mr. Dennis, all the ACREM resided outside the SCIF at RSL. Tr. at 71.

"multiple, extremely intense and somewhat confrontational conversations" with Mr. Dennis about the new access procedures at the SCIF. *Id.* at 331. Mr. Dennis expressed his view that the new access rules inhibited his ability to do his work and negatively impacted his productivity. *Id.* Mr. Dennis' supervisor of record responded to Mr. Dennis' concern by noting that "if you live in a classified world, you must adhere to the rules." *Id.* at 303. As for the DOE's new rules for handling ACREM, Mr. Dennis voiced his opinion numerous times to his superiors in April and May 2007 that the security improvements were pointless and ineffective. *Id.* at 194. To support his viewpoint, he speculated that someone with malicious intent could defeat the security procedures by surreptitiously copying ACREM after checking it out from the custodian. He also posited several scenarios where he, as a trusted insider and ACREM custodian, could maliciously circumvent the procedures without detection. *Id.* at 62-85.

Based on my observation of the demeanor of the witnesses at the hearing and my assessment of their credibility, it appears that Mr. Dennis' relationship with those in charge of the SCIF at the RSL was strained and that Mr. Dennis was less than cooperative in acceding to the legitimate work-related requests of those in charge of the SCIF. The Assistant Special Security Officer in the SCIF at the RSL testified that she had problems with Mr. Dennis bringing CDs into the SCIF to destroy. *Id*. at 335. She stated that "anything that comes into the SCIF needs to be approved by the Special Security Officer or the Assistant Special Security Officer." *Id.* at 336. According to the Assistant Special Security Officer, Mr. Dennis brought disks or CDs into the SCIF multiple times each week. *Id*. at 344. She opined that this kind of media did not need to be destroyed in a SCIF and that she approached Mr. Dennis every time he brought materials into the SCIF to destroy. *Id.* at 344-346. She related that Mr. Dennis did not take the disks to her upon entering the SCIF, that he was uncooperative in allowing her to look at the documentation, and that he told her she did not need to know what he was working on. *Id.* at 336-338. The Assistant Special Security Officer claimed, but Mr. Dennis vehemently denied, that she told him multiple times not to bring CDs or disks into the SCIF to destroy. *Id.* at 345, 360. The Special Security Officer testified that the Alternate Special Security Officer reported to her that Mr. Dennis was taking paperwork from the SCIF and had become irate when the Alternate Special Security Officer requested to see the paperwork. *Id*. at 263-264.

NSTec conducted performance evaluations of its workforce in March 2007. In anticipation of completing Mr. Dennis' performance evaluation, Mr. Dennis' supervisor of record inquired about Mr. Dennis' performance and conduct of those with whom he regularly worked. Mr. Dennis' supervisor of record learned for the first time that several persons, including those in charge of the SCIF at the RSL, claimed to have had difficulty finding Mr. Dennis during the work day. *Id.* at 280, 282. In March 2007, Mr. Dennis' supervisor rated Mr. Dennis' performance as "satisfactory" based principally on the comments that he had received about Mr. Dennis' unavailability. *See* Ex. 1. Mr. Dennis objected strenuously to the rating and eventually elevated the matter to the FIE Director. The FIE Director refused to alter Mr. Dennis' performance rating. Tr. at 287.

At some point shortly after completing Mr. Dennis' performance review in March 2007, Mr. Dennis' supervisor of record reviewed some reports relating to the classification activities at the site. *Id.* at 291. At that point, the supervisor of record discovered that Mr. Dennis had derivatively classified "a lot" of documents. *Id.* This fact troubled the supervisor of record because Mr. Dennis allegedly lacked the technical expertise to review many documents. *Id.* at 291-293. The supervisor of record explained at the hearing that he was concerned that Mr. Dennis might have been privy to information that he should not have been due to the extensive nature of his derivative classification activities. *Id.* at 291. The supervisor of record immediately instructed Mr. Dennis to stop derivatively classifying documents unless Mr. Dennis was the only person available to perform that function and the document needed to get out. *Id.* at 292.

Sometime in late March 2007 or early April 2007, Mr. Dennis' supervisor of record and the Special Security Officer of the SCIF at the RSL independently met with the FIE Director to discuss their respective security concerns about Mr. Dennis. Mr. Dennis supervisor of record first expressed his concern to the FIE Director about Mr. Dennis' repeated requests to get his company-owned thumb drive back. *Id.* at 290. According to the supervisor of record, there was no reason why Mr. Dennis required a thumb drive to do his work. *Id.* The supervisor of record also shared with the FIE Director his concern about the excessive number of derivative classification reviews that Mr. Dennis had performed in light of the fact that Mr. Dennis might have lacked the technical expertise to review or even see some of the documents that he had derivatively classified. *Id.* at 291-293. Next, the supervisor of record advised the FIE Director that several persons had reported that Mr. Dennis was not available during the workdays. *Id.* at 291. In addition, the supervisor of record mentioned to the FIE Director that Mr. Dennis often worked times beyond normal work hours, including weekends. [8]*Id.* at 297. There were times, according to the supervisor of record, where Mr. Dennis would be isolated in his area even when there was a second person present in the facility.[9] *Id.*

The Special Security Officer of the SCIF at the RSL also reported numerous concerns about Mr. Dennis' behavior to the FIE Director. First, she told him that Mr. Dennis was aggravated with the security procedures that the DOE had put in place in the facility and had repeatedly expressed his view that the security procedures were ineffective. *Id.* at 239. Second, she related that Mr. Dennis had told her he could do "damage and walk away with things." *Id.* Third, she stated that Mr. Dennis was under a lot of emotional and financial stress due to his divorce and contested child custody issues. *Id.* Fourth, she advised the FIE Director that Mr. Dennis had become very upset with NSTec's prohibition of thumb drives in the work place. *Id.* Fifth, she related that Mr. Dennis had expressed concerns about passing a polygraph examination because he needed to

---

[8] The supervisor of record testified that NSTec had sanctioned some of Mr. Dennis' unusual work hours in an effort to accommodate his childcare issues. *Id.* at 298.

[9] The supervisor of record testified that there was a two-person rule in the building where Mr. Dennis worked, meaning that there needed to be two persons present at the location at all times for purposes of security and accountability. *Id.*

manipulate an insurance claim in order to be made whole after a serious automobile accident. *Id.* at 264-265.

In addition to the litany of concerns enumerated above by Mr. Dennis' supervisor of record and the Special Security Officer, the FIE Director testified that the Special Security Officer had also raised a concern that Mr. Dennis had been visiting sites on the classified network where he should not have been going. [10] According to the FIE Director, he communicated all the concerns that he received about Mr. Dennis in early April 2007 to his senior management at NSTec and to the DOE organization responsible for overseeing NSTec's operations. *Id.* at 384.

In mid-May 2007, Mr. Dennis reported to the ISSM that there was tracking software on his computer. *Id.* at 96. The ISSM immediately brought this matter to the attention of the Special Security Officer. [11]*Id.* at 418. The FIE Director testified that the ISSM also informed him of Mr. Dennis' computer software tracking discovery. *Id*. at 402.

While the DOE was reviewing the allegations relating to Mr. Dennis that NSTec had brought to the agency's attention in early April 2007, Mr. Dennis sent an e-mail to the FIE Director on May 31, 2007, in which he related his accomplishments for the week and asked to discuss the negative impact the new SCIF access requirements were having on his ability to do his job. *See* Ex. 3. On June 1, 2007, Mr. Dennis sent another e-mail to the FIE Director, this one elaborating on the impact his restricted SCIF access was having on his work. *See* Ex. 2. A meeting to discuss Mr. Dennis' SCIF-related concerns was scheduled in the FIE Director's office for June 6, 2007. *See* Complaint at 1.

At some point, the DOE allegedly decided that the agency could no longer support Mr. Dennis working in the SCIF environment in view of the information NSTec had presented to the agency and its own analysis of the situation. *Id.* at 388. The FIE Director testified that the DOE advised NSTec that it was NSTec management's decision whether to find another position for Mr. Dennis. *Id*.

Sometime in early June 2007, several high level NSTec managers, including the company President met to discuss Mr. Dennis' future with NSTec. *Id.* at 447. The NSTec President testified that those assembled unanimously agreed to terminate Mr. Dennis' employ. *Id.* at 448. According to the NSTec President, Mr. Dennis had exhibited an aggressive pursuit of highly classified information that was deemed not relevant to his job assignment. *Id.* Mr. Dennis' persistent demands to access classified information and his financial situation were alleged to be among the reasons for his termination. *Id.* at 450.

---

[10] It appears from the record that Mr. Dennis did access classified sites that he should not have. Under cross-examination, Mr. Dennis claimed that he had the right to access [certain sites] even if he didn't have a "need to know" because he thought he was being groomed for a position in intelligence. *Id.* at 187-188.

[11] There is some conflicting testimony on this matter. The Special Security Officer claims to have no recollection of the ISSM raising the issue of tracking software with her. *Id.* at 244. Instead, her recollection is that the ISSM communicated to her that Mr. Dennis' administrative rights to the computer had been taken away from him. *Id.* at 247. Based on my assessment of the demeanor and credibility of the witnesses, I find that the ISSM did report Mr. Dennis' belief to the Special Security Officer.

After the NSTec management decided Mr. Dennis' fate, the Employee Relations Manager for NSTec prepared the necessary paperwork and Mr. Dennis was terminated on June 6, 2007. *Id.* at 476. Ex. 1.

IV. Analysis

A. Whether the Complainant Made any Disclosures Protected under 10 C.F.R. Part 708?

As noted in Section I.C. above, Mr. Dennis alleges that he made six protected disclosures during his tenure with NSTec. Two of those disclosures involve the same subject matter, *i.e.*, security logs. For purposes of this Decision, the alleged disclosures relating to security logs will be analyzed together.

1. Allegations regarding ineffective security procedures relating to ACREM

It is undisputed that, in April and May 2007, Mr. Dennis expressed his view to the Special Security Officer whose responsibility it was to oversee the SCIF at the RSL that the new procedures imposed by the DOE on the handling of ACREM were ineffective. Tr. at 234-236. To support his opinion on this matter, Mr. Dennis suggested that someone could bring a thumb drive or a disk into the facility and improperly download materials. *Id.* at 72. Mr. Dennis also suggested at the hearing that he could take a disk from the facility, go into his vehicle, copy the disk onto a laptop, and then return the disk to the facility without detection. At the hearing, Mr. Dennis admitted that there are some security safeguards (i.e. strap seals over the ports) that might make it difficult for someone to copy ACREM. *Id.* at 73-74. However, he pointed out that as the ACREM custodian, he was "in control of all the strap seals" and if he "were a bad guy" he could compromise security. *Id.* In fact, on several occasions, Mr. Dennis expressed his opinion to the Special Security Officer that he, as a custodian of ACREM, had too much authority and could pose an "insider threat" to NSTec. He also detailed some hypothetical fact scenarios where he could do damage to the facility. *Id.* at 68-85. Finally, at the hearing, Mr. Dennis raised for the first time his claim that the configuration of the software being used to comply with DOE's new ACREM requirements was deficient and that he had been prevented from elevating his concerns in this regard to senior management at NSTec.

As an initial matter, I find that Mr. Dennis' allegations relating to ACREM are all based on speculation. He admitted at the hearing that his concerns were grounded in what "potentially" could happen and that he never observed anyone do anything remotely approximating the security breach scenarios that he posited. *Id.* at 79. I also inferred from his testimony that he had never knowingly engaged in any conduct that had potentially compromised the security of the systems that he oversaw. Moreover, the record is clear that NSTec had banned the use of all thumb drives, including company-owned thumb drives, at its facility to enhance its security posture. I find it curious then that Mr. Dennis

raised the issue of thumb drives in connection with ACREM as a potential security concern when it was he who vociferously objected to this security enhancement when NSTec took his thumb drive away. With regard to Mr. Dennis' claim that he could have exited the facility with classified information and surreptitiously copied it onto a laptop in his car, he admitted under questioning by me that all vehicles entering and exiting the facility were subject to random search.[12] I was not convinced from Mr. Dennis' testimony that the physical security at the NSTec complex was non-existent, as he claimed. Regarding his contention that there were deficiencies in the configuration of the software used to prevent cyber security breaches, I was not convinced that Mr. Dennis possessed the technical expertise to render such an opinion. At the hearing, I asked Mr. Dennis how he knew enough about computers to do his job in view of his lack of background in the area. *Id.* at 56. He responded, "I didn't. That was the issue. . . I had no technical knowledge at all." *Id.* For this reason, I am unable to find that Mr. Dennis' belief about the possible deficient configurations in the ACREM software was reasonable.

In the end, I find that Mr. Dennis has not provided a preponderance of evidence that his statements about the ACREM are covered by the Part 708 regulations. First, since NSTec was following the DOE instructions on implementing the new ACREM procedures and Mr. Dennis did not allege that NSTec was not complying with DOE's mandate, neither a charge of gross mismanagement[13] nor a violation of a regulation or rule[14]could reasonably be argued here. Second, I find that Mr. Dennis could not reasonably have believed that NSTec's implementation of the ACREM amounted to a substantial and specific danger to employees or to public health and safety. It appears from the record that there were checks and balances in place in the locations where Mr. Dennis was handling ACREM. For example, the conflict between him and the Assistant Special Security Officer revolved around his introduction and destruction of ACREM in the SCIF at RSL. Mr. Dennis appears to have resented the intrusion of the Assistant Special Security Officer into his activities relating to ACREM when he was in a facility which she managed in an alternate capacity. She questioned him constantly, and asked to see

---

[12] The location where I conducted the two-day hearing in this case is one of the locations where Mr. Dennis spent a portion of his time while he was employed by NSTec. I personally observed security measures, including the random searches of vehicles entering and exiting the facility. It strains credulity, therefore, how Mr. Dennis could believe that there were no physical security measures in place at the NSTec facility.

[13] At the hearing, Mr. Dennis claimed that NSTec was "mismanaging how it handled ACREM." *Id.* at 79-80, 129-130. When questioned whether the mismanagement rose to the level of "gross" mismanagement, Mr. Dennis stated that NSTec's handling of ACREM did not constitute "gross mismanagement" but rather violated some rule, regulation, etc. *Id.* at 131. Later in his testimony, Mr. Dennis claimed that NSTec did engage in gross mismanagement because it did not do anything immediately about his ACREM concerns and prevented him from going to a higher level with the matter by firing him. *Id.* at 133-134.

14 In making this finding, I considered the testimony of the ISSM who characterized Mr. Dennis' "insider threat" comments as legitimate concerns expressed by one security professional to another. There was no testimonial or documentary evidence in the record to allow me to conclude that Mr. Dennis' concerns were anything more than rank speculation.

his paperwork for work being done in the SCIF. It was my impression from the Assistant Special Security Officer's testimony that the activities of those working at the NSTec facility were monitored by those with oversight responsibility. While it is possible that a trusted insider could breach security in any secure environment, it did not appear to me that there was anything fundamentally flawed with the new ACREM rules that would cause a reasonable person to believe that national security was at risk.

Finally, I find no evidence to support Mr. Dennis' claim that NSTec prevented him from advancing his concerns about ACREM up the chain of command. In fact, there was testimony in the record that the FIE Director had an "open door" policy and was generally available to NSTec employees. *Id.* at 376, 407. Mr. Dennis himself availed himself of the opportunity to speak to the FIE Director to complain about the thumb drives being removed and about issues relating to his performance evaluation. He could easily, it appears, had raised the ACREM matter directly with the FIE Director if he had chosen to do so.

2. Allegations regarding inefficiencies and security problems relating to security logs

Mr. Dennis was tasked with reconciling security logs which allegedly entailed his sifting through thousands of entries to identify anomalies. At the hearing, Mr. Dennis claimed that NSTec did not maintain its security logs in a "legal fashion." *Id.* at 105. In this regard, he stated that DCID 6/3 requires the separation of duties between administrators and the ISSO. *Id.* at 105. However, Mr. Dennis acknowledged at the hearing that such a separation did exist at the NSTec facility. *Id.* He also admitted at the hearing that DCID 6/3 did not require that software be put on computers for purposes of reviewing the security logs; it only mandated that the security logs be reviewed, not how to do it. *Id.* at 110. The evidence is clear that Mr. Dennis' disclosure about the security logs, if he articulated it to anyone,[15] did not reveal a substantial violation of a law, rule or regulation.

Mr. Dennis believed that the task of reviewing the security logs was cumbersome for him to perform. When Mr. Dennis learned that another DOE facility was using a software program to perform the function, he requested that NSTec purchase the software. *Id.* at 104, 129. At the hearing, Mr. Dennis admitted that NSTec never declined his request to purchase the software. *Id.* at 129. He also testified that he did not believe NSTec was engaging in gross mismanagement with regard to the requirements it imposed on him to review the security logs. *Id.*

Although the Assistant Special Security Officer denies it, Mr. Dennis claims that he told her that the security logs should be converted to a CD to prevent a system administrator from overwriting the entries. *Id.* at 103, 330. Mr. Dennis testified that "he was worried that someone might change the manual logs." *Id.* at 112. It appears from the evidence before me that Mr. Dennis was offering a "process improvement" to unburden him from

---

[15] None of the witnesses recall Mr. Dennis raising this issue with them.

the cumbersome task of manually reviewing the security logs. Mr. Dennis' unfounded speculation that someone might change a security log does not rise to the level of a reasonable belief protected under Part 708 that a security concern existed in the workplace with regard to the security logs.

3. Allegations about Tracking Software

Mr. Dennis alleges that in mid-May 2007, he reported to the ISSM that he had discovered an unauthorized software program on his classified computer in the SCIF. *Id.* at 96. Mr. Dennis testified that he noticed the presence of the software when he saw an unfamiliar icon in the lower right hand corner of his computer screen. *Id.* at 91. The ISSM confirmed at the hearing that Mr. Dennis showed[16] him the computer icon which appeared to be some sort of tracking software. *Id.* at 416-417. The ISSM testified that had grave concerns about this discovery, and immediately reported the matter first to the Special Security Officer in the SCIF[17] and then to the FIE Director. *Id.* at 418.

Mr. Dennis' supervisor of record testified that Mr. Dennis told him about the tracking software that he had discovered on his classified computer. *Id.* at 300. The supervisor asked him why the matter concerned him. *Id.* Mr. Dennis told the supervisor that he may have been "surfing on places where [he] shouldn't have been." *Id.* The supervisor responded by stating that he had no knowledge of any tracking software on the classified computers but if there was any tracking software, Mr. Dennis would need to answer for any of his unauthorized viewing of information on the classified network. *Id.*

The FIE Director confirmed at the hearing that the ISSM came to him with Mr. Dennis' concern about the tracking software. *Id.* at 378. The FIE Director provided probative testimony on the issue, the details of which need not be elaborated in this Decision, except that he was not concerned that any outsiders or "malicious folks" had hacked into NSTec's computer systems. *Id.* at 402-403.

Ultimately, it is not relevant whether the tracking software was installed with proper authorization, or even if tracking software was installed at all. Rather, I must look at whether it was reasonable for Mr. Dennis to believe that (1) unauthorized tracking software had been installed on the classified network in the SCIF, and (2) whether someone might have compromised the security procedures and rules at the SCIF by

---

[16] There is some conflicting testimony on this matter. Mr. Dennis claims that he called the ISSM into his office and asked him to look at the icon on his computer screen. *Id.* at 102. Mr. Dennis stated at the hearing that he did not print anything out. *Id.* The ISSM testified that Mr. Dennis "handed him a print of the name" of the software. *Id.* at 417. I need not resolve this conflicting testimony since I ultimately find that Mr. Dennis disclosed information to a supervisor, the ISSM, (either in person or by providing a print-out) that he reasonably believed revealed a substantial violation of security rules.

[17] The Special Security Officer claimed that she had no recollection of any conversation with either the ISSM or Mr. Dennis about Mr. Dennis' discovery of unauthorized tracking software on his classified computer. I did not find this testimony credible. Instead, I believed Mr. Dennis and the ISSM's account of their interaction with the Special Security Officer on this matter.

installing unauthorized software on the classified computer system. Mr. Dennis' testimony and that of the ISSM convince me that Mr. Dennis had a reasonable belief that there was unauthorized tracking software on his classified computer.[18] Specifically, Mr. Dennis' discovery of the icon on his computer and the ISSM's independent assessment of the situation clearly suggest that the two men reasonably believed that a cyber security breach may have occurred. In a classified setting, unauthorized tracking software, if it were truly unauthorized as Mr. Dennis believed, would clearly violate security rules, and potentially pose a significant threat to the national security. Mr. Dennis disclosed the presence of the tracking software to one of his superiors, the ISSM, and then to the Special Security Officer who oversaw the SCIF. In the end, I find that Mr. Dennis has proven, by a preponderance of evidence, that he made a protected disclosure regarding the tracking software on his classified computer.

4. Allegations of inadequate security procedures for escorting workmen in the SCIF

It is unclear from the evidence whether Mr. Dennis communicated his concern regarding the escorting procedures for construction workers in the SCIF to anyone. He testified that he did not speak to either the Special Security Officer or the Alternate Special Security Officer who oversaw the SCIF because they "seemed angry at [him] all the time." *Id.* at 141. He testified further that "he was going to" discuss the matter with the FIE Director, a statement that clearly indicates he had not done so. *Id.* at 140. He testified further that he told the ISSM, although the ISSM testified that he had no recollection of any such discussion. *Id.* at 414-415. Because Mr. Dennis could not prove that he disclosed this concern regarding the workmen in the SCIF to anyone, I find that he did not meet his evidentiary burden that he made a disclosure protected under Part 708 with regard to this discrete matter.

5. Allegations regarding changes to the SCIF access procedures

Mr. Dennis expressed his frustration with the new changes to the SCIF access procedures to the ISSM, the Assistant Special Security Officer, and his supervisor of record. *Id.* at 302, 331, 416. He also sent two e-mails to FIE Director requesting a meeting specifically to discuss the new access procedures. Ex. 2, 3.

The ISSM testified that Mr. Dennis did not consider the new access rules to constitute some sort of security breach. Tr. at 416. The ISSM explained to Mr. Dennis that he had no authority or oversight over the physical security at the SCIF, and directed him to share his concerns with the Special Security Officer at the SCIF or with the FIE Director. *Id.*

[18] Mr. Dennis' motive in revealing his discovery is not relevant here. Specifically, it is not relevant that Mr. Dennis may have been more concerned that the tracking software might uncover his possible misuse of the classified computer than with the potential security breach posed by that software. The DOE made it clear in the preamble to the 2000 amendments to the Part 708 regulations that it would not impose a "motives test" that could "allow an employee's intentions to be put on trial as a precondition to using the rule." See 65 Fed. Reg. 6314 (February 9, 2000).

The Assistant Special Security Officer at the SCIF related at the hearing that she had "multiple, extremely intense and somewhat confrontational conversations" about the SCIF access changes. *Id.* at 331. She stated that Mr. Dennis felt that the access changes inhibited his ability to do his work. *Id.*

The individual's supervisor of record testified that Mr. Dennis spoke to him about being excluded[19] from the SCIF. Id. at 302. The supervisor related that he, too, was excluded from the SCIF under the new rules. *Id.* He stated that he had no trouble under the new rules because he knew that NSTec was tightening its security by restricting access to the SCIF. *Id.*

At the hearing, Mr. Dennis testified that the SCIF access changes were inconvenient. *Id.* at 142. He related that he did not know the rules under which he was allowed to remain in the SCIF after he was escorted in there, and that the rules "kept changing." *Id.* at 214, 142. He clarified at the hearing that he did not consider his issues with the SCIF access changes to constitute gross mismanagement on the part of NSTec. *Id.* at 143. In addition, Mr. Dennis did not advance any argument at the hearing that would allow me to characterize his concerns about the new SCIF access procedures as a disclosure which revealed the substantial violation of some law, rule, or regulation, or a substantial danger to employee or the public health or safety. *Id.* Therefore, based on the evidence before me, I find that Mr. Dennis's concerns about the new SCIF access procedures do not fall within the ambit of 10 C.F.R. § 708.5.

6. Summary

In conclusion, for the reasons discussed above, I find that Mr. Dennis presented a preponderance of evidence that he made only one protected disclosure, a disclosure about the presence of tracking software on his classified computer. I turn next to whether Mr. Dennis has met the second prong of his evidentiary burden.

B. Whether Mr. Dennis' Protected Disclosure was a Contributing Factor in NSTec's Decision to Terminate Him?

In most cases, it is impossible for a complainant to find a "smoking gun" that proves an employer's retaliatory intent. Thus, Hearing Officers in Part 708 proceedings allow complainants to meet their burden of proof through circumstantial evidence. In prior cases, Hearing Officers have held that a protected disclosure may be a contributing factor in a personnel action where "the official taking the action has actual or constructive knowledge of the disclosure and acted within such a period of time that a reasonable person could conclude that the disclosure was a factor in a personnel action." *Ronald A. Sorri*, Case No. LWA-0001 (1993), *Thomas T. Tiller*, Case No. VWA-0018 (1997), *David L. Moses*, Case No. TBH-0066 (2008), *Richard L. Strausbaugh, et al*., Case Nos. TBH-0073, TBH-0075 (2008). In addition, "temporary proximity" between a protected

[19] Neither the Mr. Dennis nor his supervisor was "excluded" from the SCIF in the conventional meaning of that term. Rather, they both required an escort to enter the SCIF and their activities were monitored while in that location.

disclosure and an alleged act of reprisal is "sufficient as a matter of law to establish the final required element in a prima facie case for retaliatory discharge." *Ronald A. Sorri*, Case No. LWA-0001 (1993), citing, *County v. Dole*, 886 F.2d 147 (8th Cir.), *Janet Benson*, Case No. VWA-0044 (1999), *David L. Moses*, Case No. TBH-0066 (2008). Finally, a United States District Court has made it clear that a putative whistleblower must show both temporal proximity and knowledge to satisfy his or her regulatory burden. *See Safety & Ecology Corporation v. DOE*, Civil Action No. 03-0747 (D.D.C. 2004).

Applying these standards to the present case, I find that there is clearly temporal proximity between Mr. Dennis' protected disclosure in mid-May 2007 and his termination on June 6, 2007. I also find that at least one of those involved in the decision to terminate Mr. Dennis, namely the FIE Director, had actual knowledge of Mr. Dennis' protected disclosure. As previously stated in this Decision, the Field Intelligence Director testified that the ISSM told him in May 2007 about Mr. Dennis' concern about the computer tracking software. *Id.* at 378. The FIE Director also testified that he was one of seven senior NSTec managers who met in June 2007 and voted to terminate Mr. Dennis. *Id.* at 385-386. Accordingly, I find that Mr. Dennis has shown both temporal proximity and the knowledge necessary to meet his regulatory burden.

In sum, I find that Mr. Dennis has established a prima facie case that his protected disclosure was a contributing factor to his termination. The burden now shifts to NSTec to prove by clear and convincing evidence that it would have terminated Mr. Dennis absent his protected disclosure. 10 C.F.R. § 708.9(d).

C. Whether NSTec proved by clear and convincing evidence that it would have terminated Mr. Dennis even if he had not made a protected disclosure?

Under 10 C.F.R. § 708.29, NSTec bears a heavy burden in establishing that it would have terminated Mr. Dennis in the absence of his having made a protected disclosure. If NSTec meets this burden, however, it will defeat Mr. Dennis' allegation of retaliation in this case.

As an initial matter, I recognize that NSTec may have been prevented from providing as much testimonial evidence in support of its decision to terminate Mr. Dennis as it might have wished because I conducted the hearing in an unclassified format. In this regard, there were two occasions when NSTec witnesses (*e.g.* the FIE Director and the Special Security Officer) refrained from providing details for their responses because they were unable to do so in an unclassified forum.[20] *See* Tr. at 251, 388. Notwithstanding the constraints imposed on NSTec at the hearing, I find, as discussed below, that NSTec has

[20] A Classification Representative from DOE Headquarters accompanied me to the hearing. While I conducted the hearing in a secure location in an abundance of caution due to the potential classified overtones to the case, I admonished all witnesses that they were not to communicate any classified information to me during the hearing. On several occasions, I stopped the hearing at the request of a witness and permitted the witness to step outside the hearing room to speak with the Classification Representative to ensure that the witness' anticipated testimony would be unclassified.

provided clear and convincing evidence that it would have terminated Mr. Dennis even if he had not raised his concerns about the tracking software.

The testimonial evidence adduced at the hearing made it clear to me that once senior management at NSTec had "lost trust" in Mr. Dennis, they could no longer continue to assume the risk that Mr. Dennis might compromise national security while he occupied a position of major responsibility in a very secure environment. I was particularly struck by the testimony of NSTec's President whom I observed choose his words carefully and reflectively so as not to reveal classified information. The President, who remarked that he had held a top secret security clearance for several decades, expressed grave concern that Mr. Dennis had exhibited an "aggressive pursuit of highly classified information that NSTec deemed not relevant to his assigned job." *Id.* at 448. Explaining how "need to know" is the foundation of access to classified information, the NSTec President stated that Mr. Dennis' persistent demand to access classified information without the requisite "need to know" raised "a red flag of security concerns."[21] *Id.* at 449-450. The NSTec President testified that the decision to terminate Mr. Dennis was unanimous among those who assembled in June 2007 to discuss Mr. Dennis' behavior and conduct in the workplace. *Id.* at 448

Another senior manager who voted to terminate Mr. Dennis at a meeting convened in June 2007 also provided probative testimony at the hearing. The FIE Director first discussed the concerns brought to him by the Special Security Officer and Mr. Dennis' supervisor of record *(e.g.* Mr. Dennis' accessing of classified sites without a "need to know," his "insider threat" comments about himself, his unavailability, etc.) and then explained in detail how those concerns were elevated to the DOE. *Id.* at 381-385. The FIE Director also revealed that the DOE decided, after reviewing and analyzing the information presented to it by NSTec, that it would not support Mr. Dennis' activities in the SCIF. The FIE Director stated that DOE informed the company that it was free to find another position for Mr. Dennis in the company. *Id.* at 388. Finally, the FIE Director testified that NSTec was concerned about what Mr. Dennis could do as an insider, not what some hypothetical person could do to damage national security. *Id.* at 393.

Many of the concerns identified by both the FIE Director and NSTec's President as evidence of why the company "lost trust" in Mr. Dennis are corroborated by hearing testimony in the record. With regard to Mr. Dennis' persistent attempts to access classified information that he did not need to complete his job assignments, the following testimonial evidence is relevant. First, Mr. Dennis admitted on cross-examination that he thought it was permissible for him to access classified information even if he did not have a "need to know" because he thought he was being groomed for a position in the intelligence.[22] *Id.* at 187-188. I found this admission very disturbing for a former DOE

---

[21] The President also expressed a concern about Mr. Dennis' financial situation. However, NSTec did not provide any evidence of Mr. Dennis' financial irregularities. Had NSTec's only articulated reason for terminating Mr. Dennis been because of Mr. Dennis' financial situation, I would not have found any credible evidence to support that concern.

[22] When pressed at the hearing, Mr. Dennis acknowledged that he did not have "carte blanche" to access any classified site that he wanted. *Id.* at 187-188.

security clearance holder. The President of NSTec is correct that the "need to know" is the foundation for all activities involving classified information. Second, Mr. Dennis' supervisor of record testified convincingly of his concern in learning that Mr. Dennis had proactively sought out "a lot" of derivative classification assignments which might have given him access to classified material that he should not have had and for which he lacked the technical expertise. *Id.* at 291-296. Third, several managers expressed concern about Mr. Dennis' repeated vocal objections to the NSTec's decision to remove all thumb drives from the work site and his elevation of the matter to the FIE Director. *Id.* at 239, 289-290. As noted by Mr. Dennis' supervisor of record, Mr. Dennis' reaction to the enhanced security measure was perplexing given that he did not need a thumb drive to do his work. *Id.* at 290. Mr. Dennis' persistence in trying to get his company-owned thumb drive[23] returned raises a concern whether he had been downloading classified information and removing it from the work site, a scenario that he suggested on several occasions was possible in his work environment. Further, the Special Security Officer testified about Mr. Dennis' possible fraudulent manipulation of an insurance claim for pecuniary gain as a reason why he was concerned about undergoing a polygraph examination. The specter of possible fraudulent activity on Mr. Dennis' part is troubling in that it raises a question about his honesty, his willingness to comply with rules and regulations, and his potential violation of the law. The record already contains some evidence that Mr. Dennis might have been less than diligent in complying with security rules. Specifically, the Assistant Security Officer testified that Mr. Dennis was not always compliant with the SCIF requirement that, upon entering the SCIF, he provide the Special Security Officer with any material that he carried into the SCIF so she could examine it. *Id.* at 337. The Assistant Special Security Officer further testified those exiting the SCIF were subject to inspection to ensure that no classified material is removed from the SCIF. *Id.* According to the Assistant Special Security Officer, one time when she challenged Mr. Dennis, he reportedly told her that she did not need to know what he was working on. *Id.* at 338. She related that she continued to press the issue with Mr. Dennis which resulted in his leaving the document in the SCIF.

Turning to the factors set out in *Kalil v. Dep't of Agriculture*, 479 F.3d 821, 824 (Fed. Cir. 2007), I find that NSTec has provided strong evidence that Mr. Dennis' behavior in the workplace, most notably his aggressive pursuit of classified information without a "need to know," his seeming disregard of the rules in the SCIF, and his characterization of himself as an "insider threat," raised legitimate suspicions that he might be failing to properly safeguard classified information. This conduct must necessarily be evaluated in the context of very secure environment in which Mr. Dennis worked to appreciate fully why it potentially implicated national security. If one chooses to work in a classified environment, one must be trusted to adhere strictly to stringent rules and endure restrictions on movement, speech and other freedoms enjoyed by others in an unclassified

[23] At the hearing, Mr. Dennis tried to minimize the concerns that he had expressed regarding the removal of all thumb drives by NSTec. When asked whether he was upset that NSTec had taken the thumb drives away from its employees, Mr. Dennis responded, "not really." *Id.* at 221. When queried if he had complained on many occasions about the removal of the thumb drives, he replied, "not on many occasions, no." *Id.* It was my impression from observing Mr. Dennis' demeanor during his testimony about this matter that he was not candid.

environment. Trust must exist among supervisors and subordinates and co-workers to ensure those charged with missions relating to national security and the common defense function at high levels and with minimal risk of security breaches. Whether Mr. Dennis deliberately or negligently engaged in the behaviors that caused NSTec to raise "red flags" well in advance of the protected disclosure at issue in this proceeding is not relevant. In looking at the strength of NSTec's reason for the personnel action excluding the whistleblowing, I find that NSTec's contention that it terminated Mr. Dennis because it lost "trust" in him is supported by the evidence. [24]

As for the second factor set forth in *Kalil, i.e.*, the strength of any motive to retaliate for the whistleblowing, there is no direct evidence in the record of any such motive on NSTec's part.

Finally, with regard to the third factor set forth in *Kalil, e.g.*, evidence of similar action against similarly situated employees, NSTec's President testified that he had never terminated an employee because of concerns relating to national security before, but had for "comparable reasons in other areas." *Id.* at 453. He then related that the company had terminated a manager for bullying in the workplace. He also stated that there were similar cases where he made the decision that he could no longer trust an individual, and dismissed him. The Manager of Employee Relations at the time Mr. Dennis was terminated testified that there were other occasions when NSTec's behaviors resulted in termination as "the immediate and only discipline." *Id.* at 467. The first example provided was a situation where an employee was involved in a car accident at the work site and was required to take a drug screen. Id. When the individual's drug screen came back positive, NSTec immediately terminated the employee for having come to work with drugs in his system. *Id.* The second example occurred when an employee arrived at work with a weapon in his vehicle. *Id.* at 468. Rather than turning the weapon into security, the employee took the bullets out of the gun, put the bullets in the glove box of the vehicle, and the gun in the trunk. *Id.* Upon exiting the work site, the car was randomly searched and the gun and bullets found. *Id.* NSTec immediately terminated the employee. In the end, while there does not appear to have been any employee similarly situated to Mr. Dennis, NSTec did introduce evidence that it has disciplined other employees through immediate termination when it deemed conduct to be so serious that it resulted in management losing "trust" in an employee.

Considering all the relevant factors as applied to the evidence discussed above, I am convinced, based on Mr. Dennis' conduct that pre-dated his protected disclosure, that NSTec would have terminated him regardless of whether he had raised the issue of the alleged unauthorized tracking computer software. Therefore, I find that NSTec has

---

[24] The FIE Director testified that the DOE informed NSTec that it would no longer support Mr. Dennis working in the SCIF based on information provided to the agency by NSTec. Assuming this uncorroborated assertion is true and that NSTec had no other positions for Mr. Dennis, these facts would justify the personnel action taken by NSTec against Mr. Dennis. *See* David L. Moses, Case No. TBH-0066 (2008) (NNSA refused to continue funding Mr. Moses in his position because of his disruptive behavior in the workplace.)

proven, by clear and convincing evidence, that NSTec would have terminated Mr. Dennis in the absence of his protected disclosure.

V. Conclusion

As set forth above, I have determined that Mr. Dennis made one protected disclosure and has proven by a preponderance of evidence that the protected disclosure was a contributing factor to his termination. I determined, however, that NSTec has provided clear and convincing evidence to demonstrate that it would have terminated Mr. Dennis even if he had not made his protected disclosure. In conclusion, I find that Mr. Dennis has failed to establish the existence of any violations of the DOE's Contractor Employee Protection Program for which relief is warranted under Part 708.

It Is Therefore Ordered That:

(1) The Request for Relief filed by Dean P. Dennis under 10 C.F.R. Part 708 is hereby denied.

(2) This is an Initial Agency Decision, which shall become the Final Decision of the Department of Energy unless, within 15 days of the issuance of this Decision, a Notice of Appeal is filed with the Office of Hearings and Appeals Director, requesting review of the Initial Agency Decision.

Ann S. Augustyn
Hearing Officer
Office of Hearings and Appeals

Date: February 12, 2009

December 9, 2008

DECISION AND ORDER OF
THE DEPARMENT OF ENERGY

Initial Agency Decision

Names of Petitioners:	Jonathan K. Strausbaugh Richard L. Rieckenberg
Date of Filing:	February 1, 2008
Case Numbers:	TBH-0073 TBH-0075

This Initial Agency Decision involves two whistleblower complaints, one filed by Jonathan K. Strausbaugh (Case No. TBH-0073) and the other filed by Richard L. Rieckenberg (Case No. TBH-0075) under the Department of Energy (DOE) Contractor Employee Protection Program, 10 C.F.R. Part 708. Both complainants were employees of KSL Services, Inc. ("KSL" or "the contractor"), a contractor providing technical services on the site of the DOE Los Alamos National Laboratory (LANL) in Los Alamos, New Mexico, where they were employed until June 14, 2007. In their respective complaints, Mr. Strausbaugh and Mr. Rieckenberg contend that they made protected disclosures to officials of KSL and LANL and that KSL retaliated against them in response to these disclosures. Mr. Strausbaugh seeks back pay and benefits from the date of his suspension, reinstatement, and the expunging from his personnel record of any negative references to his suspension and termination. Mr. Rieckenberg similarly seeks back pay and benefits from the date of his suspension, reinstatement (or nine months of severance pay if reinstatement is not practicable), and a formal letter from KSL clearing his personnel record of any evidence of his suspension or termination.

I. BACKGROUND

A. The DOE Contractor Employee Protection Program

The DOE's Contractor Employee Protection Program was established to safeguard public and employee health and safety; ensure compliance with applicable laws, rules, and regulations; and prevent fraud, mismanagement, waste and abuse at DOE's government-owned, contractor-operated facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purposes are to encourage contractor employees to disclose information which they believe exhibits unsafe, illegal, fraudulent, or wasteful practices, and to protect those "whistleblowers" from consequential reprisals by their employers. 10 C.F.R. Part 708. Under the regulations, protected conduct includes:

> (a) Disclosing to a DOE official, a member of Congress, any other government official who has responsibility for the oversight of the conduct of operations at a DOE site, [the] employer, or any higher tier contractor, information that [the employee] reasonably believes reveals –
>
> (1) A substantial violation of a law, rule, or regulation;
>
> (2) A substantial and specific danger to employees or to public health or safety; or
>
> (3) Fraud, gross mismanagement, gross waste of funds, or abuse of authority; or
>
> (b) Participating in a Congressional proceeding or an administrative proceeding conducted under this part; or
>
> (c) Subject to § 708.7 of this subpart, refusing to participate in an activity, policy, or practice if you believe participation would-
>
> (1) Constitute a violation of a federal health or safety law; or
>
> (2) Cause you to have a reasonable fear of serious injury to yourself, other employees, or members of the public.

10 C.F.R. § 708.5.

Part 708 sets forth the proceedings for considering complaints of retaliation. The DOE's Office of Hearings and Appeals (OHA) is responsible for investigating complaints, holding hearings, and considering appeals. *See* 10 C.F.R. §§ 708.21-708.34.

B. Procedural Background

On August 16, 2007, Mr. Rieckenberg filed a complaint of retaliation against KSL with the local DOE Employee Concerns Program Office. On August 30, 2007, Mr. Strausbaugh filed his complaint of retaliation against KSL with the same office. In their complaints, Mr. Rieckenberg and Mr. Strausbaugh contend that they made certain disclosures to officials of KSL and LANL, and that KSL terminated their employment in response to these disclosures. After attempts at informal resolution failed, the complaints were transferred to OHA, where an investigator was appointed. Because the issues, key witnesses and evidence in the two cases were virtually identical, the OHA investigator conducted a joint investigation and addressed both complaints in a single Report of Investigation (ROI).

On February 1, 2008, OHA issued its joint ROI and I was appointed the Hearing Officer in the cases on the same day. The ROI concluded that Mr. Strausbaugh and Mr. Rieckenberg had met their respective burdens of demonstrating that they made protected

disclosures regarding the discovery of uncontrolled asbestos, i.e., asbestos that had not been remediated and exposure to which was potentially hazardous, and that those disclosures were a contributing factor to their termination of employment with KSL. The OHA investigator also concluded that KSL had provided significant evidence in support of its position that it would have terminated the complainants even in the absence of their protected disclosures. On March 12, 2008, I scheduled a hearing in the case to be held on May 14, 2008. On April 2, 2008, the complainants filed a Motion to Compel Discovery. After considering the Motion, the underlying discovery requests and objections, and KSL's response to the Motion, I granted the Motion in part, requiring KSL to produce certain documents in advance of the hearing. *Jonathan K. Strausbaugh*, 30 DOE ¶ 87,002, Case No. TBD-0073 (April 16, 2008).

I convened the hearing in these cases on May 14 and 15, 2008. Due to the extensive testimony and the contentiousness of the proceeding, I was unable to conclude the hearing over the two-day period. At the request of the attorneys, I re-convened and concluded the hearing on June 23-25, 2008. Both parties submitted exhibits. Mr. Strausbaugh and Mr. Rieckenberg presented 134 exhibits into the record, which are numbered Exhibit 1 through Exhibit 134, and KSL submitted 27 exhibits, which are designated as Exhibit A through Exhibit AA. The complainants testified on their own behalf, and both they and KSL presented numerous KSL and LANL employees and former employees as witnesses, representing both management and non-management. The parties submitted post-hearing briefs on July 9, 2008. I received the final installments of the transcript on August 11, 2008, at which time I closed the record in this case.

As discussed below, after carefully reviewing the documentary and testimonial evidence in this case, I have determined that Mr. Strausbaugh and Mr. Rieckenberg engaged in protected conduct, and that KSL retaliated against them by terminating them on June 14, 2007. I have also concluded that KSL failed to meet its evidentiary burden in this case. Accordingly, I have ordered that KSL provide relief to both parties.

C. Factual Background

The complainants were employed by KSL at the DOE's Los Alamos site. Mr. Rieckenberg was employed by KSL from November 2005 to June 14, 2007, the date on which he was terminated. Mr. Strausbaugh was employed by KSL from July 2005 to the same date of termination. KSL is responsible for the maintenance of the TA-3 steam distribution system, a 58-year-old steam piping system. The TA-3 system was scheduled for an extended 30-day shutdown, also known as an outage, in order to undergo extensive maintenance, beginning on May 30, 2007. Exhibit (Ex.) 46. Mr. Rieckenberg was the Utilities, Electric, and Steam Branch (UESB) Manager from May 2006 to February 2007, when he was relieved of that position and appointed the Project Leader for the planned steam system outage. Mr. Strausbaugh was hired as the UESB Steam Distribution Engineer in November 2005 and, in June 2006, was given the additional position of Steam Distribution Superintendent. Mr. Rieckenberg and Mr. Strausbaugh had the primary responsibility for planning and coordinating the steam system shutdown.

The TA-3 steam system is composed of pipes passing through the ground that lead from the steam plant to other buildings and facilities that use the steam for various purposes, such as heat, sterilization, and food preparation. The system also comprises a large number of manholes, which are below-ground, open-topped pits, covered with gratings, through which the pipes pass. The manholes permit laborers and pipefitters access to critical portions of the steam system for purposes of maintenance and repair. Nevertheless, large stretches of the steam system are not easily accessible as they are buried in the ground. It was widely known among steam system professionals and laborers at Los Alamos that asbestos had been employed in the construction of the TA-3 steam system, as that was standard practice in systems built during that era. *See, e.g.*, Transcript of Hearing (Tr.) at 1150, 1725-26, 1863. Asbestos was commonly used in piping insulation, valves, and gaskets. It was also widely known that a large-scale remediation project was conducted in the early 1990s to abate the asbestos in the TA-3 steam distribution system manholes. *Id.* at 262-63, 280. In March 2007, KSL announced that it would no longer perform asbestos abatement work, but rather would engage a contractor, Eberline, to perform such work in the future. Ex. 7. According to Mr. Strausbaugh, KSL management had indicated to him that KSL's parent company had recently been involved in an asbestos lawsuit and wanted to distance itself from that business. Tr. at 536.

On May 31, 2007, shortly after the TA-3 steam system shutdown began, members of a crew performing maintenance work in one or more of the manholes found a substance they suspected was asbestos.[1] Mr. Strausbaugh was informed of the discovery of the substance. Work was suspended in the manholes in which the suspicious substance had been found. Joan Taylor, the KSL safety engineer assigned to the shutdown, collected samples of the suspect substance, and brought them to a LANL laboratory for analysis. Later the same day, the results of the testing confirmed that uncontrolled asbestos had in fact been identified, and work was suspended in all of the manholes of the TA-3 steam system.

On May 31, 2007, Mr. Strausbaugh informed Mr. Rieckenberg about the presence of asbestos in the manholes. Tr. at 557 (testimony of Strausbaugh), 980 (testimony of Rieckenberg). He informed others as well, including his supervisor Ted Torres, and Jerome Gonzales, LANL Gas and Steam Engineer, Steven Long, LANL Operations Manager for Utilities, and Richard Nelson, LANL Project Manager for the shutdown. *Id.* at 557-58. Over the course of the following days, Mr. Rieckenberg in turn notified several individuals in his KSL chain of command and at LANL of the same discovery. Those notified included Thomas Hay, KSL Utilities Director and Mr. Rieckenberg's supervisor, and Steven Long and Richard Nelson. *Id.* at 983; *see also* Ex. 10 ("TA-3 Steam Shutdown Status Report #3 – Asbestos found in Manholes").

---

[1] The testimony given at the hearing regarding the details of what transpired on May 31, 2007, and over the course of the next two weeks was highly contested and internally inconsistent. I need not resolve those discrepancies. The facts that I present here are uncontested and are those upon which I rely in reaching my decision.

On the morning of June 5, 2007, KSL's General Manager, David Whitaker, tasked Laura Jenkins, Labor Relations Administrator, and B.J. Tedder, Human Relations Generalist (the KSL investigators), to conduct an investigation of the management abilities of Mr. Rieckenberg, Mr. Strausbaugh, and Aaron Osborne, a foreman associated with the shutdown. *Id.* at 58-59 (testimony of Jenkins); Ex. 114. Mr. Whitaker indicated that the investigation was to focus on two incidents: that supervisors had condoned an unsafe working environment by ignoring a concern about the possibility of asbestos in an area and permitting employees to work there, and that Mr. Osborne created a hostile work environment by using foul language. *Id.* at 60.

During the afternoon of the same day, Steven Long of LANL chaired a critique of the May 31 asbestos incident at the shutdown. According to Mr. Long, the purpose of the critique was to assess what went wrong and to assign corrective actions to responsible individuals; it was not to ascribe fault to any party. Tr. at 348-49. In attendance at the critique were Mr. Rieckenberg, Mr. Strausbaugh, Mr. Whitaker, Keith Trosen, the KSL Deputy Manager, and Mr. Hay. *Id.* at 571 (testimony of Strausbaugh), 1013 (testimony of Rieckenberg). Immediately after the critique, the complainants were suspended without pay pending an investigation of the incident involving the discovery of uncontrolled asbestos in the manholes, and escorted off the premises.

After interviewing the three subjects of the investigation and six other individuals on June 8 and 11, 2007, ranging from Mr. Rieckenberg's chain of command to Joan Taylor, the safety engineer, and two shutdown crew members, the KSL investigators recommended that the complainants be subject to discipline ranging from a minimum of 5 days suspension to a maximum of termination. Ex. 114 at 0437. They presented the results of their investigation to Mr. Whitaker, Mr. Trosen, Mr. Hay, Michael Goodwin, KSL Director of Human Relations, and perhaps others at a meeting on June 13, 2007. Tr. at 1314 (testimony of Hay). The KSL investigators left the meeting after their presentation and, following a discussion among the remaining participants, Mr. Whitaker made the decision to terminate both complainants. *Id.* at 1315.

On June 14, 2007, Thomas Hay presented Mr. Rieckenberg and Mr. Strausbaugh with termination letters. The termination letters issued to the complainants are identical, save for the name of the addressee. Each lists the company's reasons for terminating the employee, based on the "result of the fact-finding hearings [of] June 8-11, 2007":

> On numerous occasions during the planning and execution of the 2007 Steam System Outage, you created a hostile environment where employees were intimidated to the point of not being able to discharge their duties. You overlooked key safety concerns which ultimately placed other employees in harm's way. Many aspects of the outage were left unplanned or were poorly planned, leading to the inefficient use of craft manpower and threatening KSL's ability to meet budget and schedule targets. These actions indicate a lack of leadership skills which endanger other employees and jeopardize the Company's goals.

Exs. 1, 2. The letters further stated that the above actions constituted "unacceptable behavior which violates Company policy. KSL senior management has lost confidence in your ability to lead others in your control." *Id.*

II. ANALYSIS

A. Whether the Complainants Engaged in Protected Conduct

Under the regulations governing the DOE Contractor Employee Protection program, the complainant "has the burden of establishing by a preponderance of the evidence that he or she made a disclosure, participated in a proceeding, or refused to participate, as described under [10 C.F.R.] § 708.5, and that such act was a contributing factor in one or more alleged acts of retaliation against the employee by the contractor." 10 C.F.R. § 708.29. *See Joshua Lucero*, 29 DOE ¶ 87,034, Case No. TBH-0039 (November19, 2007); *Ronald Sorri*, 23 DOE ¶ 87,503, Case No. LWA-0001 (December 19, 1993). The term "preponderance of the evidence" means proof sufficient to persuade the finder of fact that a proposition is more likely true than not when weighed against the evidence opposed to it. *See Lucero*, 29 DOE at 89,180 (citing *Hopkins v. Price Waterhouse*, 737 F. Supp. 1202, 1206 (D.D.C. 1990)).

In his Part 708 complaint, Mr. Strausbaugh alleged that he made disclosures protected under Part 708 when he reported the discovery of suspected uncontrolled asbestos in TA-3 steam system manholes to Mr. Rieckenberg and Mr. Gonzales on May 31, 2007. Strausbaugh Complaint at ¶ O. At the hearing, Mr. Strausbaugh testified that he telephoned his KSL supervisor, Mr. Rieckenberg, as soon as he learned that material suspected of containing asbestos had been found, and telephoned both Mr. Rieckenberg and Mr. Gonzales, a LANL gas and steam engineer involved with the shutdown, when he learned that the test results were positive for asbestos. Tr. at 865-67. Mr. Strausbaugh also described in his complaint the briefings he provided to Mr. Rieckenberg over the following days concerning the presence and mitigation of uncontrolled asbestos in the manholes. Strausbaugh Complaint at ¶¶ R, U, V. At the hearing, both complainants testified that Mr. Strausbaugh met with, and provided significant input to, Mr. Rieckenberg over the next several days to assist Mr. Rieckenberg in preparing several documents, described below, that Mr. Rieckenberg e-mailed to managers at KSL and LANL. *Id.* at 558, 566, 569, 573 (testimony of Strausbaugh), 1006, 1012 (testimony of Rieckenberg).[2]

In his Part 708 complaint, Mr. Rieckenberg alleged that he made protected disclosures when he reported the discovery of uncontrolled asbestos in TA-3 steam system manholes

[2] Mr. Rieckenberg also testified that Mr. Strausbaugh disclosed concerns about the possibility of asbestos-contaminated water run-off emanating from TA-3 steam system at the June 5, 2007, critique, which was attended by KSL managers and LANL managers and project directors. *Id.* at 1014. As set forth below, I need not address whether this alleged disclosure is protected conduct under 10 C.F.R. § 708.5.

to his chains of command at both KSL and LANL on May 31, 2007. Rieckenberg Complaint at ¶ 7. He also described in his complaint three reports that he authored, with Mr. Strausbaugh's assistance, concerning the status of, and possible safety concerns associated with, the shutdown in the wake of the discovery of uncontrolled asbestos. He e-mailed two of these reports to several supervisors and officials associated with the shutdown, including Mr. Trosen and Mr. Hay of KSL and Messrs. Long, Nelson and Gonzales of LANL. Rieckenberg Complaint at ¶¶ 11, 15. *See* Exs. 10, 12. He further claimed in his complaint that he made additional protected disclosures when he raised the idea that asbestos may have been present in the manholes, but had gone undetected for many years. *Id.* at ¶¶ 13, 15. *See* Exs. 10 (to Hay only), 12 (to Trosen, Hay, Long, Nelson, Gonzales, and others). At the hearing, Mr. Rieckenberg testified that on May 31, 2007, he notified Mr. Hay, Mr. Long, and Mr. Nelson by telephone that uncontrolled asbestos had been discovered in steam system manholes. Tr. at 983. These individuals and the additional addressees of the shutdown status reports (Exhibits 10 and 12) are KSL superiors and officials of a higher-tier contractor at the Los Alamos National Laboratory.

Each of these disclosures described above was made to one or more superiors within the complainants' company—Mr. Strausbaugh to Mr. Rieckenberg, a KSL manager, and Mr. Rieckenberg to Mr. Hay, and in some instances to Mr. Trosen as well. In addition, Mr. Strausbaugh made at least one of his disclosures to Mr. Gonzales, an engineer of a higher-level contractor. Mr. Rieckenberg made all but one (Ex. 11) of his disclosures to LANL managers, specifically Mr. Long and Mr. Nelson, and, in one instance, to Mr. Gonzales as well. All of the disclosures described above relayed information regarding the discovery and management of uncontrolled asbestos, a substance exposure to which can cause significant health problems. Based on the evidence before me, I find that Mr. Strausbaugh and Mr. Rieckenberg reasonably believed that the subject disclosures communicated a "substantial and specific danger to employees or to public health or safety." 10 C.F.R. § 708.5(a)(2).

KSL argued at the hearing that the complainants' disclosures did not "reveal" a "substantial and specific danger to employees or to public health or safety," and therefore are not protected under Part 708. The contractor's rationale for this contention is that these disclosures in fact did not reveal any information to any recipient of the disclosure of which the recipient was not yet aware, because in at least several instances the recipients of the disclosures had already been informed of the same information through other sources. I find this argument to be without merit. We have considered such a restricted interpretation of a protected disclosure in the past, and have rejected it. Ruling on a Motion to Dismiss, an OHA Hearing Officer determined that a protected disclosure need not contain unique information not known to the recipient. "Imposing the interpretation [the contractor] suggests would require an employee to first ascertain whether his or her information is unknown to DOE or the contractor in order to assure his or her protected status and that process could be an elaborate and difficult one. In any case, it would tend to inhibit employees from freely coming forward with sensitive information and concerns." *META, Inc.,* 26 DOE ¶ 87,504 at 89,015, Case No. VWZ-0007 (October 23, 1996). Such an interpretation would not further the policy behind the Part 708 regulations of encouraging "employees of DOE contractors and subcontractors

to make their employers or the DOE aware of concerns about health, safety, mismanagement and unlawful or fraudulent practices without fear of employer reprisal." *Id.* After carefully considering all the evidence, I find that the complainants have established by the preponderance of the evidence that the disclosures described above are protected conduct as defined in 10 C.F.R. § 708.5.[3]

B. Whether Protected Conduct Was a Contributing Factor in an Act of Retaliation

Section 708.2 of the Contractor Employee Protection regulations defines retaliation as "an action (including intimidation, threats, restraint, coercion or similar action) taken by a contractor against an employee with respect to employment (e.g., discharge, demotion, or other negative action with respect to the employee's compensation, terms, conditions or privileges of employment) as a result of the disclosure of information." 10 C.F.R. § 708.2. The complainants allege that KSL retaliated against them by terminating their employment on June 14, 2007. KSL does not challenge the fact that it discharged both employees on that date, but contends that it was not an action taken in retaliation for any disclosures they made.

In order to prevail in a Part 708 action, the complainants must show, by a preponderance of the evidence, that the protected disclosures or conduct were a contributing factor in the retaliation against them. 10 C.F.R. § 205.29. In prior decisions of the Office of Hearings and Appeals, we have decided that:

> A protected disclosure may be a contributing factor in a personnel action where "the official taking the action has actual or constructive knowledge of the disclosure and acted within such a period of time that a reasonable person could conclude that the disclosure was a factor in the personnel action."

Charles Barry DeLoach, 26 DOE ¶ 87,509 at 89,053-54, Case No. VWA-0014 (February 5, 1997) (quoting *Sorri*, 23 DOE ¶ 87,503 at 89,010).

Throughout the hearing, KSL contended that Mr. Whitaker was the individual who made the decision to terminate the complainants' employment. *See, e.g.*, Tr. at 1568 (testimony of Whitaker). KSL also contended that he had no actual knowledge of Mr. Rieckenberg's and Mr. Strausbaugh's disclosures, because neither complainant had addressed any of his disclosures to Mr. Whitaker. The totality of the evidence certainly

---

[3] On several occasions throughout this proceeding, Mr. Rieckenberg attempted to amend his complaint to include other disclosures he believes constituted protected conduct under 10 C.F.R. § 708.5, including a number he raised in a submission filed after the first two days of the hearing, styled as a "Motion to Amend Complaint to Conform to Evidence and Testimony to Include Additional Disclosures." Because I have determined that Mr. Rieckenberg has met his burden with respect to making the protected disclosures he claimed in his complaint, I need not reach the issues of whether any of Mr. Rieckenberg's later-alleged disclosures constituted protected conduct under 10 C.F.R. § 708.5 and whether amending his complaint to include such disclosures would unfairly prejudice KSL in the proceeding. *See David L. Moses*, 30 DOE ¶ 87,007 at 89,058 n.11, Case No. TBH-0066 (September 3, 2008).

supports those facts. Nevertheless, the contractor does not prevail in its argument that these facts should disqualify the disclosures from being considered a contributing factor in Mr. Whitaker's decision to discharge Mr. Rieckenberg and Mr. Strausbaugh. The evidence clearly establishes that Mr. Hay and Mr. Trosen, who constituted the chain of command between Mr. Rieckenberg and Mr. Whitaker, were aware of the disclosures at issue in this proceeding. Mr. Rieckenberg spoke to each of them directly and sent two status reports to them regarding the discovery and management of uncontrolled asbestos on the first full day of the TA-3 steam system shutdown. *See* Exs. 10, 12. Mr. Hay and Mr. Trosen could easily see that Mr. Rieckenberg had disclosed his concerns to LANL officials as well, because several were listed as addressees of the same status reports. Finally, both Mr. Hay and Mr. Trosen attended the June 5, 2005 critique, chaired by Mr. Long, LANL official, at which both Mr. Rieckenberg and Mr. Strausbaugh presented their perspective on these matters.[4] Mr. Hay and Mr. Trosen, then, had actual knowledge of the disclosures, and Mr. Whitaker, the decision-maker, did not. I turn now to whether Mr. Whitaker had constructive knowledge of the disclosures.

A complainant can demonstrate constructive knowledge by establishing that the individual making the adverse personnel decision was influenced by persons with knowledge of the protected conduct. *Jagdish C. Laul,* 28 DOE ¶ 87,006 at 89,050, Case No. VBH-0010 (September 1, 2000) (and cases cited therein). In this case, Mr. Hay and Mr. Trosen had actual knowledge of the complainants' disclosures, and they advised Mr. Whitaker during the June 13, 2007, meeting at which he reached his decision to terminate the complainants. Mr. Whitaker testified that after the KSL investigators presented their findings regarding Mr. Rieckenberg and Mr. Strausbaugh at the meeting, "we had a discussion as to the nature of the findings, and what action, as a management team, we should take regarding those findings." Tr. at 1567-68; *see also id.* at 1743-44 (testimony of Trosen). Following that discussion, Mr. Whitaker decided to terminate the employment of Mr. Rieckenberg and Mr. Strausbaugh. *Id.* at 1568. As a consequence of that meeting, Mr. Whitaker benefited from the opinions and advice of his management team, including Mr. Hay and Mr. Trosen, and their actual knowledge of the disclosures can be imputed to Mr. Whitaker as constructive knowledge. I therefore find that Mr. Whitaker had constructive knowledge of the complainants' protected disclosures when he decided to terminate their employment on June 13, 2007.

I further find that that there was temporal proximity between their protected disclosures and Mr. Whitaker's decision to terminate their employment. "[T]emporal proximity" between a protected disclosure and an alleged reprisal is sufficient to establish the required element in a prima facie case for retaliation. *See Casey von Bargen,* 29 DOE ¶ 87,031 at 89,167, Case No. TBH-0034 (November 2, 2007) (stating that a showing that protected activity occurred proximate in time to the adverse personnel action is sufficient for complainant to meet the contributing factor test); *Dr. Jiunn S. Yu,* 27 DOE ¶ 87,556, Case No. VBH-0028 (April 7, 2000). Mr. Strausbaugh's and Mr. Rieckenberg's earliest

[4] The evidence is inconclusive as to whether Mr. Whitaker attended this critique or any portion of it. Even assuming he did not attend it at all, Mr. Hay's and Mr. Trosen's knowledge of the complainants' disclosures at the critique are sufficient under this analysis, as set forth below.

disclosures occurred on May 31, 2007. Mr. Whitaker made his decision to terminate their employment on June 13, 2007, just two weeks later. The proximity of those two dates is sufficient in itself to draw the inference that the disclosures were a contributing factor in the termination.

In its closing argument, however, KSL contends that, under these particular circumstances, temporal proximity is not sufficient to establish that the complainants' disclosures were a contributing factor in the decision to terminate their employment. KSL's attorneys argue that in a 1998 decision, OHA concluded that it would be unreasonable to rely on temporal proximity to establish that the protected conduct was a contributing factor in the alleged retaliatory action by the contractor. KSL Post-Hearing Brief at 12 (citing *Carlos M. Castillo*, 27 DOE ¶ 87,505, Case No. VWA-0021 (February 2, 1998). I have reviewed *Castillo* and have determined that the rationale applied in that case is inapplicable here. Mr. Castillo had raised a safety concern with his employer. A day later, he was terminated. The evidence in the record, however, was "overwhelming in support of the finding that Castillo was disruptive at safety meetings and confrontational with . . . management over union/work jurisdiction issues despite repeated warnings from [his employer] and his own union to desist in this behavior." *Castillo*, 27 DOE at 89,048. While I recognize that safety issues formed the basis for the protected disclosures in both *Castillo* and the present cases, the facts in these cases are entirely different. The evidence in this record supports a finding that Mr. Rieckenberg and Mr. Strausbaugh were respectful toward management at all times, even during technical and financial disputes, the stuff of normal business conduct.

I conclude that the complainants have established by a preponderance of the evidence that their protected disclosures were a contributing factor to their termination.

C. Whether the Contractor Would Have Taken the Same Action in the Absence of the Protected Disclosures

Section 708.29 of the governing regulations states that once a complaining employee has met the burden of demonstrating that conduct protected under 10 C.F.R. § 708.5 was a contributing factor in the contractor's retaliation, "the burden shifts to the contractor to prove by clear and convincing evidence that it would have taken the same action without the employee's disclosure, participation, or refusal." 10 C.F.R. § 708.29. "Clear and convincing evidence" requires a degree of persuasion higher than preponderance of the evidence, but less than "beyond a reasonable doubt." *See Casey von Bargen*, 29 DOE at 89,163. If the contractor meets this heavy burden, the allegation of retaliation for whistleblowing is defeated despite evidence that the complainant's protected conduct was a contributing factor in the company's alleged act of retaliation.

It is well settled that several factors may be considered in determining whether an employer has shown, by clear and convincing evidence, that it would have taken the alleged act of retaliation against a whistleblower in the absence of the whistleblower's protected conduct. The Federal Circuit, in cases interpreting the federal Whistleblower Protection Act (WPA), upon which Part 708 is modeled, has identified several factors

that may be considered, including "(1) the strength of the [employer's] reason for the personnel action excluding the whistleblowing, (2) the strength of any motive to retaliate for the whistleblowing, and (3) any evidence of similar action against similarly situated employees . . . ." *Dennis Patterson*, 30 DOE ¶ 87,005 at 89,040, Case No. TBH-0047 (June 20, 2008) (quoting *Kalil v. Dep't of Agriculture*, 479 F.3d 821, 824 (Fed. Cir. 2007)).

1. The Strength of the Reason for the Personnel Action

The first factor I will consider, following the analysis set forth in *Patterson*, is the strength of KSL's reason for terminating the complainants, excluding their protected disclosures. The termination letters set out the company's stated reasons for termination. Exs. 1, 2. But for the name of each addressee, the letters contained identical language, holding Mr. Rieckenberg and Mr. Strausbaugh equally and identically culpable for the presence of a safety hazard, uncontrolled asbestos, on a worksite at the start of an important maintenance project which, due to their poor planning and lack of concern for safety, placed workers in harm's way. They were also held responsible for creating a hostile work environment in which employees were so intimidated that they could not discharge their duties.

Mr. Hay, who signed the termination letters for KSL, offered the following factual bases for the company's grounds for terminating the complainants. He testified that the letters' reference to overlooking "key safety concerns" was based solely on their reliance on anecdotal evidence that the manholes were free from asbestos due to abatement. Tr. at 144-45. He also testified that the letters' reference to aspects of the shutdown being "left unplanned or poorly planned" represented two concerns that revealed themselves after the complainants had been suspended: that necessary parts had not been ordered, and that the complete plan for restarting the steam system had not been reduced to paper. *Id.* at 146. Finally, Mr. Hay testified about the statement in the termination letters that "[o]n numerous occasions," Mr. Rieckenberg and Mr. Strausbaugh "created a hostile work environment where employees were intimidated to the point of not being able to discharge their duties." Mr. Hay testified that the "numerous occasions" were planning meetings, and that the "employees" were Ms. Taylor and Mr. Lujan, the safety engineers. *Id.* at 134. According to Mr. Hay, Mr. Rieckenberg informed them that there was no asbestos in the manholes after they raised the issue. *Id.* at 136. Ms. Taylor and Mr. Lujan then proceeded to conduct the necessary inspections and produce the certifications within the scope of their duties. *Id.* at 138. Mr. Hay testified that Ms. Taylor had reported to him that she felt she was working in a hostile environment when she was working with the maintenance crew, who would not "listen to her" and used "vulgar and offensive language" in her presence, but "not so much Mr. Rieckenberg and Strausbaugh, but the Foreman and the crew." *Id.* at 140.

Several witnesses, including Mr. Hay, testified that Mr. Rieckenberg and Mr. Strausbaugh, like their employer, were safety-oriented. *Id.* at 159 (testimony of Hay), 279 (testimony of Nelson). Mr. Nelson further testified that he was present at most if not all of the planning meetings, which Mr. Hay identified as the numerous occasions of

hostile work environment, and he observed no atmosphere of intimidation. *Id.* at 279. Mr. Gonzales testified that he had worked with the steam systems at LANL since the mid-1980s and had participated in the steam system asbestos abatement project. *Id.* at 263, *see also id.* at 170-72 (testimony of Hay), 279-80 (testimony of Nelson). He further testified that it was not reasonable to anticipate the presence of uncontrolled asbestos in the TA-3 steam system manholes, because none had been encountered in hundreds of entries into those manholes in the years since the abatement. *Id.* at 264-66. Both Mr. Gonzales and Mr. Nelson were among the 10 or 12 members of the planning team for the shutdown. *Id.* at 292 (testimony of Nelson). Mr. Gonzales also clarified that Mr. Rieckenberg and Mr. Strausbaugh's plan had provisions for encountering asbestos in gaskets and other specific items, where asbestos had been found in the past; it had no provisions for uncontrolled asbestos, which was what was encountered on May 31, 2007. *Id.* at 265. All members on the planning team had significant experience in safety and steam system shutdowns, yet none raised a concern about uncontrolled asbestos as they planned the shutdown. *Id.* at 294 (testimony of Nelson). Mr. Nelson also testified that after Mr. Rieckenberg and Mr. Strausbaugh were no longer working on the shutdown, the new team had difficulty locating the necessary parts. He added, however, that, for the most part, the parts had been ordered and delivered to the site, but due to the lack of an organized storage area, could not be easily found. *Id.* at 282-83. Finally, regarding Ms. Taylor's complaint that the work crew's use of obscene language created a hostile work environment, testimony revealed that Mr. Rieckenberg and Mr. Hay had offered to address the situation, but Ms. Taylor informed them that she would handle the situation herself. *Id.* at 159 (testimony of Hay), 1850-51 (testimony of Taylor).

The evidence before me strongly suggests the bases for KSL's stated grounds of termination were in fact rather weak. I find that Mr. Rieckenberg and Mr. Strausbaugh were reasonable to conclude from their discussions with experienced LANL officials and maintenance workers, as well as from the steam system's history of asbestos abatement and hundreds of subsequent manhole entries, that uncontrolled asbestos should not have been encountered in the manholes in the course of the maintenance project. I also find that the additional stated grounds for termination, poor planning and creation of a hostile work environment, are not strongly supported by the evidence. The weakness of the stated reasons for the terminations of Mr. Rieckenberg and Mr. Strausbaugh does not contribute to a finding in the company's favor.

2. The Strength of a Motive to Retaliate

In applying the second factor, the strength of any motive to retaliate for the protected disclosures, I find no evidence of any such motive on the part of Mr. Whitaker or his managers. The complainants presented evidence at the hearing that in March 2007, KSL announced that it would no longer perform its own asbestos abatement work, but rather would engage a contractor to perform such work. Ex. 7. Moreover, Mr. Strausbaugh testified that KSL's parent company had recently been involved in an asbestos lawsuit and wanted to distance itself from that business. Tr. at 536. The fact that uncontrolled asbestos was discovered during a maintenance project two months after this announcement likely caused KSL management a great deal of concern, but I fail to see

that the announcement or its aftermath gave rise to a motive for KSL to retaliate against the complainants for making their protected disclosures. Their disclosures related to the fact that uncontrolled asbestos had been discovered and, in the case of Mr. Rieckenberg, that there may be long-range consequences for exposed employees. Their disclosures did not concern the contract in place to perform asbestos work, nor were they in any way critical of Mr. Whitaker, Mr. Trosen, Mr. Hay, or KSL, either of which topics may have given Mr. Whitaker or his managers a motive to retaliate. Under these circumstances, I find no evidence that the KSL officials recommending and deciding the personnel action had any motive to retaliate against the complainants for their protected disclosures. *See Carr v. Soc. Security Admin.*, 185 F.3d 1318, 1326 (Fed. Cir. 1999) (those with motive to retaliate "not 'agency officials' recommending discipline").

3. Evidence of Similar Action Against Similarly Situated Employees

The third factor set forth in *Kalil* is whether there is any evidence that the employer took similar action against similarly situated employees. Following the June 5, 2007, critique of the May 31, 2007, discovery of uncontrolled asbestos in the TA-3 steam system manholes, Mr. Whitaker placed Mr. Rieckenberg and Mr. Strausbaugh on suspension pending a fact-finding investigation. Tr. at 1563; *see also id.* at 1408 (testimony of Martin Dominguez, KSL Manager of Labor and Employee Relations: "investigative leave pending investigation," citing Ex. H). At about the same time, Mr. Whitaker and Mr. Dominguez gave Ms. Jenkins and Ms. Tedder, the KSL investigators, direction concerning the investigation they were tasked to perform. *Id.* at 1401-02. The KSL investigators presented their findings at a June 13, 2007, meeting of Mr. Whitaker, Mr. Trosen, Mr. Hay, and others, during which Mr. Whitaker consulted with his managers and decided to terminate the employment of Mr. Rieckenberg and Mr. Strausbaugh.

The evidence in the record clearly indicates that KSL did not follow its own procedures regarding the termination of the complainants. The company's Performance Improvement and Disciplinary Action for KSL Employees provides that a "fact-finding hearing . . . will be conducted for disciplinary actions that could reach the level of suspension or termination and where a preliminary investigation raises questions of fact." Ex. H at § 5.2.4.1. The policy defines a "fact-finding hearing" as "a formal meeting of the appropriate Supervisor, the employee, a representative of the Labor/Employee Relations Department and any witnesses deemed appropriate." In these cases, only an investigation was conducted, although as the investigative report indicates, the recommended discipline for Mr. Rieckenberg and Mr. Strausbaugh included the possibility of termination. Ex. 114 at 0437. KSL representatives testified that no formal "fact-finding hearing" was held concerning the complainants. Tr. at 85 (testimony of Jenkins), 1426, 1436 (testimony of Dominguez).

Mr. Dominguez, testified, however, that KSL need not follow its own policy when terminating employees. He testified at the hearing that KSL is free to select which, if any, of its discipline procedures it wished to apply to a given employee. *Id.* at 1407. In these cases, for example, although no fact-finding hearing was convened, KSL nevertheless relied on a matrix of disciplinary penalties, attached to its disciplinary

policy, to determine the range of penalties that applied to the charges against the complainants. Ex. H at K001431. Moreover, in its closing statement, KSL pointed out that the policy "does not limit the Company in taking any actions regarding an employee if the Company determines it is appropriate under the circumstances." Ex. H at § 2.0. It also contends that, as at-will employees, Mr. Rieckenberg and Mr. Strausbaugh could have been terminated at any time and for any reason not prohibited by statute.

While KSL may be technically correct, its position does not support a finding that it has taken similar action regarding similarly situated employees. Moreover, the evidence in the record establishes that KSL could not demonstrate that it had treated similarly situated employees in a manner similar to the treatment of Mr. Rieckenberg and Mr. Strausbaugh. Mr. Dominguez testified that three supervisors had been terminated for safety-related issues about two years ago, and others had been disciplined in other manners for safety-related issues. Tr. at 1456. He could not, however, recall sufficient details to distinguish between those who were terminated and those who were not. *Id.* Nor could he recall whether those who were terminated were given fact-finding hearings before their respective terminations. *Id.* at 1457-58. Mr. Whitaker testified that, in arriving at his decision to terminate Mr. Rieckenberg and Mr. Strausbaugh, there was no precedent to follow regarding the treatment of similarly situated employees. *Id.* at 1569, 1622.

KSL has not met its burden of showing, by clear and convincing evidence, that it would have taken the same action against Mr. Rieckenberg and Mr. Strausbaugh had they not made their protected disclosures. The company has demonstrated that it believed it had grounds for terminating the complainants, as set forth in the termination letters. But that demonstration does not satisfy the heavy burden that Part 708 places on the employer. After examining the evidence in this case in light of the factors set forth in *Kalil*, I am not convinced that KSL's stated grounds for terminating the complainants were particularly strong, nor that the company treated similarly situated employees in a similar manner. It has demonstrated, at best, what action it could have taken, pursuant to its discipline policy, against Mr. Rieckenberg and Mr. Strausbaugh. However, it has not shown, as it must, what action it would have taken against them in the absence of protected conduct, let alone by clear and convincing evidence. I therefore find that KSL has not presented clear and convincing evidence that it would have terminated Mr. Rieckenberg and Mr. Strausbaugh absent their protected disclosures.

III. CONCLUSION

In the foregoing Decision, I have found that Mr. Rieckenberg and Mr. Strausbaugh have established by a preponderance of the evidence that they engaged in protected conduct when they made oral disclosures regarding safety concerns to individuals in their chains of command and others employed by a higher-level contractor, and that these disclosures were a contributing factor to an act of retaliation. I have further found that KSL has not presented clear and convincing evidence that it would have taken the same actions at

issue absent the protected conduct. Therefore, I find that the complainants are entitled to relief under Part 708.[5] After I receive documentation from the parties, as set forth in the Order below, I will direct KSL to reimburse the complainants' legal fees for this proceeding, to remove any negative information regarding their suspension and termination from their respective personnel files and notify each complainant in writing that such removal has been performed, to reinstate them to their positions or place them in equivalent positions (or provide nine months of severance pay if re-employment is not practicable), and to reimburse them for back pay and benefits starting from the date of their suspension, offset by any income earned from employment during that same period.

Mr. Rieckenberg and Mr. Strausbaugh shall submit a calculation in support of their claims for back pay and benefits to KSL. As for their litigation expenses, attorney fees in Part 708 cases are generally calculated using the "lodestar" methodology described by the U.S. Supreme Court in *Blanchard v. Bergeron*, 489 U.S. 87 (1989). *See Sue Rice Gossett*, 28 DOE ¶ 87,028 (2002); *Ronald A. Sorri*, 23 DOE 87,503 (1993), *affirmed as modified*, 24 DOE 87,509 (1994); 10 C.F.R. § 708.36(a)(4). I will direct Mr. Rieckenberg and Mr. Strausbaugh to submit a calculation of attorney fees with evidence supporting the hours worked and the rates claimed. *See Sue Rice Gossett*, 28 DOE at 89,227 (citing *Webb v. Board of Education of Dyer County, Tennessee*, 105 S. Ct. 1923, 1928 (1985)).

Reinstatement is an equitable remedy. There is no evidence in the record that the positions occupied by Mr. Rieckenberg and Mr. Strausbaugh, with similar compensation levels, exist at this time. An equitable remedy cannot put the complainant in a worse position than the position that he currently occupies. When so ordered, KSL should review all currently available vacancies in order to determine if positions comparable to the complainants' former positions exist, at comparable levels of compensation, for which they qualify. If there are such comparable positions, and if Mr. Rieckenberg and Mr. Strausbaugh are in agreement, KSL shall place Mr. Rieckenberg and Mr. Strausbaugh in those positions.

This decision and order has been reviewed by the National Nuclear Security Administration (NNSA), which has determined that, in the absence of an appeal or upon conclusion of an unsuccessful appeal, the decision and order shall be implemented by the affected NNSA element, official or employee and by each affected contractor.

---

[5] As stated above, Mr. Strausbaugh seeks back pay and benefits from the date of his suspension, reinstatement, and the expunging of any negative references to his suspension and termination from his personnel record. Mr. Rieckenberg similarly seeks back pay and benefits from the date of his suspension, reinstatement (or nine months of severance pay if reinstatement is not practicable), and a formal letter from KSL clearing his personnel record of any evidence of his suspension or termination. *See* Memoranda of OHA Investigator's Interviews with Complainants in Case Nos. TBI-0073 (Strausbaugh) and TBI-0075 (Rieckenberg).

It Is Therefore Ordered That:

(1) The relief sought by Jonathan K. Strausbaugh (Case No. TBH-0073) and Richard L. Rieckenberg (Case No. TBH-0075) under 10 C.F.R. Part 708 is hereby granted as set forth below, and denied in all other respects.

(2) Within 15 days of receipt of this Initial Agency Decision, Mr. Rieckenberg and Mr. Strausbaugh shall submit to KSL Services, Inc., and to the Hearing Officer a report containing a detailed calculation of their attorney fees reasonably incurred to prepare for and participate in proceedings leading to the Initial Agency Decision. The fees shall be calculated using the lodestar approach. The report shall also contain a calculation of their respective claims for back pay and associated benefits from the date of their suspension, offset by any income earned from employment during that same period.

(3) Within 15 days of its receipt of the report described in paragraph (2) above, KSL shall submit a responsive document to Mr. Rieckenberg and Mr. Strausbaugh and to the Hearing Officer. Should the parties elect to seek mediation to resolve the remedial phase of these cases, they shall notify me immediately and I will hold this proceeding in abeyance for a period of 30 days.

(4) This is an Initial Agency Decision, which shall become the Final Decision of the Department of Energy unless, within 15 days of the issuance of a Supplemental Order with regard to remedy in these cases, a Notice of Appeal is filed with the Office of Hearings and Appeals Director, requesting review of the Initial Agency Decision.

William M. Schwartz
Hearing Officer
Office of Hearings and Appeals

Date: December 9, 2008

May 7, 2009

DECISION AND ORDER
OF THE DEPARTMENT OF ENERGY

Order to Show Cause
Motion for Summary Judgment
Initial Agency Decision

Name of Cases:	Billy Joe Baptist
Dates of Filing:	December 19, 2008 February 18, 2009
Case Numbers:	TBH-0080 TBZ-0080

This decision will consider an Order to Show Cause that I issued on February 3, 2009, regarding a March 6, 2008, whistleblower complaint filed by Billy Joe Baptist (Baptist) under the Department of Energy's (DOE) Contractor Employee Protection Program, 10 C.F.R. Part 708, against his employer, CH2M-WG Idaho, LLC (CWI). I will also consider in this decision as a Motion for Summary Judgment that CWI filed on February 18, 2009 regarding this complaint.

Pursuant to Part 708, an OHA attorney conducted an investigation of Baptist's whistleblower complaint and issued a Report of Investigation (Report) on December 19, 2008. The Report noted that Baptist filed his whistleblower complaint on March 6, 2008[1], but that five of the six alleged retaliations occurred on June 4, 2007. The investigator opined that these retaliations may be barred by the fact that Part 708 requires a complaint to be filed no later than the 90th day after the individual knows or reasonably should have known of the alleged retaliation. 10 C.F.R. § 708.14. In a conference call to the parties on February 3, 2009, I ordered counsel for Baptist to submit a brief showing cause why these retaliations are not barred from consideration pursuant to the 90-day deadline in 10 C.F.R. § 708.14. Subsequently, CWI moved for a summary judgment regarding the remaining retaliation alleged by Baptist in his complaint.

As discussed below, I find that the first five alleged retaliations are time-barred from consideration under 10 C.F.R. § 708.14. I also find that CWI is entitled to Summary Judgment in its favor regarding the remaining sixth alleged retaliation.

I. Background

[1] Baptist sent a complaint under 10 C.F.R. § 851 (DOE Worker Health and Safety Program) dated January 10, 2008, to Beth Sellers (Sellers) at the Department of Energy's Idaho Operation Office (DOE-ID) detailing various electrical safety complaints. In his letter he seeks to "invoke the whistleblower clause." *See* Tab A Report of Investigation Exhibits at 21. He later filed his Part 708 whistleblower complaint on March 6, 2008.

The Department of Energy established its Contractor Employee Protection Program to safeguard "public and employee health and safety; ensure compliance with applicable laws, rules, and regulations; and prevent fraud, mismanagement, waste, and abuse" at DOE's Government-owned or -leased facilities. Criteria and Procedures for DOE Contractor Employee Protection Program, 64 Fed. Reg. 12862 (March 15, 1999) (interim final rule). Its primary purpose is to encourage contractor employees to disclose information that they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers. The Part 708 regulations prohibit discrimination by a DOE contractor against its employee because the employee has engaged in certain protected activity, including when the employee has

> (a) Disclos[ed] to a DOE official, a member of Congress, any other government official who has responsibility for the oversight of the conduct of operations at a DOE site, your employer, or any higher tier contractor, information that you reasonably believe reveals—
>
> (1) A substantial violation of a law, rule, or regulation;
> (2) A substantial and specific danger to employees or to public health or safety; or
> (3) Fraud, gross mismanagement, gross waste of funds, or abuse of authority . . . .

10 C.F.R. § 708.5(a).

CWI is the management and operating contractor for the Idaho Cleanup Project[2] at the DOE's Idaho National Laboratory site. Baptist was hired in March 2004 as a temporary laborer at INL by Bechtel BWXT Idaho, LLC (BBWI). In May 2004, Baptist was promoted to Electrician 1st class and was given regular, full-time employment status in January 2005. In May 2005, Baptist was hired by CWI when it was awarded the prime contract to perform the ICP.

In response to a April 2005 memorandum issued by the Secretary of Energy directing all DOE facilities to improve electrical safety performance, CWI submitted its plan to improve electrical safety for ICP employees entitled *First 90-Days Safety Assurance Plan*. CWI also subsequently drafted and implemented an Electrical Safety Improvement Plan (ESIP), designated PLN-1971. The ESIP mandated that an Electrical Safety Committee (ESC) be formed for the ICP. Baptist was one of the employees who drafted the charter for the newly formed ESC and was appointed to serve on the ESC. The ESC was designed to be the company vehicle to monitor implementation of the ESIP. He was also selected to serve on two CWI boards, the Project Evaluation Board (PEB) and the Energy Facilities Contractor's Group (EFCOG), a committee to look at electrical safety issues complexwide.

To support the Secretary of Energy's emphasis on electrical safety, the DOE's Office of Environmental Management offered a $10,000 prize (the DOE-EM Challenge) to the site or project that demonstrated the most improved safety culture. CWI won the DOE-EM Challenge and Baptist was individually recognized for his efforts in winning the prize. Approximately two weeks after

[2] The Idaho Cleanup Project (ICP) is tasked with the environmental cleanup of the Idaho National Laboratory (INL) site.

CWI won the prize, Baptist alleges that the then-President of CWI, Alan Parker, designated him and another employee, James Watters, as Subject Matter Experts (SMEs) for electrical safety.[3]

In addition to his responsibilities on the ESC, Baptist alleges that he was responsible for conducting independent assessments regarding electrical safety. In 2006, an electrician for the Idaho Nuclear Technology and Engineering Center (INTEC) raised a safety concern regarding a particular electrical transformer and its related equipment, Transformer XRF-YDH-666 (INTEC Transformer).[4] Baptist alleges that he conducted several inspections of the INTEC Transformer and submitted several reports in the Issues Communication and Resolution Environment (ICARE) tracking system concerning safety issues in late 2006.[5]

The ICARE report at issue in this case, ICARE #102586 (the ICARE), was submitted by Baptist on May 2007. The ICARE detailed a number of alleged safety and regulatory violations concerning the INTEC Transformer. In late May 2007, Baptist alleges that he spoke to William Reed (Reed), Engineering Group Supervisor at CWI and Chairman of the ESC, concerning his findings regarding the INTEC Transformer. He informed Reed that he would report these safety concerns directly to DOE if CWI took no action to remedy the concerns by CWI. During their conversation, Reed informed Baptist that going directly to DOE with his concern would be "career limiting" and a "poor career move." Report at 6.

At a June 4, 2007, ESC meeting, Baptist expressed his safety concerns about the INTEC Transformer to CWI senior management. During the meeting Baptist discussed "lock and tag" [6] issues regarding the INTEC Transformer and questioned how CWI officials could calculate a Flash Hazard Analysis[7] for the transformer "without all of the proper information." Report at 4. Immediately after the meeting, Baptist alleges that he was removed from his supervisory duties, his duty as a SME for Electrical Safety and was removed from his positions on the PEB, the EFCOG Committee and the PLN-1971 Board. [8]

At the time of the June 2007 ESC meeting, Baptist had been experiencing pain in his hands which subsequently spread to his fingers and wrists, and took personal leave later on June 4, 2007. On

---

[3] CWI disputes Baptist's account regarding his SME status.

[4] A transformer is a device than allows electrical energy to be transformed from one voltage to another. The INTEC Transformer was a temporary transformer that had been installed over 15 years prior to the dates of Baptist's inspections. Report at 6.

[5] The reports were submitted to CWI via the ICARE system. The ICARE system is a tool by which any employee can identify and report a safety concern. Report at 5 n.11.

[6] A "lock and tag" issue is an issue relating to the proper isolation of hazardous electrical energy.

[7] A Flash Hazard Analysis (or Flash Calculation) is a determination that mandates what type of electrical equipment is necessary for an electrician to wear to avoid injury while working on a particular electrical equipment.

[8] The nature of the PLN-1971 Board is not described in the Report of Investigation.

June 6, 2007, Baptist completed an application for short-term disability (STD) benefits with CWI's insurance carrier, Cigna Group Insurance (Cigna). Baptist would subsequently require surgery to correct his condition. Memorandum in Opposition to Motion for Summary Judgment, Case No. TBH-0080 (April 20, 2009) at 3-5. Sometime in June 2007, Baptist began to receive disability benefits from Cigna. In September 2007, Baptist was transferred to another ICP organization - INTEC Area Operations Electrical.

On October 15, 2007, Cigna contacted CWI to determine if Baptist could return to work. Baptist claims that his personal physician cleared him to go back to work with a "15-pound weight restriction." Report at 8. Such a weight restriction, he asserted, would prohibit him from performing his regular work tasks but would not have restricted him in performing the duties of a SME for Electrical Safety.

Debbie Anglin (Anglin), CWI Benefits Specialist, sent an E-mail to Baptist's then supervisor, Richard Tullock (Tullock), inquiring if he could accommodate Baptist in a light-duty position. Exhibit (Ex.) 2 Complainant's Opposition to Summary Judgment Exhibits (SJ Exhibits), Case No. TBH-0080 at 46. Later, Anglin reported to Cigna that CWI could not accommodate Baptist by placing him in a light-duty position.

In December 2007, Baptist was approved for long-term disability (LTD) benefits. Baptist submitted an Inactive Employee Status (IES) request (Request) form signed on December 19, 2007.[9] Anglin sent an E-mail to Jeffrey Hobbes (Hobbes), Baptist's then-manager, on January 10, 2008, asking if he would approve IES status for Baptist. Hobbes approved IES status for Baptist later that day. CWI subsequently placed Baptist on IES on January 7, 2008.[10] Baptist was transferred again in February 2008 to the Water/Steam organization at INTEC.

The Request states that an employee on IES who wishes to return to work must obtain a written release from their personal physician and then report to the nearest INL medical dispensary for an examination by a company-designated physician. Baptist received a letter from CWI on April 29, 2008, stating that if he wished to return to work he needed to obtain the medical clearances as specified in the Request. CWI asserts that it was never informed by Baptist that he sought to return to work. CWI also asserts that Baptist never contacted the INL medical dispensary to obtain a medical clearance to return to work. Subsequently, because Baptist had been on IES for one year, on June 10, 2008, CWI terminated his employment.

Baptist asserts that he made two protected disclosures regarding INTEC Transformer safety concern while employed at CWI: his submission of ICARE #102586 and his discussion of safety concerns at

[9] Baptist's IES status was deemed to start from the first day of his absence due to disability, June 5, 2007. *See* Motion Ex. H (January 23, 2008 E-mail); Report at 7 n.21.

[10] IES refers to the status of an employee who is on STD and LTD. CWI asserts that its consistent policy is that all employees on IES for one year who have not sought reinstatement or other employment with it are automatically terminated from employment. This policy was stated in the Request for Inactive Employee Status that Baptist received on January 14, 2008.

the June 4, 2007, ESC meeting. He alleges that he experienced six acts of retaliation caused by his two protected disclosures. Five of the retaliations occurred immediately after the June 4, 2007, ESC meeting: (1) Relief from Supervisory Duties; (2) Removal as a SME for Electrical Safety; (3) Removal from PEB; (4) Removal from EFCOG Committee; and (5) Removal from PLN-1971 Board. The sixth alleged retaliation was his termination by CWI on June 10, 2008. [11]

II. Analysis

As described above, in a conference call to the parties on February 3, 2009, I ordered counsel for Baptist to submit a brief showing cause why Retaliations Nos. 1-5 are not barred from consideration pursuant to the 90-day deadline in 10 C.F.R. § 708.14. Subsequently, on February 18, 2009, CWI filed a Motion for Summary Judgment asking that the remaining alleged retaliatory act, Baptist's termination on June 10, 2008 also be dismissed. Baptist filed responses to my show cause order and CWI's Motion on April 20, 2009. CWI filed a reply to Baptist's Summary Judgment response on April 27, 2009.

The Part 708 regulations do not include procedures and standards governing summary judgment motions. I note that the Federal Rules of Civil Procedure provide that such a motion shall be granted "if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law." Fed. R. Civ. P. 56(c). While the Federal Rules do not govern this proceeding, Rule 56 has been used as a guide in the evaluation of Motions for Summary Judgment filed in a Part 708 proceeding. *See Edward J. Seawalt*, Case No. VBZ-0047 (August 20, 2000).[12] Prior cases of this office considering Motions for Summary Judgment instruct that such a motion should only be granted if it is supported by "clear and convincing" evidence. *Fluor Daniel Fernald*, Case No. VBZ-0005 (October 4, 1999) (motion to dismiss should only be granted where there are clear and convincing grounds for dismissal).

To prevail in a whistleblower complaint, a complainant has the burden of establishing by a preponderance of the evidence that he or she made a protected disclosure and that the disclosure was a contributing factor in one or more alleged acts of retaliation against the employee by the contractor. 10 C.F.R. § 708.29.[13] Once the employee has met this burden, the burden shifts to the contractor to prove by clear and convincing evidence that it would have taken the same action without the employee's disclosure, participation, or refusal. *Id.*

[11] In this decision, I will also refer to these alleged retaliations by retaliation number (Retaliation No.).

[12] Decisions issued by the Office of Hearings and Appeals (OHA) after November 19, 1996 are available on the OHA website located at http://www.oha.doe.gov. The text of a cited decision may be accessed by entering the case number of the decision in the search engine located at http://www.oha.doe.gov/search.htm.

[13] For the purpose of deciding the Motion for Summary Judgment addressed in this Decision, I will assume that Baptist made protected disclosures and that he in fact had SME status. *See Adickes v. S.H. Kress & Co.*, 398 U.S. 144 (1970) (court must consider all materials in the light most favorable to the party opposing the motion for summary judgment).

After considering the record before me, I find that Retaliation Nos. 1-5 are time-barred. Additionally, I find clear and convincing evidence that the contractor would have terminated Baptist from his position notwithstanding his disclosures. Accordingly, I will grant the motion for summary judgment.

A. Retaliations Nos. 1-5 – Removal from Supervisory Duties, Subject Matter Expert Status, Project Evaluation Board, EFCOG Committee and PLN-1971 Board

The Report of Investigation recorded that Baptist alleged that after June 4, 2007, ESC meeting, he was removed from all supervisory duties, as a SME for Electrical Safety, the PEB, the EFCOG Committee and the PLN-1971 Board (Retaliations Nos. 1-5). Baptist filed his whistleblower complaint on March 6, 2008.

Section 708.14 of Part 708 states in relevant part "[Y]ou must file your complaint by the 90th day after the date you knew, or reasonably should have known, of the alleged retaliation." 10 C.F.R. § 708.14(a). In the present case, Baptist did not file a complaint until some 11 months after he claimed that he had suffered Retaliation Nos. 1-5.

In his response, Baptist makes three arguments. First, Baptist argues that officials at the DOE field Office at Idaho Falls (DOE-ID) accepted his whistleblower complaint and that it now should not be deemed untimely. In support of this argument, Baptist asserts that the DOE-ID never informed him that his complaint was untimely or otherwise defective, despite having a series of contacts from September 2007 until the filing of his complaint on January 10, 2008. With regard to his position that DOE-ID erred in its processing of his whistleblower case, Baptist draws our attention to *Charles Evans*, Case No. TBU-0026 (June 2, 2004) (*Evans*) which he believes stands for the proposition that whistleblower complaints should not be dismissed where a field office gives erroneous information about Part 708 procedures.

Baptist's second argument is that when he contacted Anglin in June 2007 and told her of the retaliation he experienced, he expected that CWI's HR department (CWI-HR) would investigate his whistleblower complaint. Because CWI-HR did nothing in regard to this alleged complaint, Baptist was not aware that he was being retaliated against and the failure to investigate constitutes "a violation" that is renewed with each failure to investigate. Response to Order to Show Cause, Case No. TBH-0080 (April 20, 2009) at 6. (Response). Once he discovered that CWI-HR was not going to take any action on his complaint, Baptist promptly filed his Part 708 complaint with DOE-ID.

Lastly, Baptist argues that Retaliation Nos. 1-5 are a part of a "continuing violation" by CWI of Part 708. Specifically, Baptist asserts that the retaliations are part of a "hostile work environment claim." Response at 6. In this regard, Baptist points to *National R.R. Passenger Corp. v. Morgan*, 536 U.S. 101, 116-17 (2002) (*Morgan*) for the proposition that, as long as one of the retaliations occurred within the 90-day deadline, all of the acts may be considered for determining liability. Response at 6-7. In the present case, Baptist argues that Retaliations No. 1-5 were a "pattern of hostile acts that culminated in the on-going failure of HR to investigate his [whistleblower] claims or accommodate his restrictions." Further, Baptist asserts that even if Retaliations Nos. 1-5 are not actionable in

themselves, they still can form a basis of a hostile work environment claim that can be considered as timely filed.

After considering each of these arguments, I find that Baptist has failed to show good cause why Retaliations Nos. 1-5 should not be time-barred.

With regard to Baptist's first argument, the fact that a field office has accepted a complaint for processing does not overcome timeliness requirements. In *Donald E. Searle*, Case No. TBU-0065 (May 16, 2007) (*Searle*), the field office accepted the whistleblower's complaint for processing. Nonetheless, OHA later dismissed the complaint for the failure of the whistleblower to comply with the 90-day deadline. Nor does Baptist's assertion regarding the fact that he was not apprised of any potential timeliness issues change the result. OHA case law has consistently held that complainants are presumed to understand their rights and obligations under applicable DOE regulations notwithstanding claims that they did not have an actual knowledge of the regulations. *Searle* at 3; *Carolyn C. Roberts*, TBU-0040 (January 26, 2006) at 3. Baptist's invocation of *Evans* is unavailing. Unlike the facts in *Evans*, in which a DOE field office provided a whistleblower inaccurate information which led to the whistleblower missing a deadline, there has been no allegation that DOE-ID affirmatively provided Baptist with any incorrect information concerning his complaint.

Baptist's second argument is also unconvincing. Baptist's new allegation is that he suffered retaliation due to CWI-HR's failure to investigate his complaint about retaliation. Baptist raises this allegation now, for the first time in this proceeding. Given the fact that Baptist did not complain of this retaliation at any time during the Part 708 process until responding to the Order to Show Cause, I find that such an allegation can not now be used to excuse non-compliance with the 90-day deadline. Just as importantly, I find that Baptist could not have had any reasonable expectation that his conversation with Anglin, a CWI-HR Benefits Specialist, would trigger a formal (or informal) whistleblower investigation. Baptist avers in a sworn declaration accompanying his response that after the June 4, 2007, meeting, he called Anglin and told her that he had been relieved of his duties and subjected to a hostile work environment and also informed her as to his need for "time off" to get surgery for his hand and arm. Exhibit 1, Baptist Opposition for Summary Judgment (Baptist Affidavit) at ¶ 4. Baptist goes on to describe Anglin's response "so you want to take STD [Short Term Disability]. I can help you with that." Baptist Affidavit at ¶ 4. According to Baptist, Anglin went on to explain about STD and inform him that the STD insurance company was Cigna, and that she would be responsible for providing him the forms needed to file for STD. She also stated that she would help him through the "benefits" process. Baptist Affidavit at ¶ 5. I see no possible way that Baptist could have reasonably interpreted Anglin's response as promising that CWI-HR would conduct an investigation of his whistleblower allegations. Baptist's claim that he was not aware of this retaliation until he sent his Part 851 complaint to DOE-ID on January 10, 2008. *See* note 1 *supra*. Especially telling is that there is no mention of this particular "retaliation" in his complaint. In sum, the fact that Baptist may have verbally informed Anglin of his belief that he had been retaliated against is not good cause to waive the 90-day deadline.

Finally, I do not find that Retaliations Nos. 1-5 can be found to be a part of a hostile work

environment claim.[14] The Supreme Court, in *Meritor Savings Bank, FSB v. Vinson*, 477 U.S. 57 (1986) (*Vinson*), defined a hostile workplace environment for Title VII purposes as one where the workplace is sufficiently permeated with harassment that is sufficiently severe or pervasive to alter the conditions of the victim's employment and create an abusive working environment. *Vinson*, 477 U.S. at 67. Subsequently, the Supreme Court, in *Harris v. Forklift Systems, Inc*., 510 U.S. 17 (1993) (*Harris)* held that the determination as to whether a hostile workplace exists must be made by examining all of the circumstances of a particular case. *Harris*, 510 U.S. at 23. The court went on to give a non-exhaustive list as of factors that could establish a hostile workplace: the frequency of the discriminatory conduct; its severity; whether it is physically threatening or humiliating, or a mere offensive utterance; and whether it unreasonably interferes with an employee's work performance. *Harris*, 510 U.S. at 23. In *Morgan*, the case to which Baptist directs my attention, the U.S. Supreme Court affirmed a Court of Appeals finding that evidence of similar types of negative employment actions, the frequency the actions, and evidence that the actions were perpetrated by the same managers, were sufficient to establish a claim of a hostile work environment. *Morgan*, 536 U.S. at 120-21.

As discussed above, I do not find CWI-HR's failure to investigate to be a retaliation at all. Even if I did, I can not find that Retaliations Nos. 1-5 and the failure to investigate to be related such that a pattern of retaliation exists. Retaliations Nos. 1-5 are discrete acts of retaliation not related to the alleged retaliation for failure to investigate. In the present case, Retaliations Nos. 1-5 are of a totally different type of retaliation from that of the alleged failure to investigate and involved different supervisors and employees. Further, Baptist was on medical leave and not working at his job when the alleged failure to investigate his allegations of retaliation occurred. None of the alleged conduct was physically threatening or humiliating or of a severe or pervasive nature that would raise of hostile work environment claim. Nor can I find any other factual circumstance in this case that would support a finding of a hostile workplace environment. Thus, Baptist has failed to demonstrate an actionable hostile workplace environment claim that would save Retaliations No. 1-5 from dismissal.

B. Retaliation No. 6 - Termination from CWI

In its Motion, CWI argues that there are no disputed material facts concerning Baptist's complaint and that the facts demonstrate as a matter of law that Baptist's protected disclosures could not have been a contributing factor regarding his termination. This argument is based upon three separate grounds. First, CWI argues that Anglin, the CWI official that terminated Baptist, had no actual or constructive knowledge of Baptist's protected disclosures and thus his disclosures could not have been a contributing factor in Anglin's decision to terminate Baptist. Motion for Summary Judgment (Motion) at 8. Second, CWI argues that given the period of time that elapsed from the date of his

[14] Hostile work environment claims, while historically originating in Title VII of Civil Rights Act of 1964, 42 U.S.C. § 2000e *et. seq.*, litigation, have been found to be a cognizable action under Part 708. *Cf. Richard R. Sena*, Case No. VBH-0042 (February 24, 2000) (Part 708 whistleblower complaint alleging constructive discharge by virtue of a hostile work environment).

disclosures, June 2007, to the date of his termination, June 2008, there is no evidence, nor can an inference be made, via temporal proximity, that the protected disclosure was a contributing factor in his termination. Motion at 11. Lastly, CWI argues that Baptist was terminated for failure to comply with the requirements for reinstatement from IES and that it has shown by clear and convincing evidence that it would have terminated Baptist notwithstanding his disclosures. Motion at 9.

1. Anglin's Actual or Constructive Knowledge of Baptist's Protected Conduct

With its Motion, CWI has submitted an affidavit from Debbie Anglin (Anglin), an ICP Benefits Specialist. In the affidavit, Anglin affirms that as the Benefits Specialist for CWI, she supervised and reviewed Baptist's medical disability leave comprising both short- and long-term disability benefits and was responsible for making the decision to terminate his employment because of a failure to comply with the requirements for reinstatement from IES. CWI Motion for Summary Judgment Attachment E (Anglin Affidavit) at ¶¶ 6, 12. In her affidavit, Anglin states that in performing her job responsibilities, she had no contact with Baptist's former supervisors, managers or co-workers regarding his job performance. Anglin Affidavit at ¶ 8. Further, she states that she did not become aware of Baptist's safety concerns and Part 708 complaint until after his termination in June 2008. Anglin Affidavit at ¶¶ 14, 16.

In his response, Baptist has averred in an affidavit that, in fact, he told Anglin of the retaliation he experienced when he contacted her in June 2007. He also points out that several E-mails indicate that Anglin had contact with Baptist's manager and supervisor. *See* SJ Exhibits 9, 10 and 20. Specifically, Anglin had involvement in soliciting CWI's response to a Cigna inquiry that it had no light-duty jobs available for accommodating Baptist. Baptist points out that Anglin, in a deposition, stated that with regard to the Cigna inquiry, she had spoken to Tullock and he informed her that Baptist's organization could not accommodate him with a light-duty position. SJ Exhibit 2 at 46.

Baptist also believes that several E-mails concerning Baptist's request for IES also provide credibility issues with regard to Anglin. These E-mails are "suspicious" because, on an E-mail dated January 9, 2008, to Richard Tullock reminding him that unless Baptist's IES status was approved HR would be forced to place him on time without pay status, there was a handwritten notation "Verbal Jeff Hobbes 1-10-09." SJ Exhibit 17. The date of the notation is one year in advance of the date of the E-mail. Additionally, in an E-mail dated January 10, 2008, from Hobbes approving IES status, there is no mention of the supposed conversation referenced in the prior "Verbal" notation on the E-mail. SJ Exhibit 20.

2. Baptist's Protected Disclosure's Temporal Proximity To His Termination

In its Motion, CWI also argues that the lengthy period of time, 12 months, between Baptist's protected disclosures and his termination does not allow any inference that the termination was a factor in the decision to terminate Baptist. This is especially true since an independent, intervening event, Baptist's failure to establish medical fitness to return to work by the end of his IES period, severs any conceivable connection between the protected disclosures and the termination.

Baptist attempts to rebut CWI's arguments by asserting that there was an "uninterrupted and contiguous" "chain of events" between Baptist's disclosure and his termination. These events are described below:

> 1. On June 4, 2007, when Baptist took medical leave, he had been in the preceding 48 hours removed from his inspection duties, but as of the day he was given medical leave he had not been reassigned to a different set of duties;
> 2. After his surgery in July 2007 and an alleged September 10th end of his family leave, Baptist was assigned to a new unit, but not given any description of what his duties would be;
> 3. In October 2007 he inquired of CWI, via Cigna, about accommodation with job duties not requiring significant lifting but Cigna did not inform him until December or early January that CWI did not offer any such accommodation. On January 7, 2008, his status was changed from STD to LTD/IES;
> 4.On January 10, 2008, Baptist sent his Part 851 complaint to Sellers concerning electrical safety issues and within weeks he was reassigned to another unit with unspecified job duties;
> 5. On March 6, 2008, Baptist filed his whistleblower complaint with DOE-ID;
> 6. From January 2008 through his termination in June 2008, neither Anglin or anyone at else at CWI offered Baptist any assistance in understanding or exercising the policy options for an employee to remain at CWI after the expiration of IES.

Given this chain of events, Baptist argues that a *prima facie* nexus exists between his protected disclosure and his termination in 2008.

3. CWI Would Have Terminated Baptist Notwithstanding His Disclosures

CWI has submitted a copy of its policy regarding IES employees. It states that an employee may be on IES status for a maximum of 12 months and that prior to that period running out must either (1) obtain a medical release to return to his or her former position; (2) obtain a medical release to return to a part-time position with permission of his or her manager; (3) terminate his or her employment by taking an Administrative Leave of Absence; or (4) otherwise terminate his or her employment. Attachment D to Motion at 2; Anglin Affidavit at ¶ 4. CWI has also provided a copy of the IES request form signed by Baptist which explains the requirements for reinstatement. Attachment F to Motion.

Anglin, in her affidavit, states that she was the sole person who reviewed and managed all CWI employees on IES. She managed Baptist's STD and LTD benefits and his IES and was the sole person responsible for managing his IES. Anglin Affidavit at ¶ 6. In this role, she sent Baptist a letter dated November 7, 2007, providing him with a copy of a "Request for Inactive Status" form and explaining the IES process for reinstatement of employment. She received the completed form on January 7, 2008, and processed his request on that same day. Anglin Affidavit at ¶ 6.

In an April 28, 2008 letter, she again explained the procedures required for an employee on IES to reinstate his employment with CWI. Anglin Affidavit at ¶ 8. The CWI policy required that an employee provide the firm with a medical release before his or her IES status expired. She subsequently received a receipt indicating that Baptist had received the letter on April 29, 2008. [15] She goes on to affirm in her affidavit that at no time did she receive a medical release from Baptist authorizing him to return to work. Nor did Baptist obtain an evaluation from the CWI medical dispensary to obtain reinstatement. Anglin Affidavit at ¶ 10. Baptist did not communicate to Anglin any interest in returning to work nor did Baptist seek an Administrative Leave of Absence. Anglin also avers that in several telephone conversations with Baptist, with one such conversation occurring as early as May 2007, he indicated his belief that he would not be returning to work. Because Baptist had not taken any of the required actions to be reinstated from work before his IES status expired on June 5, 2008, Anglin made the decision to process Baptist's termination, which became effective on June 10, 2008. Anglin Affidavit at ¶ 11. Additionally, Anglin stated that the policy of terminating employees whose IES expired had been in effect for at least 10 years before she took this action. She is aware of 10 employees whose IES status expired, and all were terminated. Anglin Affidavit at ¶ 5.

In his response, Baptist does not specifically provide an argument as to CWI's assertion that it would have terminated him notwithstanding his disclosures for failure to comply with company policy regarding IES. Baptist does argue that Anglin's handling of his STD request did not comport with the written policy since Anglin, and not Baptist, went to his supervisors to apply for Baptist's STD. Memorandum in Opposition to Summary Judgment Motion at 8. Baptist also notes that Anglin never discussed the options of returning to work, accommodation or administrative leave with him before terminating him. Memorandum in Opposition to Summary Judgment Motion at 9.

4. Analysis

My review of the evidence and submissions regarding the Motion for Summary Judgment leads me to conclude that the Motion should be granted. As discussed earlier, a Motion for Summary Judgment should only be granted where the available pleadings and affidavits show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law. With regard to CWI's first two arguments, there is sufficient evidence to conclude that there may be disputable factual issues concerning whether Baptist's disclosures were a contributing factor in his subsequent termination. As to CWI's assertion that Anglin did not have any knowledge of Baptist's safety concerns or his belief that he had been retaliated against prior to his termination, I find that there is a potential issue of fact. In his affidavit, Baptist states that when he contacted CWI-HR in June 2007 that he told a CWI-HR representative and Ms. Anglin about the retaliation he was experiencing. Baptist Affidavit at ¶ 4. This presents a factual issue as to whether Anglin had actual knowledge of Baptist's protected disclosures. In light of this evidence, Summary Judgment on this ground would be inappropriate.

CWI also asserts that there could be no causal nexus between Baptist's protected disclosures and his termination since they occurred some 12 months apart.[16] While there does not appear to be any

[15] With its Motion, CWI has provided copies of the letters and requests for IES referenced in Anglin's Deposition.
[16] OHA has held that a period as long as 12 months between a disclosure and an alleged retaliation may be sufficient to

direct connection between the protected disclosure and the "chain of events" suggested by Baptist, these events might create a disputable issue as to whether that CWI management's attention was directed to Baptist and his disclosures between the date of his protected disclosures on June 4, 2007 and his termination on June 10, 2008.

However, with regard to CWI's third argument, I find that there is no issue of material fact concerning CWI's claim that it would have terminated Baptist notwithstanding his protected disclosure. The evidence before me clearly indicates that CWI would have terminated Baptist for failure to follow the procedures for reinstatement from IES. Since CWI has met its burden under 10 C.F.R. § 708.29, the issue of whether Baptist's disclosures were a contributing factor in his dismissal is moot. Consequently I find as a matter of law that CWI, as the contractor, has met it burden with clear and convincing evidence under Part 708 and Summary Judgment should be granted.

As mentioned above with regard to CWI's third argument, my review of the evidence and submissions regarding the Motion for Summary Judgment leads me to conclude that there is no issue of material fact regarding the defense under 10 C.F.R. § 708.29 offered by CWI against Baptist's Part 708 complaint, i.e., that it would have dismissed Baptist notwithstanding his disclosure. Baptist does not dispute that he requested STD status in June 2007. Baptist then submitted a IES request (Request) form signed on December 19, 2007. The Request stated that an employee on IES who wishes to return to work must obtain a written release from his personal physician and then report to the nearest INL medical dispensary for an examination by a company-designated physician. Baptist received a letter from CWI on April 29, 2008, again informing him that if he wished to return to work, he needed to obtain the medical clearances as specified in the Request. CWI has provided copies of these documents for the record. Baptist has not alleged at any time that he tried to comply with the stated requirements of IES. Nor has he alleged that the CWI policy has been capriciously applied to him or that CWI has not applied its IES policy uniformly towards its employees. Baptist failed to comply with the requirements to return to duty after one year of IES and was terminated pursuant to the IES policy. After a period of discovery, Baptist has failed to produce any evidence that would raise an issue of material fact regarding CWI's defense that it would have terminated him notwithstanding his disclosure. As a matter of law, I find that CWI would have dismissed Baptist notwithstanding the protected disclosures he alleges.

None of the alleged factual disputes raised by Baptist affects the material facts described above. Even if I conclude that Anglin had some type of animus against Baptist or was influenced by CWI management, there is no evidence that the CWI IES policy was improperly applied to Baptist. The one example of Anglin's variation from the policy, pointed out by Baptist, actually accommodated his effort to receive STD and provides no evidence as to the CWI's IES policy being applied in a manner prejudicial to Baptist. Further, Baptist has not presented sufficient evidence that would cause Anglin's credibility to become an issue of material fact with regard to the application of IES to all CWI employees.[17]

---

conclude there is not sufficient temporal nexus to support a finding that the disclosure was a contributing factor for the retaliation. *See Donald E. Searle*, TBU-0079 (July 25, 2008).

[17] The issue of whether Baptist told Anglin about his retaliations in June 2007 is not relevant to my finding that CWI has presented sufficient evidence to establish that it would have terminated Baptist notwithstanding his protected disclosures.

III. Summary

As to Retaliation Nos. 1-5 as described in the Report of Investigation regarding the whistleblower complaint filed by Billy Joe Baptist, I find that each of the alleged retaliations is time-barred under 10 C.F.R. § 708.14. Consequently, none of these are actionable under Part 708. With regard to the last remaining retaliation referenced in the Report of Investigation, Retaliation No. 6, I will grant CWI's Motion for Summary Judgment.

It Is Therefore Ordered That:

(1) Retaliations Nos. 1-5 as specified on page 8 of the Report of Investigation concerning Billy Joe Baptist, Case No. TBI-0080, dated December 19, 2008, are hereby dismissed.

(2) The Motion for Summary Judgment filed by CH2M-WG Idaho, LLC on February 18, 2009, Case No. TBZ-0080, regarding Retaliation No. 6, is hereby granted.

(3) The Request for Relief filed by Billy Joe Baptist, Case No. TBH-0080, under 10 C.F.R. Part 708 on December 19, 2008, is hereby denied.

(4) This is an initial agency decision that becomes the final decision of the Department of Energy unless a party files a notice of appeal by the 15th day after receipt of the decision in accordance with 10 C.F.R. § 708.32.

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Initial Agency Decision
Motion to Dismiss

Name of Case: David P. Sanchez

Dates of Filing: October 30, 2009
December 21, 2009

Case Numbers: TBH-0087
TBZ-0087

This Decision will consider a Motion to Dismiss filed by Los Alamos National Laboratory ("LANL" or "the Respondent"). LANL seeks dismissal of a pending complaint filed by David P. Sanchez ("Mr. Sanchez" or "the Complainant") against his employer, Los Alamos National Security, L. L. C. ("LANS"),[1] on October 30, 2009, under the Department of Energy's (DOE) Contractor Employee Protection Program, set for that 10 C.F.R. Part 708. OHA has assigned Mr. Sanchez' hearing request Case No. TBH-0087, and the present Motion to Dismiss Case No. TBZ-0087. For the reasons set forth below, I have determined that Mr. Sanchez' complaint should be dismissed.

I. BACKGROUND

A. The DOE Contractor Employee Protection Program

The DOE's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste and abuse" at DOE's government-owned, contractor-operated facilities. 57 Fed. Reg. 7533 (March 2, 1992). Its primary purpose is to encourage contractor employees to disclose information that they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers.

The Part 708 regulations prohibit retaliation by a DOE contractor against an employee because the employee has engaged in certain protected activity, including "disclosing to a DOE official … information that [the employee] reasonably believes reveals (1) a substantial violation of a law, rule, or regulation; (2) a substantial and specific danger to employees or to public health or

[1] Los Alamos National Security, L.L.C., (LANS) manages and operates Los Alamos National Laboratory (LANL) in Los Alamos, New Mexico, pursuant to a contract with the National Nuclear Security Administration (NNSA), a separately organized agency within the Department of Energy (DOE).

safety; or (3) fraud, gross mismanagement, gross waste of funds, or abuse of authority." 10 C.F.R. § 708.5(a).

Part 708 sets forth the procedures for considering complaints of retaliation. The DOE's Office of Hearings and Appeals (OHA) is responsible for investigating complaints, holding hearings, and considering appeals. 10 C.F.R. Part 708, Subpart C. According to the Part 708 regulations, a complaint must include "a statement specifically describing the alleged retaliation taken against [the complainant] and the disclosure, participation, or refusal that [the complainant believes gave rise to the retaliation." 10 C.F.R. § 708.12.

B. Factual Background

The Complainant is an employee at LANS, the management and operations contractor at LANL in Los Alamos, New Mexico. Mr. Sanchez was assigned to the Quality Assurance Division's Institutional Quality Group (QA-IQ) as a Quality Assurance (QA) Specialist. This position is a "deployed position," which means that he can be deployed by his current organization to other LANL organizations in order to provide support in the QA area. Beginning in January 2008, Mr. Sanchez was deployed as a Senior QA Specialist in the Tech Area (TA)-55 Nuclear Facility. In October 2008, Mr. Sanchez participated in an interview with the DOE Office of Inspector General (OIG) regarding the TA-55 QA program. During this conversation, Mr. Sanchez allegedly disclosed concerns regarding deficiencies in the TA-55 QA program, including health and safety concerns. In November 2008, Mr. Sanchez was transferred from his position within TA-55 back to the QA-IQ.

II. PROCEDURAL HISTORY

On July 15, 2009, Mr. Sanchez filed a complaint under 10 C.F.R. Part 708 with the Employee Concerns Program (ECP) office of the National Nuclear Security Administration (NNSA) in Albuquerque, New Mexico. In his Part 708 complaint, Mr. Sanchez alleged that LANS removed him from his position in TA-55, and took several other negative actions against him, in retaliation for his participation in the DOE OIG interview in October 2008 during which he disclosed nuclear facility non-compliance issues. LANL, on behalf of LANS, maintained that it did not engage in any retaliatory conduct against Mr. Sanchez.

On August 24, 2009, the Complainant requested an investigation followed by a hearing conducted by the DOE Office of Hearings and Appeals (OHA). *See* E-Mail from David P. Sanchez to Michelle Rodriguez de Varela, NNSA ECP, August 24, 2009. OHA received the request on September 2, 2009, and the OHA Director appointed an investigator to the case. The OHA investigator issued a report of investigation (ROI) on October 30, 2009. *See* Report of Investigation, Case No. TBI-0087 (2009). The OHA Director appointed me to serve as Hearing Officer on November 2, 2009.

After consulting with the parties, I scheduled a three-day hearing in this case to occur on January 26, 2010, through January 28, 2010, and informed the parties of the hearing dates by letter dated November 5, 2009. *See* Letter from Diane DeMoura, OHA, to David P. Sanchez and Pablo Prando, LANL, November 5, 2009. In the November 5, 2009, letter I also established a

schedule for the submission of pre-hearing briefs. I requested that, by November 25, 2009, the parties submit briefs identifying (i) any disagreements each party had with the October 30, 2009, ROI and (ii) the names of their respective witnesses and a short description of the subject matter of each witness' testimony. *Id*. In addition, because Mr. Sanchez' complaint consisted primarily of general allegations, I stated the following, "Mr. Sanchez include in his brief the substance of his disclosures to the DOE Inspector General in Fall 2009 in detail and specify why he believes those disclosures fall within the ambit of Part 708. Mr. Sanchez should also specify in detail the alleged retaliations to which he was subjected." *Id*. (emphasis in original). I further requested that Mr. Sanchez "specify in detail" the remedies he sought and include a brief statement regarding why he believed each of the claimed remedies was available under Part 708. *Id*. Finally, I afforded each party the opportunity to submit reply briefs, due ten days after receipt of the initial briefs. *Id*. On November 17, 2009, I granted an extension of time to file briefs. Following the extension, the initial briefs were due on December 4, 2009, and reply briefs were due on December 21, 2009. E-mail from Diane DeMoura, OHA, to David P. Sanchez and Pablo Prando, LANL, November 17, 2009.

The Complainant filed his initial brief on December 2, 2009. *See* E-Mail from David Sanchez to Diane DeMoura, OHA, December 2, 2009 (transmitting Complainant's Initial Brief, November 30, 2009). In his brief, the Complainant failed to respond to each of the requests in my November 5, 2009, letter. Mr. Sanchez described generally his interview with personnel from the DOE OIG, but provided no specifics regarding his disclosures. *See* Complainant's Initial Brief at 2. In addition, Mr. Sanchez did not describe the alleged retaliations to which he was subjected with any level of specificity, despite my request that he do so. In addition, Mr. Sanchez did not specify which remedies he sought under Part 708. Further, although he included a list of potential witnesses in his brief, Mr. Sanchez did not provide a description of the subject matter of their testimony as requested. *Id*. at 3. Mr. Sanchez identified in his brief various documents which he intended to submit as exhibits at the hearing and made a discovery request in which he requested the production of specific documents from LANL. *Id*. at 4.

LANL submitted its initial brief on December 4, 2009, addressing each of the issues identified in the November 5, 2009, letter. *See* Respondent's Initial Brief, December 4, 2009. LANL submitted a reply brief and the instant Motion to Dismiss on December 21, 2009. In the reply brief, LANL noted Mr. Sanchez' failure to comply with my requests for specific statements regarding his protected disclosures, the alleged retaliations, the remedies sought by Mr. Sanchez, and Mr. Sanchez' potential witness list. *Id*. at 1-3. LANL further requested that a discovery order be entered in this case and noted objections to the Complainant's discovery request, namely that some of the sought documents were either already in Mr. Sanchez' possession or not documents created or possessed by LANL. *Id*. at 3. Mr. Sanchez did not submit a reply brief.

Following receipt of the parties' briefs, I issued a letter to the parties on December 22, 2009, in which I addressed various issues raised in the briefs. *See* Letter from Diane DeMoura, OHA, to David P. Sanchez and Philip Kruger, LANL, December 22, 2009. In that letter, I noted Mr. Sanchez' failure to comply with my requests for specific information regarding (1) the substance of his discussion with the DOE OIG; (2) the alleged retaliations to which he was subjected; and, (3) the remedies he sought. I requested that Mr. Sanchez provide this information no later than January 4, 2010, and I noted that failure to comply with my request may result in adverse

findings or dismissal of the complaint, pursuant to 10 C.F.R. 708.28(b)(5). *Id*. at 1-2. In addition, I requested that Mr. Sanchez provide, no later than January 4, 2010, an amended witness list which included a statement regarding the subject matter of each witness' testimony, and I noted that failure to comply with this request may also result in adverse findings or dismissal of the complaint, pursuant to 10 C.F.R. § 708.25(b)(5). *Id*. at 2. Finally, regarding discovery, I noted that certain documents in Mr. Sanchez' discovery request were not LANS/LANL documents and therefore fell outside the scope of my authority to order discovery. As to the remaining documents, I noted that OHA expects parties to amicably resolve discovery matters among themselves to the extent possible. *Id*. at 2.

LANL requested discovery from Mr. Sanchez on December 23, 2009. LANL requested that Mr. Sanchez produce copies of the documents Mr. Sanchez identified in his initial brief as potential exhibits. Email from Philip Kruger, LANL, to David P. Sanchez, December 23, 2009.

On January 5, 2010, I sent an e-mail to the parties confirming our scheduled pre-hearing telephone conference for January 7, 2010. In that email, I again noted that Mr. Sanchez had failed to comply with the requests in my December 22, 2009, letter and I indicated that he must submit the requested information as soon as possible. *See* E-Mail from Diane DeMoura, OHA, to David P. Sanchez and Philip Kruger, LANL, January 5, 2010.

On January 7, 2010, I convened a pre-hearing telephone conference in this case. *See* Record of Pre-Hearing Telephone Conference, January 7, 2010. At that time, I noted that Mr. Sanchez had failed to comply with my requests for specific information regarding his protected disclosures, the alleged retaliations, the sought remedies, and his witness list, which I requested on November 5, 2009, December 22, 2009, and January 5, 2009. *Id*. LANL raised an objection to Mr. Sanchez' failure to comply with my requests. LANL stated that Mr. Sanchez' lack of cooperation was infringing on its due process rights by hindering LANL's ability to prepare for the hearing. We discussed his allegations during the pre-hearing conference and I again requested that Mr. Sanchez submit a detailed written statement with this information as soon as possible following the pre-hearing conference. *Id*. Mr. Sanchez failed to comply with this request.

In addition, during the January 7, 2010, telephone conference, the Complainant expressed some uncertainty during the pre-hearing telephone conference regarding whether the Part 708 process was the appropriate forum for his complaint and whether he wished to proceed with his complaint. Therefore, I instructed Mr. Sanchez to inform me no later than January 12, 2010, whether he wished to proceed with the hearing. *See* E-Mail from Diane DeMoura, OHA, to David P. Sanchez and Philip Kruger, LANL, January 11, 2010. Mr. Sanchez failed to comply with this request. Rather, he requested that this proceeding be held in abeyance for an indefinite period of time until the DOE OIG issued reports which he believed were relevant to this case. *See* E-Mail from David P. Sanchez to Diane DeMoura, OHA, January 12, 2010. I denied Mr. Sanchez' request for an extension and again requested that he inform me no later than January 13, 2010, whether he wished to proceed. When Mr. Sanchez failed to comply with this request on January 13, 2010, LANL renewed its Motion to Dismiss, citing Mr. Sanchez' refusal to provide a written statement regarding his protected disclosures, alleged retaliations, and requested remedies, as well as his refusal to respond to LANL's discovery requests, despite the

fact that the hearing date was rapidly approaching. *See* E-Mail from Philip Kruger, LANL, to Diane DeMoura, OHA, January 13, 2010.

On January 15, 2010, I ordered Mr. Sanchez to provide specific documents in response to LANL's discovery request. *See* Letter from Diane DeMoura, OHA, to David P. Sanchez and Philip Kruger, LANL, January 15, 2010, at 3. In addition, I ordered Mr. Sanchez to provide an updated and complete witness list. *Id*. at 5. I stated that failure by Mr. Sanchez to comply with these orders by January 20, 2010, would result in immediate dismissal of this proceeding. *Id*. at 3, 5. In addition, I scheduled another pre-hearing telephone conference for January 20, 2010. *Id*. at 6.

During the January 20, 2010, pre-hearing telephone conference, Mr. Sanchez reiterated his desire for an extension of time in this case and stated that he was unwilling to proceed on the scheduled hearing date, January 26, 2010. *See* Record of Pre-Hearing Telephone Conference, January 20, 2010. I stated that no extension had been granted in this case and that the parties should be prepared to proceed on January 26, 2010, as scheduled. *Id*. I further reminded Mr. Sanchez that I had ordered him to produce discovery and his witness list by January 20, 2010. At that time, Mr. Sanchez stated that he would not comply with the pending orders, and would not be present at the hearing as scheduled, because he did not yet have the DOE OIG reports which he was awaiting. *Id*. I stressed to Mr. Sanchez that failure to comply with the pending orders and failure to appear at the scheduled hearing were grounds for dismissal of this case. *Id*. Mr. Sanchez stated that he understood, but repeated that he would not comply with the pending orders and would not appear at the hearing as scheduled. *Id*.

III. ANALYSIS

The Part 708 regulations set forth provisions governing the conduct of Part 708 hearings and enumerating the various powers of the Hearing Officer. *See* 10 C.F.R. § 708.28. Among the powers accorded to the Hearing Officer is the authority "upon request of a party or on his or her own initiative, [to] dismiss a claim, defense, or party and make adverse findings upon the failure of a party or the party's representative to comply with a lawful order of the Hearing Officer, or, without good cause, to attend a hearing[.]" 10 C.F.R. § 708.28(b)(5). It is well settled that dismissal of a complaint is "the most severe sanction that we may apply" in Part 708 proceedings and "should be used sparingly." *See Richard L. Urie*, Case No. TBZ-0063 (2007).[2] Consequently, Motions to Dismiss should be granted "only if supported by clear and convincing evidence." *Id*. (internal citations omitted).

In this case, the Complainant has failed to comply with every request and order issued to him. As set forth above, Mr. Sanchez was afforded numerous opportunities to provide the information that is required of him under the Part 708 regulations and which is critical to the conduct of this proceeding. The Complainant's refusal to comply has unduly prejudiced the Respondent's ability to prepare for the hearing. In addition, the Complainant affirmatively stated that, since his request for an abeyance in the proceeding until the DOE OIG issued specific reports was not

[2] Decisions issued by the Office of Hearings and Appeals (OHA) are available on the OHA website located at http://www.oha.doe.gov. The text of a cited decision may be accessed by entering the case number of the decision in the search engine located at http://www.oha.doe.gov/search.htm.

granted, he would not attend the hearing as scheduled. The Complainant's refusal to attend the scheduled hearing renders continuing with this proceeding impracticable.

Based on the foregoing, I find that this proceeding should be dismissed based on the Complainant's lack of cooperation and failure to comply with lawful orders of the Hearing Officer. Specifically, I find that the Complainant (1) has refused to provide specific information regarding his protected disclosures and alleged retaliations, as required under 10 C.F.R. § 708.12, despite my repeated requests; (2) has failed to provide a statement as to his requested remedies, despite my repeated requests; (3) has failed to provide discovery, despite LANL's repeated requests and my January 15, 2010, order; (4) has failed to provide a witness list, despite my repeated requests and January 15, 2010, order; and, (5) has informed me and LANL counsel that he will not be present at the hearing, scheduled for January 26, 2010. The above-enumerated conduct constitutes grounds under 10 C.F.R. § 708.28(b)(5) supporting the dismissal of Mr. Sanchez' Part 708 complaint.

It Is Therefore Ordered That:

(1) The Motion to Dismiss filed by Los Alamos National Laboratory on December 21, 2009, Case No. TBZ-0087, is hereby granted as set forth in paragraph (2) below.

(2) The Complaint filed by David P. Sanchez under 10 C.F.R. Part 708 on October 30, 2009, Case No. TBH-0087, is hereby dismissed.

(3) This is an Initial Agency Decision, which shall become a Final Decision of the Department of Energy unless a party files a notice of appeal by the fifteenth day after the party's receipt of the Initial Agency Decision, in accordance with 10 C.F.R. § 708.32.

Diane DeMoura

DEPARTMENT OF ENERGY

OFFICE OF HEARINGS AND APPEALS

Initial Agency Decision

Name of Case:	Arun K. Dutta
Dates of Filing:	December 4, 2009
Case Number:	TBH-0088

This Decision concerns a Complaint filed by Arun K. Dutta (hereinafter referred to as "Mr. Dutta" or "the Complainant") against Parsons Infrastructure and Technology Group, Inc. (hereinafter referred to as "Parsons" or "the Respondent"), his former employer, under the Department of Energy's (DOE) Contractor Employee Protection Program regulations found at 10 C.F.R. Part 708. At all times relevant to this proceeding, Parsons was a DOE contractor operating in Aiken, South Carolina. It is the Complainant's contention that during his employment with Parsons, he engaged in protected activity and, as a consequence, suffered reprisals by Parsons. Among the remedies that the Complainant seeks are reinstatement, back pay, and reimbursement for legal and other expenses. As discussed below, I have concluded that Mr. Dutta is not entitled to the relief that he seeks.

I. Background

A. Regulatory Background

The DOE established its Contractor Employee Protection Program to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste, and abuse" at DOE's Government-owned or -leased facilities. *See* Criteria and Procedures for DOE Contractor Employee Protection Program, 57 Fed. Reg. 7533 (1992). The Program's primary purpose is to encourage contractor employees to disclose information that they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers. The Part 708 regulations prohibit a DOE contractor from retaliating against its employee because the employee has engaged in certain protected activity, including:

> (a) Disclosing to a DOE official, a member of Congress, . . . [the employee's] employer, or any higher tier contractor, information that [the employee] reasonably believe[s] reveals—
>
> (1) A substantial violation of any law, rule, or regulation;
>
> (2) A substantial and specific danger to employees or to public health or safety; or

(3) Fraud, gross mismanagement, gross waste of funds, or abuse of authority.

57 Fed. Reg. 7541, March 3, 1992, as amended at 65 FR 6319, February 9, 2000, codified at 10 C.F.R. § 708.5.

An employee who believes that he or she has suffered retaliation for making such disclosures may file a complaint with the DOE. It is the burden of the complainant under Part 708 to establish "by a preponderance of the evidence that he or she made a disclosure, participated in a proceeding, or refused to participate, as described under § 708.5, and that such act was a contributing factor in one or more alleged acts of retaliation against the employee by the contractor." 10 C.F.R. § 708.29. If the complainant meets this burden of proof, "the burden shifts to the contractor to prove by clear and convincing evidence that it would have taken the same action without the employee's disclosure, participation, or refusal." *Id.*

B. Factual Background [1]

The following facts are not in dispute. Parsons contracted with the DOE to construct a salt waste processing facility (SWPF) at the DOE's Savannah River Site. An SWPF processes nuclear waste. Mr. Dutta is a mechanical engineer with over 30 years of experience who was hired by Parsons as a Senior Pipe Stress Engineer in March 2007. He was assigned to the Engineering Mechanics Group (EMG). At all times relevant to this proceeding, the EMG was headed by Richard Stegan, P.E. Stegan reported to James Somma, P.E., Engineering and Design Manager for the SWPF. In the summer of 2007, the Complainant was assigned to work on two specifications, numbered 11818 and 11819. Specification 11818 detailed seismic qualification criteria for PC-3 vessels, and 11819 set forth seismic qualification criteria for PC-1 and PC-2 vessels. These documents had already been submitted for IDR review, and it was Mr. Dutta's job to review, and make a preliminary disposition

---

1/ The following terms will be used throughout this Decision.

- *Specification*: a document requiring that certain equipment meets statutory and regulatory safety requirements.
- *PC-1, PC-2, and PC-3*: classes of seismic regulatory requirements. PC-1 and PC-2 are very similar, while PC-3 is more stringent.
- *LDE*: Lead discipline engineer.
- *IDR Process*: (inter-disciplinary review): a review process for specifications and other documents. An engineer drafts or "initiates" a specification and sends it to a reviewer. If the reviewer "signs off" on the document, it is then sent to the IDR committee, along with an IDR form. The IDR committee returns comments on the form, and the initiator resolves the comments. The reviewer, the LDE, and the Engineering and Design Manager then review the form, and if they all sign off, the specification is then submitted to the document control system (DCS) operator, who verifies the signatures and dates on the specification and on the IDR form, and enters the data into the document control system.
- *Condition Report (CR)*: A pre-printed form that an initiator uses to identify issues and provide recommendations. An evaluator signs off on it, beginning an action plan. The last step verifies the action.
- *Job Shopper*: A contractor employee.

of, the IDR committee's comments. Mr. Dutta performed this duty, and then gave the specifications to Mr. Stegan, the LDE, for his review. However, instead of approving these documents and forwarding them to Mr. Somma, Mr. Stegan cancelled specification 11818 and assigned another engineer, Anthony Edwards, to revise specification 11819. Mr. Edwards incorporated elements from specification 11818, revised the specification given to him, and submitted the finished product, specification 11819, rev. 0, to Mr. Stegan. Stegan forwarded the specification to Mr. Somma, Somma approved it, and on October 31, 2007, specification 11819, rev. 0, was entered into Parsons' DCS.

In a letter to David Amerine, Senior Vice President/Project Manager, SWPF, dated November 13, 2007, the Complainant alleged that "an inferior quality document [the revised specification 11819, rev. 0] was slipped into our Document Control system using fraudulent means." Complainant's Exhibit (Comp. Ex.) 11. He further alleged that specification 11819, rev. 0 did not go through the IDR process, but was instead improperly substituted for specification 11819, which the Complainant worked on, and which did go through IDR. The IDR form that originally accompanied specification 11819 was passed on with specification 11819, rev. 0. "This is," the Complainant claimed, "a case of an intentional falsification of [a] safety document since these specs deal with design requirements for safety-related equipment." *Id.* Mr. Amerine said that it looked as if Mr. Dutta had identified a problem and that it should be fixed. He gave the letter to Mr. Somma.

In November 2007, the Respondent began a process that resulted in the EMG group being divided into two groups: the vessel design group, which would remain under the supervision of Mr. Stegan, and the pipe stress group, under the management of Calvin Hughes. This division became official as of January 2008. Mr. Dutta was placed in the pipe stress group.

On January 3, 2008, Mr. Somma met with Mr. Dutta, Mr. Stegan, and Mr. Edwards to discuss the Complainant's allegations. During the meeting, Mr. Somma suggested that Mr. Dutta initiate a CR, and the Complainant did so.

In November 2008, the Complainant discussed his concern with Mr. Hughes that, although design of the SWPF was 90% complete, the pipe support design had not been completed. On January 15, 2009, Parsons terminated the Complainant's employment.

C. Procedural Background

On April 6, 2009, Mr. Dutta filed a Part 708 Complaint with the Director of the DOE's Office of Civil Rights at the Department of Energy's Savannah River Operations Office. Parsons filed a response to this complaint. The Savannah River Employee Concerns Program attempted to mediate the Complaint on August 13, 2009, but those efforts failed. Mr. Dutta requested that his Complaint be forwarded to the Office of Hearings and Appeals (OHA) for an investigation and hearing. The Director forwarded the Complaint to OHA on October 7, 2009, and the OHA Director appointed an investigator. The OHA investigator interviewed Mr. Dutta and other current and past Parsons employees and contractor employees and reviewed a large number of documents before issuing a Report of Investigation (ROI) on December 4, 2009.

On that same day, the OHA Director appointed me as the Hearing Officer in this case. I conducted a three-day hearing in this case in Aiken, South Carolina, beginning on March 2, 2010. Because one of the Complainant's witnesses was unavailable during this period, his testimony was heard by video

teleconferencing on May 14, 2010. [2] Over the course of the hearing, 14 witnesses testified. The Complainant introduced 47 exhibits into the record, and the Respondent introduced 68 exhibits. On May 28, 2010, the Respondent and the Complainant submitted written closing arguments, at which time I closed the record in the case.

D. Mr. Dutta's Complaint and the Report of Investigation

Mr. Dutta alleges in his Complaint that he made two protected disclosures during his tenure with Parsons. First, he alleges that specification 11819, rev. 0 (the document prepared by Mr. Edwards), was entered into Parsons' DCS without first being subjected to IDR. According to Mr. Dutta, this action was fraudulent in that it involved taking the specification number and IDR form for a document that had gone through IDR, and applying them to a document that had not gone through that process. He further alleged that the action was a violation of the SWPF Project Procedure No. PP-EN-5006, Rev. 6, which sets forth Parsons' rules governing the IDR process. Respondent's Exhibit (Resp. Ex.) 4. According to Mr. Dutta, this also represented a substantial and specific danger to employees or to public health and safety. Second, the Complainant raised his concerns that, although the design of the SWPF had reached 90% completion, the piping support design had not yet been completed. He alleged that completing the piping support design during the construction phase of the project, as was planned by Parsons, constituted "a substantial violation of a law, rule, or regulation," "a substantial and specific danger to employees or to public health and safety," and "gross mismanagement" and a "gross waste of funds."

In retaliation for making these disclosures, Mr. Dutta alleges, the Respondent transferred him in January 2008 to the pipe stress group, after which he claimed to have received "no responsible task[s]," Comp. Ex. 11, and terminated his employment on January 15, 2009. As relief for these alleged retaliations, the Complainant requests reinstatement, back pay, compensation for loss of medical and other benefits and reimbursement of legal expenses. *Id.*

After reviewing this Complaint, interviewing Mr. Dutta and 10 other current and former employees and examining a large number of documents, the OHA investigator concluded that, regarding his first disclosure, "the evidence suggests that Mr. Dutta reasonably believed that he disclosed a substantial violation of a law, rule, or regulation." ROI at 17. The ROI further concluded that the evidence was not clear as to whether the Complainant's second disclosure revealed a substantial violation of a law, rule, or regulation, a substantial and specific danger to public health and safety, or a gross waste of funds. *Id.* The investigator also observed that Parsons apparently did have knowledge of the disclosures.

II. Analysis

As stated in Section I.A above, in order to prevail in a Part 708 proceeding, an employee must show, by a preponderance of the evidence, that he made a protected disclosure or engaged in protected behavior, and that this was a contributing factor to one or more alleged acts of retaliation by the contractor against the employee. For the reasons set forth below, I find that Mr. Dutta made two

---

2/ Citations to the transcript of the testimony that was taken from March 2 though March 4, 2010, will be abbreviated as "Tr." Citations to the supplemental transcript of the testimony of XXXXXXXXX that was taken on May 14, 2010, will be abbreviated as "Sup. Tr."

protected disclosures, and that the second disclosure was a contributing factor in his termination. However, because Parsons would have taken the same action in the absence of any disclosures, I conclude that Mr. Dutta is not entitled to the compensation that he seeks.

A. The Protected Disclosures

As previously discussed, an employee of a DOE contractor makes a protected disclosure when he or she reveals to that employer, a higher-tier contractor, a DOE official, a member of Congress, or any other government official with oversight authority at a DOE site, information that the employee reasonably believes reveals (i) a substantial violation of a law, rule or regulation; (ii) a substantial and specific danger to employees or to public health or safety; or (iii) fraud, gross mismanagement, gross waste of funds, or abuse of authority. 10 C.F.R. § 708.5(a). The test of "reasonableness" is an objective one, *i.e.,* whether a reasonable person in the Complainant's position, with his level of experience, could believe that his disclosure met any of the three criteria set forth above. *Frank E. Isbill*, Case No. VWA-0034 (1999).

1. Parsons' Failure To Send The Revised Specification 11819, Rev. 0 Through IDR

It is undisputed that the Complainant made this disclosure to SWPF Project Manager David Amerine in a letter dated November 13, 2007. Consequently, the issue to be decided is whether Mr. Dutta reasonably believed that this constituted (i) a substantial violation of any law, rule, or regulation, (ii) a substantial and specific danger to employees or to public health or safety, or (iii) fraud, gross mismanagement, gross waste of funds, or abuse of authority. The Complainant contends that all three criteria apply to this disclosure. Because I conclude that a reasonable person in Mr. Dutta's position, with his level of experience, could have believed that Parson's failure to send the revised document through IDR violated the company's Procedure No. PP-EN-5006, Rev. 6 (IDR rules), I need not decide whether the Respondent's action was fraudulent or constituted a substantial and specific danger to employees or to public health and safety.

Parsons argues that, under section 6, paragraph 4(b) of its IDR rules, Mr. Stegan, as LDE, did not need to submit specification 11819, rev. 0, for IDR. That paragraph states, in pertinent part, that "If the LDE determines that changes to the document are significant, the documents shall be rechecked in accordance with PP-EN-5005 and an additional IDR be performed in accordance with this PP." Resp. Ex. 4 at pg. RES 05297. The implication that Parsons wishes me to draw from this provision is that if the LDE determines that the changes to the document are not significant, an additional IDR need not be performed. At the hearing, Stegan testified to that effect, stating that he did not resubmit the revised specification for IDR because "there was not a substantial technical change made to that document." Tr. at 533-534. The Respondent contends that I should not substitute my judgement as to whether the document should have been submitted for IDR for that of a trained professional such as Mr. Stegan.

I agree. However, the relevant question is not whether Parsons' IDR rules required Stegan to submit the document in question for IDR, it is whether Dutta *could reasonably have believed* that the rules required Stegan to do so. I find that such a belief was reasonable.

Contrary to Parsons' contentions, the wording of the IDR rules does not preclude this finding. Section 2.0 of the rules states that the IDR requirements are applicable "to all SWPF design and technical output documentation such as drawings, specifications, and other technical design documents, with the exception of . . . design calculations." Resp. Ex. 4 at pg. RES 05292. Section

6, paragraph 4 of the IDR rules sets forth the LDE's duties after the document has gone through IDR. Paragraph 4(a) states, in pertinent part, that the LDE shall "Review and disposition all comments identified on the Comment Review Form . . . and coordinate all proposed responses and document changes with the reviewer(s). The LDE is responsible for getting the reviewers' concurrence to proposed responses and document changes." *Id.* at RES 05297. The "document changes" referred to could reasonably be interpreted as being changes made in response to comments on the Comment Review Form. Therefore, the LDE's implied discretion in paragraph 4(b) to not send a revised document back through IDR could reasonably be interpreted as applying to revisions made in response to those comments, and not to revisions made by the LDE.

Moreover, even if the LDE's discretion under paragraph 4(b) does extend to documents that were changed at his request, the Complainant could reasonably have concluded that those changes were sufficiently significant to require re-submission for IDR. As previously stated, Stegan testified that he did not submit the revised specification for IDR because there were no "substantial *technical* change[s]." Tr. at 534 (Italics added). However, paragraph 4(b) does not refer to technical changes, but only to significant changes, implying that the changes need not be technical in nature to require an additional IDR. The revised specification was essentially a combination of two earlier specifications, and included over four pages worth of changes from the previous iteration of specification 11819, including changes to the Quality Assurance requirements in the specification. Comp. Ex. 17. Mr. Dutta could reasonably have believed that those changes were significant enough to have required Mr. Stegan to resubmit specification 11819, rev. 0 for IDR.

2. Parsons' Failure To Complete The Pipe Support Design Before The Construction Phase Of The SWPF

Mr. Dutta's second alleged disclosure is that Parsons did not complete the piping support design for the SWPF before the construction phase of the SWPF project. Some explanation of this allegation is necessary.

As described by Mr. Stegan during his testimony, the SWPF project was to proceed in three phases. The first phase was the design phase. During this phase, a "conceptual design" was created, which establishes an overall scope, or framework, of the project. Tr. at 508. The second was the detailed design phase, which included the creation of the actual design document specifications, the data sheets, the calculations, and the drawings. *Id.* In phase three, the actual construction was to take place. Equipment is purchased, and once construction is completed, individual systems are tested to make sure that they are functioning in accordance with the design documents. *Id.*

According to the Complainant, the design and location of the pipe supports should have been completed concurrently with the pipe stress calculations, before the beginning of phase three. This is because, Mr. Dutta claims, the accuracy of the stress calculations depended in part on knowing where the supports would be placed. Proceeding according to Parsons' plans, he contends, would mean that the stress calculations would likely have to be redone after the piping support design had been completed, at the cost of a great deal of wasted time and effort. This would, he alleges, constitute a gross waste of funds. Tr. at 82. The Complainant testified that he made this second disclosure to Mr. Hughes and to Mr. Somma in November of 2008, prior to Parsons entering into phase three of the SWPF construction in December 2008. Tr. at 174. Mr. Hughes confirmed that the Complainant raised this issue with him. Tr. at 739.

Parsons argues that Mr. Dutta could not have had a reasonable belief that its failure to complete the pipe support design before entering into the construction phase constituted a gross waste of funds. As an initial matter, Mr. Hughes testified that it was not necessary to do pipe support work concurrently with pipe stress work, and that it was "pretty much a typical industry standard" that some design work be completed during the construction phase of a project of this kind. Tr. at 737. Furthermore, Hughes testified that the DOE had been informed that pipe support design would be completed during phase three, Tr. at 739, Resp. Ex. 15, and SWPF Project Manager Robert Breor testified that the DOE approved the inception of phase three after having received that information. Tr. at 662; Resp. Ex. 30 and 31.

Nevertheless, I find that the Complainant reasonably believed that Parsons' failure to complete the pipe support design prior to phase three would result in a gross waste of funds. Mr. Dutta's testimony in this regard is amply supported by that of XXXXXXXX, and two of the Respondent's witnesses, Mr. Breor and Ted Niedbalski. XXXXXX, who worked in the pipe stress group with Mr. Dutta at Parsons, and who testified that he has more than 25 years of pipe stress experience, indicated that stress calculations were affected by pipe support design, and that it was very important that the two be done concurrently. Sup. Tr. at 28. Mr. Breor testified that Parsons had to rehire some pipe stress analysts that it had laid off in January 2009 because of design changes, Tr. at 674, and that some of those changes might have been avoided if the support work had been done concurrently with the pipe stress analysis. Tr. at 677. Mr. Niedbalski, who has over 40 years of pipe stress and support experience, served as the "lead" for the pipe stress group during Mr. Dutta's tenure with Parsons. He testified that the support design has to be completed before construction. Tr. at 813. Furthermore, Mr. Dutta's testimony indicates that, at the time of his disclosure, he was not aware of any agreement between Parsons and the DOE about the timing of the completion of the pipe support design. Tr. at 232-237. Thus, the evidence supports the conclusion that the Complainant's belief was reasonable.

B. The Alleged Retaliations

In order to prevail, the Complainant must next demonstrate, by a preponderance of the evidence, that his protected disclosures were a contributing factor to one or more alleged acts of retaliation taken against him by Parsons. Under the Part 708 regulations, "retaliation" means "an action (including intimidation, threats, restraint, coercion or similar action) taken by a contractor against an employee with respect to the employee's compensation, terms, conditions or privileges of employment as a result of the employee's disclosure of information" or participation in protected conduct as described in 10 C.F.R. § 708.5.

Mr. Dutta alleges two instances of retaliation. First, he claims that his assignment to the pipe stress group, under the supervision of Mr. Hughes, was in retaliation for his first protected disclosure, which he made in his November 13, 2007 letter to Mr. Amerine. While working under Mr. Hughes, he indicated, he was not given work that was commensurate with his abilities and level of experience. Tr. at 268-269. The second alleged retaliation was his termination in January 2009.

In determining whether protected disclosures were a contributing factor to allegedly retaliatory acts, OHA Hearing Officers have noted that there is rarely a "smoking gun" that establishes such a nexus. *See, e.g., Ronald Sorri*, Case No. LWA-0001 (1993). Consequently, we have consistently held that retaliatory intent can be established through circumstantial evidence. Specifically, a Complainant can demonstrate that a protected disclosure was a contributing factor to an alleged retaliatory act if

he can show that the acting official had actual or constructive knowledge of the protected disclosure, and acted within such a period of time that a reasonable person could conclude that the disclosure was a factor in the personnel action. *Id.* Since there is no direct evidence of retaliation in the record, Mr. Dutta must demonstrate that the Parsons employees responsible for the alleged retaliatory acts had actual or constructive knowledge of Dutta's protected disclosures, and must also show temporal proximity between the disclosures and the retaliation.

1. The Complainant's Assignment To The Pipe Stress Group

Mr. Dutta testified that after his November 13, 2007 letter to David Amerine, he was transferred to the pipe stress group "at the end of December or [early] January," and that, whereas under Stegan the Complainant was involved in the designing of pressure vessels, checking vessel design calculations, and writing specifications, after his assignment to the pipe stress group, Hughes assigned Mr. Dutta pipe stress calculations, and little else. Tr. at 88, 107-109. In his statement to the OHA Investigator, he further alleged that Hughes "ignored" him and never discussed his assignments with him. Resp. Ex. 53.

A preponderance of the evidence indicates that the Complainant's November 13, 2007 disclosure to Mr. Amerine was not a contributing factor to this re-assignment and to Mr. Hughes' subsequent treatment of the Complainant. According to Mr. Stegan, he and Mr. Somma made the decision as to whom to place in the pipe stress group and whom to place in the vessel design group. Tr. at 558. However, it appears that Mr. Somma essentially delegated this task to Stegan. Tr. at 961. Mr. Stegan further indicated that, although Mr. Dutta's re-assignment was not formalized until February 2008, Tr. at 555, he made the decision to place the Complainant in Hughes' pipe stress group sometime in October 2007. Tr. at 557-558, 566. This testimony is amply supported by Respondent's Exhibits 16 and 32.

Respondent's Exhibit 16 consists of three e-mails, two of which were authored by Mr. Stegan. The first of Mr. Stegan's e-mails, dated November 2, 2007, is addressed to 15 employees, including Mr. Dutta, and concerns the subject "Near-Term Deadlines and Commitments - *Piping Stress*" (italics added). Stegan testified that he wrote this e-mail to identify the near-term activities that the pipe stress group needed to perform, Tr. at 559, and that he had identified the individuals to whom the e-mail was sent, for the most part, as being the employees who would serve in the pipe stress group. Tr. at 560. Mr. Hughes was copied on that e-mail because, Stegan testified, according to the plan that was "in place . . . he would be taking over supervisory responsibilities for the pipe stress group." Tr. at 559. Mr. Stegan's second e-mail, dated November 14, 2010, was on the subject of "Near Term Actions - Vessels," and was addressed to eight employees whom Stegan saw as serving in the vessel design group. Mr. Dutta was not a recipient of this e-mail.

Respondent's Exhibit 32 is a print-out from Parsons' time card entry tracking system. Using this document, Mr. Stegan was able to track all of the Complainant's time that had been charged to the vessel design group and all the time that was charged to the pipe stress group. According to this Exhibit, the last time that Mr. Dutta did any work that was charged to the vessel design group was during the week ending October 12, 2007, more than one month prior to his November 13 letter to Mr. Amerine. Since Stegan made the decision to place Mr. Dutta in the pipe stress group before November 13, 2007, Dutta's protected disclosure on that date could not have been a contributing factor to this personnel action.

Regarding Mr. Hughes' alleged treatment of the Complainant, there is no evidence in the record that Mr. Hughes had actual or constructive knowledge of the Complainant's first disclosure until after he had filed the Complaint at issue here. Mr. Dutta was not reporting to Hughes, either directly or indirectly, at the time of the disclosure. There is no evidence that Stegan or Somma informed Hughes of the disclosure, or that it was widely known at Parsons that Mr. Dutta had made a protected disclosure or initiated a CR. In fact, Mr. Somma testified that he did not discuss the CR with Mr. Hughes prior to it being resolved, Tr. at 1042, and Mr. Hughes testified that he did not know that the Complainant had initiated a CR until after the Complaint had been filed. Tr. at 745. Consequently, I cannot conclude that Mr. Dutta's first disclosure was a contributing factor to Hughes' alleged ignoring of the Complainant or his assigning tasks to the Complainant that Mr. Dutta believed to be not commensurate with his skills and experience.

2. The Complainant's Termination

The Complainant's employment with Parsons was terminated on January 15, 2009. Mr. Somma made the decision to lay off the Complainant, with input from Mr. Hughes and Mr. Niedbalski. Tr. at 664, 743, 1038. As previously explained, if the Complainant can demonstrate that either of his disclosures was a contributing factor to his termination, Parsons must then demonstrate, by clear and convincing evidence, that it would have laid off Mr. Dutta even in the absence of any protected disclosures. For the reasons set forth below, I find that the Complainant's second disclosure was a contributing factor to Parson's decision to terminate his employment. I therefore need not consider whether the Complainant's first disclosure, which occurred 14 months prior to the termination, was a contributing factor.

As an initial matter, it is evident that Mr. Somma had either actual or constructive knowledge of Mr. Dutta's disclosure regarding the timing of the pipe support work. During his interview with the DOE Investigator, the Complainant said that he raised this issue in August or September 2008 at the weekly status meetings that Mr. Hughes had with the pipe stress group. Resp. Ex 56. Mr. Somma attended these meetings. Tr. at 962. Mr. Dutta also told the Investigator that he went to Mr. Somma's office in October or early November 2008 to discuss his concern. Resp. Ex. 56. At the hearing, the Complainant testified that he raised the issue "a couple of times, maybe" in status meetings in June or July, and in one-on-one encounters with Somma and Hughes in November. Tr. at 174. Mr. Hughes and Mr. Somma both testified that they have no recollection of the Complainant raising the issue during the status meetings. Tr. at 722; 1084. However, Hughes admitted that Dutta discussed the matter with him in his office, Tr. at 723, and Parsons presented no evidence to refute the Complainant's claim that he discussed this disclosure with Mr. Somma in his office.

Moreover, even if Mr. Somma did not have actual knowledge of this protected disclosure, it is clear that he had constructive knowledge of it. In previous cases, OHA Hearing Officers have held that a Complainant can establish constructive knowledge by showing that the person taking the alleged retaliatory action was influenced by the negative opinions of those with knowledge of the protected conduct. *See, e.g., Jagdish Laul*, Case No. VBH-0010 (2000). In this case, Mr. Somma compiled a list of eight employees in the pipe stress group, and a rating of those employees' skills in six areas that Somma and his managers believed to be important. Mr. Somma consulted with Mr. Hughes in rating the employees in the six skill areas. Tr. at 1038. Hughes believed that Mr. Dutta's performance was "below average" as compared to the rest of the pipe stress group. Tr. at 744. The Complainant's cumulative score in the six skill areas was the lowest of the employees ranked. Furthermore, this

November 2008 disclosure was sufficiently close in time to the January 2009 termination such that a reasonable person could conclude that the disclosure was a contributing factor to the termination.

C. Whether Parsons Would Have Terminated The Complainant's Employment In The Absence Of His Protected Disclosures

Section 708.29 states that once a complaining employee has met the burden of demonstrating that conduct protected under § 708.5 was a contributing factor in the contractor's retaliation, "the burden shifts to the contractor to prove by clear and convincing evidence that it would have taken the same action without the employee's disclosure, participation, or refusal." 10 C.F.R. § 708.29. "Clear and convincing evidence" requires a degree of persuasion higher than preponderance of the evidence, but less than "beyond a reasonable doubt." *See Casey von Bargen*, Case No. TBH-0034 (2007). If the contractor meets this heavy burden, the allegation of retaliation for whistleblowing is defeated despite evidence that the retaliation may have been in response to the complainant's protected conduct.

It is well settled that several factors may be considered in determining whether an employer has shown, by clear and convincing evidence, that it would have taken the alleged act of retaliation against a whistleblower in the absence of the whistleblower's protected conduct. The Federal Circuit, in cases interpreting the federal Whistleblower Protection Act (WPA), upon which Part 708 is modeled, has identified several factors that may be considered, including "(1) the strength of the [employer's] reason for the personnel action excluding the whistleblowing, (2) the strength of any motive to retaliate for the whistleblowing, and (3) any evidence of similar action against similarly situated employees for the non-whistleblowing aspect alone." *Kalil v. Dep't of Agriculture*, 479 F.3d 821, 824 (Fed. Cir. 2007) (*citing Greenspan v. Dep't of Veterans Affairs*, 464 F.3d 1297, 1303 (Fed. Cir. 2006)).

1. The Strength Of Parsons' Stated Reasons For Terminating Mr. Dutta's Employment

It is essentially undisputed that after the SWPF project moved from the design stages into the construction stages, layoffs of substantial numbers of Parsons employees and contractors who were involved in design-related activities were necessary. Mr. Breor testified that a Reduction in Force (RIF) was necessary because Parsons was only given limited funds to complete the project and needed to stay within budget. He added that the RIFs in December 2008 and January 2009 affected employees throughout the company. Tr. at 663. According to Mr. Hughes, 17 of the 22 employees in the pipe stress group were terminated, with 14 being RIFed in December 2008 and the remaining three, including the Complainant, leaving in January 2009. Tr. at 741-742. Mr. Somma testified that the RIFs were needed at the onset of the construction phase because Parsons would be shifting into construction support activity. Tr. at 1029. It is also undisputed that layoffs are common in projects of this type. XXXXXX testified to that effect, Sup. Tr. at 37, and Mr. Dutta testified that he himself had been laid off at least six times over the course of his career as a mechanical engineer. Tr. at 188.

Mr. Dutta claims, however, that the circumstances surrounding this RIF suggest that he was terminated because of his protected disclosures. He specifically argues that he was more qualified than some of the five pipe stress analysts who were retained, and that the fact that he, a Parsons employee, was fired while job shoppers were retained is evidence of retaliatory intent.

In assessing the validity of these claims, it is useful to examine the manner in which the five employees who were retained were selected from the eight pipe stress engineers left after the

December 2008 RIF. The record indicates that the Parsons employees involved in these determinations were, in descending order of importance, Mr. Somma, Mr. Hughes, and Mr. Niedbalski.

Mr. Somma testified that, over the course of the prior year, he would attend meetings, review documents and discuss personnel with the project "leads" to determine who the best performers were, with the knowledge that he would have to terminate employees at the beginning of the construction phase. Tr. at 1032. After gathering this information, Somma prepared a Group Assessment Summary. Tr. at 1032; Resp. Ex. 12, p. 05375. This summary consisted of the names of the eight remaining engineers in Hughes' pipe stress group, and ratings of each engineer in five separate skill areas. [3] Somma arrived at these skill areas after talking with some of his managers and their "leads" about "the skill set that we needed to bring into the next phase of the project." Tr. at 1033. Each engineer received a rating of between 1 and 5 for each skill area. A rating of "1" denoted "minimal to no skills" in that area, a rating of "3" meant that the individual had "marginal skills," and a "5" meant that the engineer "meets future needs" in that particular area. The Complainant had the lowest cumulative score of the eight engineers. Of the two next lowest-scoring engineers, XXXXXX was scheduled to be laid off but found another job with Parsons outside of the pipe stress group and XXXXXXXX, who was also a Parsons employee, was also terminated.

Mr. Dutta challenges the validity of this summary. Specifically, he claims that his low rating in that document is inconsistent with his February 2008 performance evaluation. In that evaluation, the Complainant received an overall rating of "Meets Expectations," and received that same rating in six of the seven performance categories for which he was evaluated. In the seventh category, "Quality Work, Technical Competence/Job Knowledge," he received a higher rating of "Very Good." Comp. Ex. 10.

I do not agree with the Complainant that an inconsistency exists. Mr. Dutta had only been working in Mr. Hughes' pipe stress group for approximately one month when the performance evaluation was issued. It therefore appears that Mr. Stegan was evaluating the Complainant based primarily on his work prior to that re-assignment. As previously stated, Mr Dutta testified that when he worked under Stegan, he was largely engaged in writing specifications, designing pressure vessels, and checking vessel design calculations. Tr. at 107-109. However, Somma's assessment of Mr. Dutta was based, at least in part, on input from Mr. Hughes and Mr. Niedbalski based on work that was done after the Complainant joined the pipe stress group. According to Mr. Dutta, that work consisted primarily of pipe stress calculations. As the performance evaluation and Mr. Somma's ranking of the Complainant were based on Mr. Dutta's performance in different kinds of work, I see no inconsistency between the two.

3/ These skill areas are (1) Safety Conscious Work Environment (the ability to work safely each day, understand the hazards associated with work prior to performance, and to raise all safety issues to management for appropriate actions), (2) Discipline Knowledge, Skills and Abilities, (3) CADD (PDS model or 2D) and/or software skills (as appropriate), (4) Multi-discipline versatility, (5) Real-time design and field support solutions-oriented resolution attitude and capability. There was a sixth skill area, "Specialized Skills or Knowledge." However, only one of the eight analysts received a rating in this area.

Mr. Dutta also testified that he was more highly qualified than at least three of the five pipe stress analysts who were retained. Tr. at 155-158. He contended that he should have been kept over Alan Helton because Helton reviewed and approved allegedly faulty pipe stress calculations that were performed by DMJM, a contractor that Parsons retained to assist with pipe stress calculations. In a November 24, 2008, e-mail from XXXXX to Mr. Hughes, XXXX complained that one of the DMJM calculations approved by Helton was "faulty," and would result in "unrealistic loads," or stresses, for the pipes involved. Comp. Ex. 47.

However, it appears that Mr. Helton was aware of this issue and accounted for it prior to approving the calculation in question. In a May 27, 2008, e-mail to Hughes, Helton said that "After reviewing the first two calcs [including the one in question], I've noticed high loads . . ." Comp. Ex. 47. He went on to recommend that four measures be taken "before finalizing supports for these calcs." *Id.* Mr. Hughes testified that there was no more of a problem with the quality of DMJM's calculations than there was with any of their other engineers. Tr. at 766. He added that the measures suggested by Mr. Helton were "issues . . . that we had to go back and review again" in order to address XXXXX concerns. Tr. at 769. Mr. Helton had the highest cumulative score in Mr. Somma's ranking of the eight remaining pipe stress engineers. Resp. Ex. 12. Based on the information before me, I cannot conclude that Parsons' would have retained Mr. Dutta instead of Mr. Helton in the absence of Mr. Dutta's protected disclosures.

The Complainant also testified that he was far more experienced than Jihad Al-Soudi and Charles Abbot, two other engineers whom the Respondent retained. While it is true that Mr. Dutta had over 30 years of experience in mechanical engineering and pipe stress analysis, while Mr. Abbot had 2 years' experience and Mr. Al-Soudi, 10 years, Parsons could reasonably have considered factors other than the relative experience of the pipe stress engineers in deciding whom to lay off and whom to retain.

For example, Mr. Hughes testified that the Complainant was not able to complete as many calculations during his tenure with Parsons as other engineers in the pipe stress group. Tr. at 729. Respondent's Exhibit 21 is a listing of calculations done by analysts in the pipe stress group from the date that the analyst began working for the Respondent through January 15, 2009. It shows that although Mr. Abbot joined Parsons almost one year after the Complainant, and Mr. Al-Soudi's tenure started approximately one month later than Mr. Dutta's, Mr. Abbot completed 26 calculations and Mr. Al-Soudi completed 37 calculations, while the Complainant completed 11 calculations during his 22 months at Parsons. Resp. Ex. 21.

Mr. Dutta attempted to address this apparent disparity by presenting evidence that the calculations assigned to him were more complicated than those assigned to Mr. Al-Soudi and Mr. Abbott. Specifically, he testified that he was performing PC-3 calculations, "which require[] a dynamic analysis," Tr. at 166, while Abbott and Al-Soudi were doing mostly PC-1 calculations. Tr. at 166-167. XXXXX also testified that Mr. Dutta did PC-3 calculations, and that these took longer to do than PC-1 calculations. Sup. Tr. at 15. He added that, as a result of his duties as a "checker," he had an opportunity to evaluate the work of almost all of the other pipe stress analysts in Mr. Hughes' group, and that the Complainant was "far better than the other guys." Sup. Tr. at 10.

There is other testimony in the record indicating, however, that Mr. Dutta's calculations were not more difficult than those performed by other pipe stress engineers, and that he was an average, or

below average, performer. As a "lead" for the pipe stress group, Mr. Niedbalski assigned work and provided technical guidance for the group. Tr. at 791. He testified that he assigned calculations to the Complainant and the other engineers on a random basis, and that most of them did both PC-1 and PC-3 calculations. Tr. at 794. He stated that PC-1 calculations were not easier than PC-3 calculations, nor did they take a shorter amount of time to perform. Tr. at 803. He added that, while PC-3 calculations did involve dynamic analysis, this did not make them more complicated. In fact, he said that, "Once it's set up, it's easier to do a dynamic [analysis] than it is a static [analysis]." Tr. at 804. PC-1 calculations involve static analysis. Regarding the quality of Mr. Dutta's technical skills and of his work in the pipe stress group, Mr. Niedbalski characterized them both as being "average," but said that the number of calculations that he produced was "below average." Tr. at 795.

Mr. Hughes testified that Mr. Dutta was not given more difficult work than the rest of the engineers, Tr. at 752, and that PC-3 calculations were not necessarily more difficult that PC-1 calculations. Tr. at 758. He characterized Mr. Dutta's performance as "below average," and said that he sometimes required multiple "iterations," or attempts, to complete relatively simple calculations. Tr. at 733.

XXXXXXXX testified that he reviewed more of Mr. Dutta's calculations (four) than XXXXX (two) did, and he concluded that Mr. Dutta's work was "average." Tr. at 901-903. He further testified that Jack Shen and Mr. Al-Soudi were the best performers in the group. Tr. at 903.

Given the foregoing testimony, I cannot conclude that the wide disparity between the number of calculations performed by Mr. Dutta and the number performed by Mr. Al-Soudi and Mr. Abbott can fully be explained by a variation in the difficulty of the calculations assigned to the three analysts. The evidence further indicates that Mr. Niedbalski and XXXXXXX had a greater opportunity to observe the quality of Mr. Dutta's work than did XXXXXX. I therefore attribute more weight to their testimony as to the Complainant's performance than I do to XXXXX testimony. [4]

Finally, the Complainant claims that Parsons employees should have been given preference over job-shoppers in determining who should have been laid off. Mr. Dutta cites Parsons' Global Talent Initiative (GTI) in support of this contention, and contends that the fact that his employment was terminated while job-shoppers Helton, Niedbalski and Shen were retained is also evidence of retaliatory intent. [5]

I do not agree. Mr. Breor and Mr. Somma testified that there is no Parsons policy giving a preference to Parsons employees over job-shoppers in determining the identity of people to be laid off. Tr. at 665, 1038. Travis Gordon, a Parsons Human Resources Manager, testified that the GTI program

---

4/ I note that Mr. Helton was retained despite having completed only four calculations during the period from his January 14, 2008, hiring through January 15, 2009. Resp. Ex. 21. However, the record indicates that doing these calculations was not his primary responsibility. Helton testified that he operated as an interface between DMJM and Parsons, and that, after DMJM's work for Parsons ended in July 2008, he was more involved in pipe support work. Tr. at 922-923. Mr. Hughes testified that Helton "wasn't doing calcs." Tr. at 761.

5/ The stated objectives of the GTI are "to recruit, retain, develop and deploy our people efficiently and effectively." Comp. Ex. 23.

contained no requirement that Parsons lay off job shoppers before regular employees. Tr. at 941. Moreover, two other Parsons employees, XXXXXXX and XXXXXX, were selected for layoff with Mr. Dutta.

The record indicates that Parsons had substantial reasons for terminating Mr. Dutta's employment. The company was entering the construction phase of the SWPF project, a phase in which it reasonably believed that it would require substantially fewer employees in the Complainant's pipe stress group. The RIF was conducted using facially-neutral standards. The quality of the Complainant's work in the pipe stress group was average at best, and the number of calculations that he completed was below average. These factors suggest that Parsons would have terminated Mr. Dutta in the absence of his protected disclosures.

2. The Strength Of Any Motive To Retaliate For The Whistleblowing

The next factor to be examined is the strength of any motive on the part of Mr. Somma, Mr. Hughes, and Mr. Niedbalski to retaliate against Mr. Dutta. For the reasons that follow, I find there to be insufficient evidence of any motive to retaliate on the part of Mr. Hughes and Mr. Niedbalski, and limited evidence of a motive to retaliate on the part of Mr. Somma.

There is simply no evidence in the record that either of Mr. Dutta's disclosures impacted Mr. Niedbalski or Mr. Hughes in such a way as to provide a motive to retaliate. There is no connection between these two and the Complainant's first disclosure, and the record is unclear as to who made the decision for Parsons that the pipe support work would be finished during the construction phase of the project. In view of this uncertainty, I cannot conclude that either Mr. Hughes or Mr. Niedbalski had an incentive to retaliate because of the second disclosure.

There is some evidence of a motive to retaliate on the part of Mr. Somma, who made the final decision to terminate the Complainant. He did sign off on a document (specification 11819, rev. 0) that the Complainant called "fraudulent." Furthermore, he did testify, perhaps somewhat euphemistically, that he was "a little disappointed" when Mr. Dutta presented his concerns directly to Mr. Amerine, rather that coming to Mr. Somma first. Tr. at 1000.

However, it was Mr. Stegan, and not Mr. Somma, who was the primary actor in the series of events that led to Mr. Dutta's first disclosure. It was Stegan who took the version of this specification that had gone through IDR and gave it to Mr. Edwards with the directions to, in effect, combine it with specification 11818. It was Stegan who got the revised specification back from Mr. Edwards, found it to be to his liking, and forwarded it, with the IDR form from the original specification 11819, to Mr. Somma and to document control, rather than sending the revised specification back through IDR. Therefore, if anyone had a motive to retaliate against Mr. Dutta, it would have been Mr. Stegan.

However, it is undisputed that, after this disclosure, Mr. Dutta received a "meets expectations" personnel evaluation in February 2008 that he found to be fair, Tr. at 210, and two pay increases, only one of which was company-wide. [6] Given these facts, Mr. Somma's motive to retaliate against Mr. Dutta does not appear to have been particularly strong.

6/ Moreover, Mr. Stegan continued to give Mr. Dutta work as a "checker," which the Complainant indicated that he preferred over pipe stress calculations, for several months after he joined the pipe stress group. Tr. at 108.

Mr. Dutta contends that the events that transpired during a January 2009 meeting with Mr. Breor, Mr. Gordon and Mr. Somma indicate that Mr. Somma had a strong motive to retaliate against him. After the Complainant was informed in January 2009 that he would be laid off, he wrote a memo to Parsons' human resources department alleging that his termination was in violation of the GTI, and was likely the result of age discrimination. Comp. Ex. 19. After allegedly not receiving a response from human resources, Mr. Dutta went to see Mr. Breor. Mr. Gordon was also present, and Mr. Somma came in after the meeting had already begun. Mr. Dutta complained to Mr. Breor that he had been laid off while job-shoppers had been retained, in contravention of what he believed to be Parsons policy. At that point, the Complainant testified, Mr. Somma came into the room, and Mr. Breor said, "If I give you a job, will you accept it?" Mr. Dutta replied "Yes," but, allegedly, Mr. Somma very strongly opposed that decision, and Mr. Breor "backed off." Tr. at 161-162.

Mr. Breor, Mr. Gordon and Mr. Somma all testified that no offer or mention of a job for the Complainant with Parsons was made during the meeting. Tr. at 668, 940, 1046. Furthermore, Mr. Gordon's undated and unsigned notes from that meeting contained no mention of such an offer. Resp. Ex. 34. Based on this evidence, I find that Mr. Breor did not offer Mr. Dutta another job with Parsons during this meeting. However, even if I was to conclude that Breor made such an offer, and that Somma strongly objected, it would not necessarily be evidence of the existence of a motive to retaliate on Mr. Somma's part. Such an objection could have been caused by a belief that offering a job to someone to head off a potential age discrimination complaint would set a bad precedent, or a belief that the process by which the Complainant was chosen for termination was fair and well-thought out, and that it should not be overturned simply because the Complainant objected to it. I find no evidence of a motive to retaliate on the part of Mr. Niedbalski and Mr. Hughes, and no evidence of a strong motive to retaliate on the part of Mr. Somma.

3. Treatment Of Similarly-Situated Employees

As previously indicated, all of the analysts in the pipe stress group except for five, were originally selected to be laid off. Consequently, most, if not all, of the analysts who were in situations that were analogous to that of the Complainant were also terminated. However, unlike Mr. Dutta, a substantial number of analysts who were chosen to be laid off were either able to locate another job within Parsons, or were laid off and then subsequently rehired by the Respondent. Nevertheless, I find that there are credible non-retaliatory explanations for this apparent disparity.

XXXXXXX was originally scheduled to be laid off, but was able to obtain another position with Parsons. XXXXXXX testified that his background was in Quality Assurance (QA), and that he was looking for a QA job when he came to Parsons. Tr. at 932-933. Artis Reynolds, a former Parsons QA Manager, also testified. He stated that he interviewed XXXXXX when XXXXX first applied for a job with Parsons, and had an interest in him. However, because he did not have a position open at that time, he referred XXXXXXX to Parsons' engineering group, and XXXXXXX was hired as an engineer. At a later date, XXXXXXX informed Mr. Reynolds that he still had an interest in QA, and that he believed that he would soon be laid off from his engineering position. Mr. Reynolds contacted Mr. Hughes, and XXXXXXX was eventually transferred to QA. Mr. Reynolds indicated that XXXXXXX was hired because his "background supported" QA functions. Tr. at 854-856. He further testified that Mr. Dutta approached him and gave him a resume, but that he did not have a position available at that time. He added that no one told him not to hire Mr. Dutta, and that he would have resigned from Parsons if some one had. Tr. at 857. I found Mr. Reynolds' testimony to

be credible, and I have no reason to doubt his testimony that he did not have a position available when the Complainant gave Reynolds his resume, or to doubt his testimony that, unlike Mr. Dutta, Reynolds had had a previous contact with XXXXXXX, and an on-going interest in XXXXXXXX services based upon that previous contact.

Mr. Breor testified that as many as ten pipe stress engineers who were laid off in December 2008 were subsequently re-hired by Parsons. Tr. at 670. Mr. Breor and Mr. Somma testified that this was due to design changes and to changes in the Construction Execution Plan. Tr. at 674, 957-958. Somma testified that these engineers were rehired beginning in September 2009, and that this future need for more engineers than the five who were retained was not anticipated at the time of the layoffs. Tr. at 957. He added that when this need was realized, a request for more pipe stress engineers was made to the Human Resources department. The jobs were posted on the Parsons website and applicants, including the engineers who had been laid off earlier, submitted resumes either directly to Parsons or to System One, a contractor who helped them find engineers. To his knowledge, none of the laid off engineers were recalled. Tr. at 1050. Mr. Gordon testified that Parsons had no policy concerning recalling laid off employees. Tr. at 942. He added that Mr. Dutta had not applied for another position with Parsons since his termination, and Mr. Somma stated that the Complainant has not applied for another pipe stress position since that time. Tr. at 1051.

XXXXXXXXX, who was laid off by Parsons in December 2008, largely confirmed this testimony about how laid off engineers were re-hired. He testified that, through his contact with another engineer who had been laid off, and through monitoring internet job sites, he knew that pipe engineering work at Parsons was picking up again. Tr. at 914. He informed System One that he wanted to return to work at Parsons, and he was eventually re-hired. Tr. at 915.

The record in this matter indicates that the engineers who either were able to avoid termination by finding another job with Parsons, or were subsequently re-hired, either had a previous contact with the Parsons employee who sought their services, or re-applied to Parsons or to a Parsons contractor after their termination. Neither of these circumstances have been shown to apply to Mr. Dutta.

Based on the forgoing, I conclude that Parsons would have terminated the Complainant's employment even in the absence of his protected disclosures. The Respondent's reasons for the termination are convincing, the motive for retaliation is limited, at best, and although some of the pipe stress analysts who were similarly situated to Mr. Dutta were re-hired, the record indicates that they re-applied for their positions, whereas Mr. Dutta did not.

III. Conclusion

I conclude that Mr. Dutta made two protected disclosures, and that at least the second of those disclosures was a contributing factor to his termination. However, I find that Parsons has shown, by clear and convincing evidence, that it would have taken the same action even in the absence of the disclosures. Consequently, I conclude that Mr. Dutta is not entitled to the remedies that he seeks.

It Is Therefore Ordered That:

(1) The Request for Relief filed by Arun K. Dutta under 10 C.F.R. Part 708 is hereby denied.

(2) This is an Initial Agency Decision, which shall become the Final Decision of the Department of Energy unless a party files a notice of appeal by the fifteenth day after the party's receipt of the Initial Agency Decision, in accordance with 10 C.F.R. § 708.32.

Robert B. Palmer
Senior Hearing Officer
Office of Hearings and Appeals

Date: August 25, 2010

November 9, 2010

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Initial Agency Decision

Name of Case: Himadri K. Das

Dates of Filing: April 16, 2010

Case Number: TBH-0089

This Decision concerns a Complaint filed by Himadri K. Das against RCS Corporation, his former employer, and Parsons Infrastructure and Technology Group, Inc. (Parsons), under the Department of Energy's (DOE) Contractor Employee Protection Program regulations found at 10 C.F.R. Part 708. RCS is professional staffing company that identifies and hires personnel for its clients. At all times relevant to this proceeding, Parsons was a DOE contractor operating in Aiken, South Carolina, and was a client of RCS. RCS hired Mr. Das to provided his services to Parsons as a mechanical engineer. Mr. Das contends that during his placement with Parsons, he engaged in protected activity and, as a consequence, suffered reprisal by RCS and Parsons. Among the remedies that the Complainant seeks are reinstatement, back pay, and reimbursement for legal and other expenses. As discussed below, I have concluded that Mr. Das is not entitled to the relief that he seeks.

I. Background

A. Regulatory Background

The DOE established its Contractor Employee Protection Program to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste, and abuse" at DOE's Government-owned or -leased facilities. *See* Criteria and Procedures for DOE Contractor Employee Protection Program, 57 Fed. Reg. 7533 (1992). The Program's primary purpose is to encourage contractor employees to disclose information that they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers. The Part 708 regulations prohibit a DOE contractor from retaliating against its employee because the employee has engaged in certain protected activity, including:

> (a) Disclosing to a DOE official, a member of Congress, . . . [the employee's] employer, or any higher tier contractor, information that [the employee] reasonably believe[s] reveals—
>
> (1) A substantial violation of any law, rule, or regulation;
> (2) A substantial and specific danger to employees or to public health or safety; or
> (3) Fraud, gross mismanagement, gross waste of funds, or abuse of authority.

57 Fed. Reg. 7541, March 3, 1992, as amended at 65 FR 6319, February 9, 2000, codified at 10 C.F.R. § 708.5.

An employee who believes that he or she has suffered retaliation for making such disclosures may file a complaint with the DOE. It is the burden of the complainant under Part 708 to establish "by a preponderance of the evidence that he or she made a disclosure, participated in a proceeding, or refused to participate, as described under § 708.5, and that such act was a contributing factor in one or more alleged acts of retaliation against the employee by the contractor." 10 C.F.R. § 708.29. If the complainant meets this burden of proof, "the burden shifts to the contractor to prove by clear and convincing evidence that it would have taken the same action without the employee's disclosure, participation, or refusal." *Id.*

B. Factual Background

The following facts are not in dispute. Parsons contracted with the DOE to construct a salt waste processing facility (SWPF) at the DOE's Savannah River Site. An SWPF processes nuclear waste. Mr. Das is a mechanical engineer with over 25 years of experience who was hired by RCS as a Senior Pipe Stress Engineer in March 2008. He was assigned to Parsons's SWPF project, to perform calculations for the Pipe Stress Group of the Engineering Mechanics Group, during the Enhanced Final Design stage of preparing for the construction of the SWPF. Mr. Das understood that the assignment would last between nine and 12 months, and would end when Parsons no longer needed his services on the project. At all times relevant to this proceeding, the Pipe Stress Group was headed by Calvin Hughes. P.E. Mr. Hughes reported to James Somma, P.E., Engineering and Design Manager for the SWPF. Ted Niedbalski was the coordinator of the Pipe Stress Group. In that role, Mr. Niedbalski distributed the work assignments in the group and served as a resource. Shortly after Mr. Das began working in the Pipe Stress Group, Mr. Niedbalski selected him to be a "checker," who was responsible for ensuring that calculations performed by other members of the Pipe Stress Group conformed to the established piping design guidelines.

In November 2008, Mr. Das was checking stress calculation J-00875, which covered a length of piping that branched off from a larger pipe, or "header line." The stress calculation for that header line, J-00473, had been performed by DMJM, an outside company that Parsons had contracted to perform a number of the pipe stress calculations. In May 2008, Calculation J-00473 had been approved by Mr. Hughes and entered into Parsons's Document Control System, an electronic repository of completed and approved pipe stress calculations. In a cursory review of the J-00473 stress calculation, Mr. Das noticed a number of problems, including very large piping loads (volume demands) on the pipe under analysis and the fact that those loads appeared to have not yet been approved by the Pipe Support Group, the team responsible for reviewing the design for fastening the pipes to the structure.

On November 24, 2008, Mr. Das sent an e-mail to Mr, Hughes, with a copy to Mr. Somma, in which he related that he found "serious quality and safety" problems with the J-00473 stress calculation and reported that other DMJM calculations had likewise been of poor quality. He

asked that management develop a "corrective action plan to deal with this and other technical issues" in his group. Parsons Ex. 36.

On December 16, 2008, Mr. Hughes informed Mr. Das that his last day of work would be December 18, 2008. On December 17, 2008, Mr. Das asked for, and was granted, an appointment to speak with Mark Breor, the project manager of the SWPF. In that meeting, Mr. Das brought to Mr. Breor's attention a number of concerns that Mr. Das believed needed to be addressed before the construction phase of the SWPF began. On December 18, 2008, RCS terminated Mr. Das's employment, having been informed by Parsons on December 16, 2008, that December 18 would be his last day of work on the SWPF project.

C. Procedural Background

On January 15, 2009, Mr. Das filed a Part 708 Complaint with the Director of the DOE's Office of Civil Rights at its Savannah River Operations Office. Parsons filed a response to this complaint. The Savannah River Employee Concerns Program attempted to mediate the complaint on August 31, 2009, but those efforts failed. Mr. Das requested that his complaint be forwarded to the Office of Hearings and Appeals (OHA) for an investigation and hearing. The Director forwarded the complaint to OHA on October 7, 2009, and the OHA Director appointed an investigator.

The OHA investigator interviewed Mr. Das and other current and past Parsons employees and contractor employees and reviewed a large number of documents before issuing a Report of Investigation (ROI) on April 16, 2010. In the ROI, the OHA investigator concluded that, regarding his November 24, 2008, disclosure, "Mr. Das reasonably believed that the technical issues he had identified needed to be resolved before moving forward safely with the construction of the SWPF." Report of Investigation at 8. The investigator also observed that Mr. Hughes, whom the investigator found to have taken the adverse personnel action against Mr. Das, had actual knowledge of the disclosure. *Id.* at 9.

On April 16, 2010, the OHA Director appointed me as the Hearing Officer in this case. I conducted a two-day hearing in this case in Aiken, South Carolina, beginning on July 14, 2010. Over the course of the hearing, eight witnesses testified. Mr. Das introduced 25 exhibits into the record, Parsons introduced 64 exhibits, and RCS introduced four exhibits. On September 1, 2010, the parties submitted written closing arguments, at which time I closed the record in the case.

D. Mr. Das's Complaint and the Report of Investigation

Mr. Das alleges in his complaint that he made a number of protected disclosures during his tenure with the Pipe Stress Group. First, he alleges that he had identified 12 technical issues, specified in the complaint, that he considered to be related to safety or an inappropriate use of funds. In general, they concerned the lack of technical guidelines and the fact that Parsons had approved a number of stress calculations that he felt were incomplete. He voiced his concerns regarding these issues at weekly meetings of the Pipe Stress Group during the months of April through July 2008. Mr. Das raised later concerns about the J-00473 stress calculation and other

calculations done by DMJM in an e-mail to Mr. Hughes and Mr. Somma. Parsons Ex. 36. In that e-mail, he wrote that he found "a serious quality and safety problem" with J-00473 and expressed his concern that work performed by DMJM "may create safety concerns in [the] future." *Id.* In his complaint, he stated that the incomplete and inaccurate stress calculations did not comply with Parsons's project procedures and that the poor quality of DMJM calculations demonstrated an "inappropriate use of funds." In retaliation for making these disclosures, Mr. Das alleges, Mr. Hughes, his Parsons supervisor, informed him that his last day of work would be December 18, 2008, due to a lack of DOE funding. As relief for these alleged retaliations, Mr. Das requests back pay, reimbursement of costs and expenses, including legal expenses, and any other relief deemed necessary, as well as a commitment by Parsons that it addresses all of the technical issues that he raised in his complaint.

II. Analysis

As stated in Section I.A above, in order to prevail in a Part 708 proceeding, an employee must show, by a preponderance of the evidence, that he made a protected disclosure or engaged in protected behavior, and that this was a contributing factor to one or more alleged acts of retaliation by the contractor against the employee. For the reasons set forth below, I find that Mr. Das made protected disclosures, and that his November 24, 2008, disclosure was a contributing factor in his termination. However, because Parsons and RCS would have taken the same action in the absence of any disclosures, I conclude that Mr. Das is not entitled to the relief that he seeks.

As an initial matter, I must address the roles of the two respondents in this proceeding. RCS was Mr. Das's employer: it extended an offer of employment to Mr. Das to work as a Senior Pipe Stress Engineer. RCS Ex. B. The offer of employment specified that he would be providing services to Parsons at its SWPF project in accordance with a service agreement between RCS and Parsons. RCS Ex. A. While not Mr. Das's nominal employer, Parsons controlled his work assignments (through Mr. Niedbalski, himself a non-Parsons employee), provided his work environment and resources, and supervised his day-to-day activities. The purpose of Part 708 is to "provide procedures for processing complaint by employees of DOE contractors alleging retaliation by their employers for" making protected disclosures. 10 C.F.R. § 708.1. Both RCS and Parsons meet the definition of "contractor" set forth in Part 708: Parsons is a party to a "contract with DOE to perform work directly related to activities at DOE-owned or –leased facilities," in this case, the construction of the SWPF, and RCS is a party to a subcontract under a contract of the type described above. *See* 10 C.F.R. § 708.2. Although both companies are contractors for Part 708 purposes, all disclosures were made to Parsons personnel. None was made to RCS, Mr. Das's employer. Nevertheless, RCS terminated Mr. Das, after Parsons advised it of its determination that December 18, 2008, would be Mr. Das's last day of work. Because RCS was not a party to the proceeding before the issuance of the Report of Investigation, and because I determined that RCS was Mr. Das's actual employer despite his close relationship with Parsons, I requested that Mr. Das amend his complaint to include RCS as a respondent. RCS then asked to be dismissed from the proceeding, on the grounds that it had no role in the decision that led to Mr. Das's termination. RCS Prehearing Brief (June 1. 2010).

We have addressed this matter in earlier decisions. In a case presenting similarly complex employment circumstances, the complainant, like Mr. Das, was an employee of a subcontractor that provided staffing services to a higher-tier contractor, but he made his disclosures to the higher-tier contractor. *Jimmie L. Russell,* Case No. VBH-0017 (July 18, 2000).[1] All of the retaliatory actions Mr. Russell alleged were taken by the higher-tier contractor, with the exception of his termination from employment with the subcontractor. Under those circumstances, the Hearing Officer in that case determined that both the subcontractor and the higher-tier contractor were appropriate parties to the proceeding. He also stated that if the actual employer were dismissed from the proceeding, he believed he would lack the authority to take any remedial action against the higher-tier contractor, "whose liability under Part 708 appears to be based on the 'subcontract under the contract.'" *Id.* Because Mr. Das requested relief that would require remedial actions by both RCS and Parsons, and because Parsons's potential liability under Part 708 stems from its contract with RCS, it was proper to maintain both companies as respondents to Mr. Das's complaint.

A. The Protected Disclosures

As previously discussed, an employee of a DOE contractor makes a protected disclosure when he or she reveals to that employer, a higher-tier contractor, a DOE official, a member of Congress, or any other government official with oversight authority at a DOE site, information that the employee reasonably believes reveals (i) a substantial violation of a law, rule or regulation; (ii) a substantial and specific danger to employees or to public health or safety; or (iii) fraud, gross mismanagement, gross waste of funds, or abuse of authority. 10 C.F.R. § 708.5(a). The test of "reasonableness" is an objective one, *i.e.,* whether a reasonable person in the complainant's position, with his level of experience, could believe that his disclosure met any of the three criteria set forth above. *Frank E. Isbill,* Case No. VWA-0034 (1999).

1. Complaints Raised in Weekly Staff Meetings

Mr. Das maintains that he raised a number of safety issues during weekly staff meetings of the Pipe Stress Group held in the months of April through July 2008. In his complaint, he outlines 12 technical issues that he allegedly raised in those meetings. There is no evidence in the record of specific dates on which he brought up these concerns. At the hearing, Mr. Das testified that he continually raised a concern that, despite Parsons's own procedures and desktop instruction—a set of guidelines for processing pipe stress calculations in his group—pipe stress calculations were being approved and entered into the Document Control System (DCS) without being subjected to review by pipe support engineers. Transcript of Hearing (Tr.) at 101. He had heard that construction on the SWPF was about to begin, and without the input from the pipe support group, the plans were incomplete and could require substantial revision before they could be considered complete and reliable for construction. *Id.* at 106-08. In his complaint, Mr. Das stated that his concerns were not addressed at the meetings. Instead, he was told that they would be "taken care of later." At least one witness recalled that Mr. Das had voiced the above concern during at least one weekly meeting. *Id.* at 258. The witness himself had raised the same

[1] Decisions issued by the Office of Hearings and Appeals are available on the OHA website located at http//www.oha.doe.gov. The text of a cited decision may be accessed by entering the case number of the decision in the search engine located at http://www.oha.doe.gov/search.htm.

concern, because he had never before encountered a process in which pipe stress and pipe support calculations were not performed simultaneously, to achieve safety, quality and cost savings. *Id.* That witness named three other staff members who raised similar issues. *Id.* at 271, 273.[2] Mr. Hughes and Mr. Somma attended some or all of the weekly meetings. *Id.* at 99, 259, 689. I will assume for the sake of argument that Mr. Das raised his stated concerns in the presence of Mr. Hughes or Mr. Somma, both Parsons employees.

The issue to be decided is whether Mr. Das reasonably believed that the disclosures he made at one or more of the weekly meetings constituted (i) a substantial violation of any law, rule, or regulation, (ii) a substantial and specific danger to employees or to public health or safety, or (iii) fraud, gross mismanagement, gross waste of funds, or abuse of authority. Mr. Das contends in his complaint that all three criteria apply to these disclosures. Because I conclude that a reasonable person in Mr. Das's position, with his level of experience, could have believed that Parsons's posting of incomplete pipe stress calculations to the DCS was a gross waste of funds, I need not decide whether Parsons's action posed a substantial and specific danger to employees or to public health and safety or constituted a substantial violation of a law, rule, or regulation.

Parsons argues that reserving the finalization of pipe stress calculations until the construction stage of a facility like the SWPF, rather than completing them at the design stage, is not a gross waste of funds. Mr. Niedbalski testified that, in his opinion, it was not a waste of money to perform pipe stress calculations with generic information during the Enhanced Final Design stage for which Mr. Das was employed, and then revisit those calculations at a later stage; in fact, he argued, that approach saved money. Tr. at 558-59. Mr. Somma also expressed his opinion, based on 30 years of experience, that it is not unusual to perform pipe support calculations after pipe stress calculations have been completed. *Id.* at 707. He acknowledged that that approach might require revisiting the pipe stress calculations a second time, if design changes involved equipment changes or rerouting of pipes, but he believed that such an approach was not a waste of funds. *Id.* at 707-09. Mr. Hughes testified that pipe stress and pipe support calculations were to be reconciled at a later stage of the project, after the design was 90% completed. *Id.* at 618-21; *see* Parsons Ex. 2. In fact, Parsons had informed the DOE that pipe stress analysis would continue during the construction stage, and the DOE had approved the approach. Tr. at 623; *see* Parsons Ex. 10.

The relevant question, however, is not whether funds would actually be wasted because the pipe stress calculations were not completed, in conjunction with the pipe support calculations, before the SWPF project entered the construction stage. It is rather whether Mr. Das *could reasonably have believed* that the procedure Parsons was following would lead to a gross waste of funds. I find that such a belief was reasonable.

As stated above, Mr. Das has over 25 years of experience in pipe stress analysis. *Id.* at 41. In his testimony, he referred to a Parsons directive entitled "Intradiscipline Checking, Procedure No. PP-EN-5005, one of a series of Parsons SWPF Project Procedures, which describes the checker's responsibilities. *Id.* at 63; *see* Parsons Ex. 24. He further testified that his understanding was that the Savannah River Site Engineering Practices Manual,

[2] Mr. Nieldbalski testified that "[c]oncerns were mentioned" about the DMJM calculations in particular at those meetings, but he could not recall whether it was Mr. Das or others who raised them. *Id.* at 573.

WSRC-IM-95-58, applied to his group's work. He maintained that one part of that manual, entitled "Application of ASME B31.3," clearly contemplated that pipe stress analysis required coordination with and input from pipe support analysis. Tr. at 68; *see* Das Ex. F. He stated that checking whether the pipe loads, as calculated in the pipe stress analysis, are reasonable or excessive loads on the pipe supports is a critical element in pipe stress analysis. Tr. at 85. One witness, with 30 years of experience in the field, concurred that pipe stress and pipe support analysis are generally performed in tandem. *Id.* at 258. In fact, while testifying that there is no serious flaw in performing pipe stress and pipe stress support during the construction stage, Mr. Niedbalski stated his preference that both pipe stress and pipe support calculations be completed before that stage. *Id.* at 581.

Furthermore, Parsons's desktop instruction, which was circulated to all members of the Pipe Stress Group, contains a flowchart that indicates that pipe stress and pipe support calculations would be prepared roughly concurrently. Das Ex. M at Attachment B. During Mr. Das's tenure at the Pipe Stress Group, the desktop instruction was not formally a company procedure, as it was in draft form and subject to modification. *Id.* at 598 (testimony of Niedbalski). Nevertheless, according to Mr. Niedbalski, who created the document, its contents were to be followed as guidance, and Attachment B was the "way we would normally proceed." Tr. at 595. A co-worker in the Pipe Stress Group testified that pipe stress calculations were uniformly entered into the DCS without any pipe support review of them. *Id.* at 218-19. The co-worker further testified that at an earlier stage of the project, "it was intended that pipe supports would be done in conjunction with pipe stress," as shown in the flowchart, but by 2008 this was not the case. *Id.* at 231-32. Finally, Mr. Das was not part of the management team, nor was he involved in long-range planning of the SWPF project. *Id.* at 480. Consequently, he had no knowledge of the future stages of the project beyond what his managers imparted to him. Given his understanding that his group's calculations would have to be revisited at a later stage of the project and that coordination with pipe support engineers and completion of stress calculations was not only his experience but the intended work flow presented in the Parsons's desktop instruction, coupled with his belief that the construction stage was imminent and his assertion that the concerns he raised at the weekly meetings were treated dismissively, I find that Mr. Das reasonably believed that the procedure Parsons was following was wasting money.

Having determined that Mr. Das reasonably believed he had revealed in his disclosure a waste of funds, the remaining question is whether he believed the waste of funds was "gross," as set forth in Part 708. Adopting language from cases argued under the Whistleblower Protection Act, which also provides protection for disclosures of "gross waste of funds," OHA has defined that term as "a more-than-debatable expenditure that is significantly out of proportion to the benefit reasonable expected to accrue to the government." *See Thomas L. Townsend*, Case No. TBU-0082 (2008); *Fred Hua*, Case No. TBU-0078 (2008) (*citing Jensen v. Dep't of Agriculture*, 104 M.S.P.R. 379 (2007)). In describing the costs associated with Parsons's failure to complete the pipe stress calculations, integrating pipe support review, before declaring them suitable to be entered into the DCS, Mr. Das testified that when the pipe support analysts eventually reviewed a given pipe stress calculation, they might well determine that the locations of the supports assumed by the pipe stress analysts were inappropriate to the loads generated, and require that the supports be relocated; this would require in turn new pipe stress calculations for the same length of pipe. Tr. at 106-07. Such recalculations could be required of hundreds of calculations

involving thousands of supports, each support location potentially needing revision. *Id.* at 108-09. Mr. Das never mentioned a specific amount that he believed Parsons was wasting by not coordinating pipe stress and pipe support analysis as he had seen done in his experience. Nevetheless, I will assume that he was aware of the substantial professional hourly rate he was being paid, and that it was reasonable for him to surmise that the other pipe stress and pipe support analysts were being paid comparable rates. As I found above, Mr. Das reasonably believed that Parsons's procedure was wasting funds. I now find as well that he reasonably believed that correcting the calculations at a later stage of the project would require extensive labor, billed at substantial rates. I conclude that he reasonably believed that the costs associated with the additional labor of revisiting hundreds of calculations would constitute "a more-than-debatable expenditure that is significantly out of proportion to the benefit reasonably expected to accrue to the government," or a gross waste of funds.

2. The November 24, 2010, E-Mail to Mr. Hughes and Mr. Somma

It is undisputed that Mr. Das made a second disclosure to Mr. Hughes and Mr. Somma in an e-mail dated November 24, 2008. In the e-mail, Mr. Das disclosed what he termed "a serious quality and safety problem" with DMJM's Calculation J-00473 and expressed his concern that work performed by DMJM "may create safety concerns in [the] future." *Id.* In his complaint, he stated that the incomplete and inaccurate stress calculations did not comply with Parsons's project procedures and that the poor quality of DMJM calculations demonstrated an "inappropriate use of funds."

Once again, I must decide whether Mr. Das reasonably believed that the disclosures he made, this time in his November 24, 2008, e-mail, constituted (i) a substantial violation of any law, rule, or regulation, (ii) a substantial and specific danger to employees or to public health or safety, or (iii) fraud, gross mismanagement, gross waste of funds, or abuse of authority. Because I conclude that a reasonable person in Mr. Das's position, with his level of experience, could have believed that the quality of DMJM's calculations demonstrated a gross waste of funds, I need not decide whether Parsons's action posed a substantial and specific danger to employees or to public health and safety or constituted a substantial violation of a law, rule, or regulation. I note, however, that in the e-mail, Mr. Das alleged safety concerns. He conceded at that time, and during the hearing as well, that any danger arising from the allegedly poor quality of DMJM's calculations was speculative; it would not manifest itself until later, and only if the calculations were not corrected: if the design was faulty, the construction would be faulty, and "we do not know the future consequence" of faulty construction. *Id.* at 316. The disclosure of danger only potentially rising in the future is not a protected disclosure. *Chambers v. Department of Interior*, 515 F.3d 1362, 1369 (Fed. Cir. 2008) (Whistleblower Protection Act case). Considering the low likelihood of harm resulting from the cited danger, in light of the testimony that he was aware the pipe stress calculations would be revisited during the construction stage of the project, I would find that Mr. Das did not meet his burden of establishing by the preponderance of the evidence that he reasonably believed that his disclosure revealed a "substantial and specific danger to employees or public safety." 10 C.F.R. §§ 708.5, .29.

Parsons argues that the DMJM pipe stress calculations were acceptable. Alan Helton, the Pipe Stress Group member who served as the liaison with DMJM, testified about the subject of Mr.

Das's November 24, 2008, e-mail, Calculation J-00473. He stated that DMJM had found that the proposed piping met the requirements of the governing code. Tr. at 183. While he recognized that some of the loads DMJM had calculated were "very high," the resulting stresses were nevertheless within acceptable limits, and he recommended to Mr. Hughes that the calculation be approved, on the condition that certain steps be taken at a later stage of the project. *Id.* at 184, 186.

Mr. Das in fact agreed that the calculated stresses met the applicable code. *Id.* at 303. Nevertheless, Mr. Helton was aware, and advised Mr. Hughes and Mr. Niedbalski, that several of DMJM's calculations, involving different segments of the piping design, revealed high loads that would need to be addressed before the piping plan was finalized. Parsons Ex. 37 (e-mail from Mr. Hughes in response to Mr. Das's November 24, 2008, e-mail.) Furthermore, Mr. Das testified that Calculation J-00473 did not record, as is industry practice, where the DMJM analysts had made assumptions in their analysis. *Id.* at 121-22. He argued to Mr. Niedbalski that the calculation needed to be corrected; Mr. Niedbalski replied that those problems could be addressed later in the process. *Id.* at 123-24. Once a calculation was entered into the DCS, however, its results could be relied upon in other pipe stress calculations, particularly regarding segments of adjoining piping, and the analysts relying on it would not be aware of its weaknesses. *Id.* at 120.

Mr. Das knew that DMJM was being paid by Parsons to perform some 60 pipe stress calculations and felt that they should perform them properly. Tr. at 119, 168. Despite the fact that Mr. Niedbalski and Mr. Hughes told him that any weaknesses in DMJM's calculations would be addressed later, he was concerned that those weaknesses could lead to errors on any future calculations that referred back to those DMJM calculations, which would in turn require revisiting not just the DMJM calculations but potentially a great number of Pipe Stress Group calculations. I therefore find that Mr. Das reasonably believed the quality of the DMJM's calculations, from his perspective, constituted a waste of funds. For the reasons set forth in the above section, I find that Mr. Das reasonably believed that the extent of the labor costs entailed in reanalyzing the DMJM calculations and any Pipe Stress Group calculations that relied on them was significantly out of proportion to the government's benefit from those expenditures, and thus that he reasonably believed he had revealed a gross waste of funds.

B. The Alleged Retaliations

In order to prevail, Mr. Das must next demonstrate, by a preponderance of the evidence, that his protected disclosures were a contributing factor to one or more alleged acts of retaliation taken against him by Parsons. Under the Part 708 regulations, "retaliation" means "an action (including intimidation, threats, restraint, coercion or similar action) taken by a contractor against an employee with respect to the employee's compensation, terms, conditions or privileges of employment as a result of the employee's disclosure of information" or participation in protected conduct as described in 10 C.F.R. § 708.5. Mr. Das alleges that Parsons retaliated against him by laying him off and thus causing RCS to terminate his employment.

In determining whether protected disclosures were a contributing factor to allegedly retaliatory acts, OHA Hearing Officers have noted that there is rarely a "smoking gun" that establishes such

a nexus. *See, e.g., Ronald Sorri*, Case No. LWA-0001 (1993). Consequently, we have consistently held that retaliatory intent can be established through circumstantial evidence. Specifically, a complainant can demonstrate that a protected disclosure was a contributing factor to an alleged retaliatory act if he can show that the acting official had actual or constructive knowledge of the protected disclosure, and acted within such a period of time that a reasonable person could conclude that the disclosure was a factor in the personnel action. *Id.* Since there is no direct evidence of retaliation in the record, Mr. Das must demonstrate that the Parsons and RCS employees responsible for the alleged retaliatory act had actual or constructive knowledge of his protected disclosures, and must also show temporal proximity between the disclosures and the retaliation.

As previously explained, if Mr. Das can demonstrate that either of his disclosures was a contributing factor to his termination, Parsons and RCS must then demonstrate, by clear and convincing evidence, that they would have laid off and terminated Mr. Das even in the absence of any protected disclosures. For the reasons set forth below, I find that the Complainant's second disclosure was a contributing factor to Parson's decision to terminate his employment. I therefore need not consider whether the Complainant's first disclosures, which occurred between five and eight months prior to the termination, were a contributing factor.

Mr. Somma made the decision to lay off Mr. Das, with input from Mr. Hughes and Mr. Niedbalski. Tr. at 552, 694, 703. It is evident that Mr. Somma had actual knowledge of Mr. Das's second disclosure. He was a recipient of the November 24, 2008, e-mail in which Mr. Das expressed his concerns regarding the DMJM calculations. Parsons Ex. 36. He was also copied on Mr. Hughes's response to Mr. Das minutes later. Parsons Ex. 37. According to his testimony, Mr. Somma began discussing anticipated layoffs in the summer or early fall of 2008. Tr. at 693. The layoffs were to take place when Parsons certified to the DOE that its planning for the SWPF was 90% complete. *Id.* at 692. That milestone was achieved on December 12, 2008. *Id.* As set forth above, Mr. Hughes advised Mr. Das on December 16 that his last day would be December 18. Mr. Das's November 24, 2008, disclosure was sufficiently close in time to Mr. Hughes's layoff decisions such that a reasonable person could conclude that the disclosure was a contributing factor to Parsons's decision to lay off Mr. Das.

Although I have found that Mr. Das's November 2008 disclosure was a contributing factor in Parsons's decision to lay him off, I must also consider whether his disclosure was a contributing factor to the decision to terminate his employment. This case presents somewhat unusual facts, in that Mr. Das made his disclosures only to Parsons, but it was RCS, his employer, that terminated his employment. In its post-hearing brief, RCS contends that Mr. Das's disclosure cannot be a contributing factor to RCS's termination of Mr. Das's employment, because RCS never had any knowledge of his complaint. RCS Post-Hearing Brief at 4. At the hearing, RCS's human relations manager testified that Parsons sent an e-mail to RCS notifying it that three of its employees, including Mr. Das, were going to be laid off on December 18, 2008. Tr. at 390-91; *see* RCS Ex. C. She further testified that Mr. Das's employment ended solely because Parsons had laid him off. Tr. at 393. Although I find that RCS had no role in Parsons's decision to terminate Mr. Das's employment at Parsons, RCS admits that it terminated its employment contract with Mr. Das because Parsons ended his work assignment through a layoff. Had Parsons been Mr. Das's employer, I would proceed to analyze whether the Parsons employee

who was responsible for the termination had actual or constructive knowledge of the protected disclosures. Here, two entities divide the roles of, on one hand, the employer and, on the other, the entity responsible for determining whether an employee is laid off. To permit this role division to excuse an employer from responsibility under Part 708, where the employer's action is dictated by the entity controlling workplace retention "would vitiate the protections for whistleblowers that Part 708 was intended to provide." *Jimmie L. Russell* (holding similarly situated entities jointly and severally liable for retaliatory acts). Consequently, although the evidence is clear that RCS had no actual knowledge of Mr. Das's protected disclosure, I will attribute constructive knowledge of Mr. Das's protected disclosures to RCS. Because RCS terminated Mr. Das's employment on December 18, 2008, within four weeks of his second protected disclosure, a reasonable person could conclude that the disclosure was a contributing factor to RCS's decision to terminate Mr. Das's employment.

C. Whether Parsons and RCS Would Have Terminated Mr. Das's Employment in the Absence of His Protected Disclosures

Section 708.29 states that once a complaining employee has met the burden of demonstrating that conduct protected under § 708.5 was a contributing factor in the contractor's retaliation, "the burden shifts to the contractor to prove by clear and convincing evidence that it would have taken the same action without the employee's disclosure, participation, or refusal." 10 C.F.R. § 708.29. "Clear and convincing evidence" requires a degree of persuasion higher than preponderance of the evidence, but less than "beyond a reasonable doubt." *See Casey von Bargen*, Case No. TBH-0034 (2007). If the contractor meets this heavy burden, the allegation of retaliation for whistleblowing is defeated despite evidence that the retaliation may have been in response to the complainant's protected conduct.

It is well settled that several factors may be considered in determining whether an employer has shown, by clear and convincing evidence, that it would have taken the alleged act of retaliation against a whistleblower in the absence of the whistleblower's protected conduct. The Federal Circuit, in cases interpreting the federal Whistleblower Protection Act (WPA), upon which Part 708 is modeled, has identified several factors that may be considered, including "(1) the strength of the [employer's] reason for the personnel action excluding the whistleblowing, (2) the strength of any motive to retaliate for the whistleblowing, and (3) any evidence of similar action against similarly situated employees for the non-whistleblowing aspect alone." *Kalil v. Dep't of Agriculture*, 479 F.3d 821, 824 (Fed. Cir. 2007) (*citing Greenspan v. Dep't of Veterans Affairs*, 464 F.3d 1297, 1303 (Fed. Cir. 2006)).

1. The Strength of the Stated Reasons For Laying Off Mr. Das and Terminating His Employment

The evidence in this case is strong that this layoff was planned. Mr. Somma testified that as the design phases of the SWPF project were completed, fewer employees would be required for the project. Layoffs were anticipated in virtually every organization of the project team. Tr. at 693. Although no one dictated how many staff he could maintain under him, Mr. Somma was nonetheless provided with a reduced budget within which to pay his team members after the design was deemed 90% complete. *Id*. at 694. The general concept of an impending layoff was

known as early as March 2008, when Mr. Das was hired for the project. Mr. Das testified that RCS had advised him when he was first assigned to Parsons that his work there would last about nine to twelve months. *Id.* at 283. The layoff occurred about nine months after he began his work there. *Id.* During the fall of 2008, Mr. Breor, the project manager, held an all-hands meeting to announce a reduction in work force, because the project was approaching the point at which 90% of the design would be complete. *Id*. at 427-28. On November 12, 2008, Parsons held a job fair to assist SWPF workers in securing employment beyond the SWPF project. *Id*. at 432. As of that date, Parsons had not announced who would be laid off, but all employees were encouraged to attend. *Id.*

The evidence is also strong that Mr. Somma selected the workers he intended to retain into the construction stage for rational, business-related reasons. Mr. Somma ultimately determined that his funding would permit him to retain five pipe analysts, which would necessitate the release of 17 from the staff. *Id.* at 282, 642. Mr. Hughes testified that, although it was Mr. Somma who made the ultimate decision as to who was to be retained and who laid off, he recommended to Mr. Somma individuals to be retained, on the basis of their performance in the areas in which he anticipated a future need for services. *Id*. at 643-44. *See* Parsons Ex. 33. By October 13, Mr. Somma had worked with his supervisors to "identify personnel and the knowledge skills and abilities of the personnel to carry them into the next phase of the project." *Id*. at 695. By October 13, 2008, Mr. Somma had produced a preliminary list of workers to be laid off, and Mr. Das was one of those. Parsons Ex. 41. The layoff list was revised a number of times before it reached its final form, but Mr. Das's name remained on each version of the list. Tr. at 725; Parsons Exs. 42, 43.

The record indicates that Parsons had substantial reasons for laying off pipe stress analysts after the SWPF project reached the construction stage. Mr. Hughes had been advised that funding for pipe analysts would be severely curtailed and most of the currently employed analysts would have to be laid off. The layoff was conducted using facially neutral standards. Preliminary lists of those affected by the layoff, created as early as mid-October 2008 contained Mr. Das's name. These factors suggest that Parsons would have laid off Mr. Das in the absence of his protected disclosures. It is equally clear that RCS terminated Mr. Das's employment upon notification that Parsons had no more work for him, and would have done so upon such notification without regard for any justification or lack thereof provided by Parsons.

2. The Strength of Any Motive to Retaliate For the Whistleblowing

I find insufficient evidence of any motive on the part of Parsons or RCS to retaliate against Mr. Das for his whistleblowing. No motive for retaliation was revealed through any document or testimony during this proceeding. In his closing argument, however, Mr. Das's attorney notes Mr. Das made his second disclosure, his November 24, 2008, e-mail, three weeks before Parsons's December 12 target date for completing 90% of the SWPF's design, and so informing the DOE. In effect, he argues that, had the DOE learned of this disclosure and assigned significance to it, it might not have approved Parsons's milestone, which might have affected the DOE's continued funding of the project. I find this argument highly speculative. First of all, Mr. Hughes responded immediately to Mr. Das's disclosure, admitting that he recognized problems with DMJM's calculations and stating that those problems would be resolved at a

future stage. Parsons Ex. 37. More important, the DOE was already aware, and had approved, that pipe stress calculations would continued to be performed in post-90%-complete stages of the project. Tr. at 623. Therefore, even if Mr. Das's disclosure had come to the attention of the DOE funding source, it is unlikely that it would have caused concern. Finally, retaliating against Mr. Das for that disclosure only increased, rather than eliminated, the likelihood that his disclosure would reach the DOE. Given these facts, Parsons's motive to retaliate against Mr. Das is extremely weak, if one exists at all. With respect to RCS, I find absolutely no motive to retaliate against Mr. Das for his disclosure.

3. Treatment of Similarly-Situated Employees

Mr. Das alleges that in the third week of October 2008, Mr. Niedbalski, his team leader, assured him that he would continue to work in the Pipe Stress Group for "as long as the project goes on." *Id.* at 463.[3] Mr. Das has argued that Mr. Niedbalski's statement illustrates that, as of mid-October, he held Mr. Das in high esteem, in contrast to Parsons's decision, two months later, to lay him off. The evidence demonstrates, despite Mr. Das's contention, that Parsons treated him in a similar manner to others in his position.

Mr. Niedbalski testified that Mr. Das, in his opinion, was one of his best performers, and that he had hoped to keep Mr. Das working in the Pipe Stress Group. *Id.* at 553, 577-78. Mr. Niedbalski provided Mr. Hughes, his supervisor, with a list of the pipe stress analysts, placed in three groups, and Mr. Das was among four or five in the top group. *Id.* at 552-53. Nevertheless, several of his best performers were laid off. *Id.* at 554. Those retained were not in Mr. Niedbalski's top-rated group. *Id.* at 579. These facts do not indicate to me that Parsons retaliated against Mr. Das in selecting him to be laid off despite Mr. Niedbalski's opinion of him; instead, it indicates to me that Mr. Somma did not give Mr. Niedbalski's ranking much weight in his decision, assuming he was even aware of its existence. In any event, the fact that other analysts whom Mr. Niedbalski had rated highly were laid off along with Mr. Das demonstrates that Mr. Das was treated similarly to others in this regard.

Other evidence in the record also points out that Mr. Das was treated in a similar fashion to others similarly situated to him. Within the Pipe Stress Group, three analysts, including Mr. Das, had been appointed to be checkers. While it appears that each of them was selected to be a checker because of his capabilities, none of the three were retained beyond December 18, 2008. *Id.* at 644. Moreover, one of those checkers, like Mr. Das, had also been involved in special projects. Nevertheless, he was released on the same day as Mr. Das. *Id.* at 462.

Based on the foregoing, I conclude that Parsons would have laid off Mr. Das even in the absence of his protected disclosures. As discussed above, RCS terminated Mr. Das's employment based solely on Parsons's representation that Mr. Das was to be laid off, and would have done so regardless of Parsons's reason for laying him off. Parsons's and RCS's reasons for their actions are convincing, the motive for retaliation is extremely weak, if present at all, and similarly situated employees were treated in the same manner as Mr. Das.

---

[3] Mr. Niedbalski testified that he did not recall making that promise to Mr. Das and, in his role, lacked the authority to make such a promise to anyone on his team. *Id.* at 551.

III. Conclusion

I conclude that Mr. Das made two protected disclosures, and that the second of those disclosures was a contributing factor to his termination. However, I find that Parsons and RCS have shown, by clear and convincing evidence, that they would have taken the same action even in the absence of the disclosures. Consequently, I conclude that Mr. Das is not entitled to the remedies that he seeks.

It Is Therefore Ordered That:

(1) The Request for Relief filed by Himadri K. Das under 10 C.F.R. Part 708 is hereby denied.

(2) This is an Initial Agency Decision, which shall become the Final Decision of the Department of Energy unless a party files a notice of appeal by the fifteenth day after the party's receipt of the Initial Agency Decision, in accordance with 10 C.F.R. § 708.32.

Office of Hearings and Appeals

Date: November 9, 2010

August 5, 2010

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Initial Agency Decision

Name of Petitioner: Douglas L. Cartledge

Date of Filing: March 9, 2010

Case Number: TBH-0096

This Initial Agency Decision involves a whistleblower complaint filed by Douglas L. Cartledge ("Cartledge" or "the Complainant") under the Department of Energy (DOE) Contractor Employee Protection Program, 10 C.F.R. Part 708. The Complainant was an employee of Parsons Corporation ("Parsons" or "the Contractor"), a first-tier contractor at the DOE Savannah River Site (SRS) in Aiken, South Carolina, where he was employed as a laborer. On August 6, 2009, he filed a complaint of retaliation ("the Complaint") against Parsons with the DOE SRS Employee Concerns Program (ECP) Office. In the Complaint, Cartledge contends that he made certain disclosures to Parsons and DOE officials and that Parsons retaliated by terminating his employment. The Complainant seeks reinstatement to his former position and back pay.

I. BACKGROUND

A. The DOE Contractor Employee Protection Program

The DOE's Contractor Employee Protection Program was established to safeguard public and employee health and safety; ensure compliance with applicable laws, rules, and regulations; and prevent fraud, mismanagement, waste and abuse at DOE's government-owned, contractor-operated facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purposes are to encourage contractor employees to disclose information that they believe reveals unsafe, illegal, fraudulent, or wasteful practices, and to protect those employees from consequential reprisals by their employers. 10 C.F.R. Part 708. Under the regulations, protected conduct includes:

> (a) Disclosing to a DOE official, a member of Congress, any other government official who has responsibility for the oversight of the conduct of operations at a DOE site, [the] employer, or any higher-tier contractor, information that [the employee] reasonably believes reveals –
>
> (1) A substantial violation of law, rule, or regulation;
>
> (2) A substantial and specific danger to employees or to public health or safety; or

(3) Fraud, gross mismanagement, gross waste of funds, or abuse of authority; or

(b) Participating in a Congressional proceeding or an administrative proceeding conducted under this part; or

(c) Subject to § 708.7 of this subpart, refusing to participate in an activity, policy, or practice if [the employee] believe[s] participation would –

(1) Constitute a violation of a federal health or safety law; or

(2) Cause [the employee] to have a reasonable fear of serious injury to [himself or herself], other employees, or members of the public.

10 C.F.R. § 708.5.

Part 708 sets forth the procedures for considering complaints of retaliation. The DOE's Office of Hearings and Appeals (OHA) is responsible for investigating complaints, holding hearings, and considering appeals. *See* 10 C.F.R. §§ 708.21 – 708.34.

B. Procedural Background

Cartledge filed the Complaint with the ECP Office on August 6, 2009,[1] alleging that Parsons terminated his employment in retaliation for his making protected disclosures. On October 15, 2010, the ECP Office forwarded the Complaint to Parsons, which then filed a response. The parties engaged in a mediation conference on December 16, 2009. The parties were unable to resolve the matter through mediation, and Cartledge requested that the Complaint be forwarded to the OHA for an investigation followed by a hearing. 10 C.F.R. § 708.28(a). The OHA received the Complaint on January 12, 2010, and the OHA Director appointed an attorney-investigator. After interviewing Cartledge and six other Parsons employees, and gathering numerous documents from both parties, the attorney-investigator issued a Report of Investigation (ROI) on March 9, 2010. On that same day, I was appointed as Hearing Officer in this matter. On March 16, 2010, I requested that the parties submit statements identifying any disagreements with the ROI. Letter from Diane DeMoura, OHA, to Douglas L. Cartledge, Complainant, and Lisa R. Claxton, counsel for Parsons (March 16, 2010).

I convened a hearing in Aiken, South Carolina, over a three-day period from May 18-20, 2010. Both parties submitted exhibits at the hearing. Cartledge submitted Exhibits 1 through 24, and Parsons submitted Exhibits A through OOO into the record. Cartledge testified on his own behalf, and called five additional witnesses. Parsons, represented by counsel, presented the testimony of five management employees and two non-management employees. *See* Transcript

[1] Cartledge contacted the ECP office to notify them of his complaint on August 6, 2009. He submitted his initial statement on August 10, 2009. Cartledge submitted additional statements to supplement his complaint on September 20, 2009, and October 14, 2009. The three submissions together are considered the Complaint in this proceeding.

of Hearing, Case No. TBH-0096 (hereinafter cited as "Tr."). The parties did not submit post-hearing briefs.

C. Factual Background

The pertinent facts in this proceeding are essentially undisputed. The following is a brief timeline of the events relevant to this proceeding.

Parsons is a DOE contractor at SRS in Aiken, South Carolina. The company has a contract to design and construct a Salt Waste Processing Facility (SWPF). Tr. at 325. Cartledge, an active member of the Augusta Building and Construction Trades Council, AFL-CIO, Union, Local 515 ("the labor union") was employed as a "Laborer" with Parsons from November 5, 2008, until his termination on August 6, 2009. Tr. at 40. According to the position description for a Parsons laborer, the laborer may be responsible for various tasks, including the following: physical labor at building and heavy construction sites; operation of hand and power tools, including air hammers, jack hammers, clay spades, earth tampers, cement mixers, concrete vibrators; cleaning and preparing sites; digging trenches; laying underground pipe; setting braces to support the sides of excavations; assisting in the erection of scaffolding; cleaning up rubble, debris, and hazardous waste materials; and assisting other craft workers. Ex. D. In addition, Parsons laborers, other craft personnel, and supervisory staff at the SWPF attend daily meetings to discuss the day's work, as well as weekly all-hands meetings on Monday mornings. *See, e.g.*, Tr. at 356, 426, 530. Safety-related issues are a frequent topic at those meetings. *See* Exs. HHH, III. When Cartledge began working at the SWPF project, he worked on a laborer crew whose primary responsibility was to work with concrete. Tr. at 38.

On April 10, 2009, Cartledge's then-foreman, William Fallen, assigned a task to Cartledge. Cartledge, in turn, instructed an apprentice to begin the task. Tr. at 94. Fallen objected to Cartledge's assignment of the task to the apprentice. *Id*. Fallen and Cartledge argued about whether Cartledge or the apprentice should perform the assigned task, and this argument resulted in Cartledge being verbally reprimanded for insubordination to his foreman.[2] *Id*.; s*ee also* Ex. I.

On July 10, 2009, while searching for the contact information for the ECP Office, Cartledge observed that a required ECP notice was missing from its usual location on a bulletin board in the craft tent. Cartledge notified James Goodall, the Parsons Labor Relations Specialist, of the missing notice. Goodall obtained a copy of the notice for Cartledge and replaced the missing copy. Tr. at 112. Also on July 10, 2009, Cartledge was transferred to a different crew whose main duties included site clean-up and maintenance, despite his preference to remain on the concrete crew.[3] Ex. B. On July 15, 2009, a representative from the labor union held a meeting with the laborers at the SWPF site in the craft tent, during which the laborers discussed various concerns regarding their work. Complaint; ROI at 3. In addition, on several occasions in July 2009, Cartledge contacted the ECP Office to raise concerns regarding his working conditions. *See* Exs. 1, 4; Ex. M. Relevant to this proceeding, among Cartledge's allegations was that, while assigned to "weed-eater duty," he was stationed away from drinking water and was routinely

[2] The reprimand was documented in a "Verbal Record of Category Three Work Rule Violation." Ex. I.

[3] The official payroll time records indicate that the Complainant was officially transferred on July 13, 2009. Ex. B.

assigned to work alone in high heat conditions, in alleged violation of Parsons' "buddy system." *Id*.

On August 5, 2009, a lawnmower threw a rock, which broke a window of the site administration building. Ex. Z. Following this incident, Cartledge was assigned the task of picking up rocks around the administration building. Cartledge alleged that, as a result of bending over and straightening repeatedly while performing this task, he became ill and had to leave work early that day. Complaint; *see also* Tr. at 186.

During an August 6, 2009, morning meeting, Cartledge questioned Michael Quattro, Parsons' Construction Safety Manager, about the company's policies for addressing worker heat stress. Complaint; Tr. at 181-82, 454-55. Seeing that Cartledge was not satisfied with his response, Quattro told Cartledge that they could continue the conversation in Quattro's office in the safety trailer after the meeting if Cartledge needed more information or had additional questions. Tr. at 455. Following the meeting, Cartledge was again assigned the task of picking up rocks around the administration building. Tr. at 186. While completing this task, Cartledge again reported feeling ill and asked to go to the site safety office to seek medical attention. Michael Lynn, Parsons' Construction Superintendent at the SWPF site, accompanied Cartledge. Tr. at 455.

When they arrived at the safety office, Cartledge informed Quattro that he was not feeling well and informed him that a prior medical condition was aggravated by Cartledge's repeated bending over and straightening while picking up rocks. Tr. at 186, 455. Quattro was unaware of the condition Cartledge described and noted that Cartledge did not have any medically-necessary work restrictions in his file. Quattro suggested that Cartledge complete his task with a shovel to eliminate the need for repeated bending over and straightening. Tr. at 457. During this visit to the safety trailer, Cartledge also again raised concerns regarding Parsons' heat stress procedures, including the concern that Parsons was not responding appropriately to high heat conditions and was jeopardizing worker safety. Tr. at 455. Cartledge was dissatisfied with the answers he received and soon the conversation escalated into an argument. Lynn observed the argument. *Id*., Tr. at 529.

Later that day, while he was continuing with his assignment of picking up rocks, Cartledge was called to see Michael Lynn. Lynn informed Cartledge that he was being terminated for insubordination due to his interactions with Quattro. Tr. at 70.

II. FINDINGS OF FACT AND ANALYSIS

A. Whether the Complainant Engaged in Protected Conduct That Was a Contributing Factor to an Alleged Retaliation

A complainant "has the burden of establishing by a preponderance of the evidence that he or she made a disclosure, participated in a proceeding, or refused to participate, as described under Section 708.5, and that such act was a contributing factor in one or more alleged acts of retaliation against the employee by the contractor." 10 C.F.R. § 708.29. The term "preponderance of the evidence" means proof sufficient to persuade the finder of fact that a proposition is more likely true than not when weighed against the evidence opposed to it.

See Joshua Lucero, Case No. TBH-0039 (2006) (*citing Hopkins v. Price Waterhouse*, 737 F. Supp. 1202, 1206 (D.D.C. 1990)).

1. Whether the Complainant Engaged in Protected Conduct

Protected conduct includes the disclosure of information to a DOE official or the individual's employer that the individual reasonably believes reveals "a substantial violation of a law, rule, or regulation;" "a substantial and specific danger to employees or to public health or safety; or "fraud, gross mismanagement, gross waste of funds, or abuse of authority." 10 C.F.R. § 708.5(a).

In the ROI, the attorney-investigator identified the alleged protected disclosures in Cartledge's complaint. The parties stipulated that certain disclosures were not protected.[4] Therefore, the hearing focused on the following four disclosures: (1) Cartledge's July 10, 2009, disclosure to Parsons' Labor Relations Specialist that a required ECP notice was not posted in its usual location; (2) Cartledge's subsequent July 2009 disclosures to the ECP Office regarding his assignment to weed-eater duty; (3) Cartledge's alleged disclosures during a July 15, 2009, meeting between the laborers at the SWPF and a union representative; and (4) Cartledge's August 6, 2009, disclosures regarding whether Parsons was adhering to its heat stress procedures. As the discussion below indicates, the August disclosure rises to the level of a protected disclosure, but none of the July disclosures are protected.

a. The August 6, 2009, Disclosures Regarding Parsons' Heat Stress Procedures

As indicated above, the following is undisputed. On August 6, 2009, Cartledge raised concerns during a morning safety meeting regarding whether Parsons was properly administering to heat stress on the SWPF site. Cartledge asked Michael Quattro, the Construction Safety Manager, why Parsons was not taking appropriate actions in response to the high temperatures at the work site, such as instituting a work-rest regimen. Tr. at 181-82. Cartledge further stated that he had heard public address announcements elsewhere at SRS regarding heat-stress levels and questioned Quattro's explanation that temperatures had not reached the point where the heat stress procedures would take effect. *Id*. Cartledge expressed the view that his employer was exposing employees to danger by ignoring their physical safety on days where employees were working outside in high heat. *Id*. Because it was a daily safety meeting, several Parsons management personnel were present. *Id*. Later the same day in Quattro's office, Cartledge again questioned Quattro regarding whether Parsons had failed to follow its heat stress procedures and ignored employees' physical safety. Cartledge asked to see the temperature readings taken at the SWPF and inquired as to how Quattro determined whether to take any actions to protect employees working in the heat. Tr. at 455. Michael Lynn was present during that conversation. *Id*.

[4] In the ROI, in a section titled "Disclosures Not Likely To Be Protected," the attorney-investigator identified several disclosures that did not appear to rise to the level of protected disclosures. ROI at 4-5. During a May 5, 2010, pre-hearing telephone conference, the parties stipulated that those disclosures fall outside the ambit of Part 708 and, therefore, were outside the scope of the instant proceeding. *See* Record of Pre-Hearing Telephone Conference, May 5, 2010.

Parsons maintains that Cartledge's disclosure is not protected under Part 708, stating that Cartledge raised the issue after hearing announcements regarding heat stress procedures by other contractors at SRS and that he could not have reasonably believed that Parsons was required to follow the policies of other contractors. I find this argument to be without merit. Cartledge, having heard an announcement that temperatures were hot enough at SRS to prompt a response by another contractor, questioned whether Parsons was adequately protecting hundreds of employees from the high heat.[5] The fact that another contractor made such an announcement supports Cartledge's position that he reasonably believed that he was disclosing a substantial and specific danger to employees. Therefore, I find that Cartledge's safety concern, which he raised to the Parsons Site Safety Manager, and other management personnel, regarding Parsons' heat stress procedures is a protected disclosure within the meaning of Part 708.

b. The July Disclosures

Cartledge has not established that he reasonably believed that the July 10, 2009, disclosure regarding the missing ECP poster is a protected disclosure. The Part 708 regulations do require that contractors inform their employees of the Part 708 program by "posting notices in conspicuous places at the work site." 10 C.F.R. § 708.40. However, Cartledge could not have reasonably believed that the absence of the notice, which he had seen earlier, revealed a violation, let alone a *substantial* violation, of the Part 708 regulations. Cartledge admitted that he was aware that Parsons maintained another bulletin board outside, which is covered with a hard plastic sheet, making posters less susceptible to removal, and that the ECP notice was likely also posted there. Tr. at 111-12. Indeed, when Cartledge asked for a copy of the notice, James Goodall, the Parsons Labor Relations Specialist, immediately provided Cartledge with a copy. Tr. at 112. Accordingly, I cannot find that Cartledge reasonably believed that his disclosure of the absence of the ECP notice revealed a substantial violation of law, rule, or regulation.

Similarly, Cartledge's July 2009 disclosures to the ECP Office were not protected. Cartledge filed concerns with the ECP Office regarding his assignment to the task of weed-eating. Cartledge reported that his supervisors abused their authority by assigning him to the same task several days in a row, and that they endangered his safety by assigning him to work alone in remote locations away from drinking water. Cartledge's assertions are unfounded. Although Cartledge did not like the task to which he was assigned, at no time was he assigned any tasks falling outside those listed in the position description for a laborer. Tr. at 57-60 (Cartledge's testimony), 348-51 (Hyder's testimony). In addition, water was readily available to Cartledge. He had the option to carry water with him, walk to stationary water coolers, or call for water to be brought to his location. Tr. at 219-22 (co-worker's testimony), 332-33 (Hyder's testimony). Cartledge's expressed belief that those options were undesirable or inconvenient does not amount to a denial of access to water. Moreover, while Parsons encourages workers to look out for one another on hot days, there is no rule requiring employees to be assigned to tasks in pairs. Tr. at 282, 297, 303 (foreman's testimony). Finally, the SWPF site is not overly large, and the areas where Cartledge was assigned to work are heavily trafficked during the workday. Tr. at 328 (Hyder's testimony), 714-15 (Head's testimony); *see also* Ex. JJ. Based on these facts, Cartledge could not have reasonably believed that he was disclosing "a substantial violation of a

[5] Mark Hyder, the Daytime General Superintendent, testified that Parsons has approximately 300 employees on the SWPF site. Tr. at 319.

law, rule, or regulation;" "a substantial and specific danger to employees or to public health or safety; or "fraud, gross mismanagement, gross waste of funds, or abuse of authority." Therefore, his disclosures to the ECP Office do not rise to the level of protected disclosures.

Finally, Cartledge's alleged July 15, 2009, disclosures during the laborers' meeting with the union representative were not protected disclosures. First, there is little evidence in the record regarding what Cartledge disclosed at the meeting. Cartledge alleges generally that he raised concerns regarding assignment of work tasks and other safety issues, but could not recall with any specificity exactly which safety issues he discussed. Cartledge's notes from July 15, 2009, indicate only that he complained to the union representative about "chain of command," *i.e.*, the process for assigning job tasks. Ex. C. One of Cartledge's co-workers testified that she remembered that Cartledge raised concerns at the meeting, but could not recall the nature of the concerns. Tr. at 234. Such general allegations do not meet the threshold for a protected disclosure under Section 708.5. *See David K. Isham*, Case No. TBH-0046 (2007) (complainant's alleged disclosure too general to satisfy evidentiary burden). Moreover, even if Cartledge disclosed information that could be the basis for a protected disclosure under Part 708, no DOE officials or Parsons management personnel were present. Although Cartledge and two of his witnesses alleged that James Goodall and Michael Lynn were present during the meeting, Tr. at 120 (Cartledge's testimony), 233, 549 (co-workers' testimony), both Goodall and Lynn denied being present, Tr. at 509 (Lynn), 635-36 (Goodall). Likewise, other witnesses did not recall either Goodall or Lynn being present during the meeting. Tr. at 247, 693 (co-workers). Rather, they recalled the meeting involving only the laborers and the union representative. Therefore, even if Cartledge had made any disclosures during the meeting, they do not rise to the level of a protected disclosure under Part 708 because they were not made to, or in the presence of, DOE officials or Parsons management personnel.

2. Whether Protected Activity Was a Contributing Factor to a Retaliation

An individual must show, by a preponderance of the evidence, that his or her protected disclosure or conduct was a contributing factor in an retaliation. 10 C.F.R. § 708.29. Accordingly, I consider whether the August 6, 2009, disclosure was a contributing factor to an alleged retaliation.

A retaliation is "an action (including intimidation, threats, restraint, coercion or similar action) taken by a contractor against an employee with respect to employment (e.g. discharge, demotion, or other negative action with respect to the employee's compensation, terms, conditions, or privileges of employment) as a result of the disclosure of information." 10 C.F.R. § 708.2. Cartledge alleges that Parsons retaliated against him by (1) transferring him from one crew to another (on July 10, 2009), (2) assigning him to belittling tasks (from July 10, 2009, until August 6, 2009) and (3) terminating his employment (on August 6, 2009). Since the first two alleged retaliations occurred before the August 6, 2009, protected disclosure, that disclosure could not have been a contributing factor. Accordingly, I turn to whether the August 6, 2009, disclosure was a contributing factor to Cartledge's termination on the same date.

In prior decisions of the Office of Hearings and Appeals, we have stated:

> A protected disclosure may be a contributing factor in a personnel action where "the official taking the action has actual or constructive knowledge of the disclosure and acted within such a period of time that a reasonable person could conclude that the disclosure was a factor in the personnel action."

Jonathan K. Strausbaugh, Case No. TBH-0073 (2008) (internal citations omitted). In this case, Parsons management was aware that Cartledge made a protected disclosure during the August 6, 2009, morning meeting. Cartledge was terminated on the same day. Based on Parsons' knowledge and the temporal proximity between the protected disclosure and the alleged retaliation, I find that a reasonable person could conclude that Cartledge's protected disclosure was a factor in his termination. *See id*. (two weeks between disclosure and alleged retaliation sufficiently proximate in time); *see also David L. Moses*, Case No. TBH-0066 (2008) (eight days sufficiently proximate in time). Consequently, I now turn to Parsons' contention that it would have terminated Cartledge even in the absence of a protected disclosure.

B. Whether the Contractor Would Have Taken the Same Action in the Absence of the Protected Disclosure

Once a complaining employee has met the burden of demonstrating that conduct protected under Section 708.5 was a contributing factor to a retaliation, "the burden shifts to the contractor to prove by clear and convincing evidence that it would have taken the same action without the employee's [protected conduct]." 10 C.F.R. § 708.29. "Clear and convincing evidence" requires a degree of persuasion higher than preponderance of the evidence, but less than "beyond a reasonable doubt." *David L. Moses*, Case No. TBH-0066 (2008) (*citing Casey Von Bargen*, Case No. TBH-0034 (2007)).

It is well settled that several factors may be considered in determining whether an employer has shown, by clear and convincing evidence, that it would have taken the alleged act of retaliation against a whistleblower in the absence of the whistleblower's protected conduct. The factors include "(1) the strength of the [employer's] reason for the personnel action excluding the whistleblowing, (2) the strength of any motive to retaliate for the whistleblowing, and (3) any evidence of similar action against similarly situated employees . . . ." *Dennis Patterson*, Case No. TBH-0047 (2008) (*quoting Kalil v. Dep't of Agriculture*, 479 F.3d 821, 824 (Fed. Cir. 2007)).

As just indicated, the first factor in *Kalil* is the strength of the employer's reason for the adverse action. In this case, the termination letter cites "insubordination" and "failure to complete work task efficiently" as the reasons for Parsons' decision to terminate Cartledge. Ex. ZZ. Parsons management testified extensively on the rationale for the termination.

Michael Quattro testified that he was offended by Cartledge's attitude toward him on August 6, 2009, and that Cartledge's behavior was inappropriate. Tr. at 458. Quattro testified that Cartledge questioned him during the morning meeting about Parsons' heat stress procedures and was not satisfied was his response. Tr. at 454-55. Because Quattro felt they were not getting the issue resolved, Quattro told Cartledge they could continue the conversation after the meeting in his office if Cartledge wanted additional information. *Id*. Mark Hyder, the Daytime General

Superintendent, believed Carteldge became confrontational when discussing his concerns with Quattro. Tr. at 357. Later that morning, Cartledge and Michael Lynn went to Quattro's office in the safety trailer because Cartledge stated that he was not feeling well. Tr. at 455. After discussing Cartledge's condition, the topic again turned to heat stress. Tr. at 457. Quattro testified that Cartledge was "accusatory" and "argumentative," accused Quattro of lying, and was "attacking [his] honesty and integrity." Tr. at 458. Lynn observed the confrontation and felt that Cartledge crossed the line with Quattro. Tr. at 529-30. Lynn was disturbed by Cartledge's behavior toward a manager and brought the matter to the attention of Craig Head, the General Superintendent. *Id*. (Lynn), 735 (Head).

Parson's project work rules very clearly define types of disciplinary violations and their consequences. A first instance of insubordination is defined as a "Category Two" violation and is subject to suspension. Tr. at 376 (Hyder); *see also* Ex. AA. Repeated insubordination is designated as a "Category One" violation and can result in immediate termination. *Id*. Cartledge had been insubordinate to his foreman on April 10, 2009. Tr. at 291-94, Ex. I. Four months later, on August 6, 2009, he was insubordinate to the Michael Quattro, the Construction Safety Manager. Charles Head testified that, after learning of Cartledge's confrontation with Quattro, he made the decision to terminate Cartledge because it was not Cartledge's first incident of insubordination. Head further testified that he was not aware of any individuals who had engaged in repeated insubordination who had not been terminated and he believed the decision to terminate Cartledge's employment was consistent with how other cases of repeated insubordination had been handled. Tr. at 717.

Based on the foregoing, applying the first factor set forth in *Kalil* – the strength of the reason for the personnel action – the record as a whole supports a finding that the reason for the decision to terminate Cartledge's employment was that Cartledge's confrontation with the site safety manager was his second instance of insubordination in four months. I further find that the nature of the confrontation itself and the company's express policy regarding repeated instances of insubordination is evidence of the strength of the reason for the termination.

As for the second factor – the strength of any motive to retaliate against Cartledge for his protected disclosure – I find no evidence of any such motive. Parsons conducts extensive and mandatory safety training for incoming employees. Tr. at 429-33 (Quattro), 625-32 (Goodall); *see also* Exs. JJJ – OOO. The safety personnel maintain an incentive program recognizing employees who raise safety concerns, report "near-misses," or suggest safety topics for meetings. Tr. at 388 (safety specialist), 426-28 (Quattro). The weekly all-hands meetings and daily laborers' meetings focus on safety topics. Tr. at 354 (Hyder), 426 (Quattro). In addition, the employees discuss safety issues during their daily meetings. Tr. at 356 (Hyder), 386 (safety specialist), 426 (Quattro), 530-31 (Lynn). Employees are allowed to stop work on a task if they feel it is unsafe without fear of retaliation or other negative consequences. Tr. at 387-88 (safety specialist), 432-33 (Quattro). The record as a whole supports a conclusion that Parsons employees at the SWPF are encouraged to raise safety concerns without fear of reprisal. Therefore, applying the second *Kalil* factor, I find no evidence of any motive on the part of the company to retaliate against Cartledge for raising a safety concern.

The final factor set forth in *Kalil* is whether there is any evidence that the employer has taken similar action against similarly situated employees. Parsons submitted termination notices of two other employees terminated for repeated insubordination. One employee was terminated on June 4, 2009 for insubordination. That employee refused to do his job and then had a confrontation with his foreman. Ex. T. The other employee was terminated for insubordination on December 9, 2008, as a result of failing to perform a task as instructed and demonstrating a "poor attitude." Ex. BBB. Mark Hyder, the Daytime General Superintendent, also testified that he recalled several instances of repeatedly insubordinate employees being terminated. Tr. at 373-75. Finally, Craig Head, the General Superintendent, testified that he recalled at least one other employee who was terminated for insubordination. Tr. at 736.

Considering all of the relevant factors as applied to the evidence discussed above, I am convinced that, in light of Cartledge's prior instance of insubordination toward his foreman, Parsons would have chosen to terminate Cartledge's employment following his insubordinate behavior toward Michael Quattro, regardless of whether Cartledge had engaged in any activity protected under Part 708. Therefore, I find that Parson has proven, by clear and convincing evidence, that it would have terminated Cartledge's employment on August 6, 2009, in the absence of Cartledge's protected disclosure on the same day.

IV. CONCLUSION

As set forth above, I have concluded that the Complainant made one protected disclosure and has proven by a preponderance of the evidence that the protected disclosure was a contributing factor to his termination. I have determined, however, that the Contractor has provided clear and convincing evidence that it would have terminated the Complainant even if he had not made his protected disclosure. In conclusion, I find that Cartledge has failed to establish the existence of any violations of the DOE Contractor Employee Protection Program for which relief is warranted under Part 708.

It Is Therefore Ordered That:

(1) The complaint filed by Douglas L. Cartledge under 10 C.F.R. Part 708, Case No. TBH-0096, is hereby denied.

(2) This is an initial agency decision that becomes the final decision of the Department of Energy unless a party files a notice of appeal by the fifteenth day after the party's receipt of the initial agency decision. 10 C.F.R. § 708.32.

Diane DeMoura
Hearing Officer
Office of Hearings and Appeals

Date: August 6, 2010

November 9, 2010

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Motion to Dismiss
Initial Agency Decision

Names of Petitioners:	Mark D. Siciliano Battelle Energy Alliance LLC
Dates of Filings:	March 15, 2010 August 16, 2010
Case Numbers:	TBH-0098 TBZ-0098

This Decision will consider a Motion to Dismiss filed by Battelle Energy Alliance LLC (Battelle), the Management and Operating Contractor for the Department of Energy's (DOE) Idaho National Laboratory (INL), in connection with the pending Complaint of Retaliation filed by Mark Siciliano against Battelle under the DOE's Contractor Employee Protection Program and its governing regulations set forth at 10 C.F.R. Part 708. The Office of Hearings and Appeals (OHA) assigned the hearing component of Mr. Siciliano's Part 708 Complaint proceeding, Case No. TBH-0098, and Battelle's Motion to Dismiss, Case No. TBZ-0098. For the reasons set forth below, I have determined that Battelle's Motion should be granted and that Mr. Siciliano's Complaint of Retaliation should be dismissed.

I. Background

A. The DOE Contractor Employee Protection Program

The DOE's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent fraud, mismanagement, waste and abuse" at DOE's government-owned, contractor-operated facilities." 57 Fed. Reg. 7533 (March 3, 1992). Its primary purpose is to encourage contractor employees to disclose information which they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers.

The regulations governing the DOE's Contractor Employee Protection Program are set forth at Title 10, Part 708 of the Code of Federal Regulations. The regulations provide, in pertinent part, that a DOE contractor may not discharge or otherwise discriminate against any employee because that employee has disclosed, to a DOE official or to a DOE contractor, information that the employee reasonably believes reveals a substantial violation of a law, rule, or regulation; a

substantial and specific danger to employees or to the public health or safety; or, fraud, gross mismanagement, gross waste of funds, or abuse of authority. *See* 10 C.F.R. § 708.5(a)(1)-(3). Available relief includes reinstatement, back pay, transfer preference, and such other relief as may be appropriate. *Id.* at § 708.36.

Employees of DOE contractors who believe they have been discriminated against in violation of the Part 708 regulations may file a whistleblower complaint with the DOE and are entitled to an investigation by an investigator from the Office of Hearings and Appeals (OHA), an independent fact-finding and a hearing by an OHA Hearing Officer, and an opportunity for review of the Hearing Officer's Initial Agency Decision by the OHA Director. 10 C.F.R. §§ 708.21, 708.32.

B. Procedural History

Mr. Siciliano filed his Part 708 Complaint on December 11, 2009, at the DOE's Idaho Operations Office. In his Complaint, Mr. Siciliano alleged that, during 2008 and 2009, he made a number of protected disclosures and, as a result of his so doing, Battelle engaged in a series of retaliatory actions against him, including reassigning him to a new position in December 2009. Battelle filed its response to the Part 708 Complaint on March 4, 2010, contesting that Mr. Siciliano had made any disclosure protected under Part 708, and arguing that Mr. Siciliano's reassignment was not retaliatory for a number of reasons, including that the reassignment did not result in a materially adverse change in his employment conditions. The Employee Concerns Manager of the Idaho Operations Office transmitted the Complaint to OHA for an investigation, followed by a hearing when informal resolution of the Complaint proved unsuccessful.

On March 16, 2010, the OHA Director appointed an Investigator (OHA Investigator) who conducted an investigation into the allegations contained in Mr. Siciliano's Complaint. During the course of the investigation, Mr. Siciliano filed a supplemental complaint, alleging that Battelle had engaged in further retaliation by excluding him from a March 2010 meeting involving his area of expertise. The OHA Investigator advised the parties that she would consolidate the supplemental complaint filing with her investigation of the December 2009 Complaint. On June 30, 2010, the OHA Investigator issued the Report of Investigation (ROI) in this case. In the ROI, the OHA Investigator concluded that of the ten alleged protected disclosures, only one was arguably a protected disclosure under Part 708.[1] With regard to that one disclosure, the OHA Investigator found that Mr. Siciliano cannot demonstrate, by a preponderance of the evidence, that this protected disclosure was a contributing factor to the decision to reassign him. Moreover, the OHA Investigator found that even if Mr. Siciliano could meet his evidentiary burden in this case, it is likely that Batelle would be able to demonstrate by clear and convincing evidence that it would have reassigned Mr. Siciliano absent any proven protected disclosure.

[1] The OHA Investigator found that eight of the ten disclosures were not, on their face, protected disclosures. She also found that with respect to a ninth disclosure, Mr. Siciliano had not demonstrated, by a preponderance of the evidence, that he reasonably believed that Battelle was requiring its employees to admit responsibility on a security form for actions that they did not commit.

Immediately after the ROI was issued, the OHA Director appointed me the Hearing Officer in this case. On July 14, 2010, I sent a letter to the parties and asked them to submit briefs addressing the following issues:

(1) Whether they agree with the Investigator's assessment that eight[2] of the ten alleged disclosures made by Mr. Siciliano are not protected under 10 CFR Part 708;
(2) Whether there is any evidence to support a finding that Mr. Siciliano had a "reasonable" belief that Battelle was requiring its employees to admit responsibility on DOE Form 5639.3 for security infractions that they did not commit;
(3) Whether there is any evidence to support a finding that Mr. Siciliano's allegations regarding a Batelle senior manager (*i.e.* that the senior manager had not met a security reporting requirement) was a contributing factor to an act of retaliation;
(4) Whether Mr. Siciliano's December 2009 reassignment constituted an act of retaliation for purposes of 10 CFR Part 708;

Mr. Siciliano submitted his brief on these issues on August 4, 2010; Battelle tendered its brief on August 15, 2010. I subsequently requested additional information from Mr. Siciliano on the issue of remedies in this case. Mr. Siciliano filed a "Statement of Requested Remedies" on September 24, 2010, and supplemented that filing, *sua sponte*, on October 14, 2010.

C. Factual Overview

Battelle hired Mr. Siciliano in May 2007 to work as a Relationship Manager supporting the U.S. Special Operations Command (SOCOM) in INL's National and Homeland Security Directorate (the Directorate) under Dr. K. P. Ananth, INL's Associate Director. In August 2007, Mr. Siciliano became the Acting Manager for the Special Materials and Processes Department and reported to Wayne Austad. One year later, in August 2008, Mr. Siciliano accepted a permanent position as Manager for the Special Materials and Processes Department with collateral duties as the Relationship Manager for the SOCOM.

In December 2008, the Directorate discovered a classified document that had been misplaced at some earlier date. An inquiry ensued and several members of Mr. Siciliano's department and he were questioned about their knowledge of, and possible involvement with, the misplaced document. Eventually, several of Mr. Siciliano's employees and he were required to complete

[2] Those eight purported disclosures are: (1) the "suggestions" provided by Mr. Siciliano during 2008 and 2009 to "improve his [division's] security posture," including a February 2009 memorandum to his leadership; (2) Mr. Siciliano's statement in June 2009 to a DOE official that a DOE security requirement was overly restrictive; (3) the "value statements" drafted by Mr. Siciliano in July 2009 to improve leadership and management in his division; (4) the verbal exchange that Mr. Siciliano had in August 2009 with a higher-level Battelle manager who allegedly improperly attributed security shortfalls to Mr. Siciliano's department; (5) the equity concern submitted by Mr. Siciliano in October 2009 in which Mr. Siciliano alleged that he was misled when he was hired as a "Department Manager 3;" (6) Mr. Siciliano's objection in November 2009 to Battelle's decision to divest itself from certain work; (7) Mr. Siciliano's belief that Battelle management perceived him not to care about security; and (8) Mr. Siciliano's disability. Each disclosure set forth above will be referred to in this Decision by the corresponding numeric designation given in this footnote. In addition, Disclosure Number 9 will refer to Mr. Siciliano's allegations that a senior manager had not met a security reporting requirement, and Disclosure Number 10 will refer to Mr. Siciliano's communications concerning the security incident report at issue in his Complaint.

Part II of DOE Form 5639.3, entitled, "Notification of Security Incident" (hereinafter referred to as DOE Form 5639.3 or the relevant security form).[3] One of Mr. Sicilano's disclosures concerns his view that Battelle was requiring its employees to admit responsibility by completing the security incident reporting form in question. The record contains the relevant security forms for Mr. Siciliano and four of his employees. Box 2 on each of the relevant security forms is entitled, "Name and title of person responsible for incident." Battelle Security had typed the names, titles, social security numbers and organization code for Mr. Siciliano and his four employees in Box 2 when it presented DOE Form 5639.3 to each of them. Box 3 had pre-typed the clearance number for each of the five persons in question.

Each of Mr. Siciliano's employees denied involvement with the security incident in question and refused to sign the box requesting the signature of the responsible individual. In addition, Mr. Siciliano, as the supervisor for each of the four, completed Box 7 which asked for the corrective or disciplinary action flowing from the security incident by noting the following: (1) there was no objective proof indicating the employee was responsible; (2) that he had counseled the employee regarding their option to file grievances through Employee Concerns and HR; and (3) some employees had used the term "witch hunt" in connection with their having to complete Part II of the relevant security form. Mr. Siciliano signed each of the relevant security forms in his capacity as supervisor on March 4, 2009, March 5, 2009, March 20, 2009, and March 20, 2009 respectively.

Regarding his own DOE Form 5639.3, Mr. Siciliano prepared a memorandum on July 1, 2009, in which he denied knowledge of the security incident and pointed out that the incident had occurred prior to his becoming a Battelle employee. He also complained that he is identified on that form as "the person responsible for this incident and was being asked to sign the form as the person responsible for the incident." Mr. Siciliano also stated that he believed the DOE form "implies guilt and is not in alignment with the most rudimentary roots of due process." He added that "it is offensive, arbitrary and capricious to say the least and it needs to be revised. . ."

Dr. Ananth, INL's Associate Director, was aware of Mr. Siciliano's objection to Battelle's use of DOE Form 5639.3 and had heard from the Director of Battelle's Safeguards and Security Office that Mr. Siciliano was telling his employees to go to Human Resources concerning the forms. Dr. Ananth reported to the OHA Investigator that he had met with Mr. Austad about the matter.

On July 1, 2009, Mr. Siciliano's immediate supervisor, Wayne Austad, completed Part II of DOE Form 5639.3 for Mr. Siciliano. Mr. Austad first crossed out the words, "responsible for the incident" in two places on the form. Next, he related the following three points which are important to this Decision: (1) he had discussed with Mr. Siciliano that the form is used as part of the investigation process and does not establish culpability; (2) he opined that Mr. Siciliano's recommendation that the form needs to be revised to more accurately establish culpability and determine when an infraction should be issued was a good one; and (3) he stated that Mr. Siciliano had no clear role in the security incident.

[3] INL slightly modified DOE Form 5639.3 for its own use. The only difference between the DOE security form and INL's version of the security form is a negligible one, *i.e.* the INL form includes a box for the employee's clearance number.

Mr. Siciliano alleges in his Complaint that Battelle's senior management perceived him as not caring about security requirements, and Battelle viewed some of Mr. Siciliano's interactions with others, particularly DOE, as lacking a degree of professionalism. Mr. Siciliano's August 2009 mid-year performance evaluation reflects the latter viewpoint.

In June 2009, the Directorate's senior management began discussions regarding a reorganization in the Directorate. Mr. Siciliano's supervisor, Mr. Austad informed Mr. Siciliano in August 2009 about the reorganization and that he would not be assigning Mr. Siciliano to a department manager position in the upcoming reorganization. On October 1, 2009, Mr. Siciliano filed an equity concern with the Battelle Diversity Officer, arguing that he should be in a higher pay band and that he should be placed in a department manager position in the reorganization. Soon thereafter, on October 12, 2009, Mr. Siciliano reported to several managers that Dr. Ananth had allegedly failed to follow security reporting requirements. In November 2009, Mr. Siciliano complained to upper management about Dr. Ananth's decision to discontinue doing a particular kind of work. In December 2009, the Directorate announced the reorganization. The reorganization eliminated two divisions, including Mr. Austad's division which included the department headed by Mr. Siciliano. Mr. Austad was reassigned to a relationship manager position, with collateral duties. The functions of Mr. Siciliano's department were moved to an existing department in another division. Mr. Siciliano retained his relationship manager position and salary, but was placed in a higher pay band.

II. The Legal Standard

As noted above, the regulations set forth at 10 C.F.R. Part 708 provide an administrative mechanism for resolving whistleblower complaints filed by employees of DOE contractors. The regulations specifically describe the respective burdens imposed on the Complainant and the contractor with regard to their allegations and defenses, and prescribe the criteria for reviewing and analyzing the allegations and defenses advanced.

A. The Complainant's Burden

It is the burden of the Complainant under Part 708 to establish, by a preponderance of the evidence, that he or she made a protected disclosure, participated in a proceeding, or refused to participate as described in 10 C.F.R. 708.5, and that such act was a contributing factor to a retaliatory action. 10 C.F.R. § 708.29. The term "preponderance of the evidence" means proof sufficient to persuade the finder of fact that a proposition is more likely true than not when weighed against the evidence opposed to it. *See Joshua, Lucero*, Case No. TBH-0039 (2007), *citing Hopkins v. Price Waterhouse*, 737 F. Supp. 1202, 1206 (D.D.C. 1990). If Mr. Siciliano meets this threshold showing with regard to any of his alleged protected disclosures, he must next prove that at least one of his disclosures was a contributing factor to his reassignment or other act of retaliation. One way a complainant can meet this evidentiary burden is to provide evidence that "the official taking the action has actual or constructive knowledge of the disclosure and acted within such a period of time that a reasonable person could conclude that the disclosure was a factor in a personnel action." *See David Moses*, Case No. TBH-0066 (2008), *Ronald Sorri*, Case No. LWA-0001 (1993).

B. The Contractor's Burden

If the Complainant satisfies his evidentiary burden, the burden then shifts to the Contractor to show, by clear and convincing evidence, that it would have taken the same action absent any protected disclosures. "Clear and convincing evidence" requires a degree of persuasion higher than preponderance of the evidence, but less than "beyond a reasonable doubt." *See Casey von Bargen*, Case No. TBH-0034 (2007). OHA Hearing Officers have relied on the Federal Circuit for guidance in evaluating whether the contractor has met its evidentiary burden in a Part 708 case. *See David Moses*, Case No. TBH-0066 (2008), *Dennis Patterson*, Case No. TBH-0047 (2008). Specifically, the Federal Circuit, in cases interpreting the federal Whistleblower Protection Act (WPA), upon which Part 708 is modeled, examines: (1) the strength of the [employer's] reason for the personnel action excluding the whistleblowing, (2) the strength of any motive to retaliate for the whistleblowing, and (3) any evidence of similar action against similarly situated employees . . ." *See Kalil v. Dept. of Agriculture*, 479 F.3d 821, 824 (Fed. Cir. 2007).

III. Analysis

A. Disclosures Number 2, 3, 4, 7 and 8

Mr. Siciliano concedes in his August 4, 2010, Brief that five of his ten disclosures set forth in his Complaint do not fall within the definition of "protected disclosure" under 10 C.F.R. § 708.5. Siciliano Brief at 14. Those five disclosures are Disclosures Number 2, 3, 4, 7 and 8. Accordingly, I will dismiss those five disclosures from this proceeding.

B. Disclosure Number 1

Regarding Disclosure Number 1, *i.e.*, his "suggestions" in 2008 and 2009 to improve the security posture of his division, Mr. Siciliano now argues that the suggestions were actually disclosures of information that revealed a threat to the public safety. Siciliano Brief at 13. He argues further in his Brief that Battelle's failure to embrace his suggestions amounted to "gross misconduct." *Id.* at 14.

As an initial matter, Mr. Siciliano has not provided any information that would allow me to conclude that he communicated information to his management which revealed a *substantial and specific danger* to employees or to public health and safety (emphasis added) for purposes of 10 C.F.R. § 708.5(a)(2). In making this finding, I have reviewed an e-mail dated February 17, 2009, from Mr. Siciliano to a number of persons entitled, "security thoughts" which he appended to his Complaint as pages 8-11. The four-page e-mail lists a number of topics but is preceded by the introductory paragraph which states as follows:

> Thank you for volunteering to be our moderator for next week's security working Group. While it's fresh in my mind, I wanted to send you a few of my thoughts. Some of these suggestions may be out of my sphere of influence, but I'm hopeful that They will stimulate dialogue and other ideas from my colleagues.

There is nothing in the four-page e-mail that even remotely relates to a safety concern let alone a disclosure of a "substantial and specific danger to employees or to public health or safety." Hence, the "suggestions" do not rise to the level of a protected disclosure under 10 C.F.R. § 708.5 (a)(2).

As for Mr. Siciliano's contention that Battelle management's failure to embrace his suggestions constituted "gross mismanagement" or "gross misconduct," I find no support for this position in the documentary evidence in the case. There is nothing in the communications between Mr. Siciliano and Battelle management that suggests he was relating information that constituted "gross mismanagement." Rather, in its Brief, Battelle accurately characterizes Mr. Siciliano's suggestions as "brainstorming" in preparation for a meeting. *See* Battelle Brief at 18. Gross mismanagement "does not include decisions that are merely debatable, nor does it mean action or inaction which constitutes simple negligence or wrongdoing. There must be an element of blatancy. [It] means a management action or inaction that creates a substantial risk of significant adverse impact on the agency's ability to accomplish its mission." *See Embree v. Dept. of Treasury*, 70 M.S.P.R. 79 (1996). A careful reading of the e-mail in question shows that Mr. Siciliano listed "pros" and "cons" relating to his suggestions. The manner in which Mr. Siciliano communicated his suggestions indicates that the matters under discussion were "debatable." In addition, there is nothing in the e-mail or elsewhere in the record indicating that Mr. Siciliano ever stated that Battelle's failure to implement Mr. Siciliano's suggestions would create a substantial risk of significant adverse impact on INL's ability to accomplish its mission.[4] Hence, I find that there is no factual basis for Mr. Siciliano's contention that Battelle's failure to consider his security suggestions constitutes "gross mismanagement" or "gross misconduct" under 10 C.F.R. § 708.5(a)(3).

In the end, I must find that Mr. Siciliano did not make a protected disclosure for purposes of Part 708 when he made suggestions to improve the security posture of his department. Accordingly, I will dismiss Disclosure Number 1.

C. Disclosure Number 5

Mr. Siciliano challenges the OHA Investigator's finding that the equity concern he raised (Disclosure Number 5) with Battelle's Diversity group does not rise to the level of a protected disclosure under Part 708. In his Brief, Mr. Siciliano claims that Battelle fraudulently induced him to take a position at a particular grade based upon assertions that others managers were being paid at the same level. Brief at 11. He claims that Battelle arbitrarily assigned pay grades to persons essentially performing the same work. *Id.* According to Mr. Siciliano, this action constitutes an abuse of authority. *Id.*

[4] In his Brief, Mr. Siciliano claims that Battelle's senior leadership recently was required to brief Congress on some security matters which Mr. Sicliano now believes would not have been necessary had Battelle taken his suggestions. There is absolutely nothing in the record that links Mr. Siciliano's suggestions or "security thoughts" about policy matters to whatever inquiries Congress may have made recently to Battelle.

An abuse of authority occurs when there is an arbitrary or capricious exercise of power by a federal official or employee that adversely affects the rights of any person or that results in personal gain or advantage to himself or to other preferred persons. *Jessup V. Dept. of Homeland Security*, Docket No. AT-1221-07-0049-W-1 (September 17, 2007); *Wheeler v. Dept. of* Veterans *Affairs*, 88 M.S.P.R. 236 (2001); *Frank Isbell*, Case No. VWA-0034 (1999).

In its Brief, Battelle states that it performed a job audit and compensation review with regard to Mr. Siciliano's concerns. On December 22, 2009, a representative of Battelle's Diversity group met with Mr. Siciliano for two hours and reviewed its findings which included that Mr. Siciliano was properly classified as a "Manager 3," that Mr. Siciliano was the highest paid person occupying the "Manager 3" category, and the one person reviewed who occupied a Manager 4 position had been hired as a "strategic hire" and possessed a Ph.D. Battelle Brief at 7.

First, there is no information in the record to support Mr. Siciliano's position that he reasonably believed that Battelle management had abused its authority in not hiring him at a Manager 4 level, or that they had fraudulently induced him to take the position that was classified as a Manager 3 position. Second, even if Mr. Siciliano had presented such evidence, the record would not support a finding that any such disclosure in this regard could be construed as a contributing factor to the reorganization that resulted in Mr. Siciliano's transfer. Mr. Austad informed Mr. Siciliano in August 2009 about the reorganization and that he would not be assigning Mr. Siciliano to a department manager position in the upcoming reorganization. Mr. Siciliano filed his equity concern complaining about his job classification on October 1, 2009, **after** he learned of the impending reorganization. The senior managers at Battelle who made the decision to reorganize and eliminate two divisions, including the one in which Mr. Siciliano worked, could not have had any actual or constructive knowledge of a disclosure that was made **after** they had decided and informed Mr. Siciliano that the reorganization would occur. For all the foregoing reasons, I will dismiss Disclosure Number 5 from further consideration.

D. Disclosure Number 6

Mr. Siciliano also challenges the finding in the ROI that the concerns he voiced to upper-level management about Battelle's decision to divest itself from certain work did not constitute a protected disclosure. He argues that Battelle's action constituted "gross mismanagement" because it caused the loss of millions of dollars of future work for INL and adversely impacted the mission of the organization. Siciliano Brief at 12. He also contends that Dr. Ananth abused his authority in deciding not to continue doing a particular kind of work due to the security risks inherent in that kind of work because Dr. Ananth wanted to avoid risks to further his personal career. *Id.* at 13.

Mere differences of opinion between an employee and his supervisors as to the proper approach to a particular problem or the most appropriate course of action do not rise to the level of gross mismanagement. *See White v. Dept. of the Air Force*, 391 F.3d 1377 (Fed. Cir. 2004). Moreover, the Deputy Secretary of Energy in *Mehta v. Universities Ass'n*, 24 DOE ¶ 87,514 (1995) held that:

> Equating a particular type of disagreement to "mismanagement" as contemplated by the "whistleblower" regulations demands a careful balancing lest the term encompass all disagreements between a contractor and its employees . . .[t]here must be some assessment as to whether the nature of the disagreement evidences the type of disclosure of mismanagement that the regulation was designed to protect, at the same time granting appropriate deference to traditional management prerogatives needed to conduct an organization through teamwork.

Id. at 89,065.[5] OHA has followed the Deputy Secretary's holding in other cases. *See Ronny J. Escamilla*, Case No. VWA-0012 (1997).[6]

Deciding what kind of work to undertake and making risk assessments are inherently managerial functions. For this reason, I find that Mr. Siciliano's disagreement with management's decision to decline doing work that had associated security risks do not rise to the level of a protected disclosure in that it does not reveal "gross mismanagement."

As for Mr. Siciliano's contention that Dr. Ananth abused his authority in refusing to continue doing a particular kind of work, I find, based on the record, that Mr. Siciliano did not communicate his concerns in this regard in a way that a disinterested person would have construed his comments as claiming that Dr. Ananth had abused his authority. Mr. Siciliano clearly disagreed with Dr. Ananth's decision, but his statements belie any suggestion that he ever revealed his belief that Dr. Ananth had abused his authority. By way of example, I note that Mr. Siciliano provided an update to his boss on November 4, 2009, about the loss of work in which he stated that the "client was very disappointed with our decision" to stop the work, but that he fully understood the situation and would work with the group to explain Battelle's position and improve the group's reputation. This verbiage does not support Mr. Siciliano's claim of a protected disclosure.

For all the above reasons, I will dismiss Disclosure Number 6.

E. Disclosure Number 9

Mr. Siciliano contends that the OHA Investigator erred in finding that his allegations regarding a senior manager at Battelle were not a contributing factor to his reassignment. I find no merit to Mr. Siciliano's argument.

As noted in Section I. C. above, Battelle management informed Mr. Siciliano in August 2009 that the Directorate in which he worked would be reorganized and that he would not be retaining his Manager position in the newly reorganized Directorate. Two months after he learned of the reorganization and that he would not be assigned to a management position (on October 12,

---

[5] It is noteworthy that the *Mehta* case was decided under an earlier version of the Part 708 regulations, one that allowed disclosures of mere mismanagement, as opposed to gross mismanagement, to proceed under Part 708.

[6] Decisions issued by the Office of Hearings and Appeals (OHA) are available on the OHA website located at http://www.oha.doe.gov. The text of a cited decision may be accessed by entered the case number of the decision in the search engine located at http://www.oha.doe.gov/search.htm.

2009), Mr. Siciliano reported his concerns about Dr. Ananth to several managers. Battelle managers could not have had actual or constructive knowledge of Mr. Siciliano's October 12, 2009, disclosure when they told him in August 2009 about their decision to reorganize the Directorate and his fate in the reorganization. Thus, I must find that the information revealed by Mr. Siciliano about Dr. Ananth was not a contributing factor to his reassignment as the result of the reorganization.

F. Disclosure Number 10

In his Complaint, Mr. Siciliano contends that he told Battelle management that his employees were being required to admit responsibility for security infractions that they did not commit. In the ROI, the OHA Investigator noted that Battelle had given Mr. Siciliano a written memorandum explaining that the security form in question was to be used for the employees to provide their version of events. The OHA Investigator found, for this reason, that Mr. Siciliano had not proven by a preponderance of evidence that he reasonably believed that Battelle was requiring it employees to admit guilt on a certain security form. In his Brief, Mr. Siciliano objects to the OHA Investigator's finding in this regard and states that he "absolutely had a reasonable belief that [Battelle] was requiring its employees to admit responsibility on DOE Form 5639.3 for security infractions they did not commit." Siciliano Brief at 15. He disputes that neither he nor his employees received any memorandum from Battelle giving guidance on how to complete the security form in question prior to his bringing the matter to Battelle's attention.

While there appears to be a factual dispute about whether Mr. Siciliano received the memorandum in question, I find nevertheless that the record does not support a finding that Mr. Siciliano had a reasonable belief that Battelle management was abusing their authority or engaging in gross mismanagement by requiring him and his employees to admit liability for a security incident that they did not commit. The facts are clear that Mr. Siciliano made interlineations on Form 5639.3 to reflect that none of his employees was "responsible" for the security incident in question. Mr. Siciliano then provided detailed written comments to explain why he believed that his employees were not culpable for the security incident in question. Moreover, none of Mr. Siciliano's employees signed the box which asked for the signature of the person responsible for the security incident. Instead, in each instance, the employee wrote "I was not responsible for the security incident." Through their proactive actions, the four employees took responsibility to ensure that the form could in no way be construed as an admission of guilt for a security incident that later could have potentially been adjudged to be a security infraction. Mr. Siciliano, as their supervisor, also provided written comments on the respective forms which clearly stated that none of the four employees bore any responsibility for the security incident in question. Similarly, Mr. Siciliano completed Part II of the relevant security form in such a way that it was clear from the face of that document that he was not admitting any guilt for a security incident that he did not commit. In his instance, his supervisor, Mr. Austad also provided detailed comments which addressed Mr. Siciliano's concerns that someone might misinterpret Part II of DOE Form 5639.3 as an admission of guilt. While it appears that Battelle Security was using Part II of DOE Form 5639.3 to gather facts incident to an investigation instead of using that form to document the results of its completed investigation, I nonetheless find that this practice did not rise to the level of gross mismanagement or an abuse of authority on Battelle's

part. As previously noted in this Decision, gross mismanagement requires an element of blatancy and means "a management action or inaction that creates a substantial risk of significant adverse impact on the agency's ability to accomplish its mission." I find that Battelle Security's use of Part II of DOE Form 5639.3 prior to its completion of its investigation does not equate to blatant mismanagement, nor did it create a substantial risk of significant adverse impact on its ability to accomplish its mission. Furthermore, there is no abuse of authority here because it does not appear that Battelle Security arbitrarily and capriciously exercised its power which adversely affected its employees' rights. My decision might have been different had Battelle Security refused to allow its employees to make corrections to, or interlineations on, the relevant security form to clarify their non-involvement in the matter under scrutiny. Instead, Battelle Security allowed its employees to "set the record straight." In the end, while it might not be a best practice to use DOE Form 5639.3 in the manner in which Battelle did, Battelle's actions in allowing its employees (and the employees' supervisors) the opportunity to provide relevant information regarding the security incident in question and to deny culpability, negates a finding of either gross mismanagement or abuse of authority.

Based on all the foregoing, I find that Disclosure Number 10 does not rise to the level of a protected disclosure under Part 708.[7]

G. Protected Conduct

Mr. Siciliano filed a supplemental Complaint on June 8, 2010, alleging that Battelle had retaliated against him for filing his December 11, 2010, Complaint when the company failed to invite him to an event on March 24, 2010, which allegedly involved his area of expertise. The filing of a Part 708 Complaint constitutes protected activity. 10 C.F.R. § 708.5(b); *see also Thomas T. Tiller*, Case No. VWA-0018 (1998). Accordingly, I find that Mr. Siciliano engaged in protected activity on December 11, 2009, when he filed his Part 708 Complaint.

Based on the record before me, I do not find, however, that Battelle's failure to invite Mr. Siciliano to an event in March 2010 constitutes an act of retaliation under 10 C.F.R. § 708.2. Retaliation is defined under Part 708 as "an action (including intimidation, threats, restraint, coercion or similar action) taken by a contractor against an employee with respect to employment (*e.g.* discharge, demotion, or other negative action with respect to the employee's compensation, terms, conditions or privileges or employment) . . ." 10 C.F.R. § 708.2. Mr. Siciliano does not specify in its Supplemental Complaint whether and how the lack of an invitation to the March 2010 event negatively or materially impacted his "compensation, terms, conditions or privileges of employment. Based on the record before me, I find that Battelle's failure to invite Mr. Siciliano to the event in question is a "trivial" matter that does not rise to an act of retaliation under Part 708.

[7] Because I find that Mr. Siciliano did not raise a protected disclosure with regard to his concerns about Battelle's use of Part II of DOE Form 5639.3, I need not address Mr. Siciliano's allegation that he suffered an additional act of retaliation (i.e., the re-opening of the investigation into his involvement the security incident in question) for having raised issues about that form.

H. Summary

As fully discussed above, I have found that none of the ten disclosures contained in Mr. Siciliano's Complaint rises to the level of a protected disclosure under 10 C.F.R. § 708.5(a). I found further that while Mr. Siciliano engaged in protected conduct by filing his Part 708 Complaint, he did not suffer an act of retaliation when Battelle failed to invite him to a March 2010 event. Accordingly, I find that Battelle's Motion to Dismiss should be granted and Mr. Siciliano's Complaint should be dismissed.

It Is Therefore Ordered That:

(1) The Motion to Dismiss filed by Battelle Energy Alliance LLC on August 16, 2010, Case No. TBZ-0098, be and hereby is granted as set forth in paragraph (2) below and denied in all other respects.

(2) The Complaint filed by Mark D. Siciliano against Battelle Energy Alliance LLC, on December 11, 2009, as supplemented on June 8, 2010, Case No. TBH-0098, be and hereby is dismissed.

(3) This is an Initial Agency Decision that becomes the final decision of the Department of Energy unless a party files a notice of appeal by the 15th day after receipt of the decision in accordance with 10 C.F.R. § 708.32.

Ann Augustyn
Hearing Officer
Office of Hearings and Appeals

Date: November 9, 2010

January 13, 2011

DECISION AND ORDER
OF THE DEPARTMENT OF ENERGY

Initial Agency Decision
Motion to Dismiss

Names of Petitioners: Vinod C. Chudgar
Savannah River Remediation, LLC

Dates of Filing: September 27, 2010
December 8, 2010

Case Numbers: TBH-0100
TBZ-0100

This Decision will consider a Motion to Dismiss filed by Savannah River Remediation, LLC ("SRR" or "Respondent"), the Management and Operating Contractor for the Department of Energy's (DOE) Savannah River Site (SRS), in connection with the pending Complaint of Retaliation filed by Vinod Chudgar ("Complainant" or "the complainant") against SRR under the Department of Energy's (DOE) Contractor Employee Protection Program and its governing regulations set forth at 10 C.F.R. Part 708. The Office of Hearings and Appeals (OHA) assigned the hearing component of Mr. Chudgar's Part 708 Complaint proceeding, Case No. TBH-0100, and SRR's Motion to Dismiss, Case No. TBZ-0100. For the reasons set forth below, I have determined that SRR's Motion should be granted and that Mr. Chudgar's Complaint of Retaliation should be dismissed.

I. Background

A. The DOE Contractor Employee Protection Program

The Department of Energy established its Contractor Employee Protection Program to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste, and abuse" at DOE's Government-owned or -leased facilities. Criteria and Procedures for DOE Contractor Employee Protection Program, 64 Fed. Reg. 12862, 12863 (1999). Its primary purpose is to encourage contractor employees to disclose information that they

believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers. The Part 708 regulations provide procedures for processing complaints by employees of DOE contractors alleging retaliation by their employers for, among others:

> II. Disclosing to a DOE official, a member of Congress, any other government official who has responsibility for the oversight of the conduct of operations at a DOE site, [the] employer, or any higher tier contractor, information that [the employee] reasonably believe[s] reveals--
>
> (i) A substantial violation of a law, rule, or regulation;
>
> (ii) A substantial and specific danger to employees or to public health or safety; or
>
> (iii) Fraud, gross mismanagement, gross waste of funds, or abuse of authority. . . .

65 Fed. Reg. 6319 (2000).

Employees of DOE contractors who believe they have been discriminated against in violation of the Part 708 regulations may file a whistleblower complaint with DOE and are entitled to an investigation by an OHA investigator, an independent fact-finding and a hearing by an OHA Hearing Officer, and an opportunity for review of the Hearing Officer's Initial Agency Decision by the OHA Director. 10 C.F.R. §§ 708.21, 708.32.

B. Procedural History

The complainant is a Principal Process Computer Analyst at SRR. On July 13, 2009, Mr. Chudgar filed a complaint with the Office of Civil Rights of the DOE Savannah River Operations Office (DOE/SR). In the complaint, Mr.Chudgar alleged that in April 2009, while employed by the predecessor contractor Washington Savannah River Company (WSRC), he engaged in protected conduct under 10 C.F.R. Part 708 and, as a result, was transferred to a non-engineering position in July 2009 when SRR won the contract. As a remedy for the alleged act of retaliation, the complainant sought reinstatement to an engineering position, disciplinary action against individuals who intimidated him, a copy of an investigation report, and the correction of a procedure. *See* Complaint (July 13, 2009) at 2. SRR filed its response to the Part 708 Complaint on October 9, 2009, arguing that Mr. Chudgar had not made a protected disclosure as defined by Part 708, that none of the decision makers had any constructive or actual knowledge of his complaint, and that his reassignment was not retaliatory and did not result in a materially adverse change in his employment.[1] The parties attempted mediation of the dispute, but mediation was not successful. The Employee Concerns Manager of the Savannah River Operations Office then forwarded the complaint to OHA in May 2010 for an investigation followed by a hearing.

[1] SRR also argued that it was improperly joined as a party, but DOE/SR rejected that argument and found that SRR was a proper party to this action. Letter from OCR to SRR (December 9, 2009).

The OHA Director appointed an Investigator who conducted an investigation into the allegations in Mr. Chudgar's complaint. On September 27, 2010, the investigator issued the Report of Investigation (ROI) in this case. In the ROI, the investigator identified two disclosures. First, Mr. Chudgar complained that a software change he was asked to archive was incomplete and could have put a worker in danger. With regard to the first disclosure, the investigator could not conclude from the evidence that the complainant reasonably believed that there was a substantial danger to employees or the public. As for the second disclosure, Mr. Chudgar complained that SRR violated a procedure because a safety committee had not approved the changes recommended in the software design package and thus it was not implemented according to approved procedure. He said that the Process Control Operation Support engineers were not following instructions to supersede the previous revisions when "baselining" the files.[2] The investigator concluded that the evidence suggested that there was no danger to employees or the plant from proceeding to baseline the files. The investigator also found that there was a factual dispute as to whether the complainant's reassignment to Principal Process Computer Analyst during the transition resulted in an adverse material change in his employment conditions that could be considered an act of retaliation. The investigator was not able to determine from the evidence that Mr. Chudgar reasonably believed that the software change posed a "substantial and specific danger" to public health or safety. When addressing the issue of whether the SRR decision makers had actual or constructive knowledge of Mr. Chudgar's complaint, the investigator found that it was likely that they did not. Moreover, the investigator concluded that it is likely that SRR would be able to offer "compelling evidence" that it would have reassigned Mr. Chudgar in the absence of any protected disclosure.

On December 8, 2010, SRR filed a Motion to Dismiss. *See* Motion to Dismiss (December 8, 2010). Mr. Chudgar filed a Response to the Motion on December 21, 2010. *See* Complainant's Response to Motion to Dismiss (December 21, 2010) (Response). SRR filed an additional affidavit on January 6, 2011. *See* Affidavit of Kim Cassara (January 6, 2011).

C. Factual Overview

Mr. Chudgar, who holds a masters degree in chemical engineering, has been employed at the Savannah River Site (SRS) since 1988. At SRS he held various jobs and, according to Mr. Chudgar, he was a design engineer earlier during his employment at SRS. In April 2009, he was a Senior Engineer A for Washington Savannah River Company (WSRC), then the prime contractor at SRS. Mr. Chudgar's job was to electronically file software and software revisions as they were created. This software was written and tested by design engineers, implementing engineers and software end users who are tasked with designing, implementing, critiquing and trouble-shooting the software. Mr. Chudgar acknowledged that he did not use his chemical engineering background to perform his duties as a Senior Engineer A, and other employees described his duties as clerical.

[2] Baselining is adding software revisions to the existing software in the library, thereby establishing a new baseline for the software or hardware.

In July 2009, SRR became the prime contractor for nuclear clean-up at SRS. During the transition from WSRC to SRR, a management team was selected to evaluate all applicants for employment under the new contract. The team members were SRR managers and other managers chosen based on their expertise in the various functional areas that had vacancies. From this team, "functional evaluation panels" were created to evaluate each applicant in a functional area. Each panel had three members: (1) a SRR functional lead; (2) a WSRC employee; and (3) an independent human resources contractor not employed by SRR or WSRC. All exempt WSRC employees had to apply for employment under the new SRR contract and each employee could apply for three jobs. SRR offered forms and assistance to employees through a resume resource center and also created a video that explained the application process. Applicants were asked to answer eight competency-based questions, and could also add supplemental information to their application. The panel restricted its evaluation to the application package—they did not review or accept performance evaluations, nor did they interview or solicit information from the applicant's managers or colleagues. The panel that evaluated Mr. Chudgar's application found it was not well-prepared and the responses were poorly written and difficult to understand. They rated the application very low and recommended that SRR not hire Mr. Chudgar. However, SRR hired all of the applicants. Over 500 applicants were offered engineering positions and 12 were placed in non-engineering positions. The twelve employees who were not offered engineering positions, including Mr. Chudgar, were offered other opportunities. The complainant was offered and accepted his current position as a Principal Process Computer Analyst.

II. The Legal Standard

The Part 708 regulations provide an administrative mechanism for resolving whistleblower complaints filed by employees of DOE contractors. The regulations specifically describe the respective burdens imposed on the complainant and the contractor with regard to their allegations and defenses, and prescribe the criteria for reviewing and analyzing the allegations and defenses.

A. The Complainant's Burden

It is the burden of the Complainant under Part 708 to establish, by a preponderance of the evidence, that he or she made a protected disclosure, participated in a proceeding, or refused to participate as described in 10 C.F.R, § 708.5, and that such act was a contributing factor to a retaliatory action 10 C.F.R. §708.9. [3] If Mr. Chudgar meets this threshold showing with regard to any of his alleged protected disclosures, he must then prove that at least one of his disclosures was a contributing factor to his reassignment to a non-engineering position or any other alleged act of retaliation. One way a complainant can meet this evidentiary burden is to provide evidence that "the official taking the action has actual or constructive knowledge of the disclosure and acted within such a period of

[3] The term "preponderance of the evidence" means proof sufficient to persuade the finder of fact that a proposition is more likely true than not when weighed against the evidence opposed to it. *See Joshua Lucero*, Case No. TBH-0039 (2007), *citing Hopkins v. Price Waterhouse*, 737 F. Supp. 1202, 1206 (D.D.C. 1990).

time that a reasonable person could conclude that the disclosure was a factor in a personnel action." *See David Moses*, Case No. TBH-0066 (2008): *Mark D. Siciliano*, Case No. TBH-0098 (2010).

B. The Contractor's Burden

If the complainant satisfies his evidentiary burden, the burden then shifts to the Contractor to show, by clear and convincing evidence, that it would have taken the same action absent any protected disclosures. "Clear and convincing evidence" requires a degree of persuasion higher than preponderance of the evidence, but less than "beyond a reasonable doubt." *See Mark D. Siciliano*, Case No TBH-0098 (2010); *Casey von Bargen*, Case No. TBH-0034 (2007). OHA Hearing Officers have relied on the Federal Circuit for guidance in evaluating whether the contractor has met its evidentiary burden in a Part 708 case. *See David Moses*, Case No. TBH-0066 (2008); *Dennis Patterson*, Case No. TBH-0047 (2008). The Federal Circuit, in cases interpreting the federal Whistleblower Protection Act, which is the model for Part 708, examines: (1) the strength of the employer's reason for the personnel action excluding the whistleblowing, (2) the strength of any motive to retaliate for the whistleblowing, and (3) any evidence of similar action against similarly situated employees . . ." *See Kalil v. Dept. of Agriculture*, 479 F.3d 821, 824 (Fed. Cir. 2007).

III. The Contractor's Motion to Dismiss

In its Motion, the contractor argues that Mr. Chudgar's complaint should be dismissed for the following reasons:

1. Complainant has no evidence that he engaged in protected conduct; and

2. The officials taking the alleged retaliatory action did not have actual or constructive knowledge of Mr. Chudgar's complaint.

Motion to Dismiss at 1.

Under the Part 708 regulations, dismissal of a complaint for lack of jurisdiction or other good cause is appropriate if (1) the complaint is untimely; or (2) if the facts, as alleged in the complaint, do not present issues for which relief can be granted under Part 708, or (3) the complainant filed a complaint under state or other applicable law concerning the same facts that are alleged in the Part 708 complaint, or (4) the complaint is frivolous on its face, or (5) the complaint has been rendered moot by subsequent events; or (6) the Respondent has made a formal offer of relief that is equivalent to what could be provided as a remedy under Part 708. 10 C.F.R. § 708.17 (c). Our previous cases state that such a motion should only be granted if it is supported by "clear and convincing" evidence. *See also Fluor Daniel Fernald*, 27 DOE ¶ 87,532 at 89,163 (1999) (motion to dismiss should only be granted where there are clear and convincing grounds for dismissal); *Boeing Petroleum Services*, 24 DOE ¶ 87,501 at 89,005 (1994) (describing dismissal as "the

most severe sanction that we may apply" and thus should be used sparingly). For the reasons discussed below, I will grant the contractor's motion to dismiss.

A. Whether There is Evidence of Protected Conduct

SRR alleges that Chudgar could not have reasonably believed that his disclosures concerned a substantial risk of harm to employees or the public or a substantial violation of law or regulation. In support of this argument, SRR explains that Chudgar's job was merely to act as a librarian for engineering software—i.e., to archive existing software and revisions to that software. He did not, according to SRR, have the background necessary to critique the software that he was tasked to file and he lacked the expertise to make an accurate assessment of the safety implications, if any, of the software changes.

1. Disclosure 1

According to the record, on April 8, 2009, Mr. Jim Coleman, Production Lead Engineer at WSRC, brought Mr. Chudgar a revision to enter into the library. That revision was titled CMT-0133. The revision contained schematics showing a software change (that complainant needed to record) and a hardware change that was implemented using a separate document.[4] This software change was intended to change the function of the pump used to move liquid from one storage tank to another. The software had been tested and accepted on April 7-8, 2009, and was actually in use prior to Mr. Coleman asking Mr. Chudgar to file the software. Little Affidavit at 4. Complainant knew that the software had been tested and accepted by two systems engineers. *Id*. Mr. Coleman had to make additional changes, but could not continue with his work until the changes in the software package were archived, thereby establishing a "baseline." Mr. Chudgar examined the schematics and realized that they depicted a hardware change but there was no documentation about the hardware change in the package. Since the documentation did not contain an explanation of the hardware change, Mr. Chudgar refused to archive the software. Mr. Chudgar refused because he believed that the documentation should contain an explanation of the hardware change in the package. Mr. Coleman explained that the hardware change was controlled by another document. However, Complainant refused to archive the software package and the men argued.

At this point, the facts are in dispute. SRR claims that Chudgar did not elevate the issue to management nor did he call for a "time out" or a "stop work."[5] Motion to Dismiss at 3. According to SRR, management was unaware of the dispute until Chudgar filed his complaint on April 13, 2009. However, Mr. Chudgar contends that on April 8, 2009, he called the Quality Assurance Manager, who advised Mr. Coleman to file a Non-Conformance Report (NCR) and enter his concern into the Site Tracking, Analysis and

[4] Significant software and hardware changes are controlled by a Design Change Form (DCF). Software changes are tracked using a Computer Program Modification Traveller (CMT).

[5] A "time out" is an informal process used to address safety concerns where an employee (1) feels uncomfortable in performing a task or (2) observes an unsafe condition that they want to correct.

Reporting (STAR) system.[6] The QA manager was not willing to provide further direction to Mr. Coleman and Mr. Chudgar without viewing the actual documents in question. The QA manager did not meet or speak with either man after the incident. There is no evidence that Mr. Chudgar or Mr. Coleman filed a NCR. In fact, Mr. Chudgar left the office for the weekend, assuming that Mr. Coleman would not continue with the changes. [7] Mr. Chudgar did not make any further report until April 13, 2009, when he filed his complaint. The Office of Employee Concerns then contacted WSRC management about the complaint, and the staff began an investigation of the concern. They also issued a timeout. Motion to Dismiss at 5. The investigation concluded that there was no safety concern and that the engineers could file an "as found" document in the library.[8] According to WSRC management, DOE also conducted an independent investigation and concluded that there was no safety concern. *See* Little Affidavit at 5.

Whether Chudgar reasonably believed that his disclosure revealed a substantial and specific danger to employees or the public can be decided after consideration of the available facts. There is evidence that he escalated the concern to the QA Manager. According to Mr. Chudgar, he believed that Mr. Coleman would not go forward with the changes after the conversation with the QA Manager and Mr. Chudgar then went home for the weekend. However, it is not clear why Mr. Chudgar did not file an NCR if he thought that someone could be hurt if the software package was archived as presented to him. This situation seems to be the type of event that merits a NCR—significant enough to report to management, but not urgent enough to call a time out. Further, even though Mr. Chudgar argues that the QA manager directed Mr. Coleman to file the report, it is not logical that Mr. Coleman, who did not believe there was any problem, would file such a report. Further, it is customary that the software packages presented to Mr. Chudgar for archiving have been tested by the design engineers prior to their transfer to the library for archiving. Thus, the evidence before me indicates that Mr. Chudgar's actions on that day do not reflect the actions of an individual who believed that archiving the software package would result in a substantial and specific danger to employees at SRR or to public health or safety. As a 20-year employee of the plant, he was familiar with the "time out" procedure available to any employee with a safety concern, yet he did not avail himself of this alternative. He did not identify a specific danger to the employees but rather alluded to a possible danger to anyone who may work on the hardware in the future. After Mr. Chudgar reported his concerns when he returned to work the following week, SRR management did call a time out to investigate his concern. Little Affidavit at 5. WSRC management determined that the software was functioning correctly but that the DCF needed a drawing reflecting a hardware change, as Mr. Chudgar had stated in his complaint. DOE also investigated the issue and concurred with the WSRC conclusion that there was no safety issue but that an "as found" drawing should be added to the DCF. Little Affidavit at 5.

---

[6] A NCR is required when an item fails to satisfy required technical, design or quality requirements, is of indeterminate quality, is found to be suspect (counterfeit), has documentation deficiencies which render the item indeterminate, or meets one or more of the previous conditions but its continued use is required. The STAR system is available to all employees to identify and report safety concerns.

[7] Another engineer entered the changes in to the library after Mr. Chudgar left for the weekend.

[8] An "as found" document is an existing design document that defines and reflects what the field condition should be. It is placed into a DCF as a convenience for the user.

To sum up, no reasonable trier of fact could conclude that Mr. Chudgar had established by a preponderance of the evidence that the missing documentation at issue rose to the level of "a substantial and specific danger to employees or to public health or safety" under Part 708. Accordingly, I will dismiss Disclosure 1 from this proceeding.

2. Disclosure 2

On April 23, 2009, Mr. Chudgar amended his complaint arguing that WSRC had violated its procedure when it changed to a new operating system on its computers. The change involved approximately 500 files, much larger than the typical software update that Mr. Chudgar was assigned to catalog and record. Mr. Chudgar reviewed the change documentation and alleged that it violated WSRC procedure because it was lacking the proper approvals by the Facility Operations Safety Committee (FOSC). Although the software changes associated with the concern had been tested successfully off line and were scheduled for online test on April 27, 2009, WSRC management asked a team of engineers ("the investigation team") to review the changes in response to Mr. Chudgar's amended complaint.

According to WSRC, the FOSC must approve only changes which are "Safety Significant," and only 20 pages of the 500 page package were safety significant. Little Affidavit at 6. Those pages had indeed been approved. Mr. Chudgar's manager, Mr. Tipton, asked Mr. Chudgar to identify his concerns and notify the appropriate manager if modifications were made but had not been captured in the change document. However, Mr. Chudgar did not identify any safety concerns and, according to Mr. Tipton, stated that he was satisfied with the package. The fact that Mr. Chudgar could not articulate his concerns when asked undermines the reasonableness of any belief he may have held about the new system violating company procedures.

The investigation team could not determine Complainant's concern and contacted him for clarification. Mr. Chudgar complained that WSRC had not followed proper procedure, which was to record the final software product after multiple software revisions, and not catalog every revision to the software. For the hardware changes, Mr. Chudgar complained that they should be revised every time there was a design change instead of only adding drawings that depicted the change. He also stated that the WSRC engineers did not follow WSRC procedures as set forth in Manual 2s, Procedure 1.3. Nonetheless, Mr. Chudgar did not provide any additional technical information or clarification of a safety issue, and the team still did not understand his concern. Little Affidavit at 6.

Based on the evidence, I conclude that Mr. Chudgar's second disclosure was actually a dispute with management over proper procedure and does not rise to the level of a "substantial violation of a law, rule, or regulation." Mr. Chudgar complained that FOSC had not approved the change and that the method of cataloguing software was not correct. However, FOSC had approved that portion of the change package that was "safety significant." Thus, his concern was not reasonable since the contractor's safety committee had examined and approved the documents in question and he knew that the

software changes had been successfully tested. Complainant also alleged that WSRC did not follow its own procedures. However, WSRC contends that Manual 2s, Procedure 1.3 was not applicable to the engineering procedures that Mr. Chudgar catalogued but actually set forth administrative procedures for Operations and Maintenance Activities. Further, Mr. Chudgar could not articulate to the investigation team any safety problem he found with the new changes. Thus, I cannot find that the disclosures by Mr. Chudgar rise to the level of protected disclosures. There is no evidence that they reveal a substantial violation of law, rule or regulation.[9] Accordingly, I will dismiss Disclosure 2 from this proceeding. [10]

IV. Conclusion

I find that the two disclosures set forth in Mr. Chudgar's Complaint of Retaliation do not rise to the level of a protected disclosure under 10 CFR 708.5(a). Accordingly, I conclude that SRR's Motion to Dismiss should be granted and Mr. Chudgar's Complaint of Retaliation should be dismissed.

It Is Therefore ORDERED That:

(1) The Motion to Dismiss filed by Savannah River Remediation, LLC on December 8, 2010, Case No. TBZ-0100, be and hereby is granted.

(2) The Complaint filed by Vinod C. Chudgar against Savannah River Remediation, LLC, on July 13, 2009, Case No. TBH-0100, be and hereby is dismissed.

(3) This is an Initial Agency Decision that becomes the final decision of the Department of Energy unless a party files a notice of appeal by the 15th day after receipt of the

[9] According to Albert Zaharia, an engineer who does the same job as Complainant, the files do not need to be opened except to compare the software version to the paperwork. Reviewing the electronic files is not part of the CM process.

[10] Even assuming, *arguendo*, that either of the two disclosures could be considered protected under Part 708, I find that neither was a contributing factor to an act of retaliation. Mr. Chudgar was unable to show that (1) the person taking the adverse action had actual or constructive knowledge of the protected disclosure and (2) the alleged retaliatory act occurred sufficiently soon after the protected disclosure to permit a reasonable inference that the protected disclosure was a contributing factor. *See generally, Dean P. Dennis*, TBA-0072 at 4 (2009). SRR submitted affidavits from two of the three panel members who evaluated Mr. Chudgar's application, and both stated that they did not know that he had filed a Part 708 complaint. The third panel member was an independent contractor who did not work for either SRR or WSRC. Furthermore, Mr. Chudgar's reassignment to a non-engineering position is not an act of retaliation under Part 708. An employment action is not "retaliation" unless it results in a materially adverse change in employment conditions comparable to a termination of employment, a demotion evidenced by decrease in wages or other negative action with respect to the compensation, terms, condition or privileges of employment. *See Dennis Patterson*, Case No. TBH-0047 (2008). There was no negative effect on the terms and conditions of the complainant's employment because his new position maintained his salary and grade level.

decision in accordance with 10 C.F.R. § 708.32.

Valerie Vance Adeyeye
Hearing Officer
Office of Hearings and Appeals

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Motion for Summary Judgment
Initial Agency Decision

Petitioners:	Mary Ravage Medcor, Inc.
Dates of Filings:	June 9, 2010 November 12, 2010
Case Numbers:	TBH-0102 TBZ-0102

This Decision will consider a Motion for Summary Judgment filed by Medcor, Inc. (Medcor), a subcontractor providing medical services at the Department of Energy's (DOE) Hanford Site, in connection with the pending Complaint of Retaliation filed by Mary Ravage against Medcor under the DOE's Contractor Employee Protection Program and its governing regulations set forth at 10 C.F.R. Part 708. The Office of Hearings and Appeals (OHA) assigned the hearing component of Ms. Ravage's Part 708 Complaint proceeding, Case No. TBH-0102, and Medcor's Motion for Summary Judgment, Case No. TBZ-0102. For the reasons set forth below, I have determined that Medcor's Motion should be granted and that Ms. Ravage's Complaint of Retaliation should be dismissed.

I. Background

A. The DOE Contractor Employee Protection Program

The DOE's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent fraud, mismanagement, waste and abuse at DOE's government-owned, contractor-operated facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purpose is to encourage contractor employees to disclose information which they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers.

The regulations governing the DOE's Contractor Employee Protection Program are set forth at Title 10, Part 708 of the Code of Federal Regulations. The regulations provide, in pertinent part, that a DOE contractor may not discharge or otherwise discriminate against any employee because that employee has disclosed, to a DOE official or to a DOE contractor, information that the employee reasonably believes reveals a substantial violation of a law, rule, or regulation; a substantial and specific danger to employees or to the public health or safety; or, fraud, gross mismanagement, gross waste of funds, or abuse of authority. *See* 10 C.F.R. § 708.5(a)(1)-(3). Available relief includes reinstatement, back pay, transfer preference, and such other relief as may be appropriate. *Id.* at § 708.36. Employees of DOE contractors who believe they have been discriminated against in violation of the Part 708 regulations may file a whistleblower complaint with the DOE and are entitled to an investigation by an investigator from the Office of Hearings and Appeals (OHA), an independent fact-finding and a hearing by an OHA Hearing Officer, and an opportunity for review of the Hearing Officer's Initial Agency Decision by the OHA Director. 10 C.F.R. § 708.21, 708.32.

B. Procedural History

Ms. Ravage filed her Part 708 Complaint on January 21, 2010,[1] with the DOE's Office of River Protection (ORP). In her Complaint, Ms. Ravage alleged that she had made protected disclosures and, as a result of her so doing, Medcor engaged in a series of retaliatory actions against her, including terminating her on January 6, 2010.

Medcor filed responses to the Part 708 Complaint on March 4, 2010, and on May 14, 2010, contesting that Ms. Ravage had made any disclosure protected under Part 708, and arguing that Ms. Ravage's termination was not retaliatory since the decision to terminate her was made for valid business reasons unrelated to her alleged protected disclosures. ORP's Employee Concerns Manager transmitted the Complaint to OHA for an investigation followed by a hearing, when informal resolution of the Complaint proved unsuccessful. OHA received Ms. Ravage's Complaint on June 9, 2010.

On June 9, 2010, the OHA Director appointed an Investigator (OHA Investigator) who conducted an investigation into the allegations contained in Ms. Ravage's Complaint. On September 8, 2010, the OHA Investigator issued the Report of Investigation (ROI) in this case. In the ROI, the OHA Investigator concluded that Ms. Ravage was alleging a single protected disclosure. With regard to that one disclosure, the OHA Investigator found that Ms. Ravage had not demonstrated, by a preponderance of the evidence, that she had made a protected disclosure that was a contributing factor to the decision to terminate her. Immediately after the ROI was issued, the OHA Director appointed me the Hearing Officer in this case. On November 12, 2010, Medcor filed the present motion, claiming that, as a matter of law, Ms. Ravage has not met, and cannot meet, her burden of proving that she made a protected disclosure.

C. Factual Overview

[1] The Complaint is dated January 20, 2010. The Report of Investigation indicates that the Complaint was filed on January 21, 2010. The Memorandum transferring the Complaint from the ORP to this office for investigation and hearing indicates that the ORP received the Complaint on April 28, 2010.

Ms. Ravage began working for Medcor as a registered nurse on June 15, 2009. Transcript of November 4, 2010, Deposition (hereinafter Tr.) at 17. Ms. Ravage asserts that, four months into her employment tenure, on October 8, 2009, she arrived at work and found a co-worker, Kristine Welsh, "crying in a fetal position." *Id.* According to Ms. Ravage, Welsh informed her that she had been "struck in anger" the previous evening by XXXXX, a co-worker of both Ravage and Welsh. *Id.* Ms. Ravage contends that she found Welsh's allegation credible because she too had been struck by XXXXX during the previous week. *Id.* Ms. Ravage verbally reported Welsh's allegations to Medcor's Director of Operations, Cindi McCormack, that evening. Ms. Ravage asserts that she also reported being struck by Welsh during her October 8, 2009, conversation with McCormack. Tr. at 32. McCormack, however, claims she has no recollection of being informed by Ms. Ravage during the October 8, 2009, conversation that XXXXX had struck Ms. Ravage. Welsh subsequently informed McCormack that, on October 7, 2009, XXXXX had "slapped my left arm pretty hard."[2] October 12, 2009, email from Welsh to McCormack.[3]

On October 28, 2009, XXXXX was promoted to Lead Nurse, a position for which Ms. Ravage had also applied. On October 29, 2009, Ms. Ravage was promoted from a part-time nursing position to a full-time nursing position.

On November 1, 2009, Ms. Ravage sent an e-mail to McCormack reiterating the concerns that she had verbally expressed. Ms. Ravage's November 1, 2009, written account does not assert that she was ever struck by XXXXX. It does, however, accuse XXXXX of speaking to her with "an angry voice and with a mean face." November 1, 2009, e-mail from Ms. Ravage to McCormack.

On November 11, 2009, Medcor issued a written warning to Ms. Ravage. The November 11, 2009, written warning alleged that Ms. Ravage had signed an inaccurately completed laboratory form. Medcor issued a second written warning to Ms. Ravage on December 3, 2009. The second written warning was issued by Medcor after Ms. Ravage allegedly faxed a form containing confidential patient information to non-authorized personnel. On December 8, 2009, two members of Medcor's supervisory team met with Ms. Ravage to discuss a number of Medcor's concerns. During this meeting, the supervisors informed Ms. Ravage that future problems could result in disciplinary action including termination, and provided Ms. Ravage with a corrective action plan.

On January 6, 2010, Medcor asked Ms. Ravage to resign. She refused to resign, and Medcor terminated her employment. Tr. at 19.

---

[2] Welsh subsequently described the incident as "an assault, being physically slapped in anger on the left arm by another nurse." October 26, 2009, letter from Welsh to Ted Feiganbaum.

[3] Medcor's Human Resources (HR) Director, Julia Philippova, conducted an in-house investigation of Welsh's allegations. In response to the HR's inquiries, the two other persons present when Welsh was allegedly slapped in the arm, XXXXX and Geri Bauer, both denied that XXXXX had slapped or hit Welsh. November 18, 2009, letter from Philippova to Welsh. The HR Director closed her investigation after the other alleged eyewitnesses did not corroborate Welsh's allegations.

On January 21, 2010, Ms. Ravage filed her Complaint. The Complaint does not specifically identify any protected disclosures, stating only that "Medcor had been given copious warning[s] that there were issues in their Richland operation and the response was to try and reign in the squeaky wheel." Complaint at 4. However, the Complaint alleges that XXXXX systematically harassed and undermined Ravage in retaliation for her reporting Welsh's allegation to McCormack.[4] Complaint at 1. The Complaint also alleges that XXXXX had struck Ms. Ravage approximately a week before the alleged incident involving Welsh.[5]

On November 12, 2010, Medcor submitted the present motion contending that Ms. Ravage has not met her burden of proof and that summary judgment should accordingly be entered in its favor. Medcor's Motion for Summary Judgment (Motion) at 5. Specifically, the Motion asserts that Ms. Ravage's report of an alleged arm-slapping incident does not constitute a protected disclosure under 10 C.F.R. § 708.5. *Id.* Ms. Ravage filed a Cross-Motion for Partial Summary Judgment on November 12, 2010, and submitted a supplemental response to Medcor's Motion on November 22, 2010. Ms. Ravage's Cross-Motion requests a ruling that her report of an alleged arm-slapping incident constitutes a protected disclosure. Supplemental Response at 1. Ms. Ravage asserts that her October 8, 2009, disclosure meets two of the criteria for protected disclosures set forth at § 708.5. Specifically, Ms. Ravage asserts that her disclosure communicated a reasonable belief that "XXXXX posed a substantial and significant danger to employees" under §708.5(a) (2) and that the reported incident "was a violation of law" under §708.5(a) (1). *Id.*

II. The Legal Standards

As noted above, the regulations set forth at 10 C.F.R. Part 708 provide an administrative mechanism for resolving whistleblower complaints filed by employees of DOE contractors. The regulations specifically describe the respective burdens imposed on the Complainant and the contractor with regard to their allegations and defenses, and prescribe the criteria for reviewing and analyzing the allegations and defenses advanced.

A. The Complainant's Burden

It is the burden of the Complainant under Part 708 to establish, by a preponderance of the evidence, that he or she made a protected disclosure, participated in a proceeding, or refused to

[4] Ravage's Complaint also contends that she had complained to McCormack that XXXXX was constantly harassing her. The Complaint further alleges that Ravage had informed McCormack and Medcor's CEO that she considered XXXXX a threat to her safety. Compliant at 7. The Complaint also asserted that Ravage had reported to Medcor's CEO that Medcor's chain of commend was badly broken. *Id.* The Complaint does not, however, indicate that any of these complaints on her part contributed to Medcor's January 4, 2010, decision to terminate her.

[5] Ravage's husband, Dr. Chris Ravage, M.D., wrote Bennet W. Petersen, Medcor's Chief Operating Officer, on December 22, 2009, to express his concerns about his wife's relationship with XXXXX, who was now her supervisor. Dr. Ravage accused XXXXX of acting in an abusive manner towards Ms. Ravage and asserted that XXXXX had hip-checked Ms. Ravage during the same week that XXXXX had allegedly slapped Welsh. December 22, 2009, email from Dr. Ravage to Petersen at 2. This is the first instance where the claim that XXXXX struck Ms. Ravage appears in writing. Dr. Ravage accused XXXXX of having a vendetta against Ms. Ravage which he attributed to two causes, stating: "XXXXX has a personality disorder" and that Ms. Ravage "was able to back up another nurse's complaint that [XXXXX] had struck her in anger." *Id.*

participate as described in 10 C.F.R. § 708.5, and that such act was a contributing factor to a retaliatory action. 10 C.F.R. § 708.29. The term "preponderance of the evidence" means proof sufficient to persuade the finder of fact that a proposition is more likely true than not when weighed against the evidence opposed to it. *See Joshua Lucero*, Case No. TBH-0039 (2007), *citing Hopkins v. Price Waterhouse*, 737 F. Supp. 1202, 1206 (D.D.C. 1990).

Under 10 C.F.R. Part 708, proving, by a preponderance of evidence, that one has made a protected disclosure is an essential element of a Complainant's case. If Ms. Ravage cannot meet this threshold showing, then judgment cannot be awarded in her favor in the present proceeding.

Section 708.5 sets forth the applicable definition of protected disclosure. Under § 708.5:

> If you are an employee of a contractor, you may file a complaint against your employer alleging that you have been subject to retaliation for: (a) Disclosing to a DOE official, a member of Congress, any other government official who has responsibility for the oversight of the conduct of operations at a DOE site, your employer, or any higher tier contractor, information that you *reasonably* believe reveals-- (1) A *substantial* violation of a law, rule, or regulation; [or] (2) A *substantial and specific* danger to employees or to public health or safety[.]

10 C.F.R. § 708.5(a)(1) and (2) (emphasis supplied).

Although Medcor has captioned its motion as a Motion to Dismiss, it is more accurately characterized as a Motion for Summary Judgment. Under Rule 56(c) of the Federal Rules of Civil Procedure, summary judgment is proper "if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law." Summary judgment may be entered, after adequate time for discovery and upon motion, against a party who fails to make a showing sufficient to establish the existence of an element essential to that party's case, and on which that party will bear the burden of proof at trial. In such a situation, there can be "no genuine issue as to any material fact," since a complete failure of proof concerning an essential element of the nonmoving party's case necessarily renders all other facts immaterial. A moving party is "entitled to a judgment as a matter of law" because the nonmoving party has failed to make a sufficient showing on an essential element of her case with respect to which she has the burden of proof. *Celotex v. Catrett*, 106 S. Ct. 2548, 2552-2553 (1986). The Supreme Court has further articulated the following test: "If the record taken as a whole could not lead a rational trier of fact to find for the non-moving party, there is no genuine issue for trial." *Matsushita v. Zenith Radio Corp.*, 475 U.S. 574, 597 (1986) (*Matsushita*).

III. Analysis

A. Whether Ms. Ravage has disclosed information that she reasonably believed reveals a substantial violation of a law, rule, or regulation

Citing Washington State law, Ms. Ravage asserts that "the incident that was reported was a violation of law, and therefore was a [protected disclosure]." Ms. Ravage is correct that intentionally slapping a fellow employee could violate state law depending on the circumstances and severity of the hitting. However, reporting a reasonable belief of a violation of a law, rule or regulation does not suffice to qualify an individual for protection under 10 C.F.R. Part 708. Under Part 708, a protected disclosure must communicate a reasonable belief of a *substantial* violation of a law, rule or regulation in order to receive protection. 10 C.F.R. § 708.5(a)(1). In the present case, the victim contemporaneously described the alleged incident as an intentional hard arm slap. While such an arm slap may have resulted in a technical violation of the law, it certainly did not constitute a sufficiently *substantial* violation of law to constitute a protected disclosure under § 708.5(a) (1).

Ms. Ravage contends that "Medcor downplayed the violence involved." Ravage's November 12, 2010, submission at 1. She further states: "It is our contention that the assault was violent, not isolated, and XXXXX showed a consistent pattern of aggressive, abusive behavior." Supplemental Submission at 1. However, Welsh's own actions, as well as her contemporaneous description of the alleged incident, indicate that she did not believe that a substantial violation of law had occurred. There is no evidence in the record that Welsh ever contacted law enforcement authorities to report this alleged incident. Furthermore, it is suspect that she did not immediately report the incident to Medcor officials. In fact, it was not until McCormack contacted her on October 9, 2009, two days after the alleged incident's occurrence, that she first mentioned the incident to Medcor's management. Affidavit of Cindi D. McCormack at 1. At McCormack's request, Welsh provided a written description of the alleged incident, in which she stated that XXXXX "slapped my left arm pretty hard." October 12, 2009, e-mail from Welsh to McCormack. Thus, I do not accept that Ms. Ravage could have reasonably believed that a substantial violation of law had occurred based upon her October 8, 2009, conversation with Welsh concerning the alleged incident.

Since the record does not contain any reliable evidence supporting her contention that she reasonably believed that a substantial violation of law had occurred, no reasonable trier of fact could find in her favor on this issue. *Matsushita,* 475 U.S. at 597. Accordingly, I am granting summary judgment in favor of Medcor on the issue of whether Ms. Ravage has disclosed information that she reasonably believed reveals a substantial violation of a law, rule, or regulation.

B. Whether Ms. Ravage has disclosed information that she reasonably believed revealed a substantial and specific danger to employees or to public health or safety.

Ms. Ravage asserts that it was her "reasonable belief that XXXXX posed a substantial and significant danger to employees." Ravage's November 12, 2010, submission at 1. Medcor asserts that: "Even if the incident Ms. Ravage disclosed did occur, her reporting of this second-hand information does not rise to the level of a protected disclosure, because Ms. Ravage could not have reasonably believed that this 'arm slap,' which she did not witness, revealed a substantial and specific danger to employees or to public health or safety." Medcor's Motion at 1.

Ms. Ravage's Supplemental Response to Medcor's Motion essentially concedes the issue. Ms. Ravage states: "I agree with [Counsel for Medcor's] statement that 'no reasonable person would believe that a simple isolated slap on the arm . . . poses . . . a danger. . . . It is our contention that the assault was violent, not isolated, and XXXXX showed a consistent pattern of aggressive abusive behavior." Supplemental Response at 1. As discussed above, the alleged victim described the reported incident as a single, hard slap to the arm. No rational trier of fact could conclude that even a particularly vigorous arm-slapper poses a substantial and specific danger to employees or to public health or safety.

After conceding that an arm-slapping nurse does not pose a substantial and specific danger to employees or to public health or safety, Ms. Ravage now attempts to re-characterize her alleged October 8, 2009, disclosure by asserting that she had reported a pattern of aggressive, violent, and abusive behavior, as well as, an alleged incident in which XXXXX hip-checked Ms. Ravage, to McCormack during their conversation.

1. Ms. Ravage's Claim that She Reported a Hip-Checking Incident to McCormack on October 8, 2009.

Ms. Ravage claims that she was hip-checked by XXXXX, and reported the alleged hip-checking incident to McCormack during their October 8, 2009, conversation. However, this claim is simply not credible. There is no evidence in the record, including her November 4, 2010, deposition testimony, supporting her contention that she was hip-checked by XXXXX. Those accounts of the alleged hip-checking incident provided by Ms. Ravage are not consistent. While her Supplemental Submission states that she had received "a hip check like in a hockey game, and not a simple brushing aside," her initial deposition testimony indicates only that XXXXX had struck Ms. Ravage with her elbow while brushing her aside.[6] Tr. at 37-38.

Moreover, although the record contains a number of communications from Ms. Ravage to Medcor officials complaining about XXXXX between October 8, 2009, and December 22, 2009, (when her husband made the allegation in an email to Petersen; *see* note 5, *supra*) none of these communications indicate that XXXXX had struck Ms. Ravage.[7] At her deposition, Medcor's counsel challenged Ms. Ravage to identify any document in the record other than her January 21, 2010, Compliant, in which she asserted that she had been struck by XXXXX. Ms. Ravage could not do so. Tr. at 40-42, 46.

---

[6] She subsequently, in response to a clearly leading question posed by her advocate, amended her testimony by indicating that she was both elbowed and hip-checked. *Id.* at 75.

[7] On November 1, 2009, Ms. Ravage sent an e-mail to McCormack complaining that XXXXX had spoken to her "in an angry voice and with a mean face." November 1, 2009, email from Ms. Ravage to McCormack. In this e-mail, Ms. Ravage related her account of the conversation that she had with Welsh on October 8, 2009. *Id.* However, the November 1, 2009, e-mail does not contain any discussion whatsoever of the alleged hip-checking incident. On December 7, 2009, Ms. Ravage sent McCormack an e-mail complaining about XXXXX's aggressiveness. She complained that XXXXX had spoken to her in a "harsh voice" with "an aggressive face." She further stated that XXXXX had wrongly accused her on several occasions and indicated her concern that XXXXX had a vendetta against her. Ms. Ravage accused XXXXX of having a "history of violence against co-workers," and stated that she was worried about her safety. December 7, 2009, e-mail from Ms. Ravage to McCormack.

Furthermore, there is no evidence in the record that Ms. Ravage reported the alleged hip-checking incident to McCormack during their October 8, 2009, conversation. During her deposition testimony, Ms. Ravage admitted that she does not know if she informed McCormack of this incident during their October 8, 2009, conversation. Tr. at 35. A sworn affidavit signed by McCormack indicates that "at no time did . . . Mary Ravage inform me that Ms. Ravage had been struck by XXXXX." November 12, 2010, Affidavit of Cindi D. McCormack at ¶ 6.

Considering all the evidence in the light most favorable to the non-moving party, Ms. Ravage, I find that Ms. Ravage will not meet her evidentiary burden regarding an alleged hip-checking incident.

2. Ms. Ravage's Claim that she Reported a Pattern of Aggressive, Violent, and Abusive Behavior to McCormack on October 8, 2009.

As discussed above, Ms. Ravage has on several occasions accused XXXXX of aggressive and abusive behavior in her correspondence with Medcor and other officials. However, Ms. Ravage has repeatedly indicated that this alleged pattern of abuse and aggressiveness was motivated by, and began occurring after, Ms. Ravage's alleged October 9, 2009, disclosures. In her Complaint, Ms. Ravage states that "very shortly after" she reported the alleged arm-slapping incident to McCormack, "XXXXX began systematically harassing and undermining [Ms. Ravage]." Complaint at 1. During her deposition testimony, Ms. Ravage stated that XXXXX had started being aggressive to her at some point after Medcor's investigation of the alleged arm-slapping incident had been concluded.[8] Tr. at 16.

While Ms. Ravage claims that she had reported a pattern of abusive, violent, and aggressive behavior on the part of XXXXX during her October 9, 2009, conversation with McCormack, the evidence in the record does not support that claim. In fact, the evidence undercuts it.

Since the record does not contain any reliable evidence supporting Ms. Ravage's contention that she has disclosed information that she reasonably believed revealed a substantial and specific danger to employees or to public health or safety, no reasonable trier of fact could find in her favor on this issue. *Matsushita*, 475 U.S. at 597. Simply put, no rational trier of fact could conclude that a nurse who may have committed simple battery at most presented a substantial and specific danger to employees or to public health or safety. Accordingly, I am granting summary judgment in favor of Medcor on the issue of whether Ms. Ravage has disclosed information that she reasonably believed revealed a substantial and specific danger to employees or to public health or safety.

After reviewing the record as a whole, I find that the record could not lead a rational trier of fact to conclude that Ms. Ravage made a protected disclosure under 10 C.F.R. § 708.5(a) on October 8, 2009. Ms. Ravage does not claim that she has made any other protected disclosures. Tr. at 13. Accordingly, I find that that no rational trier of fact could issue a judgment in favor of Ravage's Complaint under 10 C.F.R. Part 708.

---

[8] If XXXXX had in fact started a pattern of abusive behavior prior to the alleged disclosure, it would undercut Ms. Ravage's contention that such alleged abusive behavior was motivated by that protected disclosure.

Summary

As fully discussed above, I have found that the sole disclosure contained in Ms. Ravage's Complaint does not constitute a protected disclosure. Accordingly, I find that Medcor's Motion for Summary Judgment should be granted, and that Ms. Ravage's Cross-Motion and Complaint should be dismissed.

It Is Therefore Ordered That:

(1) The Motion for Summary Judgment filed by Medcor, Inc. on November 12, 2010, Case No. TBZ-0102, be and hereby is granted as set forth in paragraph (3) below.

(2) The Cross-Motion for Partial Summary Judgment filed by Mary Ravage on November 12, 2010, Case No. TBZ-0102, be and hereby is denied.

(3) The Complaint filed by Mary Ravage against Medcor, Inc. on January 21, 2010, Case No. TBH-0102, be and hereby is dismissed.

(3) This is an Initial Agency Decision that becomes the final decision of the Department of Energy unless a party files a notice of appeal by the 15th day after receipt of the decision in accordance with 10 C.F.R. § 708.32.

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Initial Agency Decision

Names of Petitioner: Hansford F. Johnson

Dates of Filing: September 17, 2010

Case Number: TBH-0104

This Initial Agency Decision involves a Complaint of Retaliation filed by Hansford F. Johnson against B&W Pantex LLC (B&W) under the DOE's Contractor Employee Protection Program and its governing regulations set forth at 10 C.F.R. Part 708. The complainant was an employee of B&W, the firm employed by DOE to manage and operate the Pantex Plant, where he was employed as a Program Manager, working as the plant energy manager until he retired on March 24, 2010. Mr. Johnson characterizes his retirement as a constructive discharge, alleging that he suffered harassment from his supervisor in the months preceding his retirement, and that this was in retaliation for activity protected under Part 708. For the reasons set forth below, I will deny Mr. Johnson's Complaint.

I. Background

A. The DOE Contractor Employee Protection Program

The DOE's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent fraud, mismanagement, waste and abuse" at DOE's government-owned, contractor-operated facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purpose is to encourage contractor employees to disclose information which they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers.

The regulations governing the DOE's Contractor Employee Protection Program are set forth at Title 10, Part 708 of the Code of Federal Regulations. The regulations provide, in pertinent part, that a DOE contractor may not discharge or otherwise discriminate against any employee because that employee has disclosed, to a DOE official or to a DOE contractor, information that the employee reasonably believes reveals a substantial violation of a law, rule, or regulation; a substantial and specific danger to employees or to the public health or safety; or, fraud, gross mismanagement, gross waste of funds, or abuse of authority. *See* 10 C.F.R. § 708.5(a)(1)-(3). Available relief includes reinstatement, back pay, transfer preference, and such other relief as may be appropriate. *Id.* at § 708.36.

Employees of DOE contractors who believe they have been discriminated against in violation of the Part 708 regulations may file a whistleblower Complaint with the DOE and are entitled to an investigation by an investigator from the Office of Hearings and Appeals (OHA), an independent

fact-finding and a hearing by an OHA Hearing Officer, and an opportunity for review of the Hearing Officer's Initial Agency Decision by the OHA Director. 10 C.F.R. §§ 708.21, 708.32.

B. Procedural History

Mr. Johnson filed a Part 708 Complaint on September 8, 2008, with the Whistleblower Program Manager at the National Nuclear Security Administration's Service Center in Albuquerque, New Mexico. He filed an amendment to his Complaint on November 20, 2008. In his Complaint, Mr. Johnson alleged that he had made protected disclosures and, as a result of his so doing, B&W engaged in a series of retaliatory actions against him, including threatening to fire him and subjecting him to an internal audit. B&W filed its response to the Part 708 Complaint on December 10, 2008, contesting that Mr. Johnson had engaged in any conduct protected under Part 708, and arguing that his Complaint did not identify any acts of retaliation. The Whistleblower Program Manager transmitted the Complaint to OHA for an investigation, to be followed by a hearing, when informal resolution of the Complaint proved unsuccessful. While the case was pending before an OHA Investigator, Mr. Johnson requested that his Complaint be dismissed. On June 4, 2009, the OHA dismissed his Complaint.

On April 14, 2010, after leaving his employment with B&W on March 24, 2010, Mr. Johnson filed a new Part 708 Complaint with the Whistleblower Program Manager. In this Complaint, he referenced his earlier alleged protected disclosures and his previous Part 708 Complaint, and alleged that B&W management had retaliated against him by harassing and constructively discharging him. B&W filed a response to the Complaint on April 23, 2010, requesting that the Complaint be dismissed because Mr. Johnson was improperly attempting to reinstate his prior Complaint, which had been dismissed at his request, and because Mr. Johnson had not alleged an act of retaliation for which relief could be granted under Part 708. The Whistleblower Program Manager subsequently transmitted the Complaint to OHA for an investigation followed by a hearing.

On June 28, 2010, the OHA Director appointed an Investigator (OHA Investigator), who conducted an investigation into the allegations contained in Mr. Johnson's Complaint. The OHA Investigator issued a Report of Investigation (ROI) on September 17, 2010. In the ROI, the OHA Investigator noted that the filing of Mr. Johnson's previous Part 708 Complaint would constitute a protected activity under the regulations, which protect from retaliation conduct including "[p]articipating in . . . an administrative proceeding conducted under this regulation; . . . ." 10 C.F.R. § 708.5(b). However, the Investigator concluded that it was uncertain whether there was sufficient temporal proximity between the filing of Mr. Johnson's 2008 whistleblower Complaint and the harassment he allegedly experienced beginning in January 2010 to permit an inference that the Complaint was a contributing factor to the alleged retaliation. In addition, the Investigator, though finding that the OHA has held that a constructive discharge can form the basis for relief under Part 708, reached no conclusion as to whether the facts alleged by Mr. Johnson in this case would constitute a constructive discharge.

Immediately after the ROI was issued, the OHA Director appointed me the Hearing Officer in this case. On October 8, 2010, I sent a letter to the parties and asked them to submit briefs discussing the ROI, specifically identifying the parts of the ROI with which each party agreed and disagreed, and identifying facts in the record supporting the party's position. On October 28, 2010, B&W submitted its brief, in which it requested that the Complaint be dismissed. Mr. Johnson tendered his brief and a response to the Motion to Dismiss on November 9, 2010.

On November 24, 2010, I issued a decision granting B&W's Motion to Dismiss to the extent that the Complaint alleged any acts of retaliation other than the harassment and constructive discharge Mr. Johnson alleged occurred in 2010, and denied the Motion in all other respects. *B&W Pantex, LLC*, Case No. TBZ-0104 (2010) (complainant time-barred from alleging any acts of retaliation that he alleged in his first Complaint).

I subsequently convened a hearing in this case, in Amarillo, Texas, on December 1, 2010. Both parties submitted exhibits. B&W presented exhibits into the record which were lettered Exhibit A through Exhibit O, and Mr. Johnson submitted exhibits numbered Exhibit 1 through Exhibit 5. B&W presented as witnesses three B&W management employees, one HR official, and three of Mr. Johnson's co-workers. Mr. Johnson testified on his own behalf, and called his wife, his doctor, three DOE Pantex Site Office employees, and four B&W employees as witnesses.

C. Factual Background

Mr. Johnson alleges that, in 2007 and 2008, he made disclosures protected under Part 708 regarding the implementation of an Energy Savings Performance Contract (ESPC) at Pantex, including by filing a Complaint with the DOE Office of Inspector General (IG). An ESPC is a partnership between a Federal agency and an energy service company (ESC). The ESC conducts a comprehensive energy audit for the Federal facility and identifies improvements to save energy. In consultation with the Federal agency, the ESC designs and constructs a project that meets the agency's needs and arranges the necessary financing. The ESC guarantees that the improvements will generate energy cost savings sufficient to pay for the project over the term of the contract. After the contract ends, all additional cost savings accrue to the agency. Contract terms up to 25 years are allowed. Federal Energy Management Program: Energy Savings Performance Contracts, http://www1.eere.energy.gov/femp/financing/espcs.html.

Mr. Johnson claims he was subject to retaliation for his advocacy of the ESPC by virtue of an audit requested by Pantex Manager Dan Swaim. In March 2008, Mr. Swaim requested an internal audit of the ESPC, to review several issues, including Mr. Johnson's relationship with the owner of NORESCO, LLC, the ESC chosen for the Pantex ESPC. Mr. Johnson further alleges that, in late August 2008, he experienced "emotional distress" from negative interactions with his supervisor, Dale Stout, and that Mr. Stout gave him an increased workload and increasingly shorter deadlines to comply with. Allegedly pursuant to a Complaint by Mr. Stout about Mr. Johnson's performance, Mr. Johnson was subsequently asked by Pantex HR to respond to a Complaint about his work performance.

As noted above, Mr. Johnson filed a Part 708 Complaint in September 2008, but withdrew the Complaint in June 2009, after the Whistleblower Program Manager referred the Complaint to the OHA. Mr. Johnson alleges that he dropped this Complaint because he feared for his job.

In his present Complaint, Mr. Johnson alleges that he began to notice, in approximately January 2010, that Mr. Stout was again retaliating against him by demanding that major documents be finished within one day. Johnson also alleges that Mr. Stout would angrily ask a few hours later what Mr. Johnson was doing or why he was doing a particular function. It seemed to Mr. Johnson that Mr. Stout's conduct was "angrier and louder" every day. These incidents allegedly increased in frequency.

In March 2010, Mr. Johnson went to his physician regarding the stress he was experiencing on the job. His physician prescribed a tranquilizer and recommended that Mr. Johnson stay at home for one week. Mr. Johnson stayed home on sick leave during the week of March 15. Mr. Johnson alleges that, on March 22, 2010, his physician wrote on a Health Event Report Form that Mr. Johnson should not be returned to his previous work environment.

On March 23, 2010, Mr. Johnson met with Jeff Flowers, Mr. Stout's supervisor, and expressed his desire to work in a different location. Mr. Flowers instructed Mr. Johnson to report to him the following day. In his statement to the OHA Investigator, Mr. Johnson described the March 24th meeting as follows:

> I went to Mr. Flower's office at 8 am. He told me to come in and shut the door. He said, "So are you ready to go back to work?" I said, "Yes. Where am I going? He said, "Back to your cubicle." At this point I went into shock. I was dazed, and stayed that way for several weeks. I said, "Back to that same environment? No, I'm not going back there. Haven't you seen the doctor's restrictions? Haven't you seen the 53-B? I am under doctor's orders not to go back to that environment." He said "Reconsider." I said, "No. I can't." He said "Again, reconsider." I said, "No. You surely know I can't go back there." He turned around and grabbed a sheaf of papers. He put them in front of me. Without looking at them, I said "Are you firing me?!" He said, "No. I'm retiring you. Sign at the bottom." I said, "I don't want to retire. I can't afford to retire." He said, "Sign your name at the bottom." I said, "I can't retire. I'll lose my house." He said, "Sign." I signed, in shock. The rest of the day was a blur.

ROI at 9.

II. Analysis

A. Whether the Complainant Engaged in Protected Conduct

Under the regulations governing the DOE Contractor Employee Protection program, the complainant "has the burden of establishing by a preponderance of the evidence that he or she made a disclosure, participated in a proceeding, or refused to participate, as described under Section 708.5, and that such act was a contributing factor in one or more alleged acts of retaliation against the employee by the contractor." 10 C.F.R. § 708.29. The term "preponderance of the evidence" means proof sufficient to persuade the finder of fact that a proposition is more likely true than not when weighed against the evidence opposed to it. *See Joshua Lucero*, 29 DOE ¶ 87,034 at 89,180 (2007) (citing *Hopkins v. Price Waterhouse*, 737 F. Supp. 1202, 1206 (D.D.C. 1990)).

The Part 708 regulations specifically protect employees from retaliation for "[p]articipating in . . . an administrative proceeding conducted under this regulation; . . . ." 10 C.F.R. § 708.5(b). In the ROI, the OHA Investigator found, correctly, that filing a Part 708 Complaint constitutes a protected activity under the regulations. Mr. Johnson's filing of his first Part 708 Complaint in September 2008 began his participation in a Part 708 administrative proceeding, and his participation continued until June 2009, when he withdrew the Complaint. Thus, Mr. Johnson clearly engaged in protected activity, as defined under Section 708.5, from September 2008 to June 2009.

B. Whether Protected Activity Was a Contributing Factor in an Act of Retaliation

As noted above, in order to prevail in a Part 708 action, the complainant must show, by a preponderance of the evidence, that his protected activity was a contributing factor to a retaliatory action taken against him. Section 708.2 of the Contractor Employee Protection regulations defines retaliation as "an action (including intimidation, threats, restraint, coercion or similar action) taken by a contractor against an employee with respect to employment (e.g., discharge, demotion, or other negative action with respect to the employee's compensation, terms, conditions or privileges of employment) as a result of the disclosure of information." 10 C.F.R. § 708.2. Mr. Johnson alleges that B&W constructively discharged him on March 24, 2010.

The OHA has held that a constructive discharge can form the basis for relief under Part 708. *Richard L. Urie*, Case No. TBH-0063 (2008). In *Urie*, the hearing officer used the standard articulated in a Supreme Court case, *Pennsylvania State Police v. Suders*, 542 U.S. 129 (2004), as the standard to establish constructive discharge in the Part 708 context. Under this standard, for a whistleblower to establish that he or she was constructively discharged, the whistleblower must prove by a preponderance of the evidence that his or her working conditions became so intolerable that a reasonable person in the employee's position would have felt compelled to resign. *Urie* at 11. This is an objective "reasonable employee" standard which cannot be triggered by an employee's subjective beliefs. *See Roman v. Porter*, 604 F. 3d 34, 42 (1st Cir. 2010).

1. Working Environment from January to March 2010

In his testimony, Mr. Johnson described being berated by Mr. Stout at work every day from January 2010 until Mr. Johnson's retirement in March 2010. Hearing Transcript (Tr.) at 68-69. He testified that, one to three times a day, Mr. Stout would come by his cubicle and, after joking with Johnson's co-workers, "would do one of those, what the hell are you doing? What -- every time I come by your cubicle, you're either looking at the computer, you're looking at a book, or you're reading the newspaper. And the tone of voice got vicious is what it was." *Id.* at 68. Mr. Johnson testified that, by March, "I was scared to come to work, literally." *Id.* at 69.

One can make a legitimate argument that being unfairly singled out for verbal abuse several times a day could indeed become intolerable. What is glaringly absent in this case, however, is any evidence, aside from Mr. Johnson's assertions, that such were in fact the conditions under which he worked.

Mr. Johnson's supervisor, Mr. Stout, testified that he tried to treat each of his employees the same, and thinks that he did. *Id.* at 235. He described an instance, on March 10, 2010, when he was working on a project with an approaching deadline, relying on input from Mr. Johnson. He stated that he walked by Mr. Johnson's cubicle and saw him reading a newspaper. After going to his office to think about this, he returned to Mr. Johnson's cubicle and said, "Fred, don't you have anything better to do." Tr. at 231. Mr. Stout testified that, after returning to his office, Mr. Johnson came and told him that "you can't come in and talk to me that way; I've been working all day and all that." *Id.*

One of Mr. Johnson's co-workers, David Griffis, who worked in a cubicle near Mr. Johnson, testified that he recalled an instance where Mr. Stout entered Mr. Johnson's cubicle and told him to "put the paper down; I need you to work on some project. You know, not in a conversational tone, but not -- you know, not overly loud. Loud enough for me to hear in the next cubicle, but that was about it." *Id.* at 220.

Mr. Griffis, who was new to Mr. Stout's group, stated that he was assigned a cubicle near Mr. Johnson's for about two and one-half weeks beginning in mid-February 2010. *Id.* at 223. Though this was a period in which Mr. Johnson describes being verbally accosted by Mr. Stout one to three times per day, Mr. Griffis testified that the instance he described was the only time he heard Mr. Stout raise his voice at Mr. Johnson. *Id.* at 224.

Aside from Mr. Johnson and Mr. Griffis, there were two other employees who worked in Mr. Stout's group, both of whom testified at the hearing. One of them, Boyd Deaver, stated that he never saw Mr. Stout single Mr. Johnson out by giving him more work than others, and did not recall Mr. Stout ever treating Mr. Johnson differently than his co-workers. *Id.* at 194. The other employee, David Koontz, agreed. *Id.* at 211. Having worked at Pantex for 37 years, Mr. Koontz described Mr. Stout as being "like any supervisor. You know, once in a while, when you don't do what you're supposed to do, you consider you're probably going to get your butt chewed out. And, you know, that's happened, but it's never been . . . you know, I guess I don't take work personal." *Id.* at 213.

Mr. Johnson did present evidence that he was exhibiting signs of stress during the period in question. A friend of Mr. Johnson's, John O'Brien, who works at the Pantex Site Office, testified that he saw a "decline" in Mr. Johnson, that he was more distracted, agitated, showing signs of "memory issues," and reported lack of sleep and stomach problems. *Id.* at 129. Mr. O'Brien stated that on the weekend prior to his resignation, Mr. Johnson "was very concerned about having to go back into that environment, and I was seriously questioning your ability to function in the environment, as you were perceiving it." *Id* at 130.

A doctor who treated Mr. Johnson during the period in question also testified at the hearing. He explained that Mr. Johnson had presented with symptoms of stress in August 2008, and that Mr. Johnson "reported that his working environment had contributed to most of the symptoms." *Id.* at 145. At that time, Mr. Johnson's doctor prescribed an anti-depressant, Zoloft. *Id.* Though this is an earlier period in which Mr. Johnson alleges that he suffered from emotional distress because of interactions with Mr. Stout, I note here the doctor's testimony as to the 2008 visit only as background, since I have already ruled that Mr. Johnson's previous allegations of retaliation are time-barred from being raised again in the present complaint.

The doctor testified that Mr. Johnson returned to see him on March 15, 2010, "complaining that his depression was worsening. He claimed that his boss at work has been, quote unquote, verbally abusive, making it hard on him to continue working there." *Id.* at 151-52. Because of this, the doctor increased Mr. Johnson's Zoloft dosage from 50 milligrams to 100 milligrams per day, and added a "small dose of Xanax," an anti-anxiety medication. *Id.* at 152. The doctor wrote a note requesting that Mr. Johnson be excused from work during the week of March 15 through 19, 2010. Exhibit 4. When Mr. Johnson returned to work on March 23, 2010, he brought with him a Health Event Report Form (Pantex Form 53-B), indicating that he had visited his doctor again on March 22, 2010. Exhibit 3. The form contained a diagnosis from the doctor of "Depression/Anxiety," and listed under restrictions, "No stressful environment." *Id.*

Mr. Johnson's wife also testified, and her testimony was consistent with the observations of Mr. O'Brien, and Mr. Johnson's doctor. Tr. at 183-84. All of this testimony is evidence that Mr. Johnson was experiencing stress during the period in question. But it is *not* evidence of Mr. Johnson's working conditions, viewed objectively. At best, it is circumstantial evidence of Mr. Johnson's subjective belief regarding those conditions, as it verifies that he contemporaneously complained about his work environment. It may also be circumstantial evidence that his work

environment caused him stress, to the extent one can infer this from the distress observed firsthand by these witnesses. Even then, as Mr. Johnson's doctor testified, a number of external factors can cause stress. "It could be marriage; it can be work; it can be financial problems. It can be anything, yes." *Id.* at 157.

From this evidence, therefore, I might find that Mr. Johnson *subjectively perceived* his working environment to be stressful and unpleasant, perhaps even intolerable for him. But, as noted above, this office, following the Supreme Court, applies an objective "reasonable person" standard to allegations of constructive discharge. That is, Mr. Johnson must prove by a preponderance of the evidence that his working conditions became so intolerable that a reasonable person in his position would have felt compelled to resign. *Urie* at 11. Without any direct evidence of those conditions, other than his own testimony, and with credible testimony in fact contradicting Mr. Johnson's assertions, I cannot find that he has met this burden.

2. Events of March 23 and March 24, 2010

The individual testified that, upon returning to work from leave on March 23, 2010, he reported to the plant medical department, Tr. at 20, which is the standard procedure for employees returning from medical leave. *Id.* at 95. He brought with him the form referenced above, Form 53-B, with the notation from his doctor, "No stressful environment," written as a restriction. *Id.* at 161, 166; Exhibit 3. Mr. Johnson testified that after he turned in this form to the medical department, it was returned to him, but "the restrictions weren't there anymore." Tr. at 173. However, a copy of this form was brought to the hearing by a nurse from the medical department, and it did still contain the restrictions written by Mr. Johnson's doctor. Exhibit 3.

Based on the hearing testimony, I find it more likely that Mr. Johnson confused the Form 53-B that he brought to the plant with a different form, a return to work form that is given to workers to take to their supervisor after they have been processed through the medical department. Tr. at 173-75. This form, which was also produced at the hearing, has a space for restrictions based on the medical department's evaluation of Mr. Johnson, and in this space was printed, "No restrictions at this time." Exhibit 5. There is no need, therefore, to consider what relevance, if any, there might be to the present case had the medical department removed restrictions from Mr. Johnson's Form 53-B.

After leaving the medical department, Mr. Johnson reported to the office of Jeff Flowers, the supervisor of Mr. Stout. Tr. at 27, 58. Mr. Flowers testified that he asked for Mr. Johnson to report to him because of what he had heard that day from a Human Reliability Program (HRP) supervisor at the Pantex Plant. *Id.* at 83-84. The HRP official had told Mr. Flowers that she and a plant psychologist had spoken to Mr. Johnson and that he said he preferred to retire rather than return to work for Mr. Stout. *Id.*

Mr. Flowers testified that, in their meeting of March 23, Mr. Johnson described "his version" of events, and reiterated that he preferred retirement to working for Mr. Stout. *Id.* at 84. Mr. Flowers said that he told Mr. Johnson that he did not want him to make a rash decision, and therefore told him to come back and see him the following morning, "because I wanted to talk to his co-workers alone." *Id.* Mr. Flowers stated that he then called Mr. Johnson's co-workers to his office, and asked another department manager to sit in on the meeting. *Id.* He asked the co-workers if Mr. Johnson's description of his conditions was true, and they said it was not. *Id.*

Mr. Johnson returned to Mr. Flower's office on the morning of March 24. *Id.* at 22, 85. There is a stark discrepancy between the accounts of the two men regarding this meeting. Mr. Johnson's testimony at the hearing was virtually identical to the statement he provided to the OHA Investigator, as set forth in Section I.C of this decision above, in which he stated that Mr. Flowers told him, after Mr. Johnson stated that he could not go back to the same working environment, that he was going to "retire" him. *Id.* at 22-24. He contended that he told Mr. Flowers that he could not afford to retire, but that Mr. Flowers insisted he sign certain documents and took him to an HR official to process the papers, from which point, according to Mr. Johnson's testimony, he "was dazed or shocked or whatever you want to call it." *Id.* at 25.

In contrast, Mr. Flowers testified that, in their March 24 meeting, he asked Mr. Johnson if he was still intent on retiring rather than work for Mr. Stout, and he said that he was. *Id.* at 85. The previous day, Mr. Flowers had asked one of Mr. Johnson's co-workers to put together the papers that would need to be filled out by Mr. Johnson should he choose to retire. *Id.* When Mr. Johnson informed him that he still wished to retire, Mr. Flowers got out the necessary paperwork, which they began to fill out. *Id.* Because Mr. Flowers was not sure whether they were filling out the paperwork correctly, he called an HR official and asked if they could come to his office to go over the retirement paperwork. *Id.*

The HR official, D.J. Shead, testified at the hearing. He was shown a March 24, 2010, memorandum from Mr. Johnson informing the HR department of his retirement, Exhibit I, and Mr. Shead stated that he was present when Mr. Johnson signed the document. Tr. at 244. He testified that he engaged in small talk with Mr. Johnson, asking him about his retirement plans, and that he saw nothing out of the ordinary about Mr. Johnson's demeanor during their meeting. *Id.* at 246.

Finally, on March 24, 2010, Mr. Flowers and Mr. Johnson met with Bill Mairson, the manager of Pantex's Environmental Safety and Health Division, to whom Mr. Flowers reports. Mr. Mairson testified that their meeting began with Mr. Johnson telling him that he could not work for Mr. Stout. *Id.* at 204. Mr. Mairson said that he responded by offering Mr. Johnson "a physical location away from Mr. Stout," though Mr. Johnson would continue to report to Mr. Stout. *Id.* Mr. Mairson also testified that he told Mr. Johnson that he was "free to bid on other positions that were available." *Id.* According to Mr. Mairson, Mr. Johnson found neither option to be an acceptable alternative to resigning. *Id.* In his testimony, Mr. Johnson denied that Mr. Mairson offered him a location away from Mr. Stout, but acknowledged that he had mentioned bidding for other positions. *Id.* at 60.

Considering all of the hearing testimony regarding the events of March 24, 2010, I find more credible the accounts of Mr. Flowers, Mr. Shead, and Mr. Mairson, as opposed to that of Mr. Johnson. If Mr. Johnson could prove that Mr. Flowers in fact coerced him into signing his retirement papers, there would be a basis for finding that he was constructively discharged. *See Heining v. General Serv. Admin.*, 68 M.S.P.R. 513, 519 (1995) ("presumption of voluntariness may be rebutted if the employee can establish that the resignation or retirement was the product of duress or coercion"). My evaluation of the evidence, however, leads me to find that Mr. Johnson has not proven this.

In summary, for the reasons set forth above, I will deny Mr. Johnson's Complaint of Retaliation, as he has not proven by a preponderance of the evidence that he was subject to any action that meets the definition of retaliation set forth in 10 C.F.R. § 708.2, more specifically that his resignation was the product of intolerable working conditions from January 2010 to March 2010, or of any coercion or duress on the day of his retirement, March 24, 2010.

It Is Therefore Ordered That:

(1) The Complaint filed by Hansford F. Johnson under 10 C.F.R. Part 708, OHA Case No. TBH-0104, is hereby denied.

(2) This is an initial agency decision that becomes the final decision of the Department of Energy unless a party files a notice of appeal by the fifteenth day after the party's receipt of the initial agency decision.

DEPARTMENT OF ENERGY

OFFICE OF HEARINGS AND APPEALS

Motion For Summary Judgement
Initial Agency Decision

Name of Case:	Colleen Monk
Date of Filing:	August 25, 2010
Case Number:	TBH-0105

This Decision concerns a Complaint filed by Colleen Monk (hereinafter referred to as "Ms. Monk" or "the Complainant") against Washington TRU Solutions, VJ Technologies, and Mobile Characterization Services (hereinafter referred to individually as "WTS," "VJT," and "MCS," respectively, or collectively as "the Respondents"), under the Department of Energy's (DOE) Contractor Employee Protection Program regulations found at 10 C.F.R. Part 708. At all times relevant to this proceeding, the Respondents were DOE contractors operating in Los Alamos, New Mexico. It is the Complainant's contention that during her employment with VJT, she engaged in protected activity and, as a consequence, suffered reprisals by the Respondents. Among the remedies that the Complainant is seeking are reinstatement of her former pay, back pay, and compensation for the time that she has spent representing herself in this proceeding. As discussed below, I have concluded that Ms. Monk is not entitled to the relief that she seeks.

I. Background

A. Regulatory Background

The DOE established its Contractor Employee Protection Program to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste, and abuse" at DOE's Government-owned or -leased facilities. *See* Criteria and Procedures for DOE Contractor Employee Protection Program, 57 Fed. Reg. 7533 (1992). The Program's primary purpose is to encourage contractor employees to disclose information that they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers. The Part 708 regulations prohibit a DOE contractor from retaliating against its employee because the employee has engaged in certain protected activity, including:

> (a) Disclosing to a DOE official, a member of Congress, . . . [the employee's] employer, or any higher tier contractor, information that [the employee] reasonably believe[s] reveals—

(1) A substantial violation of any law, rule, or regulation;

(2) A substantial and specific danger to employees or to public health or safety; or

(3) Fraud, gross mismanagement, gross waste of funds, or abuse of authority, or . . .

(c) . . .[R]efusing to participate in an activity, policy or practice if you believe participation would . . .

(2) Cause you to have a reasonable fear of serious injury to yourself, other employees, or members of the public.

10 C.F.R. § 708.5.

An employee who believes that he or she has suffered retaliation for making such disclosures may file a complaint with the DOE. It is the burden of the complainant under Part 708 to establish "by a preponderance of the evidence that he or she made a disclosure, participated in a proceeding, or refused to participate, as described under § 708.5, and that such act was a contributing factor in one or more alleged acts of retaliation against the employee by the contractor." 10 C.F.R. § 708.29. If the complainant meets this burden of proof, "the burden shifts to the contractor to prove by clear and convincing evidence that it would have taken the same action without the employee's disclosure, participation, or refusal." *Id.*

B. Factual Background

Except as otherwise indicated, the following facts are not in dispute. WTS is the Management and Operations contractor for the DOE's Waste Isolation Pilot Plant (WIPP) in Carlsbad, New Mexico. The function of the WIPP is to safely store radioactive waste collected from various defense-related facilities around the United States. One of the departments within WTS is the Central Characterization Project (CCP). It is the responsibility of the CCP to provide on-site analysis of the radioactive wastes, which are usually contained in 55-gallon drums, to determine their composition and to ensure that no prohibited items are included in the drums for shipment to the WIPP. Drums shipped to WIPP are subject to strict controls regarding their content, and specifically regarding the amount of liquid wastes they contain. This analysis, called "characterization," is sometimes performed by subcontractors. MCS is one such subcontractor, providing Real Time Radiography (RTR) and Non-Destructive Assay services for WTS. RTR, which is the only characterization procedure that is relevant to this proceeding, essentially consists of X-raying the 55-gallon drums and analyzing their contents.

Ms. Monk was hired by VJT, an MCS subcontractor, in September 2001 as an Administrative Manager and Lead Facility Records Coordinator for the Savannah River Site. In 2005, she relocated to the Los Alamos National Laboratory (LANL) and began training for a position as an RTR Operator. The Complainant received her qualifications and became an RTR Operator in January 2006.

Beginning in January 2009, the Complainant began experiencing constant pain and fatigue. She was subsequently diagnosed as suffering from Fibromyalgia. She informed her supervisor that she was taking pain medication and that she could not take her medication while working in the field (as an

RTR Operator). Ms. Monk alleges that, during that same time, she made protected disclosures, primarily regarding issues related to safety at LANL.

In particular, she alleges that a WTS manager came to LANL to oversee RTR operations. The manager allegedly told the RTR Operators that they were rejecting too many drums for containing an excessive amount of liquid wastes, and asked that the Operators use an Excel spreadsheet provided by WTS to quantify the drums' liquid content. The Complainant and other RTR Operators did not believe that this spreadsheet accurately calculated the amount of liquid in a drum, and resisted the use of this tool, preferring to use other estimation techniques and their experience and training to perform this task.

Because of concerns on the part of WTS and VJT management that RTR Operators were not following a consistent procedure for determining the amount of liquid in the drums, WTS revoked the qualifications of all RTR Operators at LANL in October 2009. In November 2009, WTS management informed the Operators that they would be trained on the use of the spreadsheet and would be tested on their knowledge in order to be re-qualified. Six Operators took the test, and two of the six passed, were placed on the List of Qualified Individuals (LOQI), and were subsequently re-qualified as RTRs. The Complainant also passed the test, but she was not placed on the LOQI. In December 2009, Ms. Monk was moved to an administrative position with MCS. As a result of this reassignment, the Complainant's pay was reduced by about $2.00 per hour.

C. Procedural Background

On January 20, 2010, Ms. Monk filed a Part 708 Complaint with the DOE's Carlsbad Field Office. That Office attempted to mediate the Complaint on June 18, 2010, but those efforts failed. Ms. Monk requested that her Complaint be forwarded to the Office of Hearings and Appeals (OHA) for an investigation and hearing. The Carlsbad Field Office forwarded the Complaint to OHA and the OHA Director appointed an investigator. The OHA investigator interviewed Ms. Monk and other VJT employees and reviewed a number of documents before issuing a Report of Investigation (ROI). I will discuss Ms. Monk's Complaint and the ROI in greater detail in section I.D below.

The OHA Director appointed me as the Hearing Officer in this case. In a letter to the parties, I requested that they submit briefs focusing on the findings and conclusions in the ROI with which they disagree, and the reasons for that disagreement. The parties submitted briefs and replies setting forth their positions concerning the issues raised in the ROI.

D. Ms. Monk's Complaint and the Report of Investigation

1. Ms. Monk's Complaint

Ms. Monk alleges in her Complaint that she engaged in activities that are protected by the Part 708 regulations, and that the Respondents retaliated against her because of those activities. Specifically, the Complainant alleges that, during the period from 2007 to 2009, WTS wanted all operators to also act as "spotters" for the forklifts used to move the 55-gallon drums of radioactive waste. However, Ms. Monk refused to act as a "spotter" because of a LANL rule that required forklift "spotters" to be qualified forklift operators. The Complainant had no such qualification. She informed her supervisor of her concerns in March 2009. She alleges that WTS management was "not happy with her over this refusal." *See* addendum to Part 708 Complaint at 2. The Complainant contends that her actions in this regard were both a protected disclosure (that employees who were not forklift-

qualified were being required to act as "spotters"), and a refusal to participate in an activity that caused her to have a reasonable fear of serious injury to herself or to other employees.

The Complaint also alleges that in March 2009, Ms. Monk approached a Site Project Manager at LANL with her concerns about the use of an Excel spreadsheet to calculate the amount of liquid in the drums. According to the Complainant, the Manager had determined that the RTR Operators' rejection rate for the drums was too high, and asked that the Operators use the spreadsheet. Specifically, the spreadsheet would calculate the amount of liquid in a drum after the Operator entered the physical measurements of the liquid observed inside the drum. Ms. Monk and other RTR Operators believed that the spreadsheet would underestimate the amount of liquid in the drums. The Complainant states that she told the Site Project Manager of her concerns in this area during February and March 2009, and that the Manager informed her that she and other RTR Operators would have to use the spreadsheets or he would find other RTR Operators who would. This constitutes Ms. Monk's second alleged protected disclosure.

The Complainant's final alleged protected disclosure concerns a March 2009 incident during which a technician improperly performed maintenance on an energized RTR generator. Ms. Monk stated that she informed VJT and WTS management of this unsafe situation, and unsuccessfully tried to stop the technician herself, but was told by one of the VJT employees that she was "overstepping her bounds." *See* Addendum to Complaint at 13.

The Complaint further states that, because Ms. Monk engaged in this protected activity, the Respondents retaliated against her. Specifically, the Complainant alleges that she was transferred to an administrative position, with a reduction in pay of approximately $2.00 per hour, that her name was not included on the LOQI despite having passed the re-qualification test, and that she was made to endure a hostile work environment from March 2009, after her disclosure concerning the technician working on the energized equipment, until October 2009. *See generally* Addendum to Complaint; Complainant's Brief in Opposition to Summary Judgement (hereinafter referred to as "Comp. Reply") at 4.

2. The ROI

In her ROI, the OHA Investigator discussed the Complainant's allegations relating to protected activity and retaliatory acts taken against her. Regarding Ms. Monk's refusal to act as a "spotter" for forklift operators and her disclosure that non-forklift qualified personnel were being required to perform "spotter" duties, the Investigator took note of (i) Ms. Monk's admission that she and other RTR Operators were told that they did not have to act as a "spotter" if doing so made them uncomfortable, (ii) the evidence that she could have taken a test to become forklift-qualified, and (iii) the lack of corroboration from other RTR Operators that WTS insisted that Operators serve as "spotters." For these reasons, the Investigator concluded that the Complainant's refusal to act as a "spotter" and her disclosure did not constitute protected activity under Part 708.

The OHA Investigator also found that Ms. Monk's complaint to management about the Excel spreadsheet was not a protected disclosure. The Investigator cited WTS's contention that its major concern was that Operators were not using a consistent, justifiable process to estimate the amount of liquid in the drums, and its claim that Operators were not forced to use the spreadsheet, but could also estimate the volumes by performing manual calculations. The Investigator found that management was making an attempt to improve upon its procedures, and concluded that the

Complainant had not demonstrated, by a preponderance of the evidence, that she reasonably believed that the use of the Excel spreadsheet would result in a substantial and specific danger to public health or safety.

However, the Investigator reached a different conclusion with regard to Ms. Monk's disclosure concerning the technician's unauthorized work on an energized piece of equipment. The Investigator noted that VJT management admitted that this was a serious incident because safety protocols were violated, and that they acknowledged that the Complainant communicated her concerns about the incident to them. The Investigator found that, although the incident raised issues about Ms. Monk's own culpability in the events that occurred, "it is possible that [she] can demonstrate by a preponderance of the evidence that she reasonably believed this incident was a substantial and specific danger to employees or to public health or safety." ROI at 7.

The ROI also discussed the retaliations alleged by the Complainant. The Investigator concluded that the primary retaliation alleged by Ms. Monk was her transfer from her position as an RTR Operator to an administrative position, with the accompanying reduction in pay. However, the Investigator found there to be some question as to whether the reassignment rose to the level of a retaliation under Part 708. In this regard, she noted the Respondents' claims that the Complainant was taking pain medication that raised concerns about her fitness for duty and that Ms. Monk requested to be taken from the field and placed in an administrative position because of that medication. Proceeding on the assumption that the transfer was a retaliation, the Investigator stated that the Complainant might be able to show that her alleged protected disclosure was a contributing factor to this action.

The Investigator then pointed out that, if the Complainant were able to make these showings, the burden would then shift to the Respondents to show, by clear and convincing evidence, that they would have taken the same actions in the absence of any protected disclosure. The Investigator concluded that, in all likelihood, the Respondents would be able to make this showing. She based her conclusion on evidence in the record indicating that the Complainant asked for this reassignment because of her medical condition, and on concerns by the Respondents that Ms. Monk's pain medications might render her unfit for duty as an RTR Operator. Regarding the issue of Ms. Monk's exclusion from the LOQI, the Investigator cited the rationale of VJT management that, since the Complainant was being transferred to an administrative position, there was no need to include her on the List. There was also evidence that the Respondents took a similar action with a comparably-situated individual. Because of this conclusion, the Investigator recommended that I consider whether this case should be decided by means of summary judgement. [*]

II. Analysis

---

*/ With regard to the allegation of a hostile work environment, the Investigator concluded that "a mere assertion of a hostile work environment does not rise to the level of retaliation." ROI at 8, n.11. I agree. However, even if the Complainant's pleadings regarding this issue had gone beyond mere assertion, the record in this matter clearly indicates that she knew, or should have known, of any hostile work environment more than 90 days prior to the date on which she filed her Part 708 complaint. Her allegation regarding a hostile work environment is therefore time-barred. 10 C.F.R. § 708.14(a).

The Part 708 regulations do not include procedures and standards governing summary judgment. I note, however, that the Federal Rules of Civil Procedure provide that a Motion for Summary Judgement shall be granted "if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law." Fed. R. Civ. P. 56(c). While the Federal Rules do not govern this proceeding, Rule 56 has been used as a guide in the evaluation of Motions for Summary Judgment filed in a Part 708 proceeding. *See Edward J. Seawalt*, Case No. VBZ-0047 (August 20, 2000). Prior cases of this office considering Motions for Summary Judgment instruct that such a motion should only be granted if it is supported by "clear and convincing" evidence. *Cf. Fluor Daniel Fernald*, Case No. VBZ-0005 (October 4, 1999) (motion to dismiss should only be granted where there are clear and convincing grounds for dismissal).

As previously set forth, in order to prevail in a whistleblower complaint, a complainant has the burden of establishing by a preponderance of the evidence that he or she made a protected disclosure and that the disclosure was a contributing factor in one or more alleged acts of retaliation against the employee by the contractor. 10 C.F.R. § 708.29. Once the employee has met this burden, the burden shifts to the contractor to prove by clear and convincing evidence that it would have taken the same action without the employee's disclosure, participation, or refusal. *Id.* Therefore, if there are no genuine issues as to any material fact and the Respondents are entitled to a judgement as a matter of law on any of these elements, then summary judgement in favor of the Respondents is appropriate.

For the reasons that follow, I harbor serious doubts as to whether the Complainant's reassignment, which is the primary alleged retaliatory act, can properly be considered as retaliation. However, even if the Respondents' actions could be considered as retaliation as that term is defined in the Part 708 regulations, and the Complainant could demonstrate that she made a protected disclosure that was a contributing factor to that retaliation, I conclude, as a matter of law, that the Respondents would have taken the same actions in the absence of any protected activity on the part of the Complainant. The Complainant is therefore not entitled to the relief that she seeks.

"Retaliation" is defined in the Part 708 regulations as being "an action (including intimidation, threats, restraint, coercion or similar action) taken by a contractor *against an employee* with respect to employment (*e.g*., discharge, demotion, or other *negative* action with respect to the employee's compensation, terms, conditions or privileges of employment) as a result of the employee's disclosure of information, participation in proceedings, or refusal to participate in activities described in § 708.5 of this subpart." 10 C.F.R. § 708.2 (italics added). Certainly, reassignment to a less desirable position can constitute retaliation. *See, e.g., Deford v. Secretary of Labor*, 700 F.2d 281, 287 (6th Cir. 1983). However, in this case, not only is it undisputed that the Complainant requested the reassignment, but she included a permanent transfer to an administrative position as part of the relief that she sought in her Part 708 complaint. Complaint at 3. It would therefore turn the definition of "retaliation" on its head to consider an action that she indicated would help "make her whole," *id.*, as being a "negative" action taken "against" her by the Respondents.

In her response opposing summary judgement, the Complainant argues that she requested the transfer because she feared being fired. Oct. 21, 2010 Response at 4. She explains that in July 2009, she had a discussion with the VJT Human Resources (HR) Director about her working conditions as an RTR operator. She told the director that she had been told by her RTR Lead that, because of a periodic shortage of RTR operators, she and another operator were prohibited from taking time off during the

month of August 2009. Her manager allegedly told her that, if she or the other operator took time off or called in sick, they would be reprimanded. Ms. Monk and the HR Director discussed the Complainant's concerns about the RTR operators going from 10 to 12 hour shifts in August and about getting in trouble because of possible "flare-ups" of her medical condition. According to Ms. Monk, the HR Director raised the possibility of the Complainant going on disability, and when she declined to consider this option, the HR Director allegedly said that if Ms. Monk could not perform her duties as an RTR operator 100 percent of the time, including going into the field when needed, she might be terminated.

Even if these allegations are true, the Complainant appears to be claiming that she feared termination because of a potential inability to be available for duty as an RTR operator to the extent demanded by her employer, and not because of retaliation for engaging in protected activity. Termination solely because of an inability to be available for duty on the schedule set by the employer is not a violation of the Part 708 regulations.

The undisputed facts in this case also compel a conclusion that the Respondents would have taken the same actions regarding Ms. Monk's employment in the absence of any protected activity. In cases interpreting the federal Whistleblower Protection Act (WPA), upon which Part 708 is modeled, the Federal Circuit has identified several factors that may be considered in determining whether an employer has shown that it would have taken the alleged act of retaliation against a whistleblower in the absence of the whistleblower's protected conduct. Those factors include "(1) the strength of the [employer's] reason for the personnel action excluding the whistleblowing, (2) the strength of any motive to retaliate for the whistleblowing, and (3) any evidence of similar action against similarly situated employees for the non-whistleblowing aspect alone." *Kalil v. Dep't of Agriculture*, 479 F.3d 821, 824 (Fed. Cir. 2007) (*citing Greenspan v. Dep't of Veterans Affairs*, 464 F.3d 1297, 1303 (Fed. Cir. 2006)).

Applying these standards to the case at hand, the Respondents' reasons for transferring the Complainant to an administrative position were exceptionally strong. First, according to the Complainant, her medical condition was such that, when combined with the stress that the Complainant was under while working as an RTR operator, it "debilitated [her] body to the point where [she was] not able to return to the field." Complaint at 3. Her condition was known to the Respondents, to the extent that VJT's HR Director suggested that Ms. Monk consider going on disability. OHA Investigator's Record of Telephonic Interview with the Complainant at 3. Second, because of this condition, Ms. Monk was taking prescription drugs, including hydrocodone, that, at least on occasion, rendered her unfit for work in the field. *Id.* at 1; Addendum to Complaint at 7. The Respondents agreed with the Complainant that she could not work in the field on days that she had to take her pain medication. *See* affidavit of Karen Ventura, VJT Director of Human Resources at 2. There is further evidence that the Respondents were concerned about "liability issues" that could result from allowing the Complainant to continue to work as an RTR operator. OHA Investigator's Record of Telephonic Interview with Ms. Ventura at 2. Finally, as set forth above, it is undisputed that Ms. Monk requested the transfer.

Furthermore, the strength of the Respondents' motive to retaliate appears to have been minimal. Ms. Monk's alleged protected disclosure about the technician's unauthorized work on an energized piece of equipment did not directly implicate the Respondents' employees who played a role in the Complainant's reassignment. Also, I agree with the OHA Investigator that this incident was

appropriately investigated and adequately addressed with the findings made by the Respondents' Root Cause Analysis Report. There is little or no evidence of a retaliatory motive on the part of the Respondents.

Finally, there is evidence that the Respondents took similar actions against a similarly-situated employee for reasons that had nothing to do with "whistleblowing." The record indicates that another RTR operator requested reassignment because of the superior benefits that he would be eligible for in his new position. *See* OHA Investigator's Record of Telephonic Interview with Steve Halliwell, Head of Nuclear Division, VJT, at 2. His request was granted, and, like Ms. Monk, his name was taken off the LOQI and not placed back on the List because he was being reassigned. For these reasons, I find that the record, as it currently stands, conclusively indicates that the Respondents would have taken the same actions regarding the Complainant in the absence of any alleged protected activities.

III. Conclusion

As discussed above, I find that, even if Ms. Monk's reassignment could be defined as "retaliation," and even if she could show that she engaged in protected activity that was a contributing factor to that "retaliation," the record in this matter conclusively demonstrates that the Respondents would have taken the same actions in the absence of that protected activity. I therefore conclude that there are no genuine issues as to any material fact, and that the Respondents are entitled to a judgement in their favor as a matter of law.

It Is Therefore Ordered That:

(1) Treating the Respondents' Brief in Support of Summary Judgement as a Motion for Summary Judgement, that Motion is hereby granted.

(2)The Request for Relief filed by Colleen Monk under 10 C.F.R. Part 708 is hereby denied.

(2) This is an Initial Agency Decision, which shall become the Final Decision of the Department of Energy unless a party files a notice of appeal by the fifteenth day after the party's receipt of the Initial Agency Decision, in accordance with 10 C.F.R. § 708.32.

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Initial Agency Decision
Motion for Summary Judgment

Name of Case: Greta Kathy Congable

Dates of Filing: June 1, 2011
August 12, 2011

Case Numbers: TBH-0110
TBZ-0110

This Decision will consider a Motion for Summary Judgment filed by Sandia Corporation ("Sandia" or "the Respondent"), in connection with a complaint filed against the company by one of its employees, Greta Kathy Congable ("Ms. Congable" or "the Complainant"), on September 14, 2010, under the Department of Energy's (DOE) Contractor Employee Protection Program, set forth at 10 C.F.R. Part 708.[1] OHA has designated Ms. Congable's hearing request as Case No. TBH-0110, and the present Motion for Summary Judgment as Case No. TBZ-0110. For the reasons set forth below, I have determined that Sandia's Motion should be granted and Ms. Congable's complaint should be dismissed in its entirety.

I. BACKGROUND

A. The DOE Contractor Employee Protection Program

The DOE's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste and abuse" at DOE's government-owned, contractor-operated facilities. 57 Fed. Reg. 7533 (March 2, 1992). Its primary purpose is to encourage contractor employees to disclose information that they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers.

The Part 708 regulations prohibit retaliation by a DOE contractor against an employee because the employee has engaged in certain protected activity, including "disclosing to a DOE official… information that [the employee] reasonably believes reveals (1) a substantial violation of a law, rule, or regulation; (2) a substantial and specific danger to employees or to public health or

[1] Sandia Corporation, a wholly owned subsidiary of Lockheed Martin Corporation, manages and operates Sandia National Laboratory in Albuquerque, New Mexico, pursuant to a contract with the Department of Energy.

safety; or (3) fraud, gross mismanagement, gross waste of funds, or abuse of authority." 10 C.F.R. § 708.5(a).

Part 708 sets forth the procedures for considering complaints of retaliation. The DOE's Office of Hearings and Appeals (OHA) is responsible for investigating complaints, holding hearings, and considering appeals. 10 C.F.R. Part 708, Subpart C. According to the Part 708 regulations, a complaint must include "a statement specifically describing the alleged retaliation taken against [the complainant] and the disclosure, participation, or refusal that [the complainant believes gave rise to the retaliation." 10 C.F.R. § 708.12.

B. Factual Background

The Complainant has been employed by Sandia in a variety of administrative support positions since 1994. In August 2004, she was promoted to Administrative Staff Assistant (ASA) and assigned to Sandia's Corporate Investigations (CI) office. In September 2006, Christopher Padilla was named Senior Manager for CI, becoming Ms. Congable's direct supervisor. Between September 2008 and April 2010, Ms. Congable purportedly disclosed to several individuals at Sandia and Lockheed Martin, Sandia's parent company, the presence of unprotected personally identifiable information (PII) on Sandia's computer network, and Mr. Padilla's allegedly improper alteration of inquiry and case files. In June 2010, Ms. Congable was transferred from her ASA position in CI to an ASA position in Sandia's Management Assurance and Reporting Department (MA), retaining her same job title, job level, and salary.

C. Procedural Background

Ms. Congable filed a Part 708 complaint with the National Nuclear Security Administration Service Center (NNSA/SC) in Albuquerque, New Mexico, on September 14, 2010. In her complaint, Ms. Congable alleged that Sandia retaliated against her for making disclosures regarding the unsecured PII and Mr. Padilla's alleged misconduct by involuntarily transferring her from CI to MA. On October 27, 2010, NNSA/SC dismissed the complaint. Ms. Congable appealed the dismissal of her complaint to the OHA Director, pursuant to 10 C.F.R § 708.18. On December 6, 2010, the OHA Director granted Ms. Congable's appeal in part, and remanded her complaint back to NNSA/SC for further processing. *See Greta Kathy Congable*, Case No. TBU-0110 (2010).[2]

On April 5, 2011, NNSA/SC transmitted Ms. Congable's complaint to OHA, together with her request for an investigation followed by a hearing. The OHA Director appointed an Attorney-Investigator, who conducted an investigation and issued a Report of Investigation (ROI) on June 1, 2011. On June 2, 2011, I was appointed the Hearing Officer in this matter. I sent a letter to the parties directing them to submit briefs identifying areas of disagreement with the ROI and areas of agreement to which they were willing to stipulate. The parties submitted briefs and replies setting forth their positions regarding the findings in the ROI. After reviewing the documents in the record and the parties' submissions, I determined that further briefing was

[2] Decisions issued by OHA are available on the OHA website located at http://www.oha.doe.gov. The text of a cited decision may be accessed by entering the case number of the decision in the search engine located at http://www.oha.doe.gov/search.htm.

necessary on a threshold issue, namely whether Ms. Congable's transfer constituted an alleged retaliation within the meaning of Part 708. On July 20, 2011, I sent a letter to the parties, instructing Ms. Congable to submit an additional brief specifically addressing this issue and affording Sandia the opportunity to submit a reply. Ms. Congable submitted the additional brief on August 6, 2011. On August 12, 2011, Sandia submitted its reply brief wherein the company requested that Ms. Congable's complaint be dismissed.

II. ANALYSIS

A. The Applicable Legal Standards

In order to meet his or her burden under Part 708, a complainant must demonstrate, by a preponderance of the evidence, each of the following elements: (i) he or she made a protected disclosure or engaged in protected activity; (ii) he or she was the subject of a retaliation; and, (iii) the protected disclosure or activity was a contributing factor to the retaliation.[3] 10 C.F.R. § 708.29. Only if the complainant meets his or her burden does the burden then shift to the contractor to prove, by clear and convincing evidence, that it would have taken the same action absent the protected disclosure or activity. *Id*.

In her complaint, Ms. Congable alleges that she made several protected disclosures and that Sandia retaliated against her for making those disclosures by transferring her from an ASA position in CI to an ASA position in MA. In its August 12, 2011, brief, Sandia maintained that Ms. Congable's transfer, although involuntary, did not constitute a "retaliation" within the meaning of Part 708 and, therefore, her complaint should be dismissed in its entirety.

Although Sandia has moved for dismissal of the complaint, given the facts at hand, Sandia's motion is more aptly characterized as a Motion for Summary Judgment. Under Rule 56(c) of the Federal Rules of Civil Procedure, summary judgment is proper "if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law."[4] Fed. R. Civ. P. 56(c). Under this standard, "the mere existence of *some* alleged factual dispute between the parties will not defeat an otherwise properly supported motion for summary judgment; the requirement is that there be no *genuine* issue of *material* fact." *See Anderson v. Liberty Lobby, Inc.*, 477 U.S. 242, 247-48 (1986) (emphasis in original). Summary judgment may be entered, after adequate time for discovery and upon motion, against a party who fails to make a showing sufficient to establish the existence of an element essential to that party's case, and on which that party will bear the burden of proof at trial. In such cases, there can be "no genuine issue as to any material fact," since the non-moving party's complete failure of proof concerning an essential, threshold element of his case necessarily renders all other facts immaterial. The moving party is then "entitled to a judgment as a matter of law"

[3] The term "preponderance of the evidence" means proof sufficient to persuade the finder of fact that a proposition is more likely than not true when weighed against the evidence opposed to it. *See Joshua Lucero*, Case No. TBH-0039 (2006) (*citing Hopkins v. Price Waterhouse*, 737 F. Supp. 1202, 1206 (D.D.C. 1990)).

[4] While the Federal Rules do not govern Part 708 proceedings, Rule 56 has been used by OHA as a guide in considering Motions for Summary Judgment filed in Part 708 cases. *See Colleen Monk*, Case No. TBH-0105 (2011); *Edward J. Seawalt*, Case No. VBZ-0047 (2000).

because the non-moving party has failed to satisfy his burden of proof on an essential element of his case. *See Mary Ravage*, Case No. TBH-0102 (2011) (*citing Celotex v. Catrett*, 477 U.S. 317 (1986)).

As noted above, an essential element of Ms. Congable's case is proving, by a preponderance of the evidence, that she was the subject of "a retaliation" within the meaning of Part 708. If Ms. Congable cannot meet this threshold showing, then judgment cannot be awarded in her favor in this proceeding.

B. Whether the Complainant's Transfer Could Constitute a "Retaliation" Under Part 708

The Part 708 regulations define "retaliation" as "an action (including intimidation, threats, restraint, coercion or similar actions) taken by a contractor against an employee with respect to employment (*e.g.*, discharge, demotion, or other *negative action* with respect to the employee's compensation, terms, conditions or privileges of employment) as a result of the employee's disclosure of information, participation in proceedings, or refusal to participate in activities" protected under Part 708. 10 C.F.R. § 708.2 (emphasis added). It is well-established in OHA precedent that in order to constitute "a retaliation" within the ambit of Part 708, the allegedly retaliatory personnel action must negatively affect the terms and conditions of the complainant's employment. *See Colleen Monk*, Case No. TBA-0105 (2011) (transfer requested by complainant not a "negative action" within the meaning of Part 708, despite entailing slightly lower salary); *Vinod Chudgar*, Case No. TBH-0100 (2011) (transfer "did not have a negative effect on the terms and conditions of [his] employment because his new position retained his salary and grade level"); *Mark D. Siciliano*, Case No. TBH-0098 (2010) (contractor's failure to invite complainant to an event did not negatively affect the complainant's "compensation, terms, conditions or privileges of employment" and, therefore, was not a "negative action" within the meaning of Part 708).

In this case, the Complainant maintains that her transfer from her ASA position in CI to the ASA position in MA was retaliatory, basing her assertion primarily on the fact that the transfer was involuntary. It is undisputed, however, that Ms. Congable's transfer did not result in a loss in pay, benefits, or seniority. Ms. Congable also alleges that she has no meaningful job duties in her new position. Nonetheless, the record indicates that Ms. Congable's job duties in her new position are comparable to those in her old position.[5] The fact that the Complainant clearly preferred her old position to her current one is of little import in determining whether her transfer constitutes a retaliation under Part 708. The relevant standard is an objective one – whether the personnel action negatively affected the terms and conditions of employment. The evidence in the record clearly indicates that it did not. Therefore, the transfer was not a "retaliation," as that

[5] The performance reviews include a description of each of the Complainant's duties and her own input regarding each of the duties she accomplished during the review period. Among the job duties listed on Ms. Congable's 2009 performance review, the last complete year she worked as an ASA in CI, are: maintaining databases and websites, collecting data and maintaining files, preparing certain reports, and providing administrative support to CI by scheduling meetings, keeping meeting minutes, arranging travel, and composing, transcribing, and proofreading correspondence. Ms. Congable's current performance review, which covers the time she has worked as an ASA in MA, includes the following job duties: assisting in improving a "monthly recurring assessment evaluations process" used by the company; maintaining websites, collecting data, preparing reports, and assisting her supervisor with organizing monthly meetings by managing logistics, taking notes, and posting meeting materials.

term is defined in the Part 708 regulations. *See Vinod Chudgar*, Case No. TBH-0100 (2011). Accordingly, I find that Ms. Congable cannot satisfy her burden of proof on an element essential to her case and, as a result, is not entitled to the relief that she seeks.

III. CONCLUSION

As discussed above, I find that the Complainant's alleged retaliation, her involuntary transfer from an ASA position in Sandia's Corporate Investigations Office to a comparable ASA position in the company's Management Assurance and Reporting Department, does not constitute a "retaliation" within the meaning of Part 708. Therefore, the Complainant cannot satisfy her burden of proof on an essential element of her case, entitling the Respondent to a judgment in its favor as a matter of law. Accordingly, I conclude that Sandia's Motion for Summary Judgment should be granted and Ms. Congable's Complaint of Retaliation should be dismissed.

It Is Therefore Ordered That:

(1) The Motion for Summary Judgment filed by Sandia Corporation on August 12, 2011, Case No. TBZ-0110, is hereby granted as set forth in paragraph (2) below.

(2) The Complaint of Retaliation filed by Greta Kathy Congable against Sandia Corporation on September 14, 2010, is hereby dismissed.

(3) This is an Initial Agency Decision, which shall become a Final Decision of the Department of Energy unless a party files a notice of appeal by the fifteenth day after the party's receipt of the Initial Agency Decision, in accordance with 10 C.F.R. § 708.32.

Diane DeMoura
Hearing Officer
Office of Hearings and Appeals

Date:September 8, 2011

April 28, 2011

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Motion to Dismiss
Initial Agency Decision

Names of Petitioner:	Eugene N. Kilmer Los Alamos National Security, LLC
Dates of Filings:	March 1, 2010 March 24, 2011
Case Numbers:	TBH-0111 TBZ-0111

This Decision will consider a Motion to Dismiss filed by Los Alamos National Security, LLC (LANS), the Management and Operating Contractor for the Department of Energy's (DOE) Los Alamos National Laboratory (LANL), in connection with the pending Complaint of Retaliation filed by Eugene N. Kilmer against LANS under the DOE's Contractor Employee Protection Program and its governing regulations set forth at 10 C.F.R. Part 708. The Office of Hearings and Appeals (OHA) assigned the hearing component of Kilmer's Part 708 Complaint proceeding, Case No. TBH-0111, and LANS's Motion to Dismiss, Case No. TBZ-0111. For the reasons set forth below, I will grant LANS's Motion and dismiss Kilmer's Complaint.

I. Background

A. The DOE Contractor Employee Protection Program

The DOE's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent fraud, mismanagement, waste and abuse" at DOE's government-owned, contractor-operated facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purpose is to encourage contractor employees to disclose information which they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers.

The regulations governing the DOE's Contractor Employee Protection Program are set forth at Title 10, Part 708 of the Code of Federal Regulations. The regulations provide, in pertinent part, that a DOE contractor may not discharge or otherwise discriminate against any employee because that employee has disclosed, to a DOE official or to a DOE contractor, information that the employee reasonably believes reveals a substantial violation of a law, rule, or regulation; a substantial and specific danger to employees or to the public health or safety; or, fraud, gross mismanagement, gross waste of funds, or abuse of authority. *See* 10 C.F.R. § 708.5(a)(1)-(3). Available relief includes reinstatement, back pay, transfer preference, and such other relief as may be appropriate. *Id.* at § 708.36.

Employees of DOE contractors who believe they have been discriminated against in violation of the Part 708 regulations may file a whistleblower Complaint with the DOE and are entitled to an investigation by an investigator from the Office of Hearings and Appeals (OHA), an independent fact-finding and a hearing by an OHA Hearing Officer, and an opportunity for review of the Hearing Officer's Initial Agency Decision by the OHA Director. 10 C.F.R. §§ 708.21, 708.32.

B. Procedural History

Kilmer filed a Part 708 Complaint on September 17, 2010, with the Employee Concerns Program (ECP) at the National Nuclear Security Administration's Service Center (NNSA/SC) in Albuquerque, New Mexico. In his Complaint, Kilmer alleged that, over the period 2006 through 2010, he made protected disclosures and refused to engage in improper activities. As a result, the complainant alleges, he suffered harassment by his supervisors and ultimately was constructively discharged by LANS. LANS filed a response to the Part 708 Complaint on October 18, 2010, in which it contended that nothing "in the complaint describes or even suggests that Mr. Kilmer engaged in any actions that meet the requirements of" Part 708. Letter from Christine Chandler, Practice Group Leader, LANS, to Eva Glow Brownlow, ECP Manager, NNSA/SC. The ECP Manager transmitted the Complaint to OHA for an investigation, to be followed by a hearing, stating that LANS did not wish to pursue an informal resolution of the complaint.

On November 22, 2010, the OHA Director appointed an Investigator (OHA Investigator), who conducted an investigation into the allegations contained in Kilmer's Complaint. The OHA Investigator issued a Report of Investigation (ROI) on March 1, 2011. In the ROI, the OHA Investigator noted that the complainant alleged that his disclosures revealed violations of DOE standard STD 1073-2003 and LANL Procedures P1020 and P1020-2. The Investigator found it uncertain whether violation of a "standard" would constitute a violation of a "rule" for purposes of Part 708. ROI at 10 (citing *Rusin v, U.S. Dep't of Treasury*, 92 M.S.P.R. 298 (2002)). Assuming that it would for purposes of the report, the Investigator found that there remained a significant question as to whether the alleged disclosures sought to inform management officials that a standard was being broken, let alone that there was a "substantial" violation of a standard. *Id.* at 10-11. With regard to Kilmer's allegations that he refused to engage in certain activities, the Investigator found that, in the absence of additional evidence, the refusals alleged would not be protected under Part 708. *Id.* at 12.

Immediately after the Investigator issued his report, the OHA Director appointed me as Hearing Officer in this case. On March 14, 2010, I sent a letter to the parties and asked them to submit briefs addressing specific issues in the case. Kilmer submitted his brief on March 21, 2011. On March 23, 2011, LANS submitted its brief, in which it requested that the Complaint be dismissed. I then provided the parties an opportunity to submit replies to the briefs and the Motion to Dismiss. The complainant submitted replies on March 27 and 29, 2011, and LANS tendered its reply brief on April 1, 2011.

C. Factual Overview[1]

[1] This overview includes many facts set forth in the ROI, but does not restate the facts therein that are not relevant to the issues I address in ruling on the present Motion to Dismiss.

Kilmer, prior to resigning his position in September 2010, was employed by LANS as a mechanical designer. His first alleged protected activity occurred in 2006, when he told his manager that making certain changes to a drawing would violate applicable DOE standards. Kilmer was assigned to "W-11" (a work group at the Los Alamos facility) and was working on changes to a drawing, which then had to be reviewed by a "checker." Peggy Volz, the checker for this drawing, requested various additional changes. Kilmer refused, stating that the changes were not authorized. Ultimately, Kilmer's direct supervisor, Christopher Scully, Group Leader, W-11, directed Kilmer to make Volz's changes and Kilmer complied.

The complainant alleges that he made a second protected disclosure in 2007. Kilmer Interview at 1-2; Complaint at 3. Kilmer was assigned to develop training materials for a new software called "Windchill," a document management program that would store drawings and documents, as well as track changes to the documents. Scully instructed Kilmer to incorporate into the training materials the new design definition release procedures used by W-11. *Id*. The complainant alleges that he "protested the implementation of a new drawing release procedure that specified that document handlers routinely modify released documents without authorization." Brief attached to E-mail from Eugene Kilmer to Steven Goering, OHA (March 21, 2011) ("Complainant's Pre-Hearing Brief") at 3.

Kilmer asserts that he made another alleged protected disclosure in 2007 when he was working as a liaison between two separate LANS groups, "W-11" and "DX-1." Letter from Eugene Kilmer to Richard Cronin, OHA Investigator (November 27, 2010) at 1. The complainant states that, at a meeting, he pointed out to the group leader of DX-1, Daniel Montoya, that DX-1's current practice of storing drawings and configuration management information on an Excel spreadsheet, instead of using the Project Data Management computer system, was a dangerous practice, *id.* at 1, and that the DX-1/Excel system was "no good." Kilmer Interview at 2.

In 2008, Kilmer was tasked to make a drawing for a LANS department headed by William Bearden, which required approval by a checker, in this case Volz. Kilmer Interview at 3. Kilmer requested Volz's approval four or five times, but she rejected his approval requests and asked for changes. While Kilmer concedes that some of Volz's comments were valid, he viewed the process as taking too much time. *Id*. Kilmer released the drawing without Volz's changes, *id.*, and contends that doing so was an action protected under Part 708. Complainant's Pre-Hearing Brief at 3.

Kilmer alleges that he also made a protected disclosure in April 2010. Kilmer received a copy of a proposed document control procedures document from Jan Redding. Letter from Eugene Kilmer to Richard Cronin, OHA Investigator (November 27, 2010) at 2; Kilmer Interview at 4. Kilmer believed that the proposed procedures were poorly written and conceived, in part, because the procedures would allow unauthorized changes to a document and "violated basic configuration management precepts." Letter from Eugene Kilmer to Richard Cronin, OHA Investigator (November 27, 2010) at 2; Kilmer Interview at 4. Kilmer complained to Brandon Gabel and Manuel Garcia, Scully's deputy, in an attempt to stop implementation of the proposed procedures. Kilmer sent the entire Weapons Department an E-mail with a marked up version of the procedures. Kilmer Interview at 4.

In the summer of 2010, Kilmer was supporting the "W-7" group at LANL as a designer, documenting procedures, and producing drawings of gas transfer components. Kilmer Interview at 5. The complainant alleges that, in connection with this work, he told Scully in August 2010 that, "despite his directions, I would have to make some required changes to a drawing on which I was working." Complainant's Pre-Hearing Brief at 4. On August 25, 2010, when he arrived at his office,

Kilmer discovered that he had been removed from the Windchill system he was using for the drawing. Kilmer Interview at 6.

According to Kilmer, in a subsequent meeting that day, after learning that he was removed from the Windchill system because of the changes he had made to the drawing, Kilmer told Scully that his changes were necessary to avoid others making unauthorized changes to the document after its release. Kilmer also alleges telling Scully that W-11 practices such as stamping a "released" document with "Preliminary Version" or "Not for Use in Manufacturing" had been "obviated" by a product data management system like Windchill. Kilmer Interview at 7. Kilmer alleged that such practices would allow "anyone to change a document" with or without authorization. Kilmer Interview at 7. Kilmer further asserts that, during their August 25, 2010, meeting, he told Scully that he was going to inform Scully's superiors as to what was being done to "released" documents. Kilmer Interview at 7. According to Kilmer, Scully responded that he was free to speak to anyone he wanted. Kilmer Interview at 7.

After the meeting, Kilmer went to speak with John Benner, the Weapons Division Leader. Benner and Steve Renfro, the Weapons Division Deputy Leader, were in Renfro's office. Benner invited Kilmer inside Renfro's office and asked if he could do anything for Kilmer. Kilmer asked Benner, "Do you think it's right for a released drawing to be checked out and back in three more times with approximately 25 modifications being made to it along the way?" Kilmer Interview at 7.

D. LANS's Motion to Dismiss

In its pre-hearing brief, LANS argues that Kilmer's Complaint "fail[s] to meet the threshold requirements of Part 708," and requests that the Complaint be dismissed. Memorandum attached to E-mail from Ariel A. Ramirez to Steven Goering, OHA (March 23, 2011) ("Respondent's Pre-Hearing Brief") at 1, 2. More specifically, LANS contends that none of the actions described in Kilmer's Complaint are protected under Part 708. *Id.* at 7.[2]

The Part 708 regulations do not include procedures and standards governing motions to dismiss. In the absence of such standards, the Federal Rules of Civil Procedure, though not governing this proceeding, may be used for analogous support. *See, e.g., Billy Joe Baptist*, Case No. TBH-0080 (2009); *Edward J. Seawalt*, Case No. VBZ-0047 (2000) (applying standards of Fed. R. Civ. P. 56 to Motion for Summary Judgment).[3] The motion to dismiss filed by LANS in the present case is most analogous to what would, under the Federal Rules, be a motion to dismiss for "failure to state a claim upon which relief can be granted . . . ." Fed. R. Civ. P. 12(b)(6); s*ee Hansford F. Johnson*, Case No. TBZ-0104 (2010) (applying standards of Fed. R. Civ. P. 12(b)(6) to Motion to Dismiss).
The Supreme Court has held that, to survive a Rule 12(b)(6) motion, a Complaint must plead "only enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly*, 550 U.S. 544, 570 (2007). While the Complaint "does not need detailed factual allegations, . . . [f]actual allegations must be enough to raise a right to relief above the speculative level, on the assumption

[2] The Respondent's Pre-Hearing Brief also argues that Kilmer has not alleged actions that rise to the level of retaliation under the Part 708 regulations, *id.* at 7-10, but I do not address those arguments in this Decision, as I find below that the complainant has not made a plausible claim of conduct that is protected from retaliation under Part 708.

[3] Decisions issued by the OHA are available at http://www.oha.doe.gov. The text of a cited decision may be accessed by entering the case number of the decision in the search engine located at http://www.oha.doe.gov/search.htm.

that all of the Complaint's allegations are true (even if doubtful in fact), ..." *Id.* at 555 (citations omitted).

In addition, prior cases of this office instruct that such a motion should be granted only where there are clear and convincing grounds for dismissal, and no further purpose will be served by resolving disputed issues of fact on a more complete record. *Curtis Broaddus*, Case No. TBH-0030 (2006); *Henry T. Greene*, Case No. TBU-0010 (2003) (decision of OHA Director characterizing this standard as "well-settled"); *see also David K. Isham*, Case No. TBH-0046 (2007) (complaint may be dismissed where it fails to allege facts which, if established, would constitute a protected disclosure); *accord Ingram v. Dep't of the Army*, 114 M.S.P.R. 43, 47 (2010) (finding Merit Systems Protection Board jurisdiction under federal Whistleblower Protection Act where complaint makes non-frivolous allegation that he engaged in whistleblowing activity by making a protected disclosure, and the disclosure was a contributing factor in the agency's decision to take or fail to take a personnel action).

Applying the relevant standards, for the reasons explained below, I will dismiss the present Complaint. Even assuming that the relevant facts alleged by the complainant are true, those facts do not support a plausible claim for relief under Part 708.

II. Analysis

The Part 708 regulations provide that a contractor employee may file a complaint against his employer alleging that he has been subject to retaliation for:

> (a) Disclosing to a DOE official, a member of Congress, any other government official who has responsibility for the oversight of the conduct of operations at a DOE site, your employer, or any higher tier contractor, information that you reasonably believe reveals--
>
> > (1) A substantial violation of a law, rule, or regulation;
> >
> > (2) A substantial and specific danger to employees or to public health or safety; or
> >
> > (3) Fraud, gross mismanagement, gross waste of funds, or abuse of authority; or
>
> (b) Participating in a Congressional proceeding or an administrative proceeding conducted under this regulation; or
>
> (c) Subject to § 708.7 of this subpart, refusing to participate in an activity, policy, or practice if you believe participation would --
>
> > (1) Constitute a violation of a federal health or safety law; or
> >
> > (2) Cause you to have a reasonable fear of serious injury to yourself, other employees, or members of the public.

10 C.F.R. § 708.5. In directing the parties to brief certain issues in this case, I asked the complainant to identify which of the above provisions of section 708.5 he believed applies to each of his alleged

protected actions, and why. Letter from Steven Goering to Christine Chandler, Office of Laboratory Counsel, LANL, and Eugene Kilmer (March 14, 2011). In his brief, the complainant alleged that his actions were protected by sections 708.5(a)(1), (a)(3), and (c)(1). I address each section in turn below.

A. The Actions Alleged by the Complainant are Not Protected by Section 708.5(a)(1)

Section 708.5(a)(1) protects the disclosure of information that a complainant reasonably believes "reveals . . . a substantial violation of a law, rule, or regulation." In his Complaint, and in response to a request from the OHA Investigator for a concise lists of Kilmer's protected disclosures and why they are protected, the complainant references DOE standard STD 1073-2003 and LANL Procedures P1020 and P1020-2. Complaint at 1, 4; Letter from Eugene Kilmer to Richard Cronin, OHA Investigator (November 27, 2010). As noted above, the ROI questions whether violation of a "standard" would constitute a violation of a "rule" for purposes of Part 708. ROI at 10.

In a analogous case decided under the Whistleblower Protection Act (WPA), upon which Part 708 is modeled, the Merit Systems Protection Board addressed the question of whether certain agency documents constituted "rules" for purposes of the WPA. *Rusin v. U.S. Dep't of Treasury*, 92 M.S.P.R. 298, 305 (2002). The Board stated that resolution of this issue "cannot be based merely" on the titles of the documents in question, and that a "more substantive examination of these documents is required." *Id.*

One of the documents at issue in *Rusin*, a Procurement Instruction Memorandum (PIM), contained a "Don't Buy List" consisting of "17 sections, each entitled a 'rule,' which prohibited the purchase of various items." *Id.* The other, regarding the Government Commercial Credit Card Program (GCCCP) described "in detail the conditions and responsibilities governing the proper use of the government credit card, . . . and the criminal and civil penalties for improper use of the card." *Id.* Though not adopting a "a specific definition of a 'rule' here," *id.* at 306, the Board found that "the content and purpose of the PIM List and the GCCCP strongly support a finding that these documents were rules," within the meaning of the WPA. *Id.* at 305.

Though LANS does not cite *Rusin* in its pre-hearing brief, I find the analysis of the Board in that case lends support to LANS's contention that a "law, rule, or regulation equates to a requirement." Respondent's Pre-Hearing Brief at 2; *see Arun K. Dutta*, Case No. TBH-0088 (2009) (considering as within scope of section 708.5(a)(1) an internal company rule regarding when documents "shall be" rechecked and submitted for further review). Conversely, as in *Rusin*, these terms could equally equate to a prohibition of an action. Thus, it would certainly be more difficult to find that a document not containing mandatory language, either requiring (e.g., "shall") or prohibiting (e.g., "shall not") an action, is a "law, rule, or regulation" as those terms are used in 10 C.F.R. § 708.5.

1. As Applied to Activities at LANL, DOE Standard STD 1073-2003 is not a "Law, Rule, or Regulation" Under Section 708.5(a)(1)

With the above in mind, I note that STD 1073-2003 contains the following passage:

> The verbs "should," "may," and "must" are used throughout this standard. While our intent is that the purpose of this standard is to provide guidance, not requirements, some organizations may agree to have this standard included in the contract or in other commitments as a requirement. If this standard is listed as a requirement for a specific facility or activity or set of facilities or activities, the DOE contractor or other organization required to meet this standard must comply with all of the applicable provisions that include the word "must."

STD 1073-2003 at 1-5.

There is nothing in the record to support a finding that LANS, W division, or W-11, has ever agreed to have STD 1073-2003 "included in the contract or in other commitments as a requirement." *See also* E-mail from Christine Chandler, LANS, to Steven Goering (April 18, 2011) (forwarding e-mail from employee of LANL's contract office stating that there is "no record that the subject DOE STD has been in the LANS prime contract"). As such, I cannot find that DOE standard STD 1073-2003 is a "law, rule, or regulation" as those terms are used in Part 708, at least as applied to the parties in the present case.

2. LANL Procedures P1020 and P1020-2 Can Be Considered "Rules" Within the Scope of Section 708.5(a)(1)

LANL Procedures P1020 and P1020-2, in contrast to STD 1073-2003, appear to apply to all LANL organizations, P1020 stating that it "applies to all LANL employees and subcontractors," P1020 at 1, while the stated purpose of P1020-2 "is to provide Document Control Program (DCP) and implementation requirements to Laboratory organizations." P1020-2 at 1. LANS does not contend that these two policies do not apply to the employees of LANL's W Division, whose activities are the subject of the present complaint. Rather, LANS argues that the "LANL Procedures are broad, general procedures whose purpose is to impose institutional requirements. They are not legal requirements." Respondent's Pre-Hearing Brief at 3.

Though LANS does not explain what it believes would distinguish a mere "requirement" from a "legal requirement," or why that is relevant in this case, both P1020 and P1020-2 are replete with mandatory language. When asked by the OHA Investigator to identify the specific sections of these procedures that were allegedly violated, the complainant cited a number of examples of such language. He referenced a passage from P1020 providing that the "receipt or preparation, issue, and change of documents . . . must be controlled to assure that the most current documents are being used." P1020 at 2. In P1020-2, Kilmer highlighted statements that certain documents "must be placed under formal change control," P1020-2 at 1, and that organizations "must establish a process for preparing, reviewing, approving, distributing, using, and revising documents that specify requirements or prescribe activities important to the implementation and execution of work; and provide evidence of the acceptability of the items used or produced in the execution of work." *Id.* at 3. Based on their actual text, I find that at least these portions of both P1020 and P1020-2 can reasonably be considered "rules" for purposes of Part 708. *See Dutta, supra.*

3. The Complainant Did Not Disclose Information That He Could Have Reasonably Believed Revealed a Substantial Violation of P1020 or P1020-2

Having found that P1020 and P1020-2 can be considered "rules" under section 708.5(a)(1), I now must consider whether any of the alleged actions of the complainant constitute a disclosure of

information that he reasonably believed revealed a substantial violation of P1020 or P1020-2. Of the seven protected actions alleged by Kilmer, and described in section I.C above, the following five are alleged disclosures of violations of P1020 and P1020-2:[4]

> (1) In 2006, Kilmer contended, in response to the direction of Volz, that making changes to a drawing not listed on the Engineering Authorization constituted unauthorized changes to a document.
>
> (2) In 2007, Kilmer protested the implementation of drawing release procedures specifying that document handlers would make unauthorized changes to documents.
>
> (3) In April 2010, Kilmer criticized a proposed document control procedure.
>
> (4) In August 2010, Kilmer told Scully that, despite Scully's directions, he would have to make changes to a drawing that were necessary to avoid having to make unauthorized changes to documents.
>
> (5) Also in August 2010, Kilmer told Scully that he was going to inform Scully's superiors about unauthorized changes to documents, and in a subsequent meeting with Weapons Division Leader John Benner, Kilmer asked Benner whether he thought it was right for a released drawing to be checked out and back in three times during which approximately 25 modifications are made to the drawing.

Because a complainant's belief underlying an alleged protected disclosure must be held "reasonably" in order for the disclosure to be protected under section 708.5, I must consider the complainant's disclosures from the perspective of a disinterested person. *See Mark D. Siciliano*, Case No. TBH-0098 (2010) (finding disclosure not protected where not communicated in a way that a "disinterested person" would have construed complainant's comments as alleging an abuse of authority); *accord Heining v. General Serv. Admin.*, 116 M.S.P.R. 135, 143 (2011) ("proper test for determining whether an employee had a reasonable belief that his disclosures were protected is whether a disinterested observer with knowledge of the essential facts known to and readily ascertainable by the employee could reasonably conclude that the actions evidenced a violation of a law, rule, or regulation, . . .").

In the present case, for several reasons, I cannot find that a disinterested person would have construed that any of the complainant's five disclosures listed above revealed a substantial violation of P1020 or P1020-2.

First, in his original September 2010 Complaint, Kilmer describes the five disclosures at issue, but gives very little indication that he believed his disclosures revealed a violation of P1020 or P1020-2. In fact, the Complaint never mentions P1020, and refers to P1020-2 only once, in reference to the third disclosure listed above, Kilmer's criticism of a proposed document control procedure. Moreover, even as to that disclosure, his Complaint simply states *his present opinion* that the

[4] One of the remaining two alleged protected actions (in 2007) is identified by the complainant as a disclosure of information revealing a violation of STD 1073-2003. Complainant's Post-Hearing Brief at 3. I cannot find this disclosure to be protected, as I have found above that STD 1073-2003, as applied to the present case, is not a "law, rule, or regulation" as those terms are used in Part 708. The other remaining action, the release of a drawing in 2008, is not a disclosure and so is not addressed here, but I consider below whether it would be protected under other provisions of section 708.5.

proposed procedure violated P1020-2, not that he conveyed this opinion *at the time he criticized the procedure in April 2010*. Indeed, Kilmer's April 2010 e-mail criticizing the procedure neither states, nor implies, an opinion that the procedure violated any law, rule, or regulation. E-mail from Eugene Kilmer to "w-all@lanl.gov" (April 19, 2010) (submitted as attachment to Respondent's Pre-Hearing Brief).

Second, as noted above, in response to a request from the OHA Investigator for a concise lists of Kilmer's protected disclosures and why they are protected, the complainant references P1020 and P1020-2. Letter from Eugene Kilmer to Richard Cronin, OHA Investigator (November 27, 2010). However, he does so only in the context of stating his present opinion that certain practices violated P1020 and P1020-2. *Id.* at 1-2. He never states that he related this opinion contemporaneously with any of his alleged disclosures, or even that he held the opinion at the time of the disclosures. Neither do the notes of the OHA Investigator's interview with Kilmer, which were reviewed and edited by the complainant after the interview, describe disclosures that reference violations of P1020 or P1020-2. Kilmer Interview at 1-8. Finally, the complainant's Pre-Hearing Brief, similar to his earlier response to the OHA Investigator, again states his present opinion that "unauthorized document changes" violate P1020 and P1020-2, but does not allege that he expressed this opinion as part of any alleged disclosures. Complainant's Pre-Hearing Brief at 3-4.

Thus, based on the complainant's own description of his disclosures, I cannot find that a disinterested person could reasonably conclude that any of the Kilmer's five alleged disclosures listed above would have revealed a substantial violation of P1020 or P1020-2.[5]

Moreover, even if the individual had, with each of these alleged disclosures, explicitly stated that the practice with which he took issue violated a rule, I note that the substance of what he disclosed was not the practices themselves, but merely his opinion that those practices facilitated "unauthorized document changes."

Analyzing a similar issue under the WPA, the U.S. Court of Appeals for the Federal Circuit concluded that the term "disclose" means "to reveal something that was hidden and not known." *Huffman v. Office of Personnel Mgmt.*, 263 F.3d 1341, 1349-50 (Fed. Cir. 2001). The court also found it "quite significant that Congress in the WPA did not use a word with a broader connotation such as 'report' or 'state.'" *Id.* at 1350. Thus the court held that reporting to a wrongdoer that "there has been misconduct by the wrongdoer . . . is not making a 'disclosure' of misconduct. If the misconduct occurred, the wrongdoer necessarily knew of the conduct already because he is the one that engaged in the misconduct." *Id.*

In a footnote to the above text, the court adds a point that is directly relevant to the present case:

> To be sure, there may be situations where a government employee reports to the wrongdoer that the conduct of the wrongdoer is unlawful or improper, and the wrongdoer, though aware of the conduct, was unaware that it was unlawful or

[5] On March 29, 2011, Kilmer sent me an email stating that he had "researched and attached several more requirements documents describing LANL's responsibilities in the functional areas of document change control and configuration management." Email from Eugene Kilmer to Steven Goering (March 29, 2011). However, the relevant question here must be the reasonableness of the complainant's belief *at the time he alleges to have disclosed information*. If the complainant had no reasonable basis for believing that there was violation of a rule at the time of his disclosure, he certainly cannot remedy that by finding a basis for his belief after the fact.

> improper. Nonetheless, the report would not be a protected disclosure. It is clear from the statute, 5 U.S.C. § 2302(b)(8)(A), that the disclosure must pertain to the underlying conduct, rather than to the asserted fact of its unlawfulness or impropriety, in order for the disclosure to be protected by the WPA.

Id. n.2.

In the present case, for example, the complainant criticized W Division's Design Definition Release Process, W-11-SE-0003U (formerly W-SE-0014). This process became effective on February 14, 2007, states that it applies to all employees within W Division, and bears written initials indicating approval of the process by both Group Leader Scully and Weapons Division Leader Benner. The complainant identifies certain steps in this process, as set forth in the document, and states that "[i]n order to comply with this procedure, all designers have been granted the administrative privileges required to bypass the product data management's built in prohibition against allowing released documents to be modified." Complainant's Pre-Hearing Brief at 2-3.

Thus, what the complainant's disclosures amount to is pointing to established procedures of W Division (in the case of the second, fourth, and fifth disclosures listed above), or proposed procedures (in the case of the third disclosure), and registering his disagreement with those procedures.[6] For the same reasons noted by the court in *Huffman,* even if the complainant had couched his disagreement by stating that the procedures violated a law, rule, or regulation, the mere expression of this opinion would not be a "disclosure" under Part 708.

In sum, as I discuss above, I find that STD 1073-2003 is not, as to LANL, a "law, rule, or regulation" as those terms are used in Part 708, and that the complainant did not disclose information that he could have reasonably believed revealed a substantial violation of LANL Procedures P1020 or P1020-2. I therefore conclude that the actions alleged by the complainant are not protected under section 708.5(a)(1).

B. The Actions Alleged by the Complainant are Not Protected by Section 708.5(a)(3)

Section 708.5(a)(3) protects the disclosure of information that a complainant reasonably believes "reveals . . . fraud, gross mismanagement, gross waste of funds, or abuse of authority." In his Pre-Hearing Brief, responding to my request that he identify the specific provisions of 10 C.F.R. § 708.5 that apply to his alleged protected actions, the complainant, for the first time, uses the words "fraud" and "gross mismanagement" to describe the practices of his former employer, and contends that his disclosures were therefore protected under section 708.5(a)(3). Complainant's Pre-Hearing Brief at 1-3.

---

[6] The first disclosure listed above related to making changes to a drawing "not listed on the Engineering Authorization . . . ." Complainant's Pre-Hearing Brief at 3. In his interview with the OHA Investigator, Christopher Scully explained that changes not listed on an Engineering Authorization, such as a Advanced Change Order (ACO), could be made and then documented by issuing a revised ACO or by incorporating those changes into the Final Changes Order by which the ACO is closed. Scully stated that it was routine for designers in his group (W-11) to work with engineers to properly document such changes in a revised ACO or FCO. Scully Interview at 1-2. Clearly, the complainant disagreed with this procedure, and Scully appears to confirm that the complainant felt that the procedure violated certain standards, but registering a disagreement with a procedure is not the same as making a disclosure.

First, as for the recently raised allegations of fraud, LANS argues in reply to Kilmer's Pre-Hearing Brief that "[f]raud is generally described as an act of deceit. In none of Kilmer's papers does he articulate facts with sufficient specificity to conclude that he was alleging fraudulent acts." Memorandum attached to E-mail from Christine Chandler to Steven Goering (March 23, 2011) ("Respondent's Pre-Hearing Reply Brief") at 2.

I agree. The complainant alleges that his disclosures revealed "fraud in the sense that the American public relies heavily upon LANL and the other Nuclear Complex laboratories to exercise due diligence . . . ." Complainant's Pre-Hearing Brief at 1. While Part 708 does not contain a specific definition of "fraud," what Kilmer is alleging is clearly not "fraud" as that term is generally understood in the law. *See Black's Law Dictionary* (9th ed. 2009) (defining "fraud" as a **"**knowing misrepresentation of the truth or concealment of a material fact to induce another to act to his or her detriment").

Neither do the actions alleged by the complainant rise to the level of "gross mismanagement." In his pre-hearing brief, Kilmer states that it "only follows that violating" STD-1073-2003, P1020, or P1020-2, constitutes gross mismanagement. Complainant's Pre-Hearing Brief at 1. More specifically, he claims that W division officials engaged in gross mismanagement both by intentionally directing employees to "make unauthorized changes to released documents," *id.* at 2, and by adopting procedures that "open the door to accidental and unaccountable modifications to these documents." *Id.* at 3.

I have already found, above, no evidence that STD-1073-2003 imposes binding requirements on LANL, and that the complainant did not disclose information that he could have reasonably believed revealed a substantial violation of LANL Procedures P1020 or P1020-2. Thus, even if I were to agree that any violation of the standard and procedures would necessarily equate to gross mismanagement, which I do not, I would not find based on this alone that Kilmer disclosed information that he reasonably believed revealed gross mismanagement.

More importantly, mere differences of opinion between an employee and his supervisors as to the proper approach to a particular problem or the most appropriate course of action do not rise to the level of gross mismanagement. *See White v. Dept. of the Air Force*, 391 F.3d 1377 (Fed. Cir. 2004). The Deputy Secretary of Energy in *Mehta v. Universities Ass'n*, 24 DOE ¶ 87,514 (1995) held that:

> Equating a particular type of disagreement to "mismanagement" as contemplated by the "whistleblower" regulations demands a careful balancing lest the term encompass all disagreements between a contractor and its employees . . .[t]here must be some assessment as to whether the nature of the disagreement evidences the type of disclosure of mismanagement that the regulation was designed to protect, at the same time granting appropriate deference to traditional management prerogatives needed to conduct an organization through teamwork.

Id. at 89,065.[7] OHA has followed the Deputy Secretary's holding in other cases. *See Siciliano, supra; Ronny J. Escamilla*, Case No. VWA-0012 (1997).

[7] Significantly, the Deputy Secretary's opinion in *Mehta* "was decided under an earlier version of the Part 708 regulations, one that allowed disclosures of mere mismanagement, as opposed to gross mismanagement, to proceed under Part 708." *Siciliano, supra.*

Indeed, prior OHA decisions have found that gross mismanagement is

> more than de minimis wrongdoing or negligence. It does not include management decisions that are merely debatable, nor does it mean action or inaction which constitutes simple negligence or wrongdoing. There must be an element of blatancy. Therefore, gross mismanagement means a management action or inaction that creates a substantial risk of significant adverse impact upon the agency's ability to accomplish its mission.

Fred B. Hua, Case No. TBU-0078 (2008) (quoting *Roger Hardwick*, Case No. VBA-0032, 27 DOE ¶ 87,539 (1999)); *see also Carolyn v. Dep't of the Interior*, 63 M.S.P.R. 684 (1994).

By this standard, the complainant's disclosures in this case, as he describes them, and as they are documented contemporaneously in the record, do not reveal gross mismanagement. There *are* allegations of management directing "unauthorized changes" to documents, though this seems internally contradictory since, by directing certain changes to documents or adopting procedures that allow changes, management has in fact authorized those changes. In essence, what Kilmer appears to object to is a system that allows changes to be made without what he sees as sufficient oversight or accountability.

Somewhat ironically, in offering an example of the system's failings in his pre-hearing brief, Kilmer undermines his own argument. He cites the "official record" as showing that a particular document was modified three times after being "released" and that the record shows the name of the person who made the modification. Complainant's Pre-Hearing Brief at 1-2. What the complainant allegedly revealed, then, is a tracking system that, despite its alleged shortcomings, allowed Kilmer to determine how many times a document had been modified, and by whom, with Kilmer's only real complaint being that "only way to determine what" changes were made "is to examine all four released versions of this document and carefully compare them." *Id.* at 2.

Assuming the truth of the complainant's allegations, one can see where there might be legitimate debate as to how changes to documents are authorized or what checks must be in place to monitor changes after they are made. But viewed from the perspective of a disinterested person, the complainant has not alleged "a management action or inaction that creates a substantial risk of significant adverse impact upon the agency's ability to accomplish its mission."

It is true that, in one of his contemporaneously documented disclosures, Kilmer criticized a proposed document control procedure in April 2010, and in so doing stated that misuse of the Windchill product data management system "very well may bring disastrous consequences for the laboratory as a whole." E-mail from Eugene Kilmer to "w-all@lanl.gov" (April 19, 2010). And in 2007, the complainant alleges that he "pointed out to DX-1 management" that a certain practice was "dangerous." Complainant's Pre-Hearing Brief at 4. However, in addition to not specifying what those consequences or that danger may have been, the complainant's disclosures did not reveal any actual mismanagement. The only thing being revealed is Kilmer's opinion on procedures being openly discussed, and for reasons stated in the previous section of this Decision, simply expressing an opinion without revealing any underlying conduct does not qualify as a disclosure under section 708.5. *See Huffman, supra* at n.2.

As I cannot find that the complainant disclosed information that he could have reasonably believed revealed either fraud or gross mismanagement,[8] the disclosures alleged by the complainant are not protected under section 708.5(a)(3).

C. The Actions Alleged by the Complainant are Not Protected by Section 708.5(c)(1)

Section 708.5(c)(1) protects from retaliation the refusal to "participate in an activity, policy, or practice if you believe participation would [c]onstitute a violation of a federal health or safety law; . . . ." The complainant cites this section for the first time in his pre-hearing brief, and does so without specifying to which of his actions he believes it applies. Complainant's Pre-Hearing Brief at 3-4. Of the protected actions specified by Kilmer, the only one that could conceivably be construed as such a refusal is his February 2008 release of a drawing without making changes as directed by Peggy Volz, which he alleges was necessary to avoid "having to modify a released drawing without authorization as specified in Mr. Scully's new drawing release procedure." *Id.* at 4. Aside from the fact that this stretches the common understanding of the term "refusal," the individual has made no specific allegation as to what federal health or safety law would be violated by the "unauthorized" modification of a drawing. In short, there is no action alleged by the complainant that I could find would be protected by section 708.5(c)(1).

III. Conclusion

I have found above that, even assuming the truth of the complainant's allegations as to the relevant facts of this case, those allegations do not support a plausible claim that Kilmer disclosed information that he reasonably believed revealed fraud, gross mismanagement, or a substantial violation of a law, rule or regulation. Nor do the allegations support a plausible claim that he refused to participate in an activity, policy, or practice, which participation he believed would constitute a violation of a federal health or safety law. For these reasons, I will grant the Motion to Dismiss.

It Is Therefore Ordered That:

(1) The Motion to Dismiss filed by Los Alamos National Security, LLC, on March 24, 2011, Case No. TBZ-0111, be and hereby is granted as set forth in paragraph (2) below, and denied in all other respects.

(2) The Complaint filed by Eugene N. Kilmer against Los Alamos National Security, LLC on September 17, 2010, Case No. TBH-0111, be and hereby is dismissed.

[8] In his Pre-Hearing Brief, the complainant alleges that he has "eyewitness evidence" of gross mismanagement occurring on March 2, 2011, and has a "witness to the consequences" of that mismanagement. Here and elsewhere in his statements, Kilmer does not appear to appreciate the fact that the purpose of this proceeding is not to investigate the substance of his allegations, but rather to determine whether prior disclosures he allegedly made are protected under Part 708 and, if so, whether he experienced retaliation as a result. The complainant's current allegations of gross mismanagement are clearly not relevant to that purpose.

(3) This is an Initial Agency Decision that becomes the final decision of the Department of Energy unless a party files a notice of appeal by the 15th day after receipt of the decision in accordance with 10 C.F.R. § 708.32.

Re: Case No. TBH-0116
Suzanne Rhodes v. NSTec

Dear Ms. Ayers and Mr. Kamer:

On February 8, 2012, I received email messages from both of you informing me that Ms. Rhodes and NSTec have settled the above captioned Part 708 complaint, and have requested that the hearing in this matter be cancelled and the underlying Complaint of retaliation be dismissed. Accordingly, I hereby cancel the hearing scheduled to begin on February 20, 2012, and I hereby dismiss Ms. Rhodes pending Complaint of Retaliation currently assigned Office of Hearings and Appeals Case No. TBH-0116.

If you have any questions regarding the above, you may contact me at (202) 287-1490, fax number (202) 287-1415, or steven.fine@hq.doe.gov.

Sincerely,

Steven L. Fine

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Motion for Reconsideration

Name of Case: Ricky Ladd

Date of Filing: February 7, 2011

Case Number: TBR-0112

In a letter dated January 18, 2011, the Office of Hearings and Appeals (OHA) of the Department of Energy (DOE) dismissed the appeal of Ricky Ladd (hereinafter Mr. Ladd or the complainant) from the dismissal of his complaint of retaliation and request for investigation filed under 10 C.F.R. Part 708, the DOE Contractor Employee Protection Program (Case No. TBU-0112). After reconsidering Mr. Ladd's appeal in light of additional arguments and information provided by Mr. Ladd, we find that our January 18, 2011, dismissal was appropriate, and that the additional information provided by Mr. Ladd does not provide a basis for reversing that determination.

I. Background

A. Mr. Ladd's Part 708 Complaint

Mr. Ladd states that during the period June 2005 until May 2010, he was an employee of Uranium Disposition Services (UDS), which is a DOE contractor located at the DOE's Portsmouth/Paducah Project Office (PPPO) of the Paducah Gaseous Diffusion Plant in Paducah, Kentucky. In June 2010, Mr. Ladd filed a complaint of retaliation under Part 708 (the Part 708 Complaint) with the Whistleblower Program Manager of the DOE's National Nuclear Security Service Center (the WP Manager). In August 2010, the WP Manager provided Mr. Ladd's Part 708 Complaint to the Employee Concerns Manager of the DOE's Portsmouth/Paducah Project Office (the PPPO EC Manager) for review and processing. In his Part 708 Complaint, Mr. Ladd alleges that due to his protected disclosures to the DOE's Office of Inspector General (the DOE OIG) in October 2009, his employment at UDS was terminated in May 2010. Mr. Ladd seeks reinstatement to his former position at UDS, and relief for the expenses that he incurred as a result of his termination. Ladd Part 708 Complaint at 1-2.

B. The PPPO EC Manager's Determination and Mr. Ladd's Appeal

On December 8, 2010, the PPPO EC Manager informed Mr. Ladd that DOE was dismissing his Part 708 Complaint because it was "frivolous". Specifically, the PPPO EC Manager found that

Mr. Ladd's May 6, 2010, termination by UDS was based on his alleged misconduct on April 28, 2010, and not on Mr. Ladd's communication of alleged concerns to the DOE OIG in October 2009.

In a submission received by the OHA on December 20, 2010, Mr. Ladd appealed the PPPO EC Manager's determination dismissing his Part 708 Complaint. In his Appeal, Mr. Ladd argued that UDS was aware of his October 2009 disclosures to the DOE OIG concerning an alleged gross waste of funds by UDS arising from its practice of offering substantial amounts of overtime pay to some of its employees. He further contended that this knowledge by UDS was a contributing factor to his May 6, 2010, termination.

C. The OHA's Dismissal of Mr. Ladd's Appeal

On the basis of information contained in Mr. Ladd's Appeal, the OHA concluded that it would be inappropriate for it to conduct an analysis of the substance of the PPPO EC Manager's findings and the contentions made by Mr. Ladd in his Appeal. With his Appeal, Mr. Ladd provided a copy of a November 30, 2010, Order of Region 26 of the National Labor Relations Board (NLRB), which indicates that in August 2010, Mr. Ladd filed charges with the NLRB concerning alleged misconduct by both UDS and his union. This Order consolidates these charges and establishes a hearing date of February 22, 2011. In his Appeal, Mr. Ladd acknowledged that the charges made to the NLRB involve the same facts as his Complaint of Retaliation. Appeal at 4.

In its January 18, 2011, letter to Mr. Ladd, the OHA concluded that Mr. Ladd's action before the NLRB Region 26 barred the DOE from considering his Part 708 Complaint. In this regard, the OHA found that 10 C.F.R. § 708.15(d) provides that if a complainant files a complaint under State or other applicable law after filing a complaint under Part 708, the Part 708 complaint will be dismissed under § 708.17(c)(3). Accordingly, the OHA dismissed Mr. Ladd's Appeal of the PPPO EC Manager's December 8, 2010, dismissal of his Part 708 Complaint.

II. Mr. Ladd's February 2011 Submission and OHA's Reconsideration

On February 4, 2011, the OHA received a submission from Mr. Ladd requesting that the Secretary of Energy review the decision by the OHA to dismiss his Part 708 Appeal. Because the OHA had dismissed the Appeal by letter based on lack of jurisdiction, the OHA has chosen to issue the instant decision and order providing a procedural and substantive history of the DOE's processing of Mr. Ladd's Part 708 Complaint and considering additional arguments made by Mr. Ladd in his February 2011 submission. The OHA therefore has treated Mr. Ladd's submission as a Motion for Reconsideration.[1]

[1] The DOE Part 708 regulations do not explicitly provide for reconsideration by OHA of its determination concerning an appeal from the jurisdictional dismissal of a Part 708 Complaint. *See* 10 C.F.R. § 708.18. However, in other appeal proceedings, we have used our discretion to

In his Motion for Reconsideration, Mr. Ladd first contends that because the PPPO EC Manager knew of his NLRB action against UDS but did not raise it as a bar to the processing of his Part 708 Complaint, the OHA has no authority to raise the issue of his NLRB action in the context of his jurisdictional appeal of the PPPO Manager's dismissal of his Part 708 Complaint on other grounds. He concludes that the OHA acted outside of its "authority in the appeal process outlined in CFR 708" when it dismissed his jurisdictional appeal due to his NLRB action. Motion for Reconsideration at 1.

We reject this argument. The provisions of Part 708 provide that anyone who pursues a remedy on the same facts under State or other applicable law, "may not file a complaint under this part". 10 C.F.R. § 708.15(a). They further provide that if anyone files a Part 708 complaint and then files a complaint under State or other applicable law on the same facts, their Part 708 complaint "will be dismissed". 10 C.F.R. § 708.15(d). Thus, Section 708.15 of the regulations clearly bars anyone who is pursuing an action in another forum from simultaneously pursuing one on the same facts under Part 708. *See Charles Montano*, Case No. TBU-0067 (2007). While it appears that the PPPO EC Manager was aware of Mr. Ladd's NLRB action and overlooked this ground for dismissing Mr. Ladd's Part 708 Complaint, her oversight has no effect on the requirements of 10 C.F.R. § 708.15. It is not outside of OHA's authority to take the action necessary to enforce this requirement of Part 708 and dismiss Mr. Ladd's appeal. Indeed, in light of Mr. Ladd's NLRB action, it would have been outside of the OHA's authority to consider the merits of Mr. Ladd's appeal from the PPPO EC Manager's findings on the merits of his Part 708 Complaint.

Mr. Ladd also contends that the DOE should provide him with relief under Part 708 despite his NLRB action because the DOE's failure to protect his rights as a contractor employee forced him to go to the NLRB. He states that on June 16, 2010, he e-mailed the PPPO EC Manager, complained that he had been terminated by UDS without "due process", and asked her to inform him of his rights as a terminated employee under the DOE's Employee Concerns Program. In her July 13, 2010, response, the PPPO EC Manager stated that her review of the matter led her to conclude that he had been afforded an opportunity to make a statement to the DOE about his termination, that he had been terminated for cause by UDS, and that "the DOE inquiry into this matter is closed." July 13, 2010, e-mail from the PPPO EC Manager to Mr. Ladd. Mr. Ladd also contends that the PPPO EC Manager's December 2010 dismissal of his Part 708 Complaint on the grounds that it was "frivolous" is further evidence of the PPPO's failure to protect DOE contractor employees through the Employee Concerns Program and Part 708, and that this failure forced him to go to the NLRB to get the issues surrounding his termination properly investigated. He therefore requests that the DOE order UDS to make him whole within the provisions of Part 708. Motion for Reconsideration at 4.

---

issue decisions reconsidering our holdings where circumstances warrant. *See, e.g., Citizen Action New Mexico,* Case No. TFA-0215 (2007).

We find no merit in these contentions. Even if the DOE had the authority to waive the bar created by Mr. Ladd's NLRB action under 10 C.F.R. § 708.15, there is no basis for his assertion that he was forced to pursue the NLRB action by the DOE's alleged failure to protect his rights. Whatever deficiencies may have occurred in the response of the PPPO EC Manager to Mr. Ladd's initial inquiries, Mr. Ladd acknowledges in his Appeal submission that he was able to solicit advice and assistance from another DOE employee concerns official, and to submit a timely Part 708 complaint with the WP Manager in June 2010. Mr. Ladd's December 12, 2010, Appeal at 1. Mr. Ladd filed his action with NLRB Region 26 in August 2010, months before the PPPO EC Manager's dismissal of his Part 708 Complaint. Had Mr. Ladd not filed with the NLRB, he could have appealed the PPPO EC Manager's dismissal to the OHA for a full review on the merits. We therefore see no equitable basis for the DOE to provide Mr. Ladd with Part 708 relief despite his decision to pursue an action with the NLRB.

We therefore find that the additional arguments presented by Mr. Ladd lack merit, and our January 18, 2011, dismissal of his Appeal of the PPPO EC Manager's dismissal of his Part 708 Complaint was appropriate.

IT IS THEREFORE ORDERED THAT:

(1) The Motion for Reconsideration (Case No. TBR-0112) of our dismissal of the Appeal filed by Ricky Ladd (Case No. TBU-0112) is hereby denied.

(2) This decision is the final decision of the Department of Energy unless, by the 30th day after receiving the appeal decision, a party files a petition for Secretarial review.

Office of Hearings and Appeals

Date: March 8, 2011

November 7, 2002
DECISION AND ORDER
OF THE DEPARTMENT OF ENERGY

Decision of the Director

Name of Petitioner: Mark J. Chugg

Date of Filing: October 9, 2002

Case Number: TBU-0002

Mark J. Chugg, a former employee of Bechtel BWXT Idaho (BWXT), a Department of Energy (DOE) contractor, appeals the dismissal of his whistleblower complaint filed under 10 C.F.R. Part 708, the DOE Contractor Employee Protection Program. BWXT is the Management and Operating contractor for the Department of Energy at the Idaho National Engineering and Environmental Laboratory (INEEL). On September 30, 2002, the Employee Concerns Program Manager at the DOE's Idaho Operations Office (DOE/ID) dismissed Mr. Chugg's complaint. As explained below, I reverse the dismissal of the subject complaint, and remand the matter to DOE/ID for further processing.

I. Background

The DOE's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste and abuse" at DOE's government-owned, contractor-operated facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purposes are to encourage contractor employees to disclose information which they believe exhibits unsafe, illegal, fraudulent, or wasteful practices, and to protect those "whistleblowers" from consequential reprisals by their employers. The regulations governing the DOE's Contractor Employee Protection Program are set forth at Title 10 Part 708 of the Code of Federal Regulations.

Under Part 708, the DOE office initially receiving a complaint may dismiss the complaint for lack of jurisdiction or other good cause. 10 C.F.R. § 708.17. The complainant may appeal such a dismissal to the OHA Director. 10 C.F.R. § 708.18.

Mr. Chugg was employed as a Senior Business Operations Specialist at INEEL. After being terminated by BWXT in August 2002, Mr. Chugg filed a Part 708 complaint with DOE/ID, alleging

that he was fired in retaliation for, among other things, reporting to the DOE alleged ethical violations by a BWXT official.*

On September 30, 2002, the Employee Concerns Program Manager at DOE/ID dismissed the complaint. Letter from Paul Allen, Employee Concerns Program Manager, DOE/ID, to Mark J. Chugg (September 30, 2002). The dismissal letter states, in pertinent part:

> Specifically, your complaint does not indicate that you were retaliated against (per 10 CFR Part 708.5) for any of the following:
>
> (a) Disclosing to a DOE official, a member of Congress, any other government official who has responsibility for the oversight of the conduct of operations at a DOE site, your employer, or any higher tier contractor, information that you reasonably believe reveals-
>
> (1) A substantial violation of a law, rule, or regulation;
> (2) A substantial and specific danger to employees or to public health or safety; or
> (3) Fraud, gross mismanagement, gross waste of funds, or abuse of authority; or
>
> (b) Participating in a Congressional proceeding or an administrative proceeding conducted under this regulation; or
>
> (c) Subject to § 708.7 of this subpart, refusing to participate in an activity, policy, or practice if you believe participation would --
>
> (1) Constitute a violation of a federal health or safety law; or
> (2) Cause you to have a reasonable fear of serious injury to yourself, other employees, or members of the public.
>
> This is not to say that there are none of the above elements scattered among your case history. For instance, we are aware that in previous complaints (since settled) that you have reported what you believed to be violations of laws, rules, and regulations; that you have previously reported Dennis Patterson for ethics violations to a DOE official; and you have alleged abuse of authority. However, the record does not appear to support the supposition that your termination was based on any of the above criteria, but rather based on internal management decisions due to your actions and relationships with other employees, as well as misuse of company systems, and

*In 2001, Mr. Chugg filed a Part 708 complaint that was investigated by this office. After a report of investigation was issued in that case (OHA Case No. VBI-0074), Mr. Chugg and BWXT reached a settlement agreement, and we dismissed the complaint on October 24, 2001.

> not being truthful during the course of the investigation. The decision to terminate you was not made by any of the individuals you have previously reported, and thus it is difficult to draw a conclusion of retaliation. Furthermore, the theories you postulate to implicate your co-workers in a conspiracy against you are extremely unlikely. In as much as your employer is able to demonstrate reasonable cause for your termination unrelated to retaliatory motives, we are obligated to dismiss this complaint.

Id. at 1-2.

II. Analysis

DOE-ID's dismissal letter appears to concede that Mr. Chugg engaged in protected activity, but concludes that the claim of retaliation lacks merit. This determination is premature. It reaches an issue that is at the heart of this case and ends the entire proceeding. The complainant's contention that he was terminated because of his protected activity deserves closer examination, and is still in dispute. In fact, this is the very type of issue that the OHA is charged with investigating under Section 708.22 and considering through the hearing process described at Section 708.28.

A DOE Office may not dismiss a case by reaching this type of substantive determination under the provisions of Section 708.17, unless the facts do not present issues for which relief can be granted under Part 708, or the complaint is frivolous or without merit on its face. 10 C.F.R. § 708.17(c)(2), (4). DOE/ID failed to comply with these provisions by applying an incorrect standard for dismissal not consistent with the Part 708 regulations. It stated, "In as much as your employer is able to demonstrate reasonable cause for your termination unrelated to retaliatory motives, we are obligated to dismiss this complaint." Letter from Paul Allen, Employee Concerns Program Manager, DOE/ID, to Mark J. Chugg (September 30, 2002) at 2. However, an evaluation of whether Mr. Chugg was dismissed for cause should not be made at this stage. 10 C.F.R. § 708.17(c)(2), (4). I find that the claims raised here present issues for which relief can be granted (e.g., reinstatement of Mr. Chugg) and which are not frivolous or without merit on their face. Accordingly, I find that this determination by the DOE/ID was incorrect. Daryl J. Shadel, 27 DOE ¶ 87,561 (2000).

III. Conclusion

As indicated by the foregoing, I find that the DOE Office incorrectly dismissed the complaint filed by Mark J. Chugg. Accordingly, the complaint should be accepted for further consideration.

It Is Therefore Ordered That:

The Appeal filed by Mark J. Chugg (Case No. TBU-0002) is hereby granted and his Part 708 complaint is hereby remanded to the DOE Idaho Operations Office for further processing as set forth at 10 C.F.R. § 708.21.

George B. Breznay
Director
Office of Hearings and Appeals

Date: November 7, 2002

June 19, 2003
DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Appeal

Name of Case: **Gary Vander Boegh**

Date of Filing: **May 27, 2003**

Case Number: **TBU-0007**

Gary Vander Boegh (the Complainant), an employee of WESKEM LLC (WESKEM), appeals the dismissal of his complaint of retaliation filed under 10 C.F.R. Part 708, the Department of Energy (DOE) Contractor Employee Protection Program. WESKEM is a subcontractor of Bechtel Jacobs Company LLC (BJC), the management and integration contractor for the C-746-U Landfill at the DOE's Paducah Gaseous Diffusion Plant located in Paducah, Kentucky. On April 21, 2003, the Manager of Diversity Programs and Employee Concerns (Manager) at the DOE Oak Ridge Operations Office (DOE/OR) dismissed the Vander Boegh complaint. As explained below, I reverse the dismissal of the complaint and remand the matter to the Manager for further processing.

The Complainant is a landfill manager at the C-746-U landfill operated by WESKEM. During the past year he has participated in a proceeding under Part 708. Office of Hearings and Appeals (OHA) Case Nos. TBI-0007; TBH-0007. In that proceeding, the Complainant alleged that he warned WESKEM and BJC about excessive accumulations of leachate in the storage tanks at the landfill that had reached and surpassed the maximum reserve capacities required by the state operating permit. The Complainant contended that these warnings constituted protected disclosures under Part 708. The Complainant further alleged that WESKEM had taken a number of retaliatory actions against him, including issuing a disciplinary memorandum, and reducing his compensation. Pursuant to 10 C.F.R. § 708.25, an OHA Hearing Officer conducted a hearing on this matter. The Hearing Officer has not yet issued an initial agency decision regarding that Vander Boegh complaint.

On March 19, 2003, the Complainant filed a second complaint of retaliation with the DOE/OR employee concerns office. This complaint alleged some additional protected disclosures and

continuing adverse actions by WESKEM, including coercion, intimidation, threats, and negative actions with respect to the terms and conditions of his employment. On April 21, 2003, the Manager dismissed the complaint for lack of jurisdiction. 10 C.F.R. § 708.17(c)(2). He stated as the basis for this finding that the facts as alleged in the complaint did not present issues for which relief can be granted, and the complaint appeared without merit on its face. On May 27, 2003, Vander Boegh filed an appeal of that dismissal with the Office of Hearings and Appeals. 10 C.F.R. § 708.18.

Before turning to the merits of this case, I must address a procedural issue. In reviewing the appeal, I found that the Notice of Appeal was filed via FAX one day late, on May 27. 10 C.F.R. §708.18(a). Since the one day delay is not at all significant here, I see no reason to give it any further consideration, and will proceed with a substantive review of this case. 1/

After reviewing the facts in this case, I do not agree that dismissal is appropriate. I do not think that the complaint appears without merit on its face. As an initial matter, I note that since Vander Boegh has filed this complaint during the pendency of the earlier Part 708 proceeding described above, he has participated in a protected activity under Part 708, and is continuing to do so. WESKEM is precluded from retaliating against him for that activity.

I reviewed the retaliations claimed by Vander Boegh. Although the retaliations were far from well delineated, he did allege in a general way that he had been subjected to threats, coercion and intimidation by his employer. He claimed that WESKEM had adversely affected the terms of his employment as a landfill manager. I was inclined to agree with the Manager's implicit conclusion that Vander Boegh's stated retaliations were vague. However, I did not believe that the complaint as a whole lacked any sign of merit, or

---

1/ The Complainant's attorney points out that in addition to the FAXed filing, on May 21 he mailed a Notice of Appeal through the U.S. mail. Mail sent to OHA via the U.S. Postal Service is being sanitized, which has caused some delay in delivery of our mail. Therefore, OHA did not receive that mailed notice until more than two weeks later, on June 6. The attorney states that he was not aware of the sanitization process and the delay it could cause. This is a reasonable explanation.

that there was no set of circumstances under which relief could be granted. Accordingly, OHA asked Vander Boegh to supplement his complaint by explaining the retaliations with greater specificity. In his reply, he mentioned as retaliations the removal of his responsibilities for two landfills. One of these removals allegedly took place after the hearing noted above, and thus could be construed as a new retaliation for participating in a protected proceeding. Vander Boegh cited as a remedy the restoration of those responsibilities. He also cited as a retaliation a negative performance evaluation that he received after the hearing. The remedy for this action would be appropriate changes to the evaluation. Thus, overall, there is now clearly sufficient substantive information in the record in this case to warrant further processing. I will therefore remand the matter to the Manager for that purpose.

During that additional processing, the Manager should give further consideration to some important procedural aspects of this case. After close review of the file here, I noted some procedural deficiencies that should be corrected as part of this remand. Section 708.12 specifies what information an employee must include in his complaint of retaliation. In addition to a description of the events giving rise to the complaint, the employee must make the following assertions: state that he is not currently pursuing a remedy under State or other applicable law; state that all of the facts included in the complaint are true and correct to the best of the complainant's knowledge and belief; and affirm that the complainant has completed all applicable grievance or arbitration procedures. 10 C.F.R. § 708.12(b), (c), and (d). In this case, the complaint does not set forth any of these statements for the record. Accordingly, the Manager should make sure to complete and correct the record in this case.

In reviewing the record here, I also noticed a reason why the Employee Concerns Office of DOE/OR might have failed to insure that these procedural statements were included in the complaint. The intake form used by that Office for Part 708 complaints is the same form that it uses for receiving employee concerns. The form is entitled "Employee Concerns Reporting Form," used "to report safety, health, and environmental concerns." The form states that it may also be used by employees to file complaints of retaliation under part 708. While there is certainly some similarity between Part 708 complaints and overall employee concerns about safety, health and environment, there are some obvious, important differences. The requirements of Section 708.12, cited above, are a significant example. These do not apply to the filing of

employee concerns about safety, health and environment outside of Part 708.

Further, a Part 708 complaint involves an allegation of retaliation by an employer for a protected disclosure, and this Part provides protection from such retaliation. The filing of an employee concern does not necessarily mean there was any retaliation involved, and the employee may not be seeking any protection.

Another difference is the fact that Part 708 includes protection for making disclosures that are not related to safety and health. These include reporting of fraud, gross mismanagement, gross waste of funds, or abuse of authority; and participating in a Part 708 proceeding, which is involved here. 10 C.F.R. § 708.5.

The employee concerns form at issue here simply does not provide for automatic consideration of the Section 708.12 requirements, and does not capture these other Part 708 concerns. Accordingly, if the DOE/OR Employee Concerns Office wishes to continue to use the employee concerns reporting form to record and report Part 708 complaints, it should consider amending the form so that it will include an opportunity to automatically review whether all relevant Part 708 requirements have been met. On the other hand, that Office might consider developing a form to be used only for Part 708 concerns, and in that context insure that all procedural requirements are easily identified and considered. I believe that an appropriate adjustment to intake procedures will help individuals who file complaints of retaliation and help insure full adherence to Part 708 procedural requirements.

IT IS THEREFORE ORDERED THAT:

The Appeal filed by Gary Vander Boegh (Case No. TBU-0007) is hereby granted and his Part 708 complaint is hereby remanded to the Manger, Diversity Programs and Employee Concerns located in Oak Ridge, Tennessee, for further processing as set forth above.

George B. Breznay
Director
Office of Hearings and Appeals

Date: June 19, 2003

March 18, 2003

DECISION AND ORDER
OF THE DEPARTMENT OF ENERGY

Decision of the Director

Name of Petitioner: Henry T. Greene

Date of Filing: February 3, 2003

Case Number: TBU-0010

Henry T. Greene, a former employee of Science Applications International Corporation (SAIC) and a present employee of Bechtel SAIC Company LLC (BSC), both Department of Energy (DOE) contractors, appeals the dismissal of the whistleblower complaint against BSC he filed under 10 C.F.R. Part 708, the DOE Contractor Employee Protection Program. SAIC and BSC are both contractors for the Department of Energy at the Yucca Mountain Project Site. On January 13, 2003, the Deputy Director of DOE's Office of Repository Development (ORD) dismissed Greene's complaint against BSC. As explained below, I reverse the dismissal of the subject complaint, and remand the matter to ORD for further processing.

I. Background

The DOE's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste and abuse" at DOE's government-owned, contractor-operated facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purposes are to encourage contractor employees to disclose information which they believe exhibits unsafe, illegal, fraudulent, or wasteful practices, and to protect those "whistleblowers" from consequential reprisals by their employers. The regulations governing the DOE's Contractor Employee Protection Program are set forth at Title 10 Part 708 of the Code of Federal Regulations.

Under Part 708, the DOE office initially receiving a complaint may dismiss the complaint for lack of jurisdiction or other good cause. 10 C.F.R. § 708.17. The complainant may appeal such a dismissal to the OHA Director. 10 C.F.R. § 708.18.

On January 13, 2003, ORD's Deputy Director issued a letter in response to SAIC and BSC's motions to dismiss. The January 13th letter denied SAIC's motion to dismiss. However, the January 13th letter granted BSC's motion to dismiss. To this end, the dismissal letter states, in pertinent part:

> BSC has asked that the complaint against it be dismissed for lack of jurisdiction because the facts alleged do not present issues for which relief can be granted under Part 708 with regard to it. I find that the complaint alleges that "but for" retaliation by SAIC, the complainant would be better situated in his current employment with BSC. However, there is no allegation of a disclosure covered by Part 708 having contributed to any act by BSC that meets the definition of retaliation under Part 708. Therefore, I do find a lack of jurisdiction with regard to the complaint against BSC. The complaint as to BSC is hereby dismissed, in accordance with Section 708.17(c)(2).

January 13, 2003, Jurisdictional Determination at 1-2. On February 3, 2003, the Complainant filed the present Appeal. On March 10, 2003, BSC filed a response to the Complainant's appeal.

II. Analysis

It is well settled that a Motion to Dismiss in a 10 C.F.R. Part 708 proceeding is appropriately granted only where there are clear and convincing grounds for dismissal, and no further purpose will be served by resolving disputed issues of fact or law on a more complete record. *Lockheed Martin Energy Systems, Inc.,* 27 DOE ¶ 87,510 (1999)*; EG&G Rocky Flats,* 26 DOE ¶ 82,502 (1997) (EG&G). The OHA considers dismissal "the most severe sanction that we may apply," and we have rarely used it. *Boeing Petroleum Services,* 24 DOE ¶ 87,501 at 89,005 (1994). Moreover, this Office has held that, in order to further the purposes of the whistleblower protection program, which include encouraging employees to come forth with protected disclosures, it is important not to hold parties to proceedings under 10 C.F.R. Part 708 to the strictest standards of technical pleading. *EG&G, supra*; *Westinghouse Hanford Company*, 24 DOE ¶ 87,502 at 89,011 (1994) (*Westinghouse*).

10 C.F.R. § 708.17 sets forth those circumstances under which a Head of Field Element or EC Director may dismiss a complaint for lack of jurisdiction or for other good cause. ORD's January 13, 2003 Jurisdictional Determination cites only § 708.17(c)(2) as the basis for its dismissal of the complaint against BSC. 10 C.F.R. § 708.17(c)(2) provides: "Dismissal for lack of jurisdiction or other good cause is appropriate if: (2) The facts, *as alleged in your complaint*, do not present issues for which relief can be granted under this regulation." (Emphasis supplied). ORD's reliance on § 708.17(c)(2) is misplaced, however. The Complaint clearly and unambiguously states a claim against BSC for which relief can be granted under 10 C.F.R. Part 708. Under the Part 708 regulations:

> The employee who files a complaint has the burden of establishing by a preponderance of the evidence that he or she made a disclosure, participated in a proceeding, or refused to participate, as described under § 708.5, and that such act was a contributing factor in one or more alleged acts of retaliation against the employee by the contractor. Once the employee has met this burden, the burden shifts to the contractor to prove by

> clear and convincing evidence that it would have taken the same action without the employee's disclosure, participation, or refusal.

10 C.F.R. § 708.29. Accordingly, a complaint states a claim upon which relief can be granted under Part 708 if it alleges that (1) an employee made protected disclosures (or otherwise engaged in protected activity) and (2) the protected activity was a contributing factor in one or more alleged acts of retaliation against the employee by the contractor.

Turning to the present case, we note that the Complaint clearly alleges that Greene made a number of protected disclosures. Complaint at ¶ 28, 41, 42, and 48. The Complaint also alleges that these protected disclosures were a contributing factor in a number of personnel actions taken by BSC which negatively affected Greene. Complaint at ¶ 19, 22, 24, 32-39. Thus, the Complaint clearly sets forth the allegations necessary to establish a *prima facie* case under the DOE whistleblower regulations. Therefore, I find that the claims raised here present issues for which relief can be granted. Accordingly, the determination by the ORD was incorrect, and I will remand this matter to the ORD for further consideration and processing.

BSC's Response to the Appeal (Response) is unpersuasive. In its Response, BSC asserts: (1) Greene's protected disclosure occurred before he was employed by BSC, (2) Greene's lack of success in getting the positions he desired resulted only from the residual effects of demotion and therefore did not result from any new retaliation by BSC, and (3) "[t]he factual allegations in the complaint allege nothing from which BSC's knowledge of Complainant's alleged protected activity or any retaliatory motive on BSC's part could fairly be inferred." Response at 2, 5.

Turning to BSC's first argument, we note that Part 708 does not restrict the protection it accords to protected activity to that conduct which takes place while an individual is actually employed by a DOE contractor. *See, e.g. Jagdish C. Laul, Case Number, VBH*-0010, (2000) (finding retaliation by an employer against an employee who had made protected disclosures while employed by a previous employer), *affirmed*, *Jagdish C. Laul, Case Number, VBA*-0010 (2001). Accordingly, BSC's first argument, whether true or untrue, is not controlling here. BSC's second contention is similarly flawed. Even if this contention is factually valid, any continuation of past retaliation by a subsequent DOE contractor would be actionable under Part 708. Finally, I note that BSC's third contention is factually flawed: The Complaint specifically states, "All respondents, and decision makers, had knowledge of the protected activities of the Complainant." Complaint at ¶ 52.

III. Conclusion

As indicated by the foregoing, I find that the DOE Office of Repository Development incorrectly dismissed the complaint filed by Henry T. Greene. Accordingly, the complaint against BSC should be accepted for further consideration and processing by ORD.

It Is Therefore Ordered That:

The Appeal filed by Henry T. Greene (Case No. TBU-0010) is hereby granted and his Part 708 complaint is hereby remanded to the Office of Repository Development for further processing as set forth at 10 C.F.R. § 708.21.

George B. Breznay
Director
Office of Hearings and Appeals

Date: March 18, 2003

June 2, 2004
DECISION AND ORDER
OF THE DEPARTMENT OF ENERGY

Decision of the Director

Name of Petitioner: Charles L. Evans

Date of Filing: May 17, 2004

Case Number: TBU-0026

Charles Evans, a former employee of Fluor Hanford Inc. (Fluor), a Department of Energy (DOE) contractor, appeals the DOE Richland Operations Office=s (Richland) dismissal of the whistleblower complaint he filed against Fluor under 10 C.F.R. Part 708, the DOE Contractor Employee Protection Program.

I. BACKGROUND

A. The DOE=s Contractor Employee Protection Program

The DOE=s Contractor Employee Protection Program was established to safeguard Apublic and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste and abuse@ at DOE=s government-owned, contractor-operated facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purposes are to encourage contractor employees to disclose information which they believe exhibits unsafe, illegal, fraudulent, or wasteful practices, and to protect those Awhistleblowers@ from consequential reprisals by their employers. The regulations governing the DOE=s Contractor Employee Protection Program are set forth at Title 10 Part 708 of the Code of Federal Regulations.

Under Part 708, the DOE office initially receiving a complaint may dismiss the complaint for lack of jurisdiction or other good cause. 10 C.F.R. ' 708.17. The complainant may appeal such a dismissal to the Director of the Office of Hearings and Appeals (OHA). 10 C.F.R. ' 708.18.

B. The Procedural History

On February 19, 2004, the Complainant filed a "Complaint of Retaliation" with Richland. The Complaint alleges that the DOE and Fluor have retaliated against him for "previously filed paper work outlining gross mismanagement of DOE responsibilities to the citizens of Benton County and others adjoining the Hanford site for fire protection." Complaint at 1. The Complaint alleges that Richland and Fluor retaliated against him by delaying reimbursement for course work that was due to him under a DOE program. On March 29, 2004, Richland issued a Jurisdictional Determination under 10 C.F.R. ' 708.17 dismissing the Complaint (the

Jurisdictional Determination). The Jurisdictional Determination found that "the matter has been resolved though [Fluor's] commitment to work with [the Complainant] to answer any questions [the Complainant has] concerning [his] tuition reimbursement." Jurisdictional Determination at 1. In addition, Richland found that the Complaint fails to state a claim for which relief can be granted under 10 C.F.R. Part 708. *Id.* Richland then erroneously informed the Complainant that he could request that his Complaint be forwarded to this office for a hearing, under 10 C.F.R. §708.21. Instead, Richland should have informed the Complainant of his right to seek an appeal of Richland's dismissal under 10 C.F.R § 708.18. On April 19, 2004, the Complainant filed a request for hearing and investigation under 10 C.F.R. § 708.21(a)(2). For the reasons stated below, we are treating the April 19, 2004 submission as an appeal of Richland's Jurisdictional Determination.

II. ANALYSIS

10 C.F.R. ' 708.17 provides that a Complaint may be dismissed for lack of jurisdiction or for other good cause by the head of a DOE field element or a employee concerns manager. 10 C.F.R. § 708.18(a) provides the only available recourse to a complainant whose compliant has been dismissed by the Head of Field Element:

> If your complaint is dismissed by the Head of Field Element or EC Director, **the administrative process is terminated** unless you appeal the dismissal to the OHA Director by the 10th day after you receive the notice of dismissal as evidenced by a receipt for delivery of certified mail.

10 C.F.R. § 708.18(a) (emphasis supplied). Accordingly, Richland's dismissal letter terminated the administrative process. Since the administrative process had been terminated this office does not presently have jurisdiction to conduct an investigation or a hearing. Therefore, we must reject the Complainant's request for an investigation followed by a hearing.

Normally, our consideration would end with our determination that our office does not have jurisdiction over the complaint. But in the present case, the Complainant proceeded to the wrong venue after being misled by Richland's error. Accordingly, we will process the Complainant's submission as if it were properly filed under § 708.18.

Turning to the merits of the Appeal we note that § 708.17(b) requires the Employee Concerns Manager to "give [the Complainant] specific reasons for the dismissal . . ." The Jurisdictional Determination provides only the following reasons for dismissal:

> [Fluor] found no retaliation with regard to the allegations raised. [Richland] agrees with this evaluation and finds that the matter has been resolved through [Fluor's] commitment to work directly with [the Complainant] to answer any questions you have regarding [the Complainant's] tuition reimbursement. In

> addition, [Richland] finds that the facts, as alleged in your complaint, do not present issues for which relief can be granted under 10 C.F.R. Part 708.

Jurisdictional Determination at 1. The unsupported conclusions set forth in the Jurisdictional Determination are too vague and conclusory to allow the Complainant or this office to determine whether the Complaint was properly dismissed under § 708.17. Accordingly, we are remanding this matter to Richland. On remand, Richland must issue a new jurisdictional determination which indicates the factual and legal basis for its conclusions that (1) Fluor did not retaliate against the Complainant, and (2) the facts, as alleged in the complaint, do not present issues for which relief can be granted under 10 C.F.R. Part 708. Moreover, Richland must also explain the relevance of Fluor's professed willingness to work with the Complainant to answer his questions about tuition reimbursement, if it continues to serve as a basis for dismissing the Complaint.

III. Conclusion

The Department of Energy's Richland Operations Office issued a letter dismissing the Complaint filed by Charles Evans. The letter lacked sufficient specificity and detail and failed to clearly explain Richland's reasons for dismissing the Complaint. In addition, Richland provided the Complainant with inaccurate information about his procedural options which led the Complainant to file a request for an investigation and hearing instead of a jurisdictional appeal. Accordingly, we are remanding this matter to Richland in order to provide it with an opportunity to issue a new jurisdictional determination that would provide a sufficient basis for meaningful review.

It Is Therefore Ordered That:

(1) The Appeal filed by Charles Evans (Case No. TBU-0026) is hereby granted in part, as set forth in Paragraph (2) and denied in all other aspects.

(2) The Appeal is remanded to the Richland Operations Office for further processing in accordance with the instructions set forth above.

(3) This is a Final Decision and Order of the Department of Energy

George B. Breznay
Director
Office of Hearings and Appeals

Date: June 2, 2004

August 13, 2004

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Appeal

Name of Case: **Clint Olson**

Date of Filing: **July 1, 2004**

Case Number: **TBU-0027**

Clint Olson (the complainant or the employee), appeals the dismissal of his complaint of retaliation filed under 10 C.F.R. Part 708, the Department of Energy (DOE) Contractor Employee Protection Program. As explained below, the dismissal of the complaint should be reversed and the matter should be remanded for further processing to the Manager of the Employee Concerns Program (Manager) at the National Nuclear Security Administration Service Center (NNSA).

I. Background

The complainant is an employee of BWXT Pantex (BWXT), the Management and Operations Contractor at the DOE's Pantex Plant in Amarillo, Texas. He is employed as a counterintelligence (CI) officer at the plant. On March 15, 2004, he filed a complaint of retaliation against BWXT with the NNSA. On June 22, 2004, the Manager dismissed the complaint on the grounds that it "fails to meet the requirements of the Contractor Employee Protection Program." The Manager stated as the basis for this finding that the complainant had failed to identify any adverse action taken against him, and had also "failed to identify the disclosure that [the complainant] personally made that resulted in retaliation." The dismissal indicated that the complaint therefore failed to satisfy the requirements of 10 C.F.R. § 708.12. On July 1, 2004, the complainant filed the instant appeal of that dismissal with the Office of Hearings and Appeals (OHA). 10 C.F.R. § 708.18. On July 15, 2004, the Chief Counsel of BWXT submitted a letter supporting the Manager's determination.

II. Analysis

I agree with the Manager that Section 708.12 requires that a complainant identify the protected disclosure that he made, as well as the retaliation taken against him for making that disclosure. However, after reviewing the facts in this case, I do not believe that dismissal is appropriate at this point.

Section 708.5 sets out the nature of the employee conduct that is protected from employer retaliation. That Section provides:

> If you are an employee of a contractor, you may file a complaint against your employer alleging that you have been subject to retaliation for:
>
> (a) Disclosing to a DOE official, a member of Congress, any other government official who has responsibility for the oversight of the conduct of operations at a DOE site, your employer. . . information that you reasonably and in good faith believe reveals--
>
> (1) A substantial violation of a law, rule or regulation;
>
> (2) A substantial and specific danger to employees or to public health or safety; or
>
> (3) Fraud, gross mismanagement, gross waste of funds, or abuse of authority; . . . .

10 C.F.R. § 708.5.

I reviewed the complaint to assess whether it meets these standards. It is true that in his complaint, the employee addresses matter of policy. He also raises alleged retaliations against others. Generally speaking, these are not appropriate matters for consideration in a Part 708 proceeding. Nevertheless, I find that the complaint, although not fully explicit on all points, certainly alleges that disclosures were made and describes retaliations. However, as discussed below it does require some supplementation.

A. Protected Disclosures

I see the following possible disclosures in this complaint. First, the complainant states that in February 2002, Pantex CI worked on a case which involved the inaccurate reporting of a cyber security incident to the DOE. According to the complaint, Pantex CI reported to "DOE HQ" that "a piece of highly classified media was and is missing from Pantex." The complaint alleges that BWXT

Security nevertheless stated that it had "evidence of the destruction of the media and that no compromise of classified information took place." The complaint contends that, in fact, there was no evidence of the destruction of the media, and that no evaluation of the extent of the compromise of classified information has been conducted. The complainant states that covering up this incident by Pantex is criminal, and reporting of this incident to the DOE is protected.

These circumstances certainly seem to describe an incident which could be covered under Section 708.5(a)(1). However, the employee has worded his description of the event so that it is impossible to discern whether he was actually involved in the disclosure or whether someone else in his organization was responsible for the disclosure. If the disclosure was not made by the employee, or he was not among the group who made the disclosure, then he would not be conferred protected status under Part 708. It is also not clear to whom the disclosure was made and when it took place. To be protected under Part 708, the disclosure must be made to an individual named in Section 708.5(a).

The complainant should be given the opportunity to state (i) that he made the disclosure or was among those involved in the disclosure; (ii) to whom the disclosure was made; and (iii) when it took place. It was premature to dismiss the complaint without providing the employee an opportunity to furnish an appropriate clarification. The Manager could certainly have asked the complainant to clarify these points.

The complaint also describes the following statement which might qualify as a protected disclosure. The employee contends that during the first week of December 2003 he told "SCIO Broaddus that [he] did not want to remain in the PAP [Personnel Assurance Program] at Pantex due to the inconsistency, the malicious use of the program in retaliation and the lack of formal procedure." The complainant further states that in a meeting of December 11, 2003, with SCIO Broaddus, Larrie Trent, and Mike Mallory, he "detailed the violations of the Privacy Act and HIPPA Privacy Rule which I personally have observed being committed by the Pantex PAP."

This communication does describe the important details, including (i) that it was made by the complainant; (ii) to whom it was made and (iii) the date of the discussion. It therefore satisfies several of the key requirements of Section 708.5. However, the subject of the communication may not necessarily qualify as a disclosure of "[A] substantial violation of a law, rule or

regulation," or as some other type of revelation protected under Section 708.5. For example, the statement does not describe the nature of the alleged violations. It is thus not possible to gauge whether the employee reasonably and in good faith believed he disclosed violations and whether they are substantial. The Manager should offer the employee the opportunity to supply this information. As indicated by the foregoing, I find that summary dismissal for failure to allege a protected disclosure is not appropriate at this point in this proceeding.

B. Retaliations

The Manager also stated as a basis for the dismissal of the complaint that the complainant had not identified any adverse action taken against him. I cannot agree. After reviewing the complaint, I note that the complainant alleges that "no promotions were made to personnel of Pantex Counterintelligence" as a result of the complaint regarding the "missing media." The employee has also described the relief he seeks for the purported retaliation: a retroactive promotion and pay raise. An allegation of denial of promotion is an appropriate action for investigation and hearing. Relief is available under 10 C.F.R. § 708.36(a).

The employee also cites an incident in which he alleges that the PAP was used in a retaliatory fashion. He believes that he was required to undergo a fitness for duty psychological interview as a retaliation for his disclosures. He also believes that he was pressured to withdraw from PAP, after reporting that PAP was used in a malicious manner. The appropriate remedy for the employee for this alleged retaliation, were it demonstrated to have occurred, is not apparent. On remand, the employee should be sure to describe the type of relief he seeks for this purported retaliation.

C. Submission of BWXT

As noted above, we also received a filing in this case from the BWXT chief counsel. The submission supports the finding of the Manager and requests that I uphold her dismissal determination. Although the Part 708 regulations do not specifically provide for a filing by the contractor in these jurisdictional appeals, I have exercised my discretion to consider the BWXT submission.

Overall, the arguments raised do not persuade me that dismissal is appropriate at this point. For example, BWXT asserts that the description of the protected disclosures is incomplete. As indicated above, I agree with that assessment, but I believe that

the employee should be provided an opportunity to cure the deficiency. BWXT also claims that the stated retaliation, failure to provide promotions to Pantex CI officers as a group, does not constitute retaliation for Part 708 purposes. This issue involves both legal and factual questions which I believe merit further development. It is therefore not appropriate for summary dismissal. In sum, I see nothing in the BWXT submission which convinces me that I should uphold the Manger's determination at this time.

III. Conclusion

Overall, I believe that the disclosures and retaliations alleged here are far from well-delineated. It is not clear that they will ultimately satisfy Part 708 requirements. However, it was premature to dismiss this case at this point in the proceeding, before any further development could be undertaken. *See Mark J. Chugg*, 28 DOE ¶ 87,030 (2002); *Darryl Shadel*, 27 DOE ¶ 87,561 (2000). I do not believe that the complaint as a whole lacks any sign of merit. It is only natural that facts are thin at the early stages of a Part 708 proceeding. Employees who are not familiar with Part 708 are often unable to draft complaints that satisfy all the procedural and substantive requirements of this Part. *See Gary S. Vander Boegh*, 28 DOE ¶ 87,038 (2003)(*Vander Boegh)*. For this reason, I believe that employee concerns managers should take a liberal view when making jurisdictional determinations. Before a complaint is dismissed, the complainant should be given an opportunity to correct deficiencies. *See Vander Boegh*, 28 DOE at 89,266. Managers should err, if they must, on the side of accepting jurisdiction. The OHA may then consider jurisdictional issues more fully as the facts are developed in the investigation and hearing stages. In making jurisdictional determinations, managers should bear in mind that they are making only a preliminary determination as to whether further processing is warranted. They are not charged at this early stage of the proceeding with making a final assessment about the worthiness of the overall complaint.

At this point, there is clearly sufficient substantive information in the record in this case to warrant some further processing of this complaint. I will therefore remand the matter to the Manager for that purpose. 10 C.F.R. § 708.18(d).

During that additional processing, the Manager should give further consideration to some important procedural aspects of this case. Section 708.12 specifies what information an employee must include

in his complaint of retaliation. In addition to a description of the events giving rise to the complaint, the complainant must make the following assertions: state that he is not currently pursuing a remedy under State or other applicable law; state that all of the facts included in the complaint are true and correct to the best of his knowledge and belief; and affirm that he has completed all applicable grievance or arbitration procedures. 10 C.F.R. § 708.12(b),(c), and (d). The copy of the complaint submitted to the OHA as part of this appeal does not set forth any of these statements for the record. Accordingly, the Manager should also make sure that the record in this case is sufficient with respect to the requirements of Section 708.12. *Vander Boegh*, 28 DOE at 89,266-67.

Finally, the employee should, on his own, review all the deficiencies in the complaint, as discussed in the above determination, and correct them. The Manager will allot sufficient time to the employee for this purpose.

IT IS THEREFORE ORDERED THAT:

The Appeal filed by Clint Olson (Case No. TBU-0027) is hereby granted and his Part 708 complaint is hereby remanded to the Employee Concerns Program Manager, NNSA Service Center, for further processing as set forth above.

George B. Breznay
Director
Office of Hearings and Appeals

Date: August 13, 2004

December 9, 2004

DECISION AND ORDER
OF THE DEPARTMENT OF ENERGY

Decision of the Director

Name of Petitioner: Glenn Kuswa

Date of Filing: July 9, 2004

Case Number: TBU-0028

Glenn Kuswa, an employee of Sandia National Laboratories (Sandia) in Albuquerque, New Mexico, appeals the dismissal of his whistleblower complaint filed under 10 C.F.R. Part 708, the DOE Contractor Employee Protection Program. On June 22, 2004, the Employee Concerns Program Manager at the DOE's National Nuclear Security Administration Service Center, Albuquerque, (NNSA/Albuquerque) dismissed Mr. Kuswa's complaint. As explained below, I reverse the dismissal of the subject complaint, and remand the matter to NNSA/Albuquerque for further processing.

I. Background

The DOE's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste and abuse" at DOE's government-owned, contractor-operated facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purposes are to encourage contractor employees to disclose information which they believe exhibits unsafe, illegal, fraudulent, or wasteful practices, and to protect those "whistleblowers" from consequential reprisals by their employers. The regulations governing the DOE's Contractor Employee Protection Program are set forth at Title 10 Part 708 of the Code of Federal Regulations.

Under Part 708, the DOE office initially receiving a complaint may dismiss the complaint for lack of jurisdiction or other good cause. 10 C.F.R. § 708.17. The complainant may appeal such a dismissal to the OHA Director. 10 C.F.R. § 708.18.

Mr. Kuswa was employed as a "general technical manager" at Sandia. After being demoted to "principle [*sic*] member of technical staff," Mr. Kuswa filed a Part 708 complaint with NNSA/Albuquerque, alleging that he was demoted in retaliation for raising concerns within Sandia about "pressures being exerted to produce data that would support an outcome calling for a costly replacement of a weapon component." Complaint at 1. Mr. Kuswa also alleged that the demotion

was in retribution for "the appearance that [he] and/or staff in his department had made statements to the DOE Office of Inspector General." *Id.*

On June 22, 2004, the Employee Concerns Program Manager at NNSA/Albuquerque dismissed the complaint. Letter from Eva Glow Brownlow, Employee Concerns Program Manager, NNSA/Albuquerque, to J. Edward Hollington, Attorney for Mr. Kuswa (June 22, 2004) ("Dismissal Letter"). The dismissal letter states, in pertinent part:

> 10 CFR Part 708.12 states that the complainant is required to identify in the complaint the 'disclosure, participation, or refusal that the employee believes gave rise to the retaliation.' Mr. Kuswa admits in his complaint that he did not make any disclosure, participate in making a disclosure or refuse to do any particular thing that he thought was dangerous. For this reason, Mr. Kuswa's complaint fails to meet the requirements of 10 CFR 708.

Dismissal Letter at 1.

In his Appeal, Mr. Kuswa contends that his "complaint contains numerous factual references to protected disclosures he made to his employer of fraud, gross mismanagement, gross waste of funds or abuse of authority as defined in 10 CFR 708.5(a)(3)." Appeal at 1.

II. Analysis

Part 708 provides that the DOE may dismiss a complaint for "lack of jurisdiction or for other good cause . . ." 10 C.F.R. § 708.17.

> Dismissal for lack of jurisdiction or other good cause is appropriate if:
>
> (1) Your complaint is untimely; or
>
> (2) The facts, as alleged in your complaint, do not present issues for which relief can be granted under this regulation; or
>
> (3) You filed a complaint under State or other applicable law with respect to the same facts alleged in a complaint under this regulation; or
>
> (4) Your complaint is frivolous or without merit on its face; or
>
> (5) The issues presented in your complaint have been rendered moot by subsequent events or substantially resolved; or

> (6) Your employer has made a formal offer to provide the remedy that you request in your complaint or a remedy that DOE considers to be equivalent to what could be provided as a remedy under this regulation.

10 C.F.R. § 708.17(c).

The Dismissal Letter does not specify one of the reasons listed in section 708.17(c) as the basis for dismissing Kuswa's complaint. However, because the Dismissal Letter finds that the complaint lacks an allegation of a disclosure, participation, or refusal to participate which is protected under Part 708, we can only assume that NNSA/Albuquerque found Mr. Kuswa's complaint to be "frivolous or without merit on its face." We disagree with this conclusion.

Part 708 protects a DOE contractor employee from retaliation for, among other things, disclosing to his "employer . . . , information that you reasonably and in good faith believe reveals . . . [f]raud, gross mismanagement, gross waste of funds, or abuse of authority." 10 C.F.R. § 708.5(a)(3). We find that disclosures allegedly made by Mr. Kuswa would be protected by this provision of the regulations.

At the heart of Mr. Kuswa's complaint is his allegation that Sandia personnel briefed NNSA officials with a presentation of data "designed to close the sale for replacing the spin rocket motor, and that the representations made with this data were misleading and inappropriately biased." Complaint at 3. The complaint also alleges that the cost for replacement of the spin rocket motor stands at about $77 million.

Kuswa's complaint describes a meeting in the fall of 2002 in which he was informed "that we had three months to complete the investigation to provide critical data that would be need[ed] to support the effort to sell the DOE on a replacement program for the SRM [spin rocket motor]. . . . If we could not keep that schedule, management was prepared to make heads roll (that is, jobs would be lost), . . ." Kuswa responded that "[t]hree months would set a record even for the simplest problems, and it would not be possible to conduct a quality operation on the requested time line." Because of what he saw as "the threatening and unreasonable nature of part of the exchanges," Kuswa states that he "reported the incident to Janet Sjulin, manager of the Independent Surveillance Assurance organization, and also to Bill Norris."

Kuswa further alleges that he made his concerns known to Les Shephard, director of Organization 2900 at Sandia, at a lunch meeting in early summer 2003, in which he

> remarked that the spin rocket replacement had apparently been sold to NNSA, and that we in Surveillance were unconvinced that the case was strong enough, in view that there had been only one serious problem discovered out of hundreds of tests conducted at weapon quality standards. Clements [a member of Kuswa's staff] and Kuswa had also kept Bill Norris [Surveillance Level II manager] apprised of the pressures and exaggerations of problems from the outset.

Complaint at 4.

The gist of Kuswa's allegation is that there was pressure on lower level employees from Sandia management to provide data that would "sell" DOE on a weapon component replacement program costing as much as $77 million, and that when Sandia briefed DOE on this subject, it did so with representations that "were misleading and inappropriately biased." These allegations clearly raise an issue with regard to at least "gross waste of funds," the revelation of which is specifically protected under Part 708. And Mr. Kuswa alleges that he raised these very concerns with Sandia management. Thus, we have no doubt that Mr. Kuswa's activities, as alleged, would fall under the protection of Part 708.[*]

We emphasize that we are assuming Mr. Kuswa's allegations to be true for purposes of this appeal, as we must. NNSA/Albuquerque should normally make the same assumption when evaluating whether a complaint brought under Part 708 "is frivolous or without merit on its face." To do otherwise in the present case "reaches an issue that is at the heart of this case and ends the entire proceeding." *Mark J. Chugg*, 28 DOE ¶ 87,030 at 89,233 (2002). The complainant's contention that he was demoted because of his protected activity deserves closer examination, and is still in dispute. "In fact, this is the very type of issue that the OHA is charged with investigating under Section 708.22 and considering through the hearing process described at Section 708.28." *Id.* I find that the claims raised here present issues for which relief can be granted (e.g., a reversal of Mr. Kuswa's demotion) and which are not frivolous or without merit on their face. Accordingly, I conclude that this determination by the NNSA/Albuquerque was incorrect. *Daryl J. Shadel*, 27 DOE ¶ 87,561 (2000).

III. Conclusion

As indicated by the foregoing, I find that NNSA/Albuquerque incorrectly dismissed the complaint filed by Glenn Kuswa. Accordingly, the complaint should be accepted for further consideration.

[*] Because we find that Mr. Kuswa has alleged *actual* disclosures that would be protected under Part 708, we need not consider Mr. Kuswa's allegation of retaliation for "the appearance that [he] and/or staff in his department had made statements to the DOE Office of Inspector General." Complaint at 1.

It Is Therefore Ordered That:

(1) The Appeal filed by Glenn Kuswa (Case No. TBU-0028) is hereby granted and his Part 708 complaint is hereby remanded to the National Nuclear Security Administration Service Center, Albuquerque, for further processing as set forth at 10 C.F.R. § 708.21.

(2) This Appeal Decision shall become a Final Agency Decision unless a party files a petition for Secretarial review with the Office of Hearings and Appeals within 30 days after receiving this decision. 10 C.F.R. § 708.18(d).

George B. Breznay
Director
Office of Hearings and Appeals

Date: December 9, 2004

April 26, 2005

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Appeal

Name of Case: **Michael Goetz**

Date of Filing: **March 28, 2005**

Case Number: **TBU-0033**

Michael Goetz (the complainant) appeals the dismissal of his complaint of retaliation filed under 10 C.F.R. Part 708, the Department of Energy (DOE) Contractor Employee Protection Program. As explained below, the dismissal of the complaint is upheld.

I. Background

The complainant alleges the following facts. In 2000, he was employed by "MOTA," a DOE subcontractor at the DOE's Argonne National Laboratory (ANL) located in Argonne, Illinois. He filed a report describing safety violations involving radioactive materials and other safety matters that took place between February 2000 and June 2001. In October 2001 he met with an investigator regarding his safety concerns. He met with another investigator in early 2004 regarding this matter. On March 15, 2004, he voluntarily began work at a new position at NASA/Plum Brook Station, a remote test installation site for the National Aeronautics and Space Administration's Glenn Research Center.[1] His employer at Plum Brook was Bartlett Nuclear, Inc. (Bartlett).

It appears that Bartlett is performing a long-term remediation project (decontamination and decommission services) at Plum Brook. Montgomery-Watson is the NASA prime contractor at Plum Brook and Bartlett is a subcontractor of Montgomery-Watson. According to the complainant, "Montgomery-Watson is subject to the oversight of Argonne National Labs personnel." On November 4, 2004, the complainant was fired from his position with Bartlett, allegedly for improper computer use.

1/ The Plum Brook Station is located in Sandusky, Ohio.

The complainant filed a complaint of retaliation against Bartlett with the Argonne Site Office of the Department of Energy. The Argonne Site Office oversees the ANL. The complainant believes that he was fired from his job at Plum Brook in 2004 because he had made safety disclosures at ANL about 3 or 4 years earlier.

On March 4, 2005, the Acting Site Office Manager dismissed the complaint on the grounds that "the DOE Contractor Employee Protection Program applies to complaints of employees of DOE management and operating contractors and to subcontractors performing work at DOE-owned or-leased facilities. . . . Bartlett Nuclear has no contractual relationship with Argonne National Laboratory. The ANL oversight is pursuant to an interagency agreement between DOE and the National Aeronautics and Space Administration (NASA). Further, the NASA/Plum Brook Facility is not a DOE-owned or leased facility; therefore, DOE has no jurisdiction over your complaint." The complaint was dismissed pursuant to 10 C.F.R. § 708.17, for lack of jurisdiction.

On March 28, 2005, the complainant filed the instant appeal of that dismissal with the Office of Hearings and Appeals (OHA). 10 C.F.R. § 708.18. In the appeal, the complainant stated that his complaint of retaliation was "initiated through a contractor directly under the oversight of Argonne National Labs. The Bartlett representative merely [followed] the direct instructions of the Montgomery-Watson superintendent. . . [whose] daily activities are subject to the supervision of ANL personnel directly involved with my concerns expressed at ANL. Bartlett functioned as a captive subcontractor employer whose activities at Plum Brook, including all staffing decisions, were subject to approval of the primary contractor, Montgomery-Watson." The complainant further claimed that the events forming the basis of his complaint occurred at ANL. Finally, the complainant stated that Bartlett has had contractual relationships with ANL, and maintains contracts with the DOE at other DOE sites.

On March 30, we wrote a letter to the complainant asking for additional information about the relationship between Bartlett and the DOE. Specifically, we asked him to (i) provide additional information about the (contractual) relationship between Bartlett and ANL; (ii) submit information showing the relevant entities with which Bartlett had a contractual arrangement; (iii) submit copies of contracts between the DOE/ANL and Bartlett, or a DOE prime contractor and Bartlett; (iv) provide some background about Montgomery-Watson and its relationship to ANL, DOE and Bartlett; and (v) provide information about work he was performing at Plum Brook

that directly related to activities at DOE-owned or -leased facilities.

In a telephone conversation with the complainant on April 13, we explained in more detail the type of information we were seeking and the reason it was important. The complainant indicated that he would attempt to provide information that would respond to our letter. Thereafter, the Complainant submitted a copy of a draft of his Complaint of Retaliation. He did not submit any other information.

Section 708.18 provides that the Director of OHA will issue a decision on this type of case by the 30th day after the appeal is received. Since this appeal was filed on March 28, I believe that it is now appropriate to proceed with an analysis of this matter based on the record before me.

II. Analysis

After reviewing that record, I am in agreement with the result reached by the Argonne Site Office. The Part 708 regulations were promulgated to protect DOE contractor/subcontractor employees. According to Section 708.2, an "employee" means a person employed by a contractor, and any person previously employed by a contractor if that person's complaint alleges that employment was terminated for conduct described in . . . this subpart." A "Contractor" means a seller of goods or services who is a party to: (1) a management and operating contract or other type of contract with DOE to perform work directly related to activities at DOE owned or-leased facilities, or (2) a subcontract under a contract of the type described in paragraph (1) of this definition, but only with respect to work related to activities at DOE-owned or-leased facilities." As discussed below, the complainant does not qualify as an employee under the regulatory definition, and Bartlett does not meet the definition of contractor or subcontractor.

The complainant simply states that Bartlett was subject to DOE contractor "oversight." However, he has provided no evidence or reasoned argument that there was any contractual relationship between Bartlett and any DOE contractor. The Argonne Acting Site Office Manager stated that ANL oversight of Bartlett was pursuant to an interagency agreement between DOE and NASA. Without any information to the contrary, I must conclude that this does not meet the definition set forth in Section 708.2.

In any event, the complainant's assertion that the Bartlett representative "merely followed the direct instructions of the Montgomery-Watson superintendent," even if true, does not mandate a different result. DOE contractors, and through them their subcontractors, must comply with Part 708. 64 Fed. Reg. 12862 at 12863 (March 15, 1999). If there is no contractual agreement between the DOE and Montgomery-Watson/Bartlett, but rather only an "inter-agency agreement," between the DOE and NASA, then there is no established basis for the DOE to expect Bartlett to comply with Part 708, and no apparent authority on the basis of which the DOE could order Bartlett to provide relief for the complainant. The complainant has shown no reason for me to conclude otherwise. The complainant's allegation that Bartlett has contracts with the DOE at other sites does not bring the complainant, who did not work at those sites, within the purview of Part 708.

Furthermore, even if there were a sub-contractor relationship between the DOE and Bartlett, since the complainant did not work at a DOE facility, he would be required to show that his work related to activities at a DOE-owned or -leased facility. 10 C.F.R. § 708.2. We asked the complainant to provide such information, by describing the work he was performing. Although submission of this type of evidence was well within his ability, he failed to come forth with even this relatively simple information.

As a final matter, aside from the fact that Part 708 does not permit consideration of the instant complaint, I find there is little plausibility to the gravamen of the complaint here, i.e., that the complainant was fired from a NASA site 4 years after his original DOE/ANL disclosures because a DOE overseer at the NASA site bore him some ill-will.

Even though the complainant is not covered by the DOE's Part 708 regulations, there are other programs and agencies that might offer him protection. The ANL provided the complainant with information about the Occupational Safety and Health Administration (OSHA) whistleblower protection program and suggested other agencies such as the Nuclear Regulatory Commission, NASA and the Army Corps of Engineers that might have jurisdiction over the complainant and "safety at his workplace." Thus, the complainant here may well have avenues of relief other than the DOE's Part 708.

IT IS THEREFORE ORDERED THAT:

(1) The Appeal filed by Michael Goetz (Case No. TBU-0033) is denied, and his Complaint of Retaliation is hereby dismissed.

(2) This appeal decision shall become a final agency action unless a party files a petition for Secretarial review by the 30th day after receipt of this appeal determination. 10 C.F.R. § 708.18(d).

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Appeal

Name of Case: **Caroline C. Roberts**

Date of Filing: **January 26, 2006**

Case Number: **TBU-0040**

Caroline C. Roberts (the complainant), appeals the dismissal of her complaint of retaliation filed under 10 C.F.R. Part 708, the Department of Energy (DOE) Contractor Employee Protection Program. As explained below, the dismissal of the complaint should be sustained, and the appeal denied.

I. Background

The complainant is a former employee of the DOE's Los Alamos National Laboratory (LANL) in Los Alamos, New Mexico. She claims that during the period October 2003 through August 2004 she made disclosures that are protected under Section 708.5. On August 9, 2004, she was terminated from her LANL position and on August 5, 2005, she filed the instant complaint of retaliation.

In a letter of January 10, 2006, the Whistleblower Concerns Program Manager at the National Nuclear Security Administration Service Center (NNSA) (Program Manager) dismissed the complaint. The Program Manager noted that Section 708.14 provides that a complaint must be filed within 90 days after the alleged retaliation. The Program Manger determined that the complainant's August 5, 2005 filing was untimely because it came about one year after the complainant's termination by LANL. In her letter, the Program Manager found this to constitute a basis for dismissing the complaint. 10 C.F.R. § 708.14. The January 10 letter gave as a second basis for the dismissal the failure of the complainant to specifically identify a disclosure that relates to the criteria set forth in 10 C.F.R. § 708.5. On January 26, 2006, the complainant filed the instant appeal of that dismissal with the Office of Hearings and Appeals (OHA). 10 C.F.R. § 708.18.

II. Analysis

Section 708.17(a) provides that a complaint of retaliation may be dismissed by the Head of Field Element or EC Director for lack of jurisdiction. Section 708.17(c)(1) provides that untimeliness is an appropriate basis for dismissal on grounds of lack of jurisdiction. Section 708.17(b) states that if a complaint is dismissed for lack of jurisdiction or other good cause, the Head of Field Element or EC Director will provide a complainant with "*specific reasons for the dismissal*. . . ." (Emphasis added.) Setting out the specific reasons for the dismissal is a key part of this provision. It allows the employee to understand why his complaint may have fallen short, and also to craft an appropriate appeal. It also permits the Director of the Office of Hearings and Appeals to more effectively perform the review allowed in Section 708.18. A mechanistic repetition of the regulations by the Head of Field Element or EC Director does not permit the individual to understand the reasoning for the dismissal, nor does it promote effective review by the Director of the OHA. Thus, a jurisdictional denial letter should fully review and describe the facts that played a role in the denial, as well as the reasoning used to reach the ultimate determination. A mere formulaic repetition of the regulations or a summary rejection without reasoning or discussion of the facts in the record is simply not sufficient. With these considerations in mind, I turn to the jurisdictional determination that is under appeal in this case.

With respect to the dismissal on the grounds of untimeliness, the January 10 letter stated that there "was not enough information explaining the lapse in time from the termination of the complainant on August 9, 2003, to the filing on August 5, 2005 to be considered timely under 10 C.F.R. Part 708.14."

This explanation is inadequate. It does not discuss the information that was in the record regarding why the filing was late. The DOE Field Offices should provide a full explanation of their determinations so that a Part 708 complainant is able to understand and challenge the Field Office's reasoning if he believes its determination is incorrect. Nevertheless, in this case, for reasons of increased administrative efficiency, I will expedite this proceeding by providing my own review of the record regarding the late filing.

It is clear that the individual did not file her Part 708 complaint with the DOE until August 5, 2005. As stated above, this filing was made about one year after the termination. Section 708.14

provides that complaints of retaliation must be filed within 90 after the complainant knew or should have known of the retaliation. In this case, since the individual was terminated on August 9, 2004, the complaint should, ordinarily, have been filed with 90 days after that date. However, Section 708.14(d) provides a complainant with the "opportunity to show any good reason [she] may have for not filing within that period and the [appropriate DOE official] may, in his or her discretion, accept [the] complaint for processing.

In this case, the Program Manager asked the complainant to provide a reason for the untimely filing and the complainant provided a reason. In her December 30, 2005 filing with the Program Manager, the complainant stated that she was not aware of the DOE's Part 708 contractor employee protection provisions. She did not learn of Part 708 until August 5, 2005, which is when she submitted her Part 708 complaint to the Program Manager. The Program Manager did not discuss this assertion in the dismissal letter. I will therefore consider it now.

The fact that the complainant may not have learned of the existence of Part 708 until one year after her termination is simply not a sufficient excuse for the late filing, and does not constitute a good reason to accept her untimely submission. Individuals are generally expected to know and understand their rights and obligations under applicable DOE regulations. In this case, I find ignorance alone not to constitute good cause. Therefore dismissal seems appropriate here.

Furthermore, I have reviewed the record in this case to determine whether there is any other legal basis on which to rest an acceptance of the complaint. In this regard, I note that the submissions in the case also indicate that on the day the complainant was terminated, August 9, 2004, she filed a complaint with the head of LANL. This complaint was referred to LANL's own whistleblower office. However, after reviewing this material, I cannot find that it satisfies the requirements of Part 708. Part 708 clearly requires complaints of retaliation to be filed with the head of the DOE Field Element. [1] I cannot find that filing a

---

1/ Section 708.2 states: "Head of Field Element means the manager or head of a DOE operations office or field office, or any official to whom those individuals delegate their functions under this part." The head of LANL is not a delegated

(continued...)

complaint with the head of LANL, run by DOE contractor University of California, to be in any way equivalent to a proper Part 708 filing with the DOE. Further, since the complainant was not even aware of Part 708, I certainly cannot conclude that she was uncertain as to whether her complaint was filed pursuant to that Part or under LANL's own procedures. Thus, there is no basis to conclude that she should be granted an extension of time based on any legitimate confusion on her part.

Section 708.14 provides for some exceptions to the 90 day time limitation. First, complainants are required to exhaust all available opportunities for resolution through an "applicable grievance-arbitration procedure." Section 708.13. Moreover, there is a tolling of the 90 day period while the individual is attempting to resolve the dispute through an internal company grievance-arbitration process. However, the time period begins to run again 150 days after the internal grievance was filed if a final decision on the grievance has not been issued. Section 708.14(b). These provisions do not help the complainant here.

First, I do not believe that the LANL whistleblower procedures constitute a grievance-arbitration procedure within the meaning of Section 708.13. The procedures that fall within the purview of Sections 708.13 and Section 708.14 are those that are negotiated grievance procedures available to bargaining unit employees. ***Darryl H. Shadel*** (Case No. VBU-0050), 27 DOE ¶ 87,561 (2000). There is simply no evidence in this case that the whistleblower processes that LANL had implemented were negotiated grievance procedures. Accordingly, the tolling of the time periods allowed by Section 708.14 is not applicable.

In any event, even if the tolling period applied, Section 708.14 does not permit the process to linger indefinitely. After 150 days, if there has been no final decision, the 90-day filing period begins to run again. Therefore in this case, 150 days after the August 2004 filing with LANL, or by the beginning of January 2005, the period began to run again. The complainant therefore had 90 days to file her whistleblower complaint with the DOE. She did nothing in this regard. Consequently, the tolling provisions of Section 708.14(b), even if applicable, do not provide her with any benefit here.

1/ (...continued)
official under this regulation.

Accordingly, I find that the complainant has not shown that good cause exists for her failure to file her Part 708 complaint in a timely manner, or any other reason to conclude that her complaint should be accepted even though it was not filed within the 90-day regulatory time period. Accordingly, her complaint should be dismissed.

Given my determination that the complaint was not filed in a timely manner, I need not give any further consideration to the finding by the Program Manager that the substance of complainant's disclosures does not fall within the purview of Section 708.5.

IT IS THEREFORE ORDERED THAT:

(1) The Appeal filed by Caroline C. Roberts (Case No. TBU-0040) is hereby denied.

(2) This Decision shall become a Final Agency Decision unless a party files a Petition for Secretarial Review with the Office of Hearings and Appeals within 30 days after receiving this decision. 10 C.F.R. § 708.19.

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Appeal

Name of Case: **William Cor**

Date of Filing: **April 21, 2006**

Case Number: **TBU-0045**

William Cor (the complainant or the employee), appeals the dismissal of his complaint of retaliation filed under 10 C.F.R. Part 708, the Department of Energy (DOE) Contractor Employee Protection Program. As explained below, the dismissal of the complaint should be reversed and the matter remanded for further processing to the Whistleblower Program Manager at the National Nuclear Security Administration Service Center (NNSA).

I. Background

The complainant was an employee with ARES Corporation, a DOE contractor at the Los Alamos National Laboratory in Los Alamos, New Mexico. Pursuant to Part 708, he filed a complaint of retaliation against ARES with the NNSA. On April 5, 2006, the Program Manager dismissed the complaint "for lack of jurisdiction." The Program Manager stated as the basis for this finding that the complainant had failed to show that ARES had terminated the complainant as he had asserted. Rather, the Program Manager found that the complainant's employment with ARES was on an "on call" basis. In this regard, the Program Manager noted that as an on call employee, the complainant was not guaranteed any work, and further that the complainant did not provide any documentation that any other casual employee has received work that could have been assigned to him. On this basis the Program Manager concluded that the Complaint should be dismissed for lack of jurisdiction, citing to 10 C.F.R. § 708.17(c). On April 21, 2006, the complainant filed the instant appeal of that dismissal with the Office of Hearings and Appeals (OHA). 10 C.F.R. § 708.18.

II. Analysis

A program manager may dismiss a Part 708 complaint for lack of jurisdiction or other good cause under 10 C.F.R. § 708.17 based on one or more of the following grounds: (1) the complaint is untimely; (2) the facts, as alleged in the complaint, do not present issues for which relief can be granted under Part 708; (3) the complainant has filed a complaint under other applicable law with respect to the same allegations; (4) the complaint is frivolous or without merit on its face; (5) the issues have been rendered moot or substantially resolved; or (6) the employer has made an offer to provide the requested remedy or a remedy that DOE considers to be equivalent to the remedy that could be provided under Part 708.

The complainant alleges he made a protected disclosure regarding the safety of a proposed design for an acid fume hood system at Los Alamos National Laboratory's Beryllium Technology Facility at Tech Area 3, and then stopped receiving on-call work assignments, thereby constructively terminating his employment. In response to the program manager's solicitation of its comments concerning the complaint, the contractor submitted statements disputing the validity of the complainant's whistleblowing claims, and further asserting that the complainant had not been terminated but instead had stopped receiving assignments simply due to the termination of work on the subcontract on which the complainant was employed.

The complainant responded by submitting information to the Program Manager disputing these assertions, including his contention that further work on the project was performed after he was directed to stop work, and that in fact the parties had manifested an earlier intention to undertake a broader working relationship beyond the project on which complainant was directed to stop work. Complainant further asserted that, contrary to the contractor's assertion that complainant had not been terminated, the contractor had informed an independent witness that the complainant was no longer employed by the firm. See March 22, 2006, e-mail from William Cor to DOE Whistleblower Program Manager.

The Program Manager dismissed the complaint for lack of jurisdiction. In reaching this determination, the program manager found that the complainant had failed to refute the contractor's assertions that the complainant had not been terminated and that no further work remained on the project to which the complainant was assigned.

In the context of a dismissal of a complaint by a program manager as meritless, Section 708.17 authorizes dismissal by a program manager only if the complaint itself fails to allege "issues for which relief can be granted" or "is frivolous or without merit on its face." As relevant here, the Part 708 regulations prohibit a contractor employer from retaliating against its employees for making a disclosure, to various identified governmental or contractor personnel, including a complainant's employer, of information the employee reasonably believes reveals a "substantial and specific danger to employees or to public health or safety." 10 C.F.R. § 708.5 (a) & (a) (2). Complainant asserts that he was directed to design an acid fume exhaust system that was tied into an existing building exhaust system and was not adequate for the concentrated acid exhaust, which should have been exhausted independently from the system. Complainant asserts that the design was "unsafe" and suggests that the alleged design defects posed a risk of acid exposure and injury to workers at LANL.

The respondent contests that the complainant raised an actual safety concern and maintains that complainant's alleged safety disclosures lack protection under Part 708 as being both insubstantial, and actually motivated by the complainant's "inability to produce his work in a timely manner." See Exhibit 3, page 1 to ARES February 27, 2006, Response to Complaint. As noted above, the parties further dispute whether complainant's lack of further assignments following the alleged safety disclosure was the product of impermissible reprisal for the alleged protected disclosure, as alleged in the complaint, or resulted simply from the termination of the exhaust fume project and the absence of other available work.

Resolution of the parties' competing assertions concerning the legitimacy of the alleged safety concerns and availability of additional work is beyond the scope of this initial stage of the proceedings. In the present context, 10 C.F.R. § 708.17 permits a program manager to dismiss a Part 708 complaint if the allegations set forth in the complaint fail to allege a non-frivolous claim for which relief can be granted under Part 708. In the subject case, however, the parties' conflicting claims concerning whether or not the complaint presents a disclosure protected under Section 708.5, and whether or not the complainant suffered any actual reprisal, are not susceptible to summary resolution under Section 708.17. On the basis of the present limited record we cannot say that the allegations in the complaint that the complainant suffered retaliation for making a protected safety disclosure are either

plainly frivolous or, if ultimately proven, would not support relief under Part 708.

Where, as here, the complaint does not meet the grounds for dismissal under Section 708.17, the program manager is authorized to recommend that the parties attempt to resolve the complaint informally, and absent a voluntary resolution to notify the complainant of his options to have the matter referred to OHA for a hearing either with or without a preceding OHA investigation. See 10 C.F.R. § § 708.20, and 708.21. A remand to the program manager for further proceedings in accordance with these provisions is thus in order.

IT IS THEREFORE ORDERED THAT:

The Appeal filed by William Cor (Case No. TBU-0045) is hereby granted and his Part 708 complaint is hereby remanded to the Employee Concerns Program Manager, NNSA Service Center, for further processing as set forth above.

George B. Breznay
Director
Office of Hearings and Appeals

Date: November 29, 2006

August 21, 2006

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Appeal

Name of Case:	**Dennis D. Patterson**
Date of Filing:	**July 31, 2006**
Case Number:	**TBU-0047**

Dennis D. Patterson (Patterson or the complainant) appeals the dismissal of his June 1, 2006 complaint of retaliation filed under 10 C.F.R. Part 708, the Department of Energy (DOE) Contractor Employee Protection Program. He filed the complaint with the Employee Concerns (EC) Manager of the DOE's Idaho Operations Office (DOE/ID), located in Idaho Falls, ID. As explained below, the EC Manager's July 17, 2006 dismissal of the complaint should be reversed, and the appeal granted.

I. Background

The complainant is the Manager of the Employee Concerns and Ethics Office of the Battelle Energy Alliance (BEA). BEA manages the DOE's Idaho National Laboratory. On June 1, 2006, Patterson filed a Complaint of Retaliation with the DOE/ID EC Manager. In that complaint, he alleged that he made protected disclosures involving violations of the Privacy Act, the Freedom of Information Act and Part 708. He stated that he made these disclosures to BEA senior management and to the BEA corporate office. He claimed that BEA retaliated against him in a number of ways, including intimidation, a retaliatory investigation of his ethics office, a lower performance appraisal than he had previously received, which resulted in a reduction in his merit pay increase for 2005, and a change in his job title from Manager to Specialist 5, which he contends will have an adverse impact on his future salary increases.

In the July 17, 2006 dismissal letter, the EC Manager of the DOE/ID determined that the complaint should be dismissed for the following reasons. First, the EC Manager found that the complaint was untimely filed. In this regard, she noted that a Part 708 complaint must be filed within 90 days of the date that the complainant knew or should have known of the alleged retaliation. 10 C.F.R.

§ 708.14(a). The EC Manager stated that the complainant had filed a "Charge of Discrimination" with the Idaho Human Rights Commission in which he stated that the latest date of discrimination was February 24, 2006. [1] She therefore determined that the June 1 filing of the Part 708 complaint took place beyond the 90 time frame and consequently was untimely.

As a second reason for the dismissal, the EC manager indicated that the complainant had not stated that he had exhausted all applicable grievance-arbitration procedures, as required by Section 708.13(a)(1).

Based on the above findings the EC Manager dismissed the complaint.

Pursuant to 10 C.F.R. § 708.18(a), Patterson filed the instant appeal with the Office of Hearings and Appeals.

II. Analysis

A. Timeliness

As noted above, the EC Manager found that the complaint was untimely because the latest retaliation noted by Patterson in his "Charge of Discrimination" with the Idaho Civil Rights Commission took place on February 24 and he filed his Part 708 complaint on June 1, which was more than 90 days later. I cannot discern why the EC manager referred to the Charge of Discrimination rather than Patterson's Part 708 Complaint of Retaliation in determining whether the filing was timely. In any event, Patterson filed a copy of his June 1 complaint along with his appeal. As Patterson notes in his appeal, the complaint clearly alleges a retaliation on March 14. The retaliation was a reduction in his 2005 merit increase. See Complaint Item (2)(F). Based on that alleged retaliation, the Part 708 complaint was clearly filed within the 90 day time frame permitted under Part 708. Accordingly, this aspect of the EC Manager's determination will not be sustained.

B. Exhaustion of Grievance/Arbitration Procedures

As stated above, the EC Manager included as a second reason for dismissing the complaint that Patterson had failed to state that he had exhausted all applicable grievance-arbitration procedures, as required by Section 708.13.

1/ The complainant withdrew that complaint on May 25, 2006.

After reviewing record in this case, I find that the EC Manager has erred regarding this issue. As an initial matter, I note that the Patterson complaint does include a statement regarding the grievance-arbitration issue. Specifically, Patterson has included a form that appears to have been developed by the DOE/ID. The form asks the filer to provide information about the various jurisdictional matters that every Part 708 complainant must address, including a required statement by a complainant that he has "exhausted (completed) all applicable grievance or arbitration procedures." 10 C.F.R. § 708.12(d). In connection with this subsection, the DOE/ID form offered the following three options as responses to whether the complainant had exhausted all applicable procedures: "(1) all attempts at resolution. . . have been exhausted; (2) the company grievance procedure is ineffectual or exposes me to employer reprisal; [2] (3) the company has no such procedures." The individual submitting this form is asked to mark all that apply.

In his complaint, Patterson responded by claiming that the procedures were ineffectual (Item No. 2). The EC manager then rejected that response, stating that the complainant had not exhausted all grievance arbitration procedures as required under Part 708.

The EC Manager's determination appears to assume that the complainant was required to exhaust the BEA grievance arbitration procedures. Based on the record in this case, we find that this assumption was incorrect. The term "grievance-arbitration procedure" used in the context of Part 708 has a specialized meaning related to procedures negotiated by employees and management under labor agreements. It therefore does not include every unilaterally-created grievance procedure that an employer may informally offer. *Darryl H. Shadel*, 27 DOE ¶ 87,561 (2000). *See also* 64 Fed. Reg. 12862 at 12868 (March 15, 1999).

2/ This option was one that was available under the prior version of Part 708 at Section 708.6(c)(2), which was promulgated in 1992. That provision is not included in the current version of Part 708, promulgated in 1999. Accordingly, this option should not have been included in the form.

In the instant case, it does not appear that Patterson has failed to participate in a union-mandated grievance procedure. [3] Rather, he has simply not utilized a voluntary BEA "Alternative Dispute Resolution" (ADR) process that is set out in the BEA handbook. [4] Such use is not required under Part 708. Accordingly, the complainant was not required to exhaust either a mandatory grievance-arbitration procedure or the BEA voluntary process. His failure to indicate exhaustion of grievance-arbitration procedures on the DOE/ID form is entirely understandable, since the form did not include the appropriate option, i.e. that he was not required to participate in a union-mandated grievance procedure. [5] (I recommend that the form be amended to include an opportunity for a complainant to indicate that he is not required to participate in a union-mandated grievance procedure.) Accordingly, the complaint was improperly dismissed based on the purported failure to include a statement regarding exhaustion of grievance-arbitration procedures.

As indicated by the above discussion, I find that the DOE/ID dismissal was incorrect and the Patterson complaint should be accepted for further processing.

IT IS THEREFORE ORDERED THAT:

The Appeal filed by Dennis D. Patterson (Case No. TBU-0047) is hereby granted, and his Part 708 complaint is hereby remanded to the

---

3/ In fact, it is not clear that he is even a member of a bargaining unit required to use such procedures.

4/ As Patterson points out, the BEA handbook indicates that "Employees have the right to file complaints with enforcement agencies without using the ADR program." Appeal at 2.

5/ It is also possible that there are no union-mandated procedures at the site, in which case the complainant should have checked item 3. In any event, based on the record here, it appears that the exhaustion requirements of Section 708.13 are not applicable. However, the complainant should confirm this is the case.

Employee Concerns Program Manager, Idaho Operations Office, for further processing as set forth above.

George B. Breznay
Director
Office of Hearings and Appeals

Date: August 21, 2006

August 3, 2006

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Appeal

Name of Case:	**Gary S. Vander Boegh**
Date of Filing:	**July 11, 2006**
Case Number:	**TBU-0049**

Gary S. Vander Boegh (Vander Boegh or the complainant) appeals the dismissal of his February 21, 2006 complaint of retaliation filed under 10 C.F.R. Part 708, the Department of Energy (DOE) Contractor Employee Protection Program. [1] He filed the complaint with the Office of Civil Rights and Diversity of the DOE's Environmental Management Consolidated Business Center (EMCBC) located in Cincinnati, Ohio. As explained below, the EMCBC June 29, 2006 dismissal of the complaint should be sustained, and the appeal denied.

I. Background

The complainant was employed by Weskem, LLC, a subcontractor of Bechtel Jacobs Company, LLC (BJC). BJC was the management and integration (M&I) contractor at the DOE's Paducah, Kentucky plant. The complainant was a landfill manager at a landfill site related to that plant. On April 23, 2006, he was terminated from that position, and on April 24, a new M&I contractor, Paducah Remediation Services (PRS), and a new subcontractor, Duratek, took over operation at the site.

The complainant's Part 708 history before the DOE dates from 2002. In that year, he filed a complaint claiming that in 2001 he made disclosures regarding the procedures used at the landfill that could result in environmental and regulatory violations. He contended that his employer, Weskem, then retaliated against him for making the disclosures. In an Initial Agency Decision issued on July 11,

---

1/ On February 23, 2006, the Complainant filed an amendment and supplement to the complaint and on April 23, he filed an additional supplement. For simplicity, the three filings will be referred to as "the complaint."

2003, a DOE Office of Hearings and Appeals (OHA) hearing officer found that the disclosures were protected, and that Weskem had taken several adverse personnel actions against Vander Boegh which constituted retaliation. The OHA hearing officer determined that the complainant should receive relief for those retaliations. *Gary Vander Boegh*, 29 DOE ¶ 87,040 (2003). [2]

The instant appeal concerns a different, although related, matter: a February 2006 complaint filed under Part 708 by Vander Boegh with the EMCBC. In that filing, the complainant contended that he had been subjected to ongoing retaliations for participating in the protected proceeding described above, and for making additional disclosures regarding landfill issues. He claimed that BJC, PRS, Weskem and Duratek, were all involved in a series of retaliations against him, culminating in his April 23, 2006 termination.

In its June 29, 2006 dismissal letter, the EMCBC determined that the complaint should be dismissed pursuant to Section 708.17(c), which in relevant part provides that:

> Dismissal for lack of jurisdiction or other good cause is appropriate if:
>
> . . .
>
> (3) You filed a complaint under State or other applicable law with respect to the same facts as alleged in a complaint under this regulation;
>
> . . .

EMCBC found that Vander Boegh had filed a recent Complaint [with the Department of Labor (DOL)] under Section 211 of the Energy Reorganization Act, and determined that the DOL Complaint involved the same set of facts alleged in the complaint presented to the EMCBC. Accordingly, the EMCBC dismissed the Vander Boegh complaint under 10 C.F.R. § 708.17(c)(3). [3]

2/ That determination is currently under appeal both by the complainant and Weskem. OHA Case No. TBA-0007.

3/ There were several other bases on which the EMCBC rejected the Vander Boegh complaint. However, these are irrelevant, given our finding that the complaint was properly dismissed pursuant

(continued...)

Pursuant to 10 C.F.R. § 708.18(a), Vander Boegh filed the instant appeal with the Office of Hearings and Appeals.

II. Analysis

As noted above, Section 708.17(c) provides that a complaint of retaliation may be dismissed for lack of jurisdiction if the complainant "filed a complaint under State or other applicable law with respect to the same facts as alleged in a complaint under this regulation." Section 708.15(c) states that "you [i.e. the complainant] are considered to have filed a complaint under State or other applicable law if you file a complaint, or other pleading, with respect to the same facts . . . whether you file such complaint before, concurrently with, or after you file a complaint under this regulation." Finally, Section 708.15(a)(1) allows a complaint who has filed a complaint under State or other applicable law as described above to file a Part 708 complaint if the ". . . complaint under State or other applicable law is dismissed for lack of jurisdiction."

The EMCBC found that Vander Boegh filed a complaint with the DOL based on the same facts alleged before the DOE. Therefore, the EMCBC correctly dismissed the Vander Boegh complaint pursuant to 10 C.F.R. §708.17(c)(3).

However, the EMCBC dismissal was issued on June 29. The DOL had therefore not yet issued a determination regarding Vander Boegh's complaint. The DOL determination was issued on July 13. I must therefore consider whether under 10 C.F.R. § 708.15(a)(1), Vander Boegh is nevertheless entitled to a consideration of his complaint under Part 708. As I indicated above, that provision allows a complainant whose complaint has been dismissed under "other applicable law" to have his complaint considered under Part 708 if the dismissal was for "lack of jurisdiction."

We obtained a copy of the DOL determination, which was issued by the Atlanta Regional Administrator of the DOL's Occupational Safety and Health Administration (OSHA). In that determination, the OSHA Regional Administrator considered Vander Boegh's complaint that Duratek, Weskem, BJC and DOE retaliated against him (for voicing concerns regarding possible landfill pollution) by blocking his grandfathered rights to continue his employment as landfill manager

---

3/ (...continued)
to Section 708.17(c)(3).

under the new contract with PRS/Duratek. The Regional Administrator took note of Vander Boegh's termination, and found "clear and convincing evidence" there was no retaliation. Specifically, the Regional Administrator determined that from the time that they first formulated their bid for the contract in 2005, until the selection by PRS/Duratek of a new landfill manager, PRS/Duratek always intended to bring in their own landfill manager. I find that this determination does not constitute a dismissal of Vander Boegh's complaint for "lack of jurisdiction." The Regional Administrator fully considers the merits of the complaint and renders a substantive determination regarding the key retaliation raised by Vander Boegh. Accordingly, since he has received a consideration of the merits of his case from DOL, Vander Boegh no longer has the option of having his complaint of retaliation considered pursuant to Section 708.15(a)(1).

Vander Boegh raises other alleged retaliations that were not explicitly considered by DOL. These other retaliations, such as spreading false rumors about him, appear to me to be subsumed into the DOL determination. In any event, I can see no reason to provide any relief for this claim of purported retaliation, which is unsupported and not the type of retaliation against which protection is needed under Part 708.

However, one remaining retaliation raised by Vander Boegh does merit comment: his claim that he was forced to sell his Lockheed Martin stock, and that this was a retaliation for his protected activity. Vander Boegh offers no support for such a contention. He does assert that BJC breached a provision of its contract requiring it to confirm that all participants in the M&I 401(k) plan that held Lockheed Martin stock were required to sell their stock by April 30, 2003, before an automatic liquidation would occur. Vander Boegh claims that BJC withheld information that not all workers were required to sell their stock. I fail to see how this claim, which bears no meaningful direct relationship to an adverse personnel action against Vander Boegh, constitutes a retaliation under Part 708. Therefore I will deny this aspect of his appeal.

Accordingly, the Vander Boegh complaint was properly dismissed under Section 708.17(c)(3), and he is not entitled to any further review under Section 708.15(a)(1). His appeal should therefore be denied.

IT IS THEREFORE ORDERED THAT:

(1) The Appeal filed by Gary S. Vander Boegh (Case No. TBU-0049) is hereby denied.

(2) This Decision shall become a Final Agency Decision unless a party files a Petition for Secretarial Review with the Office of Hearings and Appeals within 30 days after receiving this decision. 10 C.F.R. § 708.19.

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Appeal

Name of Case:	**John Merwin**
Date of Filing:	**August 30, 2006**
Case Number:	**TBU-0052**

John Merwin (Merwin or the complainant) appeals the dismissal of his May 1, 2006 complaint of retaliation filed under 10 C.F.R. Part 708, the Department of Energy (DOE) Contractor Employee Protection Program. He filed the complaint with the Whistleblower Program Manager (WP Manager) of the DOE's National Nuclear Security Administration Service Center (NNSA/SC), located in Albuquerque, New Mexico. As explained below, the WP Manager's August 14, 2006 dismissal of the complaint should be upheld, and the appeal denied.

I. Background

The complainant is employed by BWXT Pantex, LLC (BWXT), the Management and Operations Contractor at the DOE's Pantex Plant located in Amarillo, Texas. On May 1, 2006, Merwin filed a Complaint of Retaliation with the NNSA/SC WP Manager. In that complaint, he alleged that he had participated in a protected proceeding under Part 708. Specifically, in July 2005, he appeared as a witness in a hearing involving two other Part 708 complaints of retaliation filed by Clint Olson and Curtis Broaddus. *See Clint Olson,* 29 DOE ¶ 87,007 (2005). He claimed that BWXT retaliated against him in a number of ways, all involving the contractor's refusal to certify him under the DOE's Human Reliability Program (HRP). 10 C.F.R. Part 712. In an amendment to the complaint, he included an additional retaliation, contending that BWXT assigned him to work in an unsafe office that was permeated by mold. As relief for these alleged retaliations, Merwin requested that BWXT be directed to (i) approve him for HRP status; (ii) provide him with a position more closely aligned with his skills and abilities; and (iii) raise his salary to the level it was prior to his "initial employment action." He also requested punitive damages for pain and suffering, attorney fees, a letter of apology and

assurances that no additional adverse employment actions will be taken against him during his tenure of employment at Pantex.

In the August 14, 2006 dismissal letter, the WP Manager determined that the complaint should be dismissed for the following reasons. With respect to the HRP claim, the WP Manager found that in a July 7, 2006 letter, the complainant had withdrawn the request for reinstatement into the program. The WP manager therefore determined that the entire HRP claim had been withdrawn. Further, the WP Manager determined that a complaint of retaliation based on the HRP falls outside the scope of Part 708, since HRP is a "requirement of the Department of Energy which provides its own administrative process for resolution."

With respect to Merwin's claim that he was assigned to a moldy office, the WP Manager noted that BWXT moved him to an acceptable office "within a relatively short period of time." The WP Manager therefore found that this aspect of the complaint had been "rendered moot by these subsequent events." She therefore determined that this aspect of Merwin's complaint should be dismissed pursuant to 10 C.F.R. § 708.17(c)(5). [1]

Based on the above findings the WP Manager dismissed the complaint.

Pursuant to 10 C.F.R. § 708.18(a), Merwin filed the instant appeal with the Office of Hearings and Appeals. In that appeal, Merwin again claims that BWXT (i) used the HRP as a "retaliatory tool" against him; and (ii) retaliated against him by failing to accept his physician's recommendations that he be moved to a "mold free environment" and that this refusal was deliberate since BWXT was aware of his medical condition. He also asserts that BWXT retaliated against him by moving his office nine times in eight months, by refusing to produce environmental testing results on his health request/accommodation issues; and by "using performance appraisals and merit increases against him."

1/ This Section provides that dismissal for lack of jurisdiction or other good cause is appropriate if "the issues presented in your complaint have been rendered moot by subsequent events or substantially resolved."

II. Analysis

A. HRP Program

As the WP Manager noted, in a July 7 2006 letter Merwin's attorney appeared to withdraw his claim regarding Merwin's HRP status. This should end the issue of review of the HRP matter in this case. However, given that it reappears in his appeal, I will revisit the issue, if only to repeat what is already part of the record. As we stated in a June 23, 2006 letter to Merwin's attorney, the remedy for challenging an erroneous denial of HRP status does not lie within Part 708, but rather within Part 712, which provides a mechanism for review of denial of HRP certification. 10 C.F.R. §§ 712.14-23. Thus, as a rule, we will not make a determination regarding denial of HRP status involving purported retaliation in the context of a Part 708 proceeding.

However, if Merwin can establish that BWXT has not followed its normal procedures in determining whether to submit his name to the DOE for HRP status, this could fall within the realm of a Part 708 retaliation. For example, Merwin seems to suggest that BWXT has required him to undergo many psychological tests in connection with his HRP application. Therefore, Merwin could file a fully developed complaint of retaliation, demonstrating that BWXT used unfair or unusual procedures in requiring those tests before deciding whether to submit him for HRP status, or that BWXT unfairly determined that the tests indicated that he should not be put forward to the DOE for HRP status. In such a case, we could, if otherwise appropriate and subject to other Part 708 jurisdictional limitations, direct BWXT to follow its normal procedures and submit Merwin for HRP consideration. If the DOE then rejected Merwin's application, he would be limited to Part 712 in the type of review he could seek. Part 708 would not be available to him if the DOE rejected his HRP certification.

However, I note in the record of this case that in 2003-2004 Merwin required accommodation under the Americans with Disabilities Act for headaches and associated cognitive and memory difficulties. He required treatment and medication for these conditions. Under these circumstances, BWXT does not seem at all unreasonable in requiring that Merwin undergo appropriate testing to assure that his cognitive functioning has been restored to normal. Thus, the record does not suggest at this point that BWXT has acted inappropriately or in a retaliatory manner. Quite the contrary, by requesting that Merwin submit to testing, BWXT appears to have been acting with due diligence.

Accordingly, the WP Manager's determination regarding Merwin's HRP status should be sustained.

B. Unhealthy Office

I see no Part 708 retaliation with respect to Merwin's claim that BWXT situated him in an unhealthy office. As stated above, the WP Manager indicated that BWXT had moved the complainant to a suitable office, and that this aspect of his complaint should therefore be dismissed under Section 708.17(c)(5). I agree. Merwin has indicated that BWXT moved him to an acceptable office within 10 days of the time that it learned that he was experiencing an adverse reaction to his office environment. May 18, 2006 Letter from John Merwin to Timothy Pridmore. While Merwin seems to believe that this 10 day period is too long, I disagree. I find that BWXT acted reasonably, and that 10 days does not constitute an unreasonable length of time to allow BWXT to evaluate Merwin's concern and locate another office for him and the other two affected employees. In fact, I believe that the firm acted in a relatively expeditious manner to accommodate Merwin. I therefore find that the unsafe office allegation, as described by Merwin himself, does not rise to the level of a retaliation. In any event, Merwin has been moved to a new office. Accordingly, this aspect of Merwin's complaint has been substantially resolved, and therefore no jurisdiction exists under which to consider it. 10 C.F.R. § 708.17(c)(5).

C. Other Retaliations

In several filings Merwin has indicated that he has not received proper salary increases or is not being paid at the appropriate salary level. For example, in his amended complaint he asked that BWXT be directed to raise his salary to the level it was prior to his "initial employment action." Strictly speaking, of course, this is stated as a request for relief and not a retaliation. However, taking this in the light most favorable to Merwin, I still see no adverse action that qualifies as a retaliation under Merwin's current Part 708 complaint. By "initial employment action" Merwin appears to be referring to the fact that in April 2003 he was terminated by BWXT. He took this matter to the Texas Commission on Human Rights, claiming that BWXT discriminated against him because of a disability, in violation of the Americans with Disabilities Act. The matter was settled in April 2004, and Merwin was reinstated, but apparently to a different position at a lower salary. *See*, BWXT June 1, 2006 Response, Exhibit 4, BWXT Pantex Employee History Profile. If Merwin is seeking a salary increase

based on this settlement agreement, it is not cognizable under his current Part 708 claim of retaliation. His alleged protected activity took place in 2005, long after the 2004 reduction in salary due to the settlement. Accordingly, the salary reduction cannot be considered a retaliation for protected activity.

Merwin indicates in his appeal that BWXT has retaliated against him by "using performance appraisals and merit increases against him." On its face, this assertion is too vague to form the foundation of a claim of retaliation. If by this Merwin means that he has received reduced salary increases and lowered performance appraisals, he should so state. Further, he should show that these personnel actions took place after he participated in the protected proceeding, rather than being associated with disability action discussed above. The record before us at this point does not indicate that Merwin's salary increases or performance ratings were reduced after he participated in the protected proceeding. In fact, it appears that the salary increases and ratings he has received since his participation in the Part 708 hearing have not been reduced. As stated above, the reduction in salary took place in 2004, after his reinstatement in connection with his 2004 disability settlement agreement, and not after his Part 708 protected activity. *See* Exhibit 4, BWXT Pantex Employee History File. If Merwin believes that his salary increases were reduced and his performance appraisals were lowered after his appearance in the Part 708 proceeding, he should file another Part 708 complaint of retaliation documenting this matter. This would, of course, be a new complaint and therefore subject to the filing and jurisdictional limitations of Part 708. *E.g.,* 10 C.F.R. §§ 708.14; 708.17.

Further, I find that Merwin's assertion that BWXT failed to provide environmental testing results has now been resolved, given the fact that Merwin has been moved to a new office. 10 C.F.R. § 708.17(c)(5). Finally, Merwin's allegation that his office was moved nine times in eight months, with nothing more, hardly rises to the level of a serious Part 708 retaliation. It should be dismissed under Section 708.17(c)(4) as frivolous.

As indicated by the above discussion, I find that the NNSA/SC dismissal was correct and that the Merwin appeal should be denied.

IT IS THEREFORE ORDERED THAT:

The Appeal filed by John Merwin (Case No. TBU-0052) is hereby denied.

George B. Breznay
Director
Office of Hearings and Appeals

Date: September 19, 2006

October 12, 2006

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Appeal

Name of Case: **Felecia Broaddus**

Date of Filing: **September 15, 2006**

Case Number: **TBU-0053**

Felecia Broaddus (Broaddus or the complainant) appeals the dismissal of her July 18, 2006 complaint of retaliation filed under 10 C.F.R. Part 708, the Department of Energy (DOE) Contractor Employee Protection Program. She filed the complaint with the Whistleblower Program Manager (WP Manager) of the DOE's National Nuclear Security Administration Service Center (NNSA/SC), located in Albuquerque, New Mexico. As explained below, the WP Manager's August 28, 2006 dismissal of the complaint should be upheld, and the appeal denied.

I. Background

Broaddus is employed by BWXT Pantex, LLC (BWXT), the Management and Operations Contractor at the DOE's Pantex Plant located in Amarillo, Texas. On July 18, 2006, she filed a Complaint of Retaliation with the NNSA/SC WP Manager. In that complaint, she alleged that she had made disclosures that are protected under Part 708. Broaddus believes that her alleged revelations are protected pursuant to Section 708.5(a)(1), which covers disclosures that reveal "a substantial violation of a law, rule or regulation." She claims that BWXT retaliated against her for making those disclosures.

A. Disclosures

1. Testimony at Part 710 Hearing

Broaddus states that in June 2005, she appeared as a witness in a hearing held pursuant to 10 C.F.R. Part 710. Hearings under that Part consider whether an individual is eligible to hold a DOE access authorization. The complainant states that her husband was the subject in that hearing, during which she gave testimony. Broaddus contends that the statements she made at this hearing disclosed

significant violations of law, policy and regulation committed by both BWXT and DOE/NNSA, and that they are therefore protected.

2. Disclosures to Human Reliability Program Team

Broaddus claims that in March 2006, she provided evidence to a team investigating the Human Reliability Program (HRP) at Pantex. She claims that she disclosed that BWXT was improperly administering the HRP program, and believes that providing such information is a disclosure of a violation of law, rule or regulation.

3. Disclosures Regarding Department Manager

The complainant states that on May 23, 2006, she told the BWXT employee concerns office about a "relationship" between one of her co-workers and her Department Manager. She stated that the co-worker was being given minimal assignments, while Broaddus herself was given more assignments, and further that this co-worker was being paid more than Broaddus herself.

4. Disclosure Regarding Unequal Pay Act

Broaddus states that in January 2006, she reported an inequity involving her own pay to the BWXT employee concerns office, and she believes that the inequity violates a law, the "Equal Pay Act."

5. Disclosure of Unsafe Working Conditions

Broaddus claims that on July 14, 2005, she was "accosted" by a co-worker. She asserts that she reported this unsafe work environment to her supervisor and to the Pantex employee concerns office. [1]

B. Retaliations

Broaddus claims that BWXT retaliated against her in the following ways. First, she alleges that she was involuntarily reassigned in July 2003, and again on January 10, 2005. She claims that in this latter position she was paid less than other employees in her department. In this regard, she states she was told when she was assigned to her new work group in 2005, that her pay would be

---

1/ She does not provide the date on which this disclosure was made. However, I will assume for purposes of this determination that she reported the incident on the day that it occurred.

commensurate with that of the others in the group. She believes her pay was never brought to the appropriate level.

Broaddus also claims that in November 2004, BWXT retaliated against her by giving her a performance appraisal which included evaluation for activities with which she was not involved. Broaddus also believes that as a retaliation for her protected disclosures, Pantex employees told lies about her at the Part 710 hearing. Finally, Broaddus claims that in retaliation for reporting the co-worker/department manager "relationship" and the pay/work inequity, her department manager and her second line supervisor falsely accused her of taking extended lunch breaks.

C. WP Manager's Determination

In the August 28, 2006 dismissal letter, the WP Manager determined that the complaint should be dismissed. The WP Manager found two "arguably protected" disclosures: Broaddus' June 2005 statements at a Part 710 hearing; and the information that she provided to the DOE HRP inspection team on March 14, 2006.

In considering these two disclosures, the WP Manager found that the two reassignments about which Broaddus complained took place before her alleged protected activities, and could therefore not be considered Part 708 retaliations. Regarding the claim that some of the testimony given at the Part 710 hearing was false, the WP Manager found that this was not reviewable under Part 708, and further that it was untimely. The WP manager found that Broaddus' assertion that she was retaliated against for disclosure of the unsafe workplace condition was untimely, since it was filed nearly a full year after the incident took place. She further found that the claim was vague and did not appear to be connected to any matter associated with her participation in the Part 710 hearing. The WP Manager determined that Broaddus' disclosure concerning the Equal Pay Act was not a matter within the purview of Part 708. The WP manager also found that BWXT had no motive to retaliate against Broaddus.

Based on the above findings the WP Manager dismissed the complaint.

Pursuant to 10 C.F.R. § 708.18(a), Broaddus filed the instant appeal with the Office of Hearings and Appeals. In that appeal, Broaddus (i) claims that the WP Manager's finding that BWXT had no motive to retaliate against her was improper and that this issue should be addressed at a hearing; (ii) contends that the claim of an unsafe work environment was a protected disclosure; (iii) reiterates her

claim that she was forced into her current job as a retaliation, and that but for her protected disclosures she would not have been transferred multiple times, and (iv) claims that in her current position, her salary is approximately one-half of the salary being paid to a man with a similar position and that she has a substantially higher workload than others in her department.

II. Analysis

A. Retaliations

As stated above, Broaddus claims that she was involuntarily reassigned in 2003, and again on January 10, 2005. She also objects to a 2004 performance appraisal. These are obviously not retaliations for her testimony at the June 2005 Part 710 hearing or for the March 2006 HRP "revelations," since they preceded those alleged disclosures. Her claims that in the position to which she was assigned in 2005, her pay is less than that of another worker and her workload is greater are too vague to rise to the level of a Part 708 retaliation. There is no allegation or evidence that the pay and workload matters arose after a protected disclosure. In fact, her claim of unequal pay seems to be a continuing one: her belief that since her 2005 reassignment, she has not been payed at the appropriate level. No new evidence of any additional pay disparity arising after her protected disclosures has been alleged.

Broaddus' allegations that Pantex employees told lies about her at the Part 710 hearing are frivolous. I see no retaliation. I reach a similar conclusion regarding her claim that in response to reporting a relationship between a co-worker and a manager and some pay/work inequity, she was falsely accused of taking extended lunch breaks. 10 C.F.R. § 708.17(c)(4).

B. Disclosure of an unsafe work place

Disclosures concerning an unsafe work environment are entitled to protection under 10 C.F.R. § 708.5(a)(1) and (2). Broaddus claims that she disclosed that a co-worker assaulted her. In this regard, Broaddus asserts that BWXT failed to take any action to report the "assault" to law enforcement agencies, or correct the behavior of the employee involved. She seems to believe that this "failure" on the part of the contractor is a retaliation. I do not agree. Part 708 covers adverse personnel actions taken by a contractor against the employee who made a disclosure. 10 C.F.R. § 708.2. The purported failure of BWXT to punish another employee cannot be considered a Part 708 retaliation against Broaddus. It is not an

adverse personnel action against her. I fail to see a Part 708 retaliation that took place after the disclosure of the unsafe workplace. Therefore, Broaddus' allegation regarding the unsafe workplace must be dismissed.

C. BWXT Motive to Retaliate

Broaddus objects to the WP manager's finding that BWXT had no motive to retaliate against Broaddus. Broaddus believes that this finding was improper and should be addressed at a hearing. I agree that this determination was prematurely made, and that if I had found that there were a reason to overturn the dismissal, the WP Manager's finding regarding motive to retaliate would not be sustained. This type of determination is one that should be based on a full airing of all facts and circumstances, and not on untested assertions by the parties. However, given the fact that, as discussed above, I find no Part 708 retaliations, I see no harm in this error.

D. Timeliness

Part 708 requires that complaints be filed within 90 days of the date that the complainant knew or reasonably should have known of the alleged retaliation. 10 C.F.R. § 708.14(a). BWXT claims the Broaddus complaint was untimely filed, although it points to no specific events or retaliation from which to measure the filing of the complaint. Broaddus argues that the complaint was timely, because additional time beyond the 90 days is permitted to resolve a dispute through an internal company grievance-arbitration procedure. The parties' arguments regarding timeliness need not be given any further review. Ultimately, this issue is irrelevant because, as discussed above, I see no BWXT retaliation in this case.

As indicated by the above discussion, I find that the NNSA/SC dismissal was correct and that the Broaddus appeal should be denied.

IT IS THEREFORE ORDERED THAT:

The Appeal filed by Felecia Broaddus (Case No. TBU-0053) is hereby denied.

George B. Breznay
Director
Office of Hearings and Appeals

Date: October 12, 2006

December 19, 2006

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Appeal

Name of Case:	**Donald R. Rhodes**
Date of Filing:	**December 8, 2006**
Case Number:	**TBU-0058**

Donald R. Rhodes (Rhodes or the complainant) appeals the dismissal of his August 25, 2006 complaint of retaliation filed under 10 C.F.R. Part 708, the Department of Energy (DOE) Contractor Employee Protection Program. He filed the complaint with the Whistleblower Program Manager (WP Manager) of the DOE's National Nuclear Security Administration Service Center (NNSA/SC), located in Albuquerque, New Mexico. As explained below, the WP Manager's November 16, 2006 dismissal of the complaint should be upheld, and the appeal denied.

I. Background

The complainant is employed by the DOE's Sandia National Laboratories (SNL) located in Albuquerque, New Mexico. On August 25, 2006, Rhodes filed a Complaint of Retaliation with the NNSA/SC WP Manager. In that complaint, he alleged that his supervisor directed him to change his time card estimation of time spent on his various work projects by rounding from 20 minute intervals to 30 minute intervals. [1] Believing that this change would not reflect the correct amount of time spent, Rhodes refused to make this amendment. After several such refusals, his employer eventually suspended him for one day, as a punishment for insubordination. [2]

In the November 16, 2006 dismissal letter, the WP Manager determined that the complaint should be dismissed because Rhodes' refusal to make the time card changes was an internal dispute between him and SNL, and not a protected disclosure under Part 708. The WP Manager

---

1/ According to SNL, the 30 minute estimation period is the standard practice for this work group.

2/ The complainant later made the correction as directed and returned to work.

further determined that the complainant's refusal to change his time card did not constitute a refusal to participate in an activity protected by Part 708. In this regard, the WP Manager stated that Rhodes' refusal to follow his supervisor's instructions is not "a refusal to participate in an activity that would constitute a violation of federal health or safety law, or put you in reasonable fear of serious injury to yourself or others." [3]

Based on the above findings the WP Manager dismissed the complaint.

Pursuant to 10 C.F.R. § 708.18(a), Rhodes filed the instant appeal with the Office of Hearings and Appeals. In that appeal, Rhodes again claims that the one-day suspension was a retaliation by SNL because he refused to engage in fraudulent time-card amendment.

II. Analysis

The issue in this case is whether Rhodes' refusal to adjust his time cards as his supervisor directed constitutes an activity or disclosure protected under Part 708. As discussed below, I find it does not.

A. Refusal to Participate

As the WP Manager noted, Rhodes' refusal to correct his time card as directed by his supervisor does not amount to a "refusal to participate" under Part 708. Section 708.5 describes the types of "refusals to participate" that are protected. Such refusals are limited to activities, policies or practices that an individual believes would "(1) constitute a violation of a federal health or safety law; or (2) cause [the individual] to have a reasonable fear of serious injury to [himself], other employees or members of the public." 10 C.F.R. §708.5(c). It is quite obvious that there is no health or safety concern or fear of serious injury at issue in connection with adjusting a time card. Accordingly, Section 708.5(c) is not applicable in this case.

3/ The WP Manager stated that an additional basis for dismissal of the claim was the complainant's failure to exhaust grievance and arbitration procedures as required by his union's collective bargaining agreement. 10 C.F.R. § 708.13. I need not reach this issue in order to arrive at a dispositive result in this case.

B. Claim of Protected Disclosure of Fraud

I see no Part 708 protected disclosure with respect to Rhodes' purported revelation to his supervisor that changing the estimate of time spent on a task would amount to "time card fraud." On its face, SNL's policy of estimates of time spent on job projects rounded to 30 minute intervals rather than 20 minute intervals does not appear to be unreasonable or designed to result in fraud or overbilling. Rhodes has certainly not made any case for such a conclusion. In any event, the change that his supervisor asked him to make, to provide estimates rounded to 30 minute intervals rather than 20 minute intervals, is de minimis. Whether to estimate time spent on projects in 20 minute or 30 minute intervals is such a small matter so as not to rise to the level of fraud under Part 708, nor is the complainant's disclosure significant enough to warrant protection under Part 708.

As indicated by the above discussion, I find that the NNSA/SC dismissal was correct and that the Rhodes appeal should be denied.

IT IS THEREFORE ORDERED THAT:

The Appeal filed by Donald R. Rhodes (Case No. TBU-0058) is hereby denied.

George B. Breznay
Director
Office of Hearings and Appeals

Date: December 19, 2006

March 22, 2007

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Appeal

Name of Case: **Misti Wall**

Date of Filing: **February 15, 2007**

Case Number: **TBU-0061**

Misti Wall (the complainant or Wall), appeals the dismissal of her complaint of retaliation filed under 10 C.F.R. Part 708, the Department of Energy (DOE) Contractor Employee Protection Program. As explained below, the dismissal of the complaint should be reversed and the matter remanded for further processing to the Whistleblower Program Manager (Manager) at the National Nuclear Security Administration Service Center (NNSA).

I. Background

The complainant was an employee with Sandia Corporation (Sandia), a DOE contractor that runs Sandia National Laboratories (SNL), located in Albuquerque, New Mexico. Pursuant to Part 708, she filed a complaint of retaliation against Sandia with the NNSA. In her complaint, she stated that in October and November 2005 she disclosed to Sandia managers that her newly-hired supervisor was involved in a situation that indicates a conflict of interest in performing the supervisor's official Sandia duties. The complainant noted that this supervisor was hired to be the manager in Business, Leadership, Management and Development (BLMD) at SNL and that the supervisor's own company, LTD Unlimited (LTD), was a contractor of SNL, providing services to BLMD. Among the specific actions representing conflicts that the complainant cited were the following. The supervisor: (i) asked BLMD employees whom she managed to contact LTD so LTD (under the direction of the supervisor's daughter) could continue to provide services for BLMD; (ii) talked to BLMD employees about contacting and setting up appointments with her daughter regarding LTD's providing services for BLMD; (iii) talked to BLMD employees whom she managed about circumventing the Sandia Procurement process to continue contracting with LTD; and (iv) remained "a partner" of LTD.

On February 16, 2006, the complainant was terminated from her position at Sandia. On April 5, 2006, she contacted the Manager regarding this alleged retaliation. On April 7, at the complainant's request, the matter was held in abeyance pending consideration of the termination issue by the New Mexico Human Rights Division. This matter was dismissed by the New Mexico Human Rights Division, and on October 10, 2006, Wall filed a Part 708 complaint of retaliation with the Manager.

In the complaint, Wall claimed that she was terminated in retaliation for making protected disclosures regarding the supervisor's conflict of interest. She stated that the conflicts violated Sandia's Corporate Business Rule CPR001.2.3. This rule sets out Sandia's procedures for addressing employee conflicts of interest. In relevant part, it provides that employees must disclose conflicts of interest within 30 days of their hire date. CPR Section 3.2. It also provides for development of plans to mitigate any "actual, perceived or potential conflict of interest. . . . " CPR Section 3.1.

On January 31, 2007, the Manager dismissed the complaint "for lack of jurisdiction." The Manager stated as the basis for this finding that the complainant had failed to show that she had made a disclosure that is protected under Part 708. In this regard, the Manager stated that the disclosure that the complainant's supervisor might have a conflict of interest in performing her Sandia duties does not constitute a "(1) revelation of a substantial violation of law, (2) a substantial and specific danger to employees to public health or safety, or (3) fraud, gross mismanagement, gross waste of funds or abuse of authority." Specifically, the Manager found that the complainant's statement that Sandia's Corporate Business Rule was being violated by her supervisor is not sufficient to demonstrate a violation of law within the meaning of Part 708.

The Manager also noted that Sandia had responded to the complaint by asserting that it had taken steps to mitigate the conflict of interest problems and that Wall's termination was unrelated to the disclosures. In this regard, the Manager also found that the disclosures were not protected because the individuals to whom they were made were already aware of the supervisor's conflict of interest. On this basis, the Manager concluded that the complaint should be dismissed for lack of jurisdiction, citing to 10 C.F.R. § 708.17. On February 15, 2007, the complainant filed the instant appeal of that dismissal with the Office of Hearings and Appeals (OHA). 10 C.F.R. § 708.18.

II. Analysis

Under Part 708, a DOE office may dismiss a whistleblower complaint for lack of jurisdiction if the facts do not present issues for which relief can be granted under Part 708, or the complaint is frivolous or without merit on its face. 10 C.F.R. §708.17(c)(2) and (4). After reviewing the record in this case, I find that the grounds for dismissal cited by the Manager did not comply with that provision. In my view, the Complaint is neither frivolous or without merit on its face, nor does it present issues for which relief cannot be granted.

In her dismissal letter, the Manager asserted that the complainant's conflict of interest disclosures "do not divulge a problem that Ms. Wall could reasonably believe 'reveals (1) substantial violation of law, (2) a substantial and specific danger to employee or to public health or safety, or (3) fraud, gross mismanagement, gross waste of funds, or abuse of authority.' At most her 'disclosures' reveal her belief that Sandia's own policies were being violated by her supervisor." [1]

The record does not support this conclusion. The complainant raised a specific potential conflict of interest situation and cited what she believed was a valid rule that was violated. In view of the matters alleged by the complainant, that the supervisor encouraged subordinates to award contracts to a firm operated by her daughter and where the supervisor remained partner, it appears that there was ample evidence to support a reasonable belief by Wall that Sandia's conflicts rule was being violated. However, even if she was incorrect that this particular rule was violated, I do not believe that this constitutes an appropriate basis for dismissal under Section 708.17(c)(2) or (4). Part 708 does not require that the complainant specify in her complaint the precise law, rule or regulation that was violated. 10 C.F.R. §708.12. In this regard, at this very early stage of a Part 708 proceeding, it is often difficult for a whistleblower to determine and cite the precise laws or rules that might apply to the actions she is describing. To require a whistleblower to include that type of detailed legal analysis in her complaint would subvert the purposes of Part 708. Thus, even though Wall may be unable to ascertain all

---

1/ The Manager truncated her quotation of Section 708.5(a)(1), which extends protected status to disclosures that reveal "a substantial violation of a law, *rule, or regulation*." 10 C.F.R. § 708.5(a)(1) (emphasis supplied).

the specific violations of law, rule or regulation that might exist here, the facts thus far suggest that the complainant could have reasonably believed that the apparent conflict of interest violated a law, rule, or regulation.

The showing of which provisions of Section 708.5 are applicable often becomes clearer as the proceeding develops through the investigation and hearing stages. Therefore, it is inappropriate to dismiss the claim at this point, when the complainant's limited knowledge of the facts and law are not sufficiently refined to permit her to specify all the laws, rules and/or regulations that she believes have been violated by the information she has disclosed, as well as violations of other provisions of Section 708.5.

Thus, dismissal of the complaint because it does not cite an applicable law, rule or regulation at this early stage is premature. It is obvious that conflict of interest laws, rules and regulations do exist. The mere fact that Sandia has put into place CPR001.2.3, which sets forth its own requirements for disclosing and mitigating conflicts of interest, supports that position.

As stated above, Section 708.5(a)(1) does require, however, that the violation of the law, rule or regulation be a "substantial" one. The conflict of interest issue raised by the complainant meets that standard. In my opinion, the complainant's disclosures concerning her supervisor's alleged promotion of her personal business interests in the context of her SNL position raise a matter of substantial importance. I believe that the alleged conflict of interest could significantly impact the supervisor's objectivity in performing her Sandia functions. It is a well-recognized principle that individuals involved in administering contracts should not have a financial interest in the firms providing services. [2]

2/ The disclosures made by Wall also could raise issues of fraud, gross mismanagement, gross waste of funds or abuse of authority under Section 708.5(a)(3). In this regard, the supervisor could certainly exert undue influence on her BLMD employees in order to promote LTD. Although the complainant did not allege mismanagement, fraud or abuse, she has made allegations that the supervisor did attempt to influence Sandia employees to favorably consider her firm.

The Manager also found as a further basis for rejecting the complaint that the individuals to whom complainant made her disclosures were already aware of the potential conflict and had taken steps to mitigate its effect. In this regard, the Manager appears to rely on Sandia's Motion to Dismiss the Complaint. In that Motion, Sandia claims that it was aware at the time it hired the supervisor that she was involved in LTD, and that her firm was providing services to Sandia. Sandia claims that since it was well aware of the entire situation, no conflict of interest could occur and, in fact, it informed Wall that a mitigation plan was in place.

I find Sandia's argument unpersuasive, and the Manager's conclusion premature. The record in this case indicates that the complainant made a disclosure regarding the conflict of interest matter on October 25, 2005, one day after the supervisor was hired. The complaint further indicates that Wall also disclosed information about a conflict of interest regarding the supervisor on October 31, November 1, 2, 4, and 16. The record also shows that the supervisor signed a "Personal Conflict of Interest Questionnaire for Sandia Corporation Employees" on November 27, 2005, and she signed a mitigation plan on November 29, 2005. These documents therefore seem to have been put into place weeks after the complainant first raised her conflict of interest concerns. Accordingly, even if Sandia was aware of the potential conflict, the record at this point does not clearly demonstrate that Sandia had already taken care of the problem at the time the individual first raised it in October 2005.

Moreover, as stated above, Sandia CPR 1.2.3 provides that all employees are required to complete a "Personnel Conflict of Interest Questionnaire" within 30 days of their hire date. As indicated previously, the supervisor's "hire date" is October 24, 2005. The record further indicates that on November 27, the supervisor filled out a form disclosing the conflict of interest. Sandia Motion to Dismiss, Exhibit 2. Thus, the Sandia 30-day conflict of interest provisions were not strictly adhered to here. The implication by Sandia that at the time the complainant made her initial disclosure on October 25, company personnel that she spoke to were already aware of the possible conflict of interest and had taken steps to mitigate the concern, is not supported by the record thus far. [3]

3/ In any event, we do not believe that the fact that disclosures are made to officials who are already aware of the potential conflict of interest necessarily means that the disclosures

(continued...)

A resolution of the parties' competing assertions concerning the legitimacy of the alleged conflict of interest concerns is beyond the scope of this initial stage of the proceedings. As stated above, in the present context, Section 708.17 permits a program manager to dismiss a Part 708 complaint if the allegations set forth in the complaint fail to allege a non-frivolous claim for which relief can be granted under Part 708. In the subject case, however, the parties' conflicting claims concerning whether or not the complaint presents a disclosure protected under Section 708.5, is not susceptible to summary resolution under Section 708.17. On the basis of the present limited record, we cannot say that the allegations in the complaint that the complainant suffered retaliation for making a protected disclosure are either plainly frivolous or without merit, or, if ultimately proven, would not support relief under Part 708. *William Cor*, 29 DOE ¶ 87,016 (2006) at 89,072.

I find that the claims raised here present issues for which relief can be granted and which are not frivolous. Accordingly, I find that the dismissal by the Manager was incorrect, and that the complaint should be accepted for further processing.

This decision and order has been reviewed by the National Nuclear Security Administration (NNSA), which has determined that the decision and order shall be implemented by the affected NNSA element, official or employee.

IT IS THEREFORE ORDERED THAT:

The Appeal filed by Misti Wall (Case No. TBU-0061) is hereby granted and her Part 708 complaint is hereby remanded to the Employee Concerns Program Manager, NNSA Service Center, for further processing as set forth above.

Fred L. Brown

are not protected under Part 708 where, as here, the complainant additionally disclosed specific incidents of improper conduct by the supervisor that were apparently unknown to Sandia management.

March 13, 2007

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Appeal

Name of Case: **Fredrick Abbott**

Date of Filing: **February 21, 2007**

Case Number: **TBU-0062**

Fredrick Abbott (the complainant or Abbott), appeals the dismissal of his complaint of retaliation filed under 10 C.F.R. Part 708, the Department of Energy (DOE) Contractor Employee Protection Program. As explained below, I have determined that the dismissal of the complaint should be sustained and the appeal denied.

I. Background

The complainant is an employee with Washington Savannah River Company (WSRC), which operates the DOE's Savannah River site located in Aiken, South Carolina. Pursuant to Part 708, on April 13, 2006, he filed a complaint of retaliation against WSRC with the DOE's Savannah River Operations Office. In his complaint, he describes two incidents of alleged retaliation for purported protected disclosures, one in 2004 and the other in 2006.

The 2004 Alleged Retaliation

The complainant stated that in May 2004 he made disclosures to his employer that involved violations of safety procedures, and thereafter received an unjustly low performance review. He therefore filed a grievance against his employer. According to his complaint, this matter was investigated by the WSRC employee concerns program, and thereafter he was asked what relief he would like to resolve this matter. The complainant indicates that he requested the following remedy to resolve this grievance: (1) that he be transferred to a position not directly supervised by the management involved in the disclosure matter; (2) that he be given a fair performance evaluation that correctly reflected his work; and (3) that since the original performance rating was tied to an incentive bonus, that he be given the incentive bonus that equated to his revised rating. The complainant does not believe that all

of these requests were correctly implemented, and the issue was never resolved to his satisfaction. He was dissatisfied with the job transfer that he was given. He indicates that received a "special awards" bonus of $300, which he believes was too low to compensate him fully for his reduced performance rating. Nevertheless, he states that he decided to put this issue behind him in order to minimize the negative effect this "event" could have on his career.

The 2006 Alleged Retaliation

The complainant indicates that on January 15, 2006, he received his "Personal Assessment and Development Process" (PADP) and his "Non-exempt Evaluation Program" (NEEP) rating. He states that the PADP praised him, but the NEEP gave him only an average rating, and that WSRC management could not explain the inconsistency. Based on this purportedly improperly low NEEP rating, Abbott filed his Part 708 complaint. He believed that the low NEEP rating indicated a pattern of retaliation for the 2004 disclosures.

On February 7, 2007, the Acting Director, Office of Civil Rights, of the DOE's Savannah River Operations Office dismissed the complaint for lack of jurisdiction or other good cause. The Acting Director cited 10 C.F.R. § 708.17(c)(6), which provides in relevant part that dismissal is appropriate if "Your employer has made a formal offer to provide the remedy that you request in your complaint or a remedy that DOE considers to be equivalent to what could be provided as a remedy under this regulation." In this regard, the Acting Director stated that WSRC had made the following offer in settlement of the complaint: (1) to remove and destroy Pages 1 of 2, and 2 of 2 of the "Individual Non-Exempt Evaluation Program (NEEP) Scoring Form," as well as your comments of January 15, 2006, concerning the scoring, from your WSRC Personnel File; (2) to grant you an interview for the next two First Line Manager positions for which you meet the minimum qualifications and request consideration; and (3) to award you $500 (an amount equal to that given to those ranked 1-3 on the Individual NEEP Scoring Form for the Radiological Control Inspectors (RCI) group).

According to the dismissal letter, the complainant rejected this offer and stated that he would accept nothing but his own settlement terms as outlined in an e-mail of January 8, 2007. According to the complainant, these terms are as follows: (1) to remove and destroy pages 1 of 2, and 2 of 2 of the Individual Non-Exempt Evaluation Program (NEEP) Scoring form, as well as my comments of January 15, 2006, concerning the scoring from my WSRC

personnel file; (2) to provide me with a letter signed by WSRC legal counsel stating that the NEEP evaluation was deemed retaliatory, was not representative of my performance, and was removed for cause; and (3) to provide me with a "Special Awards Program" bonus of $3,000 (the maximum amount available under this program). In this regard, the complainant states that in the 2004 grievance proceeding described above, WSRC provided him with a "Special Awards Program" bonus of $300, the minimum bonus under that program. The complainant contends that since WSRC failed to comply with all corrective actions it was supposed to take as a result of the 2004 grievance process, he should now receive a monetary settlement based on the maximum amount available under the "Special Awards Program."

The Acting Director concluded that the complaint should be dismissed for lack of jurisdiction, citing to 10 C.F.R. § 708.17(c)(6). The Acting Director found that the complainant had received an offer of settlement to provide a remedy that DOE considers to be equivalent to what could be provided under Part 708. On February 21, 2007, the complainant filed the instant appeal of that dismissal with the Office of Hearings and Appeals (OHA). 10 C.F.R. § 708.18.

II. Analysis

As indicated above, under Part 708, a DOE office may dismiss a whistleblower complaint for lack of jurisdiction if the employer has made a formal offer to provide the remedy requested in the complaint, or a remedy that DOE considers to be equivalent to what could be provided as a remedy under this regulation. 10 C.F.R. §708.17(c)(6). After reviewing the record in this case, I find that the grounds for dismissal cited by the Acting Director comply with that provision. In my view, the WSRC settlement offer provides the complainant with relief that is equivalent to what he could receive under Part 708. [1]

1/ The complaint states that Abbott is seeking as relief "damages equal to ten percent of Grade 20 base pay (approximate supervisory level compensation), calculated from the time of this event to the earliest date that I am eligible for full retirement benefits." The complainant has requested relief here which he could not receive in any event under Part 708. With respect to monetary relief, Section 708.36 provides that a complainant is eligible for back pay and reasonable costs

(continued...)

As noted above, with respect to his 2006 rating, Abbott has complained that his NEEP rating was too low and that as a result he received a reduced NEEP bonus. Therefore, it appears that the relief he could be entitled to here would be removing the low NEEP rating from his personnel file, and awarding him the maximum NEEP bonus available. I will now consider whether WSRC's offer satisfies those elements.

Proposed Relief Item Number 1

Item Number 1 in both settlement offers is identical: removal of the "low" NEEP score from the complainant's personnel file. In this regard, WSRC will also remove some comments from that file. I believe that this relief is the maximum Abbott is entitled to with respect to adjustment of his personnel file, and his NEEP rating. Moreover, there is no disagreement regarding this Item. Accordingly, it merits no further consideration.

Proposed Relief Item Number 2

WSRC Relief Item Number 2 grants Abbott several managerial-level interviews. We do not believe he would necessarily be entitled to such relief in this proceeding. Therefore, this offer therefore goes beyond what WSRC would be required to provide.

Complainant's Relief Item Number 2 asks that WSRC be required to provide him with a letter signed by WSRC legal counsel stating that the NEEP evaluation was deemed retaliatory, was not representative of his performance, and was removed for cause. The complainant is not entitled to this type of relief. Relief granted under Section 708.36 does not extend to directing DOE contractors to admit to any violations of Part 708 or other rules, or sanctioning of contractors for violating Part 708. They are simply required to make a complainant whole. Accordingly, even if Abbott had prevailed in a Part 708 proceeding, an OHA hearing officer would not have granted his request to order WSRC to admit that the NEEP evaluation was deemed retaliatory, and that it was removed from the complainant's personnel file for cause.

1/ (...continued)
and expenses. The complainant's request for "damages" not tied to any specific monetary losses or expenses is simply not available under Part 708.

Proposed Relief Item Number 3

In his settlement request, the complainant asked for a $3,000 bonus under the "Special Awards Program." As noted above, he was granted the monetary award of $300 under the "Special Awards Program" as part of a settlement of his 2004 grievance. He now seeks to maximize that bonus as part of his 2006 Part 708 complaint. He is not entitled to do so. As a rule, a complainant may not in 2006 pursue Part 708 relief based on an alleged 2004 retaliation, since Part 708 complaints must be filed within 90 days of the date that the alleged retaliation occurred. 10 C.F.R. § 708.14(a). In this case, that time has long passed.[2] Moreover, as stated above, the complainant has admitted that he elected not to contest the $300 award in 2004 by filing a Part 708 complaint, but instead decided to put that matter behind him. Therefore, we find that he is not permitted to reassert that matter at this point, and attempt to base his relief on the earlier alleged retaliation. The relief that will be considered here relates solely to the 2006 alleged retaliation.

Based on the record, I believe that Item Number 3 of the settlement offer by WSRC represented the monetary remedy that the complainant could be eligible to receive under Part 708 for the 2006 alleged retaliation: $500, the maximum bonus given to those ranked highest under the 2006 NEEP evaluation.

I see no other relief available to the complainant under 10 C.F.R. § 708.36, based on the facts associated with the 2006 purported retaliation. Accordingly, I find that the dismissal by the Acting Director was correct, and that the appeal should be denied.

IT IS THEREFORE ORDERED THAT:

The Appeal filed by Fredrick Abbott (Case No. TBU-0062) is hereby denied.

Fred L. Brown
Acting Director
Office of Hearings and Appeals

Date: March 13, 2007

2/ In this case, there is no evidence that any of the exceptions to the 90 day rule set forth in Section 708.14 are applicable.

May 16, 2007

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Appeal

Name of Case: **Donald E. Searle**

Date of Filing: **May 2, 2007**

Case Number: **TBU-0065**

Donald E. Searle (Searle or the complainant) appeals the dismissal of his complaint of retaliation and request for investigation filed under 10 C.F.R. Part 708, the Department of Energy (DOE) Contractor Employee Protection Program. As explained below, the dismissal of the complaint should be sustained, and the appeal denied.

I. Background

During the period in question in this case, the complainant was an employee of UT-Batelle, LLC (UT-Batelle), the contractor responsible for operating the DOE's Oak Ridge National Laboratory (ORNL). He claimed that in the spring and summer of 2005 he made protected disclosures to his supervisor regarding beryllium handling at his work site. He further indicated that in September 2005 that same supervisor informed him that he was to be laid off. His final day of employment was February 28, 2006. He stated that he was rehired by UT-Batelle on May 15, 2006, although at a reduced salary and pay grade.

On January 4, 2007, Searle filed a complaint of retaliation under Part 708 with the Employee Concerns Manager (EC Manager) of the DOE's Oak Ridge Office. In that complaint, Searle claimed that the February 28, 2006 termination and the May 15, 2006 rehiring at a lower pay level were retaliations for the protected disclosures that he made concerning the beryllium handling. On April 9, 2007, the EC Manager determined that jurisdiction of the complaint should be accepted, and it was forwarded to the Office of Hearings and Appeals (OHA) for investigation. On April 11, 2007, the Office of Hearings and Appeals received Searle's Complaint of Retaliation and Request for Investigation. Pursuant to Section 708.22, an OHA investigator was appointed.

After reviewing the record in this matter, the OHA investigator determined that the complaint and the accompanying request for investigation should be dismissed for failure to file in a timely manner. 10 C.F.R. § 708.17(a). April 17, 2007 Letter of Thomas L. Wieker to Donald E. Searle. I have set out a summary of the investigator's rationale below.

The investigator first noted that Section 708.14(a) provides that a complainant must file his complaint by the 90th day after the date he knew or reasonably should have known of the alleged retaliation. The investigator pointed out that Searle indicated that he first realized that UT-Batelle retaliated against him during the period of his unemployment, between the February 28, 2006 termination and the May 15, 2006 rehiring. *See Undated Letter to Jeff Smith* at 3. Therefore, the OHA investigator stated that the complaint of retaliation under Part 708 should have been filed no later than August 11, 2006.

The OHA investigator also considered whether Searle had good reason for not filing within the 90-day period. 10 C.F.R. § 708.14(d). The investigator reviewed Searle's assertion that UT-Batelle officials offered to resolve his complaint informally and Searle's contention that this suggests that UT-Batelle believed the complaint was valid. Searle claims that UT-Batelle was trying to "stall" these proceedings. The investigator found that this assertion did not provide any valid reason why Searle could not have filed his claim on time. He believed Searle's views as to UT-Batelle's motivations are irrelevant to the issue of whether Searle could have filed on time.

The investigator also considered the complainant's claim that he made complaints to a number of officials regarding this matter, including the "Director of Human Resources," and to the DOE Office of Inspector General (OIG), and that after the issuance of an OIG report on September 9, 2006, he "finally had evidence to support [his] contentions." The investigator rejected this reasoning on the grounds that under Part 708, a complainant is not required to wait until he has "official" evidence in order to file a complaint of retaliation. The investigator noted that the complaint must be filed within 90 days from the date that the employee knew or reasonably should have known of the adverse personnel action in question. Since in this case, the complainant knew by May 15, 2006, of the two adverse personnel actions that he alleged took place, and concluded at that same time that these actions were retaliatory, the investigator could discern no legitimate reason why Searle could not file in a timely manner. In this regard, the

investigator pointed out that even if he accepted the September 9 date as the relevant date, Searle's January 4 filing would still have been untimely, based on the 90-day filing period.

Finally, the investigator considered the complainant's contention that he was unaware of the existence of the Office of Employee Concerns, and, by implication the Part 708 process, until he again contacted the OIG in January 2007. The investigator found that the fact that Searle may not have learned of the existence of Part 708 protections until many months after his termination is simply not a sufficient excuse for the late filing, and does not constitute a good reason to accept the untimely submission. Individuals are generally expected to know and understand their rights and obligations under applicable DOE regulations. *Caroline Roberts*, Case No. TBU-0040 (February 23, 2006).

Based on the above considerations, the investigator concluded that the EC Manager incorrectly determined that jurisdiction should be accepted for further processing and investigation by the Office of Hearings and Appeals. He therefore reversed the EC Manager's decision and dismissed the complaint. However, the investigator stated that Searle could request that the Acting Director OHA review this finding. See 10 C.F.R. §708.18. On May 2, Searle filed a request seeking a reversal of the investigator's determination. He also submitted a letter dated April 25, in which he offered several additional contentions regarding why his complaint of retaliation should be accepted. I consider below Searle's response to the investigator's letter and the assertions raised in the April 25 letter.

II. Searle's Arguments Regarding Why His Complaint Should Be Accepted In Spite of Its Untimeliness

A. Searle's Response to the Investigator's Letter

The complainant asserts that on September 26, 2007, he revealed to Jeff Smith, Deputy Director of ORNL the essence of the retaliation that is under consideration here. Searle's undated letter to Mr. Smith documenting their meeting is part of the file in this case. However, the letter cannot stand as an acceptable substitute for filing a complaint of retaliation with the EC Manager, as required by Section 708.10. Moreover, even if it were considered to be such a complaint, it was filed after the 90-day period since he was terminated and rehired.

Searle points to Section 708.14(b), which provides that the "time period for filing a complaint does not include time spent attempting to resolve the dispute through an internal company grievance-arbitration procedure." Searle argues that his discussion with Mr. Smith should be considered an attempt to resolve this dispute informally, and therefore falls within Section 708.14. This is incorrect. The term "grievance-arbitration procedure" used in the context of Part 708 has a specialized meaning related to procedures negotiated by employees and management under labor agreements. *Darryl H. Shadel*, 27 DOE ¶ 87,561 (2000). See also 64 Fed. Reg. 12862 at 12868 (March 15, 1999). The time frames set forth in Section 708.14 simply do not apply to informal discussions by an employee to resolve an alleged retaliation with his contractor employer.

Searle next argues that the DOE should be interested in investigating the fact that his supervisor, whom he characterizes as unqualified and vindictive, was given a position by UT-Batelle. He reiterates the importance and the "gravity" of his disclosure regarding beryllium safety, and DOE's purported indifference to that disclosure. He claims that he came to believe that he was being silenced by UT-Batelle personnel. He believes that the Office of Inspector General (OIG) should have the opportunity to investigate this entire matter.

As an initial matter, as Searle has previously indicated, the OIG has already investigated the issue of the ORNL's handling of beryllium. *Beryllium Controls At The Oak Ridge National Laboratory*, September 2006, DOE/IG-0737. Thus, Searle's concerns about the overall viability or possibility of an OIG investigation are unfounded. The OIG, a separate entity from OHA, does not perform its responsibilities pursuant to the limitations of Part 708. The OIG is certainly free to investigate further whether a DOE contractor acted improperly or irresponsibly, apart from any determination OHA reaches in this Part 708 proceeding. In fact, the OHA's investigation of Searle's complaint would not reach the issue of whether UT-Batelle, his contractor employer, actually acted inappropriately in its handling of beryllium. With respect to UT-Batelle's actions, our focus under Part 708 would involve only the issue of whether the personnel actions cited by Searle were retaliatory and violated Part 708 prohibitions against such actions. Similarly, the OIG could also investigate whether the Searle personnel actions taken by UT-Batelle were improper. An OIG investigation is not precluded or limited in any way by a jurisdictional determination dismissing Searle's complaint of retaliation made by the OHA pursuant to Part 708.

I also find no merit in Searle's position that the "gravity" of the subject matter of his protected disclosure, beryllium handling at ORNL, should be given some special consideration here. There is nothing in Section 708.14 that leads me to conclude that it is appropriate to give any weight to the nature of the protected disclosure itself in assessing whether a complainant has shown a good reason that he could not file his complaint within the 90-day period. The issue before OHA at this point is not whether Searle made an important protected disclosure or whether his contractor employer was irresponsible in its handling of beryllium. It is whether Searle had a good reason to delay filing a complaint of retaliation. The purported importance of the disclosure in and of itself does not explain why he delayed or provide a reason to disregard the limitations of Section 708.14.

B. Searle's April 25 Letter

In this submission, Searle again highlights what he believes is the importance of his disclosure regarding beryllium handling. He also mentions that it was during the period just after his termination that he became "suspicious of a link between my personal conflict with the supervisor who filed me and the dispute (albeit low-key) over beryllium handling. . . . You must appreciate that though this was very convincing to me, I still felt I had no grounds to make an accusation this bold with any further corroborating evidence." This statement once again suggests that shortly after his termination the complainant actually did believe that his firing was a retaliation. He is not required to have any actual or official corroborative evidence of the motive in order to file a complaint under Part 708. The letter confirms the overall conclusion here that shortly after the termination and rehiring took place, Searle came to believe it was retaliatory. Accordingly, I see nothing in the April 25 letter that would cause me to reverse the dismissal.

III. Conclusion

In sum, the complainant's arguments here reflect his belief that he should have been accorded extra time to file his Part 708 complaint of retaliation because his protected disclosure involved an important and "grave" subject. I cannot agree with this proposition, which is simply not provided for under the Part 708 regulations. In this regard, I find that in spite of the additional opportunity he has been granted to explain why he should be accorded an exception to the time limitation set out in Section 708.14, Searle has not provided a single substantial reason why he

could not file in a timely manner. Accordingly, I find that the complainant has not shown that good cause exists for his failure to file his Part 708 complaint in a timely manner. Accordingly, the dismissal by the investigator should be sustained and the instant Part 708 complaint should be dismissed.

IT IS THEREFORE ORDERED THAT:

(1) The Appeal filed by Donald E. Searle (Case No. TBU-0065) is hereby denied.

(2) This Decision shall become a Final Agency Decision unless a party files a Petition for Secretarial Review with the Office of Hearings and Appeals within 30 days after receiving this decision. 10 C.F.R. § 708.19.

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Appeal

Name of Case: **Charles Montano**

Date of Filing: **April 27, 2007**

Case Number: **TBU-0067**

Charles Montano (the complainant), appeals the dismissal of his complaint of retaliation filed under 10 C.F.R. Part 708, the Department of Energy (DOE) Contractor Employee Protection Program. The complaint was dated January 30, 2007. As explained below, the dismissal of the complaint should be sustained, and the appeal denied.

I. Background

The complainant, an auditor, has been an employee of the DOE's Los Alamos National Laboratory (LANL) in Los Alamos, New Mexico since 1978. Until June 2006, the University of California (UC) held the management and operations (M&O) contract to run LANL for the DOE. On June 1, 2006, Los Alamos National Security (LANS) LLC assumed control of the management and operations of LANL. In his complaint, the complainant claims that during the period from 1995 through approximately 2004 he made disclosures that are protected under Section 708.5. These disclosures included revelations regarding salary disparities involving women and minorities, as well as procurement improprieties and irregularities at LANL. He claims that in retaliation for these protected disclosures he has been kept in "dead-end" positions and "underutilized" at the Laboratory, because he has not been assigned to work as an auditor, as he was trained to do. He further claims that, he has been blacklisted for career openings and interviews at LANL, and has been kept in a position for which there is no advancement possibility.

In a letter of April 2, 2007, the Whistleblower Concerns Program Manager at the National Nuclear Security Administration Service Center (NNSA) (Program Manager) dismissed the complaint. There were two bases for the dismissal. First, the Program Manager noted

that Section 708.14 provides that a complaint must be filed within 90 days after the complainant has knowledge of the alleged retaliation. The Program Manger determined that the complainant's January 30, 2007 complaint was untimely because the last employment action that the complainant identified occurred when he was reassigned to his present organization in August of 2004, more than two years earlier. In her letter, the Program Manager found this to constitute a basis for dismissing the complaint as untimely. 10 C.F.R. § 708.14.

The Program Manager's April 2 letter gave as a second basis for the dismissal the fact that the complaint raised the same issues that are raised in his current Part 708 complaint in a complaint filed in the Federal District Court for the District of New Mexico. Accordingly, the Program Manager determined that the Part 708 complaint should be dismissed pursuant to Section 708.17(c), which in relevant part provides that:

> Dismissal for lack of jurisdiction or other good cause is appropriate if:
>
> . . .
>
> (3) You filed a complaint under State or other applicable law with respect to the same facts as alleged in a complaint under this regulation;
>
> . . .

On April 19, 2007, the complainant filed a "Request for Reconsideration" of that dismissal with the Program Manager. Interpreting that submission as an appeal of the dismissal, she forwarded the request to the Office of Hearings and Appeals (OHA), which is the office responsible for considering appeals of dismissals of complaints for lack of jurisdiction under Part 708. 10 C.F.R. § 708.18. Accordingly, we will consider the complainant's Request for Reconsideration as an appeal under Section 708.18, and will perform a review of the dismissal based on the record transmitted to us by the Program Manager.

II. Analysis

A. Was the Complaint Timely Filed

Section 708.17(a) provides that a complaint of retaliation may be dismissed by the Head of Field Element or EC Director for lack of

jurisdiction. Section 708.17(c)(1) provides that untimeliness is an appropriate basis for dismissal on grounds of lack of jurisdiction. However, Section 708.14(d) provides a complainant with the "opportunity to show any good reason [he] may have for not filing within that period and the [appropriate DOE official] may, in his or her discretion, accept [the] complaint for processing."

In this case, the Program Manager asked the complainant to provide a reason for the untimely filing, and in an E-mail filing dated February 12, 2007, the complainant provided his reason. Specifically, the complainant asserted that in January 2007 he concluded that his "new" employer, LANS, was retaliating against him in the same manner as his former employer UC had. In the February 12 submission, the complainant indicated that in a January 13, 2007 E-mail message that he sent to a LANS manager, he inquired about whether he had been selected for a position for which he had applied. His message further indicates "I'm more convinced than ever that I'm in a dead end situation, and for this reason am hoping more than ever to return to the audit arena." Thus, he contends that the date on which he became aware of the retaliation was January 18, 2007. Since he filed his complaint of retaliation on January 30, he believes the complaint was submitted well within the 90-day period required by Section 708.14(a). In her dismissal letter, the Program Manager found that the January 18 E-mail did not set forth any actual retaliation, and was simply an ongoing discussion of the complainant's Individual Performance Objectives (IPO).

After reviewing the entire record on this issue, I find that the Program Manager's determination was correct. As an initial matter, the January 18 E-mail certainly does not set forth any new retaliation. It simply reflects the complainant's ongoing concern, which he has had since approximately 2003-2004, that his career has been "stifled."

The complainant also indicates that he waited to raise this complaint against LANS because he was concerned that he might be considered "unreasonable by not giving LANS sufficient time to fix the problem" he had already raised in April of 2006.

A Part 708 complainant is not entitled to delay filing his complaint beyond the 90-day filing period in order to assure himself that his employer has had appropriate time to "fix" the problem. Moreover, as the complainant states, the LANS managers include many of the same managers in place prior to the LANS transition. Therefore, when LANS took over from UC in June 2006,

the complainant had no reason to believe that the "career-stifling retaliations" he complains of would cease. In fact, the retaliations the complainant raises are simply part of the ongoing purported "career-stifling" that he has alleged has been in existence since 2003-2004.[1] In sum, I find that the complainant improperly delayed filing his Part 708 complaint and has failed to provide any good reason for this delay.

B. Is the Part 708 Complaint Precluded Because of the Complaint Filed With the New Mexico Federal District Court

The second basis on which the Program Manager dismissed the instant Part 708 complaint was that the complainant had previously filed a court complaint based on "the same or substantially the same issues." Under Part 708, dismissal is appropriate if a complainant filed a "complaint under State or other applicable law with respect to the same facts as alleged under this regulation." 10 C.F.R. §708.17(c)(3). *See, Gary S. Vander Boegh*, 29 DOE ¶ 87,010 (2006). As discussed below, I find that the Program Manager's determination on this issue was correct.

In October 2005, the complainant filed a complaint with the Federal District Court for the District of New Mexico. ***Hook v. The Regents of the University of California,*** No. CIV.05-356 (D. N.M. March 6, 2007)[hereinafter ***Hook***]. The claim raised by the complainant was that due to his ongoing protected disclosures, UC continued to retaliate against him in his work assignments, pay, and performance evaluations, in violation of the California Whistleblower Protection Act. Cal. Gov't Code Ann. §§ 8547-8547.12. UC counterclaimed that the complainant had breached a release and settlement agreement with UC by filing the complaint with the district court.

1/ The complainant alludes to one position for which he allegedly applied but was not selected. He states that he learned on December 13, 2006 that he was not selected for that position. He seems to believe that this "non-selection" constitutes a new and different retaliation in the context of this proceeding. I do not agree. I find that this unsupported claim in and of itself does not constitute any new retaliation in the scheme of this complainant's overall claims of retaliation. It falls within the "continuing" stream of claims of "career-stifling." In this regard, mere failure to be awarded a new position, in the context of this case, does not constitute a new retaliation.

As the court noted in its dismissal of the complaint, in 1996, the complainant had filed a whistleblower complaint against LANL with the DOE (under Part 708). According to the court, the protected disclosures involved the complainant's revelations about mismanagement of LANL by UC, including improper application of costs, and UC's failure to comply with Equal Employment Opportunity requirements. The complainant alleged, among other retaliations, that UC denied him opportunities for advancement within LANL. The court noted that on May 11, 2000, the complainant and UC reached a settlement of this matter.[2] The court rejected the complainant's claims that he had suffered new retaliations for new protected disclosures taking place after the settlement date. The court found that the claims set forth in his complaint "arise from, result from, and relate to Defendants' pre-Release actions. . . . Stated another way, Montano's Amended Complaint alleges that pre-Release events motivated the Defendants' alleged post-Release retaliation; therefore, [the] post-Release claims are necessarily a 'continuation of the effects of' pre-Release events and are barred by Paragraph 12 of the Release." ***Hook***, slip op. at 11. [3]

I find that the protected disclosures and alleged retaliations considered in ***Hook*** are the very same ones that the complainant attempts to resurrect in the instant case. I reject the complainant's attempt to circumvent the clear prohibition of Section 708.17, which precludes such an action, by claiming a new M&O contractor, LANS, is now the offending employer. The core facts, as I see them, are the same in this case and the New Mexico Federal District Court proceeding: in the 1990s, the complainant made protected disclosures regarding improper cost accounting and

---

2/ This settlement was reached in the context of an earlier Complaint of Retaliation filed by Montano under Part 708. Based on the settlement with UC, the complainant's previous Part 708 complaint was dismissed. Charles Montano, Case No. VWA–0042, dismissed January 27, 2000.

3/ I am not reviewing here the merits of the court's determination that the issues in the complaint before it are barred by Paragraph 12 of the release. The scope of my decision pertains solely to whether the complainant filed a complaint under "State or other applicable law" with respect to the same facts that are at issue here. As discussed in the text, I find that the issues in the Part 708 complaint and the New Mexico Federal District Court complaint are virtually identical.

improper pay disparities at LANL and, as a result, was kept in a dead-end job. The fact that a new M&O contractor may have stepped in at LANL in the interim does not change these core facts in any meaningful way so as to permit the complainant to avoid the prohibition stated Section 708.17. The complainant has had a determination on the merits of his case by a federal district court with respect to the same issues that he raises here under Part 708. He is therefore precluded from pursuing this matter further with the DOE. 10 C.F.R. § 708.15(a)(1).

III. Conclusion

Accordingly, I find that the complainant has not shown that good cause exists for his failure to file his Part 708 complaint in a timely manner. I further find that his complaint should be dismissed because he has filed a complaint under State or other applicable law with respect to the same facts as alleged in the instant Part 708 complaint, and that the complaint filed in the New Mexico Federal District Court was not dismissed for lack of jurisdiction. 10 C.F.R. §§708.15(a)(1), .17. Accordingly, the Program Manager's determination was correct and the instant Part 708 complaint should be dismissed.

IT IS THEREFORE ORDERED THAT:

(1) The Appeal filed by Charles Montano (Case No. TBU-0067) is hereby denied.

(2) This Decision shall become a Final Agency Decision unless a party files a Petition for Secretarial Review with the Office of Hearings and Appeals within 30 days after receiving this decision. 10 C.F.R. § 708.19.

May 23, 2007

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Appeal

Name of Case: **Delbert F. Bunch**

Date of Filing: **May 7, 2007**

Case Number: **TBU-0068**

Delbert F. Bunch (Bunch or the complainant), appeals the dismissal of his complaint of retaliation filed under 10 C.F.R. Part 708, the Department of Energy (DOE) Contractor Employee Protection Program. The complaint was dated September 6, 2006. As explained below, the dismissal of the complaint should be sustained, and the appeal denied.

I. Background

The complainant was an employee with Bechtel SAIC Company LLP (BSC), the prime contractor to the DOE Office of Civilian Radioactive Waste Management (OCWRM) Yucca Mountain Project. The DOE OCRWM has been tasked to develop and manage a safe system to dispose of spent nuclear fuel and high-level radioactive waste. In his September 6 complaint of retaliation, Bunch states that he was a BSC manager assigned the responsibility for assuring completion of a number of documents required in support of an update or revision of the 2004 CD [conceptual design]-1. Bunch indicates that on "March 17, 2006, after numerous attempts to assure that BSC's CD-1 Revision reports were in conformance with DOE requirements (including those under part 830), I refused to concur in the release of those documents. The morning of March 30, 2006, the second day after I returned from leave, I was handed a letter . . . advising me that my last day of work would be that day."

In his complaint, the complainant sets forth in detail the subject matter of the conceptual design reports that are involved here. In this regard, he stated that he participated on a team that reviewed a "draft license application." According to Bunch, "there were a number of specific comments and suggestions developed as a result of that review and several major criticisms and comments. One was that the analysis of aircraft risks raised issues that needed to be

brought to the attention of DOE [1]. . . . The concern for Yucca Mountain was that risks were to be reduced by negotiating a flight limitation with the Air Force. Making marginal improvements just to meet a numerical limit is a practice discouraged by the NRC [Nuclear Regulatory Commission]. This view was made known to the General Manager."

A second concern cited by Bunch involved the fact that on December 19, 2005, the "DOE issued a stop work order on BSC's quality affecting engineering and pre-closure safety analysis work, because of deficiencies in BSC's requirements management system . . . . The concern that existed had to do with continuing systemic failings in managing requirements . . . . The general matter of management of substantive requirements will be a matter for DOE and NRC to address in connection with the license application."

Bunch's third concern involved "lack of configuration management." Bunch states that DOE had issued "direction" regarding the basis for design in a CD-1 revision. "However, the BSC engineering organization departed from that direction and made changes from the BSC recommended design solution (some of the changes were contrary to the DOE's direction)." Bunch contends that "the Conceptual Design Report prepared for the CD-1 Revision contained deviations from the previous submittal, without item explanation."

Bunch's fourth stated concern involved the lack of adherence to DOE-mandated Integrated Safety Management requirements. In this regard, Bunch claims that the "introduction of a disposal tunnel off of the South Portal created safeguards, security and safety concerns that were completely avoidable by alternatives that fully met DOE requirements. . . . No changes were made when this concern and the other concerns (summarized above) were brought to the attention of the engineering organization . . . Moreover, when I refused to concur in the release of the CDR [Conceptual Design Report], the document was released by my management over my objections, without . . . conveying any of my Part 708.5(c) concerns to DOE."

As stated above, Bunch claims that in retaliation for engaging in a protected activity under Section 708.5, he was fired from his position with BSC on March 30, 2006. He filed a Complaint of

---

1/ Bunch asserts that airplane risks was his area of special competency.

Retaliation with the DOE on September 6, 2006. In a letter of April 17, 2007, the Director, Office of Civilian Radioactive Waste Management of the DOE (OCRWM Director) dismissed the complaint.

The April 17 Dismissal Letter

The OCRWM Director gave two bases for the dismissal. The first basis was that the complaint was untimely filed. The second basis was the complainant's failure to show that he had engaged in an activity protected under Section 708.5.

With regard to the timeliness issue, the OCRWM Director noted that Section 708.14 provides that a complaint must be filed within 90 days after the complainant knew or should have known of the alleged retaliation. The OCRWM Director determined that the complainant's September 6, 2006 complaint was untimely because it was filed 160 days after the March 30, 2006 termination. In this regard, the OCRWM Director noted that he had provided the complainant the opportunity to show why he filed the complaint beyond the 90-day time period. The complainant provided some additional information regarding the September 6 filing date in the filing of October 13. Based on the October 13 submission, the OCRWM Director indicated that the complainant had purportedly reached the conclusion that his termination was retaliatory only after reading the OCRWM Director's July 19, 2006 testimony before the U.S. House of Representatives Subcommittee on Energy and Air Quality. The OCRWM Director indicated that he could not "find any language in my testimony that would lead you to believe that you were terminated in retaliation for your protected activities. Therefore, I find that the date on which you knew or reasonable should have known of the alleged retaliation was March 30, 2006, when you were terminated." Accordingly, the OCRWM Director found that the September 6 complaint, filed 160 days after the termination, was untimely and should be dismissed.

As a second basis for the dismissal, the OCRWM Director's April 17 letter noted the failure of the complainant to allege engagement in a protected activity. In this regard, the OCRWM Director cited Section 708.5, which provides that the following conduct is protected from retaliation by an employer:

> a) Disclosing to a DOE official, a member of Congress, any other government official who has responsibility for the oversight of the conduct of operations at a DOE site, your

> employer, or any higher tier contractor, information that you reasonably believe reveals--
>
> (1) A substantial violation of a law, rule, or regulation;
>
> (2) A substantial and specific danger to employees or to public health or safety; or
>
> (3) Fraud, gross mismanagement, gross waste of funds, or abuse of authority; or
>
> (b) Participating in a Congressional proceeding or an administrative proceeding conducted under this regulation; or
>
> (c) Subject to § 708.7 of this subpart, refusing to participate in an activity, policy, or practice if you believe participation would --
>
> (1) Constitute a violation of a federal health or safety law; or
>
> (2) Cause you to have a reasonable fear of serious injury to yourself, other employees, or members of the public.

The OCRWM Director stated that he had examined each of the protected acts explained in detail in the complainant's October 13, 2006 submission, and found that none of them qualified as a protected activity under 10 C.F.R. § 708.5. Accordingly, the OCRWM Director dismissed Bunch's complaint.

On May 7, 2007, the complainant filed an appeal of the dismissal by the OCRWM Director. I have reviewed that appeal, and as discussed below, I find that the OCRWM Director's dismissal should be sustained and the appeal denied.

II. Analysis

A. Whether the Complaint Timely Filed

Section 708.17(a) provides that a complaint of retaliation may be dismissed for lack of jurisdiction. Section 708.17(c)(1) provides that untimeliness is an appropriate basis for dismissal on grounds of lack of jurisdiction. However, Section 708.14(d) provides a complainant with the "opportunity to show any good reason [he] may have for not filing within that period and the

[appropriate DOE official] may, in his or her discretion, accept [the] complaint for processing."

In this case, the OCRWM Director asked the complainant to provide a reason for the untimely filing and, in the October 13 filing referred to above, the complainant provided his reason. He asserts that the termination letter which he was given on March 30, 2006, stated only that "business conditions are such that we must implement an Involuntary Reduction-In-Force (IROF) program." The complainant claims that he was later made aware of facts that led him to conclude that a "primary reason for the action was retaliation." In this regard, he asserts that he learned in July that no other senior manager had been terminated, and further that upon "reading the July testimony of the Director of OCRWM, I . . . concluded that I had been terminated primarily in response to my expressed concerns." Bunch indicates that he then decided to file his Part 708 complaint of retaliation. According to Bunch, the September 6 filing was well within the 90-day period and therefore timely.

I am not persuaded by this position, which is not supported by the rest of the Bunch filing. In his October 13 letter, Bunch also states that the "business conditions" statement in his termination letter was not legitimate because, since he was "Manager for Program Integration, directly reporting to the General Manager, my position would normally be funded using Indirect Funds, accounted for in the rates developed and submitted to DOE. Moreover, in my case, direct funds were available and properly chargeable by me for work requested by DOE letter of September 22, 2005. . . ; there was adequate funding available for me to meet all requested actions by DOE. I am aware of no prior plan for my removal." These statements indicate that the complainant did indeed have good reason to believe that his termination was retaliatory. Specifically, he indicates that he believed at the outset that there was sufficient funding for his position. He stated that he knew funds for his position were already allocated in 2005. Thus, he had good reason to suspect that "business conditions" might not be the true reason for his termination.

Bunch also states in his October 13 letter, "I was present at several FOCUS committee meetings to discuss plans for transitioning subcontractor work to BSC self-performed work, but at no time was I led to believe that there were any plans for reorganizing or dissolving my organization. . . ." Here, the complainant indicates that he had participated in meetings where

it was clear that there was no plan to reorganize his organization. In this regard, Bunch suggests in his October 13 filing that his termination was effectuated in a manner that did not follow normal BSC procedure. This out-of-the-ordinary termination process, which came unexpectedly and immediately after his refusal to obey a BSC directive, should certainly have alerted Bunch that the termination might have been retaliatory.

In addition, the complainant states, "As I was leaving the BSC office on March 30, I happened to see Mr. Peter Rail, who said that he had participated in a FOCUS committee meeting regarding my situation. After mulling his remarks, I sent him an e-mail (on April 2, 2006) asking him if my concerns had been made known to the FOCUS group." Thus, on the very day of his termination, the complainant heard from a colleague that his "situation" had been discussed at a FOCUS committee meeting. The complainant apparently became suspicious at that point because he immediately began to mull over his colleague's remarks. Thus, I am not persuaded that at the very time he was terminated the complainant did not already have some reason to believe employer retaliation could have occurred.

In fact, in the October 13 submission, Bunch himself summarizes his reasons for believing that the termination was retaliatory as follows: "In light of the apparent failure to follow procedure for my termination, the absence of business conditions impacting my continuance as an employee of BSC, and the legitimate concerns expressed by me prior to my termination . . . I conclude that a primary reason for the action was retaliation." Thus, based on these remarks by Bunch, I believe that he did indeed reach the conclusion contemporaneous with his termination that this action could well be retaliatory. As discussed above, Bunch was aware on the very day of his termination of each of these considerations: the failure to follow procedure; the absence of business conditions for his termination; and the types of concerns he had previously expressed. I fail to see here any reason why the purported retaliatory nature of the termination did not become known to him until July.

On the other hand, I find wholly unconvincing Bunch's assertion that he did not learn of the true reason for his termination until reading the OCRWM Director's July 19 testimony [before the U.S. House of Representatives]. In his appeal, the complainant claims that it was through reading this testimony that he first learned of the differences in "culture" and "priority" between BSC and OCRWM. I find this unpersuasive. Bunch consistently

portrays himself as BSC "senior management," and further notes that he is a "former [DOE] Deputy Assistant Secretary for Safety, Health and Quality Assurance." He is therefore a high-level employee with considerable experience and sophistication in the realms of both government service and government contracting. Further, he indicates in his October 13 submission that in October 2005, he understood that "a strong motivation [for BSC to satisfy DOE] was to enable BSC's financial profitability." Thus, it is simply not plausible for a knowledgeable employee, such as Bunch, to maintain that it was not until he read the OCRWM Director's testimony that he could piece together the entire picture of differing priorities of the DOE and BSC. He should have known all along that the goals of the two organizations were not necessarily identical in every respect and, in this regard, that BSC is a for-profit organization while the DOE is not. In fact, Bunch does state that in November 2005 he was assigned to lead an effort to prepare a revised CD-1 package consistent with redirection from the DOE. He noted that responding satisfactorily to that redirection was regarded as essential. In this regard, he stated "I understood that a strong motivation for that was to enable BSC's profitability." Thus, in 2005, Bunch was already well-aware that a key factor for BSC was profitability. It was thus obvious to him, even in 2005, that the goals of DOE and BSC were not identical. He certainly did not need the OCRWM July 2006 testimony to learn that BSC culture and DOE culture were not uniform.

Bunch also argues that his filing should be accepted even if it is considered untimely. In the October 13 filing, Bunch claims that "it is unreasonable to expect filing by a senior manager who attempts to 'work within the system,' until a more complete basis is developed." In his May 7 appeal, he states there "is no requirement that a pre-emptive filing must be made, even before sufficient facts are acquired. Important facts and circumstances arose in July 2006, when the result of the SCWE survey were made known to me by former co-workers who were familiar with the prevailing negative attitude in BSC towards those who raised concerns, and when I learned that no other person appeared to have been terminated after me, even though the termination letter cited business conditions as the cause. This could not have been known on March 30. . . .[The reference to text in the testimony on July 2006 was to note the contrast between OCRWM's determination to 'develop the culture and processes expected of an NRC licensee' with my growing awareness of the culture and processes with BSC. Before that point it was not abundantly

clear that OCRWM top management's priority for safety was difference from BSC's top management apparent lack of priority]."

The complainant sets out an incorrect standard here for when a claim must be filed. He contends that prior to July 30, the motive for retaliation was not "abundantly clear to him." He asserts that senior management should be entitled to delay filing a Part 708 complaint until "a more complete basis is developed," indicating that such individuals should be accorded the opportunity to "work within the system." Section 708.14 simply does not provide this type of approach. The standard of "abundantly clear," "complete basis," or time to "work within the system" is not applicable. The standard under Part 708 is "knew or should have known." As discussed above, I find that the complainant had sufficient knowledge for purposes of this proceeding that his termination could have been retaliatory that he should have come forward with his complaint within 90 days of that termination. Waiting until the facts are clearer is simply not within the regulatory framework here. ***Donald E. Searle,*** Case No. TBU-0065 (May 16, 2007)(complainant not required to have any actual or official corroborative evidence of motive in order to file a complaint under Part 708.) [2]

Bunch also asserts that if this complaint proceeding does not go forward, there could well be some negative impact on BSC employees. He raises concerns regarding the possible impact of alleged BSC performance shortcomings on "representations before NRC as well as DOE." These concerns, while they may be genuine enough, are beyond the purview of Part 708. These regulations provide a remedy only when a contractor employee is subjected to retaliation for engaging in protected behavior. The issue of whether the alleged disclosures made by a complainant are true, and therefore whether a contractor should be required to take corrective action related to the subject of the alleged disclosures, is not considered in a Part 708 complaint of retaliation proceeding. Similarly, whether other employees may be adversely affected, is not a matter considered in connection

---

2/ Contrary to Bunch's assertion, there is an opportunity for an employee to "work within the system" to resolve his concerns. Section 708.20 specifically allows an employee and the DOE contractor some time to attempt to mediate a complaint. However, this option is only available once a complaint has been filed. Thus, it is not an avenue which would permit an individual to delay filing his Part 708 complaint.

with a employee's filing of a complaint of retaliation under Part 708.

In sum, I find that the complainant improperly delayed filing his Part 708 complaint, and he has failed to provide any good reason for this delay.

B. Whether the Part 708 Complaint Is Precluded Because the Complainant Failed to Establish that He Engaged in Protected Activity

The second basis on which the OCRWM Director dismissed the instant Part 708 complaint was that the complainant had not engaged in an activity described in Section 708.5. I have thoroughly reviewed the record in this case and I find that the OCRWM Director was correct. In his May 7 appeal, the complainant indicated that he refused to "concur in documents that [he] regarded as contrary to both NRC and DOE regulations." This refusal is not a protected activity under Section 708.5. As stated above, Section 708.5(c) provides that the following conduct is protected from retaliation by an employer:

> Subject to § 708.7 of this subpart, refusing to participate in an activity, policy, or practice if you believe participation would --
>
> (1) Constitute a violation of a federal health or safety law; or
>
> (2) Cause you to have a reasonable fear of serious injury to yourself, other employees, or members of the public.

Bunch's refusal to concur in the conceptual design report simply does not fall within the purview of this subsection. As an initial matter, even if Bunch believed that the conceptual design report violated NRC or DOE regulations, his concurrence with the report would not in and of itself violate a federal health or safety law, or cause him to have a fear of serious injury to himself or others. Concurrence per se is not an activity that violates a federal health or safety law, or causes harm to the complainant or others. In fact, this regulation was designed in order to allow workers to refuse to engage in an activity that could cause them or others immediate bodily harm, and not to

protect an employee who does not believe that his supervisor's decisions or directives are lawful. [3]

In this regard, Section 708.6 indicates that "participation in an activity, policy or practice may cause an employee to have a reasonable fear of serious injury that justifies a refusal to participate if: (a) a reasonable person, under the circumstances that confronted the employee, would conclude that there is a substantial risk of a serious accident injury, or impairment of health or safety resulting from participating in the activity, policy, or practice; or (b) an employee, because of the nature of his or her employment responsibilities, does not have the training or skills needed to participate safely in the activity or practice." Clearly, Bunch could not have reasonably believed that he or others would have faced a substantial risk of accident, injury or health impairment if he merely signed the conceptual design report. There were other methods by which he could make his concerns about the report known to the DOE.

Moreover, Sections 708.5 and 708.6 do not provide an employee with the right to make a unilateral decision not to participate. In "refusing to participate," a complainant must also comply with Section 708.7, which provides that before refusing to participate a complaint must ask his employer to correct the violation or remove the danger, and his employer must have refused; and further the complainant, by the 30th day after refusing to participate, must have reported the violation or dangerous activity to a DOE official, member of Congress, another government official with the responsibility for the oversight of the conduct of operations at the DOE site, his employer, or any higher tier contractor, and stated the reasons for refusing to participate. Bunch does not allege that he met the requirements of Section 708.7. I therefore find that his refusal to concur in the concept design report does not provide Bunch protection under Section 708.5(c). [4]

3/ One way for a contractor employee to handle a situation in which he believes that his employer has asked him to do something that is illegal is to raise this issue with the DOE. This approach could provide the employee with some protection from retaliation under Part 708.

4/ This is not to say that Bunch is required to sign a document that he reasonably believes is illegal. The circumstances of

(continued...)

Finally, the October 13 submission and May 7 appeal do not indicate that Bunch himself actually made any *disclosures* of information to his contractor that would qualify for protection under Section 708.5(a) or (b). For example, in his May 7 appeal, he enumerates four categories of alleged violations of "law, rule, or regulation" that were identified in the October 13 filing. While he explains which rules and regulations he believes were violated by the conceptual design report, he does not state that he ever actually informed anyone of his beliefs. He certainly does not indicate the name of the person he informed, or indicate the time, place and circumstances of any discussion in this regard. This is evident from Bunch's own descriptions of the purported disclosures, which were cited virtually in their entirety above. For example, in his list of "Protected Acts" set forth in his complaint, Bunch states "concerns were brought to the attention of the engineering organization." He indicates that another concern "was made known to the General Manager." Neither of these assertions indicates that Bunch himself made any disclosure whatsoever. In sum, I can find no reason to conclude that Bunch engaged in any activity protected under Section 708.5(a)(1),(2) or (3); or Section 708.5(b). I therefore find that the OCRWM Director correctly found that Bunch did not engage in protected activity under Part 708.

III. Conclusion

For the reasons set forth above, I find that the complainant has not shown that good cause exists for his failure to file his Part 708 complaint in a timely manner. I further find that his complaint should be dismissed because he has not shown that he has engaged in an activity that is protected under Section 708.5. Accordingly, the OCRWM Director's determination was correct, and the instant Part 708 complaint should be dismissed.

4/ (...continued)
this case indicate that he is not entitled to protection from adverse personnel actions under Part 708 if he refuses to do so. However, there may well be other protections available to him.

IT IS THEREFORE ORDERED THAT:

(1) The Appeal filed by Delbert F. Bunch (Case No. TBU-0068) is hereby denied.

(2) This Decision shall become a Final Agency Decision unless a party files a Petition for Secretarial Review with the Office of Hearings and Appeals within 30 days after receiving this decision. 10 C.F.R. § 708.19.

July 16, 2007

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Appeal

Name of Case: **Sharon M. Fiorillo**

Date of Filing: **July 5, 2007**

Case Number: **TBU-0070**

Sharon M. Fiorillo (the complainant), appeals the dismissal of her complaint of retaliation filed under 10 C.F.R. Part 708, the Department of Energy (DOE) Contractor Employee Protection Program. The complaint was filed on May 4, 2007. As explained below, the dismissal of the complaint should be sustained, and the appeal denied.

I. Background

The complainant was a secretary with a DOE contractor, Performance Results Corporation (PRC), located at the DOE's National Energy Technology Laboratory (NETL) in Pittsburgh, Pennsylvania. The complainant claims that on February 5, 2007, she disclosed an incident of workplace violence to an employee of the DOE's Inspector General, Office of Inspection and Special Inquiries, Northeast Region (DOE/IG). According to the complainant, the violent incident took place during a February 2 three-way telephone conversation that included a fellow employee, Holly Biddle, herself and their supervisor, who was attempting to mediate a misunderstanding between the complainant and Biddle. The complainant states that she said to Biddle, "Holly, you could have talked to me about this." According to the complainant, Biddle replied, "If I would have seen you, I would have spit in your face."

The complainant indicated to the DOE/IG that the supervisor thereafter did nothing to protect her from the threatening work environment created by this remark. The complainant believes that providing information about workplace violence to the DOE/IG constitutes a protected disclosure because she revealed a violation of law [the McNamara O'Hara Service Contract Act, Section 2(a)(3)]: the "potential safety danger to myself in having to work in a

hostile work environment." She also believes that she reported a substantial violation of the PRC Employee Handbook pertaining to a hostile work environment, and that the workplace violence she experienced violated OSHA, NIOSH and FBI policy statements on the issue of workplace violence. Further, she believes that the fact that her supervisor did nothing to protect her was evidence of gross mismanagement and abuse of authority.

She claims that in retaliation for the disclosure of this incident to the DOE/IG, she was terminated from her position at PRC on February 5, 2007, the very day of the disclosure.

In a letter of June 22, 2007, the Director of NETL dismissed the complaint. The NETL Director found that the complainant's disclosure did not fall within the purview of Part 708. Specifically, he stated that the complainant did not disclose information "concerning danger to public or worker health or safety, substantial violations of law, or gross mismanagement; for participation in congressional proceedings; or for refusal to participate in danger activities. Therefore, in accordance with 10 C.F.R. § 708.17(c)(2), your complaint must be dismissed."

Section 708.17(c)(2) in relevant part provides that:

> Dismissal for lack of jurisdiction or other good cause is appropriate if:
>
> . . .
>
> (2) The facts, as alleged in your complaint, do not present issues for which relief can be granted under this regulation;
> . . .

On July 5, 2007, the complainant filed an appeal of the dismissal by the NETL Director with the Office of Hearings and Appeals. 10 C.F.R. § 708.18.

II. Analysis

In her appeal, the complainant claims that the dismissal was erroneous because: (i) NETL improperly minimized the seriousness of the violent situation she revealed; (ii) she was not provided with a copy of PRC's response to her complaint; (iii) PRC has not acted truthfully in connection with her claims for Pennsylvania unemployment compensation; and (iv) she does not believe a

sufficient review of her complaint has been performed, including the opportunity to show that PRC's accusations against her are "false and slanderous." Of these four objections, only the first has any relevance here. Accordingly, my attention here will be devoted solely to the issue of whether the complainant's report to the DOE/IG that a co-worker stated that if she had seen the complainant, she would have spit in the complainant's face is a disclosure of workplace violence entitled to protection under Part 708.

The answer is "no." This is a trivial, frivolous claim which merits summary dismissal. There was no workplace violence reported. The purported threat was hypothetical. It did not describe any future intent by Biddle. I find that no reasonable person would find herself in real fear of any meaningful danger, present or future, if she heard the statement at issue here, especially since it was made via telephone. Reporting this statement to the DOE/IG simply does not constitute reporting of workplace violence. Consequently, while I agree with the NETL Director that this complaint merits summary dismissal, I find that it falls more properly within the purview of Section 708.17(c)(4), which provides that a complaint may be dismissed if it "is frivolous or without merit on its face . . . ." The statement at issue here most assuredly meets that test.

Accordingly, the dismissal by the NETL Director was correct and the instant Part 708 appeal should be denied.

IT IS THEREFORE ORDERED THAT:

(1) The Appeal filed by Sharon Fiorello (Case No. TBU-0070) is hereby denied.

(2) This Decision shall become a Final Agency Decision unless a party files a Petition for Secretarial Review with the Office of Hearings and Appeals within 30 days after receiving this decision. 10 C.F.R. § 708.19.

Acting Director
Office of Hearings and Appeals

Date: July 16, 2007

August 30, 2007

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Appeal

Name of Case: **Jeffrey R. Burnette**

Date of Filing: **August 23, 2007**

Case Number: **TBU-0071**

Jeffrey R. Burnette (Burnette or the complainant), appeals the dismissal of his complaint of retaliation filed under 10 C.F.R. Part 708, the Department of Energy (DOE) Contractor Employee Protection Program. The complaint was dismissed for lack of jurisdiction under Section 708.17. As explained below, the dismissal of the complaint should be sustained, and the appeal denied. [1]

I. Background

This complainant's Part 708 history dates from 2001. A brief summary of the relevant facts is set forth below.

A. 2001 Complaint of Retaliation, Request for Investigation and Hearing

As of October 10, 1999, the complainant was an employee with J.A. Jones Construction Company (Jones), a sub-contractor to Bechtel Jacobs Corporation, LLC (BJC), the Management and Operations (M&O) contractor at the DOE's Oak Ridge National Laboratory (ORNL) Y-12 site. On May 21, 2001, Burnette filed a complaint of retaliation with the Manager of the Diversity Programs and Employee Concerns (EC Manager) for the DOE's Oak Ridge Operations Office. Burnette claimed that beginning in October 1999 he began disclosing to his site manager that he was placed in a job for which he was unqualified and that this raised health and safety concerns. He states that he requested training for this position, but that his request was denied. Burnette alleges the following retaliations in

---

1/ On August 24, 2007, the Acting Director of the Office of Hearings and Appeals authorized me to render a decision on Burnette's complaint.

connection with raising his health and safety concerns. He states that in November 2000 he interviewed for a management position with Jones, but that he was not selected. He also indicates that he received poor performance evaluations. Burnette claims that during April and May 2001, he raised some additional health and safety concerns with his employer regarding asbestos and mold in his work place. In June 2001 he was terminated by Jones.

On September 14, 2001, his May 21 complaint of retaliation was transmitted to the Office of Hearings and Appeals for investigation (OHA Case No. VBI-0076). On November 13, 2001, the complainant's attorney requested that the matter proceed immediately to a hearing under Part 708. Accordingly, the request for investigation was dismissed.

An OHA hearing proceeding was initiated on November 19, 2001 (Case No. VBH-0076). During the pendency of this proceeding, Burnette was offered a position with BWXT LLC Y-12, the new M&O contractor at the Y-12 site, and an agreement was reached with Jones to settle the complaint, and dismiss the OHA hearing proceeding. Accordingly, on March 4, 2002, that proceeding was dismissed.

B. 2002 Complaint of Retaliation

On July 18, 2002, Burnette filed another complaint of retaliation with the EC Manager. In this complaint, he alleged that BJC retaliated against him in the transition process into his new position with BWXT Y-12. The retaliations purportedly include delaying starting date for the new employment, and failure to provide him with compensation for accrued vacation days dating from his termination on June 15, 2001 through February 11, 2002 when he began employment with BWXT. Burnette also contended that BWXT conditioned its employment of him in his new position with the firm on his dismissal of his hearing proceeding with the OHA. Burnette believed that this condition amounts to coercion and suggested that there was collusion between the contractors.

On October 2, 2002, the EC Manager dismissed this complaint. The EC Manager noted that 10 C.F.R. § 708.14(a) required that a complainant must file his compliant by the 90th day after the date he knew or reasonably should have known of the alleged retaliation. The EC Manager stated that since the July 2002 complaint was filed more than 90 days after the February 2002 settlement, it was untimely.

The EC Manager advised Burnette that the dismissal of his complaint could be appealed to the Director of OHA. 10 C.F.R. § 708.18. However, the complainant did not file such an appeal.

C. 2006 Complaint of Retaliation

Burnette filed a third complaint of retaliation in 2006. It is the dismissal of this complaint that is under consideration in the instant case. The record in this case does not present a clear date on which Burnette filed this complaint. However, the record does show that on December 7, 2006, the Whistleblower Program Manager (WP Manager) of the DOE's National Nuclear Security Administration (NNSA) Service Center requested that Burnette provide some additional information regarding an undated new complaint letter, which was forwarded to her by a BWXT Y-12 supervisor. Burnette responded in a letter of February 20, 2007. In that letter, Burnette again asserted that he experienced retaliations by his contractor employers. The retaliations included those he had previously raised: coercion by the contractors to settle his previous Part 708 proceeding; delay of BWXT Y-12 employment; harassment and isolation "beginning early at Y-12;" denial of a pay raise and employment opportunities; loss of seven months salary and two weeks of accrued vacation [during period of unemployment between the Jones position and the BWXT Y-12 position]; and lost reputation.

The WP Manager indicated two grounds for her dismissal of this complaint. First, she found that retaliations associated with the 2001 and 2002 complaints are now time barred. She also found that the requirement that Burnette dismiss his Part 708 hearing in connection with the BWXT Y-12 job offer was not a retaliation. The WP Manager found that Burnette had agreed to that condition as part of his settlement. Based on these determinations, the WP Manager dismissed the 2006 complaint, citing 10 C.F.R. § 708.17.

On August 23, 2007, the complainant filed the instant appeal of the dismissal by the WP Manager. I have reviewed that appeal, and as discussed below, I find that the dismissal should be sustained and the appeal denied.

II. Analysis

A. Whether Burnette Engaged in Protected Activity

Section 708.5, provides in relevant part that the following conduct is protected from retaliation by an employer:

> (b) Participating in a Congressional proceeding or an administrative proceeding conducted under this regulation;

As is clear from history of this case outlined above, during 2001-2002, Burnette participated in proceedings under Part 708, by filing complaints of retaliation and requesting an investigation and a hearing. He has also filed the 2006 complaint of retaliation. Accordingly, he has engaged in protected activity, and his employer may not retaliate against him for this activity. I must next consider what, if any, retaliations occurred.

B. Alleged Retaliations

In the instant proceeding, virtually all of the retaliations alleged by Burnette are associated with the 2002 settlement agreement and the initial conditions of his employment with BWXT Y-12. This includes the allegations of collusion, the delayed start time for his position with BWXT Y-12, denial of compensation due to lack of employment for seven months, denial of compensation for two weeks of paid vacation, and denial of a pay raise at the outset of his BWXT Y-12 employment. He also complains of harassment, isolation, and lost reputation.

C. Whether the Complaint Is Timely Filed

Section 708.17(a) provides that a complaint of retaliation may be dismissed for lack of jurisdiction. Section 708.17(c)(1) provides that untimeliness is an appropriate basis for dismissal on grounds of lack of jurisdiction. However, Section 708.14(d) provides a complainant with the "opportunity to show any good reason [he] may have for not filing within that period and the [appropriate DOE official] may, in his or her discretion, accept [the] complaint for processing."

A complainant is expected to file a complaint within 90 days of the date he knew or reasonably should have known of the alleged retaliation. 10 C.F.R. §708.14(a). In this case the alleged retaliations took place during the period surrounding the 2002 settlement agreement. Therefore the instant 2006 complaint is filed well beyond the 90 day period. Burnette has provided no reason why he could not file his complaint on these matters in a timely manner. Further, Burnette has alleged no specific retaliation that has taken

place within the 90 days preceding the filing of the 2006 complaint. Accordingly, the complaint is time barred.

Moreover, even if his complaint were timely filed, I see no merit to Burnette's other claims.

D. Alleged Collusion by DOE Contractors

I summarily reject Burnette's assertion that the DOE contractors involved in this case acted improperly in expecting him to drop his Part 708 request for a hearing in exchange for offering him new employment. I do not believe this constitutes collusion or retaliation. Rather, I have concluded that this was simply part of ordinary settlement negotiations and conditions that Burnette was free to reject or accept. He could certainly have decided to proceed with his Part 708 hearing, but instead decided to accept the job offer, and agree to the dismissal of his request for a Part 708 hearing. I see nothing wrong with this type of negotiation. In fact, in Part 708, settlement agreements virtually always result in the dismissal of the Part 708 proceeding before OHA. There is nothing improper here at all.

E. Other Claims of Retaliation

Burnette's other claims of retaliation including isolation, harassment and lost reputation are quickly disposed of. They are too vague to warrant consideration here. In any event, there is no relief under Part 708 for lost reputation or non-specific claims of "isolation."

III. Conclusion

For the reasons set forth above, I find that the complainant has not shown that good cause exists for his failure to file his Part 708 complaint in a timely manner. I further find that his complaint should be dismissed because he has not shown any recent retaliation that is cognizable under Part 708. Accordingly, the WP Manager's determination was correct, and the instant Part 708 complaint should be dismissed.

IT IS THEREFORE ORDERED THAT:

(1) The Appeal filed by Jeffrey R. Burnette (Case No. TBU-0071) is hereby denied.

(2) This Decision shall become a Final Agency Decision unless a party files a Petition for Secretarial Review with the Office of Hearings and Appeals within 30 days after receiving this decision. 10 C.F.R. § 708.19.

Thomas L. Wieker
Deputy Director
Office of Hearings and Appeals

Date: August 30, 2007

May 2, 2008

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Appeal

Name of Case: Fred Hua

Date of Filing: April 3, 2008

Case Number: TBU-0078

Fred Hua (the complainant), appeals the dismissal of his complaint of retaliation filed under 10 C.F.R. Part 708, the Department of Energy (DOE) Contractor Employee Protection Program. The complaint was filed on January 22, 2008, and was dismissed on March 18, 2008. As explained below, the dismissal of the complaint should be sustained, and the appeal denied.

I. BACKGROUND

The complainant was an employee of AREVA NP, Inc. (AREVA), a subcontractor to Sandia National Laboratories (Sandia) at the DOE Yucca Mountain Project (YMP) in Nevada. Although the complainant was an AREVA employee, his on-site manager was Cliff Howard (the supervisor), the manager of Sandia Lead Lab Engineered Systems. In early September 2007, Sandia informed AREVA that the complainant would be released from YMP, effective September 28, 2007.

The complainant filed a Part 708 complaint with the National Nuclear Security Administration (NNSA) Whistleblower Program Manager (the WP Manager). In his complaint, the complainant states that he was released from YMP in retaliation for making protected disclosures. Specifically, the complainant alleges that he was released from YMP because he raised concerns during various Performance Assessment Systems Integration Team (PASIT) meetings, which were attended by other Sandia employees, as well as individuals from the DOE and Department of the Navy.

According to the complainant, he raised concerns at the PASIT meetings "regarding obstacles for a timely and quality document completion." Complaint at 8. Among the concerns raised by the complainant were the following: (i) a Technical Work Plan (TWP) was rushed to completion and was later found to have errors; (ii) resources were wasted in correcting errors caused by technical editors because the complainant was not allowed to train the technical editors on the use of an advanced feature in Microsoft Word; (iii) the complainant and his colleagues were unable to adequately utilize a Features and Events Process (FEP) document management software program, Sharepoint, causing problems with the FEP procedure within the Engineered Systems

department; and, (iv) the supervisor refused to provide a courtesy copy of a document to his DOE counterpart prior to making his final submission of the document, requiring Sandia staff to spend time making DOE-required changes after the final submission of the document. Complaint at 12, 15 - 17.

On March 18, 2008, the WP Manager dismissed the complaint for "lack of jurisdiction." As a basis for the dismissal, the WP Manager stated that the complaint "fail[ed] to describe a 'protected activity' under 10 C.F.R. § 708.5." Specifically, the WP Manager determined that "the facts alleged do not rise to the level of (1) a substantial violation of law, rule or regulation, (2) a substantial and specific danger to employees or public health and safety, or (3) fraud, gross mismanagement, gross waste of funds, or abuse of authority." Therefore, the WP Manager dismissed the complaint, pursuant to 10 C. F. R. § 708.17.

On April 3, 2008, the complainant filed an appeal of the dismissal by the WP Manager with the Office of Hearings and Appeals. 10 C.F.R. § 708.18.

II. ANALYSIS

Section 708.17 provides, in relevant part, that "dismissal for lack of jurisdiction or other good cause is appropriate if … the facts, as alleged in [the] complaint, do not provide issues for which relief can be granted" under Part 708. 10 C.F.R. § 708.17 (c) (2).

A. The Complaint

We have reviewed the complaint and the WP Manager's dismissal. Based on the information contained in the complaint, we find no error in the WP Manager's determination that the complainant failed to make disclosures protected under Part 708.

1. The Technical Work Plan

The complainant's allegation that his disclosure of the flawed TWP reveals "gross mismanagement" on the part of the supervisor is not persuasive. In a prior decision, OHA stated that gross mismanagement is characterized by

> more than *de minimis* wrongdoing or negligence. It does not include management decisions that are merely debatable, nor does it mean action or inaction which constitutes simple negligence or wrongdoing. There must be an element of blatancy. Therefore, gross mismanagement means a management action or inaction that creates a substantial risk of significant adverse impact upon the agency's ability to accomplish its mission.

Roger Hardwick, OHA Case No. VBA-0032, 27 DOE ¶ 87,539 (1999); *see also Carolyn v. Dep't of the Interior*, 63 M.S.P.R. 684 (1994). In his complaint, the complainant gave a long narrative of various difficulties he encountered in his work as the result of the supervisor's decision to prepare the TWP in a certain manner.

While the information in the complaint indicates that the complainant believed that the supervisor's approach to completing the TWP was incorrect, this does not, without more, rise to the level of mismanagement, much less gross mismanagement. There is no indication in the complaint that the project came to a standstill or that the flaws in the document compromised YMP's ability to complete its mission. Therefore, there is no basis for concluding that the WP Manager erred on this point.

2. Disclosures Regarding Software Applications

As to the complainant's arguments regarding his colleagues' inability to use advanced features in Microsoft Word and Sharepoint, the complainant has failed to establish that the supervisor's decisions concerning those software applications constituted gross mismanagement or resulted in gross waste of funds. Just as gross mismanagement constitutes more than merely a debatable managerial decision, gross waste of funds constitutes a more-than-debatable expenditure that is significantly out of proportion to the benefit reasonably expected to accrue to the government. *See Erika D. Jensen v. Dep't of Agriculture*, 104 M.S.P.R. 379 (2007).

The complainant maintains that there was a "significant waste of project funds" that resulted from the problems with the software applications. He states that had the supervisor followed his recommendations, "millions of dollars" could have been saved. Complaint at 10. However, the complainant provides no details, in either his complaint or his appeal, regarding the alleged waste or mismanagement. The complainant discusses the inconvenience to him and his colleagues of working under conditions with which the complainant disagreed. Other than his own assertions, the complainant does not specify the amount of funds needlessly spent or the difficulties that significantly compromised YMP's ability to accomplish its mission. Stating broadly that "millions of dollars" could have been saved is vague and inadequate. The complainant's assertions do not disclose gross waste of funds or gross mismanagement. Rather, they reveal his disagreement with managerial decisions on the allocation of funds and manpower. On this point, the WP Manager correctly determined that the complainant did not describe a disclosure protected under Part 708.

3. The Supervisor's Refusal to Provide Courtesy Copy of Document

Finally, the complainant's disclosure regarding the supervisor's refusal to provide a courtesy copy of a document to his DOE counterpart prior to making his final submission of the document, does not constitute a disclosure of gross mismanagement. It appears that the submission of the document to the DOE counterpart was not a requirement, but rather a courtesy. The supervisor did not follow that course. While the complainant may have disagreed with the supervisor's decision, it does not constitute mismanagement, much less gross mismanagement. In addition, there is no indication that, even had a copy of the document been provided to the DOE counterpart prior to its final submission, the complainant and his colleagues would not have been required to spend time revising the document. Consequently, we find this purported disclosure to be frivolous on its face. There is no error in the WP Manager's determination on this point.

B. The Appeal

In his appeal, the complainant presents arguments that he did not make in his complaint. Specifically, in addition to his arguments that his disclosures reveal gross mismanagement and gross waste of funds, the complainant now states in his appeal that the supervisor's preparation of the TWP also posed a danger to public health or safety and constituted a violation of law, rule, or regulation. It appears that these arguments are an effort on the part of the complainant to use the same language used by the WP Manager in her dismissal in order to meet the requirements of 10 C.F.R. § 708.5, and overcome the deficiencies the WP Manager cited under 10 C.F.R. § 708.17. These arguments were not raised during the initial complaint. However, in order to give this case thorough consideration, we will exercise our discretion and review the new arguments.

1. Danger to Public Health or Safety

The complainant maintains in his appeal that his disclosures were not mere disagreements between him and the supervisor. Rather, according to the complainant, his disclosures revealed a danger to public health and safety. Appeal at 6.

I find no merit in this argument. Under Part 708, a disclosure is protected if it reveals "a *substantial and specific* danger to employees or to public health or safety." 10 C.F.R. 708.5 (a) (2) (emphasis added). Vague and indistinct allegations of government wrongdoing do not amount to protected conduct. *See Julie K. Johnston v. Merit Systems Protection Board*, 518 F.3d 905 (Fed. Cir. 2008). In *Johnston*, the court determined that the petitioner's allegations were detailed and well-supported. Johnston disclosed a substantial and very specific danger regarding the threat of serious injury to employees during training should inadequately trained personnel be tasked with managing training activities. *Id*. at 910. Such is not the case here. The danger that the complainant alleges is neither substantial nor specific.

In his appeal, the complainant gives a long narrative of the relationship between his work and the public welfare. He maintains that the flawed TWP was a direct input into other, more important, models and reports. He states that those models and reports are used in projects which may directly impact public health and safety. Therefore, according to the complainant, preparing a flawed TWP is tantamount to creating a danger to public health and safety.

The alleged relationship between the TWP and health and safety is far removed. Moreover, the complainant does not allege any *specific* danger resulting from the flaws in the TWP. Alleging a general and remote danger, that may or may not occur, simply does not meet the Part 708 standard of disclosing information which reveals a *substantial and specific* danger to employees or to public health or safety.

2. Violation of Law, Rule, or Regulation

In his appeal, the complainant cites to various DOE and Nuclear Regulatory Commission (NRC) quality assurance regulations that are intended to protect the public. He maintains that the fact that there were errors in the TWP, which he says was "rushed" to completion, indicates that the supervisor violated the DOE and NRC quality assurance regulations. This broad statement is not

supported by any factual references in the appeal. Even if the TWP may have contained errors, and required subsequent revisions, this does not indicate a substantial violation of law, rule or regulation.

First, the complainant did not point to any specific provision of the regulations that the allegedly flawed TWP violated. Rather, he gave a long, circuitous discussion of the connection of the TWP to other documents and procedures, and of those documents and procedures to other models and reports, and of those models and reports to other work at YMP which is, in fact, governed by the quality assurance regulations. That purported connection is so vague and remote that we cannot conclude that an allegedly flawed TWP is a violation of the regulations. Second, even assuming that the regulations do remotely apply to producing TWPs, the complainant has not shown with any specificity either that the alleged flaws in the TWP were anything more than minor errors, or that the subsequent revisions to the TWP did not correct the purported violations. The complainant's argument therefore fails to establish a *substantial* violation of law, rule or regulation, as set forth in 10 C.F.R. § 708.5 (a) (1).

As a final matter, we fail to see why, if the complainant did believe that his concerns disclosed both a danger to public health or safety and a substantial violation of law, rule, or regulation, he did not make those arguments in his initial 32-page complaint. As stated above, the complainant's arguments in his complaint were that his concerns disclosed gross mismanagement and gross waste of funds. His failure to raise arguments concerning an alleged danger to public health or safety and an alleged violation of law, rule or regulation in his complaint suggests that these new arguments on appeal are nothing more than the complainant's attempt to bolster his disclosures in light of the WP Manager's dismissal. Having considered these arguments, however, we see nothing in the appeal which would warrant reversing the WP Manager's dismissal and accepting jurisdiction over the complaint.

III. CONCLUSION

As stated above, we find that the complainant's arguments in his complaint reflect his disagreement with managerial decisions, and do not disclose gross mismanagement or gross waste of funds. Therefore, the complainant has failed to establish that he made disclosures protected under section 708.5, and the WP Manager properly dismissed the complaint. In addition, the complainant's new arguments on appeal do not indicate that the complainant disclosed information which revealed either a substantial violation of law, rule or regulation or a substantial and specific danger to employee or public health or safety. No matter how argued, there is no getting around the fact that, in this case, there was no protected disclosure. Accordingly, the arguments on appeal do not establish that the complainant made disclosures protected under section 708.5. Based on the foregoing, we find that the determination of the WP Manager should be sustained, and the instant appeal should be denied.

It Is Therefore Ordered That:

(1) The Appeal filed by Dr. Fred Hua, Case No. TBU-0078, is hereby denied.

(2) This Decision shall become a Final Agency Decision unless a party files a Petition for Secretarial Review with the Office of Hearings and Appeals within 30 days after receiving this decision, pursuant to 10 C.F.R. § 708.19.

OFFICE OF HEARINGS AND APPEALS

Appeal

Name of Case: Donald Searle

Date of Filing: July 8, 2008

Case Number: TBU-0079

Donald E. Searle (Searle or the complainant) appeals the dismissal of his complaint of retaliation and request for investigation filed under 10 C.F.R. Part 708, the Department of Energy (DOE) Contractor Employee Protection Program. As explained below, the dismissal of the complaint should be affirmed.

I. Background*

The complainant is an employee of UT-Batelle, LLC (UT-Batelle), the contractor responsible for operating the DOE's Oak Ridge National Laboratory (ORNL). He claimed that in the spring and summer of 2005 he made protected disclosures to his supervisor regarding beryllium handling at his work site. He further indicated that in September 2005 that same supervisor informed him that he was to be laid off effective February 28, 2006. He was rehired by UT-Batelle on May 15, 2006, although at a reduced salary and pay grade.

On January 4, 2007, Searle filed a complaint of retaliation under Part 708 with the EC Manager (Complaint I). In Complaint I, Searle claimed that the February 28, 2006, termination and the May 15, 2006, rehiring at a lower pay level were retaliations for the protected disclosures that he made to his superiors concerning the beryllium handling. On April 9, 2007, the EC Manager determined that jurisdiction of Complaint I should be accepted, and it was forwarded to the Office of Hearings and Appeals (OHA) for investigation. On April 11, 2007, the Office of Hearings and Appeals received Complaint I. Pursuant to 10 C.F.R. § 708.22, an OHA investigator was appointed.

After reviewing the record in this matter, on April 17, 2007, the OHA investigator determined that Complaint I and the accompanying request for investigation should be dismissed for failure to file

*The portion of this section dealing with the history Searle's various Part 708 complaints from January 2007 to May 2007 is taken mostly *verbatim* from a previous Part 708 jurisdictional appeal decision concerning Searle, *Donald E. Searle*, 29 DOE ¶ 87,025 (May 2, 2007) (*Searle I*).

in a timely manner pursuant to 10 C.F.R. § 708.14(a) (90-day deadline for filing complaint from the date of the alleged retaliation).

Searle appealed the investigator's determination that Complaint I should be dismissed for failure to file in a timely manner. On May 16, 2007, the Acting Director of OHA issued a decision regarding Searle's appeal. In *Searle I*, after reviewing Searle's reasons for the late filing of Complaint I, the Acting Director of OHA found that Searle had not "provided a single substantial reason why he could not [have] file[d] in a timely manner." *Searle I* at 29 DOE at 89,132. The Acting Director consequently dismissed Searle's jurisdictional appeal.

On April 7, 2008, Searle filed another complaint of retaliation under Part 708 with the EC Manager. April 7, 2008, Employee Concerns Complaint filed by Donald Searle (Complaint II). His complaint began by asserting that, on receiving his "salary increase card" on January 25, 2008, he "remains in the extreme low end of a pay scale which no longer reflects my job title." Complaint II at 2. Complaint II then details the circumstances of his rehiring in May 2006 at a lower salary and the increasing responsibilities he eventually began to be assigned. His complaint then asserted that he had only been given a 15 percent pay raise in January 2007, thus making his salary only 75 percent of what it had been one year earlier before his discharge. He then relates in Complaint II that during 2007 he began to perform different employment responsibilities from those for which he had been hired and that sometime in 2007 his supervisor "in recognition of his accomplishments and value" reclassified his job title as "Design Engineer." Nevertheless, he asserts that for pay purposes he is still classified as a "Facility Engineer" and is still "well below the midpoint in that pay scale." Complaint II at 2.

Searle alleges in Complaint II that "my salary languishes at the bottom end of the pay scale and at a level less than I was making over two years ago" and that he considers this an act of reprisal for having filed Complaint I. Complaint II at 2. As additional evidence of his employer's animus towards him, he also alleges that, despite having spent considerable time as a community volunteer, he has never been selected by UT-Battelle to be honored, as others have been, for his volunteer efforts.

On June 5, 2008, the EC Manager informed Searle than DOE was dismissing Complaint II because it too was also untimely. The EC Manager believed that the gravamen of Complaint II concerned Searle's "salary disparity" originating from the date when UT-Batelle rehired Searle in May 2006. The EC Manager found that Searle knew of this "salary disparity" in May 2006, when he accepted the new UT-Battelle job and thus, Searle's Complaint II, filed on April 7, 2008, was filed outside the 90-day deadline as provided in 10 C.F.R. § 708.14(a).

II. Analysis

In a submission dated June 30, 2008, Searle appealed the EC Manager's determination dismissing Complaint II. In this submission, Searle argues, in effect, that his substandard pay is a continuing reprisal for his filing Complaint I. Complaint II specifically referenced his January 25, 2008, salary increase card that provided for a less than adequate raise that did not place him above the low end

of his position's pay scale, despite his increasing professional responsibilities in 2007. Because he did not get notice of his new salary until January 25, 2008, he alleges that his filing of Complaint II on April 7, 2008, falls within the 90-day deadline. Further, he alleges that he did not discover until a April 2008 meeting with the UT-Battelle Employee Concern Officer that his salary was not weighted against the collective sum of all other Engineer salaries at UT-Battelle but only with the other seven members of his peer group. Searle alleges that this fact is additional information indicating that his salary has been "unduly suppressed." Appeal Letter from Donald Searle to Poli Marmolejos, Director, OHA (June 30, 2008) at 2. While Searle specifically does not allege that his initial salary on rehire was retaliatory, he states that, given the facts alleged in his complaint, his January 25, 2008, salary increase should have raised his salary to a level reflecting his current increased job responsibilities. He argues that he has presented sufficient information to mandate that OHA conduct a whistleblower investigation to determine if there is a possibility that his less than adequate raise was in retaliation for previously filing a whistleblower complaint.

We concur with the EC manager's overall determination that Complaint II should be dismissed. However, as discussed below, we have adopted a different rationale as the basis for this dismissal. Section 708.17(b)(4) of 10 C.F.R. provides for dismissal where a complaint is frivolous or without merit on its face. In the present case, Searle claims that he has been subject to retaliation for participating in a Part 708 proceeding. Such retaliation is prohibited under 10 C.F.R.§ 708.5(b). For a complainant to sustain a whistleblower complaint, he or she must prove by a preponderance of the evidence that the protected activity was a contributing factor in the alleged retaliatory act. 10 C.F.R. § 708.29. In the substantial majority of Part 708 cases, this contributing factor showing is made through establishing a time proximity between the protected activity and the alleged retaliation. *See, e.g., Curtis Hall*, 30 DOE ¶ 87,001 (2008). In the present case, the period of time from the date when Searle filed Complaint I (January 2007) to the date of the alleged retaliation described in Complaint II (January 2008) is approximately 12 months. This is an unusually extended period of time. Searle has not made even a perfunctory showing of a contributing factor here. *See Elaine M. Blakely,* 28 DOE ¶ 87,039 (2003) (no connection found between a protected activity and alleged retaliation 13 months later). Moreover, in this case, we note that UT-Battelle voluntarily rehired Searle after he made the protected disclosure referenced in Complaint I. Consequently, we find that Searle's complaint is without merit on its face and should be dismissed.

IT IS THEREFORE ORDERED THAT:

(1) The Appeal filed by Donald E. Searle (Case No. TBU-0079) is hereby denied.

(2) This decision is the final decision of the Department of Energy unless, by the 30th day after receiving the appeal decision, a party files a petition for Secretarial review.

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Appeal

Name of Case: Leslie D. Cumiford

Date of Filing: September 3, 2008

Case Number: TBU-0081

Leslie D. Cumiford ("the Complainant"), appeals the dismissal of her complaint of retaliation filed under 10 C.F.R. Part 708, the Department of Energy ("DOE") Contractor Employee Protection Program. The complaint was filed on October 10, 2006, and was dismissed on August 12, 2008. As explained below, the dismissal of the complaint should be affirmed, and the appeal denied.

I. BACKGROUND

The Complainant was an employee of Sandia National Laboratories ("Sandia") in Albuquerque, New Mexico, from 1995 until July 14, 2006, when Sandia terminated the Complainant's employment.

The Complainant filed a Part 708 complaint with the Whistleblower Program Manager ("the Manager") at the National Nuclear Security Administration Service Center in Albuquerque, New Mexico ("NNSA"). The complaint stated that Sandia terminated the Complainant's employment in retaliation for making protected disclosures. Complaint at 2. Specifically, the Complainant alleged that her employment was terminated because she raised concerns in a letter to the DOE Inspector General ("IG") regarding practices at Sandia. *Id*. According to the Complainant, she raised concerns to the DOE IG regarding "procurement irregularities and a conflict of interest" on the part of a Sandia director. *Id*. According to the Part 708 complaint, she also alleged in her letter to the DOE IG that she was exposed to significant amounts of arsenic in the workplace in retaliation for appearing as a witness on behalf of a co-worker in a discrimination and retaliation case against another Sandia director. *Id*.

The Complainant further requested that the Manager hold the complaint in abeyance while the Complainant pursued a claim for "EEO (Equal Employment Opportunity) Retaliation" with the State of New Mexico Department of Labor, Human Rights Division ("NMHRD"). Complaint at 1. The Complainant stated that she was "informed that both complaints cannot be simultaneously pursued." Complaint at 1. She added, "otherwise, at this time I am not pursuing any other avenues for remedy under State or other applicable law." *Id*. Following an

investigation by NMHRD, the Complainant filed a claim in State of New Mexico District Court, Bernalillo County ("New Mexico state court") in March 2008. Appeal at 1.

The Manager took no action on the Part 708 complaint until August 12, 2008, when she dismissed the complaint for "lack of jurisdiction." As a basis for the dismissal, the Manager stated that the Complainant "filed a complaint in another forum with respect to the same facts alleged in [her Part] 708 Complaint." Therefore, the Manager dismissed the complaint, pursuant to Section 708.17(c)(3).

On September 3, 2008, the complainant filed an appeal of the dismissal by the Manager with the Office of Hearings and Appeals. 10 C.F.R. § 708.18.

II. ANALYSIS

Section 708.17 provides, in relevant part, that "dismissal for lack of jurisdiction or other good cause is appropriate if … [the complainant] filed a complaint under State or other applicable law with respect to the same facts as alleged in a complaint filed under [Part 708]." 10 C.F.R. § 708.17 (c) (3); *see also, Gary S. Vander Boegh*, 29 DOE ¶ 87,010 (2006). We have reviewed the complaint and the Manager's dismissal. Based on the information contained in the complaint and other information gathered in this proceeding, we find no error in the Manager's determination that the Complainant's Part 708 complaint was based on the same facts as alleged in her filing in New Mexico state court and, therefore, should be dismissed.

In her appeal, the Complainant maintains that she believed the prohibition on pursuing a Part 708 claim while pursuing a claim alleging the same facts in another forum applied only to "State investigations" and not "legal cases." Appeal at 1. The Complainant further states that, in July 2008, she instructed her attorney to withdraw the claim pending in New Mexico state court, but he failed to carry out her instructions. After dismissing her attorney, the Complainant filed a motion to dismiss the state claim on August 25, 2008. *Id*. However, the record does not indicate that the state claim has been dismissed as of the date of the appeal.

The Complainant's argument on appeal that she was unaware that she could not simultaneously pursue a Part 708 case and a State claim is unpersuasive. When she filed her complaint with the Manager, the Complainant signed an affirmation which stated, *inter alia*, that she had "not pursued a remedy available under State or other applicable law." *See* Complainant's Affirmation, dated October 10, 2006. The Complainant gives no reason as to how she could have misinterpreted this plain language. Further, as noted above, the Complainant expressly stated in her complaint that she knew she could not pursue two claims simultaneously. Her current assertion that she believed that prohibition applied only to "State investigations," and not other legal proceedings, is disingenuous.

However, as noted above, Section 708.17(c)(3) only precludes a filing under State or other applicable law "with respect to the same facts alleged in the [Part 708] complaint…. " 10 C.F.R. § 708.17(c)(3). Therefore, in order to give the instant appeal thorough consideration, we have reviewed the state claim currently pending in New Mexico state court in order to ascertain whether the claims allege the same facts as set forth in the Part 708 Complaint. *See* E-mail from

Michele Rodriguez de Varela, NNSA, to Diane DeMoura, OHA, September 4, 2008 (attaching copy of the Complainant's filing in New Mexico state court). The Complainant refers to her state filing as a claim for "EEO Retaliation and Wrongful Termination." *See* Appeal at 1; Complaint at 1. In past Part 708 cases, we have found that, because the factual prerequisites in Part 708 cases and EEO claims differ, they should not be considered to be based upon "the same facts" for the purposes of 10 C.F.R. § 708.17(c)(3). *See Gilbert J. Hinojos*, 28 DOE ¶ 87,037 (2003), citing *Carl J. Blier*, 27 DOE ¶ 87,514 (1999) (Americans with Disabilities Act and Rehabilitation Act (ADA/RA) complaints do not bar Part 708 complaint since ADA/RA complaints require different factual motivation for employer's adverse personnel action), and *Lucy B. Smith*, 27 DOE ¶ 87,520 (1999) (Age Discrimination in Employment Act (ADEA) complaint does not bar Part 708 complaint since ADEA complaint requires different factual motivation for employer's adverse personnel action). Therefore, in this case, if the Complainant's state claim is an EEO claim – that is, a claim alleging that she was retaliated against based on race, religion, sex, national origin or other similar basis – her Part 708 claim should not be dismissed under 10 C.F.R. § 708.17(c)(3).

Although the Complainant refers to the New Mexico state court filing as a claim for "EEO Retaliation and Wrongful Termination," the claim is not based on EEO grounds. Rather, the filing is, in fact, virtually identical to her Part 708 complaint, alleging retaliation and wrongful termination on the same grounds as those cited in her Part 708 complaint. The Complainant has alleged no facts or circumstances that relate to EEO matters in the state filing. Given that the New Mexico state court proceeding, alleging the same facts as the Part 708 complaint, is currently pending, the Part 708 complaint was properly dismissed under 10 C.F.R. § 708.17(c)(3). Accordingly, we find that the determination of the Manager should be sustained, and the instant appeal should be denied.

It Is Therefore Ordered That:

(1) The Appeal filed by Dr. Leslie D. Cumiford, Case No. TBU-0081, is hereby denied.

(2) This Decision shall become a Final Agency Decision unless a party files a Petition for Secretarial Review with the Office of Hearings and Appeals within 30 days after receiving this decision, pursuant to 10 C.F.R. § 708.19.

Poli A. Marmolejos
Director
Office of Hearings and Appeals

Date: September 18, 2008

October 6, 2008

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Appeal

Name of Case: Thomas L. Townsend

Date of Filing: September 15, 2008

Case Number: TBU-0082

Thomas L. Townsend (Townsend) appeals the dismissal of his complaint of retaliation and request for investigation filed under 10 C.F.R. Part 708[1] by the Oak Ridge Operations Office (OR) of the Department of Energy (DOE). As explained below, the dismissal of the complaint should be upheld.

I. Background[2]

Townsend was an employee of LeGacy Resource Consulting Corporation (LRCC), a contractor at the DOE's Oak Ridge facility. In his position, he analyzed the suitability of employees to receive and maintain security clearances. On December 12, 2006, Townsend sent an E-mail (12/12 E-mail) to the Secretary of Energy (Secretary) in which he praised the performance of two federal employees, one of whom was his supervisor. In the 12/12 E-mail he urged that both employees be given promotions to a higher federal pay grade and alleged that "[t]his operations office has held back people for reasons you are not aware of." September 7, 2007, complaint submitted by counsel for Townsend, Loring E. Justice, to Gerald Boyd, Manager, Oak Ridge Operations Office (Complaint) at 2. Later, on February 15, 2007, Townsend sent another E-mail (2/15 E-mail) to the Secretary of Energy in which he urged the Secretary during his visit to Oak Ridge to talk to personnel security analysts at Oak Ridge. Such discussion, he goes on to state, would convince the Secretary of the need for "centralization of personnel security." Complaint at 2. He goes on to allege, "I am not crying wolf but I think you need to hear the real story from people [who] have for years thought about this situation and been told to keep quiet [and] are ordered to grant and continue cases that the headquarters staff would disapprove." Complaint at 2.

---

[1]The DOE Contractor Whistleblower Program, 10 C.F.R. Part 708 prohibits employers from retailiating against contractor employees who engage in various defined protected activities such as, reporting a substantial violation of law, gross mismanagement or waste of funds, or a substantial and specific danger to employees or public health and safety. *See* 10 C.F.R. § 708.5.

[2]This section relies on the facts alleged in Townsend's September 7, 2007, complaint and in his Appeal submission submitted September 15, 2008.

On May 30, 2007, Townsend received a letter from the Deputy Manager of the Oak Ridge Operations Office. The letter acknowledged a January 31, 2007, E-mail from Townsend praising his supervisor and informed him that his supervisor was receiving a "desk audit" in connection with a possible increase in federal pay grade level.

On June 11, 2007, Townsend sent the Secretary another E-mail (6/11 E-mail) in which he informed the Secretary that due to a lack of funding, Townsend would not be retained in his employment past June 22, 2007, despite the fact that a backlog of security cases had not been completely resolved. He goes on to state his belief that his impending termination was prompted in part by his previous three E-mails[3] to the Secretary. Complaint at 3. He goes on to urge the Secretary to consider his supervisor's request for additional funding especially given that "inspection reports" identified a lack of staff for his supervisor. He then states:

> It is hard for me to understand why you pay a contract[or] $53.19 an hour and the person doing the work gets only $30.00 [per hour]. I understand the need for minority contracts but when an organization is short handed, has backlogs and looks at what is coming up, such as caseloads from OPM, it is hard to understand why she would not be allowed to hire someone on a personal services contract and save the Department a lot of money. Again it was a pleasure working for your organization and if someone finds more money for [his supervisor] maybe I would consider returning to help her.

Complaint at 3.

On June 11, 2007, Townsend was asked by a LRCC supervisor whether he had sent the Secretary an E-mail, to which he replied in the affirmative. The supervisor then instructed Townsend not to send another E-mail to the Secretary. The next day, June 12, the LRCC supervisor went to see Townsend and asked when was the last time he had E-mailed the Secretary. Townsend replied that he had sent an E-mail "yesterday." The LRCC supervisor then asked for a copy of the E-mail. Later that day, Townsend was informed by the LRCC supervisor that he had been terminated from his position at LRCC. September 15, 2008, Appeal submission from Thomas L. Townsend (Appeal) at 2. Townsend subsequently received a letter from LRCC dated June 14, 2007, informing him of the grounds for his termination from LRCC. The letter specifically alleged that Townsend, in three E-mails, had "lobb[ied] on behalf of a federal employee" and had disclosed the firm's billing rate as well as his own pay rate.[4] These disclosures, the letter stated, violated company policies regarding Conflict of Interest, Confidential and Company Sensitive Information and E-mail Access and disclosure. June 14, 2007, letter from LRCC Director of Human Resources to Tom Townsend.

---

[3]It is uncertain from the Complaint which three previous E-mails Townsend is referring to in this E-mail.

[4]Presumably LRCC's reference to lobbying referred to Townsend's advocacy in the 12/12 E-mail for a higher pay grade for his supervisor and for another federal employee.

In his Complaint, dated September 7, 2007, Townsend alleged that he had been terminated from his employment because of his previous E-mail communications with the Secretary. The Complaint alleged that his E-mail communications "raised issues relating to substantial violations of law, rule or regulations, dangers to employees and public health and safety and in particular fraud, gross, mismanagement, gross waste of funds and abuse of authority." Complaint at 5. The Manager of the Oak Ridge Operations Office delegated review of the Complaint to the Office of Chief Counsel.[5]

On September 5, 2008, Wendy E. Bryant (Bryant), an attorney with the OR Office of Chief Counsel, on behalf of OR, issued Townsend a letter dismissing the Complaint. The letter details the author's investigation of the Complaint including discussions the author had with Townsend and other individuals mentioned in his E-mails. It went on to state that Townsend, at a meeting with Bryant, alleged that he had reported wronging to the Secretary "in other E-mails" but would not tell the author anything specific about the alleged wrongdoing. September 5, 2008, Letter from Wendy E. Bryant, Office of Chief Counsel, OR, to Thomas L. Townsend at 3 (Dismissal Letter). The Dismissal Letter also described how Bryant reviewed a transcript of Townsend's unemployment compensation hearing. As a result of the Bryant's review of the available information, Townsend's Complaint was dismissed. Bryant found that the information contained in Townsend's E-mail communications did not constitute a protected activity under Part 708. Specifically, Bryant found that the difference between what Townsend was paid versus what LRCC charged the DOE "did not demonstrate fraud, waste or abuse." Dismissal Letter at 3. Additionally, Bryant found no evidence that a DOE official had abused his or her authority. Dismissal Letter at 4. Bryant further found that Townsend's employer had a "clear basis for terminating your employment" and cited the unemployment compensation tribunal's Decision in favor of LRCC. In this regard, Bryant cited the tribunal's finding that Townsend, in his E-mail communications, was "lobbying" for his supervisor as well as himself. Dismissal Letter at 3. The Dismissal Letter did not specify under what regulatory provision the Complaint was being dismissed, although the letter provided Townsend with a copy of the regulations for appealing a dismissal of a whistleblower complaint for a lack of jurisdiction or other good cause.

In his Appeal submission of September 15, 2008, Townsend cites a number of instances where he disagrees with the facts and conclusions reported in the Dismissal Letter and with the summation of his discussion with the author of the Dismissal Letter. He reasserts his belief that "Oak Ridge Management told [LRCC] to get rid of me." September 15 2008, Appeal submission from Thomas L. Townsend to Poli A. Marmolejos, Director, OHA, (Appeal) at 3. He also asserts that he did not discuss the nature of the wrongdoing with Bryant because she worked for OR Management. However, he later reported these concerns to DOE's Office of the Inspector General. He asserts his belief that the Secretary, as the official responsible for all DOE operations, was authorized to receive the pay data he sent in the 6/11 E-mail. He also cites an April 11, 2006, Memorandum from the Secretary stating that DOE contractor personnel have the right to report safety and management

[5]The Manager delegated review of the Complaint from the Employee Concerns Manager (EC Manager) at Oak Ridge because of an allegation by Townsend that the EC Manager might have of conflict of interest with regard to the Complaint. *See* September 16, 2008, E-mail from Rufus Smith, EC Manager to Richard A. Cronin, Jr., Attorney-examiner, OHA.

concerns to DOE. Townsend also argues that, with regard to the allegation that he was lobbying for a job, he had previously been in discussion with another firm that would employ him to do similar work. He also challenges LRCC's assertion that it lacked funding to employ him past June 22, 2007, by noting that LRCC has already hired another person for his former position.

II. Analysis

Section 708.17(c) authorizes a DOE EC-Manager to dismiss a whistleblower's complaint in the following circumstances:

> (1) Your [the whistleblower] complaint is untimely; or
>
> (2) The facts, as alleged in your complaint, do not present issues for which relief can be granted under this regulation; or
>
> (3) You filed a complaint under State or other applicable law with respect to the same facts as alleged in a complaint under this regulation; or
>
> (4) Your complaint is frivolous or without merit on its face; or
>
> (5) The issues presented in your complaint have been rendered moot by subsequent events or substantially resolved; or
>
> (6) Your employer has made a formal offer to provide the remedy that you request in your complaint or a remedy that DOE considers to be equivalent to what could be provided as a remedy under this regulation.

10 C.F.R. § 708.17(c). The Dismissal Letter does not explicitly state under which provision under section 708.17(c) the Complaint was dismissed, but from the content of the letter it apparently was dismissed because the Complaint was "frivolous or without merit on its face."[6] *See* 10 C.F.R.§ 708.17(c)(4).

After reviewing Townsend's complaint, we find that OR properly dismissed it since the Complaint was without merit on its face.

Section 708.5 provides in relevant part that protected conduct includes disclosure of information that an employee reasonably believes reveals - a substantial violation of a law, rule, or regulation; a substantial and specific danger to employees or to public health or safety; or fraud, gross mismanagement, gross waste of funds, or abuse of authority. 10 C.F.R. § 708.5(a). As discussed

[6]We note that the Complaint appears to have been filed in a timely manner. The Dismissal Letter did not allege that the Complaint had been untimely filed. Townsend was terminated on June 11, 2007, and the Complaint was dated September 7, 2007. Accordingly, the 90-day deadline for filing a whistleblower complaint set forth in 10 C.F.R. § 708.14 seems to have been satisfied. Nor does this appear to be a case where relief could not be granted.

above, OR found that the E-mails referenced in Townsend's complaint did not meet the requirements for protected conduct.

To the extent that Townsend's 12/12 E-mail might attempt to identify an abuse of authority, a violation of law, rule, or regulation or a substantial and specific danger to employees or to public health and safety by virtue of its statement that "[t]his operations office has held back people for reasons you are not aware of," we find that this allegation is too vague to be considered a protected disclosure. The E-mail does not specify the nature of the alleged wrongdoing or the parties involved. In this regard, the Dismissal Letter records OR's request that Townsend disclose details as to alleged wrongdoing, yet Townsend failed to provide any information to the OR attorney processing his Complaint. The 12/12 E-mail fails to reasonably identify a violation of law, a substantial and specific danger to employees or public health and safety, gross mismanagement or a gross waste of funds. Consequently, OR properly found that 12/12 E-mail did not constitute a protected disclosure under Part 708.

The 2/15 E-mail alleges that various OR security supervisors instructed security personnel to grant security clearances to personnel despite the analyst's view that the clearance should not be granted. This disclosure might conceivably describe a substantial violation of a law, rule, or regulation or reporting an abuse of authority. 10 C.F.R. § 705(a)(1),(3).[7] However, the 2/15 E-mail does not contain any specific details as to who allegedly was pressuring analysts to grant inappropriate security clearances or the extent of the perceived problem. The 2/15 E-mail does not contain any facts as to the nature or identity of the rule, regulation or law which is alleged to have been violated. Consequently, we cannot find that the 2/15 E-mail disclosed a "substantial violation of law, rule or regulation."

Nor can we find that the 2/15 E-mail sufficiently describes an abuse of authority to sustain Townsend's Complaint. An abuse of authority occurs when there is an arbitrary or capricious exercise of power by a official or employee that adversely affects the rights of any person or that results in personal gain or advantage to himself or to preferred other persons. *See Frank E. Isbill*, 27 DOE ¶ 87,529 at 89,159 (Case No. VWA-0034) (September 27,1999). As discussed earlier, the Complaint does not contain any specific details regarding the pressuring of analysts to grant inappropriate security clearances. A disagreement between a supervisor and an analyst regarding security clearance eligibility does not, by itself, reflect an abuse of authority. Consequently, we agree with OR's determination that the 2/15 E-mail can not be considered a protected disclosure referencing an abuse of authority. [8]

The 6/11 E-mail references a potential waste of funds regarding the contracting out of security functions. As noted above, the Part 708 regulations provide that an employee may not be retaliated against for reporting a "gross" waste of funds. 10 C.F.R. § 708.5(a)(3). OHA has defined a "gross

---

[7]The 2/15 E-mail does not reference a specific danger to employees or to public health and safety.

[8]Townsend later reported his concerns to the Inspector General but such a subsequent disclosure does not make the 2/15 E-mail a protected disclosure referencing a "substantial" violation of law, rule or regulation for Part 708 purposes.

waste of funds" as "a more-than-debatable expenditure that is significantly out of proportion to the benefit reasonably expected to accrue to the government." *See See Fred Hua*, 30 DOE ¶ _____ (Case No. TBU-0078) (May 2, 2008) (*Hua*) (*citing Jensen v. Dep't of Agriculture*, 104 M.S.P.R. 379 (2007)).

While Townsend did identify specific per hour cost figures contrasting the difference between what his contractor employer charged the government and what they actually paid their employees, the 6/11 E-mail is essentially silent as to how this is a waste of funds, much less a "gross" waste of funds. As OR noted in its dismissal letter, it is a normal contracting practice to pay a contractor more than it pays its employees. Even though there might be more economical ways to perform the services involved, such as through a personal services contract, there is no information here to suggest any waste at all, much less an expenditure out of proportion to the benefit to be gained. Consequently, we find that OR properly found that the 6/11 E-mail did not constitute a protected disclosure as to a gross waste of funds. *See Hua*, slip op. at 3 (complaint stating only that "millions of dollars" could have been saved found to be vague and inadequate for purposes of determining that it fell under section 708.5(a)(3), or could survive dismissal pursuant to section 708.17).

Given the preceding considerations, we find that OR properly determined that the E-mails referenced in Townsend's Complaint could not be considered protected disclosures and thus properly dismissed the Complaint as being without merit on its face.

IT IS THEREFORE ORDERED THAT:

(1) The Appeal filed by Thomas L. Townsend (Case No. TBU-0082) is hereby denied.

(2) This Decision shall become a Final Agency Decision unless a party files a Petition for Secretarial Review with the Office of Hearings and Appeals within 30 days after receiving this decision, pursuant to 10 C.F.R. § 708.19.

January 26, 2009

DECISION AND ORDER
OF THE DEPARTMENT OF ENERGY

Decision of the Director

Name of Petitioner: Clarrisa V. Alvarez

Date of Filing: January 5, 2009

Case Number: TBU-0084

Clarissa Alvarez, an employee of NetGain Corporation (NetGain) in Albuquerque, New Mexico, appeals the dismissal of her whistleblower complaint (the Complaint) filed under 10 C.F.R. Part 708, the DOE Contractor Employee Protection Program. On December 1, 2008, the Whistleblower Program Manager at the DOE's National Nuclear Security Administration Service Center, Albuquerque, New Mexico (NNSA/Albuquerque) dismissed the Complaint. As explained below, dismissal of the Complaint is reversed, and the matter is remanded to NNSA/Albuquerque for further processing.

I. Background

The DOE's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste and abuse" at DOE's government-owned, contractor-operated facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purposes are to encourage contractor employees to disclose information which they believe exhibits unsafe, illegal, fraudulent, or wasteful practices, and to protect those "whistleblowers" from consequential reprisals by their employers. The regulations governing the DOE's Contractor Employee Protection Program are set forth at Title 10 Part 708 of the Code of Federal Regulations.

Under Part 708, the DOE office initially receiving a complaint may dismiss the complaint for lack of jurisdiction or other good cause. 10 C.F.R. § 708.17. The complainant may appeal such a dismissal to the OHA Director. 10 C.F.R. § 708.18.

Ms. Alvarez was employed as a "Personnel Security Specialist II" by NetGain at the NNSA Service Center in Albuquerque. After being terminated, Ms. Alvarez filed a Part 708 complaint with NNSA/Albuquerque, alleging that she had been terminated in retaliation for raising concerns to NetGain Management about the inappropriate dissemination of personal information from her Personnel Security File. Ms. Alvarez also alleges that her termination occurred in retribution for reporting "harassment" by her co-workers and supervisors.

On December 1, 2008, the Whistleblower Program Manager at NNSA/Albuquerque dismissed the Complaint. Letter from Michelle Rodriguez de Varela, Whistleblower Program Manager, NNSA/Albuquerque, to Clarissa V. Alvarez ("Dismissal Letter"). The Dismissal Letter states, in pertinent part:

> I find that your complaint fails to demonstrate that you were retaliated against for disclosing a 'protected activity' under 10 C.F.R. § 708.5 to a DOE Official, Member of Congress, a responsible government oversight official. The facts alleged do not rise to the level of (1) a substantial violation of law, rule or regulation, (2) a substantial and specific danger to employees or public health or safety, or (3) fraud, gross mismanagement, gross waste of funds, or abuse of authority.
>
> There is not any evidence to support that NetGain violated disclosure of sensitive information. Information in the Personnel Security files are only released with those with a need to know and the files and access is also controlled with a need to know. There is not any other evidence presented to support any other violation of any laws covered by 10 C.F.R. Part 708.
>
> None of these allegations you allege constitute a protected activity as described in §708.5 and therefore your complaint is dismissed for lack of jurisdiction per §708.17.

Dismissal Letter at 1.

In her Appeal, Ms. Alvarez contends that the Complaint was wrongly dismissed and requests an extension of time in which to supplement her appeal. Appeal at 1-3.

II. Analysis

Part 708 provides that the DOE may dismiss a complaint for "lack of jurisdiction or for other good cause . . ." 10 C.F.R. § 708.17.

> Dismissal for lack of jurisdiction or other good cause is appropriate if:
>
> (1) Your complaint is untimely; or
>
> (2) The facts, as alleged in your complaint, do not present issues for which relief can be granted under this regulation; or
>
> (3) You filed a complaint under State or other applicable law with respect to the same facts alleged in a complaint under this regulation; or
>
> (4) Your complaint is frivolous or without merit on its face; or

(5) The issues presented in your complaint have been rendered moot by subsequent events or substantially resolved; or

(6) Your employer has made a formal offer to provide the remedy that you request in your complaint or a remedy that DOE considers to be equivalent to what could be provided as a remedy under this regulation.

10 C.F.R. § 708.17(c).

As an initial matter, the Whistleblower Program Manager does not specify which, if any, of the reasons listed in section 708.17(c) provides the basis for dismissing the Complaint. Instead, the Dismissal Letter appears to address the ultimate validity of Ms. Alvarez's allegations rather than considering whether Ms. Alvarez "reasonably believed" these allegations constituted protected activity under Part 708.

Part 708 protects a DOE contractor employee from retaliation for, among other things, disclosing to her "employer . . . , information that [she] reasonably and in good faith believe reveals . . . a substantial violation of a law, rule, or regulation." 10 C.F.R. § 708.5(a)(3). At the heart of Ms. Alvarez's Complaint are her contentions that her termination resulted from her alleging, in a series of electronic mail messages to Thorne A. Davis, Program Administrator, NetGain Corporation, that she was being harassed by NetGain employees and that this alleged harassment resulted in part from the inappropriate disclosure of derogatory information contained in her Personnel Security File by NetGain employees who had participated in the adjudication of her DOE security clearance.

After carefully reviewing the subject Complaint, I do not find it to be frivolous or without merit on its face. It is possible with further factual development that Ms. Alvarez might meet her evidentiary burden of showing that her allegations constituted protected disclosures under Part 708 as "a substantial violation of a law, rule or regulation." These kinds of matters are the very type of issues that OHA is charged with investigating under 10 C.F.R. § 708.22 and considering through the hearing process described in 10 C.F.R. § 708.28. Accordingly, I conclude that the Whistleblower Program Manager erred in dismissing the Complaint. For this reason, I reverse that dismissal and remand the Complaint for further appropriate processing. [1]

III. Conclusion

As indicated by the foregoing, I find that NNSA/Albuquerque incorrectly dismissed the complaint filed by Ms. Alvarez. Accordingly, I direct that the Complaint be accepted for further consideration.

This decision and order has been reviewed by the National Nuclear Security Administration (NNSA), which has determined that, in the absence of a petition for Secretarial review or upon

[1] Since I have found in Ms. Alvarez's favor on the existing record, her request for an extension of time in which to supplement the record is denied.

conclusion of an unsuccessful petition for Secretarial review, the decision and order shall be implemented by the affected NNSA element, official or employee, and by each affected contractor.

It Is Therefore Ordered That:

(1) The Appeal filed by Clarissa V. Alvarez (Case No. TBU-0084) is hereby granted and her Part 708 complaint is hereby remanded to the National Nuclear Security Administration Service Center, Albuquerque, for further processing as set forth at 10 C.F.R. Part 708.

(2) This Appeal Decision shall become a Final Agency Decision unless a party files a petition for Secretarial review with the Office of Hearings and Appeals within 30 days after receiving this decision. 10 C.F.R. § 708.18(d).

Poli A. Marmolejos
Director
Office of Hearings and Appeals

Date: January 26, 2009

June 18, 2010

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Appeal

Name of Case: Melinda Gallegos

Date of Filing: June 9, 2010

Case Number: TBU-0103

Melinda Gallegos (Gallegos or the complainant) appeals the dismissal of her complaint of retaliation and request for investigation filed under 10 C.F.R. Part 708, the Department of Energy (DOE) Contractor Employee Protection Program. As explained below, the dismissal of the complaint should be affirmed.

I. Background

The complainant states that during the period 1989 until 1998, she was an employee of the Los Alamos County Fire Department (LACFD), which she states was at that time a DOE-subsidized subcontractor at the DOE's Los Alamos National Laboratory (LANL). She asserts that in 1995, she expressed safety concerns to her supervisor about a Criterion Task Test, and that she received a two-day suspension for refusing to participate in the test. She states that in 1996 she suffered a disabling injury on the job and was placed on leave without pay for two years, without compensation or disability benefits, and that her employment was terminated by the LACFD in 1998.

On April 15, 2010, Gallegos filed a complaint of retaliation under Part 708 with the Whistleblower Program Manager of the DOE's National Nuclear Security Service Center (the WP Manager). The complainant alleges that due to her protected disclosures and activity, she was provided no compensation or disability benefits for her job related injury. She seeks relief for the expenses that she incurred, including two years salary, attorneys fees, medical expenses, and mileage. Gallegos Part 708 Complaint at 1-3.

On May 20, 2010, the WP Manager informed Gallegos that DOE was dismissing her Part 708 Complaint because it was untimely. The WP Manager states that 10 C.F.R. § 708.14(a) establishes a filing deadline of 90 days from the date that Gallegos knew or reasonably should have known of the alleged retaliation. The WP Manager finds that the period of 12 years from Gallegos' termination by LACFD until her filing of a Part 708 Complaint "far surpasses" this time frame. May 20, 2010 letter from WP Manager to Gallegos.

II. Analysis

In a submission dated June 4, 2010, Gallegos appealed the WP Manager's determination dismissing her Part 708 Complaint. In this submission, Gallegos argues that her health issues were due to "illegal and egregious prohibited personnel employment practices" to which she was subjected by the DOE from "1987 to 1991" and by LACFD from 1991 until 1998. She asserts that she is twelve years late filing a Part 708 Complaint because she was incapacitated after her 1998 termination, and is presently suffering from the same progressive, disabling condition, a muscle spasm affecting the eyelid known as blepharospasm, that initially was diagnosed in 1996. She states that she was unable to appropriately respond with a Part 708 Complaint within the allowed time due to the heavy medication prescribed by her treating physician. June 4, 2010 Appeal Letter at 1-2.

As a general matter, the DOE has found that relaxing the 90 day filing requirement for Part 708 Complaints is not appropriate and does not serve to enhance whistleblower protection. As the Hearing Officer observed in *Steven F. Collier*, Case No. VBH-0084 (2003), the DOE wants to encourage complainants to raise allegations soon after retaliatory actions occur, so that the allegations may be investigated promptly, and so that employers need not fear open-ended exposure to liability from complainants that perceive retaliation years after the alleged retaliatory actions occurred. *Id.* at 9. Further, we have consistently found that it is the individual's burden under Part 708 to know and to meet Section 708.14 filing requirements. *See Caroline Roberts*, Case No. TBU-0040 (2006).

Nevertheless, 10 C.F.R. § 708.14(d) provides DOE with some discretion to accept late filings of Part 708 complaints if it determines that there is a good reason for the delay. However, in the present case, Gallegos has filed her Part 708 Complaint approximately 12 years after her termination by LACFD. It is difficult to conceive of any circumstances that would justify such a lengthy delay. In her Appeal, Gallegos asserts that she waited 12 years to file her complaint because she has been incapacitated with blepharospasm during this entire period, and that the medications prescribed by her doctors for this condition prevented her from appropriately filing within the allowed time frame. June 5, 2010 Gallegos Appeal letter at 1-2. We have reviewed the medical reports attached to Gallegos' Appeal, and we find that the medical conditions and medications documented in these reports are insufficient to justify her delay in filing her complaint. The medical data submitted by Gallegos with her Appeal indicates that in August, 1996, a LANL physician found that she was suffering with blepharospasm of the left eye, which interfered with her vision, and incapacitated her from working as a firefighter. Appeal Attachment 9. In 1997, her personal physician's medical records indicate that her physician diagnosed Gallegos as suffering from muscle spasms in her left eyelid (blepharospasm). These records indicate that at that time, Gallegos was taking medication as treatment for the blepharospasm, and also had received some botox injections to treat the condition. In her report, Gallegos' doctor notes that "[s]he's been running most days in spite of the cold weather." She summarized her medical advice to Gallegos as follows:

> We have discussed the fact that this condition can go on for a long time and that keeping good control so that she can function normally is the most likely outlook. She is to continue her exercise . . . . [Followup] in 3 months.

Appeal Attachment 12. Finally, the September 2009 notes of an examination of Gallegos by her eye doctor indicate that Gallegos reported spasms in her left eye as ongoing for several years, reported mild spasms in her right eye beginning about three weeks earlier, and was being treated with botox injections. Appeal Attachment 13.

While the discomfort caused by Gallegos' blepharospasm is evident from these medical reports, it appears that she has been able to exercise and to lead a fairly normal life despite her blepharospasm and her use of medication or injections to reduce or control it. Accordingly, we find that her ongoing medical condition as documented in her Appeal does not justify the extension of the Part 708 filing requirements that she seeks. We therefore find that the WP manager's determination that Gallegos' Part 708 Complaint should be dismissed as untimely filed is correct, and that the Appeal should be denied. *See Charles Montano*, Case No. TBU-0067 (2007).

IT IS THEREFORE ORDERED THAT:

(1) The Appeal filed by Melinda Gallegos (Case No. TBU-0103) is hereby denied.

(2) This decision is the final decision of the Department of Energy unless, by the 30th day after receiving the appeal decision, a party files a petition for Secretarial review.

Poli A. Marmolejos
Director
Office of Hearings and Appeals

Date: **June 18, 2010**

December 6, 2010

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Appeal

Name of Case: Greta Kathy Congable

Date of Filing: November 8, 2010

Case Number: TBU-0110

Greta Kathy Congable (the Appellant) appeals the dismissal of her complaint of retaliation and request for investigation filed under 10 C.F.R. Part 708, the Department of Energy (DOE) Contractor Employee Protection Program.[1] As explained below, the Appeal should be granted in part and remanded for further processing.

I. Background

The Appellant is an employee of Sandia Corporation (Sandia)[2], the contractor responsible for operating the DOE's Sandia National Laboratory (SNL). On September 14, 2010, the Appellant filed a complaint of retaliation under Part 708 with the National Nuclear Security Administration Service Center (NNSA/SC) in Albuquerque, New Mexico. In her complaint, the Appellant asserts that she made the following protected disclosures:

(1) In September 2008 she reported the "loss of control" of Personal Identification Information (PII) contained in collaborative share folders in SNL's internal computer network to her management and to the Sandia legal department (Disclosure 1);

(2) She provided testimony on behalf of two co-workers, Pat O'Neill and Mark Ludwig, who had raised concerns regarding possible misconduct in a formal ethics investigation conducted by Sandia/Lockheed Martin (Disclosure 2).[3]

Because of these alleged protected disclosures, the Appellant further asserted that effective on June 18, 2010, she was transferred from her position as an administrative assistant in the Corporate Investigations Department of Sandia to another department.

---

[1] OHA reviews jurisdictional appeals under Part 708 based upon the pleadings and other information submitted by the Appellant. *See* 10 C.F.R. § 708.18(b) (appeal must include a copy of the notice of dismissal, and state the reasons why you [the Appellant] think the dismissal was erroneous).

[2] Sandia is a wholly owned subsidiary of Lockheed Martin.

[3] Neither the Appellant nor the NNSA/SC's Whistleblower Program Manager (WP Manager) specified what were the exact nature of the ethics investigation disclosures.

In a letter dated October 27, 2010, the WP Manager dismissed the Appellant's Part 708 complaint. With regard to Disclosure 1, the WP Manager found that there was no causal connection between the Appellant's disclosure in September 2008 and her subsequent transfer in 2010. Specifically, the WP Manager found that the significant amount of time that elapsed between the two events ("a lack of temporal proximity") led to the conclusion that the two events were unrelated. Accordingly, she found that, to the extent that the complaint was based on Disclosure 1, it should be dismissed.

With regard to Disclosure 2, the WP Manager again found that there was no causal connection between the Appellant's participation in the ethics investigation and the Appellant's 2010 lateral transfer.[4] In making this finding, the WP Manager cited the Lockheed Martin investigator's finding that no misconduct could be substantiated. Thus, according to the WP Manager, none of the disclosures made during the investigation could be considered a "protected disclosure" as defined by Part 708. The WP Manager went on to state that there was no other basis to conclude that the Appellant's lateral transfer was based upon any reason other than the recommendation by the Lockheed Martin investigator that the Appellant be transferred because her relationship with her manager was "irreparably broken." Accordingly, the WP Manager found that, to the extent that the complaint was based on Disclosure 2, it should also be dismissed. [5]

II. Analysis

A. Disclosure 1

In her appeal, the Appellant argues that the WP Manager was incorrect in finding that there was insufficient temporal proximity between her disclosures in September 2008 and her transfer in June 2010 to permit an inference of a causal connection between the two events.

Section 708.17(b) (4) of 10 C.F.R. provides for dismissal where a complaint is frivolous or without merit on its face. In the present case, the Appellant claims that she has been subjected to retaliation for making a protected disclosure (Disclosure 1). Such retaliation is prohibited under 10 C.F.R. § 708.5(a). For a complainant to sustain a whistleblower complaint, he or she must prove by a preponderance of the evidence that the protected activity was a contributing factor in the alleged retaliatory act. 10 C.F.R. § 708.29. In the present case, the Appellant has alleged no basis for us to conclude that her September 2008 disclosure was a contributing factor in her June 2010 transfer.

A relevant consideration is time proximity between the protected activity and the alleged retaliation. *See, e.g., Curtis Hall*, Case No. TBA-0042 (February 13, 2008).[6] In the present case,

[4] None of the material available to us indicates when the Appellant participated in the ethics investigation.

[5] The WP Manager also justified dismissal of the Appellant's complaint based upon the fact that the Appellant had requested retirement from her position and thus her complaint was rendered moot. The Appellant has since withdrawn her retirement request and thus her complaint cannot now be considered moot.

[6] Decisions issued by the Office of Hearings and Appeals (OHA) after November 19, 1996, are available on the OHA website located at http://www.oha.doe.gov. The text of a cited decision may be accessed by entering the case

the period of time from the date when the Appellant made her disclosure about the loss of control of PII material, September 2008, to the date of the alleged retaliation – her June 2010 transfer - is approximately 20 months. This is an unusually extended period of time which does not support an inference that a causal connection exists between the September 2008 disclosure and the Appellant's transfer in June 2010. *See Donald Searle,* Case No. TBU-0079 (July 25, 2008) (no connection found between a protected activity and alleged retaliation 12 months later).

In her Appeal, the Appellant directs our attention to *Sue Rice Gossett*, Case No. VBZ-0062 (May 8, 2002) (*Gossett*), and *Russell P. Marler*, Case No. VWA-0024 (August 31, 1998) (*Marler*), for the proposition that a finding of temporal proximity may be found between protected conduct and retaliation occurring as much as a one and one-half years and four years apart, respectively. In *Gossett*, however, the whistleblower made a series of disclosures during her one and one-half year tenure with her employer and had a series of reassignments leading to her termination. Thus, unlike in the present case, there was not a one and one-half year gap between the protected activity and the alleged retaliation. With regard to *Marler,* we note that the decision was an initial agency decision issued by a hearing officer. Subsequent appellate decisions issued by various Directors of OHA, as cited above, have declined to follow the finding made in *Marler*. Consequently, we find reliance on *Gossett* and *Marler* to be unpersuasive.

Based on the foregoing, we affirm the WP Manager's finding that the September 2008 disclosure (Disclosure 1), as a matter of law, cannot be considered a contributing factor to the Individual's subsequent transfer in June 2010. Accordingly, to the extent that the Appellant's Part 708 complaint is based upon this disclosure, the WP Manager correctly determined that the complaint should be dismissed.

B. Disclosure 2

In her October 27, 2010, determination letter, the WP Manager found that there was no causal connection between Disclosure 2 and the Appellant's subsequent transfer. This finding was based upon the WP Manager's reasoning that the Lockheed Martin investigation found that the allegation of misconduct that was the subject of the investigation "could not be substantiated" and therefore "any disclosures [the Appellant] made during the investigation [were] not 'protected disclosures' within the meaning of 10 C.F.R. § 708.5(a)(1)-(3)."[7] Letter from Michelle

---

number of the decision in the search engine located at http://www.oha.doe.gov/search.htm.

[7] We were not presented a copy of the investigation or any information related to the nature of the disclosures the Appellant made during the ethics investigation. Nonetheless, in reviewing cases such as this we consider all materials in the light most favorable to the party opposing the dismissal. *See Billie Joe Baptist*, Case No. TBZ-0080, *slip op.* at 5 n. 13 (May 7, 2009) (citing *Adickes v. S.H. Kress & Co.*, 398 U.S. 144 (1970)). Consequently, we will consider that, for the sole purpose of deciding this appeal, the substance of the Appellant's alleged disclosures in the ethics investigation is of a nature that would meet the requirements for a protected disclosure pursuant to 10 C.F.R. § 708.5(a) (A Part 708 protected disclosure must reference: a substantial violation of a law, rule, or regulation; a substantial and specific danger to employees or to public health or safety; or fraud, gross mismanagement, gross waste of funds, or abuse of authority). In this regard, we note that the WP Manager did not make a finding that the substance of the Appellant's failed to meet the requirements of section 708.5(a). If this matter proceeds to

Rodriguez de Varela, Whistleblower Program Manager, NNSA, to Greta Kathy Congable (October 27, 2010). We disagree.

Section 708.5(a) of Part 708 defines the act of making a "protected disclosure" as follows:

> (a) Disclosing to a DOE official, a member of Congress, any other government official who has responsibility for the oversight of the conduct of operations at a DOE site, your employer, or any higher tier contractor, information that you reasonably believe reveals--
> (1) A substantial violation of a law, rule, or regulation;
> (2) A substantial and specific danger to employees or to public health or safety; or
> (3) Fraud, gross mismanagement, gross waste of funds, or abuse of authority;

As subsection (a) reveals, the only qualification for a disclosure to be protected under Part 708 is that the whistleblower "*reasonably believes*" that the substance of the disclosure reveals a substantial violation of a law, rule or regulation; a substantial and specific danger to employees, public health or safety; or fraud, gross mismanagement, gross waste of funds or abuse of authority. 10 C.F.R. § 708.5(a). The ultimate truth of protected disclosure is immaterial with regard to Part 708 if the whistleblower reasonably believed that his or her disclosure referenced one of the concerns listed in section 708.5(a). Consequently, the findings of the Lockheed Martin investigation are not determinative on the issue of whether the Appellant's disclosures in the investigation are protected under Part 708. We thus remand this matter to the WP Manager for further processing of the Appellant's complaint with regard to Disclosure 2 alone.

This decision and order has been reviewed by the NNSA, which has determined that, in the absence of an appeal or upon conclusion of an unsuccessful appeal, the decision and order shall be implemented by each affected NNSA element, official or employee and by each affected contractor.

IT IS THEREFORE ORDERED THAT:

(1) The Appeal filed by Greta Kathy Congable (Case No. TBU-0110) is hereby granted in part and her Part 708 complaint is hereby remanded to the National Nuclear Security Administration Service Center, Albuquerque, for further processing as set forth at 10 C.F.R. Part 708 as set forth above.

(2) This Appeal Decision shall become a Final Agency Decision unless a party files a petition for Secretarial review with the Office of Hearings and Appeals within 30 days after receiving this decision. 10 C.F.R. § 708.18(d).

---

investigation, the OHA investigator can examine the content of these alleged disclosures to make a factual finding regarding the sufficiency of these disclosures to support a Part 708 claim.

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Appeal

Name of Case: Gennady Ozeryansky

Date of Filing: January 27, 2011

Case Number: TBU-0113

Gennady Ozeryansky (hereinafter referred to as the complainant) appeals the dismissal of his complaint of retaliation and request for investigation filed under 10 C.F.R. Part 708, the Department of Energy (DOE) Contractor Employee Protection Program. As explained below, the Appeal should be dismissed without prejudice and the matter should be remanded for further processing.

I. Background

During the period 2006 until 2009, the complainant was an employee of SupraMagnetics, Inc. (SupraMagnetics). SupraMagnetics designs and develops semiconductors for use in particle acceleration applications. The complainant states that during the period of his employment, SupraMagnetics received grants from the DOE's Small Business Innovation Research (SBIR) funding stream. The complainant contends that this funding brings SupraMagnetics under the jurisdiction of 10 C.F.R. Part 708. In March 2008, SupraMagnetics gave the complainant a written warning not to make unauthorized contact with DOE officials. On April 16, 2009, the complainant e-mailed DOE contracting officials and expressed concerns that SupraMagnetics had not provided him with information accounting for DOE funds connected with a failed project that the complainant halted in April 2008. On June 2, 2009, SupraMagnetics discharged the complainant for contacting the DOE on this matter.

On April 26, 2010, the complainant contacted the DOE's Employee Concerns Program Manager (the ECP Manager) and made a complaint of retaliation under Part 708 (the Part 708 Complaint). The complainant alleges that due to his protected disclosures, he was terminated from his employment with SupraMagnetics. He seeks relief from the DOE for this termination.

On December 29, 2010, the ECP Manager informed the complainant that the DOE was dismissing his Part 708 Complaint because it was untimely. In this regard, the ECP Manager finds that 10 C.F.R. § 708.14(a) establishes a filing deadline of 90 days from the date that the complainant knew or reasonably should have known of the alleged retaliation. The ECP Manager finds that the period of nine months from the complainant's termination by SupraMagnetics until his filing of a Part 708 Complaint surpasses this required time frame. The ECP Manager also finds that 10 C.F.R. § 708.15 (c) does not permit the processing of a Part 708 complaint if, with respect to the same facts, a complainant chose to pursue a remedy under state or other applicable law. In this regard, the ECP Manager finds that the complainant pursued his termination case with the State of Connecticut Employment Security Appeals Division Board of Review, and subsequently received a decision on the merits of his case.

II. Analysis

In a submission dated January 12, 2011, and received by the DOE on January 27, 2011, the complainant appealed the ECP Manager's determination dismissing his Part 708 Complaint (the Appeal). In the Appeal, the complainant contends that his termination case before the State of Connecticut and his delay in filing his Part 708 Complaint should not preclude the DOE from accepting jurisdiction of his complaint.

Ordinarily, I would conduct an analysis of the substance of the ECP Manager's findings and the information and arguments provided in the complainant's Appeal, and would issue a determination based on that analysis. However, information contained in SupraMagnetics' response to the Appeal and in the complainant's reply to that response leads me to conclude that it would be inappropriate for me to proceed. In its response, SupraMagnetics contends that during the time period relevant to this proceeding, it was not a DOE subcontractor subject to Part 708 or the DOE's notification provisions for employee concerns under DOE Order 442.1A. The complainant contends that SupraMagnetics was a DOE subcontractor, because it received SBIR grants from the DOE, and because it also supplied materials to the DOE's Brookhaven National Laboratory. I find that resolving this preliminary jurisdictional issue will require further investigation by the DOE. Accordingly, I find that it is premature to consider the issues raised by the ECP Manager in his December 29, 2010, letter and in the complainant's Appeal. For that reason, this matter will be remanded to the ECP Manager for further processing to address the issue whether SupraMagnetics was a "subcontractor" within the meaning of Part 708 at the time that the alleged protected activity and the alleged retaliation took place. The complainant's Appeal is dismissed without prejudice to refiling after the ECP Manager has issued a revised determination.

IT IS THEREFORE ORDERED THAT:

The Appeal filed by Gennady Ozeryansky (Case No. TBU-0113) is hereby dismissed without prejudice and his Part 708 complaint is hereby remanded to the Department of Energy's Employee Concerns Program Manager, for further processing as set forth in this Decision and Order.

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Appeal

Name of Case: Dennis Rehmeier

Date of Filing: March 1, 2011

Case Number: TBU-0114

Dennis Rehmeier (hereinafter referred to as the Complainant) appeals the dismissal of his complaint of retaliation and request for investigation (the Complaint) filed under 10 C.F.R. Part 708, the Department of Energy (DOE) Contractor Employee Protection Program. As explained below, the dismissal of the Complaint is affirmed, and the Appeal denied.

I. Background

The Complainant was an employee of Sandia Corporation (Sandia) in Livermore, California, from 2007 until August 27, 2010, when Sandia terminated the Complainant's employment. The Complainant was Deputy Program Manager for the Sandia Counter-intelligence Program. In his position, Complainant had specific responsibility to implement the Counter-intelligence Program at Sandia's site at Livermore, California. Complaint at 1-2.

The Complainant's Counsel filed the Complaint with the Whistleblower Program Manager ("the Manager") at the National Nuclear Security Administration Service Center in Albuquerque, New Mexico (the "NNSA"). The Complaint stated that Sandia terminated the Complainant's employment and engaged in other adverse personnel actions against the Complainant in retaliation for making protected disclosures. Complaint at 2. Specifically, the Complainant alleged that these adverse actions were taken by Sandia because he raised concerns regarding the management of the Sandia Counter-intelligence Program. The Complaint identifies the Complainant's alleged disclosures as follows:

> (1) Complainant raised concerns starting in October 2009 about Sandia's under resourcing of Complainant's budget to allow his office to have sufficient analytical staff to conduct foreign national counter-intelligence in the Sandia's California office.
>
> (2) As a secondary protected activity, Complainant objected to the hiring of a counter-intelligence manager at Sandia who had less than one year employment at Sandia, and who was therefore not eligible under Sandia policies to bid for the

> position without a waiver, and presumptively not sufficient [sic] qualified for said counter-intelligence position.

Complaint at 2. The Complaint also states that the Complainant complained about improper interference in his employment by his former Sandia manager after that manager took an employment position with the DOE in December 2009. *Id.* at 3. The Complaint states that the Complainant made his disclosures internally to Sandia Human Resources, the Sandia Ombudsman, and Sandia's parent corporation, Lockheed Martin. *Id.* at 5. The Complaint states that these disclosures were protected under 10 C.F.R. § 708.5(a) because he reasonably believed that they revealed the following:

> . . . violation of law, rule, or regulation (*i.e*., executive orders and directives, and DOE order and policies); (2) a substantial and specific danger to public safety (*i.e*., threats to national security); and/or (3) gross mismanagement, gross waste of funds, and abuse of authority.

Id. at 2.

On January 18, 2011, Sandia filed a Motion to Dismiss Complaint with the Manager. In that Motion, Sandia asserted that it terminated the Complainant for violation of Sandia policies. Sandia also contended that the Complainant made no protected disclosures under Part 708, nor showed that Sandia retaliated against him. Sandia requested that the Manager dismiss the Complaint without further investigation or hearing for failure to state a claim under Part 708. Sandia Motion to Dismiss at 13.

On February 18, 2011, the Manager issued a letter dismissing the Complaint. The Manager refers to the Complainant's two alleged disclosures quoted above and concludes that "[n]one of these allegations you allege constitute protected activity as described in § 708.5 and therefore your complaint is dismissed for lack of jurisdiction per § 708.17." Manager's February 18, 2011, letter at 1.

On March 1, 2011, the Complainant's Counsel filed an appeal (the "Appeal") of the dismissal by the Manager with the Office of Hearings and Appeals. 10 C.F.R. § 708.18. On March 15, 2011, Sandia filed a "Renewed Motion to Dismiss Complaint and Appeal" (Sandia's "Renewed Motion"); on March 22, 2011, Complainant's Counsel filed an Opposition to this Motion; and, on March 29, 2011, Sandia filed a Reply to Complainant's Opposition.

II. Analysis

We have reviewed the Complaint, the Manager's Dismissal, and the Complainant's and Sandia's filings in this proceeding. Based on the information contained in the Complaint, we find no error in the Manager's determination that the Complainant's "allegations" are not disclosures protected under § 708.5(a), and, therefore, the Complaint must be dismissed pursuant to § 708.17. Specifically, we find that dismissal for lack of jurisdiction or other good cause was

appropriate because the Complainant's contention that his allegations were protected disclosures under § 708.5(a) is "without merit on its face." 10 C.F.R. § 708.17(c)(4).
As an initial matter, we note that the Complainant contends in his Appeal that the Manager did not fulfill her responsibilities in the initial processing of the Complaint. Specifically, the Complainant maintains that the Manager should not have dismissed the Complaint without undertaking an investigation and giving the Complainant an opportunity to respond to Sandia's Motion to Dismiss. These arguments are without merit. The Employee Concerns Director or head of field element can dismiss a complaint on his or her own initiative or at the request of a party. 10 C.F.R. § 708.17(a). There is no requirement that the cognizant official allow a complainant to submit comments prior to a dismissal sua sponte or prior to a dismissal based on a contractor response or motion. Similarly, there is no requirement that the cognizant official investigate a complaint. That function resides with the Office of Hearings and Appeals. 10 C.F.R. § 708.21(a)(2). Based on the foregoing, we find no error in the Manager's processing of the Complaint.[1]

The Complainant also contends in his Appeal that the Manager failed to provide an adequate basis for her dismissal of the Complaint. Section 708.17(b) requires that the field element provide "specific reasons" for the dismissal. In this case, the Manager stated that the Complainant's allegations do not rise to the level of protected disclosures. This clearly indicates a basis for dismissal pursuant to § 708.17(c)(4), which applies to a complaint that is "frivolous" or "without merit on its face." This is a sufficient basis upon which to file an Appeal.[2] Accordingly, we will proceed to a consideration of the Complainant's substantive arguments.

In his Appeal, the Complainant contends that the Manager erroneously concluded that the concerns that he raised to Sandia and Lockheed Martin management were not protected disclosures under Part 708. We do not agree with this contention. In his Complaint, the

---

[1] This conclusion is not inconsistent with two OHA decisions cited by the Complainant. *See Clarrisa V. Alverez*, TBU-0084 (2009); *Clint Olson*, TBU-0027 (2004). In *Alverez*, the field element (i) failed to identify the subsection of § 708.17(c) providing the basis for dismissal, and (ii) erroneously cited the lack of evidentiary support for the allegations as the basis for dismissal. In *Olson*, the field element failed to give the complainant an opportunity to clarify ambiguities in the complaint. Those circumstances are not present in the instant case. Here, the specific subsection of § 708.17(c) used as the basis for dismissal is readily identifiable from the Manager's findings. Moreover, the field element based the dismissal on the lack of sufficiency of the Complainant's allegation, rather than any examination of the evidentiary support for those allegations. Finally, there were no ambiguities in the Complaint requiring "clarification."

[2] Although the Appellant contends that OHA precedent requires that this matter be remanded to the field element for a more specific description of the basis for dismissal, the cited decisions do not support that result. *Greta Kathy Congable*, TBU-0110 (2010) (portion of dismissal based on actual accuracy of protected disclosure reversed); *Cor*, TBU-0045 (2006) (dismissal based on assessment of merits of assertions reversed); *Caroline C. Roberts*, TBU-0040 (2006) (dismissal upheld, although field element should have been more specific in basis for dismissal); *Kuzwa*, TBU-0028 (2004) (dismissal reversed where complainant's allegations fell within Part 708); *Charles L. Evans*, TBU-0026 (2004) (dismissal based on validity of retaliation claim reversed).

Complainant asserts that, starting in October 2009, he "raised concerns" that Sandia's "under resourcing" of his budget would not allow his office to have sufficient analytical staff to conduct foreign national counter-intelligence in Sandia's California office. He states that in September 2009, the counter-intelligence analyst assigned to Sandia's Livermore facility resigned, and that Sandia refused, on grounds of inadequate budget, to fill this position. Complaint at 1, 3. The Complainant further asserts that he believed that effective performance of Sandia's counter-intelligence operations at Livermore was heavily dependent upon maintaining uninterrupted expert services from this intelligence analyst position, and that the failure to fill this position created a "substantial and specific danger" to public safety because he believed that Sandia's Livermore, California, facility was vulnerable to foreign intelligence threats. As a basis for this belief, the Complaint refers to a high percentage of foreign nationals in the population of the Livermore, California, area and to the increase in access by foreign nationals to Sandia's Livermore site resulting from the development of the Livermore Valley Open Campus (LVOC). *Id.*

The Complaint does not indicate that the Complainant disclosed to Sandia and Lockheed Martin management his reasons for believing that the funding for counter-intelligence staffing at Sandia's Livermore facility was inadequate. However, even if he presented the information described in the Complaint as the basis for his concern that he had insufficient analytical staff to counter foreign intelligence threats, his statements would not rise to the level of a "substantial and specific danger" to public safety. In an analogous case decided under the Whistleblower Protection Act (WPA), upon which Part 708 is modeled, the Merit Systems Protection Board (the Board) addressed the question of whether a party expressing concerns about funding for protective services had made disclosures that revealed a "substantial and specific danger" to public safety. *Chambers v. Dep't of the Interior*, No. 2011 M.S.P.B. 7 (2011).

In *Chambers*, the appellant had filed a Complaint alleging that the agency retaliated against her for disclosing on a number of occasions that the agency's decision to reduce park police patrols had endangered persons using public parks and parkways. The Board analyzed these disclosures using the following factors: "(1) the likelihood of harm resulting from the danger; (2) when the alleged harm may occur; and (3) the nature of the harm – potential consequences." *Chambers, slip op.* at 13, *citation omitted*. Based on this analysis, the Board found that some of Chambers' disclosures were protected disclosures under the WPA while others were not protected disclosures. The Board found that disclosures were protected when they revealed specific threats to public safety that were likely to occur. For example, the Board found that Chambers' disclosure that residents were complaining of increased drug-related activity in certain urban parks was a protected disclosure because it described a specific, serious consequence that Chambers reasonably believed had already resulted from fewer park police patrols. *Id*. However, the Board rejected protected disclosure status for Chambers' statement that inadequate park police staffing will result in the loss of life or destruction of a national monument. It found these concerns to be "too speculative," stating that:

> These statements are divorced from any additional information by which the appellant's predictions can be judged. There may well be a staffing level below which reasonable predictions of likely harm could be made, but there is nothing in the appellant's statements to indicate that she reasonably believed that level had been reached.

Id. at 15.

In the present case, the allegations of harm described in the Complaint are similarly speculative. The Complaint does not identify specific foreign intelligence activities at Sandia's Livermore facility, nor why the Complainant believed that they were likely to increase in the absence of an intelligence analyst employed at the site. Nor does the Complaint suggest that there is more specific information that can only be disclosed in a classified setting. The Complaint merely alleges that the "effective performance" of Sandia's counter-intelligence program at Livermore was "heavily dependent" on the intelligence analyst position. We find that a person could not reasonably believe that the failure to fill the vacancy was information that indicated a "substantial and specific" danger to employees or to public health or safety.

Similarly, a person could not reasonably believe that the ongoing vacancy of the intelligence analyst position at Livermore evidenced the failure of Sandia to fulfill specific counter-intelligence obligations to the DOE. Accordingly, the assertions in the Complaint, even if proven, would not show that the Complainant reasonably believed that Sandia's decisions concerning the staffing of counter-intelligence operations at Livermore had violated Sandia's obligation to provide adequate counter-intelligence services to the DOE, or that Sandia had committed an act of gross mismanagement or abuse of authority in allocating counter-intelligence funds received from the DOE.

We also reject the Complainant's assertion that he made a protected disclosure when he objected to the hiring of a counter-intelligence manager at Sandia who had less than one year of employment at Sandia. Even if Sandia's company policy stated that this individual was not eligible to bid for the position without a waiver, this type of contractor personnel policy is not a "law, rule, or regulation" for purposes of § 708.5(a)(1). Nor would the failure of an applicant to meet this company requirement provide a reasonable basis for concluding that Sandia was hiring someone insufficiently qualified for the counter-intelligence position. Finally, with respect to the allegations of improper conduct by the Complainant's former Sandia manager after that manager became employed by the DOE, we note that Part 708 provides no relief concerning actions by DOE officials.

Accordingly, we find that the Manager acted correctly in finding that none of the allegations in the Complaint constitute protected activity as described in § 708.5. Accordingly, we find that the determination of the Manager should be sustained, and that the instant appeal should be denied.

IT IS THEREFORE ORDERED THAT:

(1) The Appeal filed by Dennis Rehmeier, Case No. TBU-0114, is hereby denied.

(2) This Decision shall become a Final Agency Decision unless a party files a Petition for Secretarial Review with the Office of Hearings and Appeals within 30 days after receiving this decision, pursuant to 10 C.F.R. § 708.19.

JUN - 3 2011

DECISION AND ORDER
OF THE DEPARTMENT OF ENERGY

Decision of the Director

Name of Petitioner:	Gordon Michaels
Dates of Filing:	May 2, 2011 May 20, 2011
Case Numbers:	TBU-0117 TBU-0118

Gordon Michaels appeals the dismissal of his whistleblower complaint filed under 10 C.F.R. Part 708, the Department of Energy (DOE) Contractor Employee Protection Program. Two offices having jurisdiction over the complaint, the DOE's National Nuclear Security Administration Service Center (NNSA/SC) and the DOE's Oak Ridge Office (ORO), dismissed the complaint, on April 12, 2011, and May 10, 2011, respectively. As explained below, we affirm the dismissals of the complaint, and deny the appeals therefrom.

I. Background

The DOE's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste and abuse" at DOE's government-owned, contractor-operated facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purposes are to encourage contractor employees to disclose information which they believe exhibits unsafe, illegal, fraudulent, or wasteful practices, and to protect those "whistleblowers" from consequential reprisals by their employers. The regulations governing the DOE's Contractor Employee Protection Program are set forth at Title 10 Part 708 of the Code of Federal Regulations. Under Part 708, the DOE office initially receiving a complaint may dismiss the complaint for lack of jurisdiction or other good cause. 10 C.F.R. § 708.17. The complainant may appeal such a dismissal to the OHA Director. 10 C.F.R. § 708.18.

Michaels was an employee of UT-Battelle, LLC, the firm that manages and operates the DOE's Oak Ridge National Laboratory (ORNL), until he retired on January 31, 2009. Beginning on May 1, 2009, Michaels began working, under a "purchase order/contract," for Honeywell Federal Manufacturing & Technologies, LLC (Honeywell), the firm that manages and operates the DOE NNSA's Kansas City Plant (KCP). Purchase Order/Contract between Honeywell and Gordon Michaels (May 1, 2009) (Contract).

Though Michaels contracted with Honeywell, based in Kansas City, Missouri, a Statement of Work (SOW) incorporated by reference into the contract required Michaels to maintain a "remote business office," and stated that "[m]ain office accommodations" would be provided by ORNL, located in Oak Ridge, Tennessee, "for day to day activities." Id. at 3; Statement of Work, Gordon Michaels, Technology Specialist (March 30, 2009). Michaels alleges that, in July 2010, UT-Battelle revoked his access to the ORNL site in retaliation for actions, protected under Part 708, that he took while employed by ORNL prior to January 31, 2009.

On November 19, 2010, Michaels filed a Part 708 complaint with the Deputy Director of the DOE Office of Civil Rights and Diversity at DOE Headquarters, who referred the matter to the two DOE offices having jurisdiction over the complaint, NNSA/SC and ORO. As indicated above, both offices dismissed the complaint, NNSA/SC as to Honeywell, and ORO as to UT-Battelle, and in doing so both cited as a basis for dismissal that Michaels is not an "employee" as that term is defined in the Part 708 regulations. Letter from Michelle Rodriguez de Varela, Whistleblower Program Manager, NNSA/SC, to Billie P. Garde, Clifford & Garde, LLP (April 12, 2011); Letter from Rufus H. Smith, Employee Concerns Manager, ORO, to Billie P. Garde, Clifford & Garde, LLP (May 10, 2011).[1] In his appeal, the complainant contends that the protections of Part 708 do not "only apply to employees of contractors." For the reasons set forth below, we disagree.

II. Analysis

The Part 708 regulations provide that complaints may be filed by "an employee of a contractor, . . ." 10 C.F.R. § 708.5. The regulations define "employee" as "a person employed by a contractor, and any person previously employed by a contractor if that person's complaint alleges that employment was terminated for conduct described in § 708.5 of this subpart." 10 C.F.R. § 708.2. We find below that Michaels is not an employee, as that term is defined in Part 708, of either Honeywell or UT-Battelle.

A. The Complainant is not an Employee of Honeywell

Michaels contends that he should be considered a "covered employee" under Part 708 based upon the circumstances of his current work for Honeywell. Appeal at 4. Though acknowledging that he is, "by the terms of his contract with Honeywell FM&T, an independent contractor to" Honeywell, the complainant contends he is "protected under 10 CFR Section 708 from retaliation by an entity which, although not his direct or immediate employer, is nonetheless a covered employer." Appeal at 2, 3.

The complainant is correct that DOE contractors, such as Honeywell and UT-Battelle, are subject to the provisions of Part 708, and in this sense are "covered employers" under those provisions. This clearly does not mean, however, that *any person* is entitled to file a Part 708 complaint against a DOE contractor. The regulations, very specifically, only afford that right to "employees" of DOE

[1] Both offices also cite a lack of temporal proximity between Michaels's alleged protected conduct and the alleged retaliation. *Id.* We need not, however, address this issue, which bears on the merits of the complaint, as we find the complaint does not meet the threshold jurisdictional requirements of Part 708, as explained below.

contractors. 10 C.F.R. § 708.5. The issue, then, is whether the complainant is an "employee" of Honeywell, as that term is used in Part 708.

The definition of "employee" set forth in section 708.2 is of little help in resolving this issue, as it merely provides, as noted above, that an employee is a "person employed . . . or previously employed by a contractor . . . ." 10 C.F.R. § 708.2: Faced with interpreting the term "employee" in a statute with a similar definition, the Supreme Court adopted "a common law test for determining who qualifies as an 'employee' . . . ." *Nationwide Mut. Ins. Co. v. Darden*, 503 U.S. 318, 323 (finding that the Employee Retirement Income Security Act's "nominal definition of 'employee' as 'any individual employed by an employer,' is completely circular and explains nothing"). Given the somewhat similarly circular definition of "employer" in Part 708, we find that it is appropriate to apply the *Darden* test here.[2]

The Court set forth that test as follows:

> In determining whether a hired party is an employee under the general common law of agency, we consider the hiring party's right to control the manner and means by which the product is accomplished. Among the other factors relevant to this inquiry are the skill required; the source of the instrumentalities and tools; the location of the work; the duration of the relationship between the parties; whether the hiring party has the right to assign additional projects to the hired party; the extent of the hired party's discretion over when and how long to work; the method of payment; the hired party's role in hiring and paying assistants; whether the work is part of the regular business of the hiring party; whether the hiring party is in business; the provision of employee benefits; and the tax treatment of the hired party.

Darden, 503 U.S. at 323-24.

UT-Battelle and Honeywell filed a response to the present appeal, in which they cite certain provisions of the contract between Michaels and Honeywell, including those stating that Michaels shall not be an "employee" of Honeywell, and that he "shall not be entitled to nor" claim "any benefits or rights accorded to employees" of Honeywell. Joint Response of UT-Battelle and Honeywell FM&T to Jurisdictional Appeal of Gordon Michaels (May 13, 2011) (Joint Response) at 6 (quoting Contract at 6).

---

[2] The Department of Labor, under whistleblower authority analogous to the DOE's under Part 708, has applied the Court's analysis in *Darden* to interpret the term "employee" as used in the whistleblower protection provisions of various statutes, including the Energy Reorganization Act (ERA), which protects "any employee" from retaliation by a licensees of the Nuclear Regulatory Commission, or by a contractor or subcontractor of such a licensee. 42 U.S.C. § 5851; *see, e.g., Demski v. Indiana Michigan Power Company,* No. 02-084, 2004 WL 785547 (2004); *Kesterson v. Y-12 Nuclear Weapons Plant, et al.,* No. 96-173, 1997 WS 180394 (1997); *Boschuk v. J & L Testing, Inc.,* No. 97-020, 1997 WL 591351 (1997); *Varnadore v. Oak Ridge Nat'l Lab. And Lockheed Martin Energy Sys.*, Nos. 1992-CAA-2 and 5, 1993-CAA-2 and 3, 1995-ERA-1, 1996 WL 363346 (1996).

First, that the contract in question explicitly states that Michaels's work was "not as an employee" of Honeywell is but one factor to be considered, and is not dispositive of the issue before us. The Court in *Darden* stated that, because "the common-law test contains 'no shorthand formula or magic phrase that can be applied to find the answer, . . . all of the incidents of the relationship must be assessed and weighed with no one factor being decisive." *Darden,* 503 U.S. at 324 (quoting *NLRB v. United Ins. Co. of America,* 390 U.S. 254, 258 (1968)). Other relevant terms of the contract, however, read in light of the factors set forth in *Darden*, also support a conclusion that Michaels is not an employee of Honeywell under the common-law definition of that term.

Here, Honeywell contracted for the work of a technology specialist, a highly skilled technical employee, for a period of limited duration, specified as one year, with the option of renewal, but not to exceed two years. *Id.* at 2, 4. The work was to be performed primarily at a remote location, away from the direct and day-to-day supervision of Honeywell. SOW at 2. There is no language in the agreement that specifies Michaels's work schedule, or a minimum number of hours of work required. Rather, the agreement sets only a maximum number of hours allowed to be billed per year. SOW at 3. As noted above, the contract explicitly disclaims any entitlement by Michaels to "benefits or rights accorded to employees" of Honeywell. Contract at 6. It provides no pay for sick leave, vacation, holidays, or overtime. *Id.;* Terms and Conditions of Purchase, Time and Material or Labor Hour Purchase Order/Contract (incorporated by reference into Contract) at 2. As to the tax treatment of the hired party, the Contract provides that Michaels "shall be solely responsible for any legal obligations relating to, but not limited to, provision of employee benefits and compliance with state and federal laws including the Internal Revenue Code." Contract at 6.

There are, on the other hand, limited indicia of an employer-employee relationship between Honeywell and Michaels. Specifically, the statement of work provides that Honeywell may assign unspecified "[o]ther duties within the intent of this scope of work . . . ." SOW at 2. In addition, the statement of work anticipates that Honeywell is to furnish certain information necessary to the accomplishment of Michaels's work. SOW at 3. And while the statement of work states that "no equipment will be provided" by Honeywell, *id.*, Honeywell acknowledges that it paid for work space at ORNL through an "administrative transfer of funds" between Honeywell and UT-Battelle. Joint Response at 3. However, on balance, considering all of the relevant factors set forth in *Darden,* we cannot find that the complainant has demonstrated that he is an "employee" of Honeywell, as that term is used in Part 708.

B. The Complainant is not an Employee of UT-Battelle

There is no dispute in this case that the complainant was *previously* employed by UT-Battelle. As we note above, the definition of "employee" under Part 708 includes "any person previously employed by a contractor if that person's complaint alleges that employment was terminated for conduct described in § 708.5 of this subpart." 10 C.F.R. § 708.2. However, because Michaels retired from UT-Battelle and does not allege that the company terminated his employment, he clearly does not meet the definition of "employee," by virtue of being a former employee of UT-Battelle, under the wording of section 708.2.[3]

[3] The complainant cites a prior decision of our office in which we found that "continuation of past retaliation by

As for the fact that, more recently, Michaels was allowed to use ORNL facilities, this certainly would not, under a *Darden* analysis, make Michaels an employee of UT-Battelle. There is no evidence of any contractual relationship between the complainant and UT-Battelle, such as exists between Michaels and Honeywell. The Court in *Darden* is clear that, to be considered "an employee under the general common law of agency," one must be first be a "hired party," and Michaels was not "hired" by UT-Battelle at any time after he retired on January 31, 2009.

In sum, while we agree with the complainant that both Honeywell and UT-Battelle are "covered employers" under Part 708, we cannot find that Michaels is an employee of either contractor. On this critical issue, the complainant offers nothing that would lead us to a different conclusion. In a reply to the Joint Response, the complainant notes that the Contract incorporated by reference a provision of the Department of Energy Acquisition Regulations requiring that "the Contractor shall comply with the requirements of 'DOE Contractor Employee Protection Program' at 10 CFR part 708 for work performed on behalf of DOE directly related to activities at DOE-owned or-leased sites." 48 C.F.R. § 952.203-70; Reply to Joint Response of UT-Battelle and Honeywell FM&T to Jurisdictional Appeal of Gordon Michaels (May 26, 2011) (Reply) at 9. However, this standard contractual provision merely provides that the contractor, in this case Michaels, is bound by the terms of Part 708, just as Honeywell is similarly bound by the terms of its management and operating contract with the DOE. In no way does this provision bolster the complainant's claim to treatment as an "employee" under those regulations.

The complainant also argues that "excluding an entire class of employees, *i.e.,* independent contractors, only leaves a gaping hole in the balloon of protection DOE has adopted to identify waste, fraud and abuse and protect those who reveal it." Reply at 2. However, had the DOE intended to extend the protections of Part 708 to independent contractors, it could have done so by simply using a term broader than "employee." For example, the regulations governing the DOE's chronic beryllium disease prevention program explicitly apply to any "current DOE employee, DOE contractor employee, or other worker at a DOE facility" and define "worker" as "a person who performs work for or on behalf of DOE, including a DOE employee, an independent contractor, a DOE contractor or subcontractor employee, or any other person who performs work at a DOE facility." 10 C.F.R. §§ 850.2, 850.3. By contrast, policy arguments notwithstanding, the language of the Part 708 is clear in providing protection only to employees and certain former employees of DOE contractors, not to independent contractors.

III. Conclusion

As explained above, the complainant has not demonstrated, or even alleged facts that would demonstrate, that he is an employee, under Part 708, of either Honeywell or UT-Battelle. We

---

a subsequent DOE contractor would be actionable under Part 708." *Harry T. Greene*, Case No. TBU-0010 (2003). The complainant incorrectly describes *Greene* as a "case of a DOE contract employee bringing a claim against a former employer, ..." Reply to Joint Response of UT-Battelle and Honeywell FM&T to Jurisdictional Appeal of Gordon Michaels (Reply) at 15. In fact, the complainant in *Greene*, though having previously worked for a DOE contractor, filed his complaint against his current employer, also a DOE contractor.

therefore find that NNSA/SC and ORO correctly dismissed the complaint filed by Gordon Michaels. Accordingly, the present Appeals should be denied.

It Is Therefore Ordered That:

(1) The Appeals filed by Gordon Michaels, Case Nos. TBU-0117 and TBU-0118, are hereby denied.

(2) This Appeal Decision shall become a Final Agency Decision unless a party files a petition for Secretarial review within 30 days after receiving this decision. 10 C.F.R. § 708.18(d).

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Appeal

Name of Case: Gennady Ozeryansky

Date of Filing: August 2, 2011

Case Number: TBU-0119

Gennady Ozeryansky (Ozeryansky), a former employee of SupraMagnetics, Inc. (SupraMagnetics), appeals the dismissal of his retaliation complaint filed under 10 C.F.R. Part 708, the Department of Energy (DOE) Contractor Employee Protection Program.[1] The DOE's Employee Concerns Program Manager (the ECP Manager) dismissed Ozeryansky's complaint on July 13, 2011. As explained below, the Appeal should be denied.

I. Background

The DOE's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste and abuse" at DOE's government-owned, contractor operated facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purposes are to encourage contractor employees to disclose information which they believe exhibits unsafe, illegal, fraudulent, or wasteful practices, and to protect those "whistleblowers" from consequential reprisals by their employers. The regulations governing the DOE's Contractor Employee Protection Program are set forth at Title 10 Part 708 of the Code of Federal Regulations.

During the period 2006 until 2009, Ozeryansky was employed by SupraMagnetics, Inc. (SupraMagnetics), a DOE grant recipient. On April 16, 2009, Ozeryansky e-mailed DOE contracting officials and expressed concerns that SupraMagnetics had not provided him with information to account for DOE funds connected with a failed project. On June 3, 2009, SupraMagnetics discharged Ozeryansky for contacting the DOE on this matter.

On April 26, 2010, Ozeryansky filed a Part 708 complaint with the DOE's Employee Concerns Program Manager (the ECP Manager).[2] Ozeryansky alleged that because of his April 16, 2009, E-mail to DOE, which was a protected disclosure under Part 708, he was terminated from his employment.

[1] OHA reviews jurisdictional appeals under Part 708 based upon the pleadings and other information submitted by the Appellant. *See* 10 C.F.R. § 708.18(b) (appeal must include a copy of the notice of dismissal, and state the reasons why the Appellant thinks the dismissal was erroneous).

[2] The ECP Manager's December 29, 2010, dismissal letter erroneously refers to this date as April 26, 2009.

On December 29, 2010, the ECP Manager informed Ozeryansky that the DOE was dismissing his Part 708 complaint because it was untimely. Specifically, Ozeryansky had not filed his Part 708 complaint within 90 days from the date of his termination as required by 10 C.F.R. § 708.14(a). The ECP Manager also found that, because Ozeryansky had filed a complaint regarding his termination in a State Board of Review, section 708.15(c) of Part 708 barred further consideration of his case under Part 708.[3]

In a submission received by the DOE on January 27, 2011 (the January 27 Appeal), Ozeryansky appealed the ECP Manager's determination dismissing his Part 708 complaint. In the January 27 Appeal, Ozeryansky contended that his case before a State Board of Review was only in regard to unemployment benefits and did not involve a claim for wrongful termination. Ozeryansky also contended that SupraMagnetics was a DOE subcontractor because it received DOE Small Business Innovation Research (SBIR) grants and because it also supplied materials to the DOE's Brookhaven National Laboratory (BNL).[4] On March 3, 2011, we remanded Ozeryansky's January 27 Appeal to the ECP Manager to obtain additional information and make a new determination with regard to Ozeryansky's Part 708 complaint as to the issue of whether SupraMagnetics was a "subcontractor" within the meaning of Part 708 at the time that the alleged protected activity and the alleged retaliation took place. *See Gennady Ozeryansky*, Case No. TBU-0113 (March 3, 2011) *slip op*. at 2.[5]

The ECP Manager issued a new determination on July 13, 2011 (July 13 Determination), in which he first stated that SupraMagnetics had provided the ECP Manager with documentation establishing that its only relationship with DOE was as a recipient of Assistance Agreement Awards (financial grants) through the DOE's SBIR program. July 13, 2011 Letter from William A. Lewis, Jr., Employee Concern Program Manager, DOE, to Gennady Ozeryansky (July 13 Determination) at 1. The ECP Manager then stated that, as a "grant recipient," SupraMagnetics was not a contractor or subcontractor as defined in section 708.2 of the Part 708 regulations. Consequently, the ECP Manager found that Ozeryansky could not avail himself of the protections of Part 708. July 13 Determination at 2.

In his July 29, 2011, appeal of the July 13 Determination (July 29 Appeal), Ozeryansky argues that the dismissal of his complaint was inappropriate.[6] Ozeryansky asserts that the title page of the SBIR award notification states that 10 C.F.R. Part 600 is applicable to the grant and that this regulation specifies that the grant recipient must have an internal controls structure that provides reasonable assurance that the grant recipient is managing the award funds in compliance with all federal laws and regulations. Because Ozeryansky was never given monthly account activity statements, SupraMagnetics could not have an effective internal controls system as mandated by 10 C.F.R. Part 600. Ozeryansky apparently argues that because 10 C.F.R. Part 600 was

[3] Section 708.15(c) bars processing of a Part 708 complaint if a complainant chooses to pursue a remedy, based upon the same facts, under state or other applicable law.

[4] The ECP Manager did not further press the untimeliness of Ozeryansky's Part 708 complaint as a ground to dismiss. *See infra*.

[5] OHA decisions issued after November 19, 1996, may be accessed at http://www.oha.doe.gov.

[6] The Appeal was dated July 23, 2011, but was not received by OHA until July 29, 2011.

applicable to SupraMagnetics, Part 708 likewise is applicable to the firm. Ozeryansky also argues that SupraMagnetics' purchase order to supply materials to BLN should provide jurisdiction under Part 708 to hear his complaint.

II. Analysis

For a complaint to be covered under Part 708, it must be filed by an *employee of a contractor* that performs work on behalf of DOE, directly related to activities at a DOE-owned or -leased site, if the complaint stems from a disclosure, participation, or refusal described in section 708.5 of Part 708.[7] 10 C.F.R. § 708.3 (emphasis added).

Section 708.2 defines a contractor as follows:

> *Contractor* means a seller of goods or services who is a party to:
>
> (1) A management and operating contract or other type of contract with DOE to perform work directly related to activities at DOE-owned or -leased facilities, or
>
> (2) A subcontract under a contract of the type described in paragraph (1) of this definition, but only with respect to work related to activities at DOE-owned or -leased facilities.

10 C.F.R. § 708.2. As a grant recipient, SupraMagnetics was not a "seller" of goods or services to the DOE. In this role, SupraMagnetics was not trying to complete a commercial transaction for goods or services with the DOE but instead sought funds from DOE to assist it in its own research without any *quid pro quo* or repayment. Consequently, we concur with the ECP Manager's determination that SupraMagnetics' acceptance of grant money did not make it a contractor for purposes of section 708.2 of the Part 708 Contractor Employee Protection Program. Thus, Ozeryansky can not sustain a Part 708 complaint based upon SupraMagnetics' grant awards.

We note, however, that DOE signed a purchase order with SupraMagnetics on September 18, 2007, to supply DOE with 2000 feet of superconducting wire. *See* January 27 Appeal (BNL Purchase Order No. BNL-0000106985 under Contract No. DE-AC02-98CH10886). Nonetheless, this contract is also not sufficient to confer Part 708 jurisdiction to Ozeryansky's complaint.

SupraMagnetics is not a party to a management and operating contract with the DOE. Nor is it a party to a contract with DOE or a DOE contractor requiring it to perform work directly related to activities at a DOE-owned or –leased facility. Consequently, SupraMagnetics cannot be a "contractor" pursuant to section 708.2. A purchase order for project-specific goods or services might, in some circumstances, qualify a firm as a subcontractor to a management and operating contractor as defined in section 708.2. However, such circumstances are not present in this case. To be considered as a subcontractor under Part 708.2 a firm must *perform work related to activities* at DOE-owned or -leased facilities. 10 C.F.R. § 708.2. A one-time sale of 2000 feet of superconducting wire cannot be considered performing work related to activities at a DOE-

[7] We will assume for the purpose of this jurisdictional appeal that Ozeryansky's April 16, 2009, E-mail met the subject-matter requirements of section 708.5.

owned or -leased facility. *See* 10 C.F.R. § 708.2. In selling superconducting wire to BNL, SupraMagnetics sells a product which does not have a direct nexus with any specific BNL project or research. Consequently, we find that the purchase order is not a subcontract that would make SupraMagnetics a "subcontractor" for Part 708 purposes. Because SupraMagnetics is not a contractor or subcontractor as defined by section 708.2, there is no jurisdiction under Part 708 for consideration of Ozeryansky's complaint. Thus, his July 29 Appeal should be denied.

IT IS THEREFORE ORDERED THAT:

(1) The Appeal filed by Gennady Ozeryansky (Case No. TBU-0119) is hereby denied.

(2) This Appeal Decision shall become a Final Agency Decision unless a party files a petition for Secretarial review with the Office of Hearings and Appeals within 30 days after receiving this decision. 10 C.F.R. § 708.18(d).

DECISION AND ORDER
OF THE DEPARTMENT OF ENERGY

Motion to Dismiss

Name of Case: Gilbert J. Hinojos

Date of Filing: April 21, 2003

Case Number: TBZ-0003

This determination will consider a Motion to Dismiss filed by Honeywell Federal Manufacturing & Technologies (Honeywell) on April 21, 2003. Honeywell seeks dismissal of the underlying complaint filed by Gilbert J. Hinojos under the Department of Energy's Contractor Employee Protection Program, 10 C.F.R. Part 708.

I. Background

Mr. Hinojos was employed by Honeywell as a "Material Control Coordinator, Sr." at a DOE facility in Albuquerque New Mexico. Initially, Mr. Hinojos alleges that he was subject to two acts of retaliation from Honeywell due to his having filed several complaints with the Equal Employment Opportunity Commission (EEOC) and the New Mexico Human Rights Division (NMHRD) against Honeywell alleging discrimination based on national origin. First, Mr. Hinojos was denied permission to attend classes during his duty hours beginning in June 2002 despite the fact that Honeywell had previously granted him permission in the past to attend classes. The second act of alleged retaliation occurred when a Honeywell official asked Mr. Hinojos to stop circulating a letter among his co-workers seeking support for his initial request to attend the classes. An Office of Hearings and Appeals Investigator conducted an investigation as to Mr. Hinojos's claims and issued a Report of Investigation on December 20, 2002 concluding that Mr. Hinojos had not engaged in any conduct protected by Part 708 since the Contractor Employee Protection Program does not cover complaints based upon EEOC complaints. *See* Report of Investigation, Case No. TBI-0003 (December 20, 2003) (Report). The Report also found that even if Mr. Hinojos had engaged in protected conduct, there was clear and convincing evidence that Honeywell's refusal to let Mr. Hinojos attend the classes was unrelated to his alleged protected conduct in filing the EEOC complaints.

During the pendency of this matter, Mr. Hinojos was discharged from his position with Honeywell. Mr. Hinojos then requested and was granted permission to amend his Part 708 complaint to include his termination as an additional act of retaliation.

In a Motion dated April 2, 2003, Honeywell argues that section 708.4 bars Mr. Hinojos's complaint. Section 708.4 states:

> If you are an employee of a contractor, you, you may not file a complaint against your employer under this part if:
>
> (a) The complaint is based upon race, color, religion, sex, age, national origin, or similar basis . . .

10 C.F.R. § 708.4. Honeywell asserts that Mr. Hinojos's sole claim as to the disclosure which prompted the alleged retaliation against him was his filing of his EEOC and NMHRD complaints alleging discrimination based on national origin. Consequently, Honeywell argues that section 708.4 bars Mr. Hinojos's complaint and Honeywell's Motion to Dismiss should be granted. Honeywell also argues Mr. Hinojos's complaint should be dismissed because he is continuing to seek redress for his alleged retaliation in two forums - the EEOC and OHA. Honeywell directs our attention to section 708.17(c)(3), which bars a Part 708 complaint where a party has filed a complaint under State or applicable law with respect to the same facts as alleged in a Part 708 complaint. *See* 10 C.F.R. § 708.17(c)(3).

II. Analysis

With regard to Mr. Hinojos's claim regarding the first two alleged acts of retaliation, he has steadfastly alleged that the actions were taken against him because he had filed complaints with the EEOC and the NMHRD against Honeywell alleging discrimination based upon national origin. I agree with Honeywell that section 708.4 bars the consideration of these alleged acts of retaliation under Part 708. Mr. Hinojos's complaint regarding the first two acts of retaliation is based upon the EEOC and NMHRD complaints alleging discrimination based on his national origin. As such they are barred from consideration pursuant to section 708.4. I will therefore grant Honeywell's Motion, in part, regarding Mr. Hinojos's complaint concerning Honeywell's decision to deny Mr. Hinojos time off to attend classes in June 2002 and Honeywell's actions in stopping him from circulating a letter to co-workers concerning that decision.

With regard to Mr. Hinojos's claim of retaliatory discharge, Mr. Hinojos contends that the discharge was motivated both by his filing EEOC claims and by his filing a Part 708 complaint. *See* Letter from Gilbert Hinojos to Richard Cronin, Hearing Officer (May 4, 2003) at 2. Section 708.4 does not bar Mr. Hinojos's claim concerning his discharge since he is alleging that his prior filing of a Part 708 claim was potentially the motivation for his discharge. Filing a Part 708 claim is protected conduct pursuant to section 708.5. *See* 10 C.F.R. § 708.5(a)(1) ("[d]isclosing to a DOE official . . . information that you reasonably and in good faith believe reveals . . . A substantial violation of a law rule or regulation" is employee conduct protected from retaliation). Consequently, I will deny

Honeywell's Motion with regard to Mr. Hinojos's Part 708 claim that he was terminated in response to his filing a prior Part 708 complaint. 1/

Honeywell's remaining argument as to why Mr. Hinojos's complaint should be dismissed in its entirety is unavailing. Section 708.17(c)(3) states: (c) Dismissal for lack of jurisdiction or other good cause is appropriate if . . . . (3) You filed a complaint under State or other applicable law with respect to the same facts as alleged in a complaint under this part . . . ." 10 C.F.R. § 708.17(c)(3). Thus, if Mr. Hinojos's EEOC and Part 708 claims are based on the same facts, the Part 708 claim should be dismissed. However, I do not find that Mr. Hinojos's EEOC claim and Part 708 claim are based upon the same facts. Mr. Hinojos's latest claim under the EEOC is based upon his assertion that he was fired due to his national origin and in retaliation for his having filed four previous EEOC complaints, practices which are prohibited pursuant to *Title VII of the Civil Rights Act of 1964, as amended*, 42 U.S.C. § 2000e (*Title VII*). *See* Attachment to Letter from Jill Marchant, counsel for Honeywell to Richard Cronin, Hearing Officer (April 23, 2003). To prevail in his EEOC complaint, Mr. Hinojos must establish that adverse employment action was taken against him by reason of his national origin or his filing previous EEOC complaints. *See, e.g., Edwards v. Interboro Institute*, 840 F. Supp 222 at 227 (E.D.N.Y. 1994) (an element of *prima facia* case in *Title VII* discriminatory discharge cause of action is that individual belong to a protected class); *see* 42 U.S.C. § 2000e-3(a) (statutory protection from retaliation arising from filing an *Title VII* complaint). However, for Mr. Hinojos's Part 708 complaint to succeed, his termination must have been motivated by his filing a Part 708 complaint. *See* 10 C.F.R. § 708.5. Because the necessary factual prerequisites differ in the Part 708 and EEOC complaints, I find the complaints are not based upon the "same facts" for section 708.15(c)(3) purposes. *See Carl J. Blier*, 27 DOE ¶ 87,514 (1999) (Americans with Disabilities Act and Rehabilitation Act (ADA/RA) complaints do not bar Part 708 complaint since ADA/RA complaints require different factual motivation for employer's adverse personnel action); *Lucy B. Smith*, 27 DOE ¶ 87,520 (1999) (Age Discrimination in Employment Act (ADEA) complaint does not bar Part 708 complaint since ADEA complaint requires different factual motivation for employer's adverse personnel action).

With my decision regarding Honeywell's Motion to Dismiss there remains only one alleged retaliatory action before me - Honeywell's discharge of Mr. Hinojos purportedly motivated by reason of Mr. Hinojos having filed a Part 708 complaint. 2/ Consequently, at the hearing, Mr. Hinojos must prove by a preponderance of the evidence that he filed a Part 708 complaint and that this action was a contributing factor in Honeywell's decision to remove him from his job. If Mr. Hinojos can make this showing, the burden will shift to Honeywell to prove by clear and convincing evidence that it

---

1/ I will however grant Honeywell's motion with regard to that portion of Hinojos's claim of retaliatory discharge that is based upon his filing prior EEOC complaints.

2/ Because this allegation occurred after the Report of Investigation was issued in this matter, I will allow both parties sufficient time to conduct discovery on this issue.

would have removed Mr. Hinojos notwithstanding his filing of a Part 708 complaint. *See* 10 C.F.R. § 708.29.

It Is Therefore Ordered That:

(1) The Motion to Dismiss filed by Honeywell Federal Manufacturing & Technologies on April 21, 2003 is hereby granted in part as specified in Paragraph (2).

(2) All Part 708 claims relating to Honeywell's failure to grant Gilbert Hinojos permission to attend class in June 2002 are dismissed. All Part 708 claims relating to Honeywell's action in stopping Gilbert Hinojos from circulating a letter to his co-workers in support of his request to attend the class are dismissed. All Part 708 claims relating to Honeywell's termination of Mr. Hinojos's employment which are based on his filing prior EEOC complaints are dismissed.

(3) This is an Interlocutory Order of the Department of Energy. This Order may be appealed to the Director of OHA upon issuance of a decision by the Hearing Officer on the merits of the complaint.

DECISION AND ORDER

OF THE DEPARTMENT OF ENERGY

Motion To Dismiss

Name of Case:	Casey Von Bargen
Date of Filing:	June 15, 2005
Case Number:	TBZ-0034

This Decision concerns a Motion To Dismiss that was filed by Sandia National Laboratories (hereinafter referred to as "SNL" or "the Respondent"). In this Motion, SNL seeks the dismissal of a complaint that was filed by Casey Von Bargen (hereinafter referred to as "Mr. Von Bargen" or "the Complainant") under the Department of Energy's (DOE) Contractor Employee Protection Program (or "Whistleblower") regulations found at 10 C.F.R. Part 708. This complaint is currently under investigation by the Office of Hearings and Appeals (OHA) (Case No. TBI-0034).

I. Background

The Department of Energy established its Contractor Employee Protection Program to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste, and abuse" at DOE's Government-owned or -leased facilities. Criteria and Procedures for DOE Contractor Employee Protection Program, 57 Fed. Reg. 7533 (1992). Its primary purpose is to encourage contractor employees to disclose information that they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers. The Part 708 regulations prohibit discrimination by a DOE contractor against its employee because the employee has engaged in certain protected activity, including when the employee has

> (1) Disclosed to an official of DOE, to a member of Congress, or to the contractor (including any higher tier contractor), information that the employee in good faith believes evidences—
>
> (i) A violation of any law, rule, or regulation;
>
> (ii) A substantial and specific danger to employees or public health or safety; or
>
> (iii) Fraud, mismanagement, gross waste of funds, or abuse of authority;

57 Fed. Reg. at 7542 (1992).(1)

The Complainant was an employee of SNL from June 2, 2003 until September 20, 2004. In his complaint, he alleges that he was fired in retaliation for making disclosures to SNL management that

are protected under the Part 708 regulations, and for reporting alleged sexual harassment directed at him by certain female SNL employees.

II. SNL's Motion To Dismiss

In its Motion, SNL argues that the facts, as alleged in the complaint, do not present issues for which relief can be granted under the Part 708 regulations. The Respondent specifically contends that Mr. Von Bargen's allegations of sexual harassment and his associated claims of retaliation must be dismissed because they are not covered by the Part 708 regulations. SNL also claims that the Complainant's safety-related disclosures are not protected under Part 708 because Mr. Von Bargen could not have reasonably believed that they revealed a substantial violation of a law, rule, or regulation, a substantial danger to employees or to public health or safety; or fraud, gross mismanagement, or abuse of authority. Finally, the Respondent states that the complaint must be dismissed because even if the disclosures were protected under Part 708, there is no demonstrable nexus between them and the Complainant's termination.

III. Analysis

Under the Part 708 regulations, dismissal of a complaint for lack of jurisdiction or other good cause is appropriate if (i) the complaint is untimely, or (ii) the facts, as alleged in the complaint, do not present issues for which relief can be granted under Part 708, or (iii) the Complainant filed a complaint under state or other applicable law concerning the same facts that are alleged in the Part 708 complaint, or (iv) the complaint is frivolous on its face, or (v) the complaint has been rendered moot by subsequent events, or (vi) the Respondent has made a formal offer of relief that is equivalent to what could be provided as a remedy under Part 708. 10 C.F.R. § 708.17(c). The OHA has previously stated that dismissal "is the most severe sanction that we may apply," and should be used sparingly. *Boeing Petroleum Services*, 24 DOE ¶ 87,501 at 89,005 (1994). Accordingly, Motions to Dismiss should be granted only if supported by "clear and convincing" evidence. *Fluor Daniel Fernauld*, 27 DOE ¶ 87,532 at 89,163 (1999). For the reasons that follow**,** I will deny SNL's Motion To Dismiss.

As indicated above, SNL primarily contends that the facts, as alleged in Mr. Von Bargen's complaint, do not present issues for which relief can be granted under Part 708. The Respondent does not claim that any of the other grounds for dismissal under section 708.17(c) are applicable, and indeed, I conclude that they are not. With regard to SNL's argument that all of Mr. Von Bargen's allegations regarding sexual harassment must be dismissed, the Respondent correctly points out that section 708.4 of the "Whistleblower" regulations provides that an employee may not file a claim under Part 708 if that "complaint is based on race, color, religion, sex, age, national origin, or other similar basis." However, assuming, without deciding, that this prohibition also includes claims based on sexual harassment, I find that it would be premature to dismiss these allegations prior to a full investigation into Mr. Von Bargen's complaint. If, for example, an

investigation was to show that sexual harassment did occur, that the Complainant's supervisors knew of this harassment, and that they took no remedial actions in retaliation for Mr. Von Bargen's having made protected disclosures, this would constitute a cause of action for which relief could be granted under Part 708. I will therefore not dismiss the Complainant's allegations of sexual harassment at this time.

Regarding Mr. Von Bargen's allegations of retaliation for making safety-related disclosures, section 708.5 of the "Whistleblower" regulations states that, in order for a disclosure to be protected, the complainant must have reasonably believed that the information disclosed revealed "a substantial violation of a law, rule or regulation; a substantial and specific danger to employees or to public health or safety; or fraud, gross mismanagement, gross waste of funds, or abuse of authority." 10 C.F.R. § 708.5(a)(1) - (3). Therefore, in order to prevail in its Motion to Dismiss on the grounds that the disclosures that Mr. Von Bargen made were not protected, SNL would have to show, by clear and convincing evidence, that the Complainant did not have a reasonable belief that his disclosures revealed a substantial violation of a law, rule or regulation or a substantial and specific danger to employees or to public health or safety. The record in this proceeding, as it currently exists, will not support such a showing.

The alleged disclosures for which Mr. Von Bargen claims Part 708 protection are that the Lock Out-Tag Out (LOTO) procedures for certain 277 volt lighting systems at SNL are inadequate, and that 14 contractor service companies did not have site-specific safety plans on file with SNL. In its Motion, SNL claims that Mr. Von Bargen did not allege violations of rules or regulations in his complaint. SNL Motion at 7, 9. These SNL claims are clearly erroneous. In his complaint, Mr. Von Bargen said that he "told the Facilities ESH Coordinator that 29 C.F.R. § 1910.147 does not allow control devices to be used as a . . . LOTO point (this discussion was related to using light switches as . . . LOTO points for locking out 277 volt lighting systems). . ." He went on to state that the "second safety concern consisted of 14 violations of DOE Order 440.1A pertaining to nonexistent approved site specific safety plans for 14 companies having contracts to perform work at Sandia." Complaint at 1. Whether his belief that substantial violations occurred is reasonable, or whether he reasonably believed that his disclosures revealed substantial and specific dangers to employees or the public can only be decided after a full investigation of all of the available facts. SNL's Motion to Dismiss is therefore denied.

DECISION AND ORDER
OF THE DEPARTMENT OF ENERGY

Motion for Summary Judgment

Name of Case: Battelle Energy Alliance, LLC

Date of Filing: September 6, 2007

Case Number: TBZ-0047

This decision concerns a Motion for Summary Judgment filed by Battelle Energy Alliance, LLC ("BEA," "the contractor," or "Respondent") on September 6, 2007. The motion relates to five pending complaints filed by one of its employees, Dennis Patterson ("Mr. Patterson" or "the complainant"), under the Department of Energy (DOE) Contractor Employee Protection Regulations codified at 10 CFR Part 708.[1] In the motion under consideration, BEA requests that I dismiss two of the five Part 708 complaints. [2]

I. Procedural Background

The complainant was formerly the Manager of Employee Concerns and Business Ethics of BEA, the management and operations contractor of the DOE Idaho National Laboratory (INL). He filed five complaints under Part 708 alleging that he had engaged in protected activity and that BEA retaliated against him for that activity by, among other things, demoting him to a non-managerial job in the Engineering Design and Drafting Services group of INL. After I scheduled the hearing on the five complaints, BEA filed this Motion for Summary Judgment which pertains only to the first and second complaints. Patterson filed a Response and BEA then filed a Reply to the Response. [3] *See* Complainant's Response to BEA Motion for Summary Judgment (September 11, 2007) (Response); BEA Reply to Response to Motion for Summary Judgment (September 13, 2007) (Reply).

---

[1] The purpose of the Department of Energy Contractor Employee Protection Program is to encourage contractor employees to disclose information that they believe exhibits unsafe, illegal, fraudulent or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers. The Part 708 regulations provide procedures for processing complaints by employees of DOE contractors alleging retaliation by their employers. 65 Fed. Reg. 6319 (2000).

[2] Mr. Patterson's complaints were consolidated and assigned one case number, Case No. TBH-0047. The hearing on Mr. Patterson's complaints is scheduled for November 27, 2007, in Idaho Falls, Idaho.

[3] Complainant contends that he did not have all documents and information necessary to respond to BEA's Motion for Summary Judgment because BEA had not yet responded to his discovery requests. Response at 8.

I. The Contractor's Motion for Summary Judgment

In its Motion, the contractor argues that two of Mr. Patterson's complaints should be dismissed for the following reasons:

1. Five of the six alleged retaliations in the First Complaint are time-barred by the 90 day limitation in Part 708;

2. Mr. Patterson filed a complaint with the Idaho Human Rights Commission (IHRC) and the Equal Employment Opportunity Commission (EEOC) with respect to the same facts alleged in his Part 708 complaint; and

3. The 2006 security investigations and the merit increase awarded to the complainant on March 14, 2006, are not retaliations under Part 708.[4]

Motion for Summary Judgment at 8.

The Part 708 regulations do not include any procedures governing summary judgment motions. However, the Federal Rules of Civil Procedure provide guidance on this matter. *See Edward J. Seawalt*, Case No. VBZ-0047, 28 DOE ¶ 87,005 (2000). In that regard, federal courts have stated that summary judgment is appropriate when "the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law." Fed.R.Civ.P. 56(c). S*ee also Celotex Corp. v. Catrett*, 477 U.S. 317, 322 (1986). To determine which facts are material, a court must look to the substantive law on which each claim rests. *Heartland Regional Medical Center v. Leavitt*, No. 00-2802 (RMU), 2007 WL 2471727, at *2 (D.D.C. Sept. 4, 2007) (citing *Anderson v. Liberty Lobby, Inc*. 477 U.S. 242, 248 (1986)). A genuine issue is one whose resolution could establish an element of a claim or defense and, therefore, affect the outcome of the action. *Celotex*, 477 U.S. at 322; *Anderson*, 477 U.S. at 248. Thus, in order to prevail on the instant motion, BEA must show that Mr. Patterson failed to make a showing sufficient to establish the existence of an element essential to his case, and on which Mr. Patterson bears the burden of proof at the hearing. *Celotex*, 477 U.S. at 322.

This office has previously held that a motion for summary judgment should only be granted if it is supported by "clear and convincing" evidence. *Edward J. Seawalt*, 28 DOE at 89,044. *See also Fluor Daniel Fernald*, Case No. VBZ-0005, 27 DOE ¶ 87,532 at 89,163 (1999) (motion to dismiss should only be granted where there are clear and convincing grounds for dismissal); *Boeing Petroleum Services*, 24 DOE ¶ 87,501 at

[4] In the First Complaint, Mr. Patterson's sixth allegation of retaliation is that the percentage merit increase he received in March 2006 is lower than his previous increases. In the Second Complaint, Mr. Patterson alleges two retaliatory actions--two investigations by BEA, one for misuse of government property and another for bias during an investigation.

89,005 (1994) (describing dismissal as "the most severe sanction that we may apply" and thus to be used sparingly). For the reasons discussed below, I will grant the motion for summary judgment in part.

A. Whether Five of the Six Alleged Retaliations are Time-barred by Part 708

BEA argues that five of the six allegations of retaliation in the complaint should be barred from further consideration by the time requirements of Part 708 which states that "You [the complainant] must file your complaint by the 90th day after the date you knew, or reasonably should have known, of the alleged retaliation." 10 C.F.R. § 708.14 (a). The five allegations at issue are: (1) a comment by Mark Olsen, General Counsel of BEA, on July 27, 2005; (2) an August 12, 2005, memorandum from Juan Alvarez, Deputy Laboratory Director, that contained criticism of Mr. Patterson's behavior during the investigation of the Mitchell incident; (3) an investigation into the effectiveness of the investigation function of the Ethics Office that was requested by Art Clark, Deputy Laboratory Director for Operations, INL in October 2005 and completed on February 10, 2006; (4) a change in Mr. Patterson's job classification on February 24, 2006; and (5) a performance evaluation on February 24, 2006, that was less favorable than previous evaluations. Because Mr. Patterson filed his complaint on June 1, 2006, any alleged retaliatory events pertinent to his complaint should have occurred no later than March 4, 2006.[5] However, the five items of alleged retaliation noted above occurred prior to March 4, 2006, i.e., more than 90 days before Mr. Patterson's complaint was filed.

In his Response, Mr. Patterson counters that all of the alleged retaliatory events are timely "because [he] did not know or have reason to know that BEA's actions were retaliatory until [he] learned of the lower merit increase." [6] Complainant's Response at 8. Mr. Patterson states that when he suggested to his immediate manager in February 2006 that the lower performance evaluation appeared to be retaliatory, the manager agreed to reconsider and then raised the rating. Mr. Patterson then submits that he could not discern any evidence of retaliation until he received a lower merit increase almost two weeks later. Response at 10-11. At that time he concluded that the five events under discussion were sequential elements of BEA's retaliation against him for making protective disclosures. Response at 9.

Our previous cases require that I consider the totality of the circumstances during this period in order to determine whether he knew or should have known that retaliation occurred. The critical inquiry at this juncture is at what point a reasonable person would recognize the five events at issue as Part 708 retaliation. We have stated in the past that the complainant should be allowed sufficient time to recognize that a personnel action taken by management was indeed retaliatory in nature. *See Franklin Tucker*, Case No. TBH-0023, 29 DOE ¶ 87,021 at 89,089-90 (2007); *Steven F. Collier*, Case No. VBH-

[5] The sixth allegation of retaliation, a lower merit increase, occurred within the 90-day regulatory window.
[6] Mr. Patterson received a 4.05% merit increase in March 2006. His average merit increase for the previous five years was 5.22% according to Mr. Patterson (but 4.73% according to BEA). Motion for Summary Judgment at 10, fn 60; Reply in Support of Motion for Summary Judgment at 18-19, 21-23.

0084, 28 DOE ¶ 87,036 at 89,257 (2003); *Gary S. Vander Boegh*, Case No. TBH-0007, 28 DOE ¶ 87,040 at 89,283-84 (2003) (certain personnel actions, while not regarded as neutral in their impact by the complainant, were not so overtly punitive in nature that a reasonable person "should have known" that they were Part 708 retaliations at the time that they took place). However, the complainant is not required to have any actual or official corroborative evidence of motive in order to file a complaint under Part 708. *See Delbert F. Bunch*, Case No. TBU-0068, 29 DOE ¶ 87,026 at 89,135 (2007).

I conclude that Mr. Patterson recognized or should have recognized retaliation prior to March 2006, and base this conclusion on his own pleadings. In November 2005, Mr. Patterson mentioned to the BEA investigators that he suspected he was being retaliated against for making a protected disclosure. Complaint at 1 ("On November 2, 2005, I reported concerns that I had been the victim of intimidation and retaliation…"). In February 2006, upon receiving a 2005 performance appraisal that was two levels lower than his ratings for the past seven years, Mr. Patterson told his immediate manager "you know what this looks like don't you." Complaint at 5; Response at 9. It is clear from the record that Patterson had more than a mild suspicion of retaliation against him as early as November 2005, and I find that at this time, he "knew or reasonably should have known, of the alleged retaliation." 10 C.F.R. § 708.13. As explained above, Mr. Patterson first recognized retaliation seven months prior to filing his complaint. [7] Accordingly, the first five allegations of the complaint are dismissed pursuant to 10 C.F.R. § 708.14 (a).

B. Whether Mr. Patterson's Part 708 Complaint Is Based on the Same Facts as his Idaho Human Rights Commission and Equal Employment Opportunity Commission Complaint

Patterson filed a complaint with the Idaho Human Relations Commissions (IHRC) and the Equal Employment Opportunity Commission (EEOC) on March 14, 2006. Mr. Patterson alleges that he was discriminated against on the basis of race and retaliation between July 17, 2005, and February 24, 2006. *See* Supplemental Declaration of Katherine L. Moriarty In Support of BEA's Motion for Summary judgment, IHRC Complaint (March 14, 2006). He alleges violations of Title VII of the Civil Rights Act of 1964 and Title 67, Chapter 59 of the Idaho Code. According to Mr. Patterson, during 2005 he communicated ethical and discrimination concerns to BEA senior management and as a result became the subject of discrimination and retaliation. He withdrew the complaint prior to any action by the IHRC or the EEOC. Response at 12.

BEA argues that the "core facts" in both complaints are the same – that Mr. Patterson made protected disclosures relating to his investigation of the site access revocation incident and as a result suffered adverse personnel actions. BEA contends that even though the alleged disclosures in the IHRC complaint differ from those in the DOE complaint, they "fall within the same retaliatory stream" as that engendered by the

[7] Moreover, he was the Manager of Employee Concerns for many years and can reasonably be expected to be more familiar than the average employee with the Part 708 process and the many faces of retaliation in the workplace.

revocation disclosures and which culminated in the same alleged adverse personnel actions. Motion for Summary Judgment at 25.

In order to prevail in his IHRC/EEOC complaint, Mr. Patterson must prove that he was discriminated against based on his race and also because he reported racial discrimination to the contractor. However, because "the pleading and underlying facts that would support this type of claim are different from those that would underlie a complaint filed under Part 708 . . . ," I find that the complaints are based on different facts, and Mr. Patterson's Part 708 complaint may proceed. *See Lucy B. Smith*, Case No. VWZ-0012, 27 DOE ¶ 87,520 (1999) (finding that age discrimination complaint filed with EEOC and South Carolina Human Affairs Commission did not preclude Ms. Smith from proceeding with her Part 708 complaint because the complaints were not based on the same facts). Mr. Patterson's Part 708 claim alleges retaliation for making a protected disclosure that differs from the protected conduct in the IHRC/EEOC case. Different facts are required to establish a prima facie case in the two complaints. In order to prevail on his Part 708 claim, Mr. Patterson must prove that his demotion and lower salary increase were the negative consequences of making protected disclosures to BEA management. Part 708 does not contain a cause of action for racial discrimination. I, therefore, find that Mr. Patterson's Part 708 complaint is not based on the same facts as his IHRC/EEOC complaint.

C. Whether the Merit Increase and Security Investigations Are Retaliatory Actions

BEA argues that neither the merit increase nor the 2006 security investigations can be considered retaliation under Part 708.[8] Motion for Summary Judgment at 27-31. BEA contends that an employment action is not retaliation unless it results in a materially adverse change in employment conditions comparable to a termination of employment, a demotion evidenced by decrease in wages or other negative action with respect to the compensation, terms, condition or privileges of employment. According to BEA, there was no tangible negative effect on the terms and conditions of the complainant's employment because the merit increase was actually a positive effect, since it increased the complainant's salary. As for the investigations, BEA maintains that the complainant has failed to state a cause of action for which relief can be granted because there is no relief available under Part 708 to require BEA to cease and desist from conducting an investigation. Further, conducting an investigation into alleged irregularity is the duty of a government contractor. Motion for Summary Judgment at 27-31.

The complainant argues that the lower merit increase and the two security investigations in question are indeed materially adverse changes in his employment conditions. Response at 18-23. Patterson thought that the first investigation would be a routine inquiry into the Mitchell incident, but he learned from the contractor's response to his IHRC/EEOC complaint that his own actions were the focus of the investigation. Response at 3. Mr. Patterson contends that an investigator confirmed that BEA was

[8] BEA investigated Mr. Patterson in June 2006 for misuse of government time and equipment in connection with his IHRC/EEOC complaint, and in July 2006 for alleged bias during an Employee Concerns investigation. Response at 19-23.

actually investigating Mr. Patterson for preparing a Part 708 complaint, corresponding with the IHRC, and corresponding with a community organization. Response at 6. As regards the second investigation, the manner in which BEA conducted the inquiry into his alleged misconduct during an Employee Concerns investigation caused him great concern because it was different from any previous investigation into his duties. As an employee concerns manager, he himself had been the subject of investigations into how he handled cases in the past. Typically, his manager would review the case file and then discuss with Mr. Patterson how the investigation was conducted. However, in the investigations at issue, security personnel performed the investigations and they did not ask to see his files.

1. The Merit Increase is not Retaliation under Part 708

I find that the 2006 merit increase is not a retaliation because it did not result in a materially adverse change in Mr. Patterson's employment conditions comparable to the examples cited in Part 708.2. It is true that Mr. Patterson's 4.05% increase in March 2006 was lower than his previous five year average (either 5.22% according to Patterson or 4.73% according to BEA). Response at 18. However, even assuming arguendo that his previous five year average increase is 5.22%, I cannot find under the specific facts of this case that a reduction to 4.05% is a materially adverse change in the conditions of his employment. It is important to note that Mr. Patterson received the highest percentage merit increase of the nine employees who reported to his immediate manager. There may be situations where a reduction in salary increase indicates a materially adverse change in a complainant's employment conditions. However, this case does not present such a scenario. The difference in the 2006 increase compared to the historical average increase is minimal, and Patterson received the highest percentage merit increase of all employees reporting to his immediate manager. Because I cannot discern a negative effect on his employment, I find that the 2006 merit increase is not Part 708 "retaliation."

2. The Security Investigations May be Retaliation under Part 708

Based on the record I conclude that a reasonable person could consider the two security investigations to be retaliatory actions. It is well within the realm of possibility for an employer to use an investigation as an act of retaliation against an employee. *See Bernard Cowan*, Case No. VBH-0061, 28 DOE ¶ 87,023 at 89,171 (2002) (finding that while a report was not an adverse personnel action, the use of that report to penalize a complainant could constitute adverse action). This was certainly not the first time that Patterson's actions as the manager of Employee Concerns had been investigated, but the two investigations in question seemed to follow a different procedure and have a different focus. The investigations arguably resulted in a materially adverse change in his employment conditions—he was the subject of two investigations within a short period of time after filing whistleblower and civil rights claims, and both were subject to more rigorous examination than past inquiries. The investigations are more than the type of trivial annoyances common to all workplaces, and could reasonably be considered deterrents to filing a Part 708 complaint. *See Burlington Northern and Santa Fe Railway Co. v. White*, 126 S.Ct. 2405, 2415 (2006) (stating that a materially adverse action is one that may dissuade a reasonable worker from filing a complaint against an employer).

Given these facts, the investigations could be considered acts of retaliation. Thus, at this stage in the proceeding, there is not clear and convincing evidence that the investigations were not retaliatory.[9] Accordingly, this part of the motion is denied.

II. Conclusion

For the reasons stated above, I conclude that Mr. Patterson's first Part 708 complaint will be dismissed in its entirety because (1) the first five allegations of retaliation are time-barred by the 90-day rule of Part 708.14 and (2) the 2006 merit increase, the sixth and final allegation, does not constitute a negative personnel action under Part 708.2. In light of this finding, that portion of the Motion for Summary Judgment will be granted. As regards Mr. Patterson's second Part 708 complaint (the two security investigations), I am not persuaded by the contractor's arguments and will therefore entertain the issues in that complaint at the hearing.

It Is Therefore ORDERED That:

(1) The Motion for Summary Judgment filed by Battelle Energy Alliance on September 6, 2007, OHA Case No. TBZ-0047, be and hereby is granted in part as set forth in Paragraph 2 below, and denied in all other respects.

(2) The First Complaint filed by Dennis Patterson under 10 C.F.R. Part 708 on June 1, 2006, be and hereby is dismissed in its entirety.

(3) This is an Interlocutory Order of the Department of Energy. This Order may be appealed to the Director of OHA upon issuance of a decision by the Hearing Officer on the merits of the complaint.

Valerie Vance Adeyeye
Hearing Officer
Office of Hearings and Appeals

Date: November 21, 2007

[9] BEA argues that Mr. Patterson's claim must fail because Part 708 cannot order a contractor to discontinue investigations. However, the complaint does not request a remedy of a ban on future BEA investigations.

March 26, 2009

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Motion for Summary Judgment

Name of Case: James J. Myers

Date of Filing: March 6, 2009

Case Number: TBZ-0083

This Decision will consider a Motion for Summary Judgment which relates to a pending complaint filed by Mr. James J. Myers (hereinafter referred to as "Mr. Myers" or "the Complainant") on August 11, 2008, against his former employer, ENVIRO AgScience (hereinafter referred to as "EAS"), a subcontractor at the Department of Energy's (DOE) Savannah River Site in Aiken, South Carolina, under the DOE's Contractor Employee Protection Program regulations found at 10 C.F.R. Part 708. *See* Report of Investigation, OHA Case No. TBI-0083 (2009). 1/ EAS seeks dismissal of Mr. Myers' complaint.

I. Background

The Department of Energy established its Contractor Employee Protection Program to safeguard "public and employee health and safety; ensure compliance with applicable laws, rules, and regulations; and prevent fraud, mismanagement, waste, and abuse" at DOE's Government-owned or - leased facilities. Criteria and Procedures for DOE Contractor Employee Protection Program, 64 Fed. Reg. 12862 (March 15, 1999) (interim final rule). Its primary purpose is to encourage contractor employees to disclose information that they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their

---

1/ Pursuant to Part 708, an OHA attorney conducted an investigation of the present complaint and issued a Report of Investigation (ROI) on January 9, 2009, in which he concluded that the complainant could not have reasonably believed that he revealed a substantial and specific danger to employees or to public health or safety. I was appointed the Hearing Officer to conduct a hearing on the Complaint. In a letter dated January 21, 2009, I directed the complainant to submit a brief that addressed why the statements that he made to Dr. James Lynn, EAS President, could be properly characterized for purposes of 10 C.F.R. Part 708 as evidence of "a substantial and specific danger to employees or to public heath or safety." I further indicated to the complainant that he was free to submit additional documentary evidence to show that his alleged disclosures fall within the ambit of the Part 708 regulations. I also directed EAS to file a responsive brief and indicated that I would entertain a Motion to Dismiss the Complaint if I determined that Mr. Myers' brief and documentary evidence did not support a finding that he made at least one protected disclosure. Upon my direction, EAS filed a Motion to Dismiss the subject Complaint. After reviewing EAS' submissions and the standards governing summary judgment motions, I have recharacterized EAS' Motion to Dismiss as a Motion for Summary Judgment.

employers. The Part 708 regulations prohibit discrimination by a DOE contractor against its employee because the employee has engaged in certain protected activity, including when the employee has

> (a) Disclosed to a DOE official, a member of Congress, any other government official who has responsibility for the oversight of the conduct of operations at DOE site, your employer, or any higher tier contractor, information that you reasonably believe reveals-
>
> (1) A substantial violation of a law, rule or regulation;
> (2) A substantial and specific danger to employees or to public health or safety; or
> (3) Fraud, gross mismanagement, gross waste of funds, or abuse of authority . . . .

10 C.F.R. § 708.5(a).

EAS is the grounds maintenance sub-contractor at the Savannah River Site in Aiken, South Carolina. On April 30, 2008, EAS hired Mr. Myers as a lawn equipment operator. *See* ROI at 2. As part of his duties, Mr. Myers operated a riding tractor, weed eater, lawn mower, chain saws, and an edger. *Id.* On May 1, 2008, his first day of work, Mr. Myers operated a walk-behind mower. At an employee meeting on May 2, 2008, Dr. Louis Lynn, President of EAS, reviewed the previous day's employee performance and said, "[T]he mower could have [been] run faster . . ." Having run the mower, Mr. Myers responded that it was "unfamiliar" and that he "ran it as fast and safe as [he] could with others and [his] safety in mind." Dr. Lynn replied, "[W]e are all suppose[d] to be professional operations and [I am] paying [you] good money to do the job and if [you can't, I will] get someone who [can] and for less than [I am] paying [you]." *Id.* at 3. On June 13, 2008, EAS suspended Mr. Myers and, on June 20, 2008, they terminated him. *Id.* On August 11, 2008, Mr. Myers filed a Complaint with the Employee Concerns Program of the Office of Civil Rights, Savannah River Operations Office. In his Complaint, Mr. Myers alleges that EAS terminated him because he brought to management's attention a "potential safety concern regarding work-related duties in the use of a certain piece of equipment on May 1, 2008." *Id.* EAS denies that Mr. Myers made a protected disclosure.

II. Analysis

The Part 708 regulations do not include procedures and standards governing motions for summary judgment. I note that the Federal Rules of Civil Procedure provide that such a motion shall be granted "if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law." Fed. R. Civ. P. 56(c). *See also Celotex Corp. v. Cattrett*, 477 U.S. 317, 322 (1986). While the Federal Rules do not govern this proceeding, Rule 56 has been used as a guide in the evaluation of Motions for Summary Judgment filed in a Part

708 proceeding. *See Edward J. Seawalt*, Case No. VBZ-0047 (August 20, 2000) 2/ Prior cases of this office considering Motions for Summary Judgment instruct that such a motion should only be granted if it is supported by "clear and convincing" evidence. *Fluor Daniel Fernald*, Case No. VBZ-0005 (October 4, 1999).

To prevail in a whistleblower complaint, a complainant has the burden of establishing by a preponderance of the evidence that he reasonably believed that he made a protected disclosure. If the employee meets this threshold burden, then he must prove that the disclosure was a contributing factor in one or more alleged acts of retaliation against the employee by the contractor. 10 C.F.R. § 708.29. Once the employee has met this burden, the burden shifts to the contractor to prove by clear and convincing evidence that it would have taken the same action in the absence of the employee's disclosure. *Id.* For the reasons discussed below, I find that there is no genuine issue as to any material fact in the case and that the complainant has not made a protected disclosure. Thus, I will grant the motion for summary judgment before me.

In its Motion, EAS asserts that there is no factual or legal basis for the complainant's allegation, specifically that "none of the purported incidents Mr. Myers identified in his allegations are reasonably characterized as voicing a safety concern or the exercise of protected activity within the scope of Part 708." *See* EAS Motion to Dismiss at 3. EAS further asserts that Mr. Myers did not describe any present or future danger and that as noted in the ROI, Mr. Myers claimed to have "operated the mower in question only once and only at a safe speed (Mr. Myers operated [the mower] only in first gear, the slowest which he felt safe doing.)." *Id.* at 4. Therefore, EAS asserts that there was no actual danger to Mr. Myers, or to anyone else, at any time. *Id.* Finally, EAS asserts that Mr. Myers "retroactively" alleges that "I raised a safety concern" after having a discussion with Dr. Lynn regarding the mower and that Mr. Myers failed to explain or support his assertion of a "safety concern." *Id.* at 5.

EAS' assertions are supported by the following facts in the record. First, Mr. Myers admitted that he had been trained by another employee to operate a walk-behind mower and was instructed to only use the gears that he felt comfortable using. ROI at 5. Mr. Myers further admitted that he operated the walk-behind mower in first gear, which was the slowest gear and the gear which he felt safe operating. *See* Complaint. Second, in his discussion with Dr. Lynn, Mr. Myers did not describe a danger, present or future, and admitted that he did not feel that he was in any danger operating the mower. ROI at 5. Rather, Mr. Myers admitted that EAS never instructed, pressured, or threatened him to operate the mower faster that he felt safe doing. In addition, Mr. Myers stated that he understood Dr. Lynn's comment "to mean that If Mr. Myers could not operate the mower at the speed that Dr. Lynn desired, EAS would remove him from the machine and assign it to an employee who could operate it as fast as Dr. Lynn would have liked." *Id.* at 6. Further, Mr. Myers admitted that he did not take Mr. Lynn's comment as a threat that he would suffer adverse employment action if he did not operate the walk-behind mower faster. *Id.* Third, other than recounting the relevant

2/ Decisions issued by the Office of Hearings and Appeals (OHA) after November 19, 1996, are available on the OHA website located at http://www.oha.doe.gov. The text of a cited decision may be accessed by entering the case number of the decision in the search engine located at http://www.oha.doe.gov/search.htm.

conversation he had with Dr. Lynn, Mr. Myer has not explained nor has he provided additional information regarding his allegation of a "safety concern." In light of this information in the record, there is no genuine issue as to any material fact in this case. I therefore find, as a matter of law, that Mr. Myers could not prove that he had a reasonable belief that his disclosure revealed a substantial and specific danger to employees or to public health or safety. Accordingly, I will grant EAS' motion. The granting of EAS' motion requires me to dismiss the underlying complaint.

It is Therefore Ordered That:

(1) The Motion for Summary Judgment filed by ENVIRO AgScience on March 6, 2009, OHA Case No. TBZ-0083, is hereby granted.

(2) The Complaint filed by James J. Myers under 10 C.F.R. Part 708 on August 11, 2008, OHA Case No. TBH-0083, is hereby dismissed in its entirety. This Order may be appealed to the Director of OHA.

Date: March 26, 2009

November 24, 2010

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Motion to Dismiss

Names of Petitioners:	Hansford F. Johnson B&W Pantex LLC
Dates of Filings:	November 1, 2010
Case Numbers:	TBZ-0104

This Decision will consider a Motion to Dismiss filed by B&W Pantex LLC (B&W), the Management and Operating Contractor for the Department of Energy's (DOE) Pantex Plant (Pantex), in connection with the pending Complaint of Retaliation filed by Hansford F. Johnson against B&W under the DOE's Contractor Employee Protection Program and its governing regulations set forth at 10 C.F.R. Part 708. The Office of Hearings and Appeals (OHA) assigned the hearing component of Mr. Johnson's Part 708 Complaint proceeding, Case No. TBH-0104, and B&W's Motion to Dismiss, Case No. TBZ-0104. For the reasons set forth below, I will grant B&W's Motion in part and dismiss Mr. Johnson's Complaint as to certain alleged retaliations.

I. Background

A. The DOE Contractor Employee Protection Program

The DOE's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent fraud, mismanagement, waste and abuse" at DOE's government-owned, contractor-operated facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purpose is to encourage contractor employees to disclose information which they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers.

The regulations governing the DOE's Contractor Employee Protection Program are set forth at Title 10, Part 708 of the Code of Federal Regulations. The regulations provide, in pertinent part, that a DOE contractor may not discharge or otherwise discriminate against any employee because that employee has disclosed, to a DOE official or to a DOE contractor, information that the employee reasonably believes reveals a substantial violation of a law, rule, or regulation; a substantial and specific danger to employees or to the public health or safety; or, fraud, gross mismanagement, gross waste of funds, or abuse of authority. *See* 10 C.F.R. § 708.5(a)(1)-(3). Available relief includes reinstatement, back pay, transfer preference, and such other relief as may be appropriate. *Id.* at § 708.36.

Employees of DOE contractors who believe they have been discriminated against in violation of the Part 708 regulations may file a whistleblower Complaint with the DOE and are entitled to an investigation by an investigator from the Office of Hearings and Appeals (OHA), an independent fact-finding and a hearing by an OHA Hearing Officer, and an opportunity for review of the Hearing Officer's Initial Agency Decision by the OHA Director. 10 C.F.R. §§ 708.21, 708.32.

B. Procedural History

Mr. Johnson filed a Part 708 Complaint on September 8, 2008, with the Whistleblower Program Manager at the National Nuclear Security Administration's Service Center in Albuquerque, New Mexico. He filed an amendment to his Complaint on November 20, 2008. In his Complaint, Mr. Johnson alleged that he had made protected disclosures and, as a result of his so doing, B&W engaged in a series of retaliatory actions against him, including threatening to fire him and subjecting him to an internal audit. B&W filed its response to the Part 708 Complaint on December 10, 2008, contesting that Mr. Johnson had engaged in any conduct protected under Part 708, and arguing that his Complaint did not identify any acts of retaliation. The Whistleblower Program Manager transmitted the Complaint to OHA for an investigation, to be followed by a hearing, when informal resolution of the Complaint proved unsuccessful. While the case was pending before an OHA Investigator, Mr. Johnson requested that his Complaint be dismissed. On June 4, 2009, the OHA dismissed his Complaint.

On April 14, 2010, after leaving his employment with B&W on March 24, 2010, Mr. Johnson filed a new Part 708 Complaint with the Whistleblower Program Manager. In this Complaint, he referenced his earlier alleged protected disclosures and his previous Part 708 Complaint, and alleged that B&W management had retaliated against him by harassing and constructively discharging him. B&W filed a response to the Complaint on April 23, 2010, requesting that the Complaint be dismissed because Mr. Johnson was improperly attempting to reinstate his prior Complaint, which had been dismissed at his request, and because Mr. Johnson had not alleged an act of retaliation for which relief could be granted under Part 708. The Whistleblower Program Manager subsequently transmitted the Complaint to OHA for an investigation followed by a hearing.

On June 28, 2010, the OHA Director appointed an Investigator (OHA Investigator), who conducted an investigation into the allegations contained in Mr. Johnson's Complaint. The OHA Investigator issued a Report of Investigation (ROI) on September 17, 2010. In the ROI, the OHA Investigator noted that the filing of Mr. Johnson's previous Part 708 Complaint would constitute a protected activity under the regulations, which protect from retaliation conduct including "[p]articipating in . . . an administrative proceeding conducted under this regulation; . . . ." 10 C.F.R. § 708.5(b). However, the Investigator concluded that it was uncertain whether there was sufficient temporal proximity between the filing of Mr. Johnson's 2008 whistleblower Complaint and the harassment he allegedly experienced beginning in January 2010 to permit an inference that the Complaint was a contributing factor to the alleged retaliation. In addition, the Investigator, though finding that the OHA has held that a constructive discharge can form the basis for relief under Part 708, reached no conclusion as to whether the facts alleged by Mr. Johnson in this case would constitute a constructive discharge.

Immediately after the ROI was issued, the OHA Director appointed me the Hearing Officer in this case. On October 8, 2010, I sent a letter to the parties and asked them to submit briefs discussing the ROI, specifically identifying the parts of the ROI with which each party agreed and disagreed, and identifying facts in the record supporting the party's position. On October 28, 2010, B&W submitted its brief, in which it requested that the Complaint be dismissed. Mr. Johnson tendered his brief and a response to the Motion to Dismiss on November 9, 2010.

C. Factual Overview

Mr. Johnson alleges that, in 2007 and 2008, he made disclosures protected under Part 708 regarding the implementation of an Energy Savings Performance Contract (ESPC) at Pantex, including by filing a Complaint with the DOE Office of Inspector General (IG). An ESPC is a partnership between a Federal agency and an energy service company (ESC). The ESC conducts a comprehensive energy audit for the Federal facility and identifies improvements to save energy. In consultation with the Federal agency, the ESC designs and constructs a project that meets the agency's needs and arranges the necessary financing. The ESC guarantees that the improvements will generate energy cost savings sufficient to pay for the project over the term of the contract. After the contract ends, all additional cost savings accrue to the agency. Contract terms up to 25 years are allowed. Federal Energy Management Program: Energy Savings Performance Contracts, http://www1.eere.energy.gov/femp/financing/espcs.html.

Mr. Johnson claims he was subject to retaliation for his advocacy of the ESPC by virtue of an audit requested by Pantex Manager Dan Swaim. In March 2008, Mr. Swaim requested an internal audit of the ESPC, to review several issues, including Mr. Johnson's relationship with the owner of NORESCO, LLC, the ESC chosen for the Pantex ESPC. Mr. Johnson further alleges that, in late August 2008, he experienced "emotional distress" from negative interactions with his supervisor, Dale Stout, and that Mr. Stout gave him an increased workload and increasingly shorter deadlines to comply with. Allegedly pursuant to a Complaint by Mr. Stout about Mr. Johnson's performance, Mr. Johnson was subsequently asked by Pantex HR to respond to a Complaint about his work performance.

As noted above, Mr. Johnson filed a Part 708 Complaint in September 2008, but withdrew the Complaint in June 2009, after the Whistleblower Program Manager referred the Complaint to the OHA. Mr. Johnson alleges that he dropped this Complaint because he feared for his job.

In his present Complaint, Mr. Johnson alleges that he began to notice, in approximately January 2010, that Mr. Stout was again retaliating against him by demanding that major documents be finished within one day. Johnson also alleges that Mr. Stout would angrily ask a few hours later what Mr. Johnson was doing or why he was doing a particular function. It seemed to Mr. Johnson that Mr. Stout's conduct was "angrier and louder" every day. These incidents allegedly increased in frequency.

In March 2010, Mr. Johnson went to his physician regarding the stress he was experiencing on the job. His physician prescribed a tranquilizer and recommended that Mr. Johnson stay at home for one week. Mr. Johnson stayed home on sick leave during the week of March 15. Mr.

Johnson alleges that, on March 22, 2010, his physician wrote on a Return to Work Form (Form 53-B) that Mr. Johnson should not be returned to his previous work environment.

On March 23, 2010, Mr. Johnson met with Jeff Flowers, Mr. Stout's supervisor, and expressed his desire to work in a different location. Mr. Flowers instructed Mr. Johnson to report to him the following day. Mr. Johnson describes the March 24th meeting as follows:

> I went to Mr. Flower's office at 8 am. He told me to come in and shut the door. He said, "So are you ready to go back to work?" I said, "Yes. Where am I going? He said, "Back to your cubicle." At this point I went into shock. I was dazed, and stayed that way for several weeks. I said, "Back to that same environment? No, I'm not going back there. Haven't you seen the doctor's restrictions? Haven't you seen the 53-B? I am under doctor's orders not to go back to that environment." He said "Reconsider." I said, "No. I can't." He said "Again, reconsider." I said, "No. You surely know I can't go back there." He turned around and grabbed a sheaf of papers. He put them in front of me. Without looking at them, I said "Are you firing me?!" He said, "No. I'm retiring you. Sign at the bottom." I said, "I don't want to retire. I can't afford to retire." He said, "Sign your name at the bottom." I said I can't retire. I'll lose my house." He said, "Sign." I signed, in shock. The rest of the day was a blur.

ROI at 9.

II. Analysis

In its pre-hearing brief, B&W argues that Mr. Johnson's Complaint "does not present issues for which relief can be granted pursuant to 10 CFR 708. For this reason, the Company respectfully requests that the Complaint be dismissed." B&W Brief at 2. More specifically, B&W contends that the Complaint fails to identify "any protected disclosure or protected activity that falls within the scope of Part 708, and in the alternative, it fails to identify any act of retaliation that is covered by the regulations." *Id.*

The Part 708 regulations do not include procedures and standards governing motions to dismiss. In the absence of such standards, the Federal Rules of Civil Procedure, though not governing this proceeding, may be used for analogous support. *See, e.g. Billy Joe Baptist*, Case No. TBH-0080 (2009); *Edward J. Seawalt*, Case No. VBZ-0047 (2000) (applying standards of Fed. R. Civ. P. 56 to Motion for Summary Judgment). The motion to dismiss filed by B&W in the present case is most analogous to what would, under the Federal Rules, be a motion to dismiss for "failure to state a claim upon which relief can be granted . . . ." Fed. R. Civ. P. 12(b)(6).

The Supreme Court has held that, to survive a Rule 12(b)(6) motion to dismiss, a Complaint must plead "only enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly*, 550 U.S. 544, 570 (2007). While the Complaint "does not need detailed factual allegations, . . . [f]actual allegations must be enough to raise a right to relief above the speculative level, on the assumption that all of the Complaint's allegations are true (even if doubtful in fact), ..." *Id.* at 555 (citations omitted).

In addition, prior cases of this office instruct that such a motion should be granted only where there are clear and convincing grounds for dismissal, and no further purpose will be served by resolving disputed issues of fact on a more complete record. *Curtis Broaddus,* Case No. TBH-0030 (2006); *Henry T. Greene*, Case No. TBU-0010 (2003) (decision of OHA Director characterizing this standard as "well-settled"); *see also David K. Isham*, Case No. TBH-0046 (2007) (complaint may be dismissed where it fails to allege facts which, if established, would constitute a protected disclosure); *accord Ingram v. Dep't of the Army*, 114 M.S.P.R. 43, 47 (2010) (finding Merit Systems Protection Board jurisdiction under federal Whistleblower Protection Act where complaint makes non-frivolous allegation that he engaged in whistleblowing activity by making a protected disclosure, and the disclosure was a contributing factor in the agency's decision to take or fail to take a personnel action).

Applying the relevant standards, for the reasons explained below, I will dismiss the present Complaint only to the extent that it alleges acts of retaliation for which relief cannot be granted because the Complaint was not filed "by the 90th day after the date [the employee] knew, or reasonably should have known, of the alleged retaliation." 10 C.F.R. § 708.14. In all other respects, however, the Complaint presents enough facts to state a plausible claim for relief, assuming that all of the Complaint's allegations are true. There are clearly disputes as to a number of the allegations in the Complaint, and the hearing in this matter will provide an opportunity to resolve the disputed issues of fact on a more complete record.

A. Acts of Retaliation Alleged in Mr. Johnson's Previous Part 708 Complaint

First, B&W argues in its brief that "Mr. Johnson's relating back to his 2008 claim (OHA Case No. TBI-0086) is improper because that Complaint was dismissed on June 4, 2009 . . . at the request of Mr. Johnson." B&W Brief at 4. The company contends that the present Complaint "is completely based on a previously voluntarily resolved Complaint" and that, therefore, "Mr. Johnson cannot simply re-urge it at this later date." *Id.* At 2.[1]

In a analogous case decided under the Whistleblower Protection Act (WPA), upon which Part 708 is modeled, the Merit Systems Protection Board addressed the question of whether a party was barred from bringing an action concerning matters that "were the subject of a prior Board appeal that was dismissed with prejudice pursuant to the appellant's request." *Greenspan v. Dep't of Veterans Affairs*, 94 M.S.P.R. 247, 249 (2003).

In *Greenspan,* the appellant had filed a Complaint alleging that the agency retaliated against him by proposing a one-day suspension for alleged disclosures made during a March 1999 staff meeting. *Id.* The appellant filed an appeal with the Board, but later withdrew the appeal. After the first appeal was filed, the agency "reprimanded the appellant for his March 1 conduct in lieu of the suspension." *Id.* at 255. The employee subsequently filed a second appeal, this one based

[1] In support of its argument, B&W cites 10 C.F.R. §§ 708.17(c)(5) and 708.23(c). B&W Brief at 2. However, section 708.17 concerns when a "Head of Field Element or EC Director" may dismiss a Complaint, i.e., prior to the referral of a Complaint to the OHA, and section 708.23 describes procedures for issuance of a Report of Investigation. Thus, neither of the cited provisions are applicable at this stage of the present proceeding.

on the reprimand, and the agency argued that the employee's withdrawal of his first "appeal with prejudice bars the current appeal under the doctrines of collateral estoppel or res judicata." *Id.*

The Board disagreed, noting that the first appeal could not have concerned the reprimand because the agency had not yet taken that action, and that the appellant filed his first Complaint months before the reprimand occurred. "While both the reprimand and the suspension were based upon the same events, the proposed one-day suspension is a different action than the agency's ultimate actions—a letter of reprimand. Thus, neither collateral estoppel nor res judicata apply." *Id.* at 255-56.

Similarly, in the present case, Mr. Johnson alleges new acts of retaliation by B&W, beginning in January 2010, that occurred *after* he withdrew his first Part 708 Complaint, in June 2009. As in *Greenspan,* simply because Mr. Johnson alleges that these new actions were based, at least in part, on the same disclosures that he alleged in his first Complaint does not mean that his new Complaint must be dismissed.

In addition, Mr. Johnson's new Complaint is based on a separate allegation that he engaged in conduct protected under the Part 708 regulations when he filed his first Complaint. The OHA Investigator found, correctly, that filing a Part 708 Complaint constitutes a protected activity under the regulations, which protect from retaliation conduct including "[p]articipating in . . . an administrative proceeding conducted under this regulation . . . ." 10 C.F.R. § 708.5(b).

Moreover, because the June 4, 2009, letter dismissing Mr. Johnson's first Complaint did not state that the Complaint was being dismissed "with prejudice," it is not clear that this dismissal would bar Mr. Johnson from raising again *even the same* allegations of retaliations in a new Complaint. Letter from Steven L. Fine, Investigating Attorney, OHA, to Fred Johnson (June 4, 2009). However, I need not reach this issue, as the present Complaint was filed on April 14, 2010, and the Part 708 regulations require that an employee must file a Complaint "by the 90th day after the date you knew, or reasonably should have known, of the alleged retaliation." 10 C.F.R. § 708.14. Thus, Mr. Johnson is clearly time-barred from alleging, in his April 14, 2010, Complaint, any acts of retaliation that he alleged in his first Complaint, since he clearly knew of those acts at the time he filed his first Complaint in September 2008.

Indeed, other than the alleged retaliations of harassment and constructive discharge in 2010, Mr. Johnson alleges no retaliations of which he only became aware within the 90 days preceding the filing of his Complaint. Accordingly, I will dismiss the current Complaint to the extent that it alleges any acts of retaliation other than the harassment and constructive discharge Mr. Johnson alleged occurred in 2010.

B. Allegation of Constructive Discharge

As noted above, Mr. Johnson alleges that B&W constructively discharged him on March 24, 2010. In its brief, B&W references an occasion where Mr. Johnson's supervisor, Mr. Stout, "verbally counseled Mr. Johnson for reading the newspaper when Mr. Johnson was responsible for supporting Mr. Stout on an important deadline." B&W Brief at 3. B&W contends that "Mr. Johnson must prove that the isolated verbal exchange . . . arose from Mr. Stout's desire to

encourage his voluntary retirement." *Id.* at 4. The company contends that there "is simply no authority that an employee who is subjected to necessary verbal counseling by his supervisor for reading a newspaper during a pending work deadline is acting reasonably when he decides to voluntarily take retirement." *Id.*

The OHA has held that a constructive discharge can form the basis for relief under Part 708. *Richard L. Urie*, Case No. TBH-0063 (May 21, 2008). In *Urie*, the hearing officer used the standard articulated in a Supreme Court case, *Pennsylvania State Police v. Suders*, 542 U.S. 129 (2004), as the standard to establish constructive discharge in the Part 708 context. Consequently, for a whistleblower to establish that he or she was constructively discharged, the whistleblower must prove by a preponderance of the evidence that his or her working conditions became so intolerable that a reasonable person in the employee's position would have felt compelled to resign. *Urie* at 11. This is an objective "reasonable employee" standard which cannot be triggered by an employee's subjective beliefs. *See Roman v. Porter*, 604 F. 3d 34, 42 (1st Cir. 2010); *accord Heining v. General Serv. Admin.*, 68 M.S.P.R. 513, 519 (1995) ("presumption of voluntariness may be rebutted if the employee can establish that the resignation or retirement was the product of duress or coercion").

Nonetheless, in considering this issue for purposes of ruling on B&W's motion to dismiss, my decision must be based "on the assumption that all of the Complaint's allegations are true (even if doubtful in fact)," *Twombly,* 550 U.S. at 555, and the facts alleged in the present Complaint are significantly more severe than portrayed in B&W's brief. The ROI describes allegations by Mr. Johnson of not just one incident of verbal counseling, but rather conduct by Mr. Stout that became "'angrier and louder' every day" and "increased in frequency." ROI at 6. Moreover, as set forth above, Mr. Johnson alleges that, in their March 24, 2010, meeting, Mr. Flowers told him that he had to return to his former work environment, and when Mr. Johnson complained that he was under doctor's orders not to do so, Mr. Flower's told Mr. Johnson that "I'm retiring you." ROI at 9.

B&W's position on this issue is very similar to one advanced by a DOE contractor is a prior Part 708 case, *Boeing Petroleum Services*, Case No. LWZ-0026 (1994). Prior to the hearing in that case, Boeing argued, in response to a claim of constructive discharge, that the complainant "voluntarily resigned from his position . . . ." *Id.* However, the Hearing Officer noted that the complainant "maintains that his resignation was precipitated by being 'belittled and harassed by management personnel' and therefore did in fact constitute a 'constructive discharge,' . . . ." *Id.* The Hearing Officer concluded that because "this is a factual matter that is in dispute, it is premature for us to rule upon whether [the complainant] has established the existence of circumstances amounting to a 'constructive discharge' from his position." *Id.*[2] For the same reason, I find here that, based on the stark factual dispute in the present case, it would be premature to dismiss the present Complaint, which I find clearly alleges "enough facts to state a claim to relief that is plausible on its face." *Twombly*, 550 U.S. at 570.

[2] The Hearing Officer in *Urie* reached a similar conclusion regarding a pre-hearing Motion to Dismiss the claim of constructive discharge in that case, finding "that unresolved issues of fact remained regarding these claims, and that the goals of the Part 708 Contractor Employee Protection Program would best be served by resolving these issues on a more complete record." *Urie* at 4-5.

C. Nexus Between Alleged Protected Conduct and Alleged Retaliation

Under Part 708, a complainant must prove that his alleged protected act was a contributing factor to a retaliatory action. 10 C.F.R. § 708.29. One way a complainant can meet this evidentiary burden is to provide evidence that "the official taking the action has actual or constructive knowledge of the disclosure and acted within such a period of time that a reasonable person could conclude that the disclosure was a factor in a personnel action." *See David Moses*, Case No. TBH-0066 (2008), *Ronald Sorri*, Case No. LWA-0001 (1993).

B&W contends that the 15-month period between the filing of Mr. Johnson's first Part 708 Complaint in September 2008 and the alleged harassment beginning in January 2010 "argues against allowing a presumption that the 2008 whistleblower complaint was a contributing factor in the alleged constructive discharge." B&W Brief at 4-5. This argument echoes the finding of the ROI which, as does the brief, cited as support a decision of the OHA on a Part 708 jurisdictional appeal. *See Donald Searle*, Case No. TBU-0079 (2008).

In *Searle*, we upheld the dismissal of a Part 708 Complaint by an Employee Concerns Director. We found that dismissal was warranted in that case, in part because the twelve months between the filing of an earlier Part 708 Complaint and the alleged retaliation was "an unusually extended period of time." *Id.* However, the present case is readily distinguishable from *Searle* in two respects. First, in *Searle*, the OHA cited as an additional basis for its decision the fact that the company in question "voluntarily rehired Searle after he made the protected disclosure referenced in Complaint I." *Id.*

Second, *Searle* relied on a prior decision of an OHA Hearing Officer in *Elaine M. Blakely,* Case No. VBH-0086 (2003). In *Blakely*, the alleged retaliation occurred 13 months after the official who took the alleged retaliatory action became aware of the complainant's protected disclosures, the Hearing Officer further finding that the official would not have been reminded of those disclosures in the intervening months. *Id.* Here, although 15 months elapsed between the filing of Mr. Johnson's September 2008 Complaint and the alleged retaliation beginning in January 2010, the complainant's protected activity was not limited to merely the *filing* of his first Complaint. The Part 708 regulations specifically protect employees from retaliation for "[p]articipating in . . . an administrative proceeding conducted under this regulation; . . . ." 10 C.F.R. § 708.5(b). Mr. Johnson's participation with regard to his first Part 708 Complaint continued until June 2009, when he withdrew the Complaint. Thus, in fact, only about seven months had lapsed between Mr. Johnson's protected activity and the January 2010 alleged retaliations, which is a shorter period than that found sufficient to meet the complainant's burden in prior cases. *See, e.g. Barbara Nabb,* Case No. VBA-0033 (2000) (over seven months); *Luis P. Silva*, Case No. VWA-0039 (2000) (nine months). [3]

[3] This same distinction became important in the Appeal of the Hearing Officer's decision in *Blakely*, where the OHA Director disagreed with the Hearing Officer's finding that the official taking the alleged retaliatory action was not aware of a previous Part 708 Complaint filed by the complainant. *Elaine M. Blakely,* Case No. VBA-0086 (2004). The Director found that, regardless of the official's actual knowledge, it was "appropriate to impute knowledge of this earlier Part 708 proceeding to" the official. *Id.* And though the earlier Complaint was *filed* 12 months before the alleged retaliation in that case, the Director found that it was "in and of itself sufficient to permit a finding that" the employee's *participation* in the previous Part 708 proceeding "was a contributing factor in her termination, which took place within a matter of days after that initial Part 708 proceeding was concluded." *Id.*

D. Summary

For the reasons set forth above, I find that, with respect to each of the bases for dismissal advanced by B&W, the Complaint in this case presents enough facts to state a plausible claim for relief, assuming that all of the complainant's allegations are true. However, I will grant the company's Motion to Dismiss to the extent that the present Complaint alleges any acts of retaliation other than the harassment and constructive discharge Mr. Johnson alleged occurred in 2010.

It Is Therefore Ordered That:

(1) The Motion to Dismiss filed by B&W Pantex LLC on November 1, 2010, Case No. TBZ-0104, be and hereby is granted as set forth in paragraph (2) below and denied in all other respects.

(2) The Complaint filed by Hansford F. Johnson against B&W Pantex LLC on April 14, 2010, Case No. TBH-0104, be and hereby is dismissed as to any acts of retaliation other than the harassment and constructive discharge alleged to have occurred in 2010.

(3) This is an Interlocutory Order of the Department of Energy. This Order may be appealed to the Director of OHA upon issuance of a decision by the Hearing Officer on the merits of the Complaint.

Steven J. Goering
Hearing Officer
Office of Hearings and Appeals

Date: November 24, 2010

November 17, 2010

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Motions to Dismiss
Initial Agency Decision

Name of Case:	David M. Widger Safety & Ecology Corp.
Dates of Filing:	June 10, 2010 July 12, 2010 July 22, 2010
Case Numbers:	TBH-0097 TBZ-1097 TBZ-2097

This Decision will consider two Motions to Dismiss filed by Safety & Ecology Corp. (SEC), a Department of Energy (DOE) contractor located in upstate New York. SEC seeks dismissal of a Complaint that David M. Widger filed against it on October 19, 2009, under the DOE's Contractor Employee Protection Program, set forth at 10 C.F.R. Part 708. OHA has assigned Mr. Widger's Complaint Case No. TBH-0097 and the present Motions to Dismiss Case Numbers TBZ-1097 and TBZ-2097. For the reasons set forth below, I have determined that SEC's First Motion should be denied and its Second Motion should be granted. Accordingly, I find that Mr. Widger's Complaint should be dismissed.

I. BACKGROUND

A. The DOE Contractor Employee Protection Program

The DOE's Contractor Employee Protection Program provides an avenue of relief for contractor employees who experience retaliations as a result of engaging in protected activity. *See* 10 C.F.R. Part 708. Protected activity includes disclosing to a DOE official information that the employee reasonably believes reveals (1) a substantial violation of a law, rule, or regulation; (2) a substantial and specific danger to employees or to public health or safety; or (3) fraud, gross mismanagement, gross waste of funds, or abuse of authority. *Id*. at § 708.5(a). Protected activity also includes filing a Part 708 Complaint. *Id*. at § 708.5(b); *see also Thomas T. Tiller*, Case No. VWA-0018 (1998).

Part 708 sets forth the procedures for considering complaints of retaliation. The DOE's Office of Hearings and Appeals (OHA) investigates complaints, holds hearings, issues

decisions, and considers appeals. 10 C.F.R. Part 708, Subpart C. Remedies authorized under the Part 708 regulations include reinstatement, back pay, transfer preference, and other appropriate relief. *Id*. at §§ 708.36(a)(1)-(5).

B. Factual Background

Washington Group Int'l (WGI) is the prime contractor at the Separations Process Research Unit (SPRU). Memorandum from Regina Neal-Mujahid to Poli A. Marmolejos, January 11, 2010 [Neal-Mujahid Memorandum]. As a sub-contractor to WGI, SEC supports the SPRU at the Knolls Atomic Power Laboratory in upstate New York. *Id*.

In August 2008, Mr. Widger began working for SEC as a Radiological Controls Technician. Report of Investigation at 2-3. He supported the SPRU's Deactivation and Demolition Project. He monitored work packages and tested for contamination. In February 2009, he became the coordinator of the "As Low As Reasonably Achievable" (ALARA) program. As coordinator, he wrote and revised procedures to contain radioactive materials. *Id*.

Mr. Widger filed one Part 708 Complaint on October 19, 2009, and one on November 10, 2009.[1] He alleges that he made 24 protected disclosures, including SEC's failure to comply with a Beryllium Controls Plan and the Respiratory Protection Program, inadequate training, falsification of documents, and inadequate effluent system maintenance and monitoring.

Mr. Widger alleges that as a result of making his protected disclosures, he faced retaliation that included a hostile work environment resulting in his constructive discharge on November 16, 2009.

II. PROCEDURAL HISTORY

On October 19, 2009, Mr. Widger filed a Part 708 Complaint with the Federal Project Director of the SPRU Field Office. WGI and SEC investigated Mr. Widger's concerns and concluded that he had not made a protected disclosure and had not suffered retaliation. *See* Neal-Mujahid Memorandum. On November 10, 2009, Mr. Widger filed his Second Complaint.

In January 2010, the DOE's Environmental Consolidated Business Center sent OHA Mr. Widger's request for an investigation and a hearing. On June 10, 2010, the OHA Investigator issued her Report of Investigation. She concluded that Mr. Widger had not made any protected disclosure. On the same day that the OHA Investigator issued her Report of Investigation, I was assigned the Hearing Officer. Immediately thereafter, I asked the parties to brief the issues of whether Mr. Widger had made a protected

[1] I refer to Mr. Widger's two filings variously as his First Complaint, his Second Complaint, and together as his Complaint. OHA accepted the Complaints as one case file, TBH-0097.

disclosure regarding a substantial and specific danger to employees or to public health or safety and whether he faced retaliation for doing so. The parties filed their briefs on July 8, 2010, and July 22, 2010, respectively.

On July 12, 2010, and July 22, 2010, SEC filed the two Motions to Dismiss currently at issue.

III. ANALYSIS

A. SEC's First Motion to Dismiss (Case No. TBZ-1097)

SEC first moved to dismiss the pending Part 708 Complaint because after Mr. Widger had filed his Part 708 Complaint, he filed a complaint with the DOE's Office of Inspector General (IG) and the U.S. Equal Employment Opportunity Commission (EEOC). First Motion at 3.

SEC correctly stated that a complainant may not pursue a remedy under Part 708 if, "with respect to the same facts, [the complainant] . . . pursue[s] a remedy under State or other . . . law. . . ." 10 C.F.R. § 708.15(a). If so, the Part 708 complaint will be dismissed. *Id*. at § 708.17(c)(3).

On July 1, 2010, I contacted Mr. Widger to ask him whether he wished to proceed under Part 708 or with the IG. On July 2, 2010, Mr. Widger advised that he intended to proceed under Part 708 and requested that his IG complaint be dismissed. OHA advised the IG of Mr. Widger's request and the IG subsequently dismissed Mr. Widger's pending complaint. Therefore, that portion of SEC's First Motion to Dismiss, which is based on Mr. Widger's having filed with the DOE's IG, is moot.

Regarding Mr. Widger's filing with the EEOC, OHA has previously found that if the "necessary factual prerequisites differ" in the Part 708 complaint and the complaint under State or other law, "the complaints are not based upon the 'same facts' for . . . purposes" of Part 708. *Gilbert J. Hinojos*, Case No. TBZ-0003 (2003) (citations omitted). Under Part 708, a complainant must show that they made a protected disclosure or engaged in protected conduct. Under the EEOC, a complainant must show that they suffered an adverse employment action due to a protected status or the filing of an action with the EEOC. *See* 42 U.S.C. § 2000e, *et seq*. Thus, a Part 708 complaint and an EEOC complaint are not necessarily based on the "same facts" for purposes of Part 708. *Gilbert J. Hinojos*, Case No. TBZ-0003 (2003). Following *Gilbert J. Hinojos*, I find that Mr. Widger's Part 708 Complaint and his EEOC complaint are based on different facts for Part 708 purposes. Therefore, I will deny that portion of the First Motion to Dismiss based on Mr. Widger's filing a complaint with the EEOC.

B. SEC's Second Motion to Dismiss (Case No. TBZ-2097)

In its Second Motion to Dismiss, SEC argues that Mr. Widger cannot prove that he made any protected disclosure because his allegations are "vague and broad in scope," "non-specific," and not "significant or substantial enough to constitute protected disclosures." Second Motion at 4-6. It also argues that his alleged protected disclosures fail because Mr. Widger "outline[d] the alleged concerns and circumstances of employees other than [himself]." *Id*. at 7.

I accept SEC's Second Motion as a Motion to Dismiss for Lack of Jurisdiction. OHA has jurisdiction to conduct a hearing when the employee, among other things, makes a non-frivolous allegation that (i) he or she has made a protected disclosure; and (ii) the protected disclosure was a contributing factor to a retaliation. *Ingram v. Dep't of the Army*, 114 M.S.P.R. 43, 47 (2010) (citation omitted); *see also* 10 C.F.R. § 708.17(c)(4) (stating that a complaint may be dismissed if it is "frivolous or without merit"); *accord David K. Isham*, Case No. TBH-0046 (2007) (holding that if a complaint fails to allege facts which, if established, would constitute a protected disclosure, the complaint may be dismissed).

To allege a protected disclosure, an employee must disclose to a DOE official information that the employee reasonably believes reveals (1) a substantial violation of a law, rule, or regulation; (2) a substantial and specific danger to employees or to public health or safety; or (3) fraud, gross mismanagement, gross waste of funds, or abuse of authority. 10 C.F.R. § 708.5(a). The Hearing Officer evaluates reasonable belief objectively. *See Ingram*, 114 M.S.P.R. at 48 (citation omitted).

For information to qualify as a non-frivolous allegation of a protected disclosure, "an employee must communicate the information either outside the scope of his normal duties *or* outside of normal channels." *Kahn v. Dep't of Justice*, 2010 WL 3489378, at *6 (C.A. Fed. Sept. 7, 2010) (citation omitted) (emphasis added). Outside of normal channels means outside of the chain of command. *Layton v. Merit Sys. Prot. Bd.*, 2010 WL 3516675, at *5 (C.A. Fed. Sept. 9, 2010) (finding that a disclosure was not made outside of normal channels because the "record contains no evidence" that the disclosure was made "to anyone other than his superiors . . . who initially tasked . . . [the] assignment"); *Johnson v. Dep't of Health & Human Serv.*, 93 M.S.P.R. 38, 45 (2002) (finding that a disclosure was made outside of normal channels when made to an Inspector General after being made to supervisors, who ignored it).

To determine whether the employee has presented a non-frivolous allegation, the Hearing Officer evaluates the written record. *Ingram*, 114 M.S.P.R. at 48. The Hearing Officer may consider the documentary evidence but may not weigh evidence to resolve conflicting assertions. (The individual need not prove the truth of the allegations.) *Id*. *Pro se* pleadings are construed liberally. *Id*. at 49 (citation omitted). Doubt should be resolved in favor of finding a non-frivolous allegation. *Id*. at 48 (citation omitted).

1. Mr. Widger's Alleged Protected Disclosures

Mr. Widger alleges that from July 2008 to October 2009, he made protected disclosures regarding the following:[2]

1. Multiple 10 CFR Part 835 Violations – Past, Present, Pending
2. ALARA Program – Non existent, Project Dose Goals
3. Work Planning – Nuclear Safety Non Compliant
4. Procedural Non Compliance – All areas
5. Unqualified Project Personnel – Superintendents, Work Planners – Nuclear Safety
6. Radiological Deficiency Reports (RDR) – Not Being generated
7. Hostile Work Environment – chilling effect-Management[3]
8. Training Inadequate – No ALARA Training Matrix – Unqualified Instructors
9. Beryllium Controls Plan – Not being followed
10. Falsification of Documentation – Work Packages – Radiological Surveys
11. Inadequate radiation, contamination, and airborne radioactivity surveys
12. Inadequate effluent system maintenance and monitoring
13. Waste Shipments – Packaging – Sampling – Containers
14. Waste, Fraud and Abuse
15. Unqualified Perdiem Payout
16. Time Card Fraud
17. White Wash Audit Teams – WV
18. Work Area Safety – several injuries and near miss 480
19. Dosimetry Issue and Control – Bioassay
20. Respiratory Protection Program
21. Inadequate Radiological Survey and Analytical Equipment
22. Inadequate Work Force Confines
23. No Formal Schedule Released
24. No Formal Organizational Chart released

First Complaint at 5. I address each numbered allegation in turn.

a. *Alleged Protected Disclosures #1 and #4*

---

[2] This list of 24 disclosures appears in Mr. Widger's First Complaint. In Mr. Widger's Second Complaint, he repeats five alleged protected disclosures from his First Complaint.

In Mr. Widger's Second Complaint, he makes a sixth allegation regarding "discriminatory compensation." Mr. Widger alleges that he has assumed additional responsibilities for which he has "yet to be duly compensated." Second Complaint at 21. Further, he said that some co-workers had been "promoted and hired with commensurate compensation," which he "view[s] . . . as direct discrimination towards [himself]." *Id*. I do not address this allegation because compensating employees at different rates, by itself, violates no law. Mr. Widger has not alleged that SEC based his disparate pay upon his race, religion, sex, national origin, or other protected basis. Even if he had, Part 708 is not the proper forum to address that alleged discrimination. 10 C.F.R. § 708.4(a).

[3] I address this allegation below, in the section under retaliation.

Regarding Allegation #1 – "Multiple 10 CFR Part 835 Violations – Past, Present, Pending" and Allegation #4 – "Procedural Non Compliance – All areas" – Mr. Widger fails to provide enough information for me to evaluate the seriousness of many of the allegations or whether he reasonably believed that they are true. For example, Mr. Widger states that he "notic[ed] many procedural and regulatory violations and [brought] them forward to management's attention." First Complaint at 2. He does not state which violations he noticed, when, and why the conditions constituted violations. He repeats the allegation but again fails to add any specific descriptive information. *Id*. at 3. Mr. Widger states that he disclosed "a fire loading problem . . . that violated procedure and safety," but he did not describe the problem. *Id*. He also states that on August 6, 2009, he spoke with a particular member of management to discuss "RadCon issues that surfaced from above events." *Id*. at 4. But he provides no further detail about the discussion. Therefore, I find that these portions of Allegation #1 and Allegation #4 do not constitute non-frivolous allegations of protected disclosures.

Mr. Widger states that between April 16, 2009, and June 4, 2009, he found "wide spread radiological contamination . . . during a random . . . sampling." *Id*. at 2. But he does not state that he disclosed this issue to management. Therefore, I find that this portion of Allegation #1 and Allegation #4 does not constitute a non-frivolous allegation of a protected disclosure.

Mr. Widger also alleges that in July 2009, he told Stacey Johnson, D&D Manager, that while working in the field, he observed a "non posted asbestos area." *Id*. at 3. But he does not provide contextual details to support a reasonable belief that the area should have been posted. Therefore, I find that this portion of Allegation #1 and Allegation #4 does not constitute a non-frivolous allegation of a protected disclosure.

b. *Alleged Protected Disclosure #2*

Regarding Allegation #2 – "ALARA Program – Non existent, Project Dose Goals" – Mr. Widger states that on August 12, 2009, he e-mailed a particular member of management and "documented what was wrong with the ALARA program and how to fix [it]." Opening Brief at 2. Mr. Widger also states that the ALARA coordinator position is unfilled, and "[n]ot having this position filled deprives the project of expertise needed to reduce overall exposure and to be another set of eyes in planning radiological work." *Id*.

Mr. Widger identifies nothing "wrong" with the ALARA program. Rather, he states that he is "working towards forming our ALARA process and site ALARA dose goals." E-mail from David M. Widger to Larry Hayes, Robert Massengill, Tristan Tritch, and Rich Hazard, August 12, 2009. Next, he does not allege facts to suggest that the position vacancy constitutes a substantial threat to human health or public safety or a significant violation of any law, rule, or regulation. Therefore, I find that Allegation #2 does not constitute a non-frivolous allegation of a protected disclosure.

c. *Alleged Protected Disclosures Nos.* 3, 6, 8-9, 14-16, 19, 21, 23-24

Mr. Widger failed to provide any information to describe these allegations. Therefore, I cannot conclude that they constitute non-frivolous allegations of protected disclosures.[4] *See, e.g.*, *Huffman v. Office of Pers. Mgmt.*, 92 M.S.P.R. 429, 433 (2002) ("An appellant's statements regarding his protected disclosures can be so deficient on their face that [the Hearing Officer] will find that they fail to constitute a non-frivolous allegation of a reasonable belief, and thus require dismissal for lack of jurisdiction.") (citation omitted).

d. *Alleged Protected Disclosure #5*

Regarding Allegation #5 – "Unqualified Project Personnel – Superintendents, Work Planners – Nuclear Safety" – Mr. Widger alleges that in August 2009, an unqualified technician completed a survey. First Complaint at 35-37. He also alleges that on October 8, 2009, contractors installed temporary lighting in a "known . . . contaminated area." Second Complaint at 3. He alleges that the contractors lacked the training and equipment to work in the area, which violated DOE regulations. *Id*.

Approximately two months lapsed between the first alleged violation (August 24, 2009) and when Mr. Widger filed his First Complaint (October 19, 2009). Approximately a month lapsed between the second alleged violation (October 8, 2009) and when Mr. Widger filed his Second Complaint (November 10, 2009). In each case, the space of time suggests that Mr. Widger did not reasonably believe that he witnessed a substantial violation of a law, rule, or regulation or a substantial and specific danger to employees or to public health or safety. If he had, he would not have waited more than a month to report them. Therefore, I cannot conclude that Allegation #5 constitutes a non-frivolous allegation of a protected disclosure.

e. *Alleged Protected Disclosures #10 and #11*

Regarding Allegation #10 – "Falsification of Documentation – Work Packages – Radiological Surveys" – and Allegation #11 – "Inadequate radiation, contamination, and airborne radioactivity surveys" – Mr. Widger alleges that he told management of "inadequacies" in a document entitled, "Radiological Survey Report and Map." First Complaint at 35, 37. He also alleges that the document was edited, which constitutes falsification. *Id*. at 35. He provided two different copies of ostensibly the same document, but failed to explain why they contain inadequacies or why the edits constitute a substantial violation of a law, rule, or regulation. *Id*. at 37-40. Therefore, I find that this portion of Allegation #10 and Allegation #11 does not constitute a non-frivolous allegation of a protected disclosure.

Further, Mr. Widger states that in October 2009, a radiological survey was performed regarding the above-referenced installation of lights in an allegedly contaminated area.

[4] Mr. Widger flooded the record with irrelevant information. Mr. Widger's Complaint consists of 82 pages, much of which does not purport to demonstrate that he made a protected disclosure. For example, Pages 11-14 consist of an excerpt from an ALARA Program Manual from the SPRU. Pages 15-32 consist of the DOE's Occupational ALARA Program Guide. Pages 41-76 consist of materials documenting an unrelated protected disclosure at a separate DOE facility.

Second Complaint at 12. Mr. Widger reviewed the survey as part of his job responsibilities as ALARA Coordinator. Widger Telephone Memorandum, March 1, 2010. He concludes that the "survey did not provide adequate information," but does not explain why. Second Complaint at 12. Therefore, I find that this portion of Allegation #10 and Allegation #11 does not constitute a non-frivolous allegation of a protected disclosure.

Lastly, Mr. Widger states that when he audited the survey, he found that it was performed without an approved radiation work permit. *Id*. at 12-15. Performing a radiological survey without an approved radiation work permit may reasonably constitute a substantial violation of a law, rule, or regulation. Further, in November 2009, he disclosed the omission to SPRU Environmental Safety & Health Manager Frances Alston – a member of management outside of his chain of command. *Id*. Therefore, I find that this portion of Allegation #10 and Allegation #11 constitutes a non-frivolous allegation of a protected disclosure.

f. *Alleged Protected Disclosure #12*

Regarding Allegation #12 – "Inadequate effluent system maintenance and monitoring" – Mr. Widger alleges that a "lack of maintenance and or regulatory compliance on the effluent system could produce a radioactive uncontrolled release to the public." Opening Brief at 4.

Mr. Widger fails to allege how the system lacks maintenance or compliance and how that may produce a radioactive release. Further, he does not allege that he disclosed these problems to management. Therefore, I find that Allegation #12 does not constitute a non-frivolous allegation of a protected disclosure.

g. *Alleged Protected Disclosure #13*

Regarding Allegation #13 – "Waste Shipments – Packaging – Sampling – Containers" – Mr. Widger alleges that the wife of a member of management "knowingly shipped . . . contaminated material and equipment to the SPRU project." *Id*. Also, the equipment "was later determined to have potentially exposed an unsuspecting SPRU workforce" to contamination. *Id*.

For support, Mr. Widger submits a September 2009 shipping label ostensibly from the wife of a member of management. Opening Brief, Attachment 3 at 82. The label does not describe the contents of the package. Nor does it support Mr. Widger's allegation that the workforce was exposed to contamination. Lastly, Mr. Widger does not state that he made this disclosure to management. Therefore, I find that Allegation #13 does not constitute a non-frivolous allegation of a protected disclosure.

h. *Alleged Protected Disclosure #17*

Regarding Allegation #17 – "White Wash Audit Teams – WV" – Mr. Widger alleges that in November 2009, the senior management of the SPRU issued a memorandum affirming its commitment to meeting ALARA standards. Second Complaint at 31-32. Mr. Widger alleges that the memorandum "was and is meant for DOE eyewash" and that management "has failed once again in their duties to protect the health and safety of the workforce and the general public." *Id*. at 30.

Mr. Widger does not describe how, in issuing the memorandum, the SPRU "failed . . . to protect the health and safety of the workforce and the general public." Therefore, I find that Allegation #17 does not constitute a non-frivolous allegation of a protected disclosure.

i. *Alleged Protected Disclosure #18*

Regarding Allegation #18 – "Work Area Safety – several injuries and near miss 480" – Mr. Widger included three photographs in his First Complaint that, he alleges, "reveal unsafe working conditions." First Complaint at 77, 79-81.

The photos show miscellaneous debris. But Mr. Widger does not state who has access to those work areas, if and how those areas are used, and how the debris may cause harm. Without this context, I cannot conclude that the debris poses a substantial violation of a law, rule, or regulation or a substantial and specific danger to employees or to public health or safety. Nor does Mr. Widger state that he disclosed these conditions to management. Lastly, Mr. Widger does not describe the "several injuries and near-miss 480" or whether he disclosed those incidents to management. Therefore, I find that Allegation #18 does not constitute a non-frivolous allegation of a protected disclosure.

j. *Alleged Protected Disclosure #20*

Regarding Allegation #20 – the "Respiratory Protection Program" – Mr. Widger states that "several times," he "brought forward . . . many issues of concern." Opening Brief at 2. First, he cites an e-mail that he sent to management in July 2009. In it, he "presents several potential issues," including the lack of inventory control numbers and his observation that fewer than 10% of respirators were "survey[ed]." E-mail from David M. Widger to Robert Massengill and Richard Hazard, July 21, 2009. Second, he cites an e-mail that he sent in August 2009. In it, he recommended surveying 100% of the respirators because the 10% survey practice uncovered a disproportionate number of defective respirators.[5] E-mail from David M. Widger to Robert Massengill, August 3, 2009.

Mr. Widger does not state or present information to suggest that the lack of inventory control numbers is a substantial violation of a law, rule, or regulation or a substantial and

[5] Mr. Widger also alleges that (i) unprotected workers were exposed to radiation; and (ii) the SPRU failed to meet the procedural requirements of the respiratory protection program. Opening Brief at 2. Because I addressed these issues above, I do not address them again here.

specific danger to employees or to public health or safety. Nor does he state that the rate at which the respirators are surveyed is a substantial violation of a law, rule, or regulation. Therefore, I find that these portions of Allegation #20 do not constitute a non-frivolous allegation of a protected disclosure.

Mr. Widger does present a reasonable belief that the low percentage of respirators surveyed – given the number of defective respirators discovered – is a substantial and specific danger to employees or to public health or safety. A member of management also recommended that until the issues with the defective respirators are addressed, 100% of the respirators should be surveyed. E-mail from Robert Massengill to Rich Hazard and David M. Widger, August 3, 2009. Further, Mr. Widger communicated the information outside of his chain of command because he communicated it to Robert Massengill, Manager of the SPRU Site, who never directly supervised him. Massengill Telephone Memorandum, May 14, 2010. Therefore, Mr. Widger communicated the information outside of normal channels. For this reason, I find that this portion of Allegation #20 constitutes a non-frivolous allegation of a protected disclosure.

k. *Alleged Protected Disclosure #22*

Regarding allegation #22 – "Inadequate Work Force Confines" – Mr. Widger alleges that an unqualified employee was instructed to remove warning signs so that an unsuspecting outside contractor would mow a contaminated area.[6] First Complaint at 33. This event took place several months before he disclosed it by filing his First Complaint in October 2009. *Id*. His failure to disclose it immediately suggests that he did not reasonably believe that he witnessed a substantial violation of a law, rule, or regulation, or a substantial and specific danger to employees or to public health and safety. Therefore, I cannot conclude that this constitutes a non-frivolous allegation of a protected disclosure.

l. *Summary*

In conclusion, I find that Mr. Widger has made the following non-frivolous allegations of protected disclosures:

- In August 2009, Mr. Widger recommended surveying 100% of the incoming respirators because the 10% survey practice uncovered a disproportionate number of defective respirators. The low number of respirators surveyed may constitute a substantial and specific danger to employees or to public health or safety [Allegation #20]; and

- In November 2009, Mr. Widger stated that a recent radiological survey had been performed without a radiation work permit. This may reasonably constitute a

[6] Mr. Widger did not specify what he meant by "inadequate work force confines." Under my reading of the case file, the removal of the warning signs most closely approximates "inadequate work force confines." To the extent that Mr. Widger intended different information to constitute "inadequate work force confines," I find that Mr. Widger has not presented sufficient information to make a non-frivolous allegation of a protected disclosure.

substantial violation of a law, rule, or regulation [Allegation #10 and Allegation #11].

2. The Filing of the Complaint as Protected Conduct

Mr. Widger also alleges that he suffered retaliation for having filed his Part 708 Complaint. The filing of a Part 708 Complaint constitutes protected conduct. 10 C.F.R. § 708.5(b); *see also Thomas T. Tiller*, Case No. VWA-0018 (1998). Therefore, I find that Mr. Widger engaged in protected conduct when he filed his Complaints on October 19, 2009, and November 10, 2009.

3. The Alleged Retaliations

Mr. Widger alleges that he suffered four acts of retaliation as a result of having made protected disclosures or engaged in protected conduct. The alleged retaliation includes that (i) he was constructively discharged; (ii) he was directed to fix the issues that he brought forward; (iii) he was subject to excessive meetings with management; and (iv) he was not adequately compensated. In its Second Motion to Dismiss, SEC argues that Mr. Widger cannot prove that he suffered any retaliation. Second Motion at 11-15.

a. *The Alleged Constructive Discharge*

Mr. Widger alleges that on November 16, 2009, he resigned due to a "hostile working environment." Report of Investigation at 3. I must determine whether he alleges a constructive discharge, which would constitute a non-frivolous allegation of retaliation.

Resignations are presumed voluntary. *Heining v. General Serv. Admin.*, 68 M.S.P.R. 513, 519 (1995). The employee may rebut the presumption of voluntariness if he or she "can establish that the resignation . . . was the product of duress . . . brought on by" the employer. The employee may establish duress "when the . . . employer deliberately takes actions that make working conditions so intolerable for the employee that he or she is driven into an involuntary resignation." *Id*. (citation omitted). The voluntariness of the resignation is "based on whether the totality of the circumstances" supports the conclusion that the employee was "deprived of free choice." *Id*. at 519-20. Circumstances are evaluated objectively, not based on the employee's subjective belief. *Id*. at 520.

Mr. Widger alleges that he faced the following intolerable working conditions:

- A manager stated, "I . . . hate my job and . . . the people I work with !!!";
- A manager "pitted half his work crew against the other half on a daily basis through treatment, conflict, slander and work assignments";
- When he saw a manager one morning, he "said good morning, there was not a reply";
- The contractor failed to resolve his First Complaint;
- His manager did not communicate with him;

- He was instructed to "not do anything unless directed";
- He received no direction on the ALARA program;
- His management refused to take his input seriously;
- Management limited his computer access; and
- He felt that he was being targeted for termination.

Complaint at 2, 4, 78; Widger Telephone Memorandum, March 1, 2010; Opening Brief at 5-6. I address these allegations in turn.

First, Mr. Widger's allegations describe an impolite workplace with obvious personality conflicts. But I find that rudeness and personality conflicts, as described in Mr. Widger's Complaint, without more, do not constitute an allegation of duress that would deprive an employee of free choice regarding his or her continued employment.

Second, when Mr. Widger resigned, his First Complaint had not been resolved. Part 708 complaints commonly take many months to work through the administrative system. He resigned less than a month after he filed the Complaint. No reasonable person would consider a one month delay to resolving an extremely complex Complaint to constitute an allegation of "duress."

Third, Mr. Widger's e-mail correspondence discredits his allegation that he suffered the duress of limited access to e-mail. The e-mails included in Exhibit 3 of the Second Motion to Dismiss show that Mr. Widger exchanged e-mails with management on October 27th, 28th, 29th, and 30th, November 2nd, and November 16th. The e-mails attached to Mr. Widger's Opening Brief show that Mr. Widger also used his e-mail account on October 20th, October 21st, November 3rd, November 4th, November 5th, and November 10th.

Fourth, the above e-mails also discredit Mr. Widger's allegation that he suffered the duress of being told "not to do anything unless directed" and management indifference to his concerns. In an October 27th e-mail to a member of management, Mr. Widger states, "I have been directed . . . do [sic] do nothing . . . *except what I am given direction by Management to do*." Exhibit 3, Second Motion (emphasis added). Any given employee may reasonably expect to have management prioritize their work. Moreover, in her reply, the member of management reminded Mr. Widger of certain tasks that he had been assigned. She also stated that his concerns would be "identified through [SEC's] corrective action process." *Id*. An e-mail dated November 16th – the day that Mr. Widger resigned – shows that management wanted him "to continue working on" his assignments. *Id*.

Fifth, the record shows that Mr. Widger chose to stop working. In his interview with the OHA investigator, he stated that he resigned on November 16th. Widger Telephone Memorandum, March 1, 2010. Mr. Widger later stated that he "was no longer employed at SPRU" after Tuesday, November 10th. E-mail from David M. Widger to David M. Petrush, October 28, 2010. Although the SPRU did not observe Veterans' Day on November 11th, Mr. Widger took the 11th off along with Thursday the 12th and

Friday the 13th, and later requested "paid time off" for these days. Exhibit 6, Second Motion. The following Monday, Mr. Widger resigned without notice. Personnel Action Request, November 16, 2009. The above-referenced e-mail from November 16th, asking Mr. Widger to continue working, shows that management had not anticipated his resignation on November 16th.

Lastly, as support for the alleged duress consisting of his fear that management sought to terminate him, Mr. Widger cited an e-mail from a former co-worker, who speculated that management planned to terminate him. E-mail from Robert Massengill to Tristan Tritch, March 13, 2010. The e-mail suggests that other SEC employees also believed that management did not care for Mr. Widger. But that does not contribute to a reasonable objective basis for a constructive discharge. The e-mail does not represent the opinions of management. Nor does it state an imminent employment action.

Considered objectively, the totality of the circumstances suggests that Mr. Widger did not resign under duress. Therefore, I find that Mr. Widger has not made a non-frivolous allegation that he suffered retaliation due to a constructive discharge. In other words, I find that he resigned voluntarily.

b. *Other Alleged Retaliations*

Mr. Widger alleges that he faced the retaliation of (i) "being directed to fix all of the problems that [he] brought forward"; (ii) being "subjected to countless meetings . . . with management" and (iii) not being adequately compensated.[7] Opening Brief at 5.

Mr. Widger's job requirements included meeting with management and addressing the issues that he brought forward. Second Motion at 11. Further, management had stated that by November 13th, it would re-evaluate Mr. Widger's compensation.[8] E-mail from Andrew Henderson to David M. Widger, November 4, 2009. By this time, Mr. Widger had removed himself from the SPRU. Therefore, I find that the above three allegations do not constitute non-frivolous allegations of retaliation.

Because I found that Mr. Widger has not made a non-frivolous allegation of retaliation, I need not conduct the contributing factor analysis or discuss remedies.

IV. CONCLUSION

[7] Mr. Widger also alleges that in February 2009 and June 2009, management retaliated against him by moving him "from the field" to "drafting procedures for the project." Complaint at 2. I do not address this alleged retaliation, however, because it takes place prior to any non-frivolous allegation of a protected disclosure.

[8] SEC argues that it had offered Mr. Widger a pay increase. Second Motion at 11. Mr. Widger denies this. E-mail from David M. Widger to David M. Petrush, October 28, 2010.

I find that Mr. Widger made two non-frivolous allegations of protected disclosures and engaged in protected conduct. However, because Mr. Widger has not made a non-frivolous allegation of retaliation, he is entitled to no remedy. Therefore, I will grant SEC's Second Motion to Dismiss.

It Is Therefore Ordered That:

(1) The Motion to Dismiss filed by Safety & Ecology Corp. on July 12, 2010, Case No. TBZ-1097, is hereby denied.

(2) The Motion to Dismiss filed by Safety & Ecology Corp. on July 22, 2010, Case No. TBZ-2097, is hereby granted.

(3) The Complaint filed by David M. Widger on June 10, 2010, Case No. TBH-0097, under 10 C.F.R. Part 708, is hereby dismissed.

(4) This is an Initial Agency Decision, which shall become a Final Decision of the Department of Energy unless a party files a Notice of Appeal by the fifteenth day after the party's receipt of the Initial Agency Decision, in accordance with 10 C.F.R. § 708.32.

David M. Petrush
Hearing Officer
Office of Hearings and Appeals

Date: November 17, 2010

Case No. VBA-0005

July 24, 2000

DECISION AND ORDER OF

THE DEPARTMENT OF ENERGY

Appeal

Name of Petitioner: Thomas Dwyer

Date of Filing: May 23, 2000

Case Number: VBA-0005

This Decision considers an Appeal of an Initial Agency Decision (IAD) issued on May 2, 2000, involving a complaint filed by Thomas Dwyer (Dwyer or the complainant) under the Department of Energy (DOE) Contractor Employee Protection Program, 10 C.F.R. Part 708. In his complaint, Dwyer claims that Fluor Daniel Fernald (FDF), a DOE contractor, suspended and then terminated his employment in retaliation for his making disclosures that are protected under Part 708. In the IAD, however, the Hearing Officer determined that FDF had shown that it would have terminated the complainant for his misconduct, even in the absence of the protected disclosures. As set forth in this decision, I have determined that Dwyer's Appeal must be denied.

I. Background

A. The DOE Contractor Employee Protection Program

The Department of Energy's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste and abuse" at DOE's Government-owned or -leased facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purpose is to encourage contractor employees to disclose information which they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers. Thus, contractors found to have retaliated against an employee for such a disclosure, will be directed by the DOE to provide relief to the complainant. See 10 C.F.R. § 708.2 (amended regulations) (definition of retaliation).

The DOE Contractor Employee Protection Program regulations, which are codified as Part 708 of Title 10 of the Code of Federal Regulations and became effective on April 2, 1992, establish administrative procedures for the processing of complaints. As initially formulated, these procedures typically included fact- finding by the DOE Office of Inspector General, followed by the issuance of a Report of Inquiry setting forth the IG's findings and recommendations on the merits of the complaint. Thereafter, the complainant could request a hearing before a Hearing Officer assigned by the DOE Office of Hearings and Appeals (OHA), pursuant to which the Hearing Officer renders an Initial Agency Decision.

On March 15, 1999, DOE issued an amended Part 708, effective April 14, 1999, setting forth procedural revisions and substantive clarifications that "apply prospectively in any complaint proceeding pending on the effective date of this part." 10 C.F.R. § 708.8; *see* 64 Fed. Reg. 12862 (March 15, 1999). Under the revised regulations, review of an Initial Agency Decision, as requested by Dwyer in the present Appeal, is

performed by the OHA Director. 10 C.F.R. § 708.32.

B. Complaint Proceeding

The events leading to the filing of Dwyer's complaint are fully set forth in Thomas Dwyer, 27 DOE ¶ 87,560 (2000)(Dwyer). I will not reiterate all the details of that case here. For purposes of the instant appeal, the relevant facts are as follows.

Dwyer was employed by FDF as a pipefitter from January 1996 to October 1997. In December 1997, Dwyer filed a complaint under Part 708 with the DOE Office of Inspector General's Office of Inspections. After the completion of an investigation, Dwyer requested and received a hearing on this matter before an OHA Hearing Officer. There were 28 witnesses and the hearing lasted two days. After considering the testimony at the hearing and other relevant evidence, the Hearing Officer issued the IAD that is the subject of the instant appeal.

C. The Initial Agency Decision

In the IAD, the Hearing Officer cited the burdens of proof under the Contractor Employee Protection Regulations. (1) They are as follows:

> The complainant shall have the burden of establishing by a preponderance of the evidence that there was a disclosure, participation, or refusal described under § 708.5, and that such act was a contributing factor in a personnel action taken or intended to be taken against the complainant. Once the complainant has met this burden, the burden shall shift to the contractor to prove by clear and convincing evidence that it would have taken the same personnel action absent the complainant's disclosure, participation or refusal.

10 C.F.R. § 708.9(d). See Dwyer, 27 DOE at 89,329.

The Hearing Officer analyzed two disclosures and two activities in which the complainant was involved, to determine whether they were protected under Part 708. The Hearing Officer first reviewed an incident in which Dwyer left his work area because liquid came out from a pipe which was being cut. The Hearing Officer referred to this as the April 1996 Refusal to Participate. In finding the refusal to participate was not protected under Part 708, the Hearing Officer noted that Dwyer had not alleged that continuing to work was dangerous or constituted a federal health or safety violation, as required by Section 708.5(a)(3). The Hearing Officer pointed out that Dwyer had also not notified his employer of the danger prior to refusing to work, or within 30 days of the refusal reported the danger or violation to his employer or other appropriate official, as required by Section 708.5(a)(3).

The Hearing Officer next analyzed an incident in which the complainant stopped a walkthrough of a building because of a lack of respirators (August 1996 Job Stop). The Hearing Officer pointed out in his Opinion that the witnesses who testified at the hearing could not recall this incident, and he found them to be more credible than the complainant. The Hearing Officer also noted that this activity, like the refusal to participate discussed above, failed to meet the requirements of Section 708.5. Therefore he found that the job stop did not constitute a protected disclosure or activity.

The Hearing Officer also reviewed a number of internal company grievance notices filed by Dwyer, which involved alleged harassment by employees of FDF's medical department and complaints about the persons assigned to hear the grievances (Internal Company Grievances). The Hearing Officer found these complaints to constitute a minor dispute over the employee's qualification for medical leave and did not rise to the level of a protected disclosure of mismanagement, as that term is used in Part 708. Dwyer, 27 DOE at 89,331.

Finally, the Hearing Officer considered several complaints involving disclosures of alleged safety concerns (September 1997 Disclosures). He rejected Dwyer's claim that laundry bags left on a hallway floor presented a tripping hazard. The Hearing Officer did find that Dwyer's complaint of dust falling from rafters in a plant in which asbestos abatement was taking place to be a protected disclosure of a substantial and specific danger to employee safety. Id. at 89,334.

The Hearing Officer next found that there was temporal proximity between Dwyer's protected disclosure regarding the falling dust and his suspension and termination by FDF less than one month later. He also noted that at least one of the two deciding officials had actual knowledge of the protected disclosure. The Hearing Officer concluded that the disclosure was a contributing factor to his suspension and dismissal by FDF. Accordingly, the Hearing Officer determined that Dwyer had met his initial burdens under § 708.9(d), thereby shifting the burden to FDF to prove by clear and convincing evidence that it would have taken the same actions without Dwyer's protected disclosure. Dwyer, 27 DOE at 89,334.

The Hearing Officer next addressed whether FDF had shown that it would have suspended and terminated Dwyer even in the absence of the protected disclosure. FDF's stated bases for terminating Dwyer were his insubordination and his hampering or interfering with company work. Under FDF company policy, these are considered Category "A" violations of rules of conduct, which may result in immediate discharge.

The insubordination incident involved Dwyer's refusal to accept an assignment. With respect to the charge of interfering with company work, the Hearing Officer pointed to the testimony of an FDF manager, who cited instances in which the individual avoided work by disappearing from the job site, by spending inordinate time in the rest room or by frequently reporting to the medical department just after jobs were assigned. Id. at 89,335. This testimony was supported by FDF workers who also believed that Dwyer avoided work. Id. at 89,336. The Hearing Officer found this testimony to be convincing. He further pointed out that in the five year period ending in 1999, FDF had terminated 15 other employees for Category "A" violations, such as those committed by Dwyer. Id. at 89,337.

Based on the above considerations, the Hearing Officer determined that FDF had clearly and convincingly demonstrated that it would have terminated Dwyer even in the absence of the protected disclosure.

II. The Dwyer Appeal

In connection with his Appeal, Dwyer filed a statement identifying the issues on which he wished the Director of the Office of Hearings and Appeals to focus in this phase of the Part 708 proceeding (hereinafter Statement of Issues or Statement). 10 C.F.R. § 708.33. The Statement presents the following issues for my review: (i) the Hearing Officer improperly failed to recognize all the relevant actions/disclosures as protected under Part 708; (ii) the Hearing Officer overlooked the importance of the timing of the Dwyer discharge versus the protected activities/disclosures; (iii) the Hearing Officer improperly found that Dwyer was insubordinate and hampered work; and (iv) the Hearing Officer erred in finding Dwyer less credible than FDF witnesses.(2) As discussed below, I do not find any merit to the matters raised for my review. Consequently, I will not reverse the Hearing Officer's determination.

1. Failure to Acknowledge All Cited Activity as Protected

The Statement alleges that the Hearing Officer erred in determining that only one of Dwyer's several activities/disclosures was considered protected under Part 708. Dwyer argues that the Refusal to Participate, the Job Stop, and the disclosure that laundry posed a tripping hazard should all be deemed protected by Part 708. This contention lacks merit.

As an initial matter, after reviewing the record, I see no error in the Hearing Officer's findings with respect to Dwyer's unprotected activities/disclosures. However, an in depth discussion of each of those determinations would be superfluous here. As stated above, the Hearing Officer did find one of Dwyer's

disclosures to be protected. Dwyer, 27 DOE at 89,334. Therefore, he concluded that Dwyer made the required regulatory showing on this point. I see no prejudice to the complainant arising from the fact that there may have been other protected disclosures that the Hearing Officer did not consider to be protected. Once a finding is made that there was a protected activity or disclosure that was a contributing factor to a retaliation, it is irrelevant in a Part 708 proceeding if there were additional protected activities. The inclusion of additional protected activities or disclosures in this case would not alter the result in the Initial Agency Decision or in any other manner work to Dwyer's advantage. Nor does their exclusion create a disadvantage for Dwyer. (3) I find that the inclusion of additional protected disclosures would make no difference in this case whatsoever. John Gretencord, 27 DOE ¶ 87,552 (2000).

2. The Timing of the Discharge

The Statement claims that the Hearing Officer overlooked the importance of the timing of Dwyer's discharge vis-a-vis the disclosure in this case. He implies that the coincidence of the disclosure and his termination is suspicious.

As discussed above, under Part 708, the complainant has the burden of establishing by a preponderance of the evidence that a protected disclosure that he made was a contributing factor to a retaliation by his employer. In our cases, we have repeatedly indicated that the "contributing factor" showing can be made by time proximity, that is, by establishing that the retaliation took place shortly after the protected disclosure was made, and by showing that the official taking the action has actual or constructive knowledge of the disclosure. E.g., Don W. Beckwith, 27 DOE ¶ 87,534 (1999).

The Hearing Officer followed that precedent in the instant case. Specifically, he found that "there is fairly clear temporal proximity between Mr. Dwyer's protected disclosure in Plant 6 on September 23, 1997, and his subsequent suspension on October 6, 1997, and termination on October 16, 1997." Dwyer, 27 DOE at 89,334. He also found that at least one of the managers responsible for the termination knew of the protected disclosure. Based on these findings, the Hearing Officer determined that Dwyer's showing with respect to the "contributing factor" element had been satisfied, and that the burden had shifted to FDF to show by clear and convincing evidence that it would have taken the same actions without Dwyer's protected disclosures. Id.

The Statement suggests, however, that the Hearing Officer should in some way have given extra consideration or additional weight to the coincidence of the disclosure and the termination. The complainant even seems to imply that the Hearing Officer's finding that the disclosure was a factor contributing to the termination is in and of itself sufficient to warrant a reversal of the outcome in this case.

Part 708 clearly provides otherwise, and the complainant is therefore incorrect. By shifting the burden of proof to the contractor, the Hearing Officer accorded the proper weight to timing of the termination vis-a-vis the disclosure. I cannot discern in what way the facts referred to by the Statement could have been properly accorded more weight, so as to change the outcome in this case. John Gretencord, 27 DOE at 89,284. Part 708 certainly does not provide that a complainant may prevail simply by establishing that a protected activity contributed to a retaliation. The regulations plainly afford the contractor the opportunity to establish by clear and convincing evidence that it would have taken the same action even absent the protected activity. 10 C.F.R. § 708.9(d).

3. Dwyer's Insubordination and Work Hampering

As indicated above, the Hearing Officer reached the overall conclusion that FDF had clearly and convincingly demonstrated that it would have terminated Dwyer even in the absence of the protected disclosure. According to the Hearing Officer, FDF made this showing by bringing forth persuasive testimony substantiating that Dwyer refused an assignment, and furthermore, avoided work by frequently reporting to the medical department, spending excessive time in the rest room, refusing to obtain training

necessary for job performance and failing to fully perform assigned tasks when at a work site. Dwyer, 27 DOE at 89,335-37. Thus, the Hearing Officer set forth quite clearly the bases for his determination that FDF had satisfied its burden of proof in this case.

Dwyer specifically alleges error regarding one finding from among these many important conclusions of fact and law. The complainant refers to the finding that he was insubordinate because he refused to accept an assignment as a porter when he returned to work after medical leave. (4) Dwyer claims that medical restrictions did not permit him to perform any job that required him to be on his feet. Dwyer believes that he had a legitimate excuse for refusing the assignment and was therefore not insubordinate.

There is nothing in the record to support such an assertion. As the Hearing Officer indicated, a note from Dwyer's doctor stated only that he was not to climb or lift any weight of over ten pounds. An FDF manager testified that the porter's job involved no climbing, and that Dwyer would be able to control how much weight he lifted in the porter assignment. Accordingly, when Dwyer refused that assignment, she found it appropriate to suspend him for insubordination. Dwyer, 27 DOE at 89,335.

Dwyer claims in his Statement of Issues that he could not walk at all. He states that had a verbal agreement with his physician to the effect that if his ankle continued to hurt him that he should return to the physician. He also states that after his suspension by FDF, he saw two doctors who each gave him written excuses that would have kept him off his feet for an extended period. He maintains that because he has these medical excuses he could not have been insubordinate.

These contentions are baseless. I have reviewed the doctor's note regarding Dwyer's medical condition at the time of this incident. The note states that Dwyer is prohibited from climbing and from lifting weights of over 10 pounds. There is no restriction on his ability to walk. Further, there is absolutely no support for Dwyer's claim that he had a verbal agreement with his doctor that overrode anything in the note. In fact, Dwyer admits in his Statement that the verbal agreement only urged him to return to his doctor if his ankle continued to hurt him. Furthermore, the later notes from other physicians that Dwyer alludes to are irrelevant, since they were not in effect at the time of the insubordination. It is abundantly clear that Dwyer had no support whatsoever for his claim of a medical excuse for refusing the porter's assignment. Thus, I am in agreement with the Hearing Officer that the FDF managers rightfully found Dwyer to be insubordinate for failing to accept the porter's assignment.

Dwyer also offers a rather perfunctory denial of hampering or interfering with any FDF work activity. He provides no new evidence on this point, and after reviewing the record I find ample testimony to support the Hearing Officer's conclusion that this complainant routinely engaged in work avoidance tactics that amounted to hampering or interfering with FDF's mission. I therefore see no error by the Hearing Officer on this issue.

Finally, based on my examination of the entire record in this case, I am fully persuaded that FDF would have terminated Dwyer for insubordination and hampering work, even absent the protected disclosure. I therefore believe that the Hearing Officer correctly determined that FDF satisfied its burden of proof in this proceeding.

4. Objections to the Hearing Officer's Finding Regarding Credibility

Lastly, the Complainant raises some very general objections to the Hearing Officer's overall finding that his credibility is not as good as that of the other witnesses in this case. Dwyer insists that he has told the truth, and that he has passed a lie detector test as part of his application for a position with a county sheriff's department. I am not persuaded by his insistence. His lie detector tests are irrelevant here. Furthermore, Dwyer has shown absolutely no reason for me to question the soundness of the determinations as to credibility by the Hearing Officer, who is expected to make this very type of judgment in Part 708 cases. Dwyer understandably disagrees with the result in this proceeding. This does not mean, however, that there is any error at all in the IAD.

III. Conclusion

On the basis of the foregoing, I conclude that Dwyer has failed to show in his Appeal that the determination reached in the Initial Agency Decision is erroneous as a matter of fact or law. I concur with the determination that FDF has shown by clear and convincing evidence that it would have terminated Dwyer even in the absence of the protected disclosures. Accordingly, Dwyer's Appeal must be denied.

It Is Therefore Ordered That:

(1) The Appeal filed by Thomas Dwyer on May 23, 2000, of the Initial Agency Decision issued on May 2, 2000, is hereby denied. Accordingly, as determined in the Initial Agency Decision, the complaint filed by Thomas Dwyer on under the Contractor Employee Protection Program, 10 C.F.R. Part 708, is denied.

(2) This Appeal Decision shall become a Final Agency Decision unless a party files a petition for Secretarial review with the Office of Hearings and Appeals, within 30 days after receiving this decision. 10 C.F.R. § 708.35.

George B. Breznay

Director

Office of Hearings and Appeals

Date: July 24, 2000

(1)With respect to the burden of proof, the Hearing Officer cited to the prior version of Part 708. In connection with my review of the burden of proof, I shall therefore also refer to that earlier version. 57 Fed. Reg. 7533 (March 3, 1992). However, the procedures applicable to this appeal proceeding are set forth in the current version of Part 708, effective April 14, 1999. 64 Fed. Reg. 12862 (March 15, 1999). I shall cite to the current regulations in all matters not related to the burden of proof.

(2)FDF filed a response to the Statement of Issues, contending that the Hearing Officer's determination should be sustained.

(3)This is particularly so in view of the fact that FDF does not challenge the Hearing Officer's determination that Dwyer made one disclosure that is protected under Part 708. There is thus no risk that the Hearing Officer's finding that the disclosure regarding falling dust is protected will be reversed on appeal, leaving Dwyer with no protected disclosure in this case.

(4)A porter performs routine cleaning duties.

Case No. VBA-0007

December 15, 1999

DECISION AND ORDER

OF THE DEPARTMENT OF ENERGY

Appeal

Name of Petitioner: Salvatore Gionfriddo

Date of Filing: October 13, 1999

Case Number: VBA-0007

On October 13, 1999, Salvatore Gionfriddo ("Appellant" or "Complainant") filed a Notice of Appeal from an Initial Agency Decision by a Hearing Officer from the Office of Hearings and Appeals (OHA) of the Department of Energy (DOE). In the Initial Agency Decision, the Hearing Officer dismissed a complaint filed by Mr. Gionfriddo under the Department of Energy's (DOE) Contractor Employee Protection Program, 10 C.F.R. Part 708. Salvatore Gionfriddo, 27 DOE ¶ 87,528 (1999).

I. Background

A. The DOE Contractor Employee Protection Program

The DOE's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste and abuse" at DOE's government-owned, contractor- operated facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purposes are to encourage contractor employees to disclose information which they believe exhibits unsafe, illegal, fraudulent, or wasteful practices, and to protect those "whistleblowers" from consequential reprisals by their employers. The regulations governing the DOE's Contractor Employee Protection Program are set forth at 10 C.F.R. Part 708.

B. Factual Background

The relevant facts in this case as found by the Hearing Officer are not in dispute. Mr. Gionfriddo's former employer, Energy Research Corporation (ERC) ("Respondent"), engages in the research and development of advanced carbonate fuel cells and batteries used to generate and store electric power. Fuel cells convert fuels, such as natural gas, to electricity through an electrochemical reaction. ERC August 2, 1999 Brief at 2. According to the firm, this technology was developed by ERC through funding by many sources, including a series of research and development contracts, grants and cooperative agreements that ERC entered into with federal and state agencies including the DOE, contracts with public utilities, associations and commercial organizations and internally sponsored independent research and development efforts. ERC August 2, 1999 Brief at 1.

The Complainant was employed by ERC in the fuel cell area beginning in March 1982. In September 1998, he was given an assignment to compare a short fuel cell stack with a tall fuel cell stack, and in his report concluded that "unless the trend of cell shrinkage changes drastically, the loss of compressive load

for tall stacks is highly probable." June 23, 1999 Report of Investigation at 4. On October 23, 1998, ERC terminated the Complainant's employment.

C. Procedural Background

Mr. Gionfriddo filed his complaint on December 28, 1998, alleging that he made a protected disclosure under Part 708 and that ERC retaliated against him by terminating his employment. On July 19, 1999, ERC filed a Motion to Dismiss the complaint. The firm claimed that its relationship with the DOE was in the form of a "Cooperative Agreement" that is not covered by Part 708, and that the firm is therefore not obligated to participate in proceedings under this Part. The Complainant filed a Memorandum in Opposition to the Motion on August 3. Thereafter, the Hearing Officer requested that ERC submit a complete copy of its agreement with the DOE, and the firm filed this document on August 5. The Hearing Officer received further briefs on the Motion on September 7 and 14. On September 27, 1999, the Hearing Officer granted the Motion and dismissed Mr. Gionfriddo's complaint. Salvatore Gionfriddo, 27 DOE ¶ 87,528 (1999).

After filing his Notice of Appeal, the Complainant filed a statement identifying the issues he wishes the OHA Director to review on October 27, 1999. 10 C.F.R. § 708.33(a). On November 22, 1999, the Respondent filed its response. Id. The issues identified by the Complainant all relate to the Hearing Officer's conclusion that the Respondent is not subject to the provisions of Part 708.

II. Analysis

The Complainant seeks review of the Hearing Officer's interpretation of the scope of the Part 708 regulations. Unlike a Hearing Officer's findings of fact, which are entitled to deference unless clearly erroneous, Oglesbee v. Westinghouse Hanford Co., 25 DOE ¶ 87,501, 89,001 (1995); O'Laughlin v. Boeing Petroleum Services, Inc., 24 DOE ¶ 87,513, 89,064 (1995), a Hearing Officer's conclusions of law, such as those made by the Hearing Officer in the present case as to the scope of Part 708, are reviewable de novo. See Pierce v. Underwood, 487 U.S. 552, 558 (1988) ("For purposes of standard of review, decisions by judges are traditionally divided into three categories, denominated questions of law (reviewable de novo), questions of fact (reviewable for clear error), and matters of discretion (reviewable for 'abuse of discretion')."). After considering the issues raised by the Appellant, I agree with the Hearing Officer that the Respondent is not subject to the provisions of Part 708.

The first three issues raised by the Appellant concern (1) whether revisions to Part 708 that took effect on April 14, 1999, when the Appellant's complaint was pending, apply to the present case; (2) whether the Respondent was subject to the regulations prior to the revisions; and (3) whether the Respondent is subject to the revised regulations. The Appellant contends that the revised Part 708 applies to the present case, and that in any event the Respondent is subject to the regulations both as they existed prior to the revisions and in their current form. The Respondent maintains that the prior version of Part 708 applies to this case, but no matter which version is applied, it is not a "contractor" subject to the regulations.

For ease of analysis, we first consider below whether the Respondent is a "contractor" as that term is defined under the regulations prior to their revision. We find that ERC is clearly not a "contractor" under the prior regulations. For this reason, and because the alleged reprisal in this case occurred prior to the revision of the regulations, we need not consider whether the Respondent is a "contractor" under the revised regulations. As we explain below, even if the Respondent met the definition of "contractor" under the revised regulations, to retroactively apply the regulations would clearly prejudice the Respondent, and therefore the revised regulations could not be applied to the present case.

A. Whether the Respondent is Subject to the Prior Version of Part 708

Before its April 14, 1999 revision, Part 708 was "applicable to employees (defined in § 708.4) of

contractors (defined in § 708.4) performing work on-site at DOE-owned or -leased facilities, . . .” 57 Fed. Reg. at 7541. Under those regulations, “contractor” was defined as

a seller of goods or services who is a party to a procurement contract as follows:

(1) A Management and Operating Contract;

(2) Other types of procurement contracts; but this part shall apply to such contracts only with respect to work performed on-site at a DOE-owned or -leased facility; or

(3) Subcontracts under paragraphs (1) or (2) of this definition; but this part shall apply to such subcontracts only with respect to work performed on-site at a DOE-owned or -leased facility.

Id.

The Respondent contends that its cooperative agreement with the DOE is not a “procurement contract” and therefore the firm is not a “contractor” as defined in the previous version of Part 708. Response at 12. On this point, we agree with the Respondent and the Hearing Officer, who found in her opinion “persuasive evidence” that procurement contracts and cooperative agreements “are distinct and different devices, and that these differences are not just technicalities.” Salvatore Gionfriddo, 27 DOE ¶ 87,528 at 89,147. The Hearing Officer pointed out that the DOE entered into its cooperative agreement with ERC under the authority of Federal Grant and Cooperative Agreement Act, the provisions of which specifically distinguish “cooperative agreements” from “procurement contracts.” Id; 31 U.S.C. § 6303 (1999) (purpose of procurement contracts); id. at § 6305 (purpose of cooperative agreements).

The Appellant does not contend that the cooperative agreement in question is a “procurement contract,” but argues that the “respondent’s emphasis on the term ‘procurement contracts’ is misplaced.” Appeal at 5. The Appellant cites provisions of the Federal Acquisition Regulations (FAR) that mandate the insertion into federal contracts of a clause requiring compliance with Part 708, noting that the FAR provisions refer to “contracts” rather than “procurement contracts.” Id. (citing 48 C.F.R. § 922.7100). What the Appellant fails to note however, is that the FAR specifically states that “[c]ontracts do not include grants and cooperative agreements covered by 31 U.S.C. 6301 et seq.” 48 C.F.R. 2.101 (definition of contract).

The Appellant further argues,

To find that Mr. Gionfriddo cannot bring the instant complaint under the Contractor Employee Protection Program defeats the purpose of the program for Mr. Gionfriddo and DOE. It discourages the free flow of information and leaves an employee with no recourse from a contractor’s attempts to silence said employee through termination or other discipline. OHA, therefore, should exercise jurisdiction over this complaint.

Appeal at 5-6. While we share the Appellant’s concern for carrying out the important purpose of Part 708, the primary source to which we must turn to discern that purpose is the plain language of the regulations. As the Appellant admits, “it is whether the respondent is a contractor under 10 C.F.R. section 708.4" that determines jurisdiction under Part 708. Id. at 4. Simply put, if the Respondent does not meet the regulation’s definition of “contractor” by virtue of its cooperative agreement with DOE, then we cannot find that the DOE intended the scope of the Part 708 regulations to reach the Respondent’s actions.

As stated above, we are convinced by the same “persuasive evidence” cited by the Hearing Officer that the cooperative agreement between DOE and ERC is not a “procurement contract” as that term is used in the definition of “contractor” in Part 708. In addition, there is no contention that the relevant agreement is either a “Management and Operating Contract” or a “subcontract” under the contractor definition. Thus, because the Respondent is not a “contractor” under the version of Part 708 in effect prior to April 14, 1999, it is not subject to those regulations.(1)

The Appellant argues in the alternative that, if "OHA determines that cooperative agreements are not covered by the DOE Contractor Employee Protection Program, it must still find that it has jurisdiction over this complaint." Appeal at 16. According to the Appellant, the Motion to Dismiss

must be denied unless the Hearing Officer examines all of the agreements between DOE and respondent and determines that none of them allow for DOE to assert jurisdiction over this complaint. Additionally, even if the Hearing Officer rules that only the agreement(s) to which Mr. Gionfriddo's time was billed apply, respondent must prove that Mr. Gionfriddo only worked on the cooperative agreement in question.

This argument ignores section 708.9(d) of the regulations, which states that the "complainant shall have the burden of establishing by a preponderance of the evidence that there was a disclosure, participation, or refusal described under § 708.5," which section describes the protected activities in response to which a "DOE contractor covered by this part" may not engage in retaliation. In other words, the complainant has the burden of establishing that his activities were protected under section 708.5, and the activities described in section 708.5 are protected only against retaliation by a "DOE contractor covered by this part." Thus, it is the complainant, not the respondent, who bears the burden of proving that the respondent is "covered by this part.(2) Here, the complainant offers no evidence to dispute the Hearing Officer's finding that "the Complainant's protected disclosure related solely to fuel cell matters covered by the Cooperative Agreement," Salvatore Gionfriddo, 27 DOE ¶ 87,528 at 89,148, and points to no other agreement between DOE and ERC through which the DOE could assert jurisdiction over the present complaint. Clearly, the complainant has not met his burden.

B. Whether the Revised Part 708 Regulations May be Applied to the Respondent

While under the prior version of Part 708 a "contractor" was defined as a party to "procurement contracts," the revised Part 708 regulations define "contractor" as a party to "contracts." 10 C.F.R. § 708.2 (1999). However, the history of the revision of Part 708 indicates that the drafters did not remove the word "procurement" to alter the meaning of "contractor." The revision of the definition of "contractor" first proposed in a January 1998 Notice of Proposed Rulemaking (NOPR) contained the substantive change found in the April 1999 revisions, "eliminating the requirement that . . . contractors perform[] their work on sites owned or leased by DOE," but still defined "contractor" as a party to "procurement contracts." 63 Fed. Reg. 374 (January 5, 1998). Thus, the change in the definition from the January 1998 proposed revision ("procurement contracts") to the April 1999 revision ("contracts") was largely stylistic, due to the fact that "[s]ince publishing the NOPR, DOE ha[d] rewritten Part 708 in 'plain language' style, consistent with the 'Memorandum on Plain Language in Government Writing' which the President issued on June 1, 1998." 64 Fed. Reg. 12862 (March 15, 1999). It is unlikely, therefore, that the Respondent would meet the definition of "contractor" under the revised regulations.

In any event, having found no basis for asserting jurisdiction over the present complaint under the prior version of Part 708, we need not decide the issue of whether the Respondent meets the definition of "contractor" under the revised regulations. The current regulations do state that the "procedures in this part apply prospectively in any complaint proceeding pending on the effective date of this part," 10 C.F.R. § 708.8, and there is no dispute that Mr. Gionfriddo's complaint was pending on April 14, 1999, when the revisions took effect. However, as the preamble to the revisions explains,

It is well established in the law that an agency may apply new procedural rules in pending proceedings as long as their application does not impair the rights of, or otherwise cause injury or prejudice to, a party. DOE will apply the revised procedures to pending cases consistent with the case law.

64 Fed. Reg. 12862, 12865 (citing Landgraf v. USI Film Products, 511 U.S. 244, 275 (1994); Lindh v. Murphy, 117 S. Ct. 2059, 2063-64 (1997); Natural Resources Defense Council, Inc. v. NRC, 680 F.2d 810, 817 n.17 (D.C. Cir. 1982) (citing Pacific Molasses Co. v. FTC, 356 F.2d 386 (5th Cir. 1966))).

Thus, the intent of the drafters of the Part 708 revisions is quite clear that the revised regulations apply to

pending cases only "as long as their application does not impair the rights of, or otherwise cause injury or prejudice to, a party." Because we find above that ERC is not a "contractor" under the prior version of Part 708, and thus was not subject to those regulations, the revised Part 708 cannot retroactively bring within its scope personnel actions taken by ERC prior to those revisions. By subjecting it to a regulatory regime to which it was not previously subject, such a retroactive application would clearly prejudice ERC, contrary to the clear intent of the revisions to the regulations.

For the reasons set forth above, we will deny the Appeal filed by Mr. Gionfriddo and uphold the decision of the Hearing Officer.

It Is Therefore Ordered That:

(1) The Appeal filed by Salvatore Gionfriddo on October 13, 1999, of the Initial Agency Decision issued on September 27, 1999 (Case No. VBH-0007), is hereby denied. Accordingly, as determined in the Initial Agency Decision, the complaint filed by Salvatore Gionfriddo on December 28, 1998, under the Contractor Employee Protection Program, 10 C.F.R. Part 708, is dismissed.

(2) This Appeal Decision shall become a Final Agency Decision unless a party files a petition for Secretarial review with the Office of Hearings and Appeals within 30 days after receiving this decision. 10 C.F.R. § 708.35.

George B. Breznay

Director

Office of Hearings and Appeals

Date: December 15, 1999

(1)The Appellant's attempt to find alternative bases for jurisdiction in the regulations is equally unavailing. The Appellant references 10 C.F.R. § 708.2(a), which limits the scope of Part 708 to cases where the "underlying procurement contract" contains one of two clauses that require contractor compliance with Part 708, Appeal at 6-9, and also cites portions of sections 708.2(b) and 708.4 stating that the regulations apply to "contracts" or "contractors" only with respect to work performed "on-site at a DOE-owned or -leased" facility. The Appellant asserts that any of these provisions provide a separate basis for jurisdiction. Appeal at 10-12, 13-16. Thus, according to the Appellant, the Respondent may be subject to Part 708 either by virtue of section 708.2(a) (because of certain clauses in the cooperative agreement) or alternatively via the cited language in sections 708.2(b) or 708.4 (because the respondent may "perform work on behalf of DOE, directly related to activities at a DOE-owned or -leased site"). We do not agree. First, the sections cited by the Appellant each refer either to "contractors (defined in § 708.4)" or "procurement contracts," and we have already found that the cooperative agreement in question is not a "procurement contract" and that the Respondent does not meet the definition of a "contractor" under section 708.4. Second, the language the Appellant refers to clearly is not intended to provide an alternative method of attaching jurisdiction to parties that do not otherwise meet the regulations' definition of "contractor." Rather, the clear intent of these provisions is to provide additional criteria that must be met before a contractor, as defined in section 708.4, is subject to Part 708.

(2)" To place the burden of proof regarding questions of jurisdiction on the complainant is consistent with the principles applied in the federal courts. C. Wright, A. Miller & E. Cooper, Federal Practice and Procedure §§ 1350, 1351 (2d ed. 1990 & Supp. 1999) (once a defense of lack of personal or subject matter jurisdiction has been raised, the party asserting jurisdiction bears the burden of proving that jurisdiction exists).

Case No. VBA-0010

March 9, 2001

DECISION AND ORDER OF

THE DEPARTMENT OF ENERGY

Appeal

Name of Petitioner: Jagdish C. Laul

Date of Filing: September 12, 2000

Case Number: VBA-0010

This Decision considers an Appeal filed by Excalibur Associates, Inc. (Excalibur) of an Initial Agency Decision issued on September 1, 2000, on a complaint filed by Jagdish C. Laul (Laul or the complainant) under the Department of Energy (DOE) Contractor Employee Protection Program, 10 C.F.R. Part 708. In his complaint, Laul seeks compensation for his dismissal by his former employer, Excalibur, allegedly in retaliation for his participation in an activity protected under Part 708. In the Initial Agency Decision, the Hearing Officer determined that the complainant had carried his burden to show that he had engaged in a protected activity and that it was a contributing factor in Excalibur's action in dismissing him. The Hearing Officer further determined that Excalibur had failed to carry its burden to show that it would have taken the same action in the absence of Laul's protected activity. Accordingly, the Hearing Officer directed remedial action from Excalibur in compensation for Laul's claim. As set forth in this Decision, I have determined that Excalibur's Appeal of the Initial Agency Decision must be denied.

I. Background

A. The DOE Contractor Employee Protection Program

The Department of Energy's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste and abuse" at DOE's Government-owned or -leased facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purpose is to encourage contractor employees to disclose information which they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers. Thus, contractors found to have discriminated against an employee for such a disclosure, or participating in a related proceeding, will be directed by the DOE to provide relief to the complainant.

As initially formulated, the program regulations, codified at 10 C.F.R. Part 708, generally prescribed independent fact-finding by the DOE Office of Inspector General, followed by the issuance of a Report of Inquiry setting forth the IG's findings and recommendations on the merits of the complaint. Thereafter, the complainant could request a hearing before a Hearing Officer assigned by the DOE Office of Hearings and Appeals (OHA), pursuant to which the Hearing Officer rendered an Initial Agency Decision. However, on March 15, 1999, DOE issued an amended Part 708, effective April 14, 1999, setting forth procedural revisions that "apply prospectively in any complaint proceeding pending on the effective date of this part." 10 C.F.R. § 708.8; *see* 64 Fed. Reg. 12,862 (March 15, 1999). Under the revised regulations, OHA conducts the investigation of the complaint, if one is requested by the complainant. 10 C.F.R. § 708.22.

Similar to the prior regulations, the Director of OHA then appoints a Hearing Officer who conducts a hearing on the record and issues an Initial Agency Decision. 10 C.F.R. §§ 708.28, 708.30. Parties may seek review of an Initial Agency Decision by the filing of an appeal with the Director of OHA, in accordance with section 708.32.

B. Factual Background

The complainant's former employer, Excalibur, is a subcontractor of Kaiser Hill Company (Kaiser) which is the managing and operating contractor of DOE's Rocky Flats Field Office (Rocky Flats). Laul was hired by Excalibur in November 1997. Laul is an environmental engineer who holds a doctorate in nuclear chemistry, and was given a position as a "Principal Scientist." During the relevant time period, Excalibur's senior management was comprised of Charlie Burns, Chief Executive Officer (CEO), and Wayne Spiegel, Chief Operating Officer (COO). The third member of Excalibur's management team was David Richards, who was employed by Excalibur between October 1997 and May 1999.

Excalibur's primary contract with Kaiser required that Excalibur prepare "Emergency Preparedness Hazards Assessments" (EPHA) and "Emergency Assessment Resource Manuals" (EARM) for most of the sites at the Rocky Flats facility. A building or a work area is considered a site. The EPHA described in detail the risks associated with the release of each hazardous material located within a site. After the EPHA for a given site was prepared by Excalibur and approved by Kaiser, Excalibur prepared the EARM for that site. The EARM provided operational guidance on the appropriate actions to take in the event of the release of each hazardous material located within a site. Mark Spears, Manager of the Hazardous Assessment Committee (HAC), and Wilbert Zurliene, alternate HAC Manager, were the two Kaiser employees with primary responsible for substantively reviewing the EPHAs and EARMs written by the Excalibur employees.

Upon assuming the Principal Scientist position with Excalibur, the complainant was assigned to work primarily on drafting and revising EARMs. Laul initially acted as team leader and reported directly to the Kaiser HAC Managers, Spears and Zurliene. However, this working arrangement changed following a meeting in January 1998, when Laul presented Spears and Zurliene with an initial set of draft EARMs. Spears and Zurliene reported to Excalibur's senior management (Spears, COO) that they were dissatisfied with the quality of work presented by the complainant. Upon receiving this negative feedback, Burns (Excalibur CEO) directed Richards to take the lead in dealing with Kaiser in place of Laul. Thus, in February 1998, Richards became Laul's direct supervisor. The complainant was no longer permitted to sign the documents he prepared, and his interactions with the HAC Managers were substantially limited.

In June 1998, Excalibur entered into a subcontract with Global Business Associates (GBA), and thereby acquired one GBA employee, Ron Beaulieu. Under this contract, GBA was given the responsibility for preparing and maintaining certain EPHAs and EARMs. This contract and the extension of the contract into fiscal 1999 had the effect of reducing the work on EARMs available for employees of Excalibur. Also in June 1998, Excalibur's senior management's performed a rating of each of its twelve analytical employees. In these written evaluations, the complainant was rated the lowest of the twelve Excalibur employees.

The complainant was discharged by Excalibur on October 21, 1998. The October 21, 1998, out processing form provided to the complainant indicates he was discharged because there was "insufficient scope of work" to justify retaining his services.

II. Complaint Proceeding

On December 18, 1998, the complainant filed this complaint with the DOE Office of Inspections of the Office of the Inspector General (IG), claiming that his October 21, 1998 dismissal was a retaliatory act for his participation in a prior Part 708 proceeding. Laul asserts in his complaint that in June 1996, he filed a

whistleblower complaint against Kaiser and his direct employer Tenera, a subcontractor of Kaiser. The final agency decision on that complaint was issued on August 19, 1998. The complainant's believes that Excalibur's decision to terminate him was influenced by Kaiser management officials having knowledge of his prior Part 708 proceeding.

On April 16, 1999, the IG transferred a number of pending complaints, including the subject complaint, to OHA. On April 26, 1999, the OHA Director appointed an investigator to examine and focus the issues raised in the complaint. 10 C.F.R. § 708.22. The investigator conducted an investigation, and issued a Report of Investigation on December 3, 1999. 10 C.F.R. § 708.23. On that same day, the OHA Director appointed a Hearing Officer. On May 10 and May 11, 2000, the Hearing Officer convened a hearing on the Laul complaint in Rocky Flats. 10 C.F.R. §§ 708.25, 708.28.

A. Legal Standards Governing This Case

(1) The Complainant's Burden

It is the burden of the complainant under Part 708 to establish "by a preponderance of the evidence that he or she made a disclosure, participated in a proceeding, or refused to participate as described under § 708.5, and that such act was a contributing factor in one or more alleged acts of retaliation against the employee by the contractor." 10 C.F.R. § 708.29. The term "preponderance of the evidence" means proof sufficient to persuade the finder of fact that a proposition is more likely true than not true when weighed against the evidence opposed to it. *See Ronald Sorri*, 23 DOE ¶ 87,503 (1993) (citing McCormick on Evidence § 339 at 439 (4th ed. 1992)). *See also Hopkins v. Price Waterhouse*, 737 F. Supp. 1202, 1206 (D.D.C. 1990) (*Hopkins*).

(2) The Contractor's Burden

If the complainant meets his burden, the regulations require Excalibur to prove by "clear and convincing" evidence that it would have terminated the complainant if he had not engaged in protected conduct. 10 C.F.R. § 708.29. "Clear and convincing" evidence requires a degree of persuasion higher than mere preponderance of the evidence, but less than "beyond a reasonable doubt." *See Hopkins*, 737 F. Supp. at 1204 n.3. In evaluating whether a contractor has met its burden, the Hearing Officer considers the strength of the contractor's evidence in support of its action and any evidence that the contractor takes similar actions against employees who are not whistleblowers but who are otherwise similarly situated.

B. The Initial Agency Decision

On September 1, 2000, the Hearing Officer issued an Initial Agency Decision finding in favor of the complainant. *Jagdish C. Laul*, 28 DOE ¶ 87,006 (2000) (*IAD*). There is no dispute that prior to the complainant's dismissal he participated in "an administrative proceeding conducted under part 708." 10 C.F.R. § 708.29(b). That administrative proceeding was initiated in June of 1996 when the complainant filed a whistleblower complaint against Kaiser and his direct employer Tenera, a subcontractor of Kaiser. The final agency decision on that complaint was issued on August 19, 1998. The Hearing Officer therefore turned to the issue of whether Laul's protected activity was a contributing factor to his October 21, 1998 dismissal. For the reasons summarized below, the Hearing Officer concluded that Laul had carried his burden in this regard.

The Hearing Officer initially found that three adverse personnel actions preceded the complainant's dismissal and contributed to the Excalibur's decision to dismiss him. *IAD*, 28 DOE at 89,049. The first personnel action occurred in February 1998 when Burns reduced Laul's authority and directed Richards to take the lead in dealing with the HAC Managers. The second personnel action was Excalibur's decision to enter into a subcontract with GBA in June 1998 that had the effect of reducing the work on EARMs available for Excalibur employees. The third personnel action was Excalibur's senior management's

written rating of the complainant in June 1998, under which the complainant was rated the lowest of the twelve Excalibur employees. Of these three actions, the Hearing Officer found that the written rating was the most important factor in Excalibur's selection of Laul for dismissal. *Id*.

The Hearing Officer ruled as a legal matter that "a complainant can show that protected conduct was a contributing factor by showing that the official taking the action had actual or constructive knowledge of the disclosure and acted within such a period of time that a reasonable person could conclude that the disclosure was a factor in the personnel action." *IAD* at 89,050, *citing* *Barbara Nabb*, 27 DOE ¶ 87,519 (1999). The Hearing Officer determined that there was the requisite temporal nexus since each of the three Excalibur personnel decisions leading to Laul's dismissal occurred during the pendency of his protected participation in the Part 708 proceeding. In addition, the Hearing Officer found that there was a close time nexus between the protected conduct, which concluded in August 1998, and his October 21, 1998 dismissal. *IAD* at 89,050.

The Hearing Officer's finding of constructive knowledge, however, requires greater analysis. In this regard, the Hearing Officer found that although Excalibur had no direct knowledge of the protected conduct, constructive knowledge was properly imputed to Excalibur's management under the circumstances of this case. In reaching this conclusion, the Hearing Officer held that "[u]nder Part 708 case law, a complainant can establish constructive knowledge by showing that the person taking the alleged retaliatory act was influenced by the negative opinions of those with knowledge of the protected conduct." *IAD* at 89,050, *citing* *Am-Pro Protective Services, Inc.*, 26 DOE ¶ 87,511 (1996) *(Am-Pro)*; *Morris J. Osborne*, 27 DOE ¶ 87,542 (1999); *Jimmie L. Russell*, 28 DOE ¶ 87,002 (2000). As described below, the Hearing Officer found in this case that there are two communication linkages which demonstrate that negative information was passed from those with knowledge of the protected disclosure to Excalibur's management.

The Hearing Officer found that the first such communication linkage occurred between Kaiser employees involved in that protected proceeding and the Kaiser HAC managers. The basis for finding a passage of negative information is as follows:

> In this case at least three Kaiser officials were directly aware of the complainant's participation in the protected proceeding. They are R. E. Kell, the deputy manager of the Kaiser Safety Engineering and Technical Service Office (SETS office), Robert Allen, Manager, Kaiser Human Resources, and Dana Dorr, Kaiser Work Force Restructuring Manager (hereinafter referred to collectively as the "directly involved Kaiser employees"). Mr. Kell signed the April 1996 memorandum that directed Tenera, the complainant's employer, to dismiss the complainant. Excalibur Exhibit #17. That dismissal was the adverse personnel action that led to the prior whistleblower proceeding. Mr. Allen and Mr. Dorr worked for Kaiser on investigating and evaluating the prior whistleblower complainant.
>
> The evidence is clear that other Kaiser employees knew of the protected conduct and made negative comments about the complainant. The record indicates that two senior Kaiser/Tenera employees, Mr. Maini, a Tenera employee who headed the Kaiser SETS Office, and Ms. Bateman, made comments that the complainant was a whistleblower and should not be rehired during 1996. In addition the record indicates that Mr. Tony Buhl, Vice President Environment Safety and Health and Assurance, made comments that he would not hire the complainant during 1998.
>
> It is clear that HAC manager Spears worked with various Kaiser employees who had knowledge of the complainant's participation in the protected proceeding. On the organization chart for the SETS Office dated March 1, 1996, Mr. Spears reported directly to Mr. Maini and his deputy Mr. Kell. As mentioned above, Mr. Kell was directly involved in the prior proceeding and Mr. Maini, his supervisor, was found by the Deputy Inspector General to have made negative comments about hiring the complainant. Ms. Bateman is also listed on that

> organization chart. As also mentioned above, she was also found by the Deputy Inspector General to have made comments aimed at assuring the complainant was not hired. Including Mr. Spears, there are six people named on the March 1996 organization chart of the SETS Office. Three of the other five people on the chart were directly involved in the prior protected proceeding. In such an office set up I believe that while Mr. Spears may not have been aware that the complainant was a whistleblower, Mr. Spears would have been aware of the problems being caused by the complainant and the negative feeling of his peers and supervisors toward the complainant.

IAD at 89,051-52 (footnotes omitted). The Hearing Officer further found the Kaiser HAC Managers' "alacrity" in negatively evaluating the complainant to Excalibur management in January 1998, to be additional evidence that they had a preconceived negative bias toward the complainant. The Hearing Officer determined that the HAC Managers did not have a reasonable basis for concluding that Laul's work was not technically competent, and that their testimony concerning this matter was "weak and evasive." *Id.* at 89,052. On the basis of this evidence, the Hearing Officer concluded that "it is more likely than not that the complainant's participation in a prior Part 708 proceeding led various Kaiser employees to make negative comments about the complainant that predisposed the HAC managers to negatively evaluate the complainant to Excalibur." *Id.* at 89,051.

The second communication linkage noted by the Hearing Officer is between the Kaiser HAC managers and Excalibur's management. The record shows that beginning in January 1998, the Kaiser HAC Managers provided negative evaluations of the documents prepared by Laul and that shortly thereafter, Excalibur's management functionally replaced him with Richards. The Hearing Officer concluded:

> Therefore, even though I believe that Excalibur employees were not aware of the complainant's participation in the prior protection proceeding, I find that Excalibur's senior manager received and considered the negative opinions of the HAC managers. These findings lead to the conclusion that Excalibur had constructive knowledge of the complainant's participation in the protected proceeding when it made various personnel decisions regarding the individual. Once there is a reasonable inference that the complainant's participation in the protected proceeding had an effect on the individuals making personnel decisions at Excalibur the complainant has met his burden of showing that his participation in the protected proceeding was a contributing factor to the adverse personnel decisions.

IAD at 89,053-54. The burden therefore shifted to Excalibur to show by clear and convincing evidence that the complainant would have been dismissed absent his participation in the prior Part 708 proceeding. More specifically, the Hearing Officer stated that Excalibur must demonstrate by clear and convincing evidence that it would have taken the personnel actions even if it had not received the HAC Managers' negative evaluation of the complainant's work. *IAD* at 89,054. The Hearing Officer then concluded that Excalibur failed to carry this burden.

The Hearing Officer initially noted that Excalibur had presented no documentation or analysis in the record to show that the complainant's work was not technically competent. While Excalibur attempted to show that there were reasonable business decisions for the personnel actions leading to Laul's dismissal, the Hearing Officer found that Excalibur's senior management's opinions of the complainant were clearly affected in a number of ways by the evaluation of the HAC Managers, and he cited examples to this effect. *See IAD* at 89,053. The Hearing Officer concluded: "Therefore, in order to prevail Excalibur is required to demonstrate that, in the absence of knowledge of the HAC managers' opinions, it would have reached the decision to hire a subcontractor, rate the complainant poorly and then dismiss him. I do not believe the testimony provided by Excalibur comes close to making these showings under the clear and convincing standard." *Id.*

Accordingly, the Hearing Officer concluded that the complainant had participated in an administrative proceeding conducted under Part 708, that Excalibur's dismissal of the complainant was an adverse

personnel action that constituted a retaliatory act under Part 708, and that the complainant is therefore entitled to remedial action from Excalibur. In accordance with the complainant's request for relief, the Hearing Officer awarded him back pay and litigation expenses. The *IAD* specifies that back pay be calculated from October 21, 1998 until the day the complainant accepted a position at Los Alamos National Laboratory, October 12, 1999, at the hourly rate the complainant was paid as a consultant, $39.60. *IAD* at 89,055.

C. Excalibur's Appeal

In its Appeal(1), Excalibur raises a number of arguments in support of its claim that the *IAD* is incorrect as a matter of fact and law. Excalibur's initial challenges are procedural in nature, relating to evidentiary determinations made by the Hearing Officer in the context of the hearing. In this regard, Excalibur claims that the Hearing Officer committed reversible error by: (1) failing to exclude evidence that was irrelevant, Appeal at 3-5; (2) admitting hearsay testimony, Appeal at 5-7; (3) permitting testimony from witnesses that lacked proper foundation, Appeal at 7; and (4) permitting the improper use of deposition testimonial evidence, Appeal at 8. Excalibur argues that "[e]ach of the erroneous rulings regarding the evidence that was admitted at the hearing substantially influenced the decision that was made and must cause the decision to be in grave doubt." Appeal at 10.

Next, Excalibur argues that critical factual findings made by the Hearing Officer are clearly erroneous and mandate reversal of the *IAD*. More specifically, Excalibur challenges the Hearing Officer's findings that: (1) there is a temporal nexus between Laul's protected activity and any adverse personnel action taken against him by Excalibur, Appeal at 11; (2) the HAC Managers, Spears and Zurliene, had constructive knowledge of the complainant's protected activity and the existence of a general animus against the complainant, Appeal at 12-15; (3) Excalibur's management had constructive knowledge of the complainant's protected activity, Appeal at 16; and (4) Excalibur's decision to lay off the complainant was unduly influenced by the negative feedback received from the HAC Managers, Appeal at 16-19. According to Excalibur, "[t]he Complainant failed to prove by a preponderance of the evidence that his protected activity was a contributing factor to the adverse decision [and Excalibur] met its burden by proving by clear and convincing evidence that its decision would stand regardless of Complainant's protected activity." Appeal at 19.

Finally, Excalibur asserts that legal conclusions set forth in the *IAD* are inconsistent with the law and must be reversed. In this regard, Excalibur argues that: (1) the complainant's dismissal is the only retaliation alleged in his complaint, and the Hearing Officer's consideration of other adverse personnel actions (*e.g.*, the low performance ranking) is beyond the scope of his authority, Appeal at 19-20; (2) the Hearing Officer misapplied applicable case law in ruling that constructive knowledge may be demonstrated where the individuals making the personnel decision were influenced by the opinions of those persons with knowledge of the protected conduct, Appeal at 20-21; and (3) the complainant failed to carry his "contributing factor" burden as a matter of law since he did not show that Excalibur had actual or constructive knowledge of his protected activity, Appeal at 21-23.

On December 1, 2000, Laul filed a Response to Excalibur's Appeal (Response) asserting that the *IAD* is legally and factually correct, and that Excalibur's Appeal fails to present any valid reason for setting aside the decision reached in the *IAD*. Excalibur then filed a Reply to Laul's Response on January 9, 2001. The record of this proceeding was closed on January 11, 2001. Excalibur's Appeal is considered below.

III. Analysis

It is well settled that the factual findings of the Hearing Officer are subject to being overturned only if they can be deemed to be clearly erroneous, giving due regard to the trier of fact to judge the credibility of witnesses. *Eugene J. Dreger*, 27 DOE ¶ 87,564 at 89,351-52 (2000), *citing Oglesbee v. Westinghouse Hanford Co.*, 25 DOE ¶ 87,501, 89,001 (1995); *O'Laughlin v. Boeing Petroleum Services, Inc.*, 24 DOE ¶

87,513, 89,064 (1995). *Compare Pullman Standard v. Swint*, 456 U.S. 273 (1982), with *Amadeo v. Zant*, 486 U.S. 214, 223 (1988) (quoting Federal Rule of Civil Procedure 52(a)). On the other hand, conclusions of law set forth in the *IAD* are subject to *de novo* review. *Kaiser-Hill Company, L.L.C.*, 27 DOE ¶ 87,555 at 89,299 (2000), *citing Salvatore Gian friddo*, 27 DOE ¶ 87,544 at 89,221 (1991); *see Pierce v. Underwood*, 487 U.S. 552, 558 (1988) ("For purposes of standard of review, decisions by judges are traditionally divided into three categories, denominated questions of law (reviewable *de novo*), questions of fact (reviewable for clear error), and matters of discretion (reviewable for ?abuse of discretion')."). After considering the issues raised by Excalibur, I have concluded that the determination reached in the *IAD* is correct and must be sustained, and that the complainant is therefore entitled to relief under Part 708.

Excalibur initially raises a number of procedural issues in its Appeal, claiming that substantial evidence was erroneously placed into the record and resulted in undue bias on the part of the Hearing Officer. Below, however, I will first consider the substantive objections raised by Excalibur. For the stated reasons, I conclude that Excalibur has failed to show that the determination reached in the *IAD* is legally or factually incorrect. I will then turn to Excalibur's procedural claims of bias, which will then have been placed in their proper context.

A. Adverse Personnel Actions

Excalibur argues that the Hearing Officer acted beyond the scope of his legal authority in considering adverse personnel actions affecting the complainant, other than his dismissal in October 1998. As explained above, the Hearing Officer found that three adverse actions contributed to the Excalibur's decision to dismiss Laul: (1) the reduction of Laul's authority in February 1998, (2) the decision to enter into a subcontract with GBA in June 1998, and (3) the June 1998 rating of the complainant as the lowest of the twelve Excalibur employees. *IAD*, 28 DOE at 89,049. Excalibur asserts that section 708.14(a) requires that complaint be filed "by the 90th day after the date you knew, or reasonably should have known, of the alleged retaliation," and section 708.12(a) requires that the employee specifically identify the alleged retaliation. 10 C.F.R. §§ 708.12(a), 708.14(a). Excalibur argues that since Laul identified only his dismissal as a retaliation in his complaint, the Hearing Officer was legally barred from considering the three adverse personnel actions leading to the complainant's dismissal. I disagree.

Sections 708.12 and 708.14 prescribe the information that must be contained in a valid Part 708 complaint and the time limitation for filing such complaint. These provisions having been satisfied, however,(2) they do not then limit the authority of the Hearing Officer to examine relevant actions taken by contractor leading to an ultimate act of alleged retaliation against the complainant. Such connected personnel actions may serve to establish a pattern of discriminatory acts or a logic to the contractor's actions not evident from examination of each individual act itself, thus adding evidentiary support to the complainant's claim. *See Ronald Sorri*, 23 DOE ¶ 87,503 at 89,010 (1993); *Barbara McNabb*, 27 DOE ¶ 87,519 at 89,119-21 (1999). Of course, those related actions could also tend to contradict the complainant's arguments, or support claims of the contractor. It would be unwise to prohibit the Hearing Officer from considering this type of evidence as long as it is potentially relevant. My review of the *IAD* establishes that the Hearing Officer appropriately considered the related personnel actions taken by Excalibur and found them to be material factors leading to the complainant's dismissal. Indeed, it is obvious to me that the Hearing Officer's deliberation of this case would have been incomplete absent a full examination of the circumstances leading to Laul's dismissal.

B. Contributing Factor

(1) Legal Contentions

Excalibur argues that the Hearing Officer misapplied pertinent case law in finding that the complainant carried his burden to show that his protected activity was a "contributing factor" to Excalibur's decision to

dismiss him. In the *IAD*, the Hearing Officer held that "a complainant can show that protected conduct was a contributing factor by showing that the official taking the action had actual or constructive knowledge of the disclosure and acted within such a period of time that a reasonable person could conclude that the disclosure was a factor in the personnel action." *IAD* at 89,050, *citing Barbara Nabb*, 27 DOE ¶ 87,519 (1999). The Hearing Officer further held that "[u]nder Part 708 case law, a complainant can establish constructive knowledge by showing that the person taking the alleged retaliatory act was influenced by the negative opinions of those with knowledge of the protected conduct." *IAD* at 89,050, *citing Am-Pro Protective Services, Inc.*, 26 DOE ¶ 87,511 (1996) *(Am-Pro)*; *Morris J. Osborne*, 27 DOE ¶ 87,542 (1999); *Jimmie L. Russell*, 28 DOE ¶ 87,002 (2000).

Excalibur maintains that the Hearing Officer misapplied this legal standard in finding that constructive knowledge of Laul's protected activity can be attached to Excalibur based upon a showing of constructive knowledge on the part of the HAC Managers. Relying on the law of agency, Excalibur asserts that "an agent of [Excalibur] must have actual knowledge of the protected disclosures for the knowledge to be imputed on one of the officials who took the action against Complainant." Appeal at 21, *citing Torres v. Pisano*, 116 F.2d 625 (2d Cir. 1997); RESTATEMENT (SECOND) OF AGENCY §§ 272, 275. Excalibur claims that "[c]onstructive knowledge cannot be imputed to management by non-employees," Appeal at 21, and that the cases relied upon by the Hearing Officer do not support the legal conclusion reached in the *IAD*. Excalibur therefore argues that since the complainant has failed to show that Excalibur had actual or constructive knowledge as a matter of law, he has failed to establish that his protected activity was a "contributing factor" to his dismissal. Appeal at 22-23. I conclude, however, that the Hearing Officer's holding is amply supported by legal precedent.(3)

Initially, it is well settled that a whistleblower complainant need not prove direct or actual knowledge of a protected activity by the final decision-maker in order to prevail on a claim of prohibited retaliation, where the decision-maker was under the control or influence of persons having such knowledge. *See Frazier v. Merit Systems Protection Board*, 672 F.2d 150 (D.C. Cir. 1982). This principle has been affirmed in whistleblower decisions of the U.S. Department of Labor. *See, e.g., Dean v. Houston Lighting & Power Co.*, 93-ERA-7 (ALJ Apr. 6, 1995)*; Frady v. Tennessee Valley Authority*, 92-ERA-19 (Sec'y Oct. 23, 1995); *Pillow v. Bechtel Construction*, 87-ERA-35 (Sec'y July 19, 1993). Excalibur does not disagree with this principle in general, but argues as a matter of law that constructive knowledge cannot be imputed to Excalibur management under the circumstances of this case since the HAC Managers were neither agents nor employees of Excalibur. I am not at all persuaded by this legal contention.

I find the determination to impute knowledge to Excalibur under the circumstances of this case was an informed and reasonable one which takes account of the way contractors and subcontractors typically interact at DOE facilities. I also find that it is wholly consistent with our ruling in *Jimmie L. Russell*, *supra*, one of several cases cited by the Hearing Officer in the *IAD*. The complainant in that case, a DOE subcontractor employee, made protected disclosures to the prime contractor and to DOE. The contractor (UC) terminated the complainant's work assignment in retaliation for the protected disclosures, and the complainant was then dismissed by his subcontractor employer as a consequence of the contractor's action. The subcontractor (Comforce) argued that it bore no responsibility for the complainant's dismissal since it had no knowledge of the complainant's protected disclosures. In rejecting this claim, the Hearing Officer stated:

> Although I find that Comforce had no role in the UC's decision to terminate Mr. Russell's work assignment at LANL, Comforce admits that it terminated its employment contract with Mr. Russell because the UC ended his work assignment with LANL. As discussed above, the UC's decision to end his work assignment constituted a retaliation against Mr. Russell for activity that is protected under Part 708. Comforce therefore terminated Mr. Russell's employment as a result of Mr. Russell's protected activity, and is jointly and severally liable with the UC for the damages arising from this termination.
>
> As noted above, Part 708 applies to employees of DOE contractors and the term "contractor"

> is specifically defined to include "a subcontract under a contract . . . with respect to work related to activities at DOE-owned or -leased facilities." 10 C.F.R. §§708.1- 2. Mr. Russell was employed by a UC subcontractor, Comforce, to perform a work assignment at LANL. Both the UC and Comforce took actions which directly and negatively impacted the "terms", "conditions" and "privileges" of Mr. Russell's employment at LANL. Accordingly, both the UC and Comforce bear liability to remedy these "retaliations" under 10 C.F.R. §708.2. Although Comforce has shown that it acted against Mr. Russell solely as a result of actions taken by the UC, that showing does not relieve Comforce from liability in this matter. Part 708 contains no provision exempting a subcontractor from liability under such circumstances. To create such an exemption would vitiate the protections for whistleblowers that Part 708 was intended to provide. Accordingly, I find that Comforce is jointly and severally liable, along with the UC, for the damages arising from Comforce's termination of Mr. Russell's employment on March 5, 1999.

28 DOE at 89,026. The Hearing Officer's determination takes account of the special nature of contractor and subcontractor relationships at DOE facilities. Since the overriding objective of the subcontractor is to satisfy the contractor, which has employed the subcontractor and to which the subcontractor is often legally obligated, the contractor is in a position to exert substantial influence in many respects including by affecting the subcontractor's personnel decisions. Thus, the policy objectives underlying Part 708 mandate that the important legal distinctions between DOE contractor and subcontractor not be viewed as a bar to liability where the subcontractor, acting under the influence of the contractor, carries out a retaliation against a whistleblower complainant. Under these circumstances, the contractor's knowledge of a protected activity may be legally imputed to the subcontractor and constitute constructive knowledge(4) of the protected activity.

(2) Factual Contentions

Excalibur also contests the Hearing Officer's factual findings that there was a temporal nexus between Laul's protected activity and his dismissal, and that the HAC Managers had constructive knowledge of Laul's protected activity.(5) According to Excalibur, these findings are "clearly erroneous" and cannot support the complainant's burden to prove by a preponderance of the evidence that his protected activity was a contributing factor in his dismissal. Appeal at 11-15. Again, I must disagree.

Excalibur claims that there is no temporal nexus in this case because Laul filed his first Part 708 complaint against his former employer (Tenera) based upon alleged protected disclosures made in 1995, three years before his dismissal by Excalibur, and there is no continuity of ownership between Tenera and Excalibur. I find Excalibur's temporal analysis untenable. While Laul filed his first Part 708 complaint in June 1996, no final agency decision was issued until August 1998. It was on this basis that the Hearing Officer found a temporal nexus in this case, finding that the three personnel decisions that led to Laul's dismissal occurred during the pendency of the Tenera case and "[t]here is also a close time nexus between the protected conduct, which concluded during August 1998, and his October 21, 1998 dismissal." *IAD* at 89,050. I therefore do not agree that the finding of a temporal nexus is clearly erroneous.

I also reject as equally unfounded Excalibur's charge that the Hearing Officer clearly erred in finding that the HAC Managers had knowledge of the complainant's protected activity. Although the HAC Managers denied such knowledge, this is by no means conclusive evidence on this point. In *Dean v. Houston Lighting & Power Co.*, 93-ERA-7 (ALJ Apr. 6, 1995), the DOL considered a similar issue in a case where the contractor (HL&P) denied knowledge of the complainants' (Dean and Lamb) protected disclosures to the Nuclear Regulatory Commission (NRC). The Administrative Law Judge stated, in pertinent part:

> HL&P has categorically denied knowledge of Dean and Lamb's protected activities by Balcom or anyone else responsible for Dean's and Lamb's terminations. **In such circumstances, proof of such knowledge is necessarily established by circumstantial evidence**. . . . I find that Complainants have proved that HL&P had sufficient knowledge of their protected activities to

> act upon that knowledge, and did so, adversely to Complainants. In the absence of proof of direct knowledge obtained through statements or admissions by the Complainants, HL&P managers and decision makers, or other persons with personal knowledge, knowledge imputable to HL&P may be established by proof that its responsible managers heard rumors, which generated suspicions, or made or acted on assumptions that Complainants had spoken to the NRC about their safety concerns. Proof is sufficient if Respondent's managers either were aware, or strongly suspected, that Complainant had complained to the NRC. . . . In this case the HL&P witnesses denied knowledge of Lamb's and Dean's protected activities, at least to the extent that they involved contacts with the NRC. But it is evident that by "knowledge" they meant virtually absolute certainty, that is the level of certainty that would be established by actual observation, documentary confirmation, or direct disclosure by a reliable person. While none of them may have had that degree of certainty, and so could categorically deny such knowledge, the record establishes that they were amply aware of circumstances, through investigations, discussions, and other interactions, as well as close familiarity with personalities in a small universe, which would have supported strong and reasonable suspicions, or assumptions, which could have affected, and, I find, did affect their conduct, which I find was also tempered by the caution that attends the involvement of legal counsel.

Slip op. at 55-56 (emphasis supplied). In the *IAD*, the Hearing Officer performed exactly this kind of analysis of circumstantial evidence in finding knowledge on the part of the HAC Managers. As examined above, the Hearing Officer found on the basis of testimony and supporting evidence that: (1) at least three Kaiser officials were directly aware of the complainant's participation in the protected activity, (2) other Kaiser employees knew of the protected conduct and made negative comments about the complainant, and (3) it is clear that HAC Manager Spears worked with various Kaiser employees who had knowledge of the complainant's participation in the protected proceeding. *IAD* at 89,051-52. In the latter regard, the Hearing Officer found significant that a March 1996 organization chart showed that Spears worked in Kaiser's Safety Engineering and Technical Service Office (SETS Office) and reported directly to one of the Kaiser officials (Kell) who were directly aware of the complainant's participation in the protected proceeding. Indeed, the Hearing Officer found that of the five Kaiser employees working in the SETS Office, besides Spears, three were directly involved in Laul's protected proceeding. The Hearing Officer further found that the HAC Managers' alacrity in negatively evaluating the complainant in January 1998 under the foregoing circumstance was evidence of preconceived negative bias, and found the testimony of the HAC Managers on this point to be "weak and evasive.(6) On the basis of this substantial evidence, albeit circumstantial, I reject the claim that the Hearing Officer was clearly erroneous in concluding that the HAC Managers had knowledge(7) of Laul's protected activity.

I therefore conclude that Excalibur has failed to show in its Appeal that the *IAD* was either legally or factually incorrect in finding that the complainant carried his burden to show that his protected activity was a contributing factor to his dismissal by Excalibur in October 1998.

C. Contractor's Burden

Excalibur's remaining substantive contention is that the Hearing Officer committed clear error in finding that the firm failed to show by clear and convincing evidence that it would have taken the same personnel action regarding Laul in the absence of his protected activity. Excalibur argues that it presented "un-contradicted evidence" regarding its reasons to lay off the complainant. Appeal at 16. According to Excalibur, its decision to place Richards over the complainant was not an adverse action against Laul but was merely intended to relieve Burns of his duties in overseeing the day-to-day operations of the firm. *Id.* Excalibur further maintains that it fully explained its decision to outsource work to a subcontractor (GBA). *Id.* at 17-18. Excalibur concedes that the HAC Managers provided negative feedback regarding work products received in January 1998, but asserts that it was not specific to the complainant. Excalibur maintains that there is "nothing in the record" to support the finding by the Hearing Officer that Excalibur would have rated the complainant differently but for the input of the HAC Managers. *Id.* at 17. Excalibur similarly argues that the finding that it would have considered other options beside dismissing the

complainant absent such input "is unsupported by any evidence in the record." *Id.* at 18.

However, Excalibur has again missed the point. Once it has been ruled that the complainant successfully carried his burden, it is not then the burden of the complainant or the Hearing Officer to adduce evidence establishing the degree to which Excalibur management was negatively influenced by the HAC Managers(8); rather, it is Excalibur's burden to prove by clear and convincing evidence that it would have taken the same actions in the absence of such negative influence. In finding that Excalibur had failed to meet the clear and convincing standard, the Hearing Officer observed initially that Excalibur had not submitted any documents prepared by the complainant or "provide[d] any analysis to support the position that the complainant's work was not technically satisfactory." *IAD* at 89,054. Then, in considering the explanations for Excalibur's determination to retain GBA, the Hearing Officer found the testimony of Burns "illogical" and "unconvincing." *Id.* at 89,053-54. Finally, the Hearing Officer found that Excalibur had provided no plausible explanation for its determination to consider only Excalibur employees, and not subcontractors, when a work force reduction became necessary. *Id.* at 89,055. Based upon my review of this matter, I find that Excalibur has not shown even by a preponderance of the evidence in its present Appeal that the *IAD* is incorrect in finding that the mitigating explanations proffered by Excalibur failed to rise to the clear and convincing standard of proof.

D. Procedural Objections

I will now turn to the numerous procedural challenges raised by Excalibur that primarily relate to evidentiary determinations made by the Hearing Officer in the context of the hearing. Excalibur claims that the Hearing Officer committed reversible error by: (1) failing to exclude evidence that was irrelevant, Appeal at 3-5; (2) admitting hearsay testimony, Appeal at 5-7; (3) permitting testimony from witnesses that lacked proper foundation, Appeal at 7; and (4) permitting the improper use of deposition testimonial evidence, Appeal at 8. Excalibur acknowledges that in hearings conducted under Part 708, "[f]ormal rules of evidence do not apply, but OHA may use the Federal Rules of evidence as a guide," and broad discretion is conferred upon the Hearing Officer in the conduct of the hearing: "The Hearing Officer may rule on objections to the presentation of evidence; exclude evidence that is immaterial, irrelevant, or unduly repetitious; . . . determine the format of the hearing; . . . ask questions of witnesses; . . . and otherwise regulate the conduct of the hearing." 10 C.F.R. §§ 708.28(a)(4), 708.28(b)(4).

Notwithstanding, Excalibur argues that the cumulative erroneous rulings regarding the evidence admitted at the hearing "caused unfair prejudice against [Excalibur] by confusing the issues" and "substantially influenced the decision that was made and must cause the decision to be in grave doubt." Appeal at 3, 10. In its Reply, Excalibur makes a more serious charge that these rulings "prove that the Hearing Officer had a preconceived negative bias against Excalibur and manufactured a way to find in favor of Laul and against Excalibur." Reply at 2-3. I find these assertions without merit and unsupported by any fair review of the record of this case.

With the luxury of hindsight, it is apparent to me that the Hearing Officer admitted some testimony and evidence which ultimately proved to be irrelevant. However, I perceive no prejudice to Excalibur since such evidence was not relied upon and did not affect the determinations reached in the *IAD*. Nor do I perceive the "confusing of issues" reported by Excalibur. Instead, as discussed above in considering Excalibur's substantive objections, I find that the *IAD* is soundly based on applicable legal precedent, and the factual determinations reached by Hearing Officer were not clearly erroneous as claimed by Excalibur.

Next, Excalibur's claim of "negative bias" on the part of the Hearing Officer is a serious charge and I considered it carefully. Such charges are not sustainable on the basis of mere speculation but must be supported by clear evidence sufficient to overcome the presumption of regularity attached to administrative proceedings. I find no such clear evidence in this case. Rather, it appears that Excalibur's charges of bias simply reflect its displeasure that the Hearing Officer did not reach the determination that the firm seeks. Therefore, no further consideration of this charge is warranted.

IV. Conclusion

On the basis of the foregoing, I conclude that Excalibur has failed to show in its Appeal that the determination reached in the *IAD* is erroneous as a matter of fact or law. Accordingly, Excalibur's Appeal must be denied. The parties shall proceed with the remedial action specified in the *IAD*.

It Is Therefore Ordered That:

(1) The Appeal filed by Excalibur Associates, Inc., on September 12, 2000, of the Initial Agency Decision issued on September 1, 2000 (Case No. VBH-0010), is hereby denied.

(2) Within thirty (30) days of the date of this order, the complainant shall provide Excalibur with the information specified in Paragraphs (2) and (3) of the Initial Agency Decision. Excalibur shall then perform the remedial action specified in Paragraph (4) of the Initial Agency Decision.

(3) This Appeal Decision shall become a Final Agency Decision unless a party files a petition for Secretarial review with the Office of Hearings and Appeals, within thirty (30) days after receiving this decision. 10 C.F.R. § 708.35.

George B. Breznay

Director

Office of Hearings and Appeals

Date: March 9, 2001

(1)Excalibur initially filed a document entitled "Issues for Appeal" on September 27, 2000, in which the firm itemized 38 objections to determinations made by the Hearing Officer during the complaint proceeding. However, in each instance, Excalibur failed to provide any argument in support of its position. Accordingly, on October 12, 2000, Excalibur was directed to file an Amended Statement of Issues. Letter of October 12, 2000, from Fred L. Brown, Deputy Assistant Director, OHA, to David Zwisler, Esq., Counsel for Excalibur. The Amended Statement of Issues filed by Excalibur on November 2, 2000, shall be referred to as "the Appeal."

(2)Excalibur does not argue that the Laul complaint does not satisfy these procedural requirements. As noted in the background section, Laul filed the present complaint on December 18, 1998, within 90 days of his dismissal on October 21, 1998. The complaint clearly alleges that the dismissal was in retaliation for his participation in a prior proceeding under Part 708.

(3)In reaching this conclusion, I do not necessarily agree with the Hearing Officer's approach in applying the legal standard set forth in *Barbara Nabb, supra*. He held that a "contributing factor" could be established by showing 1) constructive knowledge by Excalibur and 2) temporal nexus. Standing alone, this formulation is unassailable. However, it could be misread if it is viewed as the ONLY way in which a complainant can establish that the protected "act" was a "contributing factor" to a retaliation. A Hearing Officer in Part 708 proceedings can find that the "contributing factor" test has been satisified on the basis that the evidence shows there is a "causal relationship" between the protected act or disclosure and the alleged act of retaliation. In this proceeding, the Hearing Officer found that in dismissing Laul, Excalibur management was negatively influenced by the HAC Managers who had knowledge of Laul's protected activity. The Hearing Officer might therefore have found on this basis alone that there was "sufficient evidence to permit a reasonable person to infer that the protected [activity] was a contributing factor to the determination." *Am-Pro Protective Services, Inc.*, 26 DOE at 89,065, *citing Couty v. Dole*, 886 F.2d 147, 148 (8th Cir. 1989); *see Frazier v. Merit Systems Protection Board*, 672 F.2d 150 (D.C. Cir. 1982). Notwithstanding, I find no reason to conclude that the Hearing Officer's analysis was incorrect as a matter

of law.

(4)I do not disagree with Excalibur's contention that the Hearing Officer's use of the term "constructive knowledge" with respect to Excalibur does not comport with the general usage of that term, involving instances where appropriate persons "knew or should have known" or "would have known by exercise of reasonable care." Appeal at 20, *citing* Black's Law Dictionary (6th Ed.). However, the term nevertheless seems apt. In the *IAD*, the Hearing Officer extended the term "constructive knowledge" in Part 708 proceedings to instances where, as here, Excalibur was negatively influenced by those having knowledge of protected conduct and thus was vicariously motivated by such knowledge in taking an adverse personnel action against the complainant, although actual knowledge of the particular conduct was not passed on. *Cf. Frazier v. Merit Systems Protection Board, supra.*

(5)Excalibur also argues that the Hearing Officer's "factual finding" of constructive knowledge by Excalibur is clearly erroneous since "there is no evidence of the transfer of the knowledge of the protected activity" from the HAC Managers to Excalibur. Appeal at 16. Here, Excalibur simply misses the point. The Hearing Officer's finding of constructive knowledge by Excalibur was not based upon the transfer of knowledge of the protected activity from the HAC Managers but on the finding that the Kaiser HAC Managers directly influenced the adverse personnel actions taken by Excalibur against Laul. Indeed, the Hearing Officer acknowledged in the *IAD* that "I believe that Excalibur employees were not aware of the complainant's participation in the prior protection proceeding." *IAD* at 89,053.

(6)"Excalibur challenges the Hearing Officer's assessment that the HAC Managers were not candid in their testimony. Appeal at 15, n. 4. However, the Hearing Officer is not bound to believe or disbelieve the entirety of a witness' testimony, but may choose to believe only certain portions of the testimony, *Altemose Construction Company v. NLRB*, 514 F.2d 8, 16 and n. 5 (3d Cir. 1975), and I give substantial weight to credibility findings that "rest explicitly on an evaluation of the demeanor of the witnesses," *NLRB v. Cutting, Inc.*, 701 F.2d 659, 663 (7th Cir. 1983).

(7)I do find, however, that the Hearing Officer's characterization of the HAC Managers' knowledge as "constructive" to be inapt. While it is an inconsequential semantic distinction in this case, the Hearing Officer should have determined on the basis of the record in this case that there was sufficient circumstantial evidence of "actual" knowledge, based upon a finding that it is more likely than not that the HAC Managers knew of Laul's protected conduct. *See Dean v. Houston Lighting & Power Co., supra.*

(8)It is true that the Hearing Officer found that "[i]n this case, Excalibur's senior management's opinions of the complainant were clearly affected in a number of ways by the evaluation of the HAC Managers." *IAD* at 89,054. However, this finding was simply an outgrowth of his preceding determination that Laul had carried his burden to show that his participation in the protected activity was a contributing factor to the adverse personnel decisions. *IAD* at 89,053-54.

Case No. VBA-0011

July 28, 2000

DECISION AND ORDER

OF THE DEPARTMENT OF ENERGY

Appeal

Names of Petitioner:Diane E. Meier

Date of Filing:January 11, 2000

Case Number: VBA-0011

On January 11, 2000, Diane E. Meier (Meier) filed a Notice of Appeal from an Initial Agency Decision by a Hearing Officer from the Office of Hearings and Appeals (OHA) of the Department of Energy (DOE). The Decision denied the relief which Meier seeks in her complaint against Lawrence Livermore National Laboratory (LLNL) under the DOE's Contractor Employee Protection Program, 10 C.F.R. Part 708. Diane E. Meier, 27 DOE ¶ 87,545 (1999) (Meier). In her Appeal, Meier challenges several aspects of the Initial Agency Decision and requests that her complaint be granted. As set forth in this decision, I have determined that Meier's Appeal must be denied.

I. Background

A. The DOE Contractor Employee Protection Program

The DOE's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste and abuse" at DOE's government-owned, contractor- operated facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purposes are to encourage contractor employees to disclose information that they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers. Contractors found to have discriminated against an employee for making such a disclosure, or for participating in a related proceeding, will be directed by DOE to provide relief to the complainant.

The regulations governing DOE's Contractor Employee Protection Program are set forth at 10 C.F.R. Part 708 and became effective on April 2, 1992. They establish administrative procedures for the processing of complaints. As initially formulated, these procedures typically included independent fact-finding by the DOE Office of Inspector General (IG), followed by the issuance of a Report of Inquiry setting forth the IG's findings and recommendations on the merits of the complaint. Thereafter, the complainant could request a hearing before an OHA Hearing Officer, who would render an Initial Agency Decision, from which an appeal could be taken to the Secretary of Energy or his designee.

On March 15, 1999, DOE amended Part 708, effective April 14, 1999, setting forth procedural revisions and substantive clarifications that "apply prospectively in any complaint proceeding pending on the effective date of this part." 10 C.F.R. § 708.8; see 64 Fed. Reg. 12,862 (March 15, 1999). Under the revised regulations, review of an Initial Agency Decision, as requested by Meier, is performed by the Director of OHA. 10 C.F.R. § 708.32.

B. Factual Background(1)

Meier was employed by LLNL beginning in September 1992 at LLNL's Washington Operations Office (WASHOP) located in Germantown, Maryland. In March 1994, Meier changed jobs and accepted a position working under Thomas Crites (Crites), who in early 1995 became an Associate Program Leader (APL) for Environmental Safety and Health (ES&H). (2) When Meier came under Crites supervision, Crites' wife, Linda Rahm-Crites (Rahm-Crites), worked as an employee performing technical editing and writing for a LLNL subcontractor at WASHOP. In early 1996, under a reorganization, Crites assumed the position as WASHOP APL in charge of general office management.(3)

However, in the Fall of 1997, the relationship between Meier and Crites began to change, when both took on new work assignments as a result of impending budget restrictions imposed by DOE and consequential changes in WASHOP's project priorities. WASHOP managers anticipated that in fiscal year 1998 (beginning October 1997), DOE would significantly cut defense program projects, previously a leading source of WASHOP funding. It appeared, however, that there would be ample funding for an emerging project administered by WASHOP, the Highly Enriched Uranium (HEU) Transparency Program (HEU Project). (4) From January 1996 until September 1997, the WASHOP project manager for the HEU Project was Joe Glazer (Glazer).

In August 1997, Meier completed a project assignment that had previously accounted for a major portion of her time, and Glazer appointed Meier as Training Coordinator for monitor training under the HEU Project. Although Crites, as APL, agreed to the assignment of Meier as Training Coordinator, he expressed reservations since the complainant had no previous training experience. Crites also had reservations about the handling of the HEU Project in general, since during this time frame he had received complaints from the DOE sponsors about Glazer's performance in administering the program. On August 25, 1997, a meeting was held to discuss a proposed HEU Project training plan prepared by a member of Glazer's staff (not Meier). During this meeting, attended by Crites, Meier, Glazer and Rahm-Crites, Crites was caustically critical of the training plan and suggested that his wife, Rahm-Crites, should perhaps rewrite it. Meier states that following the meeting, she telephoned Loquist to complain about Crites' behavior at the meeting as well as his attempt to insert his wife in the HEU Project. Meier asserts that she also expressed these concerns to Crites.

Continuing to be concerned with Glazer's performance, however, Crites decided in late September 1997 that he would assume the position as Program Manager of the HEU Project in place of Glazer, and relinquish his position as APL. Crites assigned his wife, Rahm-Crites, to be the editor of the quarterly report. Subsequently, Meier stated her concerns to Crites in a voice mail message that having Rahm-Crites working directly for him created an improper appearance to DOE sponsors and might cause problems for WASHOP. However, almost immediately after making the appointment, Crites recognized that due to LLNL policy, he could not have his wife working directly under him and consequently removed Rahm-Crites from the HEU Project.

Beginning in October 1997, Pete Prassinos (Prassinos) assumed the position of Acting APL, replacing Crites as manager and director of WASHOP. Following the removal of Rahm-Crites from the HEU Project, Prassinos became increasingly concerned that there was insufficient work to justify retaining Rahm-Crites as an employee in view of the diminishing work and budget available for other WASHOP projects. Prassinos discussed this matter with Meier, who continued to serve as Deputy APL, besides holding the position of HEU Project training coordinator. Prassinos also discussed the matter with WASHOP officials, and LLNL management officials at Livermore. (5) Based upon these discussions, Prassinos recommended that Rahm-Crites be released. LLNL management officials subsequently decided to terminate Rahm-Crites. Prassinos informed Rahm- Crites that she would be laid off effective November 26, 1997.

Meier maintained that once Crites became aware of the determination to terminate his wife, he became

distant and withdrawn in his relations with her and began take various retaliatory actions. First, Meier asserts that in October 1997, Crites informed her that her billable working hours on HEU Project training were being cut to half time. Meier further claimed that when she complained about this training cutback, Crites reminded her that he "had been" intending to recommend Meier as his replacement as APL. Meier states that she took this comment as a threat that Crites no longer intended to do so. In November 1997, Meier asserts that Crites became enraged over a minor disagreement concerning the graphics to be used on the cover of the HEU Annual Report. Specifically, Meier alleges that Crites yelled at her with his hands raised in clenched fists and stormed out of the office. According to Meier, Crites took these actions in retaliation against her because Crites held the complainant responsible for the termination of his wife. Meier maintained that on separate occasions in late 1997, she complained to Loquist and Chou about Crites' behavior.

Meier asserts that during January 1998, Crites continued to exert subtle pressure to undermine her position as HEU Project Training Coordinator. According to Meier, the most egregious example of this occurred on January 30, 1998, when Crites improperly issued an HEU training solicitation letter (training letter incident). At the time the letter was issued, Meier was away in Oak Ridge, Tennessee (Oak Ridge). The January 30, 1998, letter issued by Crites concerned proposed training on the use of specialized uranium testing equipment, referred to as NDA. Upon seeing the letter after returning from Oak Ridge, Meier felt strongly that Crites had transgressed proper procedures by not getting approval from Jamie Benton, the DOE employee responsible for oversight of HEU training, to proceed with the NDA training. Meier was also disturbed that Crites had not discussed the matter with her. According to Meier, Crites refused to discuss the training letter incident with her in private and she therefore confronted Crites with the matter on February 13, 1998, at the monthly HEU Project staff meeting held to discuss action items. Meier states that Crites again attempted to avoid discussing the NDA training letter, stating that it was not an appropriate agenda item for the staff meeting. The complainant states that when she refused to drop the matter, Crites became enraged and told Meier with a hostile expression on his face that he had not involved her in NDA training since she was not competent to conduct training in this technical area, whereupon the complainant left the meeting.

On February 17, 1998, Meier telephoned Strauch and emotionally voiced her concerns that Crites was out of control and destroying the HEU Project, citing the NDA training letter and their confrontation at the February 13, 1998, meeting as examples. The complainant further claimed that Crites was physically threatening to her and was retaliating against the complainant for her involvement in having Rahm-Crites terminated. The complainant insisted that Crites be removed from the HEU Project and warned Strauch that if Crites were not removed, she would go to the DOE Inspector General (IG). In response to this phone call, Livermore officials dispatched a crisis management team to ascertain the causes of the conflict in WASHOP and the legitimacy of Meier's charge that Crites had physically threatened her. The next day, on February 18, 1998, Meier had a private meeting with DOE sponsors overseeing the HEU Project, including Edward Mastel (Mastel), HEU Project Director. Mastel stated that during that meeting, the complainant expressed her discontent with how the HEU Project was being run by Crites, and stated the operational and staffing changes that she would make if she were placed in charge of the project.

The next day, on February 19, 1998, Meier participated in a conference call with LLNL management personnel including Chou and Strauch, in which she vociferously restated her charges against Crites, claiming that she feared for her personal safety. The complainant again threatened that she would go to the IG if Crites were not removed from the HEU Project. Strauch indicated that he would get back to Meier with his decision within a few days.

In the interim, on February 24, 1998, the crisis management team issued a written report of its findings with regard to Meier's allegations, based upon its interviews with employees including those present at the February 13, 1998 meeting. The crisis management team found no basis for the complainant's allegation of "physical threats" by Crites. The report stated that while staff members noted a change in Crites' behavior toward Meier, perhaps attributable to the termination of his wife, "[o]f greater concern to several interviewed is recent behavior by [Meier]" and "[s]everal indicated that they feel she is overreacting to

events and on the edge of losing control." On February 27, 1998, Strauch called Meier and informed her that she would be removed from the HEU Project because of "irreconcilable differences" with Crites. Subsequently, in a letter dated the same day, LLNL removed Meier from the HEU Project stating that: it did not find any significant basis to remove Crites in light of the fact that DOE believed that performance of the HEU Project was improving; Meier's interaction with the DOE sponsors was inappropriate; and Meier's approach conveying her demands to LLNL management that Crites be removed was also inappropriate. (6) At issue in this case are the allegations that Crites and LLNL each retaliated against Meier. Part 708 protects Meier against retaliation based on protected activities.

C. Procedural Background

Meier filed a complaint under Part 708 with the DOE's Office of Inspector General on April 22, 1998. Subsequently, this complaint was transferred to OHA which assigned an investigator to the complaint. The OHA investigator issued a Report of Investigation on June 14, 1999. The investigator found that Meier had arguably made protected disclosures under Part 708 and that there was sufficient temporal proximity between the disclosures and the retaliations alleged by Meier to permit the inference that the disclosures were a contributing factor to the alleged retaliations.

Meier then requested a hearing regarding her complaint.(7) The hearing was duly held, and the Hearing Officer rendered an Initial Agency Decision on December 22, 1999. In this Decision, the Hearing Officer found in favor of LLNL. The Hearing Officer found that Meier made protected disclosures in August and September 1997, when she expressed her concern to LLNL officials about Crites assigning Rahm-Crites, his wife, to perform work on the HEU project. However, the Hearing Officer also found that Meier's February 1998 disclosures to LLNL management officials demanding that Crites be removed from the HEU project were not protected disclosures. The Hearing Officer went on to find that the closeness in time between the August and September 1997 disclosures and the alleged acts of retaliation by Crites beginning in October 1997, and ending with Meier's removal by LLNL from the HEU project in February 1998, supported a finding that Meier's protected disclosures were a contributing factor to the alleged acts of retaliation.

The Hearing Officer then analyzed Meier's claims of retaliation. In his opinion, the Hearing Officer concluded that Meier had failed to prove that Crites had taken any retaliatory action against Meier. With regard to LLNL, the Hearing Officer closely examined the circumstances of Meier's removal and determined that LLNL's action in removing Meier from the HEU project in February 1998 was not in any way related to Meier's disclosures concerning Crites' wife. He also concluded that LLNL had shown clearly and convincingly that Meier's removal was justifiable.

After filing her Notice of Appeal, Meier filed a statement outlining the issues she sought the OHA Director to review. 10 C.F.R. § 708.33(a). LLNL filed a response to the Meier statement. Meier has identified two issues regarding the Hearing Officer's conclusions in his Decision. These two issues are discussed in Section II below.

II. Analysis

In her Statement of Issues, Meier raises two specific grounds for Appeal.(8) First, Meier argues that the Hearing Officer erred in finding that Meier's February 1998 statements, informing LLNL officials that if they did not remove Crites from the workplace she would have to file a complaint with the IG, were not protected disclosures. Second, Meier asserts that the Hearing Officer erred in concluding that LLNL would have taken the same personnel action against Meier absent Meier's protected disclosures. I will discuss these two arguments next. (9)

A. February 1998 Statements

Meier asserts that in her February 1998 conversations with LLNL management, she sought to inform LLNL management that she feared for her physical safety and that she could no longer work with Crites because of his various alleged acts of retaliation. In these conversations, she stated that if Crites were not removed from the workplace, she would have to report Crites' violation of the "near relative" policy and his subsequent retaliation to the IG. Meier argues that these disclosures should be considered a protected disclosure for Part 708 purposes. Meier asserts that her February 1998 statements complained about Crites' prior violation of the "near relative" policy and the alleged continuing retaliation she experienced as a result of her disclosures in August and September 1997 concerning his violation of the near-relative policy. Meier also points out that nothing in the language of 10 C.F.R. § 708.5 indicates that because she had previously pointed out Crites' violation of the "near relative" policy in August and September 1997, her disclosures in February 1998 would not also be protected. I need not address these arguments, since my review of the Hearing Officer's analysis reveals that it is flawed for the reasons discussed below.

In making the determination regarding the February 1998 disclosures, the Hearing Officer essentially concluded that these disclosures were not protected on the following grounds: (1) since Meier's intention was to coerce LLNL to replace Crites on the HEU Project, she could not have been attempting to reveal "reasonably and in good faith" an abuse of authority by Crites; and (2) the subject matters that were at the heart of the February 1998 disclosures, the training letter incident and the alleged physical threats by Crites, did not meet the regulatory criteria defining protected disclosures under Part 708.

The Hearing Officer's first rationale is not correct. I have recently held that in evaluating whether a person has made a disclosure in good faith, the person's motivations for making the disclosure are irrelevant. Beckham; see Howard W. Spaletta, 24 DOE ¶ 87,511 at 89,051 (1995) (Spaletta) (whether the Complainant was motivated to protect his reputation is irrelevant to the question whether the disclosures come within the ambit of Part 708 protection). Consequently, Meier's purpose in making the February 1998 communications could not be used as a criterion to determine if she had made the communication "in good faith" as that term is used in the Part 708 regulations. The Hearing Officer improperly used Meier's motivation in determining that the February 1998 disclosures were not protected under Part 708. (10)

Nevertheless, despite my finding that this aspect of the Hearing Officer's analysis regarding the February 1998 disclosures was erroneous, I find that this error is harmless since I find, as described below, that LLNL has met its evidentiary burden and has shown by clear and convincing evidence that it would have removed Meier from the HEU project in the absence of her protected disclosures.

B. Whether LLNL would have taken the same action toward Meier in the absence of the protected disclosures

As discussed above, I find that the only remaining act of retaliation at issue in this case is LLNL's removal of Meier from the HEU Project. Because Meier's protected disclosures were a contributing factor in her removal from the HEU Project, LLNL can avoid liability only if it shows clearly and convincingly that it would have removed Meier from the HEU Project in the absence of her protected disclosures. Three of the reasons cited by LLNL for its action were: (1) "irreconcilable differences" between Meier and Crites; (2) Meier's inappropriate conduct in lobbying DOE in an attempt to remove Crites; and (3) that in light of DOE's satisfaction with Crites' management of the HEU Project, there was no basis to remove Crites. See April 2, 1998 Complaint Exhibit 2, ¶ 42, and Exhibit 6 (February 27, 1998 memorandum from Strauch to Meier). (11)

Meier argues that the Hearing Officer erred in concluding that LLNL had demonstrated by clear and convincing evidence that it would have removed Meier from her position in the absence of her protected disclosures. Meier cites several OHA and federal court cases for the proposition that an employee cannot be subject to an adverse employment action for reasons rooted in her experience as a whistleblower. See Ronald Sorri, 23 DOE ¶ 87,503 at 89,015 (1993); Pogue v. Dept. of Labor, 940 F.2d 1287 (9th Cir 1991); Passic Valley Sewerage Comm'rs v. Dept. of Labor, 992 F.2d 474 (3rd Cir 1993); Mackowiak v.

University Nuclear Systems, Inc., 735 F.2d 1159 (9th Cir. 1984) (Mackowiak). In the present case, Meier argues that all of the conduct which LLNL cited in its decision to remove her from the HEU project arose in whole or in part from her protected disclosures in August and September 1997, Crites' subsequent alleged retaliation against her, and from her February 1998 disclosures. Consequently, she claims LLNL can not rely on these reasons to justify her removal from the HEU Project. Meier argues and has cited authority for the proposition that an employer bears the risk of liability if the legal and illegal motives for an adverse action cannot be separated. See Mackowiak. (12)

I disagree with Meier's claim. As I will discuss below, very compelling evidence points to the conclusion that the primary conduct by Meier leading to LLNL's action removing her from the HEU Project had absolutely nothing to do with her protected disclosures. Thus, contrary to Meier's contention, the conduct causing the termination did not arise from those disclosures. As such, there is simply no basis for Meier's assumption that LLNL's "legal and illegal" motives cannot be separated. LLNL's legitimate motives for terminating her clearly form a separate basis for action, and I agree with the Hearing Officer that the separate basis was clearly sufficient to result in her removal, aside from any other factor that may have contributed to the decision.

First, LLNL was concerned about the existence of "irreconcilable differences" between Meier and Crites. The prime example of this conflict, a dispute between the two over the drafting of a training letter, was rooted in a disagreement over Meier's competence to perform and deal with the technical, subject matter aspects of the training letter. Although Meier implicitly argues that Crites' dissatisfaction with her was merely a pretext masking a retaliatory animus, the record strongly indicates instead that Meier and Crites had a genuine disagreement on this point and that the disagreement was in no way related to Meier's protected disclosures. Meier's conduct in the face of this disagreement with her superior is what ultimately led LLNL to remove Meier from the HEU Project. The core of the "irreconcilable differences" between Crites and Meier, the training letter dispute, came to a head during the February 13 meeting between Crites and other staff members concerning the HEU Project. At this meeting, Meier would not let Crites discuss the HEU Project agenda items but continued to press him for an explanation for his actions in issuing the training letter. Tr. at 639-42. Testimony from one of the participants confirms Meier's disruptive, angry behavior at the meeting in which she would not let the meeting participants discuss the HEU agenda items despite pleas from at least one other staff member for Meier to stop. Tr. at 642 (Meier's words to the effect of "No, I want to talk about it now and I want to talk about it here.") After Crites gave in to Meier's request and informed her that he did not consult her regarding the training letter because she was "incompetent" with regard to the technical issues involved, Meier left the meeting. Tr. at 642. In contrast to Meier's behavior, Crites remained calm and did not appear to be angry. Tr. at 643. While there is evidence that Crites' management style could produce stress, it was Meier's differences with Crites, her supervisor, and her conduct at the February 13 meeting that were critical factors in LLNL's decision to remove her from the HEU Project.

The second reason supporting LLNL's action was Meier's attempt to engineer Crites' removal from the HEU Project by going behind the back of LLNL management directly to the DOE sponsor. At her request, Meier met with Mastel, DOE Project Director, on February 18, and informed him of her dissatisfaction as to how the HEU project office was being run and offered her own suggestions as to personnel and operational changes that might be made if she were placed in charge. Tr. at 201-02. The DOE sponsor, Mastel, testified that Meier "was trying to get our support to put her into a position as the project manager . . ." Tr. at 210. Mastel's testimony is supported by Glazier's testimony that in mid-February 1998 Meier had told him that "she was going to take over, you know, the position that Tom [Crites] held, head of the office" and "she [Meier] was going to put me back down as program manager." Tr. at 292. Thus, Meier's communication with the DOE Sponsor was an attempt to obtain DOE support to replace Crites with herself. Additionally, there is no evidence that Meier's attempt to lobby DOE to replace Crites with herself was part of an attempt to communicate her protected disclosures.(13) Not surprisingly, Meier's attempt to circumvent LLNL management alarmed LLNL, and was so contrary to LLNL's position on how the HEU Project should be operated that it was insubordinate. In my view, these actions were entirely motivated by self-interest and would certainly have then resulted in Meier's removal from the HEU Project regardless

of her protected disclosures.

Lastly, DOE was clearly satisfied with Crites' performance. Mastel, the DOE sponsor, testified that "in terms of milestones being met and reported against, we saw marked improvement since [Crites] came on board and was doing the work." Tr. at 211. DOE's perception that Crites was doing a satisfactory job on the HEU Project was unaffected by Meier's disclosures. Meier's direct challenge to Crites' authority was a matter to where LLNL had to respond, and respond quickly.

Thus, given DOE's satisfaction with Crites' job performance, Meier's handling of the conflict with Crites, and Meier's attempt to circumvent LLNL management by talking to the DOE sponsor in order to get Crites' job, I find that LLNL has demonstrated by clear and convincing evidence that it would have removed Meier from the HEU Project in the absence of her protected disclosures. (14) Further, none of these reasons resulted from Meier's protected disclosures.

In sum, I find that the Hearing Officer erroneously determined that Meier's February 1988 communications were not a protected disclosure but that he correctly held that LLNL had shown by clear and convincing evidence that it would have removed Meier in the absence of her protected disclosures. Consequently, the Meier Appeal should be denied.

It Is Therefore Ordered That:

(1) The Appeal filed by Dianne E. Meier, on January 11, 2000, of the Initial Agency Decision issued on December 22, 1999 (Case No. VBA-0011), is hereby denied.

(2) This Appeal Decision shall become a Final Agency Decision unless a party files a petition for Secretarial review with the Office of Hearings and Appeals within 30 days after receiving this decision. 10 C.F.R. § 708.35.

George B. Breznay

Director

Office of Hearings and Appeals

Date: July 28, 2000

(1)The Factual background is taken from the Hearing Officer's Decision in Meier.

(2)In the fall of 1995, Meier assumed the position of Deputy APL under Crites.

(3)LLNL management at Livermore was aware of the potential conflict of interest associated with Rahm-Crites working under her husband, Crites, and was concerned that this arrangement under the reorganization might constitute a violation of LLNL's "near relative" policy. This policy, as described in LLNL's Personnel Policies and Procedures Manual, prohibits employees from working under the supervision of near relatives. During 1996, an administrator responsible for WASHOP staffing matters, Shirley Loquist (Loquist), examined this matter and determined that there was no violation since Rahm-Crites was not supervised by Crites, and he was not responsible for her assignments, salary or appraisal.

(4)Under the HEU Project, DOE provides assistance to Russia in accounting for and disposing of highly enriched uranium. As part of the program, the United States sends individuals acting as monitors to Russia to ensure that highly enriched uranium from nuclear weapons is properly down-blended. Part of WASHOP's mission for DOE under the HEU Project is to design and conduct the training of these monitors.

(5)Among the LLNL management officials Prassinos discussed Rahm-Crites' future employment with

were Loquist, Mark Strauch (Strauch), LLNL's Fission Energy Systems and Safety Program (FESSP) Program Leader, and C.K. Chou (Chou), LLNL Associate Director in charge of FESSP. WASHOP was a satellite office of FESSP.

(6)Meier never returned to work at WASHOP, but went on medical disability leave, apparently on the basis that her workplace experiences had exacerbated a mental condition that prevented her from working. After a year's time, LLNL requested medical documentation of Meier's work restriction, which she refused to provide. Therefore, in a letter to Meier dated June 18, 1999, LLNL separated her from employment based upon Meier's inability to perform the essential functions of her position.

(7)During the pendency of the hearing, the new "whistleblower" regulations took effect. The Hearing Officer relied on the revised regulations in handling this proceeding, citing the new regulatory provisions in his Initial Agency Decision.

(8)Although an issue not expressly raised by Meier on appeal, I must comment on the Hearing Officer's analysis methodology regarding Meier's complaint. After the Hearing Officer determined that Meier made disclosures protected by Part 708, he then should have determined whether Meier had established by a preponderance of the evidence that Crites' or LLNL's alleged retaliatory acts in fact had occurred and whether the disclosures were a contributing factor in LLNL's decision to remove her from the HEU Project. In the Decision, the Hearing Officer did not expressly make any findings regarding whether Crites' alleged reprisals had in fact occurred until he analyzed LLNL's defense asserting that it would have removed Meier regardless of her disclosures. I have reviewed each of the Hearing Officer's findings regarding Crites' alleged retaliatory actions against Meier and I affirm the Hearing Officer's conclusion that the portion of Meier's complaint concerning Crites' alleged retaliatory acts should be dismissed. Specifically, with regard to all of Crites' alleged retaliatory acts except one, Meier failed to present sufficient evidence to establish that the alleged retaliatory act occurred. As to the remaining alleged retaliatory act- reducing Meier's billable training hours - I conclude that her August and September 1997 disclosures were not a factor contributing to her reduction in hours. Thus, the only remaining act of alleged retaliation at issue in this Appeal is LLNL's removal of Meier.

(9)The Hearing Officer cited the pre-revision Part 708 regulations in his Decision but in his analysis regarding the February 1998 disclosures made a finding apparently using the current Part 708 regulations. See Meier at 89,231-32 ("I find nothing to indicate that Meier was attempting to reveal, reasonably and in good faith, an ?abuse of authority' by Crites in February 1998."). The pre-revision regulations do not include a requirement that the disclosure be "reasonable"; instead they only require that the disclosure be in "good faith." See Rosie L. Beckham, 27 DOE ¶ 87,557 (2000) (Beckham). The use of the revised regulations in this respect could cause prejudice to Meier since those regulations interpose a required element of reasonableness for a disclosure to be protected that arguably did not exist at the time she made her disclosures. See Beckham. Accordingly, in evaluating Meier's Appeal, I will use the regulations that existed at the time she communicated her concerns.

(10)Additionally, the Hearing Officer's erred in with respect to his second rationale for finding that the February 1998 disclosures were not protected. The Hearing Officer, after evaluating the factual circumstances surrounding the training letter issue, determined that Crites' actions did not constitute an "abuse of authority" or "mismanagement." The Hearing Officer also found that there was no evidence in the record to substantiate Meier's claims that Crites physically threatened her. However, for purposes of Part 708, it does not matter whether the information a putative whistleblower disclosed is ultimately factually substantiated. See Beckham; Thomas T. Tiller, 27 DOE ¶ 87,504 (1998), affirmed, Thomas T. Tiller v. Wackenhut Services, Inc., 27 DOE ¶ 87,509 (1999); see also Spaletta, 24 DOE at 89,051 (good faith clause is intended to relieve complainants of the burden of proving that their allegations are correct or accurate). Rather, the focus must be on the belief of the individual providing the information. In this case, the inquiry must focus on whether Meier had a good faith belief that Crites was violating a "law, rule or regulation" or was responsible for mismanagement. See 10 C.F.R. § 708.5(a)(i), (iii) (1992). The essential subject matter of Meier's February 1998 disclosures - Crites' handling of the training letter issue

and Meier's complaints that Crites physically threatened her - concern potential mismanagement as well as a potential violation of a "law, rule or regulation." Thus, if Meier had a good faith belief concerning her February 1998 disclosures, they are protected under the Part 708 regulation existing at the time of her disclosure.

(11)Because I find that LLNL has presented clear and convincing evidence that it would have removed Meier from the HEU Project based upon the three reasons discussed infra, I express no opinion as to the merit of the fourth reason LLNL cited in removing Meier, the inappropriateness of Meier's threat to LLNL management that either it remove Crites or she would go to the IG.

(12)LLNL argues that removing Meier from the HEU Project can not be considered an adverse personnel action under Part 708. However, I need not address this argument in light of my finding that LLNL would have removed Meier from the HEU project even in the absence of her protected disclosures.

(13)Mastel testified that he could not specifically recall Meier mentioning any personal difficulties with Crites. Tr. at 211-12.

(14)It should be noted that LLNL only removed Meier from the project and did not fire her from her position. The amount of justification required to establish that an employer would have removed a person from a project, protected disclosures notwithstanding, is less that the justification needed to demonstrate that an employer would have discharged an employee regardless of protected disclosures.

Case No. VBA-0021

June 27, 2000

DECISION AND ORDER

OF THE DEPARTMENT OF ENERGY

Appeal

Name of Petitioner: Eugene J. Dreger

Date of Filing: February 28, 2000

Case Number: VBA-0021

On February 28, 2000, Mr. Eugene J. Dreger (hereinafter referred to as the Appellant) filed a Notice of Appeal from an Initial Agency Decision by a Hearing Officer from the Office of Hearings and Appeals (OHA) of the Department of Energy (DOE).(1) In the Initial Agency Decision, the Hearing Officer determined that the complainant has failed to establish the existence of a violation for which he may be accorded relief under DOE's Contractor Employee Protection Program, codified at Part 708 of Title 10 of the Code of Federal Regulations. 10 CFR Part 708. The Hearing Officer found that the Appellant made protected disclosures, as they are defined in Part 708, and that such disclosures were sufficiently close in time to his termination and to other personnel actions adverse to him to be considered contributing factors to those actions. Nevertheless, the Hearing Officer also found that the evidence clearly and convincingly establishes that the Appellant's employer would have taken those actions in the absence of those protected disclosures. As a result of these findings, the Hearing Officer denied relief to the Appellant. *Eugene J. Dreger*, 27 DOE ¶ 87,549, http://www.oha.doe.gov/cases/whistle/vbh0021.htm (2000) (hereinafter cited as *Dreger*).

The Department of Energy's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[ ] fraud, mismanagement, waste, and abuse" at DOE's government-owned, contractor-operated (GOCO) facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purpose is to encourage contractor employees to disclose information that they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from reprisals by their employers. The regulations provide, in pertinent part, that a DOE contractor may not take any adverse action, such as discharge, demotion, coercion or threat, against any employee because that employee has "[d]isclosed to an official of DOE, to a member of Congress, or to the contractor (including any higher tier contractor), information that the employee in good faith believes evidences [a] violation of any law, rule, or regulation [or] a substantial and specific danger to employees or public health or safety." 10 C.F.R. § 708.5(a)(1); *see also Francis M. O'Laughlin*, 24 DOE ¶ 87,505 (1994).

In the present case, Appellant worked as a safety inspector for Reynolds Electrical & Engineering Co., Inc. (REECO) at the Nevada Test Site outside of Las Vegas, Nevada, from 1990 to 1994. At the time, REECO was the management and operating contractor there. In September 1994, Appellant was terminated for poor job performance. Appellant alleges that REECO retaliated against him for raising safety concerns in the course of his routine job duties. As remedies, Appellant seeks to be rehired, to have his performance appraisals corrected, to be awarded back pay and Social Security credits, and to be compensated for emotional stress.

After extensive document submission, a hearing was held on November 15, 1999, at which 12 witnesses testified. As noted above, the Hearing Officer agreed with Appellant and found that he had made protected disclosures that, because of proximity of time, were contributing factors to personnel actions including his termination. However, the Hearing Officer also found that the contractor(2) had shown by clear and convincing evidence that REECO would have taken the termination action it took even in the absence of the protected disclosures. Thus, the Hearing Officer concluded that no relief was appropriate.

In concluding that the contractor had shown by clear and convincing evidence that there was no retaliation when it terminated Appellant, the Hearing Officer found all of Appellant's performance evaluations for 1992 through 1994 referred to three deficiencies. First, his supervisors pointed out that Appellant had never mastered the computer skills that he needed to complete reports and to use the deficiency tracking system. They noted the poor quality of his written reports. In this regard, the Hearing Officer found after a lengthy review that his reports were not always understandable because his written communication skills were poor. Second, the Hearing Officer found that the testimony at the hearing supported the statements in the performance evaluations that Appellant applied standards in an inconsistent manner. Third, the Hearing Officer found that the testimony also supported the statements in the performance evaluations that Appellant's "communications skills, overall judgment and behavior towards employees at the worksite fell short of normal expectations." *Dreger* at 89,255.

In light of continuing difficulties with Appellant, the contractor implemented a performance improvement plan, a vehicle that it had used before and that is a fairly standard procedure in large organizations. The Hearing Officer found that testimony at the hearing demonstrated that the contractor performed the reporting and monitoring functions required by the plan in a careful and serious manner, but that Appellant did not fully appreciate the situation:

Dreger never thought the PIP was worth more than a moment of his time. He never mentioned it in his original whistleblower complaint, and he hardly addressed it at all in his questioning and arguments at the hearing I conducted. In fact, he never presented a serious discussion of it. At one point he called the 62-day evaluation period a "sham," "since they are out to terminate me." November 5 Letter at 42. He continues "they could not assist me since my experiences are beyond theirs." *Id.*

Dreger at 89,256-57. Despite Appellant's contention that the performance evaluation process was a sham, the Hearing Officer concluded that Appellant's work-related deficiencies caused the contractor's adverse actions, including Appellant's termination. *Dreger* at 89,257.

Thus, the Hearing Officer found that the contractor had shown by clear and convincing evidence that it treated Appellant like similarly situated employees and that Appellant's work performance deficiencies, including inadequate computer skills, poor communications and interpersonal relations problems, and inconsistency in application of safety standards, constituted valid reasons for the adverse actions taken by the contractor. Accordingly, the Hearing Officer denied relief to Appellant. *Dreger* at 89,258-59.

In his appeal, Appellant challenges each of the findings that the Hearing Officer made. After a brief personal attack on one witness, he has submitted 21 pages of what appear to be his notes reflecting comments on the testimony at the November 15, 1999 hearing. The filing is generally organized by name of the individual testifying together with what appear to be transcript page and line references. However, it is not organized in any systematic way to address the findings and conclusions that the Hearing Officer made. Comments on testimony range from a fragment of a sentence to 15 pages of critique of the testimony of Frank Spenia, Appellant's former supervisor. In general, Appellant argues that Mr. Spenia and Steve Jones, Mr. Spenia's supervisor, testified untruthfully at the hearing.

As noted above, the contractor claims that the adverse personnel actions it took against Appellant were caused by three performance deficiencies: (1) lack of mastery of necessary computer skills, (2) poor written communications skills and inconsistent application of safety standards, and (3) poor communication skills with employees at the work sites he inspected. In response to his former supervisor's

testimony that Appellant had more trouble than other inspectors learning to use a new computer-based tracking system, Appellant claims:

Another ridicule. What does Frank Spenia, Steve Jones know about "having more trouble adjusting." I have been in two wars, and retired from the Naval Reserves; and both of them claim to state I have trouble adjusting. . . . I have been in combat action, most a dozen times that I can remember, and I am considered to be cool & conservative. Their accusations are demeaning when evaluating me. Many in their respective offices lost respect in them both; how long will it take for management to realize their blunder. Is my message loud and clear?

Appeal at 12-13. The above excerpt is typical of the comments in the Appeal. I have reviewed them carefully, and conclude that there is no evidence in the record that would support Appellant's assertions or form the basis for concluding that Appellant did not have serious deficiencies in using the computer-based systems.

The Hearing Officer also found that the evidence supported the contractor's claim that Appellant had poor communications and interrelation skills. In this regard, his supervisors testified, and the Hearing Officer found, that contractor employees who were responsible for making corrections complained that they could not understand the reports that Appellant wrote. There was also testimony that Appellant antagonized line employees, not by finding safety violations (which was his job responsibility), but by the manner in which he went about his inspections.

Appellant also maintains that he was not inconsistent in applying safety codes to work situations that he inspected. In his appeal, Appellant maintains that people had trouble understanding his reports because "some can't read correctly, and some are not capable to understand." Appeal at 11. However, there is no evidence in the record, either written evidence or testimony at the hearing, which would support Appellant's position. He also claims that he and the other three inspectors had to teach his supervisor the safety codes that they applied because "he had no idea what we were doing and why they were applied." Appeal at 9.

It is well settled that factual findings are subject to being overturned only if they can be deemed to be clearly erroneous, giving due regard to the trier of fact to judge the credibility of witnesses. *Oglesbee v. Westinghouse Hanford Co.*, 25 DOE ¶ 87,501, 89,001 (1995); *O'Laughlin v. Boeing Petroleum Services, Inc.*, 24 DOE ¶ 87,513, 89,064 (1995). *Compare Pullman Standard v. Swint*, 456 U.S. 273 (1982), with *Amadeo v. Zant*, 486 U.S. 214, 223 (1988) (quoting Federal Rule of Civil Procedure 52(a)).

In the present case, the Hearing Officer's findings are not clearly erroneous. In fact, there is substantial evidence in the record that Appellant had considerable problems with the computer-based tracking program that the contractor maintained. Indeed, other than his statements that his computer skills were superior, Appellant did not provide any evidence on that issue. There is substantial evidence that the quality of his written reports was poor and that there were complaints that the Appellant's inspections did not apply the same standards consistently. My review of the Appeal as well as the record confirms that Appellant's written submissions are inarticulate and difficult to understand. Finally, there is substantial evidence in the record that employees complained about the manner in which Appellant conducted inspections and the way he treated them. For these reasons, all of the findings of the Hearing Officer are supported by substantial evidence and are not clearly erroneous. The appeal that Mr. Dreger filed must therefore be denied.

It Is Therefore Ordered That:

(1)The Appeal filed by Eugene J. Dreger on February 28, 2000, of the Initial Agency Decision issued on February 7, 2000 (Case No. VBH-0021) is hereby denied. Accordingly, as determined in the Initial Agency Decision, the complaint filed by Eugene J. Dreger on February 28, 1995, under the Contractor Employee Protection Program, 10 C.F.R. Part 708, is denied.

(2) This Appeal Decision shall become a Final Agency Decision unless a party files a petition for Secretarial review with the Office of Hearings and Appeals within 30 days after receiving this decision.

Roger Klurfeld

Assistant Director

Office of Hearings and Appeals

Date: une 27, 2000

(1) The Director of the Office of Hearings and Appeals served as the Hearing Officer in this matter. As a result, when Mr. Dreger filed an appeal, the OHA Director recused himself and delegated to me the authority to act as the OHA Director in deciding this appeal.

(2) Beginning January 1, 1996, Bechtel Nevada, Inc. assumed general responsibility for the Nevada Test Site, and it has also assumed responsibility for litigation relating to the prior period, including defending this action.

Case No. VBA-0032

November 26, 1999

DECISION AND ORDER OF

THE DEPARTMENT OF ENERGY

Appeal

Name of Petitioner: Roger H. Hardwick

Date of Filing: July 26, 1999

Case Number: VBA-0032

This Decision considers an Appeal of an Initial Agency Decision issued on July 6, 1999, on a complaint filed by Roger H. Hardwick (Hardwick or the complainant) under the Department of Energy (DOE) Contractor Employee Protection Program, 10 C.F.R. Part 708. In his complaint, Hardwick seeks compensation for alleged retaliatory actions taken against him by Science Applications International Corporation (SAIC), a DOE contractor, and by KenRob and Associates, Inc. (KenRob), his former employer under a subcontract with SAIC, as a result of making an alleged protected disclosure to DOE. In the Initial Agency Decision, however, the Hearing Officer determined that the complainant had failed to show that the matters he relayed to DOE constituted a protected disclosure under Part 708. As set forth in this decision, I have determined that Hardwick's Appeal must be denied.

I. Background

A. The DOE Contractor Employee Protection Program

The Department of Energy's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste and abuse" at DOE's Government-owned or -leased facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purpose is to encourage contractor employees to disclose information which they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers. Thus, contractors found to have discriminated against an employee for such a disclosure, or participating in related proceeding, will be directed by the DOE to provide relief to the complainant.

The DOE Contractor Employee Protection Program regulations, which are codified as Part 708 of Title 10 of the Code of Federal Regulations and became effective on April 2,

1992, establish administrative procedures for the processing of complaints. As initially formulated, these procedures typically included independent fact-finding by the DOE Office of Inspector General (IG), followed by the issuance of a Report of Inquiry setting forth the IG's findings and recommendations on the merits of the complaint. Thereafter, the complainant may request a hearing before a Hearing Officer assigned by the DOE Office of Hearings and Appeals (OHA), pursuant to which the Hearing Officer renders an Initial Agency Decision.

On March 15, 1999, DOE issued an amended Part 708, effective April 14, 1999, setting forth procedural

revisions and substantive clarifications that "apply prospectively in any complaint proceeding pending on the effective date of this part." 10 C.F.R. § 708.8; *see* 64 Fed. Reg. 12,862 (March 15, 1999). Certain of these amendments have bearing upon the present proceeding. Under the revised regulations, review of an Initial Agency Decision, as requested by Hardwick in the present Appeal, is performed by the OHA Director. 10 C.F.R. § 708.32.

B. Complaint Proceeding

The present case was initiated by the filing of a complaint by Hardwick on December 23, 1994. The factual allegations set forth in Hardwick's complaint, described below, are essentially uncontroverted.

In January 1992, the complainant was employed by KenRob as Telecommunications Manager at the firm's office in Las Vegas, Nevada. In this capacity, Hardwick's mission was to develop a base for new business in the western United States, with a primary emphasis on telecommunications and computer technical support services.

During 1993, SAIC was the prime contractor with the DOE for a Technical and Management Support Services Contract for the Yucca Mountain Site Characterization Project (YMP). Under this contract SAIC was required to perform a wide range of scientific, technical management and administrative support services, including provision of computer support services to both DOE's Las Vegas Office, and DOE's Yucca Mountain Site office, located about 100 miles from the Las Vegas office. On December 6, 1993, SAIC awarded a contract to KenRob, which was staffed solely by Hardwick. Hardwick was named as telecommunications specialist, and his role was to provide computer support services (also referred to as information technology or IT) at the Yucca Mountain Site Office (YMSO). The performance period for this contract was from December 6, 1993, through March 31, 1994.

In January 1994, Hardwick met with John Gandi, DOE Team Leader for Information Resources Management at the Yucca Mountain office and offered his view that improvements in IT support at the YMSO were necessary. Hardwick prepared a draft letter outlining his concerns, and presented the draft to Winfred Wilson, then DOE site manager of the YMSO.

Mr. Wilson adopted Hardwick's draft virtually without change, structured it as a memo from himself to Mr. Gandi, and sent it to Mr. Gandi. The memorandum as drafted seemed to indicate that Mr. Gandi should consider improvements in providing IT support to the YMSO. Copies of the memorandum, which was dated January 18, 1994, were sent to five SAIC employees and three DOE employees, who were located at the Yucca Mountain Site. Approximately two weeks later, Harold Brocklesby, a SAIC manager who received a copy of the memo, told Hardwick that his duties under the SAIC subcontract were over. On May 23, 1994, KenRob was awarded a contract by the DOE's Office of Civilian Radioactive Waste Management (OCRWM) to provide communications network and computer facilities support at Las Vegas, Nevada and Washington, D.C. locations. Hardwick was not offered any position under that contract. On July 13, 1994, KenRob issued a letter to Hardwick advising him that his employment would be terminated in 30 days. His employment was terminated on August 12, 1994.

Following its investigation of the matters described in the complaint, the IG issued a Report of Inquiry and Recommendations on February 19, 1999 (IG Report). The IG Report found that Hardwick made a protected disclosure under 10 C.F.R. Part 708, and that the disclosure was a contributing factor to his removal from the SAIC contract and not being appointed to any position under the OCRWM contract. The IG Report further found that SAIC and KenRob failed to provide clear and convincing evidence that these personnel actions would have been taken in the absence of the protected disclosure.

On March 3, 1999, KenRob submitted a request for a hearing under 10 C.F.R. § 708.9, that was transmitted to OHA on March 8, 1999, at which time a Hearing Officer was appointed by the OHA Director. Following the resolution of various procedural motions, the Hearing Officer convened a hearing in the case on June 8, 1999. However, the Hearing Officer terminated the hearing after all evidence

concerning the nature of Hardwick's disclosure had been received.(1) As subsequently explained in the Initial Agency Decision issued on July 6, 1999, the Hearing Officer determined at an early stage of the hearing that Hardwick had failed to show by a preponderance of the evidence that the disclosure he made during a January 1994 meeting with Mr. Gandi, and later described in the January 18, 1994 memorandum, was protected under 10 C.F.R. Part 708.

The Initial Agency Decision points out that the Contractor Employee Protection Program of Part 708 does not provide protection to employees for every disclosure, but enumerates the specific types of disclosures for which employment retaliation is prohibited. Generally, protected disclosures are those which reveal information concerning gross waste, fraud, abuse, gross mismanagement, substantial violations of law and substantial dangers to employees or to public health and safety. 10 C.F.R. § 708.5. Given the facts of the present case, the Hearing Officer concluded that the matters disclosed by Hardwick in the January 18, 1994 memorandum did not fall within the scope of these types of protected disclosures. Hardwick claimed that his memorandum sets forth protected disclosures relating to gross waste, fraud, abuse and mismanagement on the part of SAIC. The Hearing Officer found, however, that despite these general claims, Hardwick had failed to state with specificity or adequately explain how SAIC's failure to provide what he believed to be the correct level of technical support at YMSO constituted gross waste, fraud, abuse or mismanagement.

Particularly with regard to his purported disclosure of mismanagement,(2) Hardwick argued that he needs only to show that there was "mismanagement," and not "gross mismanagement," as stated in the revised Part 708 regulations effective April 14, 1999. 10 C.F.R. § 708.5(a)(3). The Hearing Officer rejected this contention, however, observing that the insertion of the word "gross" in the regulation was merely a clarification and by doing so, the agency was not adopting a more stringent standard of "mismanagement" to invoke regulatory protection. As pointed out by the agency in the Notice of Proposed Rulemaking, "the criterion of ?gross' mismanagement is consistent with the provisions of the Whistleblower Protection Act of 1989 (5 U.S.C. 2302(b)(8))." 63 Fed. Reg. 733, 734 (January 5, 1998). Furthermore, under established case law preexisting the revision, a disclosure of mismanagement has been required to involve serious matters to receive protection under Part 708, and not just disagreements between managers and employees. *Holsinger v. K-Ray, Inc.*, 26 DOE ¶ 87,506 (1996); *Mehta v. Universities Research Assoc.*, 24 DOE ¶ 87,514 (1995) (*Mehta*). Thus, the Hearing Officer ultimately determined in the Initial Agency Decision that the matters raised by Hardwick in the January 18, 1994 memorandum did not rise to a disclosure of mismanagement within the purview of Part 708. The Initial Agency Decision explains:

Mismanagement does not include a difference of opinion on decisions that are debatable. The mismanagement that is covered by Part 708 involves action or inaction that creates a substantial risk of significant adverse impact upon the agency's ability to accomplish its mission. *See Carolyn v. Dep't of the Interior*, 63 M.S.P.B. 684 (1994). The Complainant here cannot, through broad, speculative and unsupported assertions about possible ill-effects of limited IT services, bootstrap his discussion regarding IT improvements into a protected disclosure of serious mismanagement.

Initial Agency Decision at 19-20.

In accordance with section 708.32(a), Hardwick filed a Notice of Appeal of the Initial Agency Decision on July 26, 1999, followed by a Statement of Appeal (Hardwick Appeal) on September 8, 1999. On October 12, 1999, KenRob and SAIC filed their respective Responses to the Hardwick Appeal. 10 C.F.R. § 708.33(a).

II. Analysis

Proceedings under 10 C.F.R. Part 708 are intended to offer employees of DOE contractors a mechanism for resolution of whistleblower complaints by establishing procedures for independent fact-finding and a hearing before an OHA Hearing Officer, followed by an opportunity for review by the OHA Director. *See David Ramirez*, 23 DOE ¶ 87,505 (1994). The regulations provide, in pertinent part, that a DOE contractor

may not take any adverse action, such as discharge, demotion, coercion or threat, against any employee for "[d]isclosing to a DOE official . . . information that [the employee] reasonably and in good faith believe[s] reveals -- (3) Fraud, gross mismanagement, gross waste of funds, or abuse of authority." 10 C.F.R. § 708.5(a)(3). However, the regulations clearly place the initial burden upon the complainant: "The employee who files a complaint has the burden of establishing by a preponderance of the evidence that he or she made a disclosure . . . ." 10 C.F.R. § 708.29; *see Ronald Sorri*, 23 DOE ¶ 87,503 (1993). "Preponderance of the evidence" is proof sufficient to persuade the finder of fact that a proposition is more likely true than not true when weighed against the evidence opposed to it. *See Hopkins v. Price Waterhouse*, 737 F. Supp. 1202, 1206 (D.D.C. 1990) (*Hopkins*); 2 McCormick on Evidence § 339 at 439 (4th Ed. 1992). As a result, the complainant has the burden of proving by evidence sufficient to "tilt the scales" in his favor that he made a disclosure protected under Part 708. If the complainant does not meet this threshold burden, he has failed to make a *prima facie* case and his claim must therefore be denied.

A. Hardwick Appeal

In his appeal, Hardwick raises a number of contentions in support of his position that the determination reached in the Initial Agency Decision is incorrect as a matter of fact and law. Hardwick argues: (1) the Hearing Officer's conclusion that Hardwick did not reasonably believe that he was making a protected disclosure is contrary to the IG Report; (2) the Hearing Officer failed to understand the true nature of Hardwick's disclosure; (3) the seriousness of Hardwick's disclosures is verified by Mr. Gandi's response to the January 18, 1994 memorandum; (4) Mr. Gandi's plan to have Hardwick write a letter for Mr. Wilson's signature demonstrates that Hardwick's disclosures identified serious mismanagement; (5) Mr. Gandi's response to Hardwick's disclosures was muted due to personal relationships existing between senior DOE officials and SAIC management. These contentions are addressed successively below.

In support of his Appeal, Hardwick initially points to the IG's finding in its report of investigation that Hardwick "disclosed to a DOE official issues regarding the coordination and communication of SAIC Information Services staff located in Las Vegas and [IT] support staff at the Yucca Mountain Site Office." IG Report at 7. I note, however, that although the IG Report found that Hardwick made a protected disclosure, it does not specifically state or even examine specifically what type of protected disclosure Hardwick is deemed to have made. In any event, the Part 708 regulations provides that in making findings in support of Initial Agency Decision, "the Hearing Officer may rely upon, but is not bound by, the report of investigation." 10 C.F.R. § 708.30(c). Thus, the fact that after a more detailed examination of the issues, the Hearing Officer ultimately reached a different determination than the IG Report does not mean that the Initial Agency Decision is defective.

Turning to the alleged protected disclosure of gross mismanagement, Hardwick argues that "[c]ontrary to the Hearing Officer's decision, [the January 18, 1994 memorandum] clearly identified serious mismanagement in the operation of SAIC's contract to provide [IT] services at the Yucca Mountain Site Office field operations." Hardwick Appeal at 2-3. Borrowing phrases used in the memorandum, Hardwick asserts that "coordination and communication," "significant degradation of service," and "lack of documentation and policies and procedures" are not *de minimis* disclosures. Hardwick further argues that these disclosures must be considered significant and serious in view of the critical importance of the Yucca Mountain project, undertaken as a future depository for high-level nuclear waste, and "having a viable, functional and competent computer network at the project site . . . was essential to the operation." Hardwick Appeal at 3. Nonetheless, having examined the January 18, 1994 memorandum and related record, I must uphold the determination reached in the Initial Agency Decision.

As stated by the DOE Deputy Secretary in considering an analogous complaint, "[e]quating a particular type of disagreement to ?mismanagement' as contemplated by the ?whistleblower' regulation demands a careful balancing lest the term encompass all disagreements between contractor and its employees." *Mehta v. Universities Research Association*, 24 DOE ¶ 87,514 at 89,065 (1995) (complaint dismissed on jurisdictional grounds). In the present case, I believe that when balanced in context, the matters relayed by Hardwick did not constitute a disclosure of mismanagement contemplated for protection under Part 708.

For instance, in *Smith v. Dep't of Army*, Dkt. PH-1221-97-0447-W-1 (November 24, 1998) (*Smith*), the Merit Systems Protection Board (MSPB), considered a whistleblower claim based upon a purported disclosure of mismanagement and reaffirmed the legal principles relied upon by the Hearing Officer in the Initial Agency Decision. In rejecting the whistleblower claim in *Smith*, the MSPB stated:

"Gross mismanagement" is more than de minimis wrongdoing or negligence. *Embree v. Department of Treasury*, 70 M.S.P.R. 79, 85 (1996). It does not include management decisions that are merely debatable, nor does it mean action or inaction which constitutes simple negligence or wrongdoing. *Id.* There must be an element of blatancy. Therefore gross mismanagement means a management action or inaction that creates a substantial risk of significant adverse impact upon the agency's ability to accomplish its mission. *Id.*

Slip op. at 2; *see also Carolyn v. Dep't of the Interior*, 63 M.S.P.B. 684 (1994). Having reviewed the January 18, 1994 memorandum in detail, I find no direct or indirect charge of mismanagement with regard to SAIC's provision of IT support, but only an itemization of concerns concluding that "if we deal with these issues now it will make growth easier." Hardwick Appeal, Exhibit 4 at 2. Assuming there were adequate funds available to address the problems, it might be argued on the basis of the memorandum that SAIC management had been somewhat negligent with regard to IT support at the YMP. However, as clarified by *Smith*, simple negligence does not amount to mismanagement or nearly begin to approach the threshold "element of blatancy" inherent in a disclosure of gross mismanagement, protected under Part 708. Hardwick maintains that the matters discussed in the memorandum, *e.g.* "coordination and communication," are serious and not *de minimis*. Hardwick has missed the point. That the memorandum discusses serious matters does not mean that the memorandum revealed serious mismanagement with regard to those matters.

We find equally unavailing Hardwick's next contention that the seriousness of his disclosures is demonstrated by Mr. Gandi's May 17, 1994 memorandum to Mr. Wilson (Hardwick Appeal, Exh. 5), which Hardwick claims was in response to the January 18, 1994 memorandum. The May 17, 1994 memorandum details a number of completed and proposed improvements in IT support for the YMSO. According to Hardwick, the "seriousness" of the January 18, 1994 memorandum is "verified" since "these changes and improvements would not have been accomplished but for Hardwick's disclosures." Hardwick Appeal at 4. I note that the record does not fully support Hardwick's claim that the IT support initiatives outlined in the May 17, 1994 memorandum were taken directly in response to the January 18, 1994 memorandum.(3) In any event, the fact that DOE recognized the importance of IT support and took action to make improvements in the area as funds became available does not necessarily mean that Hardwick's prior stated concerns amounted to a disclosure of gross mismanagement. To the contrary, other parties to the discussions leading to the January 18, 1994 memorandum testified that they considered Hardwick's concerns to be positive recommendations for improvement rather than intimating an allegation of mismanagement.(4)

Next, Hardwick argues that his disclosures must have involved a protected disclosure of gross mismanagement because Mr. Gandi "did not discount the validity or importance of his disclosure." Hardwick Appeal at 5. In this regard, Hardwick maintains that "[i]f [his] disclosures weren't significant, Gandi wouldn't have concocted the plan to have Hardwick write a letter for Wilson's signature." Hardwick Appeal at 6.(5) Again, however, I cannot make the logical leap that Hardwick urges. While Hardwick's concerns were ostensibly deemed significant to the degree that they were recommended for documentation in a memorandum, this does not lead us to the conclusion that Mr. Gandi perceived Hardwick's concerns as charges of gross mismanagement. Instead, as recounted by the Hearing Officer, Mr. Gandi testified at the hearing that "he did not see the January 18 memo as ?negative' [but] as pointing out areas which could use some improvement." Initial Agency Decision at 14.

Finally, Hardwick asserts that according to a 1996 report of the General Accounting Office (GAO), two senior DOE officials at the YMP had personal relationships with SAIC employees. Hardwick maintains that "[t]hose relationships would certainly explain the bizarre way that Gandi decided to act upon

Hardwick's disclosures." Hardwick Appeal at 6-7. However, in the absence of any viable evidence that an actual disclosure of gross mismanagement was made, I consider Hardwick's final contention highly speculative, immaterial, and beyond the scope of the Initial Agency Decision. Indeed, as pointed out in KenRob's Response, the Hearing Officer determined early on in the proceeding in an interlocutory letter determination that this apparent charge of an ethical violation raised by Hardwick was "irrelevant to the proceeding." Letter of May 28, 1999, from Virginia A. Lipton, Hearing Officer. I concur with this determination.

B. Conclusion

On the basis of the foregoing, I conclude that Hardwick has failed to show in his Appeal that the determination reached in the Initial Agency Decision is erroneous as a matter of fact or law. I concur with the determination that pertinent matters discussed by Hardwick in January 1994, as later set forth in a memorandum of January 18, 1994, did not constitute a disclosure protected under the provisions of the Contractor Employee Protection Program, 10 C.F.R. Part 708. Accordingly, Hardwick's Appeal must be denied.

It Is Therefore Ordered That:

(1) The Appeal filed by Roger W. Hardwick on July 26, 1999, of the Initial Agency Decision issued on July 6, 1999 (Case No. VWA-0032), is hereby denied. Accordingly, as determined in the Initial Agency Decision, the complaint filed by Roger W. Hardwick on December 23, 1994, under the Contractor Employee Protection Program, 10 C.F.R. Part 708, is denied.

(2) This Appeal Decision shall become a Final Agency Decision unless a party files a petition for Secretarial review with the Office of Hearings and Appeals, within 30 days after receiving this decision. 10 C.F.R. § 708.35.

George B. Breznay

Director

Office of Hearings and Appeals

Date: November 26, 1999

(1)Subsequent to the hearing, the Hearing Officer learned that the court reporter's car had been burglarized, and all the tapes made of the hearing were stolen. Consequently, no transcript of the hearing exists, and the discussion of the hearing in the Initial Agency Decision is based on the Hearing Officer's recollection of the testimony and notes made during the hearing.

(2)The Initial Agency Decision states that during the hearing and in a pre-hearing deposition, Hardwick "virtually admitted" that he had no support whatsoever for his claims of gross waste, and fraud, and thus the Hearing Officer properly determined that the only claim that might have some validity is that of mismanagement. Initial Agency Decision at 19, note 11.

(3)While there is some overlap, the May 17, 1994 memorandum clearly goes beyond the scope of the January 18 memorandum. As further pointed out by the Hearing Officer, Mr. Wilson himself did not perceive the May 17, 1994 memorandum as being in reply to the January 18 memorandum. Initial Agency Decision, at 15 n. 7.

(4)The Hearing Officer recounts that at the hearing, Mr. Gandi, Mr. Wilson and Ms. Mary Ann Jones (Mr. Gandi's Deputy), uniformly testified that at no time during their January 1994 discussions did Hardwick express a concern rising to alleged mismanagement. The Hearing Officer further recounts that Hardwick did not attempt to rebut this testimony when provided an opportunity. Initial Agency Decision, at 19 n. 10.

(5)Hardwick's supposition that Mr. Gandi "concocted a plan" in this regard runs contrary to the testimony presented at the hearing. According to Mr. Wilson, it was his recommendation that Hardwick draft a memorandum reflecting his concerns about IT services. *See* Initial Agency Decision at 15.

Case No. VBA-0033

April 5, 2000

DECISION AND ORDER

OF THE DEPARTMENT OF ENERGY

Appeal

Names of Petitioners:Kaiser-Hill Company, L.L.C.

EG&G Rocky Flats, Inc.

Dates of Filing:August 26, 1999

August 27, 1999

Case Number: VBA-0033

On August 26 and 27, 1999, Kaiser-Hill Company, L.L.C. (K-H) and EG&G Rocky Flats, Inc. (EG&G) respectively filed Notices of Appeal from an Initial Agency Decision by a Hearing Officer from the Office of Hearings and Appeals (OHA) of the Department of Energy (DOE). In the Initial Agency Decision, the Hearing Officer granted relief to Barbara Nabb on the basis of her complaint under the DOE's Contractor Employee Protection Program, 10 C.F.R. Part 708. Barbara Nabb, 27 DOE ¶ 87,519 (1999). In their Appeals, K-H and EG&G challenge several aspects of the Initial Agency Decision and request that Ms. Nabb's complaint be denied. As set forth in this decision, I have determined that their Appeals must be granted in part and denied in part.

I. Background

A. The DOE Contractor Employee Protection Program

The DOE's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste and abuse" at DOE's government-owned, contractor- operated facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purposes are to encourage contractor employees to disclose information that they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers. Contractors found to have discriminated against an employee for making such a disclosure, or for participating in a related proceeding, will be directed by DOE to provide relief to the complainant.

The regulations governing DOE's Contractor Employee Protection Program are set forth at 10 C.F.R. Part 708 and became effective on April 2, 1992. They establish administrative procedures for the processing of complaints. As initially formulated, these procedures typically included independent fact-finding by the DOE Office of Inspector General (IG), followed by the issuance of a Report of Inquiry setting forth the IG's findings and recommendations on the merits of the complaint.

Thereafter, the complainant could request a hearing before an OHA Hearing Officer, who would render an Initial Agency Decision, from which an appeal could be taken to the Secretary of Energy or his designee.

On March 15, 1999, DOE amended Part 708, effective April 14, 1999, setting forth procedural revisions and substantive clarifications that "apply prospectively in any complaint proceeding pending on the effective date of this part." 10 C.F.R. § 708.8; see 64 Fed. Reg. 12,862 (March 15, 1999). Certain of these amendments have a bearing upon the present proceeding. Under the revised regulations, review of an Initial Agency Decision, as requested by K-H and EG&G, is performed by the Director of OHA. 10 C.F.R. § 708.32.

B. Factual Background

The following facts underlying Ms. Nabb's complaint are not in dispute. Ms. Nabb worked as a machinist, and then a production specialist, at DOE's Rocky Flats Environmental Technology Site until November 1994. As Rocky Flats' principal function changed from weapons production to environmental restoration, the machine shop in which Ms. Nabb worked experienced a reduction in workload, and she and her co-workers were temporarily assigned to other work areas. By rotating in and out of the machine shop, they were able to remain fully employed and available for immediate recall to the machine shop should it resume operating at full capacity. Ultimately, however, the machine shop was closed altogether. Due to a reduction in force, Ms. Nabb, along with some 80 other machinists, accepted an opportunity to train to become a radiation control technician (RCT). She began her training in September 1994. She had completed most of her training by July 1995, when the funds allocated for training new RCTs ran out. At that time, Rocky Flats management made a determination that negatively affected Ms. Nabb: all those trainees who were ready for the final step of qualification, the oral examination, would be permitted to take that examination; all those who had not advanced to that stage of readiness, in which group Ms. Nabb found herself, would not be permitted to continue their training.(1) The stated rationale for this distinction was that the orals required little time and cost, and if successfully taken, would permit a trained employee to be fully qualified as an RCT; those not as far along would require considerably more training expense to obtain qualification status. Ms. Nabb filed a grievance with her union in November 1995, regarding the discontinuation of her training. The union ultimately withdrew this grievance in January 1998, when Rocky Flats offered to continue RCT training to all those employees whose training was curtailed in 1995. Ms. Nabb refused that offer, in the belief that she should not sign a settlement agreement while her whistleblower complaint was pending. See Answer to EG&G and Kaiser-Hill Request for Oral Hearing, dated October October 11, 1999, at 2.

C. Procedural Background

In September 1994 Ms. Nabb provided information regarding her Part 708 complaint to the DOE Rocky Flats Field Office's Employee Concerns Manager. She completed the filing of her complaint with a signed affirmation on January 12, 1995.(2) The Inspector General's Report of Inquiry and Recommendations (RIR) identified four actions by Ms. Nabb that constituted conduct that was protected by Part 708. Of the five actions by EG&G and K-H management officials that Ms. Nabb claims to be reprisals for her protected conduct, the RIR determined that she had failed to prove by a preponderance of evidence that four were retaliatory in nature. With respect to the fifth alleged retaliatory action, termination of the training program, the RIR found that, while there was some evidence that Ms. Nabb's protected conduct may have contributed to the decision to stop the training program, the contractors had nevertheless established by clear and convincing evidence that that decision was not retaliatory in nature.

Ms. Nabb then requested a hearing regarding the RIR's findings and proposed disposition.(3) The hearing was duly held, and the OHA Hearing Officer rendered an Initial Agency Decision on August 6, 1999. In this Decision, the Hearing Officer found in favor of Ms. Nabb. There was no dispute that she had engaged in protected conduct (i) when she refused to alter the travel documentation ("travelers") of 29 waste drums, at the direction of an EG&G waste management compliance specialist, in a manner that she believed would render the travelers false, and (ii) when she disclosed this event to her supervisors and managers between September 1993 and December 1994. Initial Agency Decision (IAD) at 8. The Hearing Officer determined that the proximity in time between her protected conduct and the termination of the

RCT training program (less than eight months), and the fact that company officials knew of her protected conduct, established that her conduct was a contributing factor in the decision to terminate her participation in the program. IAD at 11-12. Finally, he determined that EG&G and K-H had failed to prove by clear and convincing evidence that K-H would have made the same decision to cut off Ms. Nabb's training had she not engaged in her protected conduct. IAD at 19-20. As a result of these determinations, the Hearing Officer calculated the amount of monetary damages and ordered that the contractors pay that amount to Ms. Nabb and provide her with an opportunity to complete her RCT training. IAD at 24.(4)

After filing their Notices of Appeal, K-H and EG&G filed statements in which they identified the issues they wish the OHA Director to review. 10 C.F.R. § 708.33(a). Ms. Nabb filed her response to those statements, and each of the appellants then filed replies to Ms. Nabb's response. The issues identified by the appellants relate to several different aspects of the Initial Agency Decision, including the Hearing Officer's conclusions regarding whether the parties met their required burdens of proof and whether the assessment of liability was appropriate, both in terms of the type assessed and the parties held responsible.

II. Analysis

In their statements of issues, EG&G and K-H have raised a number of challenges to the Hearing Officer's Initial Agency Decision. The contractors argue that, as to the retaliation addressed in the Initial Agency Decision, the complaint should be dismissed. In the alternative, they challenge the Hearing Officer's determination that the protected disclosure-- the "travelers" matter-- was a contributing factor in the retaliation the contractors allegedly took against Ms. Nabb-- terminating her participation in the RCT training program. They also contend that the Hearing Officer wrongly found that those employees who made the decision to terminate the training also had knowledge of her disclosures, and that delays in Ms. Nabb's training constituted retaliation. The contractors further maintain that, contrary to the Hearing Officer's decision, they did prove by clear and convincing evidence that they would have taken the same action regarding Ms. Nabb's training even if she had not made her disclosures about the "travelers." Finally, each contractor contests the liability the Initial Agency Decision imposed on it: EG&G objects to being held jointly liable at all, while K-H objects to being ordered to offer Ms. Nabb the opportunity to complete her RCT training. In this section, each of these issues will be addressed. (5)

A. Dismissal

K-H contends that, with respect to the alleged reprisal of terminating Ms. Nabb's RCT training, the complaint should be dismissed. The facts pertinent to this argument are as follows. Ms. Nabb completed the filing of her Part 708 complaint in January 1995, after her RCT training had begun. Her training was terminated in July 1995. Ms. Nabb filed a grievance with her union concerning the termination of her training in November 1995. K-H Exhibit A. K-H offered Ms. Nabb the opportunity to continue her training in November 1997. K-H Exhibit C. The union withdrew the grievance in a January 1998 settlement with K-H, which included a provision that classes for those previously terminated from the training program would begin no later than April of that year. K-H Exhibit B. Ms. Nabb formally rejected the offer to recommence her training in documents dated February 17 and 24, 1998. K-H Exhibit D.

In arguing that dismissal is appropriate, K-H relies on certain provisions of the new version of the Part 708 regulations. Specifically, it contends that sections 708.13, .15, and .17 of the DOE regulations require dismissal of a complaint where the complainant later files a complaint, with respect to the same facts, under state or other applicable law, including final and binding arbitration. Because Ms. Nabb filed a union grievance regarding the termination of her training after she filed her Part 708 complaint, and because the grievance was settled, K-H contends that the matter became moot and the relevant portion of her Part 708 complaint should be dismissed.

Before ruling on this matter, I must consider which set of Part 708 regulations govern the possible

dismissal of any portion of the complaint in this case. The previous version of the regulations was in effect during the period in which both the protected activities and the alleged reprisals took place, and during the investigation stage of this proceeding. The current version did not take effect until April 14, 1999, by which date the Inspector General had already issued its RIR and Ms. Nabb had already filed her request for a hearing. The question before us, therefore, is whether K-H was correct in relying on the current regulations as the foundation for its claim of dismissal.

It is well established in the law that an agency may apply new procedural rules in pending proceedings as long as their application does not impair the rights of, or otherwise cause injury or prejudice to, a party. DOE has stated it will apply the revised procedures to pending cases consistent with the case law. 64 Fed. Reg. 12862, 12865 (citing Landgraf v. USI Film Products, 511 U.S. 244, 275 (1994); Lindh v. Murphy, 117 S. Ct. 2059, 2063-64 (1997); Natural Resources Defense Council, Inc. v. NRC, 680 F.2d 810, 817 n.17 (D.C. Cir. 1982) (citing Pacific Molasses Co. v. FTC, 356 F.2d 386 (5th Cir. 1966))).

Thus, it is clear that the drafters of the Part 708 revisions intended the revised regulations to apply to pending cases only "as long as their application does not impair the rights of, or otherwise cause injury or prejudice to, a party." If applying the new regulations to the case before us would, as K-H contends, require us to dismiss the complaint, their application would clearly "impair the rights of, or otherwise cause injury or prejudice to" Ms. Nabb. Therefore, I must look back instead to the provisions of the regulations in effect at the time she filed her Part 708 complaint and her union grievance. Under the version of Part 708 in effect from April 2, 1992, through April 13, 1999, the provisions pertaining to the dismissal of a complaint due to pursuing a remedy in other forums appear at 10 C.F.R. §§ 708.6(a) and 708.8. See 57 Fed. Reg. 7533, 7542-43. The latter provision lists the grounds for dismissal of a complaint, among which is "[t]he complainant has pursued a remedy available under State or other applicable law." 10 C.F.R. § 708.8(a)(4) (1992). The former provision clarifies when a complaint is deemed to have been pursued under State or other applicable law, and specifically states that "[t]he pursuit of a remedy under a negotiated collective bargaining agreement will be considered the pursuit of a remedy through internal company grievance procedures and not the pursuit of a remedy under State or other applicable law." 10 C.F.R. § 708.6(a). Because Ms. Nabb's union grievance was thus not considered pursuit of a remedy that would have subjected her Part 708 complaint to dismissal under the prior version of Part 708, the revised Part 708 cannot retroactively bring her union grievance within the scope of actions that subject her Part 708 complaint to dismissal at this stage. By subjecting her union grievance to a regulatory regime to which it was not previously subject, such a retroactive application would prejudice Ms. Nabb, contrary to the clear intent of the revisions to the regulations.

For the reasons set forth above, I will deny K-H's motion to dismiss. I will, therefore, perform an appellate review of the Hearing Officer's Initial Agency Decision, paying particular attention to the challenges the contractors have raised in their appeals. I note that the Hearing Officer's findings of fact are entitled to deference unless they are clearly erroneous. Oglesbee v. Westinghouse Hanford Co., 25 DOE ¶ 87,510 at 89,001 (1995). On the other hand, his conclusions of law are subject to de novo review. Salvatore Gianfriddo, 27 DOE ¶ 87,544 at 89,221 (1991); see Pierce v. Underwood, 487 U.S. 552, 558 (1988) ("For purposes of standard of review, decisions by judges are traditionally divided into three categories, denominated questions of law (reviewable de novo), questions of fact (reviewable for clear error), and matters of discretion (reviewable for ?abuse of discretion')."). After considering the issues raised by the appellants, I agree with the Hearing Officer's conclusion that Ms. Nabb is entitled to relief under Part 708. In contrast to the Hearing Officer's finding with respect to liability of the parties, however, I find that K-H is solely liable for the remedies he fashioned.

B. The Employee's Burden

Under the regulations applicable to this proceeding, the complainant has the burden of establishing by the preponderance of the evidence that she engaged in protected conduct, and that such conduct "was a contributing factor in a personnel action taken or intended to be taken against the complainant." 10 C.F.R. § 708.9(d) (1992).(6) The contractors, EG&G and K-H, have not challenged the threshold matter of

whether Ms. Nabb engaged in protected conduct, including disclosures to supervisors and company officials. IAD at 8. On appeal, however, the contractors challenge the Hearing Officer's finding that the protected disclosure on which the Hearing Officer focused-- Ms. Nabb's allegations of waste drum "traveler" fraud to supervisors and managers from September 1993 through December 1994-- was a contributing factor to any reprisals they may have taken against her. Their arguments are twofold. First, EG&G contends that too much time passed between the last of Ms. Nabb's disclosures about the "travelers," in December 1994, and the termination of the RCT training program in late July 1995. Second, K-H contends that the Hearing Officer improperly determined that the individuals responsible for canceling Ms. Nabb's training were influenced by their knowledge of Ms. Nabb's disclosures.

Since the contractors have conceded that Ms. Nabb engaged in protected conduct, the only remaining burden on Ms. Nabb is to establish that her protected conduct was in fact a contributing factor in the alleged acts of reprisal. As the Hearing Officer explained in the IAD, under our case law a protected disclosure is likely to be a contributing factor in a personnel action where the official taking the action has actual or constructive knowledge of the disclosure and where he acted within a period of time such that a reasonable person could find such a nexus. IAD at 7.

With respect to the timing question, I cannot find that the Hearing Officer erred when he determined that the time that elapsed between Ms. Nabb's last recorded disclosure about the "travelers" and the termination of Ms. Nabb's participation in the RCT training program was short enough to allow the reasonable conclusion that the former contributed to the latter. Applying a reasonable-person standard to this issue requires considering the circumstances of each case. Here, although more than seven months passed between the two events, it is reasonable to conclude that contractor officials did not forget about Ms. Nabb or her disclosures in the interim, particularly in light of the ample evidence of Ms. Nabb's outspoken nature and the number and variety of situations in which she had made her disclosures. Moreover, and contrary to the contractors' contention, this period is not beyond other intervals this office has considered and found to establish "temporal proximity." See, e.g., Luis P. Silva, Case No. VWA-0039 (February 25, 2000) (temporal proximity between July 1997 disclosure and personnel action in early 1998).(7) Because any training delays that the contractors may have caused occurred closer in time to Ms. Nabb's disclosures than the decision to terminate her training did, it was reasonable to conclude that a temporal link exists with them as well.

As stated above, the individual engaging in the alleged reprisal must also have knowledge of the employee's protected conduct in order to support a conclusion that the conduct was a contributing factor in the reprisal. To consider this issue properly, I must address each form of reprisal separately.

On one hand, I find that the Hearing Officer was not clearly in error when he determined that the decision to terminate RCT training was made with knowledge of Ms. Nabb's disclosures. K-H argues in its Statement of Issues that the Hearing Officer created an improper and irrebuttable presumption when he determined that Ms. Nabb's "standing as a known whistleblower is presumed to have influenced Mr. Spears and Mr. Wood," IAD at 19, at the time they decided to terminate the RCT training program in a manner that adversely affected Ms. Nabb. K-H Statement of Issues at 8-9. Although Ms. Nabb never made a direct disclosure to Mr. Spears, as she admitted in her Response to the Statements of Issues, K-H admits that Mr. Spears learned, at a December 1994 meeting with the DOE Rocky Flats whistleblower administrator, that Ms. Nabb was a whistleblower. Response to Statement of Issues (Response) at 5, 10; K-H Statement of Issues at 8. This was roughly six months before Mr. Spears and others began to structure the termination of the RCT training program. Tr. at 463 (Wood testimony). It is clear that Mr. Spears, then in charge of Rocky Flats's radiological control program, knew that Ms. Nabb was a whistleblower at the time he, together with other managers, decided to halt RCT training and set the parameters for students eligible for completing their testing.(8) Moreover, the evidence strongly suggests that they considered the effect of their decision on each of the trainees in the program. Transcript of Hearing (Tr.) at 414, 445 (Spears testimony). Mr. Spears' knowledge of Ms. Nabb's whistleblower status, taken together with the proximity in time between her protected conduct and this decision, is sufficient evidence to meet Ms. Nabb's burden to establish that her protected conduct was a contributing factor in

the decision to halt training.(9)

On the other hand, I find that the Hearing Officer did err when he considered the allegation of training delays as evidence that the contractors had not met their burden of proof. See IAD at 14-17. The Hearing Officer found that "Mrs. Nabb has presented evidence indicating that her failure to complete her RCT training . . . was due, at least in part, to unusual delays in the scheduling of her RCT training and testing." IAD at 17. The Hearing Officer did not, however, consider whether Ms. Nabb's protected conduct was a contributing factor in these delays. Specifically, he failed to consider whether the contractor employees who caused delays in Ms. Nabb's training had knowledge of her protected conduct. Consequently, I must perform this analysis de novo. As stated above, the two essential elements of this analysis are proximity of time between the protected conduct and the delays, and actual or constructive knowledge of the protected conduct by those causing the delays. I have already found proximity of time with respect to the delays. To address the knowledge issue, I have determined that the RCT trainers were responsible for causing any delays in Ms. Nabb's training progress, because they were in control of when Ms. Nabb was tested. However, there is simply no evidence in the record that these individuals had any knowledge about Ms. Nabb's protected conduct. Although Mr. Spears clearly was aware of the protected conduct, as discussed above, there is nothing in the record that indicates that this knowledge was communicated to the RCT trainers. To the contrary, James Wood, another Rocky Flats manager responsible for the termination of the RCT training program, testified that to his knowledge none of his instructors knew "that there was any whistleblower thing." Tr. at 479. Consequently, I find that Ms. Nabb has not shown by a preponderance of the evidence that her protected conduct was a contributing factor in any delays that might have occurred in her training schedule.

C. The Employer's Burden

Once the complainant has met his or her burden of proof, the burden shifts to the employer to demonstrate by clear and convincing evidence that it would have taken the same action "absent the complainant's disclosure." 10 C.F.R. § 708.9(d) (1992). (10) "Clear and convincing evidence" is neither so light a burden as "preponderance of the evidence" nor so rigorous as "beyond a reasonable doubt," the standard used in criminal procedures. See id. Both contractors have challenged the Hearing Officer's finding that they did not meet their burden. They maintain that the evidence demonstrates that the funding for the RCT training program expired, and that this fact alone constitutes an independent business reason for terminating the training.

In stating their position, however, the contractors misstate their burden. They ignore its true dimension. As the Hearing Officer explained in the IAD, their burden was not merely to show that they had a legitimate business reason for terminating the RCT training and allowing some but not all participants to complete their qualifying examinations. See IAD at 17-18. I concede that they have established this basis, as did the Hearing Officer. IAD at 19. Their burden is larger in scope. What the Hearing Officer could not find, however, was that on this record they had met their express burden of proof under the Part 708 regulations, which was to show, by clear and convincing evidence, that they would have taken the same action had Ms. Nabb not engaged in her protected conduct. That is the issue I must address here.(11)

The facts necessary to the consideration of this issue are as follows. Due to exhaustion of funds earmarked for the training program in which Ms. Nabb participated, K-H managers were directed to stop the program. The implementation of that directive fell to three managers, including Mr. Spears and Mr. Wood. At that time, according to Mr. Wood, roughly 15 to 20 students had not yet completed the program and qualified as RCTs. Tr. at 464. Rather than stopping the training for all students instantaneously, they devised a plan by which those students who had completed all their work but for their oral boards would be permitted to take their boards, which would complete the qualification process to become RCTs. Those students who had more work to complete would not be permitted to continue their studies. Mr. Wood testified that the cost of oral boards was small-- no more than a few hours of testing per student. Tr. at 471-472. On the other hand, the cost of preparing those even one test short of their oral boards could be several weeks of preparation and testing. Id. The evidence shows that very few students were terminated

from the program along with Ms. Nabb. The Hearing Officer determined, from testimony gathered at the hearing, that six or seven students fell into the same category as Ms. Nabb. IAD at 18; see Tr. at 465, 470 (Wood testimony). According to Mr. Spears, however, there were only perhaps two or three others who shared Ms. Nabb's predicament. Tr. at 415. John Barton, the union grievance committeeman, estimated the same number. Tr. at 46. The RadCon Training records reflect Ms. Nabb and two others never passed their oral boards, while the remaining 84 students on the roster did, including five who passed them after July 24, 1995. IG Exhibit 102 (which corresponds to K-H Hearing Exhibit R). In any event, a very small number of fellow students received the same treatment as Ms. Nabb.

Based on the above evidence, one can presume that K-H management made the decision to permit some students to complete their studies because they saw that decision as advantageous to K-H's business position. Perhaps, for example, the Rocky Flats Site needed more RCTs. If so, there was a legitimate business purpose to "draw the line" among the students to permit some of them to complete their training. Justification for why they drew the line where they did, however, is a matter on which there is very little evidence. The record contains Mr. Wood's statement that preparation for and administration of oral boards cost less per student than the preceding test. What the contractors have shown, if anything, is that the decision they made is logical in a business sense. But without knowledge of the company's needs for RCTs and availability of alternate funding, I cannot find that the line they drew was the only one that had a legitimate business foundation, or even that it was the best option under the circumstances. Therefore, it is difficult to conclude that it was merely coincidental that Ms. Nabb had passed precisely one examination fewer than those students who were permitted to complete the training program and become RCTs.

The Hearing Officer stated that "[m]anagement decisions that impact negatively on a small group of employees that includes a whistleblower must be viewed as inherently suspect in a Part 708 analysis." IAD at 19. I do not necessarily agree with the characterization that such management decisions are "inherently suspect." Nevertheless, they must be closely examined. I find that, after considering the complete circumstances surrounding the decision to terminate Ms. Nabb's training, the contractors have simply not met their regulatory burden to show by clear and convincing evidence that they would have drawn that line where they did if Ms. Nabb had not engaged in protected conduct. Because they have not established that their training decision was the only legitimate business option, or even the best of several under the circumstances, I conclude that they have not shown that they would have made the same decision "absent the complainant's disclosure." Because the contractors have not met their burden and therefore have not overcome the complainant's allegations on this issue, I agree with the Hearing Officer that K-H has failed to show that its termination of Ms. Nabb's training was not a retaliatory act for purposes of Part 708.

D. Remedy Issues

Because I uphold the Hearing Officer's finding that K-H retaliated against Ms. Nabb when it terminated her RCT training, I must now address the remedy fashioned in the IAD.

Of the many allegations of retaliation that Ms. Nabb claimed in her Part 708 complaint and subsequent amendments, I find that Ms. Nabb has prevailed on only one-- the termination of her RCT training.(12) The remedy issues that the contractors have raised on appeal fall into two categories. The first concerns the effect of the settlement of Ms. Nabb's union grievance on one aspect of the remedy fashioned by the Hearing Officer. The second is EG&G's contention that it should not be held jointly and severally liable for any violations of Part 708 that occurred at Rocky Flats after June 30, 1995, the date on which its responsibilities for operating the Rocky Flats facility terminated.

In its Statement of Issues, K-H argues that it should not be required to offer Ms. Nabb another opportunity to complete her RCT training. As discussed in the Dismissal section above, K-H invited Ms. Nabb to continue her training in November 1997 and again in early 1998 in settlement of her union grievance. At that time, Ms. Nabb rejected the offer. Nevertheless, the Hearing Officer ordered K-H to offer Ms. Nabb an opportunity to complete her RCT training. K-H now contends that requiring it to offer training yet

again frustrates Part 708's policy of encouraging resolution of grievances internally when possible. The underlying premise appears to be that requiring K-H to offer the training will reward Ms. Nabb for ignoring the offer at the union grievance level. I do not agree that requiring the contractor to provide training will frustrate the policy of the whistleblower regulations. The Part 708 regulations promote internal resolution of grievances by requiring the complainant to show that he or she has exhausted all applicable grievance-arbitration procedures before filing a complaint. 10 C.F.R. § 708.12(d); see 10 C.F.R. § 708.6(c)(1) (1992) (refers to "internal company grievance procedures" rather than "grievance-arbitration procedures"). Part 708 is therefore intended to govern only after the failure of more "local" processes, which in this case included the procedures Ms. Nabb followed. In a case in which the complainant wrongly initiates a Part 708 action after filing a complaint in another forum, the complaint will be dismissed. However, once Part 708 is properly invoked, as in this case, it is irrelevant whether the remedy happens to coincide with that reached through grievance procedures. I find instead that the policies underlying Part 708 would be frustrated if a hearing officer were prevented from fashioning an appropriate form of relief merely because it had been offered at an earlier stage of a process designed to "restore employees to the position they would have occupied but for the retaliation." 64 Fed. Reg. 12862, 12867 (policy set forth in context of restitutionary remedies authorized under the revised regulations). Consequently, I find that the Hearing Officer did not err when he required K-H to offer Ms. Nabb an opportunity to complete her RCT training program.

Along the same vein, EG&G argues that the Hearing Officer was without jurisdiction to grant any remedy for K-H's retaliatory termination of Ms. Nabb's training, because the union-grievance settlement bound her and was the result of a complaint under "State or other applicable law" that requires dismissal of her Part 708 complaint under the revised regulations at 10 C.F.R. § 708.15(d). As discussed in the Dismissal section above, that provision does not apply to the facts of this case. Because Ms. Nabb's union grievance concerning her training does not dictate dismissal of her Part 708 case, the Hearing Officer was free to fashion a remedy under the regulations.

EG&G also argues that it cannot be held liable for retaliations that occurred after the responsibility for operating Rocky Flats had been transferred from EG&G to K-H on July 1, 1995. This argument takes on significance because the only allegation of retaliation on which Ms. Nabb has prevailed is that of terminating her from the RCT training program, which occurred some time after July 24, 1995.(13) If EG&G is correct in its contention, EG&G bears no liability in this case. The Hearing Officer held both companies jointly and severally liable for the remedies, though he expressed his belief that K-H should be responsible for providing the relief. IAD at 24. He did not, however, express any justification for reaching that conclusion. Although it is clear that Ms. Nabb made several disclosures to EG&G personnel, and that many EG&G personnel were rehired by K-H when it assumed responsibility for operating Rocky Flats, nothing in the record supports a finding that EG&G was involved in any way in the decision to terminate Ms. Nabb's training. Consequently, I find that EG&G should not be held liable for this retaliatory action.

As neither of the contractors has asked for review of the terms of the remedies that the Hearing Officer has fashioned, I need not address them. I will, however, modify the interest provision of the IAD to comport with the calculation methodology that OHA has employed in other Part 708 determinations. This methodology follows the practice of the Merit Systems Protection Board under the Whistleblower Protection Act, employing an Office of Personnel Management regulation found at 5 C.F.R. § 550.806(d), and is outlined in the Sorri case. Sorri, 23 DOE at 89,017. The total amount of interest calculated in this manner is $11,777.23, as set forth in the appendix to this decision. For the reasons stated above, the remedies set forth in the IAD, as modified by this interest calculation methodology, are the sole responsibility of K-H.

It Is Therefore Ordered That:

(1) The Appeal filed by Kaiser-Hill Company, L.L.C., on August 26, 1999, of the Initial Agency Decision issued on August 6, 1999 (Case No. VWA-0031), is hereby denied.

(2) The Appeal filed by EG&G Rocky Flats, Inc., on August 27, 1999, of the Initial Agency Decision issued on August 6, 1999 (Case No. VWA-0031), is hereby granted to the extent that it shall not be held liable for any retaliatory action taken against Barbara Nabb, and denied in all other respects.

(3) Kaiser-Hill Company, L.L.C., shall pay to Mrs. Nabb, by no later than June 30, 2000, the following amounts in compensation for actions taken against her in violation of 10 C.F.R. Part 708:

(i) $498.24 for lost salary for the period September 1, 1995 through April 30, 1998(14);

(ii) $36,897.53 for lost overtime pay for the period September 1, 1995 through April 30, 1998;

(iii) $1,200 for reasonable costs and expenses incurred by Mrs. Nabb since the filing of her Part 708 Complaint on January 12, 1995; and

(iv) $11,777.23 for interest on the amounts in (i) through (iii) above, for the period September 1, 1995, through June 30, 2000.

(4) Kaiser-Hill Company, L.L.C., shall offer Ms. Nabb the opportunity to receive the training necessary to qualify for the RCT II job classification, and shall offer Ms. Nabb a position as an RCT II at the time that she completes the required training.

(5) This Appeal Decision shall become a Final Agency Decision unless a party files a petition for Secretarial review with the Office of Hearings and Appeals within 30 days after receiving this decision. 10 C.F.R. § 708.35.

George B. Breznay

Director

Office of Hearings and Appeals

Date: April 5, 2000

(1)On July 1, 1995, the responsibility for operating the Rocky Flats facility for the DOE passed from EG&G to K-H.

(2)Although Ms. Nabb's complaint was complete in January 1995, several allegations were investigated that she raised after this date, including her termination from the RCT training program in July 1995.

(3)During the pendency of the hearing, the new "whistleblower" regulations took effect, and the Hearing Officer relied on the revised regulations in handling this proceeding, citing the new regulatory provisions in his Initial Agency Decision.

(4)Ms. Nabb's complaint contained several allegations of protected disclosures and retaliations that the Hearing Officer did not analyze fully in the IAD. Before the hearing, Ms. Nabb stated that she no longer wished to pursue one claim of retaliation, that she had been denied funeral leave. The Hearing Officer dismissed two others before the hearing (acid burns and revocation of her access authorization), as actions beyond the scope of Part 708. Letter from Hearing Officer to Ms. Nabb, April 20, 1999. The Hearing Officer ruled that another (temporary assignments to undesirable work locations), along with the two preceding allegations, were actions for which Part 708 offered no remedy, even if she were to prevail. IAD at 20. Finally, the Hearing Officer denied an allegation that Ms. Nabb raised for the first time at the hearing (denial of crewleader pay) for lack of evidence. IAD at 21.

(5)The appellants also requested an opportunity for oral argument at this stage of the proceeding. There is no provision in the regulations that precludes oral argument. On the other hand, the regulations that govern

appeal procedures, at 10 C.F.R. § 708.33, do not provide for oral argument as a matter of right. That provision permits the OHA Director, at his discretion, to obtain additional information that will "advance the evaluation." 10 C.F.R. § 708.33(b)(3). Having studied the voluminous documentation in this case and reviewed the various arguments raised in the appeals, I conclude that oral argument is not necessary to "clarify the evidence and to probe the merits of each party's position," as K-H posited in its November 11, 1999 Reply to Ms. Nabb's Response to the appeal briefs. To the extent that Ms. Nabb has raised new issues and allegations in her Response, I will not consider her Response to be relevant to this appeal determination; such issues may not be raised at this late stage. Ms. Nabb should consider whether they form a proper basis for a new Part 708 complaint.

(6)Although the Hearing Officer relied on the parallel provision in the 1999 regulations, 10 C.F.R. § 708.29, the description of the evidentiary burdens on the parties nevertheless are the same.

(7)EG&G also contends that Ms. Nabb's poor performance on some of the RCT tests, as shown in Kaiser-Hill Exhibits H and I, demonstrates that the contractors could have dismissed her from the training program at earlier stages, and since they did not, it was improper for the Hearing Officer to conclude that her eventual termination from the training program could have possibly been influenced by her disclosures. EG&G Statement of Issues at 4. I find no merit to this argument. Even if it were established that the contractors could have terminated her training earlier, the fact is that they did not. They may have had any number of reasons for postponing their adverse action to a later, more propitious time. I do not know of, and can see no use to ascribe, any particular motive to their inaction before July 1995.

(8)I also note that Mr. Spears was an employee of EG&G before the transfer of operations responsibility to K-H, and an employee of K-H thereafter.

(9)I do not agree with K-H's characterization of the Hearing Officer's "presumption" as irrebuttable and without any basis in the law or regulation. First, I fail to see that the Hearing Officer employed an irrebuttable presumption at all. The fact that the regulations specifically provide a standard for review of the employer's evidence demonstrates that the employer has an opportunity to submit evidence in opposition, and meeting the "contributory factor" test is thus clearly rebuttable. Second, Congress intentionally made the whistleblower's burden relatively easy to meet when it adopted the "contributing factor" test in the 1989 Whistleblower Protection Act (WPA), in order to reduce the "exceptionally heavy burden imposed on the employee." 135 Cong. Rec. S2780, S2784 (daily ed. Mar. 16, 1989) (statement of Sen. Levin), cited in Ronald A. Sorri, 23 DOE ¶ 87,503 at 89,010 (1993) (Sorri). The standards of proof in the WPA are similar to those in Part 708. See Sorri, 23 DOE at 89,009.

(10)Because Ms. Nabb did not meet her burden regarding her allegations of delay, I will not address them in this section.

(11)EG&G argues that I have held that clear and convincing evidence of independent, non- discriminatory reasons for a personnel action is sufficient to sustain the contractor's burden of proof. EG&G Statement of Issues at 5 n.6 (citing Helen Gaidine Oglesbee, 24 DOE ¶ 87,507 at 89,042 (1994)). In Oglesbee, the Hearing Officer reached this conclusion under the specific facts of that case, which included a finding that the alleged retaliatory act-- delaying a promotion-- transpired as the direct outcome of following normal, established personnel procedures. In the present case, as discussed below, the Hearing Officer found retaliation in termination of training as the direct outcome of following procedures that were developed and implemented specifically to address a group of individuals of which the whistleblower was a member. However, it is these procedures which are different from those in Oglesbee. Because these procedures were not already established, but rather created to address precisely the whistleblower's situation, they do not carry the same presumption of objectivity as those in Oglesbee. I further note that the Hearing Officer completed his analysis by considering whether this personnel action would have occurred any differently had there been no knowledge of Ms. Oglesbee's disclosures. Id. at 89,043.

(12)See note 4.

(13)I note again that I have denied any allegation of retaliatory delays in training, which could have transpired while Rocky Flats was in the control of either contractor.

(14)April 14, 1998 is the date on which Ms. Nabb would have reasonably completed her RCT training had she accepted Kaiser-Hill's offer to recommence training, as calculated by the Hearing Officer. See Initial Agency Decision at 22.

Case No. VBA-0038

March 28, 2000

DECISION AND ORDER

OF THE DEPARTMENT OF ENERGY

Appeal

Name of Petitioner: Ann Johndro-Collins

Date of Filing: October 29, 1999

Case Number: VBA-0038

This Decision considers an Appeal of an Initial Agency Decision issued on September 27, 1999, on a complaint filed by Ann Johndro-Collins (Johndro-Collins or the complainant) under the Department of Energy (DOE) Contractor Employee Protection Program, 10 C.F.R. Part 708. In her complaint, Johndro-Collins seeks compensation for alleged retaliatory actions taken against her by Fluor Daniel Hanford (FDH), a DOE contractor, as a result of making an alleged protected disclosure to DOE. As set forth in this decision, I have determined that Johndro-Collins's Appeal must be denied.

I. Background

A. The DOE Contractor Employee Protection Program

The Department of Energy's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules and regulations; and prevent[] fraud, mismanagement, waste and abuse" at DOE's Government-owned or -leased facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purpose is to encourage contractor employees to disclose information which they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers. Thus, contractors found to have discriminated against an employee for such a disclosure, or participating in a related proceeding, will be directed by the DOE to provide relief to the complainant.

The DOE Contractor Employee Protection Program regulations, which are codified as Part 708 of Title 10 of the Code of Federal Regulations and became effective on April 2, 1992, establish administrative procedures for the processing of complaints. As initially formulated, these procedures typically included independent fact-finding by the DOE Office of Inspector General (IG), followed by the issuance of a Report of Inquiry setting forth the IG's findings and recommendations on the merits of the complaint. Thereafter, the complainant may request a hearing before a Hearing Officer assigned by the DOE Office of Hearings and Appeals (OHA), pursuant to which the Hearing Officer renders an Initial Agency Decision.

On March 15, 1999, DOE issued an amended Part 708, effective April 14, 1999, setting forth procedural revisions and substantive clarifications that "apply prospectively in any complaint proceeding pending on the effective date of this part." 10 C.F.R. § 708.8; *see* 64 Fed. Reg. 12, 862 (March 14, 1999). Certain of these amendments have bearing upon the present proceeding. Under the revised regulations, review of an Initial Agency Decision, as requested by Johndro-Collins in the present Appeal, is performed by the OHA

Director. 10 C.F.R. § 708.32.

B. Complaint Proceeding

The present case was initiated by the filing of a complaint by Johndro-Collins in July 1997. The factual allegations set forth in the Johndro-Collins complaint, described below, are essentially uncontroverted.

In 1989, the Complainant began working for Westinghouse Hanford Company, a contractor at the Department's Richland Operations Office, as a records management specialist. In August 1994, she attained the position of Project Control Analyst I. On October 1, 1996, FDH acquired the Westinghouse Hanford contract at the Richland Operations Office. The Complainant's duties and chain of supervisors remained essentially unchanged when FDH acquired the contract.

In July 1997, the Complainant filed a complaint with the IG. In her complaint, she alleged that FDH retaliated against her for disclosing "a conflict of interest, waste, fraud, and abuse" by her team leader at FDH. At the time the Complainant made her disclosures, she worked on the Strategic Planning team. The subject of her disclosures was her team leader and her supervisor was Larry Hafer. In July 1997, the Complainant was transferred to the Reporting team, where her team leader was Eileen Murphy-Fitch and her supervisor was Gordon McCleary. This transfer took place because Murphy-Fitch needed additional personnel and had requested the Complainant. In addition, management was aware that Complainant and her team leader were not getting along.

In January 1998, the Complainant was transferred back to the Strategic Planning team. This transfer was made because she had requested reassignment to the group and there was an opening caused by the departure of another employee, Dave Eder. Her supervisor was again Larry Hafer, but her previous team leader had moved to another group. In March 1998, McCleary was promoted to the position of Director of Reporting, where he had supervision over Hafer's Strategic Planning team.

The IG conducted an investigation and issued a Report of Inquiry and Recommendations on March 30, 1999 (IG Report). The IG Report found that the Complainant had established by a preponderance of evidence that she made protected disclosures to FDH management under 10 C.F.R. Part 708. The IG Report further found that in six of seven alleged retaliatory acts, the Complainant failed to establish by a preponderance of the evidence either that the alleged retaliatory acts constituted adverse actions, or that her protected disclosures were a contributing factor to the actions. With regard to one of the alleged retaliatory acts - the Complainant's transfer from the Strategic Planning team to the Reporting team - the IG found that the Complainant's protected disclosures were a contributing factor, but that FDH had provided clear and convincing evidence that the reassignment would have taken place absent the disclosures.

On April 20, 1999, the Complainant submitted a request for a hearing under 10 C.F.R. § 708.9, that was transmitted to the Office of Hearings and Appeals (OHA) on April 27, 1999, at which time a Hearing Officer was appointed by the OHA Director. The Hearing Officer convened a hearing in this case on July 13, 1999, at which the Complainant and six witnesses testified.

Prior to the hearing, the parties stipulated that the Complainant made a protected disclosure as defined by 10 C.F.R. § 708.5. As stipulated by the parties, the Complainant disclosed to management of FDH alleged acts of abuse of authority by her team leader. *See* 10 C.F.R. § 708.5(a)(3). In addition, the Complainant alleged that FDH committed retaliatory acts, as defined by 10 C.F.R. § 708.2, after her protected disclosure. Before the hearing, the parties stipulated that three of the alleged retaliatory acts could be remedied under the Part 708 regulations. These three alleged acts are listed below:

1. In October 1997, the Complainant received an annual performance assessment that allegedly did not accurately reflect her performance. The Complainant claims that the assessment evaluated her work at a lower level than it should have. As a result, the Complainant alleged that she was excluded from

a cash bonus program that rewarded employees for high achievement.
2. The Complainant alleged that in January 1998, she received a promotion from Project Controls Associate Grade I (pay grade 14) to Project Controls Associate Grade II (pay grade 16) without a corresponding pay raise.
3. The Complainant also alleged that in January 1998, she was assigned to a position where she performed duties at a level expected of employees in pay grade 18, while she was compensated at pay grade 16.

As explained in the Initial Agency Decision issued on September 27, 1999, the Hearing Officer determined that the Complainant did not prevail on any of the three allegations of retaliatory acts. *See* Initial Agency Decision, 27 DOE ¶ 87,530 (1999). With regard to the allegation that her FY 1997 performance assessment was inaccurate, the Hearing Officer found that FDH has shown by clear and convincing evidence that it would have given the Complainant the same assessment absent her protected disclosures. With respect to the allegations that the Complainant was given a promotion without a raise and given a work assignment above the level of her pay, the Hearing Officer found that the Complainant has failed to show that these acts occurred as she claimed. The Hearing Officer concluded that the Complainant is not entitled to any relief under 10 C.F.R. Part 708.

In accordance with section 708.32(a), the Complainant filed a Notice of Appeal of the Initial Agency Decision on October 29, 1999, followed by a Statement of Appeal (Appeal) on December 6, 1999. On December 22, 1999, FDH filed a Response to the Appeal.

II. Analysis

Proceedings under 10 C.F.R. Part 708 are intended to offer employees of DOE contractors a mechanism for resolution of whistleblower complaints by establishing procedures for independent fact-finding and a hearing before an OHA Hearing Officer, followed by an opportunity for review by the OHA Director. *See David Ramirez*, 23 DOE ¶ 87,505 (1994). The regulations provide, in pertinent part, that a DOE contractor may not take any adverse action, such as discharge, demotion, coercion or threat, against any employee for "[d]isclosing to a DOE official . . . information that [the employee] reasonably and in good faith believe[s] reveals -- (3)Fraud, gross mismanagement, gross waste of funds, or abuse of authority." 10 C.F.R. § 708.5(a)(3). However, the regulations clearly place the initial burden upon the complainant: "The employee who files a complaint has the burden of establishing by a preponderance of the evidence that he or she made a disclosure . . . ." 10 C.F.R. § 708.29; *see Ronald Sorri*, 23 DOE ¶ 87,503 (1993). "Preponderance of the evidence" is proof sufficient to persuade the finder of fact that a proposition is more likely true than not true when weighed against the evidence opposed to it. *See Hopkins v. Price Waterhouse*, 737 F. Supp. 1202, 1206 (D.D.C. 1990) (*Hopkins*); 2 McCormick on Evidence §339 at 439 (4th Ed. 1992). Under this standard, the burden of persuasion is allocated roughly equally between both parties. *See Grogan v. Garner*, 111 S. Ct. 654, 659 (1991) (holding that the preponderance standard is presumed applicable in disputes between private parties unless particularly important individual interests or rights are at stake.)

A. Complainant's Appeal

In her Appeal, the Complainant raises a number of contentions in support of her position that the determination reached in the Initial Agency Decision is incorrect as a matter of fact and law. The Complainant's contentions focus on the three alleged retaliatory acts. These contentions are addressed successively below.

1. The Complainant's FY 1997 Performance Assessment

In support of her Appeal, the Complainant contends that her 1997 Performance Assessment did not take account of her "excellent work" performing Integrated Site Baseline functions for nine months of the

rating period, thus preventing her from receiving a cash bonus under FDH's "MVP" program. She further contends that the alleged inaccurate assessment is the "direct result of my filing protected disclosures." Complainant's Appeal at 2. The Complainant adds that her manager and team leader believed her FY 1997 work to be "excellent." She disagrees with the Hearing Officer's statement that her assertion that the assessment does not accurately reflect her performance is highly speculative and not supported by the evidence. Id.

I note first that the Complainant made this same argument during the hearing. The Hearing Officer found that FDH gave credible and convincing explanations for why the Complainant's 1997 Assessment emphasized the last three months of the rating period, and that the Assessment would have been written in the same manner absent the Complainant's protected disclosures. The following testimony at the hearing from FDH management officials supports the Hearing Officer's conclusion:

Q. In 1997, after Ms. Johndro-Collins left your supervision and Mr. Fish's lead, during the remaining part of that year did you have any input into Ms. Johndro-Collins' evaluation for the year, fiscal year 1997?

A. Yes

Q. Please describe it.

A. Witness Hafer: Gordon McCleary [Complainant's manager] approached me as he was actually going to give the performance appraisal and asked me for my input. I went to see . . . who was the lead. Frankly, I thought his input was a little overly critical and my input to Gordon McCleary was that she had performed acceptable over the nine months.

. . . . . .

Hearing Transcript at 115.

Q. Did you agree with the section regarding the four categories she was rated acceptable in?

A. Witness Hafer: Yes, I do.

Q. How would you characterize the input you received from Mr. Fish as to what category she should have ended up in that performance appraisal for the first nine months evaluation?

A. Witness Hafer: I didn't ask him [the lead] to actually mark any of the boxes, but my opinion of his input was he would have had at least one or two categories that would have said ?needs improvement'.

. . . . . .

Id. at 117.

Q. The allegation has been made that the first nine months of Ms. Johndro-Collins performance in fiscal 1997 was ignored by management. Is that true?

A. Witness McCleary: No, it's not.

. . . . . .

Q. There has been ample testimony that the company emphasized the last three months of the fiscal 97 period for her performance appraisal, the whole of which you just read a part. Can you tell us, is that accurate to the best of your recollection.

A. Witness McCleary: Yes, it is accurate

Q. Why did the company do that?

A. Ann's performance had not been satisfactory in [the] view of the people who had been supervising her prior to her becoming a member of my team. My opinion was that they were unduly hard about that. My intent was to . . . she was doing good work for me. I wanted to give her a fresh start, focus on the positive, not the negative aspects of the review.

Q. Did you feel the emphasis on the last three months benefited her?

A. Yes.

Id. at 150-151.

I agree with the Hearing Officer's conclusion that FDH management offered convincing explanations as to why the Complainant's Assessment emphasized the last three months of the rating period. As stated in the above testimony, Hafer, the Complainant's manager for the nine month period in question, expressly stated that the Complainant's performance was acceptable, not outstanding during the nine month period. This period preceded the Complainant's protected disclosures. Hafer also suggested that the Complainant's Team Leader would have given input that would have led to a less than "acceptable" rating in two of four categories during this time period. In addition, the testimony also emphasizes that the Complainant's first nine months of performance during FY 1997 were not discounted, but rather the last three months were emphasized because it would benefit the Complainant.

As for the Complainant's contention that she was prevented from receiving a cash bonus, the testimony in the record indicates that an "acceptable" performance appraisal did not prevent FDH employees from receiving cash bonuses. But that rating also did not automatically mean that an employee would get a bonus. In light of this testimony, I find Complainant's contention regarding her FY 1997 Assessment to be without merit, and uphold the Hearing Officer's determination concerning this issue.

2. The Complainant's Promotion Without A Raise

As with the first contention, I find equally unavailing the Complainant's second contention that she received a promotion from a Grade 14 to a Grade 16 without a corresponding pay raise. The Hearing Officer's finding regarding this issue is quite persuasive. He states:

Although the Complainant has characterized her advancement to grade 16 as a promotion without a raise, this characterization is not accurate. The general procedure at FDH is for salary changes to occur once a year, in October. The ceiling for pay increases in FY 1997 was 5%. Approximately 80% of FDH employees received some increase, with most increases in the 3-4% range. The Complainant received a 4% merit raise in October 1997. The following January, the merit raise was re-coded as a promotion, made retroactive to October 1997. Consequently, it is accurate to say that the Complainant received a promotion to grade 16 with a 4% raise, effective in October 1997.

Initial Agency Decision, 27 DOE ¶ 87,530 at 89,160.

As explained in the Initial Agency Decision, the Complainant, as well as other employees, in essence received in January 1998 a "dry promotion" (the process by which an employee is advanced in pay grade while not simultaneously receiving an increase in salary). The testimony in the record reflects that shortly before receiving the dry promotion, the Complainant filed an EEO complainant, alleging gender discrimination. According to FDH management, the EEO complaint elicited a review of the Complainant's work, which in turn led to the dry promotion. Thus, FDH management asserted that the EEO complaint caused it to review the Complainant's performance and consider whether she was qualified for a Grade 16. In addition, the record reflects that rather than being considered a negative personnel action, receiving a dry promotion has its advantages. According to the testimony of Harold Lacher, the

manager of Human Relations for FDH, two benefits of receiving a dry promotion are 1) the employee acquires the potential for greater future pay increases and 2) the employee can accumulate time in the new grade, a consideration when the employee is being considered for future promotion. Based on the foregoing, I find that the Complainant has not shown any negative aspects from her promotion from Grade 14 to Grade 16 and therefore the promotion does not constitute a retaliatory act as defined in 10 C.F.R. § 708.2. I uphold the Hearing Officer's determination regarding this issue.

3. The Complainant's Assignment to a Position Formerly Held by an Employee in Pay Grade 18

Finally, the Complainant asserts that the Hearing Officer disregarded her manager's testimony "where he agrees that work I have done under his direction over the last five years is all currently done by grade 18s." Appeal at 5. In the Initial Agency Decision, the Hearing Officer found that the Complainant's assignment in January 1998 to the Strategic Planning team was not a retaliatory act. The position was offered to the Complainant at a pay grade 16, and she accepted it on those terms. The Hearing Officer further found that there was no evidence that the Complainant is performing work at a pay grade 18 level. He refers to testimony in the record that indicates that the Complainant does not bear the responsibility that grade 18 employees have. The Complainant has referred me to nothing which would controvert his conclusions. The testimony in the record clearly supports the Hearing Officer's conclusions regarding this contention and therefore, it is not necessary to analyze the Complainant's contention further.

B. Conclusion

On the basis of the foregoing, I conclude that the Complainant has failed to show in her Appeal that the determination reached in the Initial Agency Decision is erroneous as a matter of fact or law. I concur with the determination that the Complainant has not prevailed on any of the three allegations of retaliatory acts. Accordingly, the Complainant's Appeal must be denied.

It Is Therefore Ordered That:

(1) The Appeal filed by Ann Johndro-Collins on October 29, 1999, of the Initial Agency Decision issued on September 27, 1999 (Case No. VWA-0037), is hereby denied. Accordingly, as determined in the Initial Agency Decision, the complaint filed by Ann Johndro-Collins under the Contractor Employee Protection Program, 10 C.F.R. Part 708 , is denied.

(2) This Appeal Decision shall become a Final Agency Decision unless a party files a petition for Secretarial review with the Office of Hearings and Appeals, within 30 days after receiving this decision.

DECISION AND ORDER OF

THE DEPARTMENT OF ENERGY

Appeal

Name of Petitioner: John L. Gretencord

Date of Filing: November 26, 1999

Case Number: VBA-0041

This Decision considers an Appeal of an Initial Agency Decision (IAD) issued on November 4, 1999, involving a complaint filed by John L. Gretencord (Gretencord or the complainant) under the Department of Energy (DOE) Contractor Employee Protection Program, 10 C.F.R. Part 708. In his complaint, Gretencord claims that West Valley Nuclear Services, Inc.(West Valley), a DOE contractor, terminated his employment in retaliation for his making disclosures that are protected under Part 708. In the IAD, however, the Hearing Officer determined that West Valley had shown that it would have terminated the complainant for his aggressive and anti-social behavior even in the absence of the protected disclosures. As set forth in this decision, I have determined that Gretencord's Appeal must be denied.

I. Background

A. The DOE Contractor Employee Protection Program

The Department of Energy's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste and abuse" at DOE's Government-owned or -leased facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purpose is to encourage contractor employees to disclose information which they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers. Thus, contractors found to have retaliated against an employee for such a disclosure, will be directed by the DOE to provide relief to the complainant. See 10 C.F.R. § 708.2 (amended regulations) (definition of retaliation).

The DOE Contractor Employee Protection Program regulations, which are codified as Part 708 of Title 10 of the Code of Federal Regulations and became effective on April 2, 1992, establish administrative procedures for the processing of complaints. As initially formulated, these procedures typically included fact- finding by the DOE Office of Inspector General, followed by the issuance of a Report of Inquiry setting forth the IG's findings and recommendations on the merits of the complaint. Thereafter, the complainant could request a hearing before a Hearing Officer assigned by the DOE Office of Hearings and Appeals (OHA), pursuant to which the Hearing Officer renders an Initial Agency Decision.

On March 15, 1999, DOE issued an amended Part 708, effective April 14, 1999, setting forth procedural revisions and substantive clarifications that "apply prospectively in any complaint proceeding pending on the effective date of this part." 10 C.F.R. § 708.8; *see* 64 Fed. Reg. 12,862 (March 15, 1999). Under the revised regulations, review of an Initial Agency Decision, as requested by Gretencord in the present

Appeal, is performed by the OHA Director. 10 C.F.R. § 708.32.

B. Complaint Proceeding

The events leading to the filing of Gretencord's complaint are fully set forth in Gretencord v. West Valley Nuclear Services, Inc., 27 DOE ¶ 87,535 (1999)(Gretencord). I will not reiterate all the details of that case here. For purposes of the instant appeal, the relevant facts are as follows.

Gretencord was employed by West Valley as a Senior Quality Control/Quality Assurance Engineer from January 1990 to March 18, 1997. On March 26, 1997, Gretencord filed a complaint under Part 708 with the DOE Office of Inspector General's Office of Inspections (IG). In his Complaint, Gretencord alleged that he was retaliated against for disclosures of possible safety violations, fraud and mismanagement. The IG's Report of Investigation (ROI) found that "the evidence is clear and convincing that [Gretencord] was terminated for reasons other than his protected disclosure." Gretencord, 27 DOE at 89,178. After the issuance of the ROI, Gretencord requested and received a hearing on this matter before an OHA Hearing Officer. Gretencord called 13 witnesses, and West Valley called 11 witnesses. The hearing took five days.

C. The Initial Agency Decision

In the IAD, the Hearing Officer cited the burdens of proof under the Contractor Employee Protection Regulations:

"the employee who files a complaint has the burden of establishing by a preponderance of the evidence that he or she made a disclosure . . . as described under §708.5, and that such act was a contributing factor in one or more alleged acts of retaliation against the employer by the contractor. Once the employee has met this burden, the burden shifts to the contractor to prove by clear and convincing evidence that it would have taken the same action without the employee's disclosure . . . ." 10 C.F.R. § 708.29.

Gretencord, 27 DOE at 89,178.

The Hearing Officer noted that West Valley admitted that Gretencord made at least 14 protected disclosures while employed by the firm. The Hearing Officer further determined that a number of negative personnel actions occurred during that period. These actions included several letters of reprimand, poor performance evaluations, a suspension, and finally an involuntary termination. The Hearing Officer found that since both Gretencord's protected disclosures and the negative personnel actions were interspersed throughout his tenure at West Valley, Gretencord had met his initial burdens under § 708.29, thereby shifting the burden to West Valley to prove by clear and convincing evidence that it would have taken the same actions without Gretencord's protected disclosures.

Gretencord, 27 DOE at 89,178.

The Hearing Officer found that Gretencord exhibited an extraordinary number of personality conflicts, engaged in confrontations and arguments with other members of West Valley's workforce, repeatedly failed to control his temper, issued threats to fellow employees and made bizarre and disturbing statements in the presence of other workers. The Hearing Officer also found that, with only one exception, Gretencord did not deny that any of the cited incidents had occurred. The Hearing Officer concluded that Gretencord failed to respond to the firm's attempts to help him modify his behavior, and that these abusive and frightening actions were the basis for West Valley's adverse personnel actions. Gretencord, 27 DOE at 89,179.

To support these conclusions, the Hearing Officer cited 10 events showing the complainant's outbursts and abusive behavior, as well as three memoranda documenting West Valley's instructions to Gretencord to seek help from the firm's Employee Assistance Program in controlling his behavior. This occurred during the period March 14, 1990, through February 17, 1997. Gretencord, 27 DOE at 89,179-80.

The Hearing Officer then described an event that took place on February 27, 1997. I will refer to this occurrence as the "triggering behavior," because it led to Gretencord's termination one week later. Since the discharge is the key retaliation in this case, this event is very important in this Appeal. I have therefore cited it in full below, as it was set forth in Gretencord.

On February 20, 1997, the Supervisor of West Valley's Electrical Department, Bruce Covert, encountered Gretencord engaged in a conversation in the Electrical Department's offices. Covert asked Gretencord why he was there. Gretencord informed Covert that he was assigned to conduct a surveillance of that department. Gretencord then asked to see some documents. Covert then telephoned Gretencord's supervisor, who informed Covert that Gretencord had not been assigned to conduct a surveillance of the electrical area. Gretencord then became angry. Covert reported that Gretencord said " I am coming back to write you up on paperwork issues and I am going to [West Valley] and DOE with this as you must be hiding something." A co-worker reported that he overheard Gretencord say "I just love doing that sort of thing." Another co-worker reported that Gretencord made a similar statement the next day.

On February 25, 1997, Gretencord met with Tom Crisler of West Valley's Human Resources Department. Crisler recounted that, during this meeting, Gretencord expressed his belief that direct, aggressive and disrespectful conduct was acceptable for a Quality Assurance Engineer. At this meeting, Gretencord was informed that he was being suspended pending an investigation into his conduct.

On February 27, 1997, Gretencord again met with Crisler. Crisler informed Gretencord that his employment with West Valley was being terminated because of his lack of respect for his co-workers. During this meeting, Crisler alleges, Gretencord held out his left arm. Allegedly, Gretencord noted that his arm was very steady and that enabled him to be good at aiming a gun. Crisler further alleged that Gretencord then said he needed to think about becoming a whistleblower.

Gretencord, 27 DOE at 89,180-81.

The Hearing Officer also described the following testimony at the hearing, supporting West Valley's position that Gretencord's behavior was unacceptable:

A number of Gretencord's co-workers testified that they or other co-workers personally feared him. Transcript at 359, 603, 671-672, 818-19, 825-26, 830, 951, 1422-24, 1435. Moreover, a number of Gretencord's co-workers testified that they witnessed Gretencord engaged in disturbing behaviors. Thomas J. Holden testified that he had witnessed Gretencord engaged in loud and threatening confrontations on a few occasions. [Transcript of Hearing, hereinafter Tr.] Tr. at 65-66, 80-81. Vitto Riggi testified that he witnessed Gretencord have violent outbursts on at least two occasions. Tr. at 201-04. Linda Baker testified that she saw Gretencord in a local mall. When Baker asked why he was at the mall he indicated that he was there to bump into little kids or to trip them. Tr. at 362, 424, 432. Baker also testified that she witnessed Gretencord get mad at people and yell and scream at them. Tr. at 423. Jerome E. Hager recounted an incident where Gretencord provoked a fellow employee to slap him by refusing to stop singing a song about that employee. (This song was sung by Gretencord to the tune of the Gilligan's Island theme song). Tr. at 470. Jack Gerber testified that Gretencord joked about stepping on little children's toes in the mall. Tr. at 652. Phil O'Brien testified that Gretencord had told him that he had a vendetta against Bruce Covert. Tr. at 781. Dave Crouthamel testified that Gretencord had talked about poisoning and shooting "little Halloween kids." Tr. at 1150, 1214-15, 1240-42.

Gretencord, 27 DOE at 89,181.

Noting that Gretencord did not even attempt to rebut the veracity of most of these allegations regarding his behavior, the Hearing Officer concluded that the complainant's unacceptable behavior interfered with West Valley's business operations. Accordingly, the Hearing Office determined that the firm had proven by clear and convincing evidence that it would have discharged Gretencord absent the protected disclosures.

II. The Gretencord Appeal

In connection with his Appeal, Gretencord filed a statement identifying the issues on which he wished the Director of the Office of Hearings and Appeals to focus in this phase of the Part 708 proceeding (hereinafter Statement of Issues or Statement). 10 C.F.R. § 708.33. The Statement presents the following issues for my review: (i) the Hearing Officer failed to properly credit the key protected disclosures; (ii) the Hearing Officer overlooked the importance of the timing of discharges versus key disclosures; (iii) the Hearing Officer failed to issue a subpoena for a key witness; (iv) the Hearing Officer failed to allow Gretencord access to the West Valley site; (v) the Hearing Officer failed to credit competent rebuttal evidence and (vi) the Hearing Officer failed to give credit to evidence that the complainant had a right to be in the electrical shop at the time of the triggering behavior. (1)

As discussed below, I do not find any merit to the matters raised for my review, and consequently I will not reverse the Hearing Officer's determination.

1. Failure to Acknowledge Key Protected Disclosures

The Statement first alleges that the Hearing Officer failed to properly credit all of the key protected disclosures. On May 12, 1999, the Hearing Officer issued a Decision and Order limiting Gretencord's protected disclosures to 15 protected disclosures. West Valley Nuclear Services Co. Inc., 27 DOE ¶ 87,511 (1999)(WVNS). The Statement sets forth six disclosures in particular that it contends should also been included in the list of protected disclosures.

This objection is unavailing. The Hearing Officer specifically enumerated 15 protected disclosures. WVNS, 27 DOE at 89,080-81. This exceeds the number of disclosures necessary to find that the complainant has made the required regulatory showing on this point. I see no error in the Hearing Officer's determination, or his decision to limit the number of protected disclosures deemed relevant in this case. It was not only proper for the Hearing Officer to limit and define the issues that would be considered in this proceeding, it was imperative for an orderly proceeding for him to do so. See 10 C.F.R. § 708.28(b)(4). It is a vital part of the role of the Hearing Officer in any case brought under Part 708 to refine and structure the issues presented for resolution.

Moreover, there is clearly no prejudice to Gretencord arising from the fact that there may have been other protected disclosures that the Hearing Officer did not consider. Once a finding is made that there was a protected disclosure that was a contributing factor to a retaliation, it is irrelevant if there were additional disclosures. The inclusion of additional protected disclosures in this case would not alter the result in the Initial Agency Decision or in any other manner work to Gretencord's advantage. Nor does their exclusion create a disadvantage for Gretencord. I find that the inclusion of additional protected disclosures would make no difference in this case whatsoever.

2. The Timing of the Discharge

The Statement claims that the Hearing Officer overlooked the importance of the timing of the discharge vis-a-vis the key disclosures in this case. The so-called "key disclosures" to which the Statement alludes involve Gretencord's disclosures regarding his compliance investigation of Report 93-N-117 (Report #93) and other quality problems that he found in West Valley's electrical shop. See Complaint, Vol. 1 at 4-17. (2) The Statement alleges that the Hearing Officer did not give adequate consideration to the fact that Gretencord's termination occurred at "exactly the same time as these key protected disclosures."

As discussed above, under Part 708, the complainant has the burden of establishing by a preponderance of the evidence that a disclosure that he made was a contributing factor to a retaliation by his employer. In our cases, we have repeatedly indicated that the "contributing factor" showing can be made by time proximity, that is, by establishing that the retaliation took place shortly after the protected disclosure was

made. E.g., Don W. Beckwith, 27 DOE ¶ 87,534 (1999).

The Hearing Officer followed that precedent in the instant case. Specifically, he found that the protected disclosures were "interspersed throughout his [Gretencord's] tenure at West Valley, as were the negative personnel actions taken against him." Gretencord, 27 DOE at 89,178-79. Based on this finding, the Hearing Officer determined that Gretencord's showing with respect to the "contributing factor" element had been satisfied, and that the burden had shifted to West Valley to show "by clear and convincing evidence that it would have taken the same actions without Gretencord's protected disclosures." Id. at 89,179.

The Statement seems to allege, however, that there is some error in the fact that the Hearing Officer found that the burden was met through this "interspersion" of protected disclosures and alleged retaliations, rather than by specifically pointing to closeness in time between Report #93 and the subsequent termination. I do not agree. There is no prejudice to the complainant arising from the Hearing Officer's finding. Since, as the Statement itself admits, the Hearing Officer shifted the burden of proof, I fail to see how his "interspersion" analysis makes any real difference to Gretencord.

The Statement implies, however, that the Hearing Officer should in some way have given some extra weight to the fact that the complainant's termination occurred "at exactly the same time as the key protected disclosures and a conflict with a Respondent agent over quality concerns." I believe that the Hearing Officer accorded the proper weight to these facts by shifting the burden of proof to the contractor. I cannot discern in what way the facts referred to by the Statement could have been accorded more weight, so as to change the outcome in this case.

3. Failure to Issue Subpoena for Key Witness

The Statement next contends that the Hearing Officer erred in failing to issue a subpoena for a key witness. According to the Statement, this potential witness is a former co-worker of Gretencord who purportedly has critical information regarding Gretencord's actions in February 1997, when he investigated and disclosed to West Valley non-compliance with respect to Report #93. The Statement alleges that the Hearing Officer orally told Gretencord that he would not issue a subpoena for this witness.

The Statement points to no request by Gretencord for a subpoena for this individual. I see no reference to this matter anywhere in the record. There is thus no basis for me to conclude that the Hearing Officer actually refused to issue a subpoena for this witness. Moreover, I have some doubt that he did refuse. I note that the Hearing Officer readily allowed testimony from 13 witnesses offered by the complainant. The record indicates that he issued a subpoena for each of them. The Statement offers no reason why the Hearing Officer would have refused to issue a subpoena for this particular witness. After reviewing the record, I cannot see any reason that the Hearing Officer would have refused such a request, if it were made. Consequently, the assertion in the Statement of Issues that Gretencord made a request for a subpoena that the Hearing Officer then orally denied seems implausible to me.

In any event, the Statement fails to elucidate the nature of the "key information," other than to state that the individual has direct knowledge of West Valley's threat to terminate Gretencord. The record already reflects that the firm had disciplined Gretencord on several occasions. There is no doubt that West Valley terminated Gretencord from his position with the firm. The existence of information about additional "threats" on the issue of discipline in and of itself would not be surprising or necessarily useful in this case. Accordingly, I find that the Statement has not shown any error with respect to this issue.

4. Failure to Allow Access to West Valley Site

The Statement points out that Gretencord requested access to the West Valley site as part of discovery in this proceeding. See 10 C.F.R. § 708.28(b)(2). The Statement claims that the Hearing Officer improperly refused to "grant Gretencord this right, which could have revealed evidence which rebutted Respondent's

[West Valley's] position that ?Gretencord had not been assigned to conduct a surveillance of the electrical area' and/or evidence illustrating the propriety of Mr. Gretencord's investigation of the electrical area."

This allegation, too, is without merit. As an initial matter, in his April 15, 1999 letter regarding discovery, Gretencord asked permission to enter the West Valley site to inspect electrical and mechanical equipment and documents including surveillance and non- conformance reports. This suggests that his motives for this discovery were to substantiate the legitimacy of his claim that there were irregularities at the site. As the Hearing Officer noted, the validity of Gretencord's claims of safety deficiencies is not a relevant issue in this case, and thus there was no reason to allow him on site for that purpose. Letter of Hearing Officer dated June 3, 1999.

Moreover, ordering discovery in a proceeding under Part 708, is a matter within the discretion of the Hearing Officer. 10 C.F.R. § 708.28(b)(1). Considerable latitude must be afforded a hearing officer in order to allow proper regulation of a whistleblower proceeding. I see no abuse of that discretion here. One purpose of the discovery on the West Valley site as now indicated in the Statement, is newly propounded. The Statement suggests that if Gretencord were allowed to inspect the site, he might have been able to locate evidence that he was assigned to the electrical area. This information would rebut the contractor's stated position that Gretencord was not authorized to be in that area.

The discovery Gretencord seeks would be irrelevant in this case. Even if the complainant could establish that he was authorized to be in the electrical area, the issue in this case is, in part, his behavior when he was told to leave. I find that his behavior towards Bruce Covert on this occasion could not be condoned even if Gretencord had in fact been assigned to the electrical area. See Tr. at 949.

Accordingly, I must reject this claim of error made in the Statement.

5. Failure to Credit Competent Rebuttal Evidence

The Statement cites the testimony at the hearing in this matter of ten witnesses presented by Gretencord, and claims that the Hearing Officer ignored their favorable testimony. I have reviewed this testimony, and find that it is certainly true that this testimony was favorable to the individual. Nevertheless, given the massive amount of testimony in this case, it is obvious that the Hearing Officer could not have reasonably set forth in his decision his views on all the assertions made at the hearing. Of necessity, he could only refer to the key testimony in his Initial Agency Decision.

Overall, however, the one-paragraph of analysis of the testimony of all of the witnesses in this case does appear rather brief, in view of the fact that the hearing lasted five days and the transcript was more than 1,400 pages. The Hearing Officer did not analyze testimony that was favorable to the complainant. He did not specifically weigh and balance the testimony that was favorable and unfavorable to Gretencord. I would have preferred to see a more developed analysis of all of the hearing testimony.

While in some cases such a failure might result in a remand with a direction that the Hearing Officer fully consider the evidence, I will not take that step here. The Hearing Officer's own assessment of the weight of the favorable evidence in this case seems less critical, given the solid and abundant testimony that was adverse to the complainant. That evidence in its totality was compelling, in comparison with the relatively scant evidence that was in Gretencord's favor. Since the vast weight of the evidence in this case supports West Valley's position, and even many of the complainant's own witnesses indicate that he had serious behavioral problems, I am able to make a determination from the record itself that there was no error in the result reached by the Hearing Officer. My detailed analysis is set out below.

I have specifically reviewed the testimony of those witnesses which Gretencord now contends should have been accorded explicit consideration. Although the Statement alleges that there was key favorable evidence to support the complainant, I find that the Statement fails to cite any testimony that supports in any meaningful way Gretencord's position that his termination was improper.

A. The Statement notes that several of the witnesses testified that the complainant's job performance was good. E.g., Tr. at 34, 97-98, 111-112. However, Gretencord's actual performance of his duties is not at issue here. The issue here is whether West Valley has shown by clear and convincing evidence that he was unable to get along with his co-workers and so confrontational that other employees were fearful of him or were unable to work with him. Some of the same employees who gave Gretencord good marks for his overall performance confirmed that he dealt poorly with other employees. E.g., Tr. at 34, 142. The testimony about his good job performance should have been noted, but I do not believe it would have affected the Hearing Officer's ultimate conclusion, nor do I believe it should have.

B. The Statement also claims that the Hearing Officer did not specifically weigh testimony of witnesses who said that they did not see Gretencord ever enter into an altercation with anyone. The fact that a particular employee never actually saw Gretencord involved in an altercation does not discredit the testimony of those who did see such actions. In fact, the very witnesses who testified on this point stated that Gretencord was difficult to get along with and interfered with daily work. Tr. at 232-33, 491. I therefore see no prejudice to the complainant on this issue.

C. The Statement also cites the testimony of one witness who indicated that employees "holler at each other quite often." Tr. at 206. The Statement contends that more weight should have been accorded this testimony, alleging that it shows that Gretencord's actions were not unusual. I do not agree with this assertion. Taken in context, I find this testimony refers only to normal give and take between employees on the job. It does not refer to the type of altercation that Gretencord engaged in, which tended to be much more threatening and confrontational. The evidence on this score remains unaffected by the testimony to which the Statement refers.

In this same vein, the Statement further refers to the testimony of a witness who indicated that there were regular "confrontations" between other West Valley employees. Tr. at 522. The rather passing reference to confrontations made by this witness in no way supports the complainant's position. This witness did not refer to any specific confrontation or actually describe any confrontation at all. Thus, I cannot conclude that this individual witnessed any confrontation that in any way resembled Gretencord's angry, threatening behavior.

The Statement further contends that Bruce Covert, who was directly involved in the incident leading to the triggering behavior, testified that he did not recall Gretencord ever using "vulgar" language. This assertion does not even begin to rebut the ample evidence of the abusive and threatening nature of Gretencord's confrontations with other employees. The fact that one witness claimed that no outright vulgarity was involved hardly absolves Gretencord or rebuts the clear and convincing showing of Gretencord's severe behavioral difficulties made by West Valley.

D. The Statement asserts that the Hearing Officer did not give credit to evidence that Gretencord was authorized to be in the electrical area at the time of the triggering incident. As stated above, this is simply irrelevant. Whether and the extent to which Gretencord's behavior was unacceptable is the key issue here, not whether he was authorized to be in that area.

E. The Statement finally argues that the Hearing Officer failed to give sufficient weight to the fact that there was a 14-month period prior to the triggering behavior during which no behavioral complaints were lodged against Gretencord. Initially, I note that the lack of any complaints for this period, if true, in no way confirms that Gretencord had modified his unacceptable behavior. More importantly, I fail to see how this allegation, if true, provides any meaningful rebuttal to the compelling case of Gretencord's totally inexcusable behavior offered by West Valley. As the record here makes clear, the complainant had a long history of behavioral problems dating from 1990. There was a long period in 1994 when there were no complaints about Gretencord. Nevertheless, there is ample evidence that Gretencord resumed his poor behavior in 1995, and he was terminated from his position at West Valley in 1997. Thus, the existence of a period during which no complaints were made, followed by a resumption of unacceptable behavior, is not unprecedented for Gretencord. From the firm's point of view, the triggering behavior was clearly the final

straw after a long period of difficulty with Gretencord, and repeated warnings to him. Accordingly, I do not see that the 14-month hiatus referred to by the Statement establishes that the determination of the Hearing Officer was erroneous, or should be altered in any way.

After reviewing West Valley's overall showing, I do find it meets the clear and convincing standard set forth at Section 708.29. Nevertheless, I would have preferred the firm to have provided evidence on whether other West Valley employees exhibited behavioral problems, the nature of those problems, and how the firm resolved them.

III. Conclusion

On the basis of the foregoing, I conclude that Gretencord has failed to show in his Appeal that the determination reached in the Initial Agency Decision is erroneous as a matter of fact or law. I concur with the determination that West Valley has shown by clear and convincing evidence that it would have terminated Gretencord even in the absence of the protected disclosures. Accordingly, Gretencord's Appeal must be denied.

It Is Therefore Ordered That:

(1) The Appeal filed by John L. Gretencord on November 26, 1999, of the Initial Agency Decision issued on November 4, 1999, is hereby denied. Accordingly, as determined in the Initial Agency Decision, the complaint filed by John L. Gretencord on March 27, 1997, under the Contractor Employee Protection Program, 10 C.F.R. Part 708, is denied.

(2) This Appeal Decision shall become a Final Agency Decision unless a party files a petition for Secretarial review with the Office of Hearings and Appeals, within 30 days after receiving this decision. 10 C.F.R. § 708.35.

George B. Breznay

Director

Office of Hearings and Appeals

Date: March 13, 2000

(1)West Valley filed a Response to the Statement. 10 C.F.R. § 708.33.

(2)Report #93 dealt with the labeling of junction boxes within radiation areas. Gretencord believed that no inspection of the labeling had been done, even though the Report indicated that the inspection had been performed.

Case No. VBA-0042

November 1, 2001

DECISION AND ORDER OF

THE DEPARTMENT OF ENERGY

Appeal

Name of Petitioner: Richard Sena

Date of Filing: March 15, 2001

Case Number: VBA-0042

This Decision considers an Appeal of an Initial Agency Decision (IAD) issued on March 1, 2001, involving a Complaint filed by Richard Sena (Sena or the Complainant) under the Department of Energy (DOE) Contractor Employee Protection Program, 10 C.F.R. Part 708. In this case, Sena made a protected disclosure regarding subcontracator personnel who were using the Internet improperly at the DOE's Sandia National Laboratories. In his Complaint, Sena maintains that his former employer, Sandia Corporation (Sandia), a contractor that operates Sandia National Laboratories on behalf of the DOE, retaliated against him for making that protected disclosure. The retaliation Sena alleges is constructive discharge by Sandia. In the IAD, the Hearing Officer determined that Sena had made a disclosure that is protected under Part 708, and that Sandia created a hostile work environment, causing Sena to go on temporary sick leave and ultimately to retire from Sandia on disability. The Hearing Officer therefore sustained Sena's Complaint, and ordered Sandia to pay Sena an amount that would put Sena in the same position as if he had worked for Sandia until retirement age. *Richard R. Sena*, 28 DOE ¶ 87,009 (2001)(*Sena*). In a separate phase of this proceeding, the Hearing Officer calculated the appropriate amount of that compensation, plus costs and attorney fees, and ordered Sandia to pay a total of $367,088.69. Of that amount, $342,324.77 was awarded to Sena as compensation. The remainder represents attorney's fees and other costs. *Richard R. Sena*, 28 DOE ¶ 87,012 (2001). Sandia filed an appeal of the IAD. 10 C.F.R. § 708.32. As set forth in this decision, I have determined that the IAD should be sustained.

I. Background

A. The DOE Contractor Employee Protection Program

The Department of Energy's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste and abuse" at DOE's Government-owned or -leased facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purpose is to encourage contractor employees to disclose information which they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers. Thus, contractors found to have retaliated against an employee for such a disclosure, will be directed by the DOE to provide relief to the complainant. *See* 10 C.F.R. § 708.2 (amended regulations) (definition of retaliation). (1)

B. History of the Complaint Proceeding

The events leading to the filing of Sena's Complaint are fully set forth in *Sena*, and I will not reiterate all the details of that case here. For purposes of the instant appeal, the relevant events are as follows. In 1995, as stated above, Sena made a protected disclosure regarding improper use of office Internet connections. Six subcontractor employees were fired. Three years later, two of those employees returned to Sandia and worked in the same area as Sena. Sena found their presence caused him considerable stress and, after a period of sick leave, retired on disability in 1999. He filed a Complaint of Retaliation with the DOE, claiming constructive discharge by Sandia as a retaliation for the protected disclosure. A DOE Investigator performed an investigation of the circumstances surrounding this case and on February 24, 2000, issued a Report of Investigation (ROI). The ROI found that Sena made a protected disclosure, but that it was not a contributing factor to a retaliation by Sandia, and further that Sandia did all that it could reasonably be expected to do to accommodate Sena. After the completion of an investigation, Sena requested and received a hearing on this matter before an OHA Hearing Officer. There were seven witnesses and the hearing lasted two days. After considering the testimony at the hearing and other relevant evidence, the Hearing Officer issued the IAD that is the subject of the instant appeal.

C. The Initial Agency Decision

In the IAD, the Hearing Officer cited the burdens of proof under the Contractor Employee Protection Program Regulations. They are as follows:

> The employee who files a complaint has the burden of establishing by a preponderance of the evidence that he or she made a disclosure, . . . as described under § 708.5, and that such act was a contributing factor in one or more alleged acts of retaliation against the employee by the contractor. Once the employee has met this burden, the burden shifts to the contractor to prove by clear and convincing evidence that it would have taken the same action without the employee's disclosure. . . .

10 C.F.R. § 708.29(d).

The factual findings made by the Hearing Officer are as follows. As stated above, Sena was an employee of Sandia. In 1995 he noticed that a number of subcontractor employees were using the Internet connection in their offices to view sexually explicit materials, in violation of Sandia policy. He reported this information to Sandia, which conducted an investigation and ultimately caused six employees to be fired. At the time of the terminations, Neil Hartwigsen, a Sandia senior manager, told each of these employees that they would not be allowed to work in the same area at Sandia again. He also told Sena that he (Sena) would never have a working relationship or contact with these employees again. On the day of the firing, someone blew up Sena's home mailbox. Shortly thereafter, Sena received several threatening telephone calls at his residence. *Sena*, 28 DOE at 89,069-70.

In July 1998, two of the fired employees (hereinafter "offending employees") returned to the Sandia site as employees for other contractors. They were permitted access to the same general area in which Sena worked. Sena objected to this and immediately told Hartwigsen that he feared for his safety. While Hartwigsen permitted the two individuals to return as subcontractor employees, he did not allow them to have on site offices and computers. *Id*. at 89,070.

Sena could not accept the stress that the presence of the offending employees caused him and, with the approval of Dr. Clevenger, the Sandia Medical Director, went on temporary sick leave for nine days in August 1998. Sena returned to work on August 17. After two working days, Sena returned to sick leave status.(2) While Sena was on sick leave, Hartwigsen offered to transfer Sena first to one job, and then, when Sena rejected that placement, to another job that would put some distance (100 yards) between him and the offending employees. These transfers would have placed Sena in buildings where the offending employees would not have a business reason to visit. When Sena declined the two placements, Sandia agreed not to move him. *Id.*

In September 1998, Sena was evaluated by a private psychologist who determined that he was suffering from Post Traumatic Stress Disorder (PTSD). In November 1998, all medical personnel involved with Sena concluded that he would be unable to return to work at Sandia. In November 1999, Sena's retirement on disability from Sandia was effective. *Id.* at 89,071.

After reaching the above findings of fact, the Hearing Officer reached the following conclusions.

He first found that Sena had made a protected disclosure, by revealing that employees were abusing the office Internet connection. He also found that this disclosure was a contributing factor to an act of retaliation.

The Hearing Officer concluded that Sandia management deliberately created the beginning of a hostile work environment because Hartwigsen sponsored the reinstatement of security clearances for the offending employees. He stated that even if it was not immediately clear that the presence of the offending employees was hurtful to Sena, Sandia management should have realized that the environment was hostile by the time that Sena had been on supervised medical leave for an extended period of time, by early November 1998. The Hearing Officer also found that Sandia had the authority to ban the offending employees from the site. *Id.* at 89,074. The Hearing Officer stated that "Sandia management's failure to remove the offending employees and alleviate the hostile work environment for Sena indicates intent to harm Sena." *Id.* at 89,072. The Hearing Officer concluded that "nothing was done, even though there was clear, simple, straightforward ways to get the situation ?under control:' remove the offending employees." *Id.* at 89,074. Based on these findings, the Hearing Officer sustained Sena's Complaint and granted him relief in the amount of $342,324.77.

II. Sandia's Statement of Issues and Sena's Response

Sandia filed a submission identifying the issues that it wishes the Director of the Office of Hearings and Appeals to review in this appeal phase of the Part 708 proceeding (hereinafter Statement of Issues or Statement). 10 C.F.R. § 708.33.

The Statement raises the following four issues for my review:

1. Whether the Hearing Officer erred in refusing to allow Sandia to introduce evidence at the hearing of an offer to remove the offending employees from performance of the contract, thereby preventing them from having contact with Sena in the workplace.

2. Whether the Hearing Officer erred in finding a causal relationship between the alleged retaliation and the disclosure. Sandia states that the only finding by the Hearing Officer in this regard was that Sandia management was aware of the disclosure when it allowed the offending employees to return to Sandia. Sandia believes that mere knowledge of the disclosure at the time that the offending employees returned to Sandia is not enough to establish a contributing factor under 10 C.F.R. § 708.29.

3. Whether the Hearing Officer erred in failing to adopt a "reasonable person" standard to determine whether Sandia subjected Sena to a hostile work environment, leading to the alleged constructive discharge.

4. Whether the Hearing Officer erred in failing to consider the Investigator's findings in the ROI, which were contrary to those in the IAD.

In his Response to the Statement, Sena offers the following reply to the issues Sandia has raised on appeal.

1. Sena states that the Hearing Officer properly excluded Sandia's offer to terminate the offending employees. Sena claims that this offer, which was made in a letter of October 2, 1998, written by Sandia's attorney, was not unconditional, but rather a negotiation position offered in the context of attempts to

settle the case. According to Sena, such a conditional offer is not admissible under Rule 408 of the Federal Rules of Evidence. Sena claims that since Sandia expected assurances from him in return for the firing, it was not unconditional, and therefore not admissible. Sena also claims that this offer was untimely, since it was made after the damage to his mental state was done, when he could never return to work at Sandia.

2. Sena challenges Sandia's claim that the Hearing Officer erred in finding that there was a causal relationship between his disclosure and the firm's treatment of him. In this regard, Sena claims that the real issue here is "whether conduct by non- supervisory or non-managerial fellow workers may constitute actionable retaliation by the employer." Sena maintains that condoning mistreatment of an employee makes it official mistreatment and since "retaliation" includes intimidation and threats by a contractor, Sandia's actions, allowing mistreatment of Sena by other employees, fall within the coverage of the regulations. 10 C.F.R. § 708.2.

3. Sena contends that the Hearing Officer used the correct standard in finding that Sandia created a hostile work environment. In this regard, Sena states that Sandia recognized that it had a responsibility to correct a hostile work environment, but simply did not take adequate steps to remedy the situation.

4. Sena states that the IAD was not arbitrary or capricious and that, after fully reviewing the record, the Hearing Officer was entitled to remain silent on the validity of the findings of the ROI.

III. Analysis

It is by now well-established that a key purpose of the Part 708 regulations is the protection of public and employee health and safety by ensuring that DOE contractor-employees feel secure when they bring forward in good faith evidence of unsafe and unlawful behavior. 64 Fed. Reg. 12862 (March 15, 1999). These protections would have no substance if employers may, by mere inaction, allow an unsafe or hostile workplace to exist, one that would make an employee fearful about disclosing information concerning dangers to public health and safety and other serious violations. Accordingly, in order to ensure that those contractor-employees who do advance such concerns are fully protected, contractor-employers are charged with the responsibility for keeping them safe from harm in the work place. If an employer allows an unsafe or hostile workplace for the whistleblower to exist, even by negligence, that employer breaches his fiduciary duty to protect the whistleblower- worker. It is this duty that is at the very core of Part 708. As discussed below, I find that by allowing a severely threatening work environment to exist in this case, Sandia breached its duty to Sena. There is no dispute that Sena ultimately developed post traumatic stress disorder (PTSD) which incapacitated him and ended his work career. The record also confirms that his PTSD was caused by his work environment. In fact, the Sandia Medical Director testified that had the offending employees not returned to Sandia, Sena would probably not have succumbed to PTSD. Transcript of Hearing (Tr.) at 368. Sandia's breach of its duty to Sena is all the more serious in light of the promise that the firm specifically made to Sena that he would never again have a working relationship or work contact with the offending employees. It is these underlying principles that inform my analysis of the facts and the law in this case.

A. I turn first to the alleged retaliation by Sandia. It is the complainant's burden in Part 708 cases to prove by a preponderance of evidence that his employer retaliated against him for making a protected disclosure 10 C.F.R. § 708.29. Sena claims Sandia retaliated for his protected disclosure by allowing the existence of a hostile work environment which ultimately forced him to leave the company on disability.

The general rule is that if the employer deliberately makes an employee's working conditions so intolerable that the employee is forced into involuntary resignation, then the employer has committed a constructive discharge. *See Martin v. Cavalier Hotel Corp.,* 48 F. 3d 1343 (4th Cir. 1995)(*Martin*). Thus, in order to prevail in this type of case, a plaintiff must allege and prove two elements: (1) intolerableness (hostility) of the working conditions (hereinafter hostile work environment element) and (2) the employer created the hostile environment in order to cause the employee to resign (hereinafter forced resignation element). *Id.* at 1354.

1. Hostile Work Environment Element

The Supreme Court recently analyzed in detail the elements of a hostile (i.e. intolerable) work environment. *Harris v. Forklift Systems Inc.*, 510 U.S. 17 (1998)(*Harris*). (3) The environment must be severely and pervasively hostile, one that a reasonable person would find abusive, and one that the complainant himself perceives to be so. The conditions of the victim's employment must be altered. *Id.* at 21. The Court stated:

whether an environment is "hostile" or "abusive" can be determined only by looking at all the circumstances. These may include the frequency of the discriminatory conduct; its severity; whether it is physically threatening or humiliating, or a mere offensive utterance; and whether it unreasonably interferes with an employee's work performance. The effect on the employee's psychological well-being is of course relevant to determining whether the plaintiff actually found the environment abusive. But while psychological harm, like any other relevant factor, may be taken into account, no single factor is required.

Id. at 23.

In addition to establishing the abusive elements that pervaded his workplace, the complainant alleging a hostile work environment must show that the employer knew or should have known of the hostile environment and failed to take appropriate action. *E.g.*, *Moore v. Kuka Welding Systems and Robot Corp.*, 171 F. 3d 1073 (6th Cir. 1999).

After reviewing the record in this case, I find that there are undisputed facts which support a finding that (a) a hostile work environment existed in this case, and (b) Sandia knew of the environment and failed to take prompt, appropriate corrective action.

As the hearing transcript indicates, after the offending employees were rehired to work at the same location as Sena, there were numerous direct confrontations between them and Sena.(4)

There is no question that these repeated, unwanted contacts with the offending employees caused Sena great mental anguish and resulted in his Post Traumatic Stress Disorder. Sena Exh. 5,6,11,12,14,15. There is also no question that a reasonable person would have felt threatened by being forced to work in the same building and on some of the same projects with the very individuals who were terminated as a result of his protected disclosure, particularly if these individuals made a point of appearing in his work space without a reason to do so, and asking him direct questions about the 1995 termination. These actions severely altered Sena's working conditions. They unreasonably interfered with his work performance and his ability to work, to the point that he was obliged to take sick leave. A reasonable person would have found these conditions to be hostile.

Having concurred with the Hearing Officer that Sena's work environment was hostile, I will next turn to a consideration of whether the employer deliberately created this environment, i.e., whether Sandia knew or should have known about the conditions and whether it failed to take prompt remedial action.

Sandia clearly knew about the actions of the offending employees, Sena's working conditions, and the adverse effects on Sena. Sena immediately relayed his concerns to Hartwigsen. Tr. at 438. In fact, the firm did take some remedial actions in an attempt to alleviate the abusive conditions. However, the record indicates that Sandia failed to take prompt, reasonable remedial actions. The steps Sandia took to resolve the hostile work environment were halfhearted, at best. In reality, they provided no meaningful alternative to Sena. For example, Sandia contends that from the outset it limited access by the offending employees to Sena's work area, and did not allow the offending employees to have any office space or computers. Tr. at 442-43, 459, 472-474, 476, 494, 476. Yet, as discussed above, almost immediately after being rehired, one of the offending employees appeared in Sena's work space, even though he had no reason to be there. Although the employee was instructed not to have interaction with Sena, this allegedly preventative measure by Sandia was essentially meaningless.

Sandia stated that it offered Sena two positions in areas away from those in which the offending employees were likely to have business. Tr. at 214, 215-16, 358-60, 385, 386, 397. The first position offered to Sena would have placed him in a building that was less than one block away from his old location. The site would have been accessible to the offending employees. Tr. at 212. Given the fact that the offending employees confronted Sena at the old location when they were not supposed to, Sena had no reason to believe he could avoid them at the new location. Sena had no reason to accept such a position or have any faith in its efficacy.

Sandia offered Sena another position in September 1998, after he had already been absent on sick leave. Letter of August 26, 1999 from Michael Danoff to Ellen Gallegos at 6. This job would have been located in a more distant building, one that was much less comfortable than Sena was accustomed to. The job involved a type of mechanical work that Sena believed would have been difficult for him to perform, given his fibromyalgia. Tr. at 215. Sena described both of these positions as "go-nowhere type of jobs." Tr. at 264. In my view, both job offers were empty, impractical proposals. Further, the fact that they were made after Sena's mental health became severely compromised indicates that the company did not act with due diligence.

As the Hearing Officer noted, there was a clear and rather simple solution to this problem: terminate the offending employees. Why Sandia failed to do this is not apparent to me. Hartwigsen professed not to know that he had such authority, but I am doubtful of this, and in any case, do not believe that his ignorance on this point should be a deciding factor here. (5) Hartwigsen was, in any event, fully aware of Sandia's duty to act if a hostile work environment existed. He testified: "If we have somebody who is in a hostile work environment, I believe it's our responsibility to resolve that hostile work environment. Now, if that means removing somebody, then I think they have to be removed." Tr. at 487-88.

There is some evidence that in a letter of October 2, 1998, Sandia did offer to terminate the offending employees. (6) However, this solution was only a conditional proposal, and in any case came too late. It would have been undertaken only if Sena first agreed to it. He was by that time already diagnosed as suffering from Post Traumatic Stress Disorder. Tr. at 141. I cannot see how Sena could have reasonably agreed to the termination, thereby implicitly making a commitment to return to the site, given the fact that his mental condition had already significantly deteriorated, and it was unclear whether he would ever be able to return to Sandia. Thus, at the point when the contingent offer to terminate the offending employees was finally made, it was no longer a viable solution.

In sum, although Sandia asserts that it made every effort to ensure that the offending individuals would not work directly with Sena, the assertions ring hollow, indeed. Tr. at 442, 443, 459, 473. The evidence is to the contrary. A reasonable person would perceive this work environment as threatening and out of control, and Sena in fact did so. Although Sandia arguably did not know when it first permitted the rehiring of the offending employees that the rehiring would cause such dramatic harm to Sena, it should have realized this very soon. Testimony at the hearing confirmed that Hartwigsen, Sena's supervisor's supervisor, knew of the extent of the trauma to Sena by early November 1998. By that time, all of the Sandia medical personnel also knew that Sena could no longer return to Sandia to work. *Sena*, 28 DOE at 89,074. Based on the above, I find that Sena has established that Sandia allowed a hostile working environment to exist, and that the firm failed to take prompt remedial action to alleviate that hostile environment.

2. Forced Resignation Element

The fact that a hostile work environment existed is not sufficient in and of itself to support a claim for constructive discharge. Once the hostile environment is demonstrated, the complainant must then show that the resignation was coerced, i.e. that the employer deliberately created the intolerable working conditions for the purpose of causing the employee to resign. I agree with the Hearing Officer in this case, who found that Sandia intended to harm Sena. *Sena*, 28 DOE at 89,072. He found that while the precise date when Sena's trauma became evident to Sandia is unclear, Sena's trauma was certainly clear to Sandia by November 1998, and yet it failed to dismiss the offending employees even then. Ultimately, there can

be no doubt that by permitting the offending employees to be hired and allowing them on site, Sandia deliberately created a hostile work environment severely adverse to Sena, one that caused him to resign.

The foregoing conclusion is consistent with prevailing legal authority on the subject.

There are two schools of thought among the U.S. courts of appeals regarding the evidence necessary to establish the forced resignation element of the constructive discharge showing. The majority of circuits focuses almost exclusively on a so-called "objective" standard. (7) This standard asks whether a reasonable person in the employee's position would have felt compelled to resign. It does not actually look at the employer's intent. *Bourke v. Powell Electrical Manufacturing Co.*, 617 F. 2d 61 (5th Cir. 1980). The tenth circuit, in which the instant case arises, has used the majority standard. *Derr v. Gulf Oil Co.*, 796 F. 2d 340 (10th Cir. 1986)(*Derr*)(whether the employer, by its illegal discriminatory acts, has made working conditions so difficult that a reasonable person in the employee's position would feel compelled to resign). *See also Sanchez v. Denver Public Schools,* 164 F.3d 527 (10th Cir. 1998).

I find that a reasonable person would have felt compelled to resign from Sandia under the circumstances of this case. (8) Sandia promised Sena that the offending employees would never return to Sandia, and further that he would never again have any workplace contact with the offending employees. Notwithstanding the fact that he was severely affected by the violent incident (explosion of his home mailbox) that took place immediately after the firing of the offending employees, Sena relied on Sandia's promises and continued to work for the firm. Suddenly, and without warning to Sena, the offending employees not only are rehired at Sandia, but without any reason to do so, one of them almost immediately appears in Sena's cubicle. They allude to the 1995 incident, and make threatening gestures to Sena. They intentionally cross his path when they have no reason to do so, and even though they are instructed to avoid him. All of this causes Sena great physical and mental stress. Tr. at 468. Under these circumstances, a reasonable person, one whose mental and physical status was severely adversely affected, would have no choice but to resign, rather than suffer continued degradation of his health, and continual fear for his own safety.

I therefore find that Sena has established both elements of the constructive discharge showing: the hostile work environment and the forced resignation.

B. In addition to showing by a preponderance of evidence that an employer retaliated against him, a Part 708 Complainant must establish that the protected disclosure was a contributing factor to the retaliation. 10 C.F.R. § 708.29.

In the case at hand, the Hearing Officer correctly found that Sandia knew of the protected disclosure. However, a complainant must bring forward additional evidence to establish that the disclosure and the alleged retaliation were causally related.

As discussed above, Sandia knew or should have known that rehiring the offending employees would have a severe adverse effect on Sena, but nevertheless allowed those employees to return to the site where Sena worked. Sandia breached its duty to Sena by allowing a threatening work environment to exist. The protected disclosure, the promise by Sandia to keep the offending employees away from the work site, the breach of that promise, the ensuing hostile work environment, Sandia's breach of its duty to Sena and Sena's resignation all spring from the very same incident. This tightly woven pattern of interconnecting events, all directly related to the protected disclosure and flowing from it, demonstrates a causal relationship between the protected disclosure and the retaliation.

C. Sandia objects to the fact that the Hearing Officer failed to consider the findings set forth in the ROI. I find no error here. The findings in the ROI are preliminary and are made after only a limited inquiry. 10 C.F.R. §§ 708.22; .23. They serve as guidance for the Hearing Officer in ascertaining and limiting the issues in the case and in structuring the hearing. They also help the parties to focus on relevant issues at the hearing. They are thus only tentative and not entitled to deference. Reliance on the ROI is

discretionary. Neither the Hearing Officer nor the Director of the Office of Hearings and Appeals is bound by the ROI. 10 C.F.R. §§ 708.30(c); .34(b)(1).

D. Sena has objected to the calculation of the damages awarded in this case. He claims that he should have been awarded a cost of living increase in the calculation of his loss of income, interest on the loss of income and a damages for loss of retirement. Sandia has not filed any objections to the calculations of the remedy performed by the Hearing Officer. I see no merit in any of Sena's objections to the remedy calculated by the Hearing Officer, and I will give them no further consideration.

This decision and order has been reviewed by the National Nuclear Security Administration (NNSA), which has determined that, in the absence of an appeal or upon conclusion of an unsuccessful appeal, the decision and order shall be implemented by each affected NNSA element, official or employee and by each affected contractor.

It Is Therefore Ordered That:

(1) The Appeal filed by Sandia National Laboratories on March 15, 2001, (Case No. VBA-0042), of the Initial Agency Decision issued on March 1, 2001, is denied.

(2) The cross appeal filed by Richard Sena on May 1, 2001 is denied.

(3) This Appeal Decision shall become a Final Agency Decision unless a party files a petition for Secretarial Review with the Office of Hearings and Appeals within thirty days after receiving this decision. 10 C.F.R. § 708.35.

George B. Breznay
Director
Office of Hearings and Appeals
Date: November 1, 2001

(1)The DOE Contractor Employee Protection Program regulations, which are codified as Part 708 of Title 10 of the Code of Federal Regulations and became effective on April 2, 1992, establish administrative procedures for the processing of complaints. On March 15, 1999, DOE issued an amended Part 708, effective April 14, 1999, setting forth procedural revisions and substantive clarifications to the April rule. 10 C.F.R. § 708.8; *see* 64 Fed. Reg. 12862 (March 15, 1999). Under the revised regulations, review of an Initial Agency Decision, as requested by Sandia in the present Appeal, is performed by the Director of the DOE's Office of Hearings and Appeals. 10 C.F.R. § 708.32.

(2)He never returned to Sandia again and retired on disability effective November 2, 1999.

(3)Harris and most of the other federal cases cited herein were brought under Title VII of the Civil Rights Act of 1964, and not, like the instant case, as a whistleblower protection claim. However, it is by now well-established that the principles set forth in so-called hostile work environment cases under Title VII are applicable to cases brought under whistleblower protection statutes, because Title VII and the whistleblower statutes use similar language to describe the prohibited retaliatory acts. *English v. Whitfield*, 858 F. 2d 957, 964 (4th Cir. 1988). In defining "retaliation," Part 708 adopts language similar to that found in whistleblower protection provisions of statutes, such as the Energy Reorganization Act of 1974. I therefore believe that in some instances it may be useful to refer to Title VII cases in analyzing cases brought under Part 708.

(4) *E.g.*, Tr. at 196, 198, 199, 201, 202, 207, 208, 209. It is most troubling that the offending employees were assigned to work at the same site as Sena. Moreover, Sena was actually assigned to work directly with both offending employees by performing site investigations with them. Tr. at 198, 199. The record contains ample evidence of the adverse effects upon Sena which ensued. Sena had unexpected contact

with the offending employees which was threatening to him. *E.g.*, Tr. at 209. In fact, one of the offending employees appeared in Sena's work cubicle almost immediately after he was rehired. Tr. at 196, 197. Thus, one of the first things that this offending employee did after being rehired was to make his presence known to Sena. This same offending employee appeared in Sena's cubicle on at least one other occasion. Tr. at 201. In another instance when Sena walked by two of the offending employees in the hallway, one of them pulled out a pen knife and made slashing motions. One of the offending employees intruded in a meeting that Sena was having with an inspector and asked Sena directly if he was involved in keeping other offending employees from returning to work at Sandia. Tr. at 208.

(5)As the Hearing Officer pointed out, a full year before the offending employees returned to Sandia, a Sandia manager directed the contractor to remove another offending employee who created a hostile work environment for a whistleblower. *Luis P. Silva*, 27 DOE ¶ 87,550 (2000). I do not believe that Sandia should prevail here simply because one of its managers was ignorant.

(6)The letter was submitted as part of Sandia's Response. Although Sandia offered the letter as evidence during the hearing, the Hearing Officer refused to admit that letter into the record on the grounds that under Federal Rule of Evidence 408, offers of settlement are inadmissible. Tr. at 282-91. I have decided to consider this letter. Even if the proposal to terminate constituted an offer of settlement, I am not convinced that this piece of evidence should be excluded based on that rule. Under Part 708, formal rules of evidence do not apply, but may be used as a guide. 10 C.F.R. § 708.28(a)(4). In Part 708 cases, I believe the Hearing Officer should generally adopt a liberal approach to admission of evidence. Given the fact that adherence to the rules is only advisory, I am not inclined to exclude this evidence unless there is a particularly strong reason to do so, such as unusual or extreme prejudice to the non-offering party. I can see none in this case. Accordingly, I will consider this evidence at this point in the proceeding.

(7)The minority adds a so-called "subjective" prong to the forced resignation element. According to the minority, a complainant must also prove that the actions complained of were intended by the employer as an effort to force the employee to quit. In this aspect of the proof, the key is the employer's subjective intent. Under this subjective prong, a complainant may prove an employer's "intent" by establishing either that (1) the employer consciously intended to coerce the employee's resignation, or (2) the resignation of this employee was the reasonably foreseeable consequence of the employer's actions. *Martin v. Cavalier Hotel Corp.*, 48 F.3d 1343, 1353-57 (4th Cir. 1995). *See also*, *Johnson v. Bunny Bread Co.*, 646 F.2d 1250 (8th Cir. 1981); *Hukkanen v.International Union of Operating Engineers* , 3 F.3d 281 (8th Cir. 1993)(constructive discharge plaintiffs satisfy the . . . intent requirement by showing their resignation was a reasonably foreseeable consequence of their employers' discriminatory actions).

(8)The illegal act in the instant case is, of course, the retaliation prohibited under Part 708, for the protected disclosure, i.e., the hostile working environment and the constructive discharge. *Derr*, 796 F.2d at 344. As will be discussed more fully below, I find that the protected disclosure was a contributing factor to the creation by Sandia of the hostile environment.

Case No. VBA-0044

April 10, 2000

DECISION AND ORDER

OF THE DEPARTMENT OF ENERGY

Appeal

Name of Petitioner: Rosie L. Beckham

Date of Filing: December 28, 1999

Case Number: VBA-0044

This Decision considers an Appeal of an Initial Agency Decision issued on December 13, 1999, involving a complaint filed by Rosie L. Beckham filed against her former employer, KENROB and Associates, Inc. (KENROB) under the DOE's Contractor Employee Protection Program, 10 C.F.R. Part 708. Rosie L. Beckham, 27 DOE ¶ 87,543 (1999). In her complaint, Ms. Beckham alleges that KENROB, among other things, terminated her employment after she questioned the legality of the company's procurement practices. A Hearing Officer denied relief to Ms. Beckham, finding in the Initial Agency Decision that she had failed to make any disclosures protected under the Part 708 regulations. As set forth in this Decision, I have determined that Ms. Beckham's Appeal must be denied.

I. Background

A. The DOE Contractor Employee Protection Program

The DOE's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste and abuse" at DOE's government-owned, contractor- operated facilities." 57 Fed. Reg. 7533 (March 3, 1992). Its primary purpose is to encourage contractor employees to disclose information which they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers. The regulations governing the DOE's Contractor Employee Protection Program are set forth at Title 10, Part 708 of the Code of Federal Regulations. Employees of DOE contractors who believe they have been discriminated against in violation of the Part 708 regulations may file a whistleblower complaint with the DOE and are entitled to an investigation, an independent fact- finding and a hearing by an OHA Hearing Officer, and an opportunity for review of the Hearing Officer's Initial Agency Decision by the OHA Director. 10 C.F.R. §§ 708.21, 708.32.

B. Factual Background

At all times relevant to Ms. Beckham's complaint, KENROB was a DOE subcontractor that provided technical support services to the agency's Office of Civilian Radioactive Waste Management (OCRWM). For the nine month period May 1995 through February 1996, Ms. Beckham worked as a Contracts Specialist at KENROB where she was responsible for procuring computer equipment, system software, and computer-related training from subcontractors for use by OCRWM. In her position, Ms. Beckman

located vendors to provide services or items for OCRWM's use either through competitive solicitations or sole source awards. She then prepared all the documentation necessary for the DOE's review and approval,(1) including purchase requisitions, source selection justification statements, and abstract of offers (cumulatively referred to as "Purchasing Documentation"). See Letter from Maurice Mountain, Counsel for Ms. Beckham, to the Hearing Officer (July 14, 1999). When the DOE approved the procurement, Ms. Beckham completed the requisite purchase order to effectuate the transaction. Id.

Most, if not all, the procurement-related documents Ms. Beckham prepared were "standard" forms containing pre-printed language referring to the Federal Acquisition Regulations (FAR). When Ms. Beckham prepared and forwarded the Purchasing Documentation to the DOE officials for their review and approval, she believed she was certifying that she had followed the applicable instructions or procedures in selecting a vendor as dictated by the FAR. Tr. at 29-30.

In the late summer or early fall of 1995, Ms. Beckham shared with her immediate supervisor articles from the National Contract Management Journal that discussed the government-wide implementation of the Federal Acquisition Streamlining Act of 1994 (FASA).(2) Tr. at 34, 138. Sometime thereafter, Ms. Beckham reviewed Federal Acquisition Circular Number 90- 32 (September 18, 1995), a circular that described some of the changes to the FAR resulting from the enactment of the FASA. Circular Number 90-32 contained the statement that FASA was applicable to solicitations on or after December 1, 1995, but noted that the changes did not apply to micro-procurements, i.e., procurements under $2,500. Exhibit 28.

After reviewing Circular 90-32, Ms. Beckham repeatedly voiced concern to her immediate supervisor that KENROB's standard Purchasing Documentation might not comply with the law since KENROB had not taken affirmative steps to conform its documents to the new FASA requirements. Ms. Beckham was concerned that (1) she could not, in good faith, prepare and transmit documents for DOE's approval without knowing whether that documentation complied with the FAR and (2) she might violate the law because she did not know how the new procurement law applied to the work she was doing. Tr. at 47, 52-53.

In the December 1995 to January 1996 time frame, Ms. Beckham issued three purchase orders for micro-procurements (i.e. purchases less than $2500) using the same standard forms she had used before December 1, 1995. Ms. Beckham testified that she believed her use of the outdated forms vitiated the certification she made to the DOE that the Purchasing Documentation complied with the FAR. Tr. at 69-70.

In early January 1996, KENROB terminated Ms. Beckham for "blatant insubordination and disregard" for her supervisor. KENROB conditionally reinstated Ms. Beckham on January 10, 1996, contingent upon her adhering to a list of performance criteria. In addition, KENROB expanded Ms. Beckham's job responsibilities to include financial work.

On January 26 and 30, 1996, Ms. Beckham sent electronic mail messages to her immediate supervisor requesting guidance about the impact, if any, the FASA would have on six upcoming procurements she would be processing. Exhibits 26 and 27. On February 2, 1996, Ms. Beckham's supervisors met with her and expressed their dissatisfaction with her preparation of financial reports and her computer skills. At that meeting, Ms. Beckham's supervisor ordered her to cancel her attendance at a training seminar focusing on the FASA. Ms. Beckham responded that she believed FASA applied to KENROB's procurements after December 1, 1995, and that she had prepared three purchase orders since that time without knowing whether the documentation complied with the FASA regulations.

On February 9, 1996, Ms. Beckham's immediate supervisor asked the KENROB Project Manager whether KENROB had received any guidance from the DOE regarding how or whether the FASA changes affected KENROB's procurement activities under its contract with the DOE. Exhibit 29. The KENROB Site Manager contacted the cognizant DOE procurement official who, in turn, advised that the FASA-mandated changes did not apply to KENROB. The DOE procurement official further informed KENROB that it

should continue "doing business as usual" without reference to the new FAR requirements until DOE's Policy Office communicated further information to KENROB. Exhibits 8 and 29. KENROB relayed this information to Ms. Beckham on February 9, 1996. Exhibit 29.

On February 23, 1996, KENROB terminated Ms. Beckham, effective March 1, 1996, citing poor performance of her financial reporting duties. Exhibit 22.

C. Procedural Background

1. Ms. Beckham's Part 708 Complaint and the Investigative Report on the Complaint

Ms. Beckham filed her Part 708 complaint on March 27, 1996, with the DOE's Office of Employee Contractor Protection (OCEP), the office that had investigatory jurisdiction over whistleblower complaints at the time.(3) In her complaint, Ms. Beckham alleged that KENROB denied her training opportunities and terminated her employ because she raised concerns that KENROB might not be complying with federal procurement law in its contracting activities.

The IG investigated Ms. Beckham's complaint and issued a report on April 13, 1999 in which it concluded that Ms. Beckham had met her evidentiary burden of proving that she had made protected disclosures regarding KENROB's possible violation of federal procurement law. The IG's Office found, however, that the protected disclosures were not contributing factors in KENROB's decision to deny her training or and to terminate her. Accordingly, the IG recommended that Ms. Beckham's request for relief be denied.

2. The Hearing on Ms. Beckham's Complaint and the Initial Agency Decision

Ms. Beckham requested a hearing on her complaint, and on April 30, 1999, the Director of the Office of Hearings and Appeals (OHA) appointed a Hearing Officer. Prior to the hearing, the Hearing Officer offered her preliminary assessment that Ms. Beckham had not made a protected disclosure. For this reason, the Hearing Officer decided to limit the hearing to one issue, i.e., whether Ms. Beckham had made a protected disclosure cognizable under 10 C.F.R. Part 708. During a pre- hearing telephone conference, the Hearing Officer specifically advised Ms. Beckham that she would be expected to testify at the hearing about her beliefs regarding the legality of the three procurements she had issued after December 1, 1995. On July 22, 1999, the OHA Hearing Officer conducted a hearing in this matter. Ms. Beckham was the only witness that testified at the hearing. Following the hearing, the Hearing Officer allowed the parties to file post-hearing briefs. The Hearing Officer issued an Initial Agency Decision that addressed the sole issue she had designated for hearing.

In the Initial Agency Decision, the Hearing Officer concluded that the disclosures Ms. Beckham made regarding her belief that the FASA applied to KENROB's procurements did not rise to the level of a "protected disclosure" under Part 708. 27 DOE at 89,220. The Hearing Officer held that Ms. Beckham's disclosures involve, at most, insignificant violations of law. Id. at 89,219. Moreover, she explained that the three procurements Ms. Beckham issued after December 1, 1995 all involved de minimus amounts. Id. Further, she held that Ms. Beckham's uncertainty whether the three procurements at issue complied with the FASA is not a disclosure of a "significant" violation of the law under 10 C.F.R. § 708.5(a)(1). Id.

The Hearing Officer also questioned whether Ms. Beckham had a reasonable belief that KENROB was substantially violating the law. The Hearing Officer pointed out that the DOE had opined that the FASA did not apply to KENROB because (1) FASA post-dated the DOE/KENROB contract; and (2) the DOE/KENROB contract did not contain a "flow down clause." Further, the Hearing Officer noted that the three procurements about which Ms. Beckham had concerns were micro- procurements and would have been exempt from the FASA requirements, even assuming arguendo, FASA had applied to those procurements.

In addition, the Hearing Officer was not convinced that Ms. Beckham's disclosures were made in good faith. The Hearing Officer pointed out that KENROB's procurement work was declining, and that Ms. Beckham was tasked with financial reporting responsibilities. It was the Hearing Officer's view that Ms. Beckham's February 2, 1996 disclosure was made in response to negative comments regarding her shortcoming in the financial reporting area. Lastly, the Hearing Officer commented that Ms. Beckham's emotional demeanor during the hearing evidenced an insubordinate attitude. The Hearing Officer then stated that Ms. Beckham's attitude illustrated her unwillingness to accept information communicated to her in February 1996 that the FASA did not apply to KENROB's procurements. The Hearing Officer further commented that if Ms. Beckham held a good faith belief that her supervisor was requiring her to violate the law, she could have documented her belief in a memorandum or raised the matter with a higher level officials or the DOE. The Hearing Officer concluded that Ms. Beckham's failure to take any such actions cast serious doubt on her good faith.

II. The Appeal

On December 28, 1999, Ms. Beckham filed a Notice of Appeal setting forth the reasons why she disagreed with the finding in the Initial Agency Decision. KENROB filed its Response to Ms. Beckham's Notice on February 8, 2000, at which time I closed the record in this case.

In her Appeal, Ms. Beckham raises a number of contentions to support her position that the conclusions reached by the Hearing Officer in the Initial Agency Decision are incorrect as a matter of fact and law. She argues first that the Hearing Officer confused the sequence of events in this case and thereby erroneously concluded that Ms. Beckham did not raise her disclosures in good faith. Specifically, Ms. Beckham alleges that the Hearing Officer focused only on her February 2, 1996 disclosure, ignoring that Ms. Beckham had raised issues relating to the FASA prior to December 1, 1995. In so doing, contends Ms. Beckham, the Hearing Officer ascribed an improper motive to her, namely that she had raised the disclosure in response to criticism of her work performance in January 1996. In addition, Ms. Beckham submits that she continuously raised concerns about the applicability of the FASA to KENROB's procurement activities well before any question arose concerning her performance of newly assigned duties. She suggests that KENROB's change in her duties and later criticism of her work in January 1996 actually stemmed from her disclosures beginning in the fall of 1995.

Second, Ms. Beckham challenges the Hearing Officer's finding that her "testimony about compliance with the prior and new FASA regulations was so weak that [the Hearing Officer] concluded that (i) she did not have the ability to judge the legality of a procurement under either set of regulations, or (ii) she did not testify candidly." Ms. Beckham asserts that it was not her responsibility to make independent judgments on the legality of a particular procurement, but to apply the regulations in accordance with the procedures that KENROB had established with the DOE in their contract. Ms. Beckham states that since she believed KENROB's procedures appeared to be inconsistent with the new requirements of the FASA, she made her disclosures only to obtain guidance on how to comply with the law as she viewed it. She contends that her confusion about how to handle the situation was not the result of any lack of intellect or good faith, but rather the result of inconsistent instructions she received from KENROB.

Third, Ms. Beckham states that the Hearing Officer did not fully comprehend the scope of her disclosure. According to Ms. Beckham, when the Hearing Officer examined the three purchase orders Ms. Beckham processed after December 1, 1995, the Hearing Officer concluded that Ms. Beckham should have known the new FASA regulations did not apply to the three transactions since they were micro-procurements. Ms. Beckham argues that she did not raise her disclosures only in relation to these three micro-procurements, but rather with regard to any future procurement in excess of $2500 she might be required to process.

Finally, Ms. Beckham challenges the Hearing Officer's determination that her disclosures related to "de minimus or insignificant" violations and hence are not protected under Part 708. She argues that the

potential violations of law she first raised in October 1995 were not with reference to any particular procurement in any particular amount. Rather, her concerns related to the process under which KENROB was carrying out its procurement functions, a process that she perceived to be possibly noncompliant with the FASA.

III. Analysis

As noted earlier, Ms. Beckham seeks review of both the Hearing Officer's finding of fact and conclusions of law. It is well settled that factual findings are subject to being overturned only if they can be deemed to be clearly erroneous, giving due regard to the trier of fact to judge the credibility of witnesses. Oglesbee v. Westingouse Hanford Co., 25 DOE ¶ 87,501, 89,001 (1995); O'Laughlin v. Boeing Petroleum Services, Inc., 24 DOE ¶ 87,513, 89,064 (1995). Compare, Pullman Standard v. Swint, 456 U.S. 273 (1982), with Amadeo v. Zant, 486 U.S. 214, 223 (1988), quoting Federal Rule of Civil Procedure 52(a). With respect to a Hearing Officer's conclusions of law, they are reviewable de novo. See Pierce v. Underwood, 487 U.S. 552, 558 (1988) ("For purposes of standard of review, decisions by judges are traditionally divided into three categories, denominated questions of law (reviewable de novo), questions of fact (reviewable for clear error), and matters of discretion (reviewable for 'abuse of discretion')."").

A. Whether the Revised Part 708 Regulations Apply to the Analysis of the Complainant's Protected Disclosure

Before analyzing Ms. Beckham's specific challenges to the Hearing Officer's findings of fact and conclusions of law, a threshold issue regarding the applicability of the revised regulations to Ms. Beckham's Complaint must be examined. Before the Part 708 regulations were revised effective April 14, 1999, a DOE contractor was prohibited from taking reprisals against an employee who "disclosed to . . . the contractor information that the employee in good faith believes evidences (i) a violation of any law, rule, or regulation . . ." 10 C.F.R. § 708.5(a)(1)(i). When the regulations were revised, the section set forth above was changed to protect employees for "[d]isclosing to . . [his/her] employer . . . information that you reasonably and in good faith believe reveals (1) a substantial violation of a law, rule, or regulation . . ." As is evident from the above, the revised Part 708 regulations require that an employee's disclosure be based on a reasonable belief, not just a good faith belief. (4)

It is well established in law that an agency may apply new procedural rules in pending proceedings as long as their application does not impair the rights of, or otherwise cause injury or prejudice to, a party. 64 Fed. Reg. 12,862, 12,865 (citing Landgraf v. USI Film Products, 511 U.S. 244, 275 (1994); Lindh v. Murphy, 117 S. Ct. 2059, 2063-64 (1997); Natural Resources Defense Council, Inc. v. NRC, 680 F.2d 810, 817, n. 17 (D.C. Cir. 1982) (citing Pacific Molasses Co. v. FTC, 356 F.2d 386 (5th Cir. 1966)). Thus, the intent of the drafters of the Part 708 revisions is quite clear that the revised regulations apply to pending cases only "as long as their application does not impair the rights of, or otherwise cause injury or prejudice to, a party." Salvatore Gionfriddo, 27 DOE ¶ 87,544 at 89,224 (1999). I find that the imposition of the revised regulations would cause prejudice to Ms. Beckham since those regulations interpose an element of reasonableness into the disclosure that did not exist at the time she made her disclosures. Accordingly, in evaluating Ms. Beckham's Appeal, I will use the regulations that existed at the time she communicated her concerns regarding KENROB's procurement activities, not the revised regulations used as the basis of analysis in the Initial Agency Decision.

B. Whether Ms. Beckham Made Protected Disclosures under the Part 708 Regulations in effect in 1995-96.

As an initial matter, I note that the Hearing Officer's analysis of Ms. Beckham's protected disclosures was based, in part, on a finding that Beckham's actions in completing three procurements did not in fact violate procurement law, and that the FASA did not apply to KENROB's contract with the DOE. However, for

purposes of Part 708, it does not matter whether the information a putative whistleblower disclosed is ultimately factually substantiated. See Thomas T. Tiller, 27 DOE ¶ 87,504 (1998), affirmed, Thomas T. Tiller v. Wackenhut Services, Inc., 27 DOE ¶ 87,509 (1999); see also Howard W. Spaletta, 24 DOE ¶ 87,511 at 89,051 (1995) (good faith clause is intended to relieve complainants of the burden of proving that their allegations are correct or accurate). This precept is consistent with that followed in other federal whistleblower cases. See Horton v. Dep't of Navy, 66 F.3d 279 (Fed. Cir. 1995), cert. denied, 516 U.S. 1176 (1996); Paul v. Dep't of Agriculture, 66 M.S.P.B. 643 (1995). Rather, the focus must be on the belief of the individual providing the information. In this case, the inquiry must focus on whether Ms. Beckham had a good faith belief that KENROB was violating federal procurement law at the time she raised concerns about KENROB's procurement activities. Thus, to the extent the Hearing Officer evaluated the evidence in this case based in whole or in part on the fact that no violation of procurement law actually occurred, she erred.

The Hearing Officer also appears to have considered that Ms. Beckham may have made her disclosures in response to KENROB's negative comments about her job performance. In evaluating whether a person has made a disclosure in good faith, however, the person's motivations for making the disclosure are irrelevant. See Howard W. Spaletta, 24 DOE ¶ 87,511 at 89,051 (1995) (whether the Complainant was motivated to protect his reputation is irrelevant to the question whether the disclosures come within the ambit of Part 708 protection). Cases decided under the Whistleblower Protection Act also are in accord with this view. See Bump v. Dep't of Interior 69 M.S.P.R. 354 (1996) (WPA makes no provision for considering whether the employee's personal motivation rendered his belief not genuine), Carter v. Dep't of Army, 62 M.S.P.R. 393, 402 (1994), aff'd, 45 F.3d 444 (Fed. Cir. 1995)(Table); see also Frederick v. Dep't of Justice, 65 M.S.P.R. 517, 531 (1994), rev'd on other grounds, 73 F.3d 349 (Fed. Cir. 1996). Hence, to the extent the Hearing Officer considered Ms. Beckham's motivations in communicating her concerns about KENROB's implementation of the FASA in finding that Ms. Beckman did not make a protected disclosure under Part 708, she erred.

The Hearing Officer also opined that the three procurements Ms. Beckham processed were all under $2500 and hence trivial in amount. To be sure, care must be taken not to waste limited resources addressing minor, insubstantial concerns in the context of Part 708 so that whistleblower protection is available to those workers who legitimately need it. Here, however, the three procurements were in the amounts of $2,475, $1,020, and $148. While I believe this is a close question, I am inclined to find that taken together, these procurements are not trivial. I recognize that these procurements were considered to be microprocurements for purposes of the FASA, but I do not necessarily believe they were so de minimus to warrant a finding, on this basis alone, that they were trivial and outside the purview of Part 708. By focusing on the amount of the procurements, the Hearing Officer appears to have been relying, in whole or in part, on the fact that no violation of law could have occurred since microprocurements were exempt from the FASA. As noted above, however, the factual accuracy of Ms. Beckham's belief is irrelevant on the question of whether her communications are entitled to protected status under Part 708. Moreover, as Ms. Beckham notes in her appeal, the concerns she attempted to voice about KENROB's contracting activities were general ones, i.e., the process by which procurements were being processed, not specific procurements themselves.

After carefully reviewing the record on appeal, I find that the Hearing Officer's use of the revised regulations and the other legal infirmities in her analysis are harmless errors. After reanalyzing the evidence under the regulations in effect at the time Ms. Beckham communicated her concerns regarding KENROB's procurement activities, and the correct legal standards, I simply cannot conclude as a matter of law that Ms. Beckham made a protected disclosure cognizable under Part 708. First, the Hearing Officer's determination that Ms. Beckham did not have a good faith belief at any time relevant to this proceeding that KENROB was violating any law is not clearly erroneous. Second, while the record suggests that Ms. Beckham genuinely believed that she had neither the training, guidance, nor ability to discern whether the FASA applied to the work she was doing under the KENROB/DOE contract, I find that Ms. Beckham's broad, speculative concerns about her admitted lack of information and unfamiliarity with the FASA are not the kind of disclosures that are protected under 10 C.F.R. Part 708. The analysis

leading to these conclusions is set forth below.

1. Communications regarding the FASA prior to December 1, 1995

Ms. Beckham complains in her appeal that the Initial Agency Decision does not recognize that she made protected disclosures to KENROB prior to December 1, 1995. According to the record, Ms. Beckham speculated to her supervisor about the impact of the FASA on KENROB's procurement activities in general and Ms. Beckham's responsibilities in particular on several occasions prior to December 1, 1995. In so doing, Ms. Beckham sought clarification and guidance from her superiors on how to implement the FASA in the future. Appeal at 3.

It is evident from the record that Ms. Beckham's communications during the period prior to December 1, 1995 are not protected under Part 708. Seeking guidance from, and expressing confusion to, one's supervisor on how to handle work-related tasks simply do not equate to the disclosure of information evidencing a violation of law under 10 C.F.R. § 708.5(a)(1)(i). Moreover, the record is devoid of any evidence that would support a finding that Ms. Beckham actually believed that KENROB was violating procurement law during this time frame. The concerns she articulated were vague and speculative, not specific allegations of wrongdoing rising to the level of a Part 708 protected disclosure. The hearing transcript reveals that Ms. Beckham's testimony regarding why she thought KENROB might be violating some law prior to December 1, 1995 is convoluted and unconvincing. In the end, the record on appeal suggests that Ms. Beckham's communications prior to December 1, 1995 can be more accurately described as "cries for help" in which she sought guidance and assistance from her supervisors on how to perform her contracting- related duties, not disclosures of information evidencing a violation of federal contracting law. Accordingly, while the Initial Agency Decision did not directly address whether Ms. Beckham made any protected disclosures prior to December 1, 1995, the record on this point is clear that she did not.

2. Communications regarding the FASA between December 1, 1995 and February 9, 1996

It was during the period December 1, 1995 through February 9, 1996 that Ms. Beckham completed processing three procurements without the benefit of information on how and whether the FASA impacted her work product. Ms. Beckham argues in her appeal that during this time period she was not complaining about the three specific procurements she completed, but rather the process under which KENROB carried out its procurement functions. She further points out that it was not her responsibility as a contract specialist to interpret the law, but rather to follow instructions on how to comply with the law. Further, Ms. Beckham contends that her inability at the hearing to explain how she thought the FASA would affect her job responsibilities stemmed not from her lack of good faith but the inconsistent instructions KENROB required her to follow in preparing the Purchasing Documentation.

After thoroughly reviewing the record in this case, I find that there is substantial evidence to support the Hearing Officer's determination that Ms. Beckham did not prove that she had a good faith belief that KENROB's standard procurement documentation violated any law. At the hearing, the Hearing Officer thoroughly questioned Ms. Beckham about her beliefs regarding KENROB's "process" of completing the standard forms that comprised its Purchasing Documentation. Specifically, the Hearing Officer painstakingly inquired about the FASA's impact on various aspects of the procurement process, including market research, source selection, preference for "labor surplus," price analysis, vendor performance history, and set-asides for women-owned businesses. Tr. at 52- 54, 100-01, 175-83. Ms. Beckham's responses to inquiries on each of these matters was somewhat confusing. For example, Ms. Beckham stated that one of the changes to the FAR was a requirement that a product "ensure the maximum practical use of recovery material and promote energy conservation and energy efficiency." Id. at 93. In responding to the Hearing Officer's question whether Ms. Beckham thought the revised FAR provision would have changed the manner in which she performed her job, Ms. Beckham responded:

I believe it could have. My position is I did not fully understand all of the FAR - - all of these changes

and what they really translated to. That, I did not have the opportunity to discover, but I was trying to keep up with the purchase orders that was mandated be issued, and I was also trying to educate myself on what the changes were, and what

were the differences, and what were the ramifications, and I was trying to get the training I needed to understand this, and much of my concern was that I was doing it in the blind as anything because I'm saying I have -- these purchase orders meet the requirements of the law that had changed, and I didn't know how . . . That's the bind that I was in, and I would like to be able to answer the questions more precisely, but that was the predicament that I was in.

Id. at 94. Moreover, Ms. Beckham revealed at the hearing that she never discussed the details of her concerns regarding the applicability of the FASA to KENROB's standard procurement documents. The most she ever did was to provide a copy of Circular 90-32 to her supervisor with instructions, "look at this, this is what is effective. [w]e need to dig into the specifics." Id. at 125. The Hearing Officer concluded after listening to Ms. Beckham's testimony and observing her demeanor at the hearing that either Ms. Beckham did not have the ability to judge the legality of a procurement under either set of regulations or she did not testify candidly. 27 DOE at 89, 218. Moreover, the Hearing Officer questioned whether Ms. Beckham made her disclosures in good faith, noting that her emotional demeanor at the hearing evidenced an insubordinate attitude. Furthermore, the Hearing Officer opined that she might have been convinced that Ms. Beckham was acting in good faith at the time she made her alleged disclosures had she documented her belief in a memorandum or raised the matter with higher level contractor officials or the DOE. Id., 89,220.

It is well established that factual findings of these types are subject to being overturned only if they can be deemed to be clearly erroneous, giving due regard to the trier-of-fact's unique opportunity to judge the credibility of the witnesses. Compare, Pullman Standard v. Swint, 45 U.S. 273 (1982), with Amadeo v. Zant, 486 U.S. 214, 223 (1988). Measured against this standard, my review of the Hearing Officer's findings regarding Ms. Beckham's credibility and demeanor at the hearing discloses no basis for overturning these fact-based determinations as "clearly erroneous." The concept of good faith is closely linked to one's honesty. Ronny J. Escamilla, 26 DOE ¶ 87,508 (1996), aff'd, 27 DOE ¶ 87,508 (1997). Similarly, an alleged whistleblower's credibility is quite relevant in assessing whether he/she held a good faith belief that the information disclosed fell within the purview of Part 708. Cf. Harden v. Dep't of Navy, 66 F.3d 279 (Fed. Cir. 1995) (under the Whistleblower Protection Act, a person's credibility is relevant in determining his reasonable belief). In this case, the Hearing Officer expressed reservations about Ms. Beckham's honesty when she suggested that she might not have testified candidly. Further, it is clear from reading the Initial Agency Decision that the Hearing Officer did not find Ms. Beckham a credible witness. (5) The Hearing Officer found Ms. Beckham's testimony to be unclear at points and her demeanor insubordinate. In addition, the Hearing Officer found suspect Ms. Beckham's failure to specifically communicate her concerns to her superior or others. In the end, it was Ms. Beckham's burden to show by a preponderance of evidence that she had a good faith belief that the information she disclosed evidenced a violation of the law. In the Hearing Officer's view, Ms. Beckham did not meet a critical element of her burden, i.e., the good faith showing. There is nothing in the record that requires me to supplant my judgment for the credibility determination of the Hearing Officer.

Even assuming arguendo that Ms. Beckham had convinced the Hearing Officer that she made her disclosures in good faith, the record is clear that the information communicated by Ms. Beckham to her supervisors during the period October 1995 through February 9, 1996 is not the kind of disclosure contemplated for coverage under Part 708. The hearing transcript is replete with testimony from Ms. Beckham that the substance of her communications was nothing more than a request for training and assistance in doing her work. Tr. at 55 (she needed training to fully understand and implement changes to the "boilerplate"); id., 63 ("I was in the process of trying to learn precisely what it is that needed to be done."); id., 68 ("I was trying to apprise KENROB that there [are] all these federal regulations that you've required me to abide by that have been changed, deleted, eliminated. Help me. Sit down now and tell me what to do."); id., 75 (she wanted someone at KENROB to sit down with her and go through every item in

the Procurement Documentation because she did not fully understand it); id., 93 ("My position is I did not fully understand all of the FAR - all of these changes and what they really translated to. . .") Further, Ms. Beckham was simply unable to articulate any credible basis for her belief that KENROB's procurement "process" and purportedly outdated documentation ran afoul of any law. 10 C.F.R.§ 708.5. In the end, Ms. Beckham cannot bootstrap her own admitted confusion about the FASA and her repeated requests for assistance in discerning how to do her job into any kind of disclosure that KENROB was violating the law.

C. Conclusion

On the basis of the foregoing, I conclude that there is substantial evidence in the record to support the Hearing Officer's conclusion that Ms. Beckham failed to meet her evidentiary burden in this case. I therefore concur with the finding that Ms. Beckham did not disclose information in good faith that evidenced a violation of the law under the Part 708 regulations in effect at the time she communicated the information at issue in this case. Accordingly, Ms. Beckham's Appeal must be denied.

It Is Therefore Ordered That:

(1) The Appeal filed by Rosie L. Beckham on December 28, 1999 (Case No. VBA-0044) of the Initial Agency Decision issued on December 13, 1999 (Case No. VWA-0040) be and hereby is denied. Accordingly, as determined in the Initial Agency Decision, the complaint filed by Rosie L. Beckham on March 27, 1996, under the Contractor Employee Protection Program, 10 C.F.R. Part 708, be and hereby is denied.

(2) This Appeal Decision shall become a Final Agency Decision unless a party files a petition for Secretarial review with the Office of Hearings and Appeals, within 30 days after receiving this decision. 10 C.F.R. § 708.35.

George B. Breznay

Director

Office of Hearings and Appeals

Date: April 10, 2000

(1)Under the terms of the contract between the DOE and KENROB, KENROB was required to obtain the DOE's consent for all purchase orders in excess of $50. Transcript of Hearing (Tr.) at 64.

(2)FASA was enacted "to streamline the acquisition process and minimize burdensome government-unique requirements." Exhibit 34.

(3)Later, OCEP was reorganized and assimilated into the DOE's Office of Inspector General, Office of Inspections.

(4)The revised regulations also require that information disclosed relate to a substantial violation of the law, not just a violation of the law. The Initial Agency Decision does not appear to reject Ms. Beckham's disclosure on the basis that the alleged procurement irregularities do not rise to the level of a substantial violation of the law. Rather, the Initial Agency Decision finds that Ms. Beckham's disclosures did not relate to a "significant" violation of the law. To the extent the Hearing Officer equated the term "significant" with "substantial," she erred. The plain language of Part 708 prior to its revision in 1999 is unambiguous on its face; it neither explicitly nor implicitly required the perceived violation of the law to be substantial or significant. This is not to say, however, that petty, trivial matters would necessarily be encompassed by Part 708. The determination whether a communication regarding a violation of law is petty or trivial turns on the facts of a particular case. See Herman v. Dep't of Justice, 193 F.3d 1375, 1380 (Fed. Cir. 1999) (finding the complainant could not have reasonably believed that his memorandum

concerning the photocopying of telephone logs constituted the disclosure of a non-trivial law, rule, or violation under the Whistleblower Protection Act (WPA)). Cf. Eidmann v. Merit Sys. Protection Bd., 976 F.2d 1400, 1402-03, 1407 (Fed. Cir. 1992) (affirmed the Board's finding that a whistleblower's disclosure of an agency's repeated refusal to enforce even minor rules or regulations, i.e. ban on smoking in general office, can constitute a protected disclosure under the WPA).

(5)In reviewing the Hearing Officer's opinion regarding Ms. Beckham's "good faith," I have discounted the Hearing Officer's comments regarding Ms. Beckham's possible motivation for making her alleged disclosures. I do not believe that the Hearing Officer's findings regarding motivation are so inextricably intertwined with her finding on the "good faith" issue to prevent me from reaching a finding on "good faith." As will be explained, the Hearing Officer had other bases on which she concluded Ms. Beckham had not acted in good faith.

Case No. VBA-0055

October 2, 2000

DECISION AND ORDER OF

THE DEPARTMENT OF ENERGY

Appeal

Name of Petitioner: Lucy Smith

Date of Filing: July 20, 2000

Case Number: VBA-0055

This Decision considers an Appeal of an Initial Agency Decision (IAD) issued on July 11, 2000, involving a Complaint filed by Lucy Smith (Smith or the Complainant) under the Department of Energy (DOE) Contractor Employee Protection Program, 10 C.F.R. Part 708. In her Complaint, Smith claims that her former employer, Westinghouse Savannah River Company (WSRC), a DOE contractor, terminated her employment during a reduction in force (RIF), and then failed to rehire her, in retaliation for making disclosures that are protected under Part 708. In the IAD, however, the Hearing Officer determined that WSRC had shown that it would have terminated the Complainant in the RIF, even in the absence of the protected disclosures. As set forth in this decision, I have determined that this matter should be remanded to the Hearing Officer for further consideration.

I. Background

A. The DOE Contractor Employee Protection Program

The Department of Energy's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste and abuse" at DOE's Government-owned or -leased facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purpose is to encourage contractor employees to disclose information which they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers. Thus, contractors found to have retaliated against an employee for such a disclosure, will be directed by the DOE to provide relief to the complainant. See 10 C.F.R. § 708.2 (amended regulations) (definition of retaliation).

The DOE Contractor Employee Protection Program regulations, which are codified as Part 708 of Title 10 of the Code of Federal Regulations and became effective on April 2, 1992, establish administrative procedures for the processing of complaints. As initially formulated, these procedures typically included fact- finding by the DOE Office of Inspector General, followed by the issuance of a Report of Inquiry setting forth the IG’s findings and recommendations on the merits of the Complaint. Thereafter, the complainant could request a hearing before a Hearing Officer assigned by the DOE Office of Hearings and Appeals (OHA), pursuant to which the Hearing Officer renders an Initial Agency Decision.

On March 15, 1999, DOE issued an amended Part 708, effective April 14, 1999, setting forth procedural revisions and substantive clarifications that “apply prospectively in any complaint proceeding pending on the effective date of this part.” 10 C.F.R. § 708.8; *see* 64 Fed. Reg. 12862 (March 15, 1999). Under the

revised regulations, review of an Initial Agency Decision, as requested by Smith in the present Appeal, is performed by the OHA Director. 10 C.F.R. § 708.32.

B. History of the Complaint Proceeding

The events leading to the filing of Smith's Complaint are fully set forth in Lucy Smith, 28 DOE ¶ 87,501 (2000). I will not reiterate all the details of that case here. For purposes of the instant appeal, the relevant facts are as follows.

Smith was employed as a chemist at the DOE's Savannah River Site (SRS) from September 1973 to March 1997. On March 26, 1997, Smith filed a Complaint under Part 708 with the DOE Office of Inspector General. After the completion of an investigation, Smith requested and received a hearing on this matter before an OHA Hearing Officer. There were 13 witnesses and the hearing lasted two days. After considering the testimony at the hearing and other relevant evidence, the Hearing Officer issued the IAD that is the subject of the instant appeal.

C. The Initial Agency Decision

In the IAD, the Hearing Officer cited the burdens of proof under the Contractor Employee Protection Regulations. (1) They are as follows:

> The complainant shall have the burden of establishing by a preponderance of the evidence that there was a disclosure, participation, or refusal described under § 708.5, and that such act was a contributing factor in a personnel action taken or intended to be taken against the complainant. Once the complainant has met this burden, the burden shall shift to the contractor to prove by clear and convincing evidence that it would have taken the same personnel action absent the complainant's disclosure, participation or refusal.

10 C.F.R. § 708.9(d).

The Hearing Officer found that Smith made a protected disclosure involving a safety concern, by inquiring as to an asphyxiation hazard in a building next to the one in which she worked (October 10 Disclosure). The Hearing Officer determined that Smith made a second safety-related protected disclosure regarding the posting of "Rad-Con" Permits outside a laboratory building (December 9 Disclosure). These permits notify employees as to hazards and safety requirements in radiological areas. Smith's disclosure regarding the Rad-Con permits related to a possible inaccurate labeling of the hazards involved. She also reported that another Rad-Con permit should have stated that personnel are required to wear safety glasses. She further voiced concerns as to accurate measurement of radiation exposure. (2)

The Hearing Officer noted that WSRC stipulated that the October 10 and December 9 Disclosures were contributing factors with regard to the decision to terminate Smith.

The Hearing Officer also concluded that none of the disclosures was a contributing factor in Smith's not being rehired by WSRC. In this regard, the Hearing Officer found that Smith failed to file the appropriate form to keep her name in the firm's "preference- for-hiring" database. The Hearing Officer determined that the fact that WSRC did not rehire Smith for any of three chemist positions that became available after she was terminated was not attributable to her protected disclosures.

The Hearing Officer next considered whether WSRC had clearly and convincingly demonstrated that WSRC would have terminated Smith even in the absence of the protected disclosures. 10 C.F.R. § 708.9(d). In this regard, the Hearing Officer found that the chemists who were retained by WSRC had more experience than Smith. The Hearing Officer determined that WSRC had clearly and convincingly demonstrated that it would have terminated Smith even in the absence of the protected disclosure. The Hearing Officer therefore denied Smith's request for relief under Part 708.

II. The Smith Statement of Issues and the WSRC Response

Smith filed a statement identifying the issues that she wished the Director of the Office of Hearings and Appeals to review in this appeal phase of the Part 708 proceeding (hereinafter Statement of Issues or Statement). 10 C.F.R. § 708.33.

The Statement points out the following conclusion of the Hearing Officer: "I also have determined that several of Smith's disclosures were contributing factors in her termination." Smith seems to believe that this conclusion demonstrates that WSRC retaliated against her for those disclosures and that relief is warranted. She also requests an "objective review" of the Hearing Officer's determination.

In its Response to the Statement, WSRC contends that the Statement of Issues was not timely filed. In this regard, WSRC points to two Part 708 appeal cases considered by the Deputy Secretary of Energy under the prior regulations. Mark H. McCormack v. Westinghouse Savannah River Corp., 27 DOE ¶ 88,029 (1999)(McCormack); Therese Quintana-Doolittle, 27 DOE ¶ 88,035 (1999)(Quintana-Doolittle). See 10 C.F.R. § 708.8(c)(March 1992 regulations). WSRC states that in these two decisions, the Deputy Secretary required that time limitations periods be strictly observed in filing the original Part 708 complaint. WSRC maintains that such an approach should be followed here. WSRC further points out that the Complainant offered no reason for the late filing. Accordingly, WSRC contends that the instant appeal should be dismissed as untimely.

WSRC also asserts that the Statement fails to identify any specific issues that it wishes the Director to review, as provided for in 10 C.F.R. § 708.33. WSRC believes that unless there is a clear demonstration that the Hearing Officer erred or abused his discretion, the Director must affirm the Hearing Officer's Opinion. WSRC maintains that the appeal should be dismissed because the Statement does not set forth any error by the Hearing Officer.

III. Analysis

I will summarily dispose of the two contentions raised by WSRC in its response. I am not convinced by either argument.

With regard to WSRC's timeliness argument, the two cases cited by the firm are inapposite. In Quintana-Doolittle and McCormack, the individuals filed their original Part 708 complaints several months late. Finding no good cause or other appropriate basis had been shown for the lateness, the Deputy Secretary of Energy dismissed the complaints.

In the present case, the Complainant filed her Notice of Appeal in a timely manner. However, her Statement of Issues in the appeal phase was filed four days late. I therefore do not find the cases cited by WSRC to be comparable with respect to the degree of untimeliness.

Further, I believe that the difference between the procedural posture of the instant case and the cited cases is significant. It is appropriate to hold a potential complainant to a stricter standard of timeliness in the initiation of a Part 708 proceeding than in other phases of the Part 708 proceeding. Otherwise, a contractor-employer would lack certainty as to when its period of Part 708 liability for a personnel action taken with respect to any given employee would be closed. On the other hand, with respect to the filing of a statement of issues in connection with an appeal, a respondent is on notice of the request for review by the Director, since the notice of appeal has already been filed. As a general rule, I see no significant detriment to a respondent in the case of a four-day delay in filing a Statement of Issues for review.

Finally, the current regulations authorize me to approve an extension of any deadline related to the investigation, hearing and OHA appeal process. 10 C.F.R. § 708.42. Given the de minimus period of time

at issue here, and the lack of any showing of harm by the contractor, I will use the discretion granted to me under that Section and approve an extension of time to file the Statement of Issues in the instant case.

I further see no merit in WSRC's argument that I must dismiss the appeal because the Complainant has failed to present specific issues for me to address. I believe that my authority in the Part 708 appeal process is broader than WSRC suggests. My role in this regard is not simply to consider those issues specifically identified by an appellant. It is certainly within my discretion for me to review the entire record created through the investigation and the hearing process, and if I find a material error, I believe that it is incumbent upon me to correct it. I believe a unified, consistent approach to rule interpretation and related issues best serves the interests of those parts of the DOE community with a stake in the Part 708 program. Accordingly, I reject WSRC's contention that the instant appeal must be dismissed for failure to raise specific issues to be reviewed.

I turn next to the Complainant's Statement of Issues, which as indicated above, is from a substantive viewpoint quite meager. With respect to the Complainant's allegation that she is entitled to prevail merely because her protected disclosures were a contributing factor to her termination, I find that the Complainant is simply incorrect. Even though a Part 708 complainant may establish that a protected disclosure was a contributing factor to a retaliation, this does not mean that the individual is thereby entitled to relief. As stated above, the regulations clearly allow a contractor to demonstrate that it would have taken the same personnel measures even in the absence of the protected disclosures. 10 C.F.R. § 708.9(d). The Hearing Officer determined that WSRC made this showing. Therefore, in his view, even though the protected disclosure may have been a contributing factor to the RIF, the firm showed that it would have terminated the Complainant anyway. I therefore reject this aspect of the Statement of Issues.

However, as stated above, the Complainant has also asked me to perform an objective review of the record. Given this specific request, and my belief, discussed above, that a unified, consistent approach best serves the interests of the participants in the Part 708 program, I exercised my discretion to give the record in this case a comprehensive review. In so doing, I found a significant issue that was not given thorough consideration, and needs further development.

As I indicated above, the Hearing Officer noted that the Complainant was terminated as part of an overall reduction in force (RIF), in which one lab technician and one chemist were the positions selected for elimination. That selection was a necessary step, preliminary to the selection of the particular individuals within those job categories for termination. Thus, a key issue in this case is how the decision was made to select the positions of chemist and technician for termination. The Hearing Officer did not evaluate the process through which that selection decision was made, and whether it may have been influenced by the fact that the Complainant had made a protected disclosure. As a result, I find that at this point, the IAD does not consider whether WSRC clearly and convincingly established that the termination decision would have been the same absent the protected disclosure.

To facilitate my discussion of this additional issue, I will first describe Smith's workplace organization. During the relevant period, WSRC's Waste Management Laboratory (WML), WML was organized into two separate laboratory organizations, the Effluent Treatment Facility laboratory (ETF lab) and the In-Tank Precipitation Facility laboratory (ITP lab). See Hearing Exhibit W-11. Each laboratory was staffed with one supervisor, two chemists and several technicians. Id. (3) At the time of the RIF, Smith and Kenneth Cheeks were the chemists working at the ITP lab. Thelma Hill-Foster and Linda Youmans were chemists at the ETF lab. Transcript of Hearing (Tr.) at 78.

Early in January 1997, Woody Melton, the Manager of the WML, was notified that WSRC's High Level Waste Division (HLWD) planned to reduce WML's personnel staffing because of a $100,000 cut in funding for each lab. Tr. at 74-77; Hearing Exhibits W-11, W-16 (December 30, 1996 Baseline Change Proposal outlining budget reduction and WSRC divisions to be affected). On January 8, 1997, Melton was asked about the impact on WML if 4 positions (including chemists) were eliminated from the labs. Hearing Exhibit W-11 at 1. The next day, Melton was informed that Dave Amermine, the HLWD deputy

manager, decided to reduce WML by four positions - three lab technicians and one chemist. Id. at 2.

The testimony at the hearing indicated that on January 10, 1997, Melton, along with his supervisor, Jim Collins (Collins), Pat Padezanin (Padezanin), WSRC Manager of Analytical Laboratories, and Lori Chandler (Chandler), Melton's previous supervisor in December 1996, met to discuss the issue of personnel cuts. (4) Tr. at 76- 77, 178, 195. After some discussion with other officials, Padezanin, who was the most senior of the group, concluded that only two employees, a chemist and a laboratory technician, would have to be laid off from WML to meet the budget constraints. Tr. at 175-76. This reduction contemplated that three chemists would provide support to both labs, rather than two chemists supporting each lab. Tr. at 237, 325-27.

These individuals then discussed what criteria would be used to select the one chemist for termination. Tr. at 178. The criteria selected were: performance, current contribution to the organization, potential contribution to the organization and time in position. Id. The managers then considered Smith, Cheeks, Hill- Foster and Youmans. Based on the criteria, they selected Smith for termination. Tr. at 179-80.

There is testimony to support the proposition that once the one position in the chemist category was selected for elimination, it was a virtual certainty that the Complainant would be the employee terminated. For example, Collins testified as follows:

> Q: And was anybody else's name mentioned as a possible candidate for reduction other than Lucy?
>
> A: No that I'm able to recall, no.
>
> Q: So it was sort of from the beginning of the meeting to the end of that meeting that Lucy was going to be the one that had to go? A: That was my understanding, yes.

Tr. at 247. See also, Tr. at 229 (Padezanin testimony).

Given the implication that, if a chemist's position was selected for elimination, the Complainant would be terminated, I believe it is critical for the Hearing Officer to evaluate the evidence regarding the choice of a chemist position for elimination. In order for the contractor to meet its burden of proof, it must establish that the targeting of the chemist's position was based on objective business criteria, and that elimination of the chemist's position was clearly the most viable alternative. I believe the Hearing Officer had substantial justification for his determination that WSRC had clearly and convincingly shown that, based on Smith's qualifications and experience, it would have selected Smith for termination even absent the protected disclosures. However, the Hearing Officer should also have specifically considered whether WSRC demonstrated by clear and convincing evidence that it would have selected a chemist position for elimination absent the disclosures.

I note from the transcript that the witnesses Melton, Padezanin, Collins and Chandler were knowledgeable about the selection of Smith as the chemist who would be riffed, and could describe in considerable detail how they applied the selection criteria. (5) Tr. at 88-92, 179-80, 277-80. However, the record as to how the chemist position itself was selected is thin. For example, Melton stated: "it became obvious that we could cut one of the technicians at ETF, since there were two technicians on days. . . We looked at how we could continue to support operations. . . we decided that we would go down by one chemist and one technician." Tr. at 84-85.

Collins stated: "Given the fact that there were two chemists at each of the facilities, ITP and ETF, . . . our best option was to look at reducing the head count in that particular area and going with a floater or roamer chemist. . . between the two facilities." Tr. at 237. Collins also referred to "being able to continue support for that particular customer." Tr. at 248. Collins further agreed with the assertion that "the way it was going to end up was one of [the chemists] was going to be eliminated. . . .That was the way the meeting started and the way it ended." Tr. at 246.

Padezanin stated that "what we needed to be able to do was continue to provide the same level of support to the customer. . . that goal. . . led us to conclude that it needed to be one chemist and one technician. . . We discussed all options." Tr. at 206.

Chandler stated that "It was decided there would be one exempt and one non-exempt [employee]. And the non-exempt. . . happens to be a lab technician in the lab. . . . And then we looked at. . . who would be let go from the exempt standpoint. Basically, we looked at all four of the chemists who were in that group at the time." Tr. at 274. Chandler repeated this same reasoning later in her testimony: "We had to go down by two head count. One was exempt, one was non-exempt." Tr. at 283.

The testimony itself indicates no support or reasoning for the ultimate determination that elimination of a chemist position was the best option. Most of the testimony on the point of how the chemist position was selected for the RIF is a mere restatement of the outcome. For example, Chandler does not give any reasons why the RIF was based on the selection of one "exempt" and one "non- exempt" position. I also see no support for the Collins/Padezanin rationale. Neither of these witnesses explained why the customer service goal could not be accomplished through the termination of other combinations of employees, or why the option chosen furthered that goal better than other options. Although Padezanin stated that the committee "discussed all the options," she does not describe that discussion. Tr. at 206.

Further, Chandler's rationale appears to be a personnel-oriented solution, and therefore aimed at two particular position classifications. This does not seem wholly consistent with the assertions of Padezanin and Collins that elimination of the chemist and technician positions best served customer needs.

I note that in addition to two chemists, the ETF lab staff included two day technicians and 8 shift technicians. The ITP lab was staffed with one day technician and 8 shift technicians, in addition to two chemists. Thus, a possible option here would have been to terminate two technicians, one from each lab, rather than a chemist and a technician. Yet, there is no discussion at the hearing as to the effect of terminating two technicians, instead of a chemist and a technician.

In this regard, in a memorandum of January 9, 1997, Melton states that if WML were "forced to downsize by two, the ITP day-technician and one of the ETF day-technician positions would be eliminated." Exhibit W-11 at 1. Moreover, the memorandum offers several other proposals for supporting the lab with all four chemists, but with fewer technicians. Id. at 3; Id. Proposal B. I note that the witnesses did not explain why these other possibilities were rejected. In particular, there is no testimony as to why a floater chemist was preferable to maintaining all four chemists, with fewer lab technicians.

In sum, a key element in a finding that WSRC would have terminated the Complainant absent the protected disclosures is that the selection of the chemist position for elimination was the most appropriate option. The Hearing Officer shall make a specific determination on this aspect of WSRC's burden of proof.

Accordingly, this matter will be remanded to the Hearing Officer for further proceedings. If he finds it necessary, the Hearing Officer shall conduct further fact finding with respect to the issue of how the WSRC Managers decided that a chemist position needed to be eliminated from WML in order to accommodate the budget cut. In the alternative, the Hearing Officer may review the current record without further development and assess whether WSRC has met its burden of proof on this issue. With or without further fact-finding, the Hearing Officer shall issue a determination fully considering whether WSRC has shown by clear and convincing evidence that it would have eliminated a chemist position from the WML even in the absence of the Complainant's protected disclosures.

It Is Therefore Ordered That:

The Appeal filed by Lucy Smith on July 20, 2000 (Case No. VBA- 0055), of the Initial Agency Decision issued on July 11, 2000, is hereby granted in part. The Complaint proceeding is remanded to the Hearing

Officer for further action consistent with the above determination.

George B. Breznay

Director

Office of Hearings and Appeals

Date: October 2, 2000

(1)With respect to the burden of proof, the Hearing Officer cited to the prior version of Part 708. In connection with my review of the burden of proof, I shall therefore also refer to that earlier version. 57 Fed. Reg. 7533 (March 3, 1992). However, the procedures applicable to this appeal proceeding are set forth in the current version of Part 708, effective April 14, 1999. 64 Fed. Reg. 12862 (March 15, 1999). I shall cite to the current regulations when applicable.

(2)The Hearing Officer found another protected disclosure had been made, but that it was not a contributing factor in the Complainant's selection for termination. In any event, since there were two disclosures that were found to have been contributing factors to her dismissal, the fact that there may have been an additional disclosure is not necessarily relevant to this proceeding.

(3)The ITP Lab was staffed with one day technician and eight shift technicians. The ETF Lab was staffed with two day technicians and eight shift technicians. Id.

(4)A fifth attendee at the meeting, Stephen Lee, who was involved with the budget for the laboratory, did not testify at the hearing. Tr. at 82

(5)These witnesses, who attended the January 10 selection meeting, knew of the Complainant's safety disclosures, although they denied discussing them at the meeting. E.g., Tr. at 61, 102, 204, 244.

May 9, 2002

DECISION AND ORDER OF
THE DEPARTMENT OF ENERGY

Appeal

Name of Petitioner: Janet L. Westbrook

Date of Filing: January 17, 2002

Case Number: VBA-0059

This Decision considers an Appeal of an Initial Agency Decision (IAD) issued on December 21, 2001, involving a Complaint filed by Janet L. Westbrook (Westbrook or the Complainant) under the Department of Energy (DOE) Contractor Employee Protection Program, 10 C.F.R. Part 708. In her Complaint, Westbrook claims that her former employer, UT-Battelle, LLC (Battelle or the Company), the DOE contractor that manages the Oak Ridge National Laboratory (the Laboratory), terminated her as part of a reduction in force (RIF) as a retaliation for making disclosures that are protected under Part 708. In the IAD, however, the Hearing Officer determined that Battelle had shown that it would have terminated the Complainant, even in the absence of the protected disclosures. As set forth in this decision, I have decided that this determination is clearly erroneous and that Westbrook should be granted relief.

I. Background

A. The DOE Contractor Employee Protection Program

The Department of Energy's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste and abuse" at DOE's Government-owned or -leased facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purpose is to encourage contractor employees to disclose information which they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers. Thus, contractors found to have retaliated against an employee for such a disclosure, will be directed by the DOE to provide relief to the complainant. See 10 C.F.R. § 708.2 (definition of retaliation).

The DOE Contractor Employee Protection Program regulations establish administrative procedures for the processing of complaints. Under these regulations, review of an Initial Agency Decision, as requested by Westbrook in the present Appeal, is performed by the Director of the Office of Hearings and Appeals (OHA). 10 C.F.R. § 708.32.

B. History of the Complaint Proceeding

The events leading to the filing of Westbrook's Complaint are fully set forth in the IAD. *Janet L. Westbrook*, 28 DOE ¶ 87,018 (2001)(*Westbrook*). I will not reiterate all the details of that case here. For purposes of the instant appeal, the relevant facts are as follows.

Westbrook was employed as a radiation safety engineer at the laboratory from 1989 to December 1, 2000. One of her responsibilities was to perform radiation safety reviews under a principle known as ALARA,

meaning "as low as reasonably achievable," economic and social factors being taken into account. The ALARA engineers group was composed of four persons: one supervisor and three staff engineers, one of whom was Westbrook. During the relevant period the chain of command at the laboratory was as follows: Westbrook's supervisor was Dr. Gloria Mei, the head of the ALARA engineering group. Mei reported to Dr. Ron Mlekodaj, who in turn reported to Dr. Steve Sims, who was the Director of the Battelle Office of Radiation Protection. Sims was in that position until October 2000, when there was a general reorganization within the Environment, Safety, Health and Quality Directorate. After October 2000, Sims became the Deputy Director of the Occupational Safety Services Division of the Directorate. Ms. Carol Scott is the Director of that Division.

On June 8 and 12, 2000, Westbrook met with Scott to discuss concerns that she had about radiation safety at the lab. In August 2000 Scott and Sims decided to reduce the ALARA engineer staff from 3 to 1, as part of a larger lab-wide reduction in force. On December 1, 2000, Westbrook was terminated as part of that RIF.

Westbrook filed a Complaint under Part 708 with the DOE Oak Ridge Operations Office (DOE/OR). After the completion of an investigation, Westbrook requested and received a hearing on this matter before an OHA Hearing Officer. There were 11 witnesses who provided testimony during a hearing that lasted two days. After considering the testimony at the hearing and other relevant evidence, the Hearing Officer issued the IAD that is the subject of the instant appeal.

C. The Initial Agency Decision

The IAD cited the burdens of proof under the Contractor Employee Protection Regulations. They are as follows:

> The employee who files a complaint has the burden of establishing by a preponderance of the evidence that he or she made a disclosure. . . and that such act was a contributing factor in one or more alleged acts of retaliation against the employee by the contractor. Once the employee has met this burden, the burden shall shift to the contractor to prove by clear and convincing evidence that it would have taken the same action without the employee's disclosure. . . .

10 C.F.R. § 708.29.

As the IAD further noted, Section 708.5(a) provides that a disclosure is protected if an employee reasonably believes that she is disclosing a substantial violation of a law, rule, or regulation; a substantial and specific danger to employees or to public health or safety. . . .(1) In this case, Westbrook claimed that Company management chose her for dismissal during the RIF because of her long series of protected disclosures, especially the disclosures she made during her June 2000 meetings with Scott.

As the IAD pointed out, there was no dispute that Westbrook disclosed to her employer what she believed to be violations of Laboratory rules governing procedures to be followed when the potential exists for radiation exposure. The Company's position was that no reasonable person, especially a radiation engineer like Westbrook, could have reasonably believed that the problems that she noted revealed a *substantial* violation of law, rule or regulation or a *substantial* and specific danger to employees or the public health and safety. *Westbrook*, 28 DOE at 89,114-115.

The IAD noted that a DOE Investigator found that Westbrook articulated at least six concerns during her June 2000 meetings with Scott. However, as the IAD stated, Westbrook needed to show only that she made one protected disclosure. After reviewing the record and the hearing testimony, the IAD found that Westbrook made a protected disclosure involving the Laboratory's decision to raise the dosage level to 5 rem per hour before an ALARA review was required to be performed, a level that Westbrook noted is significantly higher that the one rem per hour used at other DOE facilities.(2) The IAD concluded that where a radiation safety engineer complains about matters that could lead to higher radiation exposures for

workers at the Laboratory and fellow engineers share her belief, substantial issues are raised that fall within the purview of the Contractor Employee Protection Program.

Westbrook also disclosed to Scott concerns regarding Sims' approval of a waiver of Laboratory rules to implement the change from using engineers to using technicians, to perform certain radiation safety reviews. The IAD found that since the switch could significantly affect employee health and safety, these disclosures raised substantial concerns that were protected under Part 708.

The IAD stated that Scott made her decision as to whom to eliminate in the RIF in August 2000, two months after her June meeting with Westbrook. The IAD determined that the two-month period clearly established a temporal proximity between the disclosure and the retaliation sufficient to meet the regulatory requirement that the employee establish that the protected disclosure was a contributing factor to the retaliation.

The IAD next considered whether the Company had clearly and convincingly demonstrated that it would have terminated Westbrook in the absence of the protected disclosures. 10 C.F.R. § 708.9(d). The IAD noted management's determination to move the ALARA engineering group from an overhead function to a "charge-out" function. This decision was made before Westbrook made her protected disclosures in the June 2000 meetings with Scott. *Westbrook*, 28 DOE at 89,118. The IAD also considered the testimony of Sims and Scott that, based on their knowledge of the engineers' work, they would be able to charge to other programs the work of only two ALARA engineers: the engineer who had supervisory experience (Mei) and one of the three others. The IAD found that in deciding which of the three other ALARA engineers to retain, Scott and Simms had only one consideration in mind: which engineer would be able to charge out his cost. They selected the engineer who had charged out one-third of his time that year and for whom an office using his services had already indicated that it would pay for one-half of his time in the coming year. The IAD pointed out Sims' testimony that no office had expressed a willingness to pay for Westbrook's time and in fact, according to Sims, officials had made negative comments about Westbrook. In summary, the IAD found that Westbrook's discharge occurred because "(i) senior management required the cost associated with positions in her group to be charged to parts of the Laboratory that utilized their services, (ii) management believed that it might be able to charge out time associated with two ALARA engineer positions, and (iii) frictions between potential customers and Westbrook meant her time was the least likely to be able to be charged out to customers." *Id.* at 89,119. Based on these considerations, the IAD concluded that the Company had shown by clear and convincing evidence that it would have terminated Westbrook even if she had not made the protected disclosures.

II. The Westbrook Statement of Issues and the Company's Response

A. Statement of Issues

Westbrook filed a statement identifying the issues that she wished the Director of the Office of Hearings and Appeals to review in this appeal phase of the Part 708 proceeding (hereinafter Statement of Issues or Statement). 10 C.F.R. § 708.33. The Statement raises the arguments set forth below to support Westbrook's contention that the Company did not show by clear and convincing evidence that it would have terminated her in the absence of the protected disclosures.

1. RIF Review Sheets

The Statement notes that Company procedures for selecting employees to be terminated in a RIF require that qualifications of targeted employees be compared through the use of a RIF Review sheet. The RIF Review sheets in this case were compiled by Sims and submitted to Scott on August 23, 2000.

Administrative Record at 224, 226. The Statement contends that according to testimony of Sims, Scott made the decision to terminate Westbrook in a July 21, 2001 meeting, which took place more than one month before Scott compared the qualifications on the RIF Review Sheets. Transcript of Hearing (Tr.) at 391-92.

The Statement also points to testimony of Mei, Westbrook's direct supervisor, who gave Westbrook a score of "6" out of a possible "7" as a performance rating. This rating was given on approximately June 30, and was approved by Mlekodaj, Mei's supervisor. Tr. at 416; 427-28. However, Mei was instructed to change the rating from "6" to "3". Later a compromise rating of "4" was agreed upon. This rating was the one that appeared on the RIF sheets. Tr. at 319, 419, 429-30.

The Statement points out that the RIF review sheets compared the qualifications of the three employees and maintains that under the objectively measurable criteria set out on the RIF sheets, Westbrook should have been the employee who was retained. In this regard, the Statement notes that Westbrook has been with the Lab longer than the retained employee; is over 40 years of age and therefore entitled to extra consideration; and has considerably more overall experience than the retained employee.

2. Charge-Out Justification

The Statement notes that a key reason given for reducing the ALARA staff by two employees and for terminating Westbrook was that all work needed to be charged out in the future and Westbrook performed the lowest level of charge-out work of the three candidates. However, the Statement contends that Scott did not consider that there was considerable other work performed by Westbrook that was not charge-out type work, had been funded by overhead in the past, and would need to be funded by overhead in the future.

The Statement contends that the finding of the IAD that Westbrook was difficult to work with is unsubstantiated by any witnesses and is only provided through hearsay evidence of Scott and Sims.

B. The Company's Response

In its response to the Westbrook Statement of Issues, the Company raises the following contentions. First, the Company sets out what it believes to be the appropriate standard for review in this case. The Company argues that unless the findings of fact are clearly erroneous or without substantial basis, they may not be disturbed on appeal. The Company then responds seriatim to a number of points raised by Westbrook's Statement of issues. I will not detail each response here. However, I will note key Company objections in areas that will be addressed more fully below.

In response to the claim in the Statement of Issues that Westbrook's performance evaluation was unfairly lowered by Scott, the Company contends that Mei did not have unilateral authority to assign a performance rating to Westbrook. The Company also states that the Statement of Issues erroneously claims that Scott did not follow the RIF review process. In this regard, the Company argues that the testimony of all witnesses supports the position that standard RIF procedures were followed. The Company also reiterates its position that Westbrook's low charge-out rate indicates that it would not be able to fully charge her time under the new system. The Company repeats that because Westbrook was difficult to get along with, she was unable to cultivate customers to whom she could charge out her services.

III. Analysis

As I indicated above, the IAD noted that the Complainant was terminated as part of an overall reduction in force (RIF), in which two engineer positions were selected for elimination. Thus, the two key actions to be examined in this case are the decision to eliminate two positions, and the selection of Westbrook's

position as one of the two eliminated. In this regard, the IAD found that management's decision to eliminate two positions was based on its determination that all ALARA work would be charged out in the future. It also found that the Company's decision in selecting which of the three ALARA staff engineers would be "riffed" was based on "who among the three would be able to charge out his cost." *Westbrook*, 28 DOE at 89,118.

After reviewing the entire record in this case I have several concerns about the overall approach of the IAD. I recognize that the IAD found the testimony of Scott and Sims to be candid. I am not reevaluating that determination. However, I believe that the IAD failed to consider some important evidence in the record that refutes the Company's position that it would have terminated Westbrook absent the protected disclosures. Further, the IAD accepted the assertions of Battelle's witnesses that Westbrook would not be able to charge out her work, even though there was weak, if any, corroboration for this point. In my view, the IAD did not adequately evaluate whether the totality of the Company's evidence was sufficient to meet Battelle's burden of proof in this case. As discussed below, after considering these factors and giving them appropriate weight, I find that Battelle has not met its burden to show by clear and convincing evidence that it would have terminated Westbrook in the absence of the protected disclosures. In this regard, I do not attach particular significance to the fact that the decision to charge out ALARA work was made before Westbrook made the protected disclosures. I accept the overall determination that some ALARA functions would need to be charged out was made impartially and without regard to Westbrook. Ultimately, as discussed below, I find Battelle has not supported its position that (i) it would have to discharge two ALARA engineers in order to satisfy the charge-out mandate, and (ii) the selection of Westbrook as one of the discharged engineers was made without consideration of her protected disclosures.

A. Evidence Regarding the Decision to Eliminate Two Positions

I found little support in the record for the Company's stated position that if it adopted a charge-out system, it would be necessary to eliminate two staff engineer positions. According to the evidence, significant non charge-out work was being performed by the staff engineers. In this regard, Mei, Westbrook's direct supervisor, testified that Westbrook had been assigned to projects that were not associated with charge-out functions. Tr. at 422-24. Scott's testimony supported this conclusion. She testified that most of the ALARA work was overhead work, i.e. work that would remain even if some other types of work were to be charged out. However, when asked how this other work would be paid for, she stated that Sims would have to answer this question. Tr. at 354- 55. Sims agreed that even though Westbrook was only using 11 percent of her time towards charge-out functions, she was not working only 11 percent of a full time schedule. There was significant overhead work that she was performing. Tr. at 384. Sims was asked who would perform this other work if two ALARA engineers were terminated. He testified that he was not familiar with that work, and did not know if Westbrook was terminated who would perform it. Tr. at 384, 385, 386. (3)

Thus, according to the testimony, there was a considerable amount of overhead work for the ALARA team at the lab. Yet, Scott and Sims, who made the ALARA RIF determination, were unclear about the basics of the overhead work. They seemed to be unaware of the scope of the overhead work, did not know who performed it or give serious thought as to how this overhead work would be performed after the RIF. Their failure to focus on the overhead work leads me to question the thoroughness of the deliberations leading to the decision to RIF two ALARA engineers. To help meet its burden of proof in this regard, the Company could have explained, through its witnesses, how those overhead functions have been performed since the RIF. The weakness of the Scott and Sims testimony on this point detracts from the Company's position that the RIF of two ALARA engineers was necessary. Without more clarity on the overhead work issue, I am not persuaded that the Company made a rational and informed decision to terminate two ALARA engineers. In light of the fact that there was still essential non charge-out work to be performed, the assertion that two ALARA engineer positions should or could be eliminated seems pretextual.

B. Evidence Regarding the Company's RIF Sheets

There is evidence in the record that suggests that the RIF sheets, which contained the objective information on which the termination selections were to be made, were not given serious attention, and were drawn up to favor a preselected individual. I have reviewed the criteria set out on the RIF sheets and find troubling inaccuracies and manipulation. They lead me to doubt the Company's position that the process by which Westbrook was not selected as the retained employee was unrelated to the protected disclosures.

For example, a key criterion in the RIF selection process appears to have been manipulated by the Company and misapplied to the Complainant. Entitled "transferability of skills," this criterion was one of six set out on the RIF comparison worksheets. The definition of this criterion as set out on the RIF sheet is as follows: "Ability to directly transfer skills or acquire new skills necessary to maintain core competencies, demonstrates flexibility and adaptability to changing needs of business. Has multiple skills to work a variety of functions, seeks opportunities to learn new skills and improve on known skills." "Flexibility" in this context has to do with transferability of substantive skills in order to adapt to changing needs of business. This transferability of skills criterion is not an uncommon RIF criterion. The definition quoted above, and provided for this criterion--ability to transfer skills and acquire new skills necessary to maintaining core competencies--indicates to me that this criterion was given its familiar definition. I assume that this criterion and its definition here were used throughout the Company-wide RIF, and I see nothing unusual in either the criterion or its definition. Both are easy to understand. *See* Tr. at 75-76.

However, I was surprised to see the way this criterion was applied in this case. Specifically, the retained employee's rating has an unusual notation: "His flexibility has led to his *being in demand by customers*." (Emphasis added.) This makes little sense. The stated definition of flexibility relates to acquiring substantive skills to adapt to changing business needs. In actuality, the retained employee had no newly-acquired substantive skill that the complainant lacked. Something else in my view accounts for the more favorable rating on this criterion. I believe it is the Company's other purported concern that Westbrook could not get along with customers and would not be able to charge out work. That concern is unrelated to this criterion. The ability to "get along with customers" does not appear to me to be the type of "skill transference" or "acquisition of new skills" envisioned in this criterion, when properly applied. In fact, one witness at the hearing, a human resources generalist, confirmed that "flexibility" referred to possession of skills that can be used in future assignments and "the ability to transition to different work." Tr. at 76. These "skills" are part of one's substantive competence, not personal style.

In my view, the Company's use of this criterion to assess whether an employee is flexible enough to "satisfy" or "get along with" customers is so strained that it suggests a manipulation of the system to reach a predetermined result. Had this criterion been fairly applied, i.e. squarely judging whether an affected employee showed the ability to improve substantive skills, Westbrook's rating may well have exceeded that of the retained employee. The Company could certainly have incorporated as a discrete criterion an employee's ability to attract non-overhead work through the use of interpersonal skills. However, this was not one of the criteria. Instead, Battelle used the criterion "transferability of skills" in a distorted manner. That leads me to believe its use was an afterthought, one designed to downgrade Westbrook and target her for termination. As such, it detracts from Battelle's position that the RIF was performed impartially with respect to Westbrook.

Further, the RIF sheets set out incorrect information concerning Westbrook's length of Company-credited service and time performing current work. The RIF sheet indicated 10 years for Westbrook, whereas she had actually been employed at the Lab as an ALARA engineer for nearly 12 years. Tr. at 26. *Westbrook*, 28 DOE at 89,113. The retained individual had been in service for only 8 years. Moreover, the RIF sheet states that managers are encouraged to give positive consideration to retention of long service employees who are 40 years of age or older. Westbrook was 50 years old at the time of the RIF, while the retained employee was 35. Thus, in these criteria, Westbrook was superior to the retained employee. The Company has not stated how this information was factored into the overall retention rating, or what weight was given to this factor. *Id.* at 89,118.

Not all information in the RIF record favored Westbrook. The retained employee did have superior performance reviews for 1999 and 1998. He was reviewed as "consistently exceeding expectations" for those years, while Westbrook received a "consistently meets expectations." For the year 2000, Westbrook received a "4" (out of "7" rating), whereas the retained employee received a "5" rating. Thus, in this criterion, the retained employee does at first glance appear to be superior to Westbrook.

However, under scrutiny, Westbrook's low performance rating for the year 2000 is flawed. As noted above, Mei believed that Westbrook should receive a "6" rating for that year. Although Mlekodaj had originally agreed with the "6" rating, Mei was told by Mlekodaj to reduce the rating to a "3." A compromise rating of "4" was eventually assigned to Westbrook. Tr. at 417, 429. Mei's ratings for the other two ALARA engineers were sustained; only her rating for Westbrook was overruled. Mei implied that the overrule came from management at a level above Mlekodaj, which would have been Scott and Sims. Tr. at 416-19. These two latter witnesses did not testify about how this lowered rating came about. Thus, as the record stands, Westbrook's low performance rating for the year 2000 appears to have been dictated by high-level Company management. The unexplained lowered rating detracts from Battelle's position that the RIF was not used to terminate Westbrook improperly.

The RIF sheet also states that Westbrook's unique skills, running "elaborate computer codes," are not a necessary core competency, while the retained employee provides needed support for Oak Ridge divisions. There is little evidence to support this rating for Westbrook. It was not a significant part of the hearing testimony. This aspect of Westbrook's work was not raised as a key reason to terminate her.

There is other evidence that the RIF sheets were more of a pro forma exercise than a real attempt to rate the employees. Sims testified that his notes indicated that Scott proposed Westbrook for termination on July 21, 2000. Tr. at 392. *See also* Notes of Steve Sims, submission of March 15, 2001. However, the RIF documents were not generated until August 2000. Thus, Scott had apparently selected Westbrook before there was an opportunity to compare qualifications on the RIF sheets. Yet, Scott, who at that time had only been on the job for several months, testified that she did not have any special knowledge of the 200 employees in her organization. She stated that she therefore relied on Sims to provide her with information about the employees. Tr. at 317, 319. However, there was some key information that Scott did have about Westbrook. The information was that Westbrook had made protected disclosures to her in June 2000.

In sum, I find that the RIF sheets provide weak if any support for the Company's position that Westbrook's termination came about through legitimate reasons and with appropriate deference to the established RIF procedures. I am left with the distinct impression that the stated criteria were manipulated and not given due consideration in the retention process.(4)

C. Westbrook's Ability to Charge Out and Evidence That Westbrook Was Difficult to Work With

As indicated above, it has been the Company's position that Westbrook was riffed because she was difficult to work with and thus she could not attract customers to whom her work could be charged out. It was the testimony of Sims that only 11 percent of Westbrook's work was the type of work that could be charged out, whereas the scientist who was retained was able to charge out "about one third" of his work. Tr. at 377. (5) Both Sims and Scott testified that the basis for selecting Westbrook was that because she was difficult to work with, she would be less successful in charge-out functions. Tr. at 323-325, 351, 378, 381- 82. However, Sims and Scott did not work directly with Westbrook and provided hearsay evidence that Westbrook was difficult to work with. *E.g.*, Tr. at 325, 349, 358, 361-64, 365-66. (6)

Mei also testified about what she heard. She said she had had complaints about Westbrook, that she had heard that Westbrook was difficult to work with and had requests that she be removed from a job. Tr. at 408, 415. There is also second and third hand evidence from four other witnesses about Westbrook's difficulties in her working relationships. *E.g.*, Tr. at 192, 200, 205, 209, 280, 307, 311, 407, 415. Further,

the record includes copies of a number of E-mails and several memoranda describing the difficulties that some lab employees encountered while working with Westbrook.

There is limited direct testimony about Westbrook's behavior on the job. One safety engineer testified that "Janet has a different style. She's more direct. She tends to be more in their face." Tr. at 239. This witness indicated that the relationship between Westbrook and some team managers was "ineffective." Tr. at 240. She believed Westbrook to "come across very aggressively" and found her approach to be "confrontational." Tr. at 241. On the other hand, another witness testified that he admired Westbrook's attention to detail in the review she performed on his work. He stated that in meetings he attended with her, he never observed her do anything "inappropriate" or "out of the norm." Tr. at 440, 441.

Mei testified that even though some customers did not like Westbrook, others did like her. Tr. at 414, 424. In fact, there were a number of memos in the record that are complementary to Westbrook. Tr. at 424. Thus, there is certainly evidence on both sides of the issue of Westbrook's professional, interpersonal style, and whether she was easy or difficult to work with. I believe that some employees may well have been uncomfortable with her style.

Nevertheless, evidence that some employees may have had objections to Westbrook's working style is not sufficient to establish that a significant number of potential customers would object to using her services, especially if she were the only ALARA engineer available for safety review. (7) Sims identified 11 employees who objected to working with Westbrook and pointed out two projects on which she had difficulties. Tr. at 361-66. She was removed from the projects at the request of those customers. Several other employees who had problems with Westbrook are identified in the copies of E-mail messages included in the record. (8)

However, Sims recognized that Westbrook had professional involvement with "dozens" of laboratory employees. Tr. at 381. Thus, the fact that through hearsay evidence and E-mails, about a dozen employees were identified as having objections to working with Westbrook does not persuade me that the larger group of employees that she had contact with objected to working with her. I am also not convinced that the much greater group of potential customers lab-wide would object to working with Westbrook in the future. In this regard, Scott testified that 500 to 600 people had the potential to use the services of the ALARA engineering group. Tr. at 321. In this light, the dozen or so purportedly dissatisfied customers seems negligible, especially given the evidence in the record that some lab employees respected Westbrook and appreciated working with her.

The testimony of Scott and Sims to the effect that, because of her personality, Westbrook was less likely to be able to attract charge-out customers was unsubstantiated, and in my opinion, without anything more, the type of speculative problem often used to justify dismissal of a whistleblower. Ultimately, there is no significant direct evidence from potential customers on this issue, and it was this type of evidence that, at a minimum, was called for here. The hearsay testimony does not sufficiently support the Company's position. I also consider the documentary material supporting that testimony to be relatively weak. I therefore cannot find the evidence regarding Westbrook's purported inability to attract charge-out customers meets the rigorous standard of proof required in this case.

In sum, it was Battelle's burden to provide clear and convincing evidence to support its position that it would have terminated Westbrook absent the protected disclosures. It attempted to show, through the testimony of Scott and Sims, that Westbrook would not have been able to attract charge-out customers. It should have supported that key point with direct evidence. The Company was certainly in a position to call potential customers as witnesses to explain why they would prefer not to work with Westbrook. The Company also could have presented former Westbrook customers to testify that they found Westbrook difficult to work with and that they would have significant reservations about having her perform future ALARA reviews. (9) These witnesses could also then have clarified the difficulties they perceived working with Westbrook, and how they would accomplish their safety inspection work if Westbrook were the only engineer offered to them. They could also have provided information about how the safety

reviews actually were carried out after the RIF. Such testimonial evidence, had it supported Battelle's position, would certainly have made the Company's position more convincing. The mere say-so of management officials on these key points does not satisfy the burden of proof in this case. The copies of E-mail messages and other memoranda in the record indicating that some employees did not find Westbrook easy to work with also do not measure up to the standard of proof required here. The Company has simply not provided clear and convincing evidence for its position.

IV. CONCLUSION

As indicated by the above discussion, the IAD found that Westbrook made protected health and safety-related disclosures. The IAD also determined that Battelle made the decision to terminate her only two months later, and that this temporal proximity was sufficient to establish that the disclosures were a contributing factor to the termination decision. These facts are no longer disputed, and I believe are well-established by the record. It was therefore the Company's burden to show by clear and convincing evidence that it would have terminated Westbrook absent the protected disclosures. Battelle offered a plausible explanation for the termination, i.e., that under the charge-out system, only two ALARA engineers could be retained and since Westbrook would have difficulty in attracting customers in the new charge-out system, she should be one of the two discharged. However, the Company failed to bring forth adequate substantiation to support this justification. Mere plausibility and reasonability are simply inadequate to meet the rigorous "clear and convincing evidence" standard applicable here.

In fact, there was significant evidence in the record that does not support the Company's position that it would have eliminated two positions and terminated Westbrook even in the absence of the protected disclosures. For example, the record indicates that the decision of the Company to eliminate two positions was made without thorough consideration of the overhead work being performed by the ALARA group. Further, the reduction in Westbrook's performance evaluation, under the noted circumstances, detracts from the Company's assertions that the RIF was objectively performed with respect to the ALARA group. The IAD did not consider that information. Moreover, as noted above, Battelle failed to provide persuasive direct testimony to support its contention that lab personnel would object to paying for Westbrook's services. After weighing and balancing the evidence, I find that the Company has not made a clear and convincing showing that it would have terminated Westbrook in the absence of the protected disclosures. I therefore find that Westbrook is entitled to relief in this case.

Accordingly, Westbrook should submit a statement of the specific relief that she seeks along with appropriate calculations of that relief. This relief may include such items as reinstatement, back pay, costs and attorney's fees. The information should be submitted within 30 days of the date that she receives notice of this determination. The Company will have an opportunity to respond to that statement. I will then issue an order setting forth relief for Westbrook.

It Is Therefore Ordered That:

(1) The Appeal filed by Janet Westbrook on January 17, 2002 (Case No. VBA-0059), of the Initial Agency Decision issued on December 21, 2001, is hereby granted.

(2) Within 30 days of the date that she receives notice of this determination, Westbrook shall submit a detailed statement showing the relief she is claiming in this case, and a justification of her expenses. This relief may include such items as reinstatement, back pay, costs and attorney's fees. The statement shall be served on the attorney for Battelle.

(3) Battelle shall be permitted to submit comments on the statement of relief. The comments shall be due 10 days after receipt of the statement.

(4) This appeal decision shall become a final agency decision unless a party files a petition for secretarial

review with the Office of Hearings and Appeals within 30 days after receiving this decision.

George B. Breznay
Director
Office of Hearings and Appeals

Date: May 9, 2002

(1) The regulation provides: "If you are an employee of a contractor, you may file a complaint against your employer alleging that you have ben subject to retaliation for: (a) Disclosing to a DOE official, a member of Congress, or any other government official who has responsibility for the oversight of the conduct of operations at a DOE site, your employer, or any higher tier contractor, information that you reasonably believe reveals--(1) A substantial violation of a law, rule , or regulation; (2) A substantial and specific danger to employees or to public health or safety; . . ." 10 C.F.R. § 708.5(a)(1) and (2).

(2) A rem is "the dosage of an ionizing radiation that will cause the same biological effect as one roentgen of X-ray or gamma- ray exposure." *Westbrook*, 28 DOE at 89,115.

(3) He had no specifics, but said that lab personnel were being "squeezed," and "it was going to be tough." Tr. at 386.

(4) The IAD took the position that whether Westbrook's dismissal complied with rules governing RIFS was not an issue here because this is not an appeal of a dismissal action. Westbrook, 28 DOE at 89,119, Note 5. I disagree. As a rule, if RIF criteria are improperly or unfairly applied, resulting in the termination of a whistleblower, it belies the employer's position that the RIF, as it was applied to the complainant, was legitimate. This, in turn, undermines the company's position that it would have terminated the employee in the absence of the protected disclosure.

(5) The charge-out percentages for the three ALARA engineers were developed at Sims' request by a Battelle finance officer. The time frame Sims requested for the charge-out comparison was from the beginning of the fiscal year through June 2000. Tr. at 384. During the testimony of the finance officer, the Hearing Officer indicated that it was his own understanding that the retained employee "was working on a temporary project for a particular organization at the lab." He further stated: "that would explain, at least, why his charge-out rate was 38 percent and the other two were at 10, 11, 12 percent." He added: "I did not see any footnote. . . to explain that this was an anomaly, and that you cannot compare the 37 (sic) percent rate to the 10 or 12 percent rate. . . ." Tr. at 301- 02. This suggests that Battelle's comparison of charge-out percentage rates may be inapt.

(6) Sims testified that he had agreed to requests to remove Westbrook from a project. He stated he had heard about such a request on another project. Tr. at 366, 383. Copies of several E-mails in the record confirm that such requests were made.

(7) Sims testified that he could not "force people to buy the services of an individual. . . . " Tr. at 376. *See also* Tr. at 390. There is no evidence regarding what would happen if Westbrook were the only ALARA engineer available for safety review.

(8) These other employees seem to be associated with the same two projects that Sims identified as posing difficulties for Westbrook.

(9) As stated above, Sims identified by name several Battelle employees who he stated had experienced difficulties and frictions with Westbrook. Tr. at 361-66.

August 5, 2002
DECISION AND ORDER OF
THE DEPARTMENT OF ENERGY

Appeal

Name of Petitioner: Robert Burd

Date of Filing: November 16, 2001

Case Number: VBA-0060

On November 16, 2001, BWXT Pantex, as successor to Mason & Hanger Corporation (M&H) (collectively referred to as "the contractor"), filed an appeal of an Initial Agency Decision (IAD) issued by an Office of Hearings and Appeals (OHA) Hearing Officer under the Department of Energy (DOE) Contractor Employee Protection Program, 10 CFR Part 708. *Robert Burd*, 28 DOE ¶ 87,017 (2001). The IAD found that the contractor terminated Robert Burd (the complainant), a former employee at the DOE's Pantex nuclear weapons plant, in retaliation for making disclosures protected under Part 708. The IAD ordered the contractor to reinstate Burd, provide him with back pay, and reimburse him for the reasonable costs and expenses of prosecuting his complaint. *Id*. at 89,113. It further directed the complainant to file a report providing a calculation for back pay, and if there is no immediate reinstatement offer, to update that back pay report every 90 days. *Id*.

As set forth below, I have determined that the contractor has failed to show the IAD was erroneous in finding for the complainant on the issue of retaliation, and that relief should be granted to Burd in the form of costs, expenses, attorney fees, back pay, and other reasonably foreseeable monetary damages incurred as a result of the retaliatory termination, including moving and travel expenses. However, after weighing and balancing the equities in this matter, as required by the applicable DOE case law, I will not order the contractor to reinstate Burd.

I. Background

A. The DOE Contractor Employee Protection Program

The DOE's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste and abuse" at DOE's Government-owned or -leased facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purpose is to encourage contractor employees to disclose information which they believe exhibits unsafe, illegal, fraudulent, or

wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers. Thus, contractors found to have retaliated against an employee for such a disclosure will be directed by the DOE to provide relief to the complainant. See 10 CFR § 708.2 (definition of retaliation). Under the DOE regulations, review of an IAD is performed by the OHA Director. 10 CFR § 708.32.

B. History of the Complaint Proceeding

The events leading to the filing of Burd's Complaint are fully set forth in the IAD, *supra*. I will not reiterate all of the details here. For purposes of the instant appeal, the relevant facts are as follows.

From January 1998 until his termination in September 2000, Burd worked for the contractor as a radiation safety technician (rad tech) in the Non-MAA Section of the Radiation Safety Division at Pantex. Burd's Operations Manager and immediate supervisor was Henry Ornelas. This case centers around an altercation between Burd and Ornelas which led to the termination of both employees.

The incident occurred on September 8, 2000. Burd and two other rad techs, Kendra Bridges and Phil Franks, were waiting for a meeting in their area. Bridges revealed that at that time, Burd's partner, Russell West, was working an overtime shift and had been working for approximately 24 consecutive hours, save for a pre-dawn, two-hour break. Burd strongly objected to West's being permitted to work excess overtime, since the Pantex standard limited an employee to no more than 16 hours. While the three rad techs were discussing the overtime issue, Ornelas arrived, interjected himself into their conversation, and made a statement to the effect that overtime issues were "none of their business." Burd responded that it was unsafe to work for such a long period of time and that the handling of overtime in West's situation was "stupid." Ornelas replied, "Are you calling me stupid?" From there, the conversation quickly became heated, and their voices grew louder and louder until Burd finally told Ornelas to "shut up." Ornelas then ordered Burd to accompany him to the office of their Department Manager, Wayburn Scott Wilson. After Ornelas twice reiterated the order, Burd agreed, and they proceeded toward Wilson's office, with Ornelas following closely on Burd's heels.

Wilson was not there, so Ornelas grabbed Burd's arm to lead him to the office of their Operations Coordinator, Richard Jones. As the employees approached and entered Jones' office, they were both yelling. The cramped space in Jones' small office forced Complainant and Ornelas to stand close to each other, virtually face to face. They remained standing and continued to yell, despite Jones' request that they settle down and explain the situation. According to the IAD, Burd stepped toward Ornelas, this action prompted Ornelas to use his chest to bump Burd away, and in response, Burd yelled "Don't bump me, Hank." Jones then inserted himself between the employees and again admonished them to calm down. Ornelas finally stepped aside, Jones ordered Burd to return to the rad techs' area, and the altercation ended.

Jones reported the altercation to Wilson. On September 11, 2000, Wilson and Michael Knight, Manager of the Radiation Safety Department, reported the altercation to Peter Selde, the Division Manager. With Selde's approval, Knight and Chris Passmore, another member of radiation management, launched an investigation into the altercation, as well as the overtime issue.

On September 18, 2000, Knight and Passmore presented an investigation memo to Selde (the September 18 memo). Attached to the September 18 memo were written statements from Burd, Ornelas and Jones, summaries of oral interviews with them, and summaries of oral interviews with other rad techs who witnessed the portion of the argument that occurred in their meeting area. Contractor's Hearing Exhibit F.

As set forth in the September 18 memo, Knight and Passmore found that (1) Burd told Ornelas to "shut up"; (2) Burd "approached Ornelas and got 'face to face' with him"; and (3) "Ornelas pushed Complainant off of him." *Id*. They further concluded that Burd's and Ornelas' conduct on September 8, 2000 constituted "clear violations" of the Pantex Employee Manual ("the Manual") and Pantex Bulletin 869 (Bulletin 869). *Id*. The Manual prohibits "general," "safety," and "security" misconduct and lists examples of each. Bulletin 869 sets forth a "zero tolerance policy" regarding physical and non-physical confrontations. The first section of Bulletin 869 provides for automatic discharge of employees who engage in physical confrontations. The second section provides for discipline up to and including discharge of employees who engage in non-physical confrontations.

In the following days, Selde consulted several people regarding the appropriate course of action. First, on September 22, 2000, Selde, Knight and Passmore met with Michael Soper, a Labor Relations representative. Pantex procedures require that managers consult Labor Relations when contemplating formal discipline for an employee. During that meeting, Selde requested that Knight further investigate the duration and circumstances leading to the escalation of the confrontation between Burd and Ornelas.

On September 25, 2000, Knight presented Selde with a second investigation memo (the September 25 memo). In the September 25 memo, which is based upon a follow-up interview with Jones, Knight concluded that (1) the confrontation in Jones' office lasted 6-8 minutes, with Burd and Ornelas "face to face" for about 1-2 minutes; and (2) Burd "advanced on Ornelas and got in his face," before Ornelas bumped him away. Contractor's Hearing Exhibit G.

Later on September 25, 2000, Selde, Jones, Wilson, Knight, and Soper met with Robert Rowe, the Human Resources Director. During that meeting, Knight, Wilson, and Jones advised Selde that Bulletin 869 did not require termination for either employee; Soper and Rowe advised that Bulletin 869 required termination for both.

Selde next consulted the general manager of Pantex at the time, Dr. Benjamin Pellegrini. Selde sought Pellegrini's position regarding Bulletin 869, since it had been issued and signed by

Pellegrini's predecessor. Pellegrini advised Selde that he supported strict enforcement of the policy.

Finally, on September 27, 2000, Selde met with the Personnel Evaluation Board (PEB). Pantex procedures require the PEB to review termination decisions. The PEB consisted of 10 members, including Soper, Rowe, and representatives from the employer's Employees Concerns Office and legal department. Also present as witnesses were members of radiation management, including Jones, Wilson, Knight and Chris Cantwell. Neither Burd nor Ornelas attended the meeting, and besides Jones, no other witness to the altercation attended. PEB members had been given copies of the September 18 and 25 memos and all attachments.

The PEB first discussed Ornelas. After short deliberation, Selde recommended that Ornelas be terminated, and the PEB unanimously concurred. Finding that Ornelas engaged in a physical confrontation, by chest-bumping Burd, and insubordination, by disregarding Jones' order to settle down, the PEB agreed that Bulletin 869 called for Ornelas' termination. Ornelas' personnel file contained evidence of two prior disciplinary actions, including a verbal counseling and a documented warning.

The PEB next discussed Burd. After extended deliberation, Selde recommended that Burd be terminated, and again, the PEB unanimously concurred. Finding that Burd engaged in a non-physical confrontation with Ornelas and two acts of insubordination, once by telling Ornelas to shut up, and again by ignoring Jones' initial order to settle down, the PEB agreed with Selde that Burd's conduct fell within the purview of Bulletin 869. Although Bulletin 869 provides for, but does not mandate, termination, the PEB and Selde agreed that Burd's discharge was warranted, because he was the initial aggressor in the altercation with Ornelas and repeatedly insubordinate. Burd had no prior disciplinary actions in his personnel file. Except Selde, every radiation safety manager present at the meeting had recommended a lesser form of discipline for both employees.

The following day, September 28, 2000, Selde presented Burd and Ornelas with draft termination statements, which restated the contractor's investigatory findings regarding the September 8 incident. Given the choice between accepting the termination statements or resigning, both employees resigned.

On October 13, 2000, Burd filed a Part 708 complaint, alleging that the contractor effectively terminated him for raising safety concerns regarding overtime practices. The contractor does not dispute that it forced Burd to resign, but maintains that it would have terminated Burd for violating Bulletin 869, regardless of whether he made a protected disclosure. The complaint was referred to OHA for an investigation. After completion of the investigation, Burd requested a hearing before an OHA Hearing Officer. There were eight witnesses who testified at the day-long hearing held in this matter (including one who testified by videotape), each party submitted several written exhibits, and the Hearing Officer considered the deposition testimony of Selde and Ornelas. After considering the evidence in the record, the Hearing Officer issued the IAD that is the subject of this appeal.

C. The Initial Agency Decision

The IAD cited the respective burdens of proof for the employee and the contractor under Part 708:

> The employee who files a complaint has the burden of establishing by a preponderance of the evidence that he or she made a disclosure. . . and that such act was a contributing factor in one or more alleged acts of retaliation against the employee by the contractor. Once the employee has met this burden, the burden shall shift to the contractor to prove by clear and convincing evidence that it would have taken the same action without the employee's disclosure. . . .

10 CFR § 708.29. The IAD further noted that under Section 708.5(a), a disclosure is protected if an employee reasonably believes that he is disclosing "a substantial and specific danger to employees or to public health or safety."

In applying these standards to the instant case, the IAD considered the factual record and concluded that Burd had made a protected disclosure when he raised a valid safety concern about rad techs working excessive overtime in a nuclear weapons facility. 28 DOE at 89,107. The IAD further determined that Burd made a prima facie showing that his protected disclosure was a contributing factor to a retaliation, since his termination occurred within a brief period of time, 20 days after the protected disclosure, and all the persons involved in the decision to terminate Burd knew or had constructive knowledge of the fact that he had raised a valid safety concern. *See IAD* at 89,108 and cases cited therein.

Under Section 708.29, the complainant having made a prima facie case of retaliation, the burden shifted to the contractor to prove by clear and convincing evidence that it would have terminated Burd in the absence of the protected disclosure. The IAD considered the contractor's contentions that (1) strict enforcement of Bulletin 869's zero tolerance policy is necessary to ensure the security of Pantex; (2) Burd had fair notice of the policies set forth in Bulletin 869; (3) the employer conducted a fair investigation into the events of September 8, 2000; (4) the investigation revealed that Burd engaged in two acts of insubordination and a non-physical confrontation, as prohibited under Bulletin 869; (5) given the severity of Burd's conduct, Bulletin 869 required his termination; and (6) the employer applied Bulletin 869 fairly and without improper motives to Burd. In response, Burd (1) challenged the integrity of the internal investigation; and (2) maintained that his termination was a form of discipline substantially disproportionate to the discipline imposed on other employees for similar conduct.

The IAD determined that the contractor conducted a thorough investigation and fairly characterized Complainant's behavior, "although non-physical, as confrontational and insubordinate," *Id*. at 89,109. Nevertheless, after examining how over time the contractor had disciplined employees for engaging in confrontations and insubordination, the IAD concluded that even accepting the contractor's description of complainant's behavior, "the employer failed

to show with clear and convincing evidence that it consistently discharged employees for similar misconduct." *Id*.

According to the IAD, a "disciplinary list" provided by the contractor showed that between the August 23, 1999 effective date of Bulletin 869 and Burd's termination on September 28, 2000, the contractor disciplined employees for hostile, disruptive behavior approximately 18 times. All but three of those employees received a lesser form of discipline than termination. The three who were terminated were Ornelas, Burd, and a third employee found to have engaged in a non-physical confrontation. The contractor maintained that when employees have engaged in insubordinate and confrontational conduct rising to the level of Burd's behavior, they have been terminated. The contractor argued that Burd's behavior distinguished his case from the disciplined employees who were not terminated, because his non-physical conduct was particularly egregious, and that he had been the aggressor in the case by advancing on Ornelas and had failed to comply with Jones's order to stop the argument. *IAD* at 89,110.

Burd contended that his behavior was not unusual for the "generally truculent Pantex environment," that he was the victim of aggression by Ornelas, and should not have been terminated. He argued that to the extent his behavior was confrontational and insubordinate, the disciplinary list shows that similarly situated employees have escaped termination. Burd distinguished himself from Ornelas and the third employee terminated under Bulletin 869, both of whom had been disciplined for prior misconduct before termination, because Burd had never received a formal discipline of any kind. *IAD* at 89,111. In addition, Burd claimed that the disciplinary list was not exhaustive, and that numerous confrontations and acts of insubordination were handled "in-house," outside of the formal disciplinary process. Several other witnesses corroborated Burd's assertions that many confrontations were handled on an informal basis. *Id*.

After considering the evidence on the way the contractor disciplined its employees who had engaged in non-physical confrontations and insubordination, the IAD concluded that the contractor had failed to show that it consistently invoked Bulletin 869. The IAD noted that Selde and Soper testified that they first invoked the zero tolerance policy against Burd and Ornelas, and that several other incidents had escaped formal review. In addition, the IAD found that the contractor failed to show that it applied Bulletin 869 in a consistent manner, since it had only terminated Burd and one other person out of the many employees who had engaged in similar non-physical confrontational and insubordinate behavior. The IAD found "nothing particularly egregious in [Burd's] conduct that would warrant singling him out from the other employees who disobeyed, repeatedly cursed and yelled at, and threatened violence toward their supervisors or coworkers, but received lesser penalties." *Id*. Finally, the IAD rejected the contractor's argument that Burd should be treated the same as Ornelas, noting that not only had the latter engaged in a physical confrontation, making him automatically subject to termination under Bulletin 869, but Ornelas had a record tainted by two prior disciplinary actions taken against him at Pantex.

Based on the finding summarized below, the IAD ordered the contractor to reinstate Burd, provide him with back pay, and reimburse him for the reasonable costs and expenses of prosecuting his complaint. *Id*. at 89,113. This appeal followed.

II. The Contractor's Contentions on Appeal and the Complainant's Response

A. The Contractor's Statement of Issues and Appeal Brief

1. Legal Arguments

In its Statement of Issues filed on December 3, 2001, the contractor argued that the IAD was erroneous and should be reversed. However, the contractor complained about the short time allowed by the IAD for submission of the Statement of Issues, and requested permission to file an appeal brief. I granted that request. The contractor's "Original Brief on Appeal,"which superseded the Statement of Issues, was filed on February 22, 2002. In its brief, the contractor makes the following arguments: (1) Section 708.4(b) bars a complaint that involves misconduct the employee "deliberately caused," or in which he "knowingly participated;" (2) the IAD applied the wrong standard for misconduct when it relied on the case of *Dreis & Krump Manufacturing Co. v. NLRB*, 544 F.2d 320 (7th Cir. 1976), when it should have applied the four-point test used in *Atlantic Steel Co.*, 245 NLRB 814 (1979) to determine the complainant's misconduct was so opprobrious as to lose the protection of Part 708; (3) the complainant is only eligible for back pay from the date of discharge until he began subsequent employment, September 29 through October 20, 2000; (4) complainant's subsequent earnings offset the contractor's back pay liability; (5) reinstatement is not an appropriate remedy in this case.

2. Newly Discovered Evidence Relevant to Reinstatement

In addition to the legal arguments summarized above, the contractor's brief raises a new factual issue that was not considered in the IAD, namely, the complainant's failure to list, on the Pantex job application he filed with M&H, a prior job with Nordic Trak, a manufacturer of fitness and exercise equipment. The contractor alleges that Burd was fired from his job at Nordic Trak after he engaged in a physical confrontation with his supervisor. According to the contractor, Burd's failure to disclose this fact is relevant to the reinstatement remedy requested in the present case. Based on its allegations that Burd misrepresented his employment history to hide evidence of a prior physical confrontation that led to his discharge from a prior job several years before the September 2000 incident in this case, the contractor asked to conduct additional discovery, including taking an additional deposition of the complainant.

Using the procedure outlined in Section 708.33(b), I directed the parties to provide additional information regarding Burd's employment with Nordic Trak, and his application for employment

at Pantex that he submitted to M&H. 1/ On April 19, 2002, the contractor submitted a copy of Burd's employment application to M&H, which did not mention the Nordic Trak job. *See* April 19, 2002 letter from Richard Thamer, Attorney for BWXT Pantex. Nor did Burd list the Nordic Trak job on any other pre-employment documents he submitted to M&H. However, as discussed below, Burd did list the Nordic Trak job on the security clearance background questionnaire he submitted to the local DOE security office.

On May 31, 2002, the contractor filed its final submission on the reinstatement issue, including an Affidavit of Kelley D. Young, which states that Young worked as sales manager of Nordic Trak in Amarillo "several years ago," and during that time, he hired Burd to work for him in a full-time position. While at work, Young and Burd "did have a physical confrontation." Young "terminated Burd immediately for the confrontation." Although the complainant gave written authorization for Nordic Trak to release his employment records to the contractor's attorney, the effort to obtain those records failed. *See* May 31, 2002 letter from Richard Thamer, Attorney for BWXT Pantex. The contractor maintains that the DOE security office does not share background information submitted on security questionnaires, so it never learned about Burd's Nordic Trak job until Young came forward in 2002, during the pendency of the present appeal. The contractor also cites Burd's characterization, on his Pantex employment application, of a part-time coaching job he had at a local junior high school as "a position that started out bad that only continued to get worse," when he was fired for improperly disciplining a student, as further evidence that the complainant has "a pattern of workplace confrontation and deception." *Id*. at 2-3.

B. The Complainant's Response

1. Legal Arguments

The complainant filed separate responses to the Statement of Issues and the Original Brief on Appeal. Since the contractor's brief superseded its Statement of Issues, this decision will focus on the complainant's response to the contractor's brief. In his response, the complainant contends that: (1) under OHA case law, the factual findings in the IAD should be sustained since

---

1/ Section 708.33(b) provides that:

> (b) In considering the appeal, the OHA Director:
>
> (1) May initiate an investigation of any statement contained in the request for review and utilize any relevant facts obtained by such investigation in conducting the review of the initial agency decision;
> (2) May solicit and accept submissions from any party that are relevant to the review. The OHA Director may establish appropriate times to allow for such submissions;
> (3) May consider any other source of information that will advance the evaluation, provided that all parties are given an opportunity to respond to all third person submissions; and
> (4) Will close the record on appeal after receiving the last submission permitted under this section.

there has been no showing that they are clearly erroneous; (2) based on the IAD's finding that the complainant made a protected disclosure that was a contributing factor to an act of retaliation by the contractor, and upon consideration of the equities in this case, reinstatement is the proper remedy; (3) the complainant should also receive back pay, the calculation of which should include the average amount of overtime earned by rad techs at Pantex, compensation for the economic loss he experienced when he was forced to maintain two different households as a result of his termination, interest on the amounts awarded for back pay and incidental damages, attorneys fees, and the expenses of pursuing his complaint under Part 708.

2. Newly Discovered Evidence

Initially, the complainant opposed the request for further discovery, arguing that the allegations about Burd's termination from his job at Nordic Trak for a physical altercation were unsupported by any affidavits or competent evidence. In addition, he argued that the contractor had ample opportunity to discover this information when it took Burd's deposition on June 15, 2001, over a month before the hearing, and later at the hearing. The complainant also submitted a copy of "an employment document Burd filed with DOE" that lists Nordic Trak as a former employer. That document is a personnel security questionnaire for the background investigation necessary to determine Burd's eligibility for the access authorization (security clearance) required to work at Pantex, attached as Exhibit A to Complainant's Response to [Contractor's] Original Brief, March 8, 2002.

On April 29, 2002, the complainant filed a response to the contractor's April 19, 2002 submission, in which he admitted working at Nordic Trak, but denied that he engaged his supervisor, Kelley Young, in a physical confrontation. Burd emphasized that he reported the Nordic Trak job on his security questionnaire, and stipulated to the Pantex employment application submitted earlier by the contractor. Burd's April 29 response questioned Young's credibility, implying that Young, who now works for BWXT Pantex, is attempting to curry favor with his employer by coming forward with negative information about Burd. Burd also questioned Young's failure to document his alleged confrontation with Burd in Nordic Trak's employment records. Finally, the April 29 submission argues that the contractor has failed to show that any inequities would result if it were required to reinstate Burd.

On May 31, 2002, the complainant filed his final submission, in which he objected to the Young Affidavit, and asked that it be stricken from the record. He argued that "this Affidavit is self serving and comes from a current BWXT employee who is in a position to brown nose and receive favorable employee benefits," and asserts that there is no other evidence of any improper behavior on Burd's part. This submission also challenged Young's memory because he could not recall the year or any other details about the time when he and Burd worked at Nordic Trak. Finally, the complainant notes that the contractor could have found some other evidence to corroborate Young's claims, and could have asked Burd about "any of these naked allegations," during his pre-hearing deposition. Upon receipt of this submission, I closed the record.

III. Analysis

In considering the arguments raised in this appeal, we will begin with the issue of whether the contractor met its burden under Part 708, and then address remedy issues. The contractor has refined its position from the Statement of Issues to the Original Brief, but on a fundamental level its primary argument remains the same: it maintains that it was justified in terminating Burd, and that the IAD erred in concluding that it failed to show by clear and convincing evidence that it would have fired him in the absence of his protected disclosure.

A. The Contractor's Liability

In its brief, the contractor makes two principal arguments on liability. First, the contractor claims that Section 708.4(b) bars a complaint that involves misconduct the employee "deliberately caused," or in which he "knowingly participated." According to the contractor, Burd's complaint involved misconduct because he was involved in an altercation during which he called Ornelas "stupid," told him to "shut up," and had to be physically separated from Ornelas by Jones. This argument misinterprets Section 708.4(b) and misapplies the rule to the present case. That rule means that an employee whose actions created or contributed to a situation described in Section 708.5, such as "a substantial violation of a law, rule, or regulation, a substantial and specific danger to employees or to public health or safety, or fraud, gross mismanagement, gross waste of funds, or abuse of authority," could not bring a complaint based on a protected disclosure about such situation under Part 708. Burd complained about a safety issue–allowing a colleague to work excess overtime in the inherently dangerous environment of a nuclear weapons plant–he did not create or contribute to a safety problem by his own actions. 2/ After Ornelas heard Burd's complaint, an altercation between the two men ensued. Burd's misconduct was in the altercation, not the complaint, and it was the complaint that the IAD found, and I agree, contributed to Burd's termination. I therefore reject the argument that Burd's complaint is not actionable under section 708.4(b) because it involved misconduct.

Second, the contractor argues that instead of applying section 708.4(b), the IAD erred in applying the standard from *Dreis & Krump Mfg. Co., Inc. v. NLRB (Dreis)*, *supra*, in determining whether Burd's conduct warranted termination. While I have already rejected the contractor's argument that Burd's complaint should be barred under section 708.4(b), I will nevertheless consider its second argument. For the reasons explained below, I find that the labor law cases cited by the contractor as authority for overturning the IAD are inapposite to the present appeal, which is governed instead by the DOE Contractor Employee Protection Program in 10 CFR Part 708, and the case law developed under Part 708.

2/ The contractor's claim in the Statement of Issues that the IAD erred by ignoring the testimony of Brenda Finley, DOE's Employee Concerns Program manager, illustrates the apparent failure at Pantex to recognize the importance of Burd's safety complaint. Finley's hearing testimony shows that she focused on Burd's fear that he might be fired for insubordination, and ignored the underlying safety issue.

Dreis involved an employee who had engaged in protected conduct–filing a grievance under a collective bargaining agreement–who was fired for publicly using mildly disparaging language to describe his supervisor. An arbitrator upheld the firing, the NLRB reversed the arbitrator, and the employer appealed to the United States Court of Appeals for the Seventh Circuit. The Court affirmed the NLRB, and ruled for the employee, holding that "communications occurring during protected conduct remain protected unless . . . so violent or of such serious character as to render the employee unfit for further service." *Dreis, supra, at* 544 F.2d 329. The IAD quoted the forgoing language to support its conclusion that the record did not show anything about Burd's conduct that would distinguish him from other employees who were insubordinate but received lesser penalties.

According to the contractor, the IAD should have applied the four-point test articulated by the NLRB in *Atlantic Steel Co.*, 254 NLRB 814 (1979) to determine whether Burd's conduct was so "opprobrious" as to lose the protection of Part 708. This argument is without merit. Although labor law cases may be instructive on how other adjudicative forums have resolved issues similar to those that arise under Part 708, they are not controlling because Part 708 is designed to effectuate different policy objectives and apply different legal standards that are specifically tailored for the DOE complex. As explained in the preamble to Part 708, the rule is intended to foster the free flow of information about safety at nuclear weapons facilities through the contractor chain of command to DOE and the Congress. *See* 63 Fed. Reg. 373 (Jan. 5, 1998). The governing legal standard is in section 708.29: once the employee makes a prima facie case of retaliation, the burden shifts to the contractor to show by clear and convincing evidence that it would have taken the same action absent the protected conduct. The IAD considered the evidence in the record about the manner in which the contractor had applied its disciplinary policy to similarly situated employees who had engaged in non-physical confrontations and insubordination, and determined that the contractor failed to make that showing. Similarly, a previous OHA decision ruled against a contractor who failed to show by clear and convincing evidence that it consistently applied the same level of discipline to other employees who were similarly situated to the complainant who engaged in protected conduct. *See Morris J. Osborne*, 27 DOE ¶ 87,542 (1999) (*Osborne*). Thus, I find that if the IAD erred in its reliance on *Dreis*, it was harmless error, as the ultimate ruling against the contractor under Part 708 would have remained the same in its absence. Based on my conclusion that the contractor failed to justify Burd's termination under the clear and convincing evidence test, I next consider remedy issues.

B. Remedy Issues

The contractor maintains that (1) the complainant is only eligible for back pay from the date of discharge until he began subsequent employment, September 29 through October 20, 2000; (2) complainant's subsequent earnings offset the contractor's back pay liability; and (3) reinstatement is not an appropriate remedy in this case. The contractor does not contest the IAD's ruling that it pay interest on any amount awarded to the complainant.

In addition to reinstatement, back pay, costs and attorneys fees, the complainant seeks reimbursement of health insurance costs for himself and his family, and "incidental damages" to reimburse him for expenses he incurred as a result of having to move to Los Alamos, New Mexico, where he got a comparable new job as a radiation control technician for a contractor at another DOE nuclear weapons facility. These expenses include temporary lodging in hotels, rent and deposit for an apartment in Los Alamos, and travel between Los Alamos and Amarillo, where the complainant's wife and child lived in the family home. I will address each of the money issues in turn, and then consider whether reinstatement is warranted, in view of the newly discovered evidence.

With respect to the first issue which concerns the period of eligibility for back pay, I agree with the contractor that the complainant is eligible for back pay without any offsets from the date of discharge, September 29 through October 20, 2000, which corresponds to the period during which he was out of work after being terminated by the contractor. 3/ *See Ronald Sorri (Sorri)*, 23 DOE ¶ 87,503 (1993). Accordingly, I will order the contractor to pay Burd $2,318.08 in back pay for this period, and $3,477.12 for lost holiday pay, a related category of monetary damages that can be figured without any offsets. 4/ Since Burd would not have incurred these expenses absent his wrongful termination, I will also direct the contractor to reimburse Burd for $1,883.44 in time off he took for travel to attend the birth of his child in Amarillo, and matters relating to this case including depositions in Albuquerque, and meetings with his attorney and the hearing in Amarillo. *See n. 4, supra*.

Concerning the second issue, I agree that the complainant's subsequent earnings should generally offset the contractor's back pay liability for the period after Burd began his new job. However, prior OHA decisions have recognized that an employee who is the victim of retaliation for conduct protected under Part 708 can lose more than just his base salary as a result of the contractor's action. *See, e.g., Sorri* (lost salary enhancements, lost 401(k) contributions); *Osborne* (lost overtime, lost health insurance benefits). In this case, Burd's new job with Duratek, Inc. pays a higher base hourly rate than Burd's old job at Pantex. In the absence of other factors, that would mean Burd should not receive any back pay after October 20, 2000. But Burd argues that he lost the opportunity to work overtime at Pantex, and that the post-October 20, 2000 back pay calculation must account for the average amount of overtime worked by rad techs at Pantex, and give Burd credit for the overtime earning opportunity he lost when he was terminated. I am persuaded that an adjustment for lost overtime is necessary to restore Burd to the position he would have occupied but for the retaliatory termination. *See Osborne, supra*; 10 CFR § 708.36(a)(5). Accordingly, I will direct the parties to confer with each other and agree

---

3/ I agree with the contractor that there is no "collateral source" issue in this case, as the complainant received no money for a collateral source such as unemployment compensation during the period when he was unemployed after his termination.

4/ See calculations in Complainant's Damages Brief at 2; Complainant's Response to Contractor's Original Brief on Appeal at 7.

upon a proper calculation of back pay for the period after October 20, 2000 that takes account of lost overtime.

In addition to reinstatement (discussed separately below), back pay, costs and attorneys fees, section 708.36(a)(5) authorizes the DOE to order "such other remedies as are deemed necessary to abate the violation and provide a successful complainant with relief." The next issue is whether Burd's claim for reimbursement of medical insurance costs for himself and his family to replace the insurance coverage he lost when terminated, and "incidental damages" to reimburse him for expenses he incurred as a result of having to move to Los Alamos, falls within the purview of this rule. I find that reimbursement for these claims is the type of restitutionary remedy envisioned by the plain language of section 708.36(a)(5), and it should be granted.

A direct OHA precedent exists for restitution of lost medical insurance benefits in *Osborne*, *supra*. I will order the contractor to pay Burd $3,449.08 to compensate him for health insurance he was forced to purchase after his termination. 5/

With respect to the items related to moving for which Burd seeks restitution, I find that it is reasonably foreseeable that in order to mitigate his damages from the contractor's retaliation, Burd would seek employment as a radiation control technician at the closest DOE nuclear weapons facility, Los Alamos. During the pendency of this Part 708 case, it was also reasonable for Burd to maintain his residence in Amarillo, since he had an expectation of returning to work at Pantex, especially after OHA issued the IAD ordering reinstatement in November 2001. Thus, Burd should be reimbursed for the expenses related to maintaining a second residence in Los Alamos, and travel between the two cities. According to the complainant's two damage submissions cited in *n. 4*, *supra*, these expenses totaled $11,784.93 through July 27, 2001.

I will order the contractor to reimburse Burd for attorneys fees and expenses, which totaled $11,020.21 as of July 27, 2001, but which have increased since then. I will direct Burd's attorney to submit an updated, itemized bill, and confer with the contractor to agree upon a proper amount of attorneys fees and expenses.

Finally, I will order the contractor to pay interest at the rate specified in the IAD, one-half percent per month, on all monies paid to the complainant under this Decision. Neither party challenged this interest rate during the course of the appeal.

I turn now to the final issue in this appeal, whether the contractor should be ordered to reinstate Burd by offering to rehire him for a rad tech job at Pantex. At the outset, I reject the contractor's argument that DOE cannot direct BWXT Pantex to hire Burd, since he worked for M&H at the time of his termination, and never worked for BWXT. The Deputy Secretary of Energy has recognized that reinstatement by a successor contractor may be ordered to remedy a violation of

---

5/ Complainant's Damages Brief at 2; Complainant's Response to Contractor's Original Brief on Appeal at 7.

Part 708, depending on a consideration of the equities in a given case. *See Osborne, supra*; *Daniel Holsinger v. K-Ray Security, Inc.* (Decision of the Deputy Secretary), http://www.oha.doe.gov/cases/whistle/dsholsinger.htm.

Before the newly discovered evidence about Burd's job at Nordic Trak, the equities appeared to favor ordering reinstatement, since there was no showing of hardship by the contractor, such as showing that BWXT Pantex, as the M&O contractor at a large DOE facility, would have to displace an innocent employee in order to offer employment to Burd, which was the critical factor considered in the *Holsinger* case. Taken as a whole, however, the newly discovered evidence tips the balance of equities against ordering reinstatement. There are several factors involved. First, there is the allegation in the Kelley Young affidavit that Burd was fired from his job at Nordic Trak after engaging in a physical confrontation with Young, who was then his supervisor. Burd denies this happened, challenges Young's inability to remember other details such as the date, and maintains that Young has a motive for coming forward with evidence against him to "brown nose" his supervisors at BWXT Pantex, where Young now works. Although we have no direct means of resolving the conflict between these two accounts on the basis of the current record, the circumstantial evidence tends to undermine Burd's credibility on this issue. For example, he makes much of the fact that he disclosed the Nordic Trak job to DOE on his personnel security background information questionnaire. However, information reported to the government on personnel security forms is covered by the Privacy Act, and agencies do not share this information with contractors. Burd does not deny that he omitted any mention of the Nordic Trak job on the pre-employment papers he submitted to M&H, nor does he explain why he failed to mention it, except to claim it was a part time, secondary job. In particular, Burd's complaint that the contractor could have discovered this information earlier through due diligence rings hollow. During Burd's pre-hearing deposition on June 15, 2001, the contractor's attorney was questioning Burd about his past employment history, and he asked Burd directly "did you ever get fired from any of these jobs?" June 15, 2001 Deposition at 7. Burd never mentioned the Nordic Trak job that he had omitted from his Pantex application form and from his personal resume. Despite his protestations to the contrary, Burd's repeated efforts to conceal the Nordic Trak matter from the contractor lead me to believe that he thought he had something to hide. This is the most negative aspect of the newly discovered evidence.

Reinstatement is an equitable remedy, and with any equitable remedy, however, an adjudicator "must draw on the 'qualities of mercy and practicality [that] have made equity the instrument for nice adjustment and reconciliation between the public interest and private needs as well as between competing private claims." Teamsters v. United States, 431 U.S. 324,375 (1977) [quoting Hecht Co. v. Bowles, 321 U.S. 321,329-330(1944)]. The ancient maxim of equity states that one who seeks equity must come into a court of equity with clean hands. With respect to the remedy of reinstatement, the complainant in this case does not have clean hands because he failed to disclose is full job history and he has not dispelled the doubt created by his reluctance to reveal it.

IV. Conclusion

As indicated above, I affirm the IAD, except the portions of the IAD that (1) deny restitution for travel and relocation expenses related to the complainant's having to move to a new town to get comparable employment and thus mitigate his damages from the wrongful termination during the pendency of this action, and (2) order the contractor to reinstate the complainant, which I reverse. I find that the complainant proved by a preponderance of the evidence that he made a protected disclosure when he complained about a radiation control technician being permitted to work excess overtime, and that this was a contributing factor to the contractor's decision to terminate the complaint, which was an act of retaliation. I further find that the complainant's prima facie case of retaliation shifted the burden of showing by clear and convincing evidence that it would have terminated the complainant in the absence of his protected disclosure, and that the contractor failed to meet that burden.

After considering the complainant's damage submissions, and the contractor's arguments on damages, I will direct the contractor to pay the complainant the sum of $33,932.86, representing back pay, restitution for other monetary damages incurred by the complainant as result of his termination, attorneys fees and costs, through July 27, 2001, and interest on that amount calculated at the rate of one-half percent per month. I will also direct the complainant's attorney to submit an updated, itemized bill, and to confer with the complainant and agree on the proper amount of attorneys fees and costs. Finally, this is an interlocutory order that is not appealable until issuance of a Supplemental Order specifying the remedy in full, in the event the parties are unable to reach a settlement.

It Is Therefore Ordered That:

(1) The appeal filed by BWXT Pantex on November 16, 2001 is hereby granted in part and denied in part, as set forth in Paragraphs (2) through (6) below.

(2) The Initial Agency Decision issued on November 1, 2001 is affirmed, except as follows:

> (a) the contractor shall pay restitution to the complainant for all travel, lodging, and relocation expenses incurred as a result of the complainant's having to move to Los Alamos, New Mexico to find comparable employment after being wrongfully terminated in September 2000;
>
> (b) the contractor shall not be required to offer employment to the complainant at the Pantex Plant.

(3) The parties shall confer with each other and agree upon a proper calculation of back pay for the period from October 20, 2000 through the date of this Decision, taking into account the average number of overtime hours worked by radiation control technicians at the Pantex Plant during that period.

(4) The complainant's attorney, Michael A. Warner, shall submit an updated, itemized statement, and confer with the contractor to agree upon a proper amount of attorneys fees and expenses.

(5) This is an interlocutory order that is not appealable until issuance of a Supplemental Order specifying the remedy in full.

(6) This Decision and Order has been reviewed by the National Nuclear Security Administration (NNSA), which has determined that, in the absence of an appeal or upon conclusion of an unsuccessful appeal, the decision and order shall be implemented by each affected NNSA element, official or employee and by each affected contractor.

DEPARTMENT OF ENERGY
OFFICE OF HEARINGS AND APPEALS

Appeal

Name of Petitioner: Bernard Cowan

Date of Filing: July 18, 2002

Case Number: VBA-0061

On July 18, 2002, Argonne National Laboratory-West ("ANL" or "the contractor") filed an appeal of an Initial Agency Decision (IAD) issued by an Office of Hearings and Appeals (OHA) Hearing Officer under the Department of Energy (DOE) Contractor Employee Protection Program, 10 CFR Part 708. *Bernard Cowan*, 28 DOE ¶ 87,023 (2002). The IAD found that the contractor retaliated against Bernard Cowan ("Cowan" or "the complainant"), an employee at ANL, for making disclosures protected under Part 708. The IAD ordered the contractor to reinstate Cowan, provide him with back pay, and reimburse him for the reasonable costs and expenses of prosecuting his complaint. *Id.* at 38-39. It further directed both parties to file a report providing a calculation for back pay and litigation expenses. *See* Appendix to IAD.
As set forth below, I have determined that the contractor has failed to show that the IAD was erroneous in finding for the complainant, but I have rescinded the award of reinstatement.

I. Background

A. The DOE Contractor Employee Protection Program

The DOE's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste and abuse" at DOE's Government-owned or -leased facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purpose is to encourage contractor employees to disclose information which they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers. Thus, contractors found to have retaliated against an employee for such a disclosure will be directed by the DOE to provide relief to the complainant. *See* 10 C.F.R. § 708.2 (definition of retaliation). Under the DOE regulations, review of an IAD is performed by the OHA Director. 10 C.F.R. § 708.32.

B. History of the Complaint Proceeding

The events leading to the filing of Cowan's complaint are fully set forth in the 39-page IAD. I will not reiterate all of the details here. For purposes of the instant appeal, the relevant facts follow. In 1974, Cowan was hired as an Engineering Technician-Senior in the Operations Division at ANL. In 1989, he was promoted to a Training and Procedures Specialist in the Training Group of ANL. He later voluntarily transferred from the Training Group to the Fuel Conditioning Facility (FCF) as an Engineering Technician-Senior.

In 1997, an incident occurred regarding hazardous material (HAZ-MAT) at the FCF. An alarm went off, and the employees were required to evacuate. A team of HAZ-MAT technicians who were trained to respond to this type of incident were supposed to return to the facility and perform re-entry procedures before others could move back into the building. Tr. at 111. However, during this particular incident, a team member who suffered from claustrophobia refused to wear a respirator and re-enter the building. A manager then called Cowan to replace the claustrophobic employee (Shriver) during the event. Tr. at 111-113. Management informed Cowan's group that an operator had a problem wearing a respirator, and that management was working with the operator. *Id.* 1/

On March 28, 2000, Cowan wrote a letter to the Operations Division Director of ANL expressing several workplace concerns, among them the alleged safety hazard posed by the claustrophobic employee assigned to be a HAZ-MAT technician. IAD at 9. According to Cowan, that employee jeopardized the safety of every team member and raised the possibility of an unsafe re-entry operation. He discussed these concerns with ANL managers on March 28, 2000 and April 7, 2000. The director of the facility ordered an investigation into the incident on April 12, 2000. Later that month, Cowan and other ANL-W employees at the FCF were transferred to the Sodium Processing Facility (SPF). Cowan protested this transfer and was allowed to return to the FCF. On May 18, 2000, the investigation concluded that, despite his claustrophobia, Shriver had been medically certified for HAZ-MAT duty and respirator use for several years without incident, and that no medical restriction was placed on his activities. IAD at 9. The investigation also stated that according to management, no employee was required to be a member of the re-entry team. *Id.* The investigation did not address whether Shriver should continue HAZ-MAT duties.

In May 2000, Cowan applied for a Training Specialist position at ANL, but he was not selected for that position. IAD at 14. On May 18, 2000, ANL management assigned Cowan to place lock out/tag out

---

1/ The HAZ-MAT technicians are ANL employees who are trained and medically certified for this job.

(LO/TO) tags on the FCF's cell lighting circuit breakers. 2/ On June 6, 2000, some of the circuit breakers were found incorrectly tagged and locked in the "on" position. Cowan complained to management that another operator was required to verify Cowans's work, but did not. An ANL occurrence report concluded that Cowan had improperly conducted the LO/TO. Cowan then alleged that someone had sabotaged his work and requested an investigation into this allegation. Both ANL and DOE investigated Cowan's sabotage allegation and found that it could not be substantiated. On June 28, 2000, Cowan was again transferred to the SPF.

Cowan filed a complaint with the Manager of Employee Concerns of the DOE's Chicago Operations Office (DOE/CH) on August 25, 2000. 3/ In the complaint, Cowan alleged that he made a protected disclosure in the March 2000 memorandum that he wrote to the Operations Division Director concerning Shriver, the claustrophobic operator. On March 5, 2001, Cowan was transferred from SPF to the radiological facility (FASB). A DOE investigator conducted an investigation of Cowan's Part 708 complaint and on November 27, 2001, issued a Report of Investigation (ROI).

Early in January 2002, Cowan sent email messages to all ANL employees complaining about his frustration in getting DOE to investigate his allegations of mismanagement and safety. Management concluded that portions of these emails violated company policies and as punishment for the alleged violation, Cowan was suspended for three days without pay.

After completion of the investigation, Cowan requested a hearing before an OHA hearing officer. Eleven witnesses testified at the two day hearing. After considering the evidence in the record, the hearing officer issued the IAD that is the subject of this appeal.

C. The Initial Agency Decision

1. Protected Disclosure

The IAD cited the respective burdens of proof for the employee and the contractor under Part 708:

> [T]he employee who files a complaint has the burden of establishing by a preponderance of the evidence that he or she made a disclosure . . . and that such act was a contributing factor in one or more alleged acts of retaliation against the

---

2/ LO/TO is a system of physical and administrative controls that prevents the operation of control devices (electric circuit breakers in this case) to prevent injury to personnel or damage to plant equipment. Investigative Report of ANL LO/TO Event (April 6, 2001) at 3.

3/ DOE/CH is the DOE office designated to receive Part 708 complaints from ANL employees.

> employee by the contractor. Once the employee has met this burden, the burden shall shift to the contractor to prove by clear and convincing evidence that it would have taken the same action without the employee's disclosure.

10 C.F.R. § 708.29. In applying these standards to Mr. Cowan's complaint, the IAD considered the factual record and concluded that Cowan's March 2000 disclosure to management that a HAZMAT operator was subject to claustrophobia and thus a danger to his colleagues was protected under Part 708. 4/ The hearing officer found that it was reasonable for Cowan to believe that Shriver's continued participation in the ANL HAZ-MAT response program constituted a substantial and specific danger to employee health and safety.

After concluding that the March 2000 disclosure was protected, the hearing officer then reviewed the six personnel actions that Cowan alleged were made in retaliation for his protected disclosure. The hearing officer found that three allegations met Part 708's criteria for retaliation. First, Cowan alleged he was transferred involuntarily to SPF in June 2000 in retaliation for his protected disclosure. This incident occurred within three months of Cowan's protected activity, and the hearing officer found that based on the temporal proximity between the two events, it was reasonable to conclude that the disclosure was a factor in the personnel action. IAD at 17-18.

The second item of retaliation was Cowan's November 2000 appraisal (the "interim appraisal"). 5/ Although ANL argued that the appraisal was an interim evaluation and did not have a negative effect on Cowan's salary, the hearing officer found that it had a detrimental effect on his employment. The language of the appraisal was written in negative terms, in contrast to Cowan's previous evaluations. The hearing officer found only anecdotal evidence that Cowan's performance had deteriorated. Finally, the hearing officer found that Mr. Cowan's three day unpaid suspension in January 2002 was the third act of retaliation. The hearing officer concluded that ANL did not customarily use suspension as a punishment for violating ANL policy. IAD at 37. The hearing officer based his finding of retaliation on the fact that these actions occurred after Cowan filed his complaint, when ANL management was fully aware of Cowan's alleged whistleblower activity.

4/ In the IAD, the hearing officer stated that Cowan's allegation of sabotage may be a protected disclosure, but that he would only make a determination on this issue on remand if his finding about the HAZ-MAT disclosure were reversed on appeal. IAD at 17.

5/ Although this appraisal was completed in November 2000, it covered Cowan's performance from April through June 2000.

2. The Contractor's Burden

Under Section 708.29, after a finding is made that Cowan made a *prima facie* case of retaliation, the burden shifted to the contractor to prove by clear and convincing evidence that it would have taken these actions against Cowan in the absence of the protected disclosure. The IAD considered the contractor's arguments and concluded that the contractor did not prove by clear and convincing evidence that it would have taken the three personnel actions described above against Cowan in spite of his protected disclosure. IAD at 37-38. The hearing officer rejected ANL's claim that its performance evaluation was a fair estimate of Cowan's performance. IAD at 25. Instead, he found a lack of fairness. The hearing officer concluded that there was no evidence that ANL management would have placed such emphasis on Cowan's tardiness in meeting some deadlines absent his protected disclosure. *Id.* at 25-26. The IAD also found that Cowan's managers displayed a significant level of hostility toward Cowan. With regard to the transfer to FASB in June 2000, the hearing officer again found that the contractor failed to meet its burden. He found that transfer to be an "unusual" method for ANL to use to deal with hostility between co-workers. IAD at 29-33. In fact, there was no evidence that transfers were a routine response to inappropriate behavior of ANL employees, and moreover there was no evidence that the January 2002 suspension was a normal punishment for a violation of the company's email policy.

Based on the findings that Cowan made a protected disclosure in March 2000, and that ANL retaliated against him via a negative appraisal, a transfer in June 2000 and a three day unpaid suspension, the hearing officer granted Cowan's complaint and awarded him the following relief: (1) removal of the final FCF appraisal from his personnel records; (2) reinstatement as a shift operator at FCF; (3) payment of lost wages resulting from his transfer out of FCF; (4) payment of wages for the three day suspension; and (5) the removal of any reference to the suspension from his personnel file. IAD at 27, 33, 37. The hearing officer further directed both parties to provide each other with a calculation of back wages by July 30, 2002. Appendix to IAD. 6/

II. The Contractor's Arguments on Appeal

In its Statement of Issues (or "Statement"), ANL set forth three arguments. 7/ Two of the arguments are based on the premise that Cowan never made a protected disclosure, and thus there could be no showing that the alleged protected disclosure was a contributing factor to an act of retaliation. Statement at 2-8.

6/ To date, neither party has submitted this information.

7/ Complainant sent an extensive amount of material to this office, but did not directly address the issues that ANL presented on appeal. *See* Memoranda and Electronic Mail from Ben Cowan to OHA (August 14-October 13, 2002). Much of the documentation that Complainant submitted was already in the record of this case.

ANL's final argument is that the hearing officer abused his discretion in ordering reinstatement, and did not give proper deference to ANL's responsibility for maintaining a safe work environment. *Id.* at 8-9.

III. Analysis

In previous cases, this office has set forth the standard for consideration on appeal of a hearing officer's findings of fact and conclusions of law. Factual findings are subject to being overturned only if they can be deemed to be clearly erroneous, giving due regard to the trier of fact to judge the credibility of witnesses. *Oglesbee v. Westinghouse Hanford Co.*, 25 DOE ¶ 87,501 at 89001 (1995); *O'Laughlin v. Boeing Petroleum Services, Inc*., 24 DOE ¶ 87,513 at 89,064 (1995). A Hearing Officer's conclusions of law are reviewable *de novo*. *See Pierce v. Underwood*, 27 DOE ¶ 87,544 at 89,224 (1999). I will apply these standards to my review of the IAD.

A. The Protected Disclosure

The contractor states that the March 2000 memorandum is not a protected disclosure because: (1) the hearing officer mistakenly believed that Shriver could rejoin the re-entry team; (2) the incident involving Shriver occurred almost two years prior to the disclosure, (3) membership on the re-entry team was voluntary; and (4) Cowan's first level managers were aware of the problem when it occurred. Statement of Issues at 2-4.

The record supports the hearing officer's findings that Cowan reasonably believed that Shriver, the claustrophobic employee, could rejoin the re-entry team. Thus, it was reasonable for Cowan to believe a safety hazard was imminent. Cowan did not know that the employee's participation in re-entry was voluntary. At the hearing, Cowan testified that in March 2000, he was not aware of any actions ANL had taken to resolve the situation with the claustrophobic employee. Tr. at 115. Cowan acknowledged that his first level management resolved the immediate problem in 1997 with Shriver–they decided that they would allow him to work without a respirator. Tr. at 113-114. However, this was not a permanent resolution of the situation since some emergencies may have been severe enough to require the re-entry team to wear respirators. The problem was not resolved until after Cowan's disclosure in 2000, when the investigation report was completed. In fact, ANL management did not investigate the situation until April 2000, and changes were not initiated until the completion of the investigation in May 2000. IAD at 12-13. One of the changes resulting from the investigation was a recommendation to tell all technicians that assignment to the HAZ-MAT team was "purely voluntary." IAD at 14. ANL also removed the requirement of HAZ-MAT qualification from the nuclear facilities operator position (a job that offered lucrative shift work) and recommended that operators immediately inform their supervisor if they have a problem wearing protective gear. IAD at 14. This policy change appeared to address the issue of operators who felt pressured, economically or otherwise, to be on the HAZ-MAT team despite a medical condition. According to the evidence, all of these changes can be traced to Cowan's disclosure. For the

reasons above, I concur with the hearing officer's finding that it was reasonable for Cowan to believe in March 2000 that Shriver's continued participation in the HAZ-MAT program was a substantial and specific danger to employee health and safety.

ANL further argues that because management personnel responsible for the HAZ-MAT technicians knew of the 1997 incident and resolved it at the time, Cowan's disclosure to other management at a later date is irrelevant. This argument is incorrect. Cowan clearly differentiated between his immediate supervisors and "Management" (i.e., more senior level managers such as Gary Lentz, Division Director for Facility Division at ANL). 8/ Cowan testified at the hearing about his disclosure as follows:

> [I]t was brought to their [management's] attention about keeping [the claustrophobic employee] on as a Hazmat team or not. The time that I remember confronting Management in the respirator problem was based on the time frame of, of the Claim, because it was an issue that, you know, we were afraid to even bring up because of retaliation efforts. But it existed. He was still on the team, and during that timeframe, '97, it wasn't reported to, to Management as, you know, a problem.

Tr. at 114. The manager responsible for plant safety, Lentz, was the recipient of the March 2000 memo and confirmed that he was not aware of the situation with the claustrophobic employee until he read the Cowan memo. Tr. at 473. It was the Cowan disclosure that triggered an investigation that resulted in recommendations to make concrete changes in procedures to improve safety (i.e., restricting Shriver's participation on the team, reminding employees that participation on the team was voluntary). Thus, Cowan was able to prove through sworn testimony at the hearing that he disclosed the safety concern to a senior management official (Gary Lentz) and that Lentz was not aware of the incident until Cowan's disclosure in March 2000. Tr. at 473.

Thus, the record does not support ANL's arguments. The details of when and how ANL responded to a safety issue are irrelevant to this Part 708 proceeding. The focus here is on whether the whistleblower's concerns brought to management's attention were reasonable at the time that he reported them. The hearing officer determined that the complainant disclosed to his employer information that he reasonably and in good faith believed described a danger to his fellow employees. 10 C.F.R. §708.5 (a) (2). The key to the hearing officer's decision in this issue is best stated in the IAD as follows:

> While testimony at the Hearing indicates that further study of the situation, and action by management, may have substantially alleviated the safety concern in this area, this factor is not relevant to my inquiry under Part 708, *which is to analyze the reasonability of Mr. Cowan's concerns when he reported them in March 2000.*

8/ Lentz testified that he was the person ultimately responsible for ensuring the safe operation of ANL facilities. Tr. at 434, 473.

IAD at 13 (emphasis added). The hearing officer determined that it was reasonable for Mr. Cowan to be concerned about the potential for a safety problem caused by his co-worker. I agree with the hearing officer's finding.

B. Retaliation

ANL offers two arguments concerning the retaliation that the hearing officer found it committed. First, ANL argues that the hearing officer erroneously relied on temporal proximity between the disclosure and the alleged retaliation in finding that they were related. Statement at 5. The contractor alleges that the hearing officer erroneously failed to require Cowan to make any evidentiary showing that an alleged protected disclosure was a contributing factor in an alleged retaliation.

I reject ANL's argument. Whistleblower cases rarely have a "smoking gun" incident that neatly delivers conclusive evidence to the fact finder. As a result, in whistleblower cases adjudicated by this office, temporal proximity is an accepted means of determining that a protected disclosure is a contributing factor to an act of retaliation. *See, e.g., Timothy E. Barton,* 27 DOE ¶ 87,501 at 89011 (1998) (and cases cited therein). Similarly, federal courts adjudicating whistleblower cases permit an employee to meet his statutory burden to show that an alleged disclosure was a contributing factor to an agency personnel action by proving to the court that the personnel action occurred within a reasonable time after that disclosure. *See Kewley v. Dept. of Health and Human Services*, 153 F.3d 1357, 1363 (Fed. Cir. 1998) (explaining Congressional intent in Whistleblower Protection Act (WPA), 5 U.S.C. § 1221(e)(1)(A) & (B) (1994)) (*Kewley*). 9/

In its second argument, ANL contends that two of Cowan's allegations do not qualify as retaliation under Part 708: (1) Cowan's June 2000 FCF appraisal (the "interim appraisal"); and (2) Cowan's June 2000 transfer from the FCF to SPF. ANL bases its argument about the June 2000 appraisal on its allegation that there was no evidence of a negative trend in Cowan's appraisals, and that the rating was similar to previous ratings. *Id.* Further, ANL argues that the interim appraisal had no negative effect on Cowan's final raise,

---

9/ Legislative history of the Whistleblower Protection Act (WPA) explains that when Congress amended the WPA in 1994, it intended to allow a whistleblower to demonstrate that disclosure was a contributing factor in the personnel action through circumstantial evidence, such as evidence that the official taking the personnel action knew of the disclosure and the personnel action occurred within a period of time such that a reasonable person could conclude that the disclosure was a contributing factor in a personnel action. *See Kewley*, 153 F.3d at 1363. This "knowledge/timing test" was implemented due to Congress' desire that the whistleblower not face an insurmountable burden. *Id.*

and therefore could not be considered retaliation for protected activity. Statement at 6. I consider these two arguments below.

1. The Interim Appraisal

I have examined the hearing officer's reasons for concluding that this event–the interim appraisal--was an act of retaliation, and I find no reversible error here. The June 2000 evaluation (review cycle April 1-June 23, 2000) contains negative language not found in Cowan's other 2000 appraisals, and was completed within three months of Cowan's disclosure in March 2000. IAD at 25. Cowan received two other appraisals in 2000, and neither contained negative comments. Even though the interim evaluation did not have a negative effect on Cowan's salary, its rating (3- on a scale of 5) was lower than his previous ratings of 3+ (for the period October 1, 1999 through March 31, 2000) and the interim appraisal contained fairly negative comments in the "Accomplishments" section. *See* Performance Appraisals, Review Cycle October 1, 1999 to September 30, 2000. The hearing officer questioned the supervisor who prepared Cowan's interim evaluation, and found a "lack of convincing testimony in support of ANL's position." IAD at 26. I agree. The manager who prepared the evaluation relied "almost 100 percent" on input from Cowan's first level supervisor, Belcher, a close friend of the claustrophobic employee. Tr. at 536-37, IAD at 24. The record supports a finding that that relationship colored Belcher's workplace interaction with and his views about Cowan and lowered his evaluation of Cowan's performance. Tr. at 221, 552-553. At the hearing, the manager who prepared the evaluation was not able to explain or support statements in the appraisal about tasks that Cowan allegedly had not completed. Tr. at 536-537.

In conclusion, based on the hearing officer's findings of limited evidence in support of ANL's contention that Cowan's performance had declined slightly, and of a significant level of animosity towards Cowan on the part of his supervisors, I find no error in the hearing officer's finding that the decreased rating contained in the June 23, 2000 appraisal was retaliation against Cowan for protected activity.

2. Transfer from the FCF

ANL contends that Cowan's transfer in June 2000 was not a retaliatory action, but rather a business decision forced on the contractor because Cowan caused dissension in the workplace and ANL had a responsibility to maintain a safe workplace. Statement at 6-7. The hearing officer found that ANL had provided only "anecdotal" evidence that Cowan's activities in the FCF in June 2000 aggravated his colleagues and led to animosity against him and ultimately his transfer. IAD at 29-31. As explained below, my review of the record leads me to conclude that although the evidence regarding hostility toward Cowan due to his own actions is more than anecdotal, it does not rise to the level of "clear and convincing" evidence dictated by ANL's regulatory burden. *See* Section III. C., *infra* (discussion of the level of hostility in the FCF in June 2000).

To make a persuasive defense here, ANL must show that it previously utilized a transfer to ameliorate tension in the workplace of a similar nature. The IAD states that "ANL has not shown that similar activity by another [employee] at FCF would have resulted in the same recommendation that he be transferred to another facility." IAD at 30. After reviewing the record, I agree with the hearing officer. ANL submitted no evidence that it had ever transferred an employee as a result of tension on the floor or a dispute with his supervisor. Tr. at 260. A ten year FCF supervisor testified that he could not remember a personality conflict ever resulting in a transfer. *Id.* Nonetheless, in its Statement, the contractor declared that " . . . the evidence was substantial and undisputed that Cowan's actions had compromised the safety and efficiency of FCF." Statement at 6. This is a somewhat different issue, and the contractor's claim is not supported in the record. Robert Belcher, Cowan's first level supervisor, testified at the hearing that although there was no trust between Cowan and his fellow technicians, and this distrust had a negative impact on Belcher's ability to supervise, nonetheless he found no safety concerns surrounding Cowan's behavior:

> Q. Did [Cowan's poor working relationship with his colleagues] also lead to safety concerns on your part?
>
> A. No, I can't honestly say there were any safety concerns.

Tr. at 247.

The evidence on which ANL relies for support of this issue is not persuasive. Therefore, I find no error in the hearing officer's conclusion that the transfer was an act of retaliation.

C. Reinstatement

The final issue that ANL raises in its Statement deals with the hearing officer's order to reinstate Cowan as a technician in the FCF (his position in June 2000). IAD at 33. The contractor appeals this award based on the safety of ANL employees and the efficient operation of the facility. Statement at 8-9. According to ANL, Cowan has a "history of accusing employees at FCF of criminal conduct" which resulted in a "hostile work environment with a corresponding decrease in morale and efficiency." Statement at 8. The contractor explains that because the prime contract requires ANL to maintain the safety and health of its workers, reinstating Cowan would violate the contract and possibly result in sanctions against ANL. *Id.* Further, because Cowan did not object to his transfer to FASB in June 2001, according to ANL there is no basis to move him from the FASB, his current location. *Id.*

The remedy of reinstatement is an equitable remedy and depends on a consideration of the equities in a given case. *See Robert Burd*, 28 DOE ¶ 87,025, Case No. VBA-0060 (2002); *Morris J. Osborne*, 27

DOE ¶ 87,542 (1999). Although not binding on us here, federal court cases are very instructive in this regard. In reviewing a decision to award equitable relief, federal courts have stated that an appellate body is deferential to the fact finder, and does "not normally find an abuse of discretion absent evidence of a lapse in judgment." *Selgas v. American Airlines*, 104 F.3d 9, 12 (1st.Cir. 1997). *See also Squires v. Bonser*, 54 F. 3d 168, 171 (3rd Cir.1995) (*quoting Langnes v. Green*, 282 U.S. 531, 541, 51 S.Ct. 243 (1931)) (stating that the reviewing tribunal is obliged to require that discretion be exercised in accordance with what is right and equitable under the circumstances and the law) (*Squires*).

ANL asks us to deny reinstatement based on the high level of hostility between Cowan and his FCF colleagues and managers. It is true that courts have denied an award of reinstatement based on findings that the animosity between parties makes such a remedy impracticable. *See Squires*, 54 F. 3d at 172; *Duke v. Uniroyal*, 928 F. 2d 1413, 1424 (4th Cir. 1991) (court must consider whether reinstatement is practical); *Marshall v. TRW*, 900 F.2d 1517, 1523 (10th Cir. 1990). 10/ There are, however, other factors that should be considered, including whether a complainant comes to the court of equity with "clean hands," *Robert Burd*, 28 DOE ¶ 87,025 (2002) (denying reinstatement of complainant who omitted information about previous employment), the unavailability of a position in which to place the complainant, *Coston v. Plitt Theatre*, 831 F. 2d 1321, 1331 (7th Cir. 1987), or a continued reduction-in-force, *McNeil v. Economics Laboratory*, 800 F.2d 111, 118 (7th Cir. 1986). *See also Daniel Holsinger v. K-Ray Security, Inc.*, 26 DOE ¶ 87,506 (1995) (discussing whether reinstatement would require a small contractor to displace an innocent employee). A hearing officer must conduct a full assessment of the equities, and must "look to the practical realities and necessities inescapably involved in reconciling competing interests" in order to determine the "special blend of what is necessary, what is fair, and what is workable." *Daniel Holsinger v. K-Ray Security, Inc.*, 26 DOE ¶ 87,506 at 89,018, *(quoting Lemon v. Kurtzman*, 411 U.S. 192, 200-201 (1973) (plurality opinion of Burger, C.J.)) (*Holsinger*).

I reviewed all evidence of workplace hostility in the record, including hearing testimony and four letters from employees (one letter was anonymous, but purported to be written by an ANL employee). Lentz testified that Cowan's transfer was based on the four letters and a conversation between Lentz and Gary Tarbet, Facility Manager. Tr. at 484. The four letters described the interaction between Cowan and his co-workers in June 2000. Two of the letters, one written by Gene Kurtz, FCF Supervisor, and the other by Robert Belcher, Cowan's first level supervisor at the FCF, are worded very strongly. *See* Memorandum from Robert Belcher to Gary Tarbet, FCF Plant Manager (June 14, 2000); Memorandum from Gene Kurtz to Gary Tarbet (June 23, 2000). They are contemporaneous expressions of a high level of frustration with Cowan's behavior in the workplace, and ask for management assistance in dealing with Cowan. Belcher testified at the hearing that he requested Cowan's transfer after Cowan asked him to arrange a

---

10/ The hostility at the workplace must surpass the normal level of hostility between parties to litigation. *Grantham v. Trickey*, 21 F. 3d 289, 296 (8th Cir. 1994); *EEOC v. Century Broadcasting Corp.*, 957 F.2d 1446, 1462 (7th Cir. 1992).

meeting between Cowan and whoever allegedly "set him up" for punishment in the LO/TO incident. Tr. at 224-225.

I found the letters of Belcher and Kurtz to be credible and enlightening in their descriptions of Cowan's interactions with his colleagues. These employees clearly take their job responsibilities seriously, and were moved by a difficult situation to bring their concerns to the attention of ANL management. 11/ There is additional evidence about Cowan's relationship with his colleagues having deteriorated to an unusual extent. He has accused his colleagues of sabotage, bombarded them with electronic mail complaining about the company, and he has contacted the FBI and police to request an investigation into the company's activities. Tr. at 528-529, 569-570. While I am unable to assess the true level of hostility at FCF without testimony from his peers, the record supports a finding that there is a high level of hostility towards Cowan in the FCF. 12/

There are other factors in the record that weigh against reinstatement. Most important, I find that Cowan's actions have slowed the resolution of his complaint. For example, even after making a serious allegation of criminal sabotage against his co-workers, Cowan refused to cooperate with ANL management in its investigation of the allegation. Tr. at 522. Cowan informed Keith Powers, a Group Leader at FCF, that he (Cowan) actually had proof of the sabotage. Tr. at 522-529. However, when Powers, appropriately concerned about the possibility of criminal activity at a nuclear facility, asked Cowan for the proof, Cowan refused to give Powers any information. Tr. at 523. In fact, Cowan declared that Powers "would have to find it [himself]." *Id.* Cowan's actions obviously impeded the investigation, and consequently I am inclined to draw a negative inference about the complainant's behavior towards his colleagues. Further,

---

11/ The other two letters are less persuasive, and I do not credit the authors with the same earnest intentions. They purport to describe the animosity between Cowan and his peers, but we have not heard directly from his peers--there are no written statements from any of Cowan's colleagues (except Shriver, who was the subject of Cowan's disclosure), and none testified at the hearing.

12/ ANL did not address additional factors that could weigh against Cowan's reinstatement, such as the lack of a current position at the FCF for Cowan, a continued reduction-in-force at the facility, or whether an innocent employee would have to be displaced to comply with the order. In addition, I cannot determine from testimony at the hearing if Cowan's former supervisors are still employed in positions at FCF where they would have to continue to interact with Cowan if he were reinstated. *See Feldman v. Philadelphia*, 43 F.3d 823 (3rd Cir. 1995) (stating that the issue of hostility is moot if the individuals who were a party to the animosity would no longer have dealings with complainant); *Morgan v. the Arkansas Gazette*, 897 F.2d 945, 953 (8th Cir. 1990) (affirming awards of reinstatement where employee responsible for discriminatory comments was no longer employed). Thus, I cannot draw any inference favorable to ANL regarding these factors.

the record reflects unacceptable conduct on Cowan's part. In September 2001, ANL management sent Cowan a letter requesting him to refrain from taking his complaint outside of the framework of DOE's whistleblower process until that process was completed. Tr. at 617. However, he ignored this warning and disseminated a 71 page "Employee Whistleblower Report" with a cover page designed such that the report appears to be an official ANL publication. *Id.* *See* "Employee Whistleblower Report." Further ignoring management's reasonable request, in January 2002 he sent an electronic mail message to all ANL employees regarding his whistleblower complaint. 13/ Tr. at 621.

There is no escaping the impression that Cowan's own actions have contributed to the negative attitude of the ANL managers who did not want him back at the FCF. Since Cowan is at least partially responsible for this situation, and has burned his bridges by refusing to cooperate with those investigating his allegations of sabotage, reinstatement to his former position at the FCF would not, in my view, be a "workable" remedy in this case. 14/

It is Therefore Ordered That:

(1) The Appeal filed by Argonne National Laboratory - West, OHA Case No. VBA-0061, is hereby granted in part and denied in part, as set forth in Paragraph (2).

(2) The IAD issued on June 27, 2002 is affirmed, except the contractor shall not be required to reinstate the complainant to his former position in the Fuel Conditioning Facility.

13/ Cowan also refused to cooperate with a procedure that ANL management had instituted for SPF employees who were to be transferred when that project was completed. Each affected employee was asked to provide management with his or her top three choices for a new assignment. Tr. at 614-616. Cowan refused to participate in this process, but then complained about his new assignment. Tr. at 629-631.

14/ In addition, although ANL's appeal did not address the availability of a position for Cowan at the FCF, there is some testimony in the record about curtailed operations at that facility in 2000 and possibly in succeeding years. Tr. at 613-614.

(3) This Appeal Decision shall become a Final Agency Decision unless a party files a petition for Secretarial Review with the Office of Hearings and Appeals within 30 days after receiving this decision. 10 C.F.R. § 708.35.

George B. Breznay
Director
Office of Hearings and Appeals

Date: February 27, 2003

January 8, 2003
DECISION AND ORDER OF
THE DEPARTMENT OF ENERGY

Appeal

Name of Petitioner: Susan Rice Gossett

Date of Filing: September 13, 2002

Case Number: VBA-0062

This Decision considers an Appeal of an Initial Agency Decision (IAD) issued on May 8, 2002, involving a Complaint filed by Susan Rice Gossett (Gossett or the Complainant) under the Department of Energy (DOE) Contractor Employee Protection Program, 10 C.F.R. Part 708. In her Complaint, Gossett claims that her former employer, the Safety and Ecology Company (SEC) terminated her as a retaliation for making disclosures that are protected under Part 708. 1/ In the IAD, the Hearing Officer determined that Gossett was entitled to relief. *Susan Rice Gossett*, 28 DOE ¶ 87,020, Case No. VBZ-0062 (2002). The instant determination will consider SEC's appeal of the IAD. As set forth below, I have decided that the IAD should be sustained.

I. Background

A. The DOE Contractor Employee Protection Program

The Department of Energy's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste and abuse" at DOE's Government-owned or -leased facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purpose is to encourage contractor employees to disclose information which they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their

---

1/ SEC is a sub-contractor of Bechtel Jacobs Corporation, the DOE's managing contractor at the Portsmouth site in Piketon, Ohio.

employers. Thus, a contractor found to have retaliated against an employee for such a disclosure, will be directed by the DOE to provide relief to the complainant. See 10 C.F.R. § 708.2 (definition of retaliation).

The DOE Contractor Employee Protection Program regulations establish administrative procedures for the processing of complaints. Under these regulations, review of an Initial Agency Decision, as requested by SEC in the present Appeal, is performed by the Director of the Office of Hearings and Appeals (OHA). 10 C.F.R. § 708.32.

B. History of the Complaint Proceeding

The events leading to the filing of Gossett's Complaint are fully set forth in the IAD. I will not reiterate all the details of that case here. For purposes of the instant appeal, the relevant facts are as follows.

Gossett was employed by an SEC predecessor, Bartlett Nuclear Services, as a radiation control technician (RCT) beginning on October 3, 1997. In March 1999, when SEC took over the Bartlett contract at the DOE's Portsmouth site, Gossett was hired by SEC. Gossett stated in her complaint that in her capacity as an RCT, she disclosed numerous safety and health concerns to her SEC supervisors and managers, to Bechtel Jacobs personnel, to DOE officials and to a member of Congress. These disclosures took place from the time she began working as an RCT until December 2000. The health and safety concerns she raised included, among others, bulging and leaking 55-gallon drums at the Portsmouth site and several contamination issues. Gossett was terminated in January 2001, and contended that the termination was a retaliation for the disclosures.

Gossett filed a Complaint under Part 708 with the DOE Oak Ridge Operations Office. After the completion of an investigation, pursuant to 10 C.F.R. § 708.22, Gossett requested and received a hearing on this matter before an OHA Hearing Officer. The hearing lasted three days. After considering the testimony at the hearing and other relevant evidence, the Hearing Officer issued the IAD that is the subject of the instant appeal.

C. The Initial Agency Decision

The IAD cited the burdens of proof under the Contractor Employee Protection Regulations. They are as follows:

> The employee who files a complaint has the burden of establishing by a preponderance of the evidence that he or she made a disclosure. . . and that such act was a contributing factor in one or more alleged acts of retaliation against the employee by the contractor. Once the employee has met this burden, the burden shall shift to the contractor to prove by clear and convincing evidence that it would have taken the same action without the employee's disclosure. . . .

10 C.F.R. § 708.29.

The IAD determined that Gossett had clearly made protected disclosures, because the information she revealed related to substantial health and safety concerns at the Portsmouth site. The IAD further found that Gossett's termination was an adverse personnel action. Further, because that termination took place within about one month of her last protected disclosure, the IAD determined that Gossett had established by a preponderance of the evidence that the disclosure was a contributing factor to the termination. The Hearing Officer also noted that SEC officials who decided to terminate her had actual knowledge of her disclosures.

The IAD next considered whether the SEC had clearly and convincingly demonstrated that it would have terminated Gossett in the absence of the protected disclosures. 10 C.F.R. § 708.9(d). The IAD cited SEC's reason for terminating Gossett: after three successive attempts, she failed to achieve a passing grade on an examination to requalify her for her RCT position. In this regard, the IAD rejected SEC's assertion that it had demonstrated that at the time it terminated Gossett it had a policy under which an RCT was only allowed three attempts at passing a requalification exam (the three strikes rule). In making the determination that SEC had failed to establish such a policy, the IAD noted that there was no evidence that the three strikes rule had ever been applied to any SEC employee before, and there was testimony that Gossett was the only SEC employee ever fired under the rule.

Accordingly, the IAD found that SEC should provide relief to Gossett for the termination. On August 23, 2002, after further briefing, the Hearing Officer issued a Decision setting forth the specific nature of that relief. *Susan Rice Gossett*, 28 DOE ¶ 87,028, Case No. VBH-0062 (2002)(*Gossett*).

II. The SEC Statement of Issues and Gossett Response

SEC filed a statement identifying the issues that it wished the Director of the Office of Hearings and Appeals to review in this appeal phase of the Part 708 proceeding (hereinafter Statement of Issues or Statement). 10 C.F.R. § 708.33. The Statement does not challenge the finding that Gossett made disclosures that are protected under Part 708. Instead, the Statement raises the following three arguments to support its position that Gossett is not entitled to relief: (i) the OHA's interpretation of 10 C.F.R. § 708.29, regarding shifting of the burden of proof to the contractor, violates § 7(C) of the Administrative Procedure Act, 5 U.S.C. § 556(d); (ii) the IAD is not supported by substantial evidence; and (iii) the IAD violated due process in deciding an issue without first providing adequate notice to SEC. 2/ Gossett filed a response to the Statement of Issues, expressing support for the IAD.

II. Analysis

As I stated above, SEC has not convinced me that there is any reason to disturb the IAD in this case.

A. Whether OHA's Interpretation of 10 C.F.R. § 708.29 Violates §7(C)of the Administrative Procedure Act

SEC argues that OHA's interpretation and application of the burdens of proof as set forth in 10 C.F.R. § 708.29 are impermissible.

2/ In its list of "Questions Presented," the Statement referred to two other issues concerning the relief provided in the *Gossett* determination. It argues that the Hearing Officer erred in requiring SEC to reinstate Gossett without requiring her to initially demonstrate that she is qualified for the position involved. It further states that the Hearing Officer erred in establishing the hourly rate of complainant's counsel in connection with the relief phase of this proceeding. Since SEC provided no additional discussion on the second point, I will not give it any further consideration here. The reinstatement issue was considered in a letter of October 30, 2002. SEC did not file any appeal of the determinations reached in that letter, although it was provided with an opportunity to do so. Its arguments, had any been submitted, would have been considered in the instant determination. Accordingly, I consider that matter resolved.

Specifically, the Company refers to OHA's consistent interpretation of that Section to mean that a Part 708 complainant has met his burdens of proof under that section if he has shown (i) he made a protected disclosure, and (ii) that it was in temporal proximity to an adverse personnel action by the employer. We have held that under our Part 708 regulations, once this showing has been made by the complainant, the burden under Section 708.29 shifts to the employer to show that it would have terminated the employee even in the absence of the protected disclosure. SEC claims that under 5 U.S.C. § 556(d) (the Administrative Procedure Act or APA) and judicial interpretations of that Section, the burden of persuasion must be placed on the proponent of an order. SEC contends that under Section 708.29, OHA prematurely shifts the burden of persuasion to the contractor, merely on the basis of temporal proximity between a protected disclosure an adverse personnel action. SEC argues that this is improper, based on judicial interpretations of burdens of proof required under Section 556(d) of the APA.

The applicability of the APA to proceedings under Part 708 is an issue that can be disposed of quickly. As we found in *Janet K. Benson*, 28 DOE ¶ 87,027, Case No. VBA-0082 (2002)(*Benson*), there is no basis for concluding that the APA applies to proceedings under Part 708. The APA states with respect to adjudications that its provisions apply in cases where adjudication is "*required by statute* to be determined on the record after opportunity for an agency hearing. . . ." 5 U.S.C. § 554(a)(emphasis added). Consequently, this provision only applies if another statute requires the adjudication proceeding. *Wong Yang Sung v. McGrath*, 339 U.S. 33 (1950)(*Wong*). In *Wong*, the Supreme Court stated that "the limitation to hearings 'required by statute' in Section 5 of the Administrative Procedure Act exempts from that section's application only those hearings which administrative agencies may hold by regulation, rule, custom or special dispensation; not those held by compulsion." *Id.* at 50.

There is no statutory authority requiring that hearings be held under Part 708. The rule was issued pursuant to the broad authority granted the Agency by the Atomic Energy Act of 1954 and the Department of Energy Organization Act to prescribe such rules and regulations as necessary or appropriate to protect health, life and property. 57 Fed. Reg. 7533 (March 3, 1992). Neither of these Acts requires that the DOE hold hearings regarding the protection of contractor employees from reprisals by their employers for whistleblowing. Since Part 708 hearings are conducted based solely

on authority vested by regulation, they fall squarely within the exception noted in *Wong*. *Benson,* slip op. at 14-15. Accordingly, OHA is not required to adhere to judicial interpretations of the burdens of proof under the APA in cases involving its own Part 708 regulations.

To the contrary, under well-settled case law, an Agency's interpretations of its own regulations are entitled to deference. *See e.g.*, *U.S. v. Mead Corp.*, 533 U.S. 218 (2001); *Auer v. Robbins*, 519 U.S. 452 (1997). Our interpretation and application of the burdens of proof under Section 708.29 are by now well-settled case law, and I see no reason to depart from our precedents. *E.g.*, *Janet Westbrook*, 28 DOE ¶ 87,021, Case No. VBA-0089 (2002); *Barbara Nabb*, 27 DOE ¶ 87,519, Case No. VWA-0031 (1999). The manner in which we have applied Section 708.29 to shift the burden of proof in Part 708 cases serves to promote the DOE's overall goal in its Contractor Employee Protection Program: "ongoing commitment to whistleblower protection." 64 Fed. Reg. 12865 (March 15, 1999). The OHA's application of Section 708.29 is not only reasonable, but fits squarely within the overall purpose of Part 708.

Nevertheless, I am willing to consider whether the Hearing Officer in this case may have improperly applied the shifting burdens of proof as set out in Section 708.29. Accordingly, I have undertaken a review of that aspect of the record. I see nothing improper whatsoever. The Hearing Officer noted numerous Gossett protected disclosures during the period July 2000 through November 2000. Gossett was terminated in January 2001. The temporal proximity is obvious.

The Hearing Officer also noted numerous instances of hostility of SEC management to Gossett, which he determined were associated with her whistleblowing activities. IAD at 89,127-28. He found this pattern of hostility to provide further support for the conclusion that the protected disclosure was a contributing factor to the retaliation.

Once the temporal proximity showing has been made, the finding of the pattern of hostility is not necessary to the overall conclusion that the complainant has made the contributing factor showing. The conclusions in the IAD regarding the pattern of hostility are dictum in this case. *See Benson*, *slip op. at 16, n.6.* The same is true of the Hearing Officer's finding that the terminating officials had knowledge of her disclosures. The temporal proximity of the termination and Gossett's protected activities is ample

evidence to sustain Gossett's burden of proof of contributing factor under Section 708.29.

B. Whether the IAD Is Supported By Substantial Evidence

SEC argues that with respect to retaliation, the employer's motive is a key issue. The firm contends that there is no substantial evidence to support a finding of retaliatory motive or "improper animus" by SEC decision makers. The Statement then describes in detail the actions that the Hearing Officer referred to as "hostile" in his discussion of the contributing factor issue. The Statement proceeds to give alternate explanations for each of those actions in order to establish that they were not in fact motivated by SEC hostility towards Gossett.

SEC's protracted exploration of the motives of its managers is simply irrelevant. The Complainant is not required under Part 708 to establish that a retaliatory motive existed. Moreover, the employer is not necessarily relieved of liability under Part 708 even if it provides evidence that it bore no animus towards a Part 708 complainant. *Jagdish Laul*, 28 DOE ¶ 87,006, Case No. VBH-0010 (2000). *See also*, *Marano v. Dep't of Justice*, 2 F.3d 1137 (Fed. Cir. 1993).

In assessing whether a disclosure was a contributing factor to an adverse personnel action, we do not need to probe an employer's state of mind, or consider whether a particular action was motivated by hostility. It is true that the term retaliation, as it is most commonly used in everyday speech, may have some extremely negative connotations, including revenge and hostility. However, under Part 708, the term is more neutral, and does not involve the subjective mind-set of the person taking the adverse personnel action. Under Part 708, retaliation is an objective concept. It means "an action. . . taken by a contractor against an employee with respect to employment(e.g., discharge, demotion or other negative action with respect to the employee's compensation, terms, conditions or privileges of employment) as a result of the employee's disclosure of information. . . ." 10 C.F.R. § 708.2. Thus, hostile motivation by the employer is not an element that is necessarily involved under Part 708.

If a complainant were able to show animus, that evidence could be relevant in establishing whether the protected disclosure was a contributing factor to the adverse personnel action, and in considering whether the employer would have taken the retaliatory action in the absence of the protected disclosure. However, the

obverse of that proposition is not true. The absence of hostility does not relieve an employer of liability under Part 708 for its actions. Thus, even if SEC had shown that its managers did not act with hostility towards Gossett, it would not mean that Gossett had failed to meet her burden of proof under Section 708.29.

The Statement also reargues the IAD's determination that SEC failed to show that it had a three strikes rule. It claims that there is no substantial evidence to support the IAD's finding. In this regard, the Statement admits that the three strikes policy was unwritten, but states that the relevant question is rather whether the policy "has been consistently applied." The Statement argues that it has made a showing that the policy has been consistently applied, because no RCT has ever been permitted to take the examination more than three times. The Statement also refers to the assertion in the IAD that SEC did not warn three other RCTs who had twice failed the requalification examination that they would be terminated upon a third failure. The Statement then explains why warnings were not warranted for those other RCTs, and why, in its view, the other RCTs were not given better treatment than Gossett.

I agree with SEC's assertion that it is not required to show that the three strikes rule was memorialized in writing. I also agree with its contention that it is permitted to rely on the testimony of its employees that the three strikes rule was an oral policy that was consistently applied. Nevertheless, the firm's explanations do not demonstrate any error that would cause me to reverse the IAD. SEC has still not established that it had a three strikes policy that was consistently applied.

To support its position, SEC exhaustively reargues the significance of the hearing testimony of a number of its key managers in an attempt to establish that their statements support the contention that the rule was clearly in effect at the time that Gossett was terminated. After reviewing the record, I find that SEC's evidence on this point falls short of the mark, and that the Hearing Officer's determination was correct. In my view, the absence of a written SEC policy on such a serious matter tends to detract somewhat from the overall credibility of SEC's position that the three strikes rule was ever squarely and firmly in effect. However, I believe that the firm could establish through solid testimony that it consistently applied the three strikes policy. Nonetheless, SEC's protestations to the contrary notwithstanding, the hearing testimony was far from clear on whether SEC had an unwritten three strikes policy. For example, Brad Andrie, an SEC manager, testified that the three strikes policy was well-known

among RCTs. Transcript of October 25, 2001 Hearing at 104. However, the company did not bring forth RCTs to support that assertion. Andrie's pronouncement, with nothing more, is hardly convincing evidence on this point, inasmuch as there was contradictory evidence in the record. The very fact that senior site manager Joe Shuman and SEC RCT training coordinator Billie Childers purportedly needed to make several phone calls to determine if such a policy existed or was ever applied, contradicts Andrie's position. *Id.* at 103. It is hard to believe that a company policy regarding RCT requalification examinations would be well-known by RCTs, but not well-known by senior company officials, particularly the RCT training coordinator.

SEC claims that it has demonstrated that the policy was consistently applied because it has established that no RCT has ever been permitted to take the examination more than three times. I am unimpressed by this reasoning. First, SEC has not even shown that this assertion is true. Secondly, even if SEC had established that no RCT had ever taken the test four times, there are a number of other possible explanations unrelated to a three strikes policy. For example, the RCTs that failed three times may have simply opted to find other work. 3/ In any event, SEC's necessary showing here about the three strikes policy is not that no RCT ever took the examination more than three times, but rather that RCTs were consistently denied an opportunity to take the examination a fourth time. The company has not brought forward such evidence.

I believe that SEC should, at a minimum, have produced unambiguous testimony that the three strikes policy was in effect. In the absence of a written policy to this effect, one possible way to do this might have been to provide direct testimony from RCTs that the policy was well-known to them. SEC should also have shown that employees were precluded from taking the examination more than three times. I recognize that it is the firm's position that no other RCT ever needed to take the examination more than three times, and that Gossett was the first person to actually have been terminated under the rule. However, under Part 708, the contractor's obligation here is clear. It must show that the three strikes policy was in effect. This, it has not done. In view of the high level of proof required in Part 708 cases, if that policy had never been applied in the past, SEC may simply be unable to provide clear and convincing evidence that the policy would have

---

3/ This is apparently what happened in the case of Lou Ann Riggs, who found a position with another company.

been applied to Gossett. *See*, *Bernard F. Cowan*, 28 DOE ¶ 87,023 at 89,179, Case No. VBH-0061 (2002)(single instance of a three-day suspension does not indicate the contractor's normal practice was to impose three-day suspensions on employees who improperly used company information system).

Given the overall weak record by SEC on this issue, I find that the firm has fallen well short of showing clearly and convincingly that it had a three strikes policy, and that it would have terminated Gossett under that policy in the absence of the protected disclosures.

C. Whether the IAD Violated Due Process By Deciding a Claim Without Providing Adequate Notice to SEC

SEC points out that prior to being discharged, Gossett filed a Complaint with the DOE field office employee concerns manager claiming that she had been frequently reassigned. SEC contends that during the hearing, the Hearing Officer asked no questions about the reassignments and that Gossett's post hearing brief did not refer to this issue. Yet, as SEC points out, the Hearing Officer did note in the IAD that the "pattern of repeated reassignments constitutes an adverse personnel action, since it served to intimidate and harass Gossett as well as undermine her authority and stature as an RCT." IAD at 89,129. SEC complains that it had no notice that the reassignment of Gossett was an issue in this case and that it was therefore unfairly deprived of the opportunity to provide evidence on this point.

This objection is frivolous. As an initial matter, SEC was well aware that Gossett had been reassigned, since it was the entity that reassigned her. The reassignments were part of the record in this case, as evidenced by the fact that the Hearing Officer referred to them in the Appendix to the IAD. SEC did not dispute the fact that Gossett was reassigned. 4/ It now simply objects to the Hearing Officer's conclusion that the reassignments were adverse personnel actions.

4/ SEC claims that the Hearing Officer never analyzed whether some of the reassignments took place prior to a protected disclosure. SEC does not point to any particular reassignment that may have taken place before any of her disclosures. I will therefore not give an further consideration to that possibility, which, in any event, is irrelevant.

The Gossett reassignments are obviously personnel actions. It is surely not unreasonable for an employee to object to recurrent reassignments. In the context in which they occurred, the reassignments in this case should therefore be considered as adverse personnel actions under Part 708. SEC has not even alluded to any reason to consider them otherwise.

In any event, there was another clearly adverse personnel action in this case, one which is undisputed: the termination. Thus, there would be no change in the outcome here even if the Hearing Officer had not made reference to the reassignments. In this regard, the Hearing Officer did not direct SEC to take any special remedial actions as a result of the reassignments. The firm has not even suggested any harm that it experienced as a result of the Hearing Officer's reference to the reassignments.

Finally, I see nothing to preclude a Hearing Officer in a Part 708 proceeding from weighing and balancing any relevant material in the record in connection with reaching his determination. No special notice to a party is required. SEC's suggestion to the contrary is mere cavil. I therefore find that SEC's claim of error due to the Hearing Officer's purportedly "surprise" reference to the reassignments is a hollow one.

IV. Conclusion

As discussed above, I see nothing in SEC's Statement of Issues that would cause me to overturn the IAD in this case.

It Is Therefore Ordered That:

(1) The Appeal filed by Safety and Ecology Corporation on September 13, 2002, is hereby denied.

(2) This Appeal Decision shall become a Final Agency Decision unless a party files a petition for Secretarial Review with the Office of Hearings and Appeals within 30 days after receiving this decision. 10 C.F.R. §708.35.

George B. Breznay
Director
Office of Hearings and Appeals

Date: January 8, 2003

August 21, 2002
DECISION AND ORDER OF
THE DEPARTMENT OF ENERGY

Appeal

Name of Petitioner: Janet K. Benson

Date of Filing: June 10, 2002

Case Number: VBA-0082

This Decision considers an Appeal of an Initial Agency Decision (IAD) issued on May 22, 2002, involving a Complaint filed by Janet K. Benson (Benson or the Complainant) under the Department of Energy (DOE) Contractor Employee Protection Program, 10 C.F.R. Part 708. In her Complaint, Benson claims that her former employer, Livermore National Laboratory (LLNL or the Laboratory), retaliated against her for engaging in activity that is protected by 10 C.F.R. Part 708, the Department of Energy's Contractor Employee Protection Program. 1/ In the IAD the Hearing Officer determined that Benson made disclosures that are protected under Part 708, but that LLNL had shown that it would have taken the same personnel actions in the absence of the protected disclosures. As set forth in this decision, I have decided that this determination, is with one exception, correct.

I. Background

A. The DOE Contractor Employee Protection Program

The Department of Energy's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste and abuse" at DOE's Government-owned or -leased facilities. 57 Fed.

1/ The Complainant also named the Regents of the University of California (UC) in her complaint. UC managed and operated LLNL for the United States government under a contract between the Regents of UC and the DOE.

Reg. 7533 (March 3, 1992). Its primary purpose is to encourage contractor employees to disclose information which they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers. Thus, contractors found to have taken adverse personnel actions against an employee for such a disclosure, will be directed by the DOE to provide relief to the complainant. See 10 C.F.R. § 708.2 (definition of retaliation). 2/

The DOE Contractor Employee Protection Program regulations establish administrative procedures for the processing of complaints. Under these regulations, review of an Initial Agency Decision, as requested by Benson in the present Appeal, is performed by the Director of the Office of Hearings and Appeals (OHA). 10 C.F.R. § 708.32.

B. History of the Complaint Proceeding

The events leading to the filing of Benson's Complaint are fully set forth in the IAD. *Janet K. Benson*, 28 DOE ¶ 87,022 (2002)(*Benson*). For purposes of the instant appeal, the relevant facts are as follows.

This case came before the Office of Hearings and Appeals on June 2, 1999, when Benson requested that OHA convene a hearing to consider issues that she had raised in a Part 708 Complaint. On June 7, 1999, I appointed Linda Lazarus as Hearing Officer. Ms. Lazarus made a number of preliminary determinations in this

---

2/ The applicable complaint of reprisal in this case was filed in October 1994, pursuant to regulations effective in April 1992. 57 Fed. Reg. 7533 (March 3, 1992). As the Hearing Officer stated, the DOE amended 10 C.F.R. Part 708 in an Interim Final Rule effective April 14, 1999, 64 Fed. Reg. 12862 (March 15, 1999). The revised regulations provide that the procedures in the new Part 708 apply prospectively in any complaint pending on the effective date of the revisions *i.e.* April 14, 1999. However, the substantive changes reflected in the revised regulations will not be applied in this case because to do so would affect the substantive rights of the parties. Therefore this case is adjudicated in accordance with the substantive standards set forth in the original version of Part 708. *Benson*, 28 DOE at 89,144, n.2.

case, issued several interlocutory orders and conducted the hearing in February 2000 and March 2001. On February 12, 2002, I transferred this case from Ms. Lazarus to Ann Augustyn, and delegated to her the responsibility for issuing the Initial Agency Decision in this case. As stated above, on May 22, 2002, Ms. Augustyn issued the IAD that is the subject of the instant appeal.

II. The Initial Agency Decision

A. Factual Findings of the IAD

The factual background of this case involves a long and complex series of events. In the typical Part 708 appeal-phase determination, even the most involved factual basis can be briefly summarized. However, this case requires reference to nearly all of the factual findings of the IAD. Accordingly, even though the factual background in this case is unusually long, for ease of understanding the issues on appeal here, I have recounted the factual foundation below in virtually the same form as it was set out in the IAD. *See Benson*, 28 DOE at 89,147-52. 3/

In September 1989, the Complainant began to work in LLNL's Education Program Division (Education Program) under the supervision of its Director, Dr. Manuel Perry. At the time, the Education Program was housed in a school building leased from the school district, commonly referred to as "the Almond School." In late 1990 or early 1991, Dr. Perry approved a proposal submitted by the Complainant to seek funding from the National Science Foundation (NSF) for a three-year program, the National Physics Education Program Collaboration (NPEPC), that would provide minority undergraduate students with the opportunity to work with laboratory researchers during the summer. In order to implement the program, LLNL entered into a partnership with California State University, Hayward (CSU-H). Under the terms of the partnership, CSU-H was the recipient of NSF funds, and was responsible for the fiscal and logistical requirements of the program such as management, bookkeeping, student transportation, and dormitory facilities. For its part, LLNL handled all student activities, including the assignment and evaluation of projects and mentors for each student. The

---

3/ I have omitted from my summary the IAD's citations to the record.

Complainant and Dr. Charlie Harper, the head of the Physics Department at CSU-H, were designated as the co-project investigators (co-PIs) for NPEPC.

In 1991, NSF approved funding for the first two years of NPEPC. Funding for the third year was conditional upon performance. Midway through the first year of the NPEPC, communication problems arose between the Complainant and Dr. Harper. Sometime in early 1993, Dr. Harper suggested that the third year of NPEPC be modified to include a college course on laboratory research techniques. The Complainant believed at the time that the suggested modification violated LLNL and NSF rules and regulations, and would result in the diversion of funds to CSU-H. The Complainant first memorialized several concerns in this regard in a February 1993 memorandum to Dr. Perry.

As time went on, the problems between the Complainant and Dr. Harper escalated, and Dr. Perry removed the Complainant as co-PI. On July 27, 1993, Perry replaced the Complainant with Eileen Vergino. LLNL had hired Vergino in early July 1993 as the Deputy Manager of LLNL's Education Program. Dr. Perry told her that she was taking over the Complainant's position because of the "animus" between Dr. Harper and the Complainant.

In the fall of 1993, Ms. Vergino took over the Education Program because Dr. Perry retired. In September 1993, the Complainant wrote to Ms. Vergino complaining about her removal as co-PI of NPEPC. During the latter part of 1993, performance issues with the Complainant began to surface. According to Ms. Vergino, the Complainant was not completing her work on time, was only sporadically attending staff meetings, and was frequently not in the office during regular working hours.

In February 1994, Vergino asked the Complainant and another employee to account for time because of complaints that both were not working regular hours. In response, the Complainant could only account for 11 hours in a two month work period covering 160 hours.

In April 1994, Vergino hired Linda Dibble as Senior Administrator to handle all personnel issues in the Education Program. According to Dibble, within two weeks Vergino expressed concern that the Complainant seemed unproductive, appeared to be coming in late and leaving early, and was not participating in staff meetings.

The next month, May 1994, the Complainant filed her first Part 708 complaint. The DOE subsequently dismissed the complaint for lack of jurisdiction, because at the time LLNL had not yet contractually agreed to be bound by Part 708.

From May through September 1994, personnel issues regarding the Complainant continued. First, LLNL asked the Complainant to account for absenteeism not reflected on her time cards. Then, the Complainant's supervisor, Glenn Young, indicated that the Complainant had failed to complete an assignment of finding mentors for students participating in NPEPC. In August 1994, Mr. Young provided a marginal performance appraisal for the Complainant. Mr. Young stated in a memorandum that the Complainant should be placed under a highly structured work environment with detailed tasking, reporting requirements, and frequent meetings.

In the meantime, LLNL learned that the lease on the Almond School, the building that housed the Education Program, would be expiring. Accordingly, LLNL needed to find a new location for the program. Building 415, which required some remodeling and repainting, was selected.

In mid-September 1994, the Complainant was assigned to a new full-time position working for Mr. Young in LLNL's Apprentice Program, a program designed as an affirmative action outreach effort to train underprivileged youth, women, and minorities in the trades. Mr. Young provided a detailed job description to the Complainant. Even though the responsibilities assigned to the Complainant appeared to be complementary to her previous experience in recruiting and placing students, and in affirmative action compliance, the Complainant objected to the assignment on the grounds that she was unfamiliar with these areas.

In late September 1994, the Complainant received her performance appraisal for the period 1993-1994. It was "less than satisfactory." The appraisal cited the Complainant's failure to take initiative and the constant follow-up required by those who gave her assignments.

On October 12, 1994, the Complainant filed her second Part 708 Complaint. In her complaint, she indicated that she had been demoted, reassigned and given unsatisfactory performance appraisals in retaliation for challenging the modification of the grant funding the NPEPC.

By December 1994, plans were underway to move the Education Program to Building 415. Linda Dibble advised the staff in early December that carpet was being installed in the building on December 5, 1994, after which time the staff could visit their new offices. The Complainant indicated that she would wait until after the holidays to see her office so that the fumes from the new carpeting could dissipate. In late January 1995, the Complainant purportedly told Ms. Dibble that she had allergic reactions to "new carpet, paint fumes, windows painted close[d], and . . . asbestos." In early February, the Complainant spoke with Mr. Young about her concern regarding the new carpet smell. Thereafter, Linda Dibble requested that LLNL's Hazards Control Department conduct an industrial hygiene "walk through" of Building 415 for guidance on addressing this issue. The Hazards Control Department instructed Dibble to "bake" the building by (1) closing all the windows and turning up the heat for two days and then (2) opening up all the windows to allow the new carpet smell to dissipate into the air. Dibble followed these instructions. Next, Dibble asked LLNL's Health Services Department (HSD) to evaluate the Complainant for purposes of determining whether she could occupy Building 415.

On February 14, 1995, Dr. Scott from LLNL's HSD evaluated the Complainant and determined that she could not work for the short term in Building 415. Scott instructed the Complainant to consult her allergist, Dr. Kaufman, and bring a note from him stating how long it would be before she could enter Building 415. Also, Dr. Scott requested that Dr. Kaufman provide a list of chemicals to which the Complainant is sensitive so LLNL could test for them. Dr. Scott also asked that the Complainant report to HSD on February 21, 1995, prior to going to work.

On February 21, 1995, the Education Program moved to Building 415. The Complainant was slated to occupy a second floor office in Building 415 with her colleagues from the Education Program. On that same day, the Complainant reported to HSD as previously instructed with a note from Dr. Kaufman stating that the Complainant was suffering from acute respiratory problems aggravated by "formaldehyde out-gassing" from the carpeting in her present area. 4/ Ed Ochi of LLNL's Industrial Hazards

---

4/ At the time Dr. Kaufman wrote the note, he was unaware that the Complainant had never entered Building 415 where the new carpeting had been laid, and that no formaldehyde was

(continued...)

Division decided that the Complainant could try to work on the first floor of Building 415 in an area that had not been repainted or carpeted. Dibble set up a temporary office for the Complainant on the first floor of Building 415. Dr. Scott issued a restriction barring the Complainant from working on the second floor only of Building 415 from February 21 to 28, 1995. Dr. Scott noted on the work restriction that he would re-evaluate the Complainant's situation in one week. With the note in hand, she then proceeded to the first floor office in Building 415. After one hour, she felt ill and went home. When the Complainant returned to work on February 24, she was placed in a Trailer 3156 which was located down the street from Building 415.

On February 28, 1995, the Complainant returned to HSD, and Dr. Scott decided that the Complainant should not enter Building 415 for another four weeks.

On March 28, 1995, the Complainant met with Dr. Scott and reported that she was receiving weekly treatment from her allergist, and was experiencing no problems working in Trailer 3156. Dr. Scott extended the Complainant's work restriction in Building 415 for another month, until April 25, 1995.

During this time, the Complainant was working with Glenn Young on the Apprentice Program. On March 31, 1995, Young requested that the Complainant relocate to Building 571 and assume the daily operation of the Apprentice Program. At the Complainant's request, Dr. Scott revised the Work Assignment Restriction to cover both Buildings 415 and 571.

Toward the end of March 1995, Dibble asked LLNL's Hazards Control department to perform an industrial hygiene evaluation of, among other places, Buildings 415 and 571. The evaluation concluded that any airborne contaminants present in the two buildings were at levels acceptable to the published workplace guidelines and standards.

On April 25, 1995, the Complainant visited HSD and expressed concern that if she were to enter Buildings 415 or 571, she would have problems. Dr. Scott agreed to extend her restrictions

---

4/ (...continued)
used in the manufacture of the carpet installed in the offices in Building 415.

for another month until May 25, 1995, based only on the Complainant's articulated fears.

In the meantime, the Complainant's performance issues remained a concern for her supervisors. In April 1995, Mr. Young expressed dismay that the Complainant was having trouble completing her assignments without a step-by-step description of every task. In May 1995, Young told Barry Goldman, the Team Leader of Student Programs in the Education Program, that the working relationship between the Complainant and him was not going well. Young told Goldman that part of the difficulty working with the Complainant was that she worked in an isolated location and he could not determine what she was doing. Because of performance issues, the Complainant was removed from Young's supervision and the Apprentice Program. Goldman decided to assume direct supervision over the Complainant in May 1995.

On May 25, 1995, the Complainant returned to HSD and told Dr. Scott that she was still reluctant to work in Buildings 415 and 571. This time, however, Dr. Scott decided that the Complainant could work in these two buildings "as tolerated" from May 25 to June 23, 1995. Scott stated that he had been in both buildings recently and knew from personal experience that the new carpet odor was gradually disappearing. He agreed to evaluate the Complainant again in one month.

The Complainant's work restrictions expired on June 23, 1995. At this point, Goldman determined that because of programmatic needs, he could no longer accommodate the Complainant's desire to remain in the trailer. Goldman informed the Complainant that she must report to her office in Building 415 on June 26, 1995, unless she provided medical documentation outlining the restrictions LLNL needed to accommodate. On June 26, 1995, the Complainant submitted a hand-written note from her allergist stating that the Complainant tests intolerant to petroleum products, paints, lacquers, varnishes, formaldehyde products, organic dusts, glue products, and fibers of many kinds, especially organic in origin.

At this point, Goldman decided he could no longer use the services of an employee who could not enter the building where all the program work was done. Goldman consulted with Vergino and a decision was made to send the Complainant home. The Complainant was subsequently placed on paid administrative leave pending a review of her medical status and disability eligibility.

On August 3, 1995, the Complainant's allergist sent a medical note to LLNL stating that the Complainant "could function in an ordinary environment, [but] needed to avoid a chamber heavily laden with vapors of formaldehyde coming from large yardage of new and never before aerated carpet." The note further stated that all that the Complainant required was "clear, ambient room air."

The Complainant returned to LLNL on August 9, 1995 after a six week hiatus. She and Dr. Scott went to Building 415, but the Complainant fell ill and went home. As a consequence, Dr. Scott issued another work restriction prohibiting the Complainant from working in Building 415 until September 17, 1995.

Following this incident, Gloria Kwei, the Manager of LLNL's Human Resources Department, wrote the Complainant a letter informing her that she would be on unpaid leave until September 17. In the letter, Kwei stated that the program no longer had assignments that could be performed outside Building 415. Kwei further stated that if the Complainant's work restrictions became permanent, a job search of other parts of LLNL would be performed and if no alternative assignment was found, the Complainant would be separated from her employment.

On September 10, 1995, the Complainant wrote to the Secretary of Energy complaining that on July 22, 1993 she was improperly removed from her position as the Project Director for an education project funded by NSF. The Complainant further stated that LLNL had required that she work in a building containing toxins to which she is allergic.

On September 17, 1995 the Complainant's work restriction expired again and she again entered Building 415 with Dr. Scott. The Complainant complained of not feeling well and she went home. Dr. Scott issued another work restriction for Building 415 until November 6, 1995.

On November 20, 1995, LLNL decided to obtain an outside medical evaluation as to the Complainant's ability to work in Building 415. The Complainant was subsequently evaluated by Dr. Abba Terr, an allergy and immunology specialist. Dr. Terr issued a report on December 27, 1995. Dr. Terr did not find any objective evidence of a medical condition, but concluded that based on the Complainant's subjective beliefs, there was no reason to believe she could enter Building 415 without becoming "subjectively ill."

Sometime in January 1996, Dr. Richard Watts, Dr. Scott's successor, met with the Complainant to discuss her return to work. During this meeting the Complainant agreed that she should be permanently restricted from working in Building 415. Accordingly, Dr. Watts issued a permanent restriction prohibiting the Complainant from working in Building 415 and 571. At this point, LLNL determined that in view of the Complainant's inability to perform the essential assigned functions of her position, she should be separated.

Before separating the Complainant, Gene Dent, LLNL's Rehabilitation Representative, tried to contact the Complainant via certified mail and telephone in order to discuss vocational rehabilitation. Records show that the Complainant received the certified mail letter. However, the Complainant never responded to the letter. At the hearing, the Complainant explained that she never contacted Mr. Dent because she "didn't feel [she] needed to be rehabilitated."

On February 22, 1996, Robert Perko of LLNL's Staff Relations sent the Complainant a notice of separation. In his letter to the Complainant, Perko stated that the Complainant had five calendar days to respond either orally or in writing to LLNL if she believed the action was improper. The Complainant did not respond.

On March 22, 1996, LLNL sent a second certified letter to the Complainant advising her that she was being terminated effective March 22, 1996. The letter informed the Complainant that her separation was due to her inability to perform the essential functions of her job. The letter also advised that she could appeal the separation if she believed LLNL's policies or procedures had been improperly applied. The Complainant did not appeal.

B. IAD's Conclusions of Law

After making the above findings of fact, the IAD proceeded to analyze them and reach conclusions of law. The IAD cited the burdens of proof under the Contractor Employee Protection Regulations. As the IAD noted:

> It is the burden of the complainant under Part 708 to establish "by a preponderance of the evidence that he or she made a disclosure, participated in a proceeding or refused to participate in an activity as described in

> § 708.5, and that such act was a contributing factor in one or more alleged acts of retaliation against the employee by the contractor." 10 C.F.R. § 708.29

Benson, 28 DOE at 89,146.

Once the employee has met this burden, the burden shifts to the contractor to prove by clear and convincing evidence that it would have taken the same action without the employee's disclosure. 10 C.F.R. § 708.29. *Benson, 28 DOE at 89,147.*

As the IAD further noted, Section 708.5(a) provides that a disclosure is protected if an employee in good faith believes that she is disclosing a violation of any law, rule, or regulation; a substantial and specific danger to employees or to public health or safety, or fraud, mismanagement, gross waste of funds or abuse of authority. 10 C.F.R. § 708.5(a). *Benson*, 28 DOE at 89,152.

The IAD found that Benson's oral statements to Dr. Perry between January 1993 and July 1993 regarding NPEPC fraud, waste and abuse by LLNL, and the written statements contained in her February 1993 memorandum to Dr. Perry were protected disclosures under Part 708.

The IAD next considered whether the protected disclosures were a contributing factor to the following four alleged retaliations: (i) Benson's reassignment on September 23, 1994 to LLNL's Apprentice Program; (ii) her "less than satisfactory" performance appraisal on September 27, 1994; (iii) the decision to assign her to work in Building 415; and (iv) LLNL's determination to separate her in March 1996.

The IAD found that Vergino made the decision to assign Benson to the Apprentice Program and was the supervisor who gave Benson the "less than satisfactory" performance appraisal. The IAD also found that Vergino knew that animus existed between Harper and Benson, but had no knowledge that the complainant had filed a Part 708 complaint until July 1995, and had no knowledge about the allegations of fraud made by Benson. Based on these findings, the IAD determined that Vergino had neither constructive nor actual knowledge of the nature of the protected disclosures regarding NPEPC. The IAD concluded that Benson had not shown that the reassignment and the performance appraisal were retaliations for the protected disclosures. The IAD went on to determine that, in any event, the Laboratory had clearly and

convincingly shown that it would have taken these two actions absent Benson's protected disclosures.

The IAD then considered whether the reassignment of Benson to Building 415 or LLNL's termination of Benson was a retaliation for the protected disclosures or for Benson's filing a Part 708 complaint in October 1994 or for her September 1995 letter to the Secretary of Energy. 5/ The IAD found that the LLNL official involved in asking Benson to enter Building 415 in May 1995 was Barry Goldman. He also requested her to move to the building in June 1995. The IAD determined, however, that Goldman did not know that Benson had filed Part 708 Complaint until July 1995. Accordingly, the IAD found that Benson had not established that the protected disclosures were a contributing factor to the purported retaliation of expecting her to work in Building 415. The IAD went on to conclude that in any event, LLNL had clearly and convincingly shown that the move of the entire education program to that building had nothing to do with Benson, and was simply due to the fact that the lease on the Almond School had expired.

With respect to the termination of the complainant in March 1996, the IAD found that Goldman, with the concurrence of Dibble, Vergino and Kwai, made the decision that Benson could no longer perform work outside Building 415. The IAD determined that Dibble, Goldman and Vergino did know of Benson's Part 708 filing. Nevertheless, the IAD determined that there is "no credible evidence of any nexus between the complainant's protected disclosures and her termination." However, the IAD went on to find that there was in any event clear and convincing evidence that LLNL separated Benson because her inability to work in Building 415 prevented her from performing the essential function of her job.

The IAD next considered whether Benson had engaged in a protected activity under Section 708.5(a)(3) by refusing to work in Building 415, and whether LLNL retaliated against her for engaging in this activity. That provision generally protects a contractor employee from retaliation by a contractor employer for

---

5/ In that letter Benson alleged that LLNL demanded that she work in "environments containing chemicals and toxins to which she is allergic." She contended that the separation was a ruse for terminating her for making the protected disclosures and for the 1995 letter to the Secretary.

refusing to participate in an activity which causes the employee to have a reasonable apprehension of serious injury to himself, other employees or the public. The IAD found that Section 708.5(a)(3) was not designed to protect employees with pre-existing disabilities or medical conditions who refuse to perform the job for which they were hired when their disability or medical condition becomes incompatible with a work environment that is considered safe and healthy under workplace guidelines. The IAD noted that intensive testing demonstrated that there was nothing inherently dangerous in Building 415 from an environmental standpoint. Accordingly, the IAD rejected the claim of retaliation for participating in a protected activity.

The IAD next considered whether Benson made disclosures that were protected under Section 708.5(a)(1), when she stated that she had a dangerous and life threatening reaction to working in Building 415. The IAD found statements to this effect were made directly to Dibble in January 1995, and also included in her September 1995 Letter to the Secretary of Energy. The IAD found these statements to be protected. The IAD recognized that the managers who made the decision to terminate Benson had actual knowledge that she had written to the Secretary of Energy at the time they terminated her, but concluded there was no temporal proximity between the letter and the termination. The IAD also found that even if the termination was the culmination of an ongoing series of reprisals, it would be unreasonable to infer a nexus between any of the protected disclosures and any claimed act of reprisal. The IAD therefore concluded that Benson's disclosures in January and September 1995 regarding Building 415 were not a contributing factor in LLNL's decision to terminate her from employment in March 1996. The IAD also found that in any event LLNL had shown by clear and convincing evidence that it would have terminated her absent the protected disclosures.

In sum, the IAD concluded that Benson was not entitled to relief.

III. The Benson Statement of Issues and the LLNL Response

A. Statement of Issues

Benson filed a statement identifying the issues that she wished the Director of the Office of Hearings and Appeals to review in this appeal phase of the Part 708 proceeding (hereinafter Statement of Issues or Statement). 10 C.F.R. § 708.33. The Statement first maintains that under 5 U.S.C. § 554(d) (of the Administrative Procedure Act or APA), the agency official who

presides over a hearing must make the recommended decision, unless he or she is no longer with the agency. The Statement argues that where evidence of credibility or demeanor is significant to a decision, the examiner presiding at the hearing must issue a decision.

The Statement then raises the claim that this case turns upon the credibility of witnesses. The Statement contends that Benson has been prejudiced because Hearing Officer Augustyn reviewed only the written record developed in this case and did not hear the witnesses' testimony. She therefore could not assess their demeanor. In particular, the Statement contends that although she was not present at the hearing, Hearing Officer Augustyn nevertheless made credibility determinations regarding testimony by Dr. Terr. The Statement further maintains that claims that Benson was irrational are not credible and greatly outweighed by the testimony of Benson's own treating physician, which Hearing Officer Augustyn also did not hear. The Statement concludes that Benson was prejudiced by the reassignment of this case to Ms. Augustyn, and asks that the case be returned to Ms. Lazarus, in accordance with the APA.

B. LLNL's Response

In response to the Benson Statement of Issues, the Laboratory contends that the APA does not apply to proceedings under Part 708. LLNL also argues that the Hearing Officer's decision was not dependent on any credibility determinations, and that Benson could therefore not have been prejudiced in any way by the substitution of a new Hearing Officer.

IV. Analysis

A. Applicability of the APA to Part 708 Proceedings

The applicability of the APA to proceedings under Part 708 is an issue that can be disposed of quickly. After reviewing the APA and relevant case law, I can find no basis for concluding that the Statute applies to proceedings under Part 708. The APA states with respect to adjudications that its provisions apply in cases where adjudication is "*required by statute* to be determined on the record after opportunity for an agency hearing. . . ." 5 U.S.C. § 554(a)(emphasis added). Consequently, this provision only applies if another statute requires the adjudication proceeding. *Wong Yang Sung v. McGrath*, 339 U.S. 33 (1950)(*Wong*). In *Wong*, the Supreme Court stated that "the limitation to

hearings 'required by statute' in Section 5 of the Administrative Procedure Act exempts from that section's application only those hearings which administrative agencies may hold by regulation, rule, custom or special dispensation; not those held by compulsion." *Id.* at 50.

There is no statutory authority requiring that hearings be held under Part 708. The rule was issued pursuant to the broad authority granted the agency by the Atomic Energy Act of 1954 and the Department of Energy Organization Act to prescribe such rules and regulations as necessary or appropriate to protect health, life and property. 57 Fed. Reg. 7533 (March 3, 1992). Neither of these Acts requires that the DOE hold hearings regarding the protection of contractor employees from reprisals by their employers for whistleblowing. Since Part 708 hearings are conducted based solely on authority vested by regulation, they fall squarely within the exception noted in *Wong*. Accordingly, there is no APA or other statutory requirement that the Hearing Officer conducting the Part 708 hearing issue the IAD.

B. Overall Prejudice to the Complainant

Even though no statutory requirement exists, I recognize that it is generally desirable that the person hearing the evidence in these Part 708 proceedings issue the determination on the merits of the case. For reasons not relevant here, I used my discretion and made a determination to depart from that general principle in this instance. See 10 C.F.R. § 708.2 (definition of Hearing Officer and OHA Director), and § 708.25(a). I am nonetheless mindful of the possibility that some prejudice might arise as a result of that decision. Accordingly, if either party were able to establish that it was prejudiced by my decision to appoint a new hearing officer, I would certainly take appropriate measures to correct the detriment.

As I stated above, in the instant case, the Statement of Issues contends that Benson was prejudiced by the reassignment because the new hearing officer did not hear the witnesses' testimony and could not make informed credibility assessments. In particular, the statement cites the testimony of Dr. Terr, the allergy and immunology specialist called by LLNL, and that of Benson's own treating physician as examples of instances in which Hearing Officer Augustyn could not make appropriate credibility determinations regarding their views of the seriousness of Benson's illness and the reasonableness of Benson's belief that there was a danger to her if she entered Building 415.

After performing a thorough review of the IAD, I have concluded, as an initial matter, that the determinations reached therein were unrelated to the credibility of these two experts. As discussed above, the Hearing Officer considered Benson's claims that she was retaliated against for reporting waste, fraud and abuse in the NPEPC program under Section 708.5(a)(1)(iii) and for refusing to participate in a dangerous activity under Section 708.5(a)(3). The Hearing Officer determined that Section 708.5(a)(3) was not designed to protect employees with pre-existing disabilities or medical conditions which prevent them from working in an ordinary office environment. I am in complete agreement with this finding, which is a purely legal determination. As such, it does not depend upon the testimony of the experts. Accordingly, I see no prejudice to Benson due to the fact that the Hearing Officer did not hear the testimony of the two medical experts. 6/

I also find that no prejudice has been shown to exist with respect to Benson's claims regarding retaliation for reporting waste, fraud and abuse in the NPEPC program. I see no issues regarding witness credibility that would make any difference here. As I noted above, the Hearing Officer found four possible retaliations that might have arisen from the complainant's disclosures regarding NPEPC: (i) her reassignment on September 23, 1994 to LLNL's Apprentice Program; (ii) her "less than satisfactory" performance appraisal on September 27, 1994; (iii) the decision to assign her to work in Building 415; and (iv) LLNL's determination to separate her in March 1996.

As discussed below, I will reverse for other reasons the determination regarding the "less than satisfactory" performance evaluation. With respect to Benson's reassignment to the Apprenticeship Program, I am in agreement with the determination made by the Hearing Officer based on the written record. However, I do recognize that it is possible that the determination as to whether the reassignment was a retaliation may be related to the credibility of the testimony of Vergino and

---

6/ It is true that the Hearing Officer did proceed to make some additional determinations regarding the reasonableness of Benson's apprehensions about entering Building 415. These determinations did to some extent involve the credibility of the experts. However, these findings are dicta only. They are not a necessary part of the ultimate determination under review.

others who believed that Benson's performance was not satisfactory, and that the reassignment would allow her experience to be better utilized in the program. *Benson*, 28 DOE at 89,154. Benson did provide some testimony as to her views about why she was having difficulty meeting expectations. For example, she explained that she was unable to perform some of the assigned clerical tasks because she did not have the requisite secretarial skills. She also maintained that in spite of several requests, she never received a new job description that gave her a full understanding of the tasks for which she would be responsible. Transcript of Hearing (Tr.) at 102-12.

Nevertheless, after reviewing this issue as a whole, I see no reason to ask the Hearing Officer to hear personally the testimony on this issue. Even at the time of the hearing, there was no meaningful remedy to Benson's objection to her re-assignment. Although she claimed she was demoted, the reassignment did not change her job classification or reduce her salary. Tr. at 156. Therefore, she could not receive any monetary relief for the reassignment. Since, as I find below, she was ultimately properly terminated, I do not see in what way having the Hearing Officer present for testimony about the job reassignment would make any difference at all in this case. I certainly can see no benefit in having the Hearing Officer present for testimony on this point at this time. I therefore find no prejudice to Benson on this issue, and no basis for reopening the hearing.

I turn next to the alleged retaliation regarding assignment of Benson to work in Building 415. I do not believe that there is a credibility concern here. It is preposterous to believe that the entire education program was moved from the Almond School to Building 415 as a retaliatory measure. There is no doubt that the lease on the Almond School expired and was not renewed. There is simply no evidence to indicate that the selection of and move to Building 415 was in any way related to Benson or her protected disclosures. I find the evidence on its face to be overwhelming and unrelated to the credibility of witnesses.

With respect to the termination of Benson, it is uncontested that she refused to work in Building 415. In the termination process LLNL did not challenge Benson's claim that the building made her ill. The decision to terminate her was based on her unwillingness to come to work in Building 415. The Hearing Officer reviewed the extensive factual record showing that for months LLNL attempted to accommodate Benson's medical needs,

including airing out the building and the carpeting, and placing Benson in temporary work sites until this was accomplished. *Benson*, 28 DOE at 89,149, 89,150, 89,155. The Hearing Officer made legal determinations that LLNL was not required by law to make more accommodations than it did and that overall the Laboratory had shown by clear and convincing evidence that it dealt with her inability to work in Building 415 as it would have with any other employee's inability to work at the job site. Ultimately, it is clear that Benson was unable to work in Building 415, and LLNL established that it would have terminated her for this reason, even absent the protected disclosures. I see no credibility issue that forms a part of that determination, and I am in complete agreement with that decision as a matter of law.

In sum, I see no witness in this case whose testimony would lead me to think that the conclusions in the IAD would have been different, if only his demeanor had been observed and considered. I find no reason to reopen the hearing in this case in order to allow a decisionmaker to gauge the demeanor and credibility of a witness.

C. The Contributing Factor Issue

Hearing Officer Augustyn did an outstanding job in making sense of and giving form to a voluminous and heretofore unstructured record developed with little overall planning or forethought by her predecessor. I am extremely impressed with Ms. Augustyn's ability to cull through the record, make findings of fact, identify and focus the relevant legal issues, and craft her conclusions into a well-drafted determination. Her exceptional work has considerably facilitated my review at this phase of the Part 708 proceeding. I did note, however, one finding meriting further discussion and review. The adjustment I am making to the IAD is a minor one, although the conceptual point regarding proper analysis and application of the "contributing factor" standard, as discussed below, is an important one for OHA's Part 708 case law.

As the Hearing Officer stated, a Part 708 complainant must establish by a preponderance of evidence that he made a protected disclosure that was a contributing factor to a retaliation against him by his contractor-employer. 10 C.F.R. § 708.29. As we have acknowledged in a number of previous cases, one of the many possible ways to show that the protected disclosure was a factor in a retaliation is to show that the official taking the

action knew or had constructive knowledge of the disclosure and acted within such a period of time that a reasonable person could conclude that the disclosure was a factor in the retaliation. *E.g. Ronald Sorri*, 23 DOE ¶ 87,503 (1993).

Under Part 708 case law, this "actual or constructive knowledge" does not just mean that the official taking the action personally knew or should have known of the protected disclosure or protected activity. In OHA cases under Part 708, a complainant can also establish the requisite level of "knowledge" by showing that the person taking the alleged retaliatory act was influenced by the negative opinions of those with knowledge of the protected conduct. A complainant can demonstrate this knowledge by showing that the alleged retaliation is based on information that is tainted by the protected disclosure. *Jagdish C. Laul,* 28 DOE ¶87,006 (2000). In this type of situation, we believe it is appropriate to "impute" the knowledge of the protected disclosure or protected activity to the person taking the retaliatory action. *See* 64 Fed. Reg. 12862 at 12865 (March 15, 1999). This is precisely the situation in the instant case. Therefore, as discussed below, I find that the complainant has satisfied the contributing factor element with respect to several aspects of her case.

The relevant facts in this regard are as follows. The complainant made the protected NPEPC disclosures to her supervisor Dr. Perry in early 1993. The complainant also complained about this same matter to her co-PI Dr. Harper. Ms. Vergino testified that she was aware of the animus between the complainant and Dr. Harper. Further, Ms. Vergino, the complainant, Dr. Perry and Dr. Harper had a meeting in July 1993, the same month in which Ms. Vergino was hired as Deputy Manager of the LLNL's education program. At this meeting Ms. Vergino was informed that she would take the complainant's place as co-PI. Ms. Vergino was told that the reason for the replacement was that there was animus between Dr. Harper and the complainant. She testified that she learned that the animus was "not good for the program and not good for the students." Tr. at 630-31. Ms. Vergino also testified that the complainant had shown her a memo that Dr. Perry had written "about some unauthorized procurements associated with the program." Tr. at 632.

Thus, it is clear that Dr. Perry, who was aware of the protected disclosures, told Ms. Vergino of animus between the complainant and Dr. Harper. This animus was in part related to the very subject of the disclosures. In May 1994, the complainant filed

her first Part 708 complaint. In September 1994, Ms. Vergino rated the complainant's performance as unsatisfactory for the year 1993-1994.

I believe that the complainant has adequately established the existence of a work environment tainted by her disclosures and by the filing of her first complaint of retaliation *(i.e.*, participation in a protected proceeding). It is not a requirement that the complainant establish which of several protected actions was the exact cause of the resentment and animus against her. She is highly unlikely to be able to find out what was in the minds of those individuals responsible for the retaliation. *See Jagdish Laul,* 28 DOE at 89,051. As discussed above, it is also not a requirement that the individual taking the retaliatory action have actual knowledge of the protected disclosure or protected activity. *Id.* at 89,052. Therefore, even if she did not have direct and complete knowledge of the protected disclosures or the actual filing of the Part 708 complaint, Ms. Vergino certainly had enough information about the complainant's problems related to her dissatisfaction with the way monies were being proposed to be spent in the NPEPC program to be considered to have imputed knowledge of the protected disclosures and the May 1994 Part 708 complaint for purposes of this proceeding. Accordingly, I find that the complainant has established by a preponderance of evidence that Ms. Vergino had imputed knowledge of the complainant's protected disclosures and protected activity. I will therefore consider the effect of that conclusion on the alleged retaliations.

1. The September 1994 Performance Appraisal

The "less than satisfactory" performance evaluation of September 27, 1994, was provided only four months after the filing of the individual's Part 708 complaint. This short time period certainly would allow a reasonable person to conclude that the filing of the complaint was a factor in the retaliatory performance appraisal. Accordingly, the less than satisfactory performance evaluation, coming as it did about four months after the filing of the Part 708 complaint, fulfills the second prong of the contributing factor aspect of the complainant's burden of proof. 7/

7/ As the IAD noted, this May 1994 Part 708 complaint was dismissed for lack of jurisdiction, because at that time LLNL had not yet agreed to be bound by the DOE's contractor

(continued...)

The IAD finds that LLNL would have provided the same rating to the complainant in the absence of her disclosures. In this regard, the IAD cites that fact that Ms. Vergino and the complainant exchanged seven memoranda regarding the complainant's job description, complainant's poor job performance and time and attendance problems.

I agree with the finding of the IAD that "LLNL appears to have been completely justified in giving the complainant a less-than-satisfactory performance evaluation in September 1994." However, this is not the standard in Part 708 cases. The standard to be applied is whether the contractor has shown by clear and convincing evidence that it would have taken the alleged retaliation in the absence of the protected disclosure.

I do not agree with the IAD that LLNL has established that it would have taken this same action in the absence of the protected activity. In order to make such a showing LLNL could have provided evidence regarding how the Laboratory treated other similarly situated employees. However, there is no evidence establishing how LLNL treated other employees who had performance problems, and how soon after performance problems were identified their performance appraisals were downgraded. Accordingly, I find on the basis of the present record, that LLNL has not clearly and convincing shown that it would have taken this same action in the absence of the complainant's protected disclosures.

The complainant is entitled to relief for this action. Accordingly, LLNL shall remove this performance review from the complainant's file.

7/ (...continued)
employee protection program. However, on September 23, 1994, LLNL did agree to comply with the provisions of Part 708. Accordingly, beginning on that date, any LLNL reprisals for protected activities or disclosures would violate Part 708. Therefore, even though the May 1994 complaint was dismissed for lack of jurisdiction, any retaliation by LLNL for the protected activity of filing a Part 708 complaint would be a violation of the regulations as of September 23, 1994. See 10 C.F.R. § 708.5(b).

2. Reassignment of the Complainant to the Apprentice Program

The Hearing Officer found that since Vergino had no knowledge of the protected disclosures, the complainant had not established that her disclosures regarding the NPEPC were a contributing factor to LLNL's decision to reassign her to the LLNL's Apprentice Program on September 23, 1994. Since, as discussed above, I find that Vergino did have imputed knowledge of the protected disclosures, and the reassignment came only four months after the complainant filed her first Part 708 complaint, I have concluded that the complainant has made a showing that the protected disclosures/activity were a contributing factor to the reassignment. However, I agree with the Hearing Officer's determination that LLNL has convincingly shown that it would have reassigned her to the Apprentice Program in the absence of the protected disclosures.

3. Assignment of the Complainant to Building 415 and Termination

The IAD cites Barry Goldman, Linda Dibble, and Eileen Vergino as among the LLNL personnel involved in the decision to assign the complainant to Building 415 and ultimately terminate her. Nevertheless, the IAD concludes that none of the LLNL personnel involved had any knowledge of those disclosures, and therefore finds no contributing factor has been established by the complainant. However, as discussed above, Ms. Vergino did have imputed knowledge of the protected disclosures/activity. The IAD indicates that Linda Dibble was hired by Ms. Vergino to handle personnel issues in the education program, and that within two weeks of being hired, Vergino asked for Dibble's assistance in dealing with the complainant. Goldman also had meetings with Dibble regarding the complainant. Tr. at 789, 796. These interchanges all occurred within the months before the move to Building 415. Thus, applying the principles enunciated above regarding imputed knowledge of the protected disclosures and time nexus, I find that there is an adequate demonstration that the protected disclosures were a contributing factor to the aforementioned alleged retaliations.

Nevertheless, I am in complete agreement with the IAD that LLNL has clearly and convincingly shown that even in the absence of the protected disclosures, the Education Program would have been moved to Building 415, and the complainant would have been assigned to work in that building. I further agree with the IAD that LLNL has clearly and convincingly shown that ultimately the complainant was terminated because she was unable to work in the building. Accordingly, I see no reason to disturb the IAD on these issues.

V. CONCLUSION

As indicated by the above discussion, with the exception of the less than satisfactory performance appraisal, the instant appeal is denied and the IAD is affirmed. In addition to the removal of the appraisal from her personnel file, Benson is entitled to attorney fees and costs in this case. 10 C.F.R. §708.36(a)(4).

It Is Therefore Ordered That:

(1) The Appeal filed by Janet K. Benson on June 10, 2002 (Case No. VBA-0082), of the Initial Agency Decision issued on May 22, 2002, is hereby granted as set forth below.

(2) Within 30 days of the date that it receives notice of this determination, LLNL shall remove the September 1994 "less than satisfactory" performance appraisal from Benson's personnel file. LLNL shall file a certification with Benson's attorney and the OHA that this action has been taken.

(3) LLNL shall compensate Benson for the costs and expenses incurred in this proceeding. Within 30 days of the date she receives notice of this determination, Benson's attorney shall submit a detailed statement showing her costs and fees and justification therefor. The statement shall be served on the attorney for LLNL.

(4) LLNL shall be permitted to submit comments on the statement of costs and fees. The comments shall be due 10 days after receipt of the statement.

(5) This appeal decision shall become a final agency decision unless a party files a petition for Secretarial review with the Office of Hearings and Appeals within 30 days after receiving this decision.

October 16, 2006

DECISION AND ORDER
OF THE DEPARTMENT OF ENERGY

Appeal

Name of Petitioner: S.R. Davis

Date of Filing: May 19, 2004

Case Number: VBA-0083

This Decision considers an Appeal of an Initial Agency Decision (IAD) issued on April 21, 2004, involving a complaint filed by S.R. Davis (also referred to as the Complainant) under the Department of Energy (DOE) Contractor Employee Protection Program, 10 C.F.R. Part 708. In her Complaint, the Complainant claims that her former employer, Fluor Fernald, Inc. (the Contractor), retaliated against her for engaging in activity that is protected by Part 708. In the IAD, an Office of Hearings and Appeals (OHA) Hearing Officer determined that the Contractor met its burden of demonstrating, by clear and convincing evidence, that it would have taken the same action in the absence of the protected activity. The Complainant appeals that determination. As set forth in this Decision, I have concluded that the determination is correct.

I. Background

A. The DOE Contractor Employee Protection Program

The Department of Energy's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules and regulations; and prevent[] fraud, mismanagement, waste and abuse" at DOE's Government-owned or -leased facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purpose is to encourage contractor employees to disclose information which they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers. Thus, contractors found to have discriminated against an employee for such a disclosure, or participating in a related proceeding, will be directed by the DOE to provide relief to the complainant.

The DOE Contractor Employee Protection Program regulations establish administrative procedures for the processing of complaints. Under these regulations, review of an Initial Agency Decision, as requested by the Complainant in the present Appeal, is performed by the Director of the Office of Hearings and Appeals (OHA). 10 C.F.R. § 708.32.

B. History of the Complaint Proceeding and General Background

The events leading to the filing of the Complaint are fully set forth in the IAD. *S. R. Davis* (Case No. VBH-0083), 28 DOE ¶ 87,044 (2004) (hereinafter IAD). For the purposes of the instant appeal, the relevant facts are as follows.

The Complainant worked in the Contractor's Information Management (IM) department. In June 2001, the Complainant filed a Complaint under Part 708, alleging that she made protected disclosures and that the Contractor retaliated against her by issuing her two disciplinary actions and transferring her to a different job. In June 2002, the local employee concerns office referred the matter to OHA for an investigation and hearing, and the OHA Director appointed an investigator (the Investigator). However, in July 2003, as the Investigator was preparing his report, the Contractor terminated the Complainant as part of an involuntary separation program.

After completion of an investigation pursuant to 10 C.F.R. § 708.22, the Complainant requested and received a hearing on this matter before an Office of Hearings and Appeals (OHA) Hearing Officer.[1] Before the hearing, the Hearing Officer tentatively determined that the Complainant had alleged four Part 708 retaliations: the two disciplinary actions, the job transfer, and the involuntary separation.[2] The Hearing Officer also tentatively determined that the Complainant had met her burden with respect to all four of the alleged Part 708 retaliations. Therefore, she limited the hearing to the issue of whether the Contractor would have taken the same actions in the absence of the protected activity.

The hearing lasted four days. The Contractor presented a wide range of witnesses which included the Complainant's management chain, human resources (HR) and employee relations officials and staff, and various co-workers. Likewise, the Complainant's counsel presented witnesses, including a co-worker and a worker in another department, to testify about the Complainant's performance and conduct. The Complainant also testified on her own behalf.

After considering the hearing testimony and other relevant evidence, the Hearing Officer issued the IAD that is the subject of the instant appeal.

In order to more fully understand the issues of this appeal it is important to outline the general background. The general background facts in this case are as follows. Due to the planned closure of its Fernald site, the Contractor implemented a series of voluntary and involuntary separation programs, commonly referred to as VSPs and ISPs. As stated earlier, the Complainant worked in the Contractor's Information Management (IM) department. Prior to a June 2003 ISP, the IM department

---

[1] The Complainant requested that the alleged retaliations to be considered in this case include this July 2003 involuntary separation. The Hearing Officer granted this request.

[2] The Complainant objected to this determination, alleging that over the course of her employment she had made protected disclosures that resulted in the Contractor's failure to promote her and that the Contractor's current refusal to correct this situation was itself a retaliation. Before the hearing, the Hearing Officer ruled that these allegations were untimely and were not part of the complaint.

consisted of five managers: the department head and four division managers. Two of the divisions were "network" divisions and two were "programmer" divisions. As part of the July 2003 ISP, the Contractor separated the IM head and a programmer division manager. The Contractor then promoted one of the programmer managers to be department head, thus leaving two divisions - a network division and a programmer division. The remaining network manager is referred to as the Network Manager; the remaining programmer manager is referred to as the Programmer Manager.

From 1998 to June 2001, the Complainant reported to the Network Manager. During this time, the Complainant held the title of "Supervisor Information Management" and was one of three team leaders. However, in late June 2001, the IM department head reassigned the Complainant to the Programmer Manager. The Complainant reported to the Programmer Manager for the next two years, until she was separated in the July 2003 ISP. While reporting to the Programmer Manager, the IM department eliminated the title of "Supervisor Information Management." The seven employees who held that title, including the Complainant, had their title downgraded to "Information Management Analyst III." Another employee's title was downgraded from "Manager Information Management" to "Senior Information Management Analyst." *See* IAD at 89,317.

During the Complainant's tenure with the Network Manager, the Complainant received two disciplinary actions and was transferred to another job. On March 21, 2001, the Complainant received a Written Reminder from the Network Manager which cited her inconsistent work hours, her failure to follow management direction, and her unprofessional communication style. The second action involved a May 31, 2001 "decision-making leave," which cited the Complainant's failure to establish and maintain backups and unprofessional communication style. [3] On June 25, 2001, the Complainant received notice of a job transfer to the Programmer Manager. This notice cited the Programmer Manager's need for the Complainant's skills.

II. The Initial Agency Decision

The IAD sets forth the burdens of proof in cases brought under Part 708. It is the burden of the Complainant under Part 708 to establish by a preponderance of the evidence that he or she engaged in a protected activity, and that the activity was a contributing factor to an alleged retaliation. *See* 10 C.F.R. §§ 708.5 and 29. If the Complainant has met this burden, the burden shifts to the contractor to prove by clear and convincing evidence that it would have taken the same action without the Complainant's disclosure. 10 C.F.R. § 708.29. The IAD considered the application of these elements to this proceeding.

[3] In a "decision-making leave," the Contractor places an employee on administrative leave for the rest of the day so that the employee can make a decision about whether or not the employee wishes to remain employed.

A. Protected Activity and Contributing Factor

Prior to the hearing, the Hearing Officer identified two alleged protected disclosures. The Contractor did not dispute that the Complainant made these disclosures or that they were protected. The Hearing Officer also found that the circumstances permitted a reasonable inference that the disclosures contributed to the alleged actions. She therefore found that the Complainant satisfied her burden of proof with respect to the two disciplinary actions, the job transfer and the involuntary separation.

B. Whether the Contractor Would Have Taken the Same Actions In the Absence of the Protected Activity

The IAD found that the Contractor presented clear and convincing evidence that it would have taken the same actions involving the Complainant in the absence of the protected disclosures. Over the course of her tenure with the Network Manager, the Complainant "had a number of conflicts with subordinates, co-workers, and managers, in which the Complainant made inflammatory and disrespectful statements to, and about, others." IAD at 89,317. The IAD found that the Contractor provided extensive documentary and testimonial evidence to support its actions and further that the Complainant did not cast doubt on the Contractor's strong showing. In the IAD, the Hearing Officer found that the Complainant's testimony was not reliable, particularly that the Complainant's testimony was contradictory and that her version of events conflicted with her contemporaneous e-mails of those events. Moreover, she found, in general, that the Complainant's version of events did not justify her conduct, i.e., failure to take direction from her managers and communicate in a professional manner.

With respect to the first disciplinary action, the March 27, 2001 Written Reminder, the Complainant was cited for "failing to maintain a regular work schedule, failure to follow management direction, and communicating unprofessionally with [her] management and peers." Contractor Ex. 28. Although the Complainant testified that she sometimes had to work after hours or adjust her hours, she also testified that she always notified her supervisor. IAD at 89,322. The IAD found that the record supported the Complainant's position that IM staff members sometimes had to work after hours and were required to notify their supervisor if they wanted to offset their time against their regularly scheduled hours. However, the IAD found that the Complainant abused her flexibility and that the Complainant's managers had objected to her late arrivals. The IAD pointed to evidence that management disapproved of the Complainant's "inconsistent work schedule," and that the Complainant did not maintain a proper work schedule. *Id.* Although the Complainant attributed her conflicts with her managers to the fact that she made disclosures about personnel and managers in the IM department, the IAD found that the evidence in the record was contrary to her claim. The IAD cited as examples: 1) that the Complainant stated her opinion that her supervisors did not have the authority to reverse her decision limiting a subordinate's computer access; 2) the Complainant's failure to follow management direction to restore the subordinate's access; and 3) the Complainant's failure to comply with her managers' requests that she establish and maintain backups. IAD at 89,322, 89,323. Further, the IAD found that the Complainant's communication style was unprofessional and created a tension-filled atmosphere. The IAD cited the Complainant's own e-

mails as examples of her communication style. Finally, with respect to the March 27, 2001 Written Reminder, the IAD concluded that the Contractor demonstrated that there were non-retaliatory reasons for this action.

With regard to the second disciplinary action, the May 31, 2001 decision-making leave, the Complainant was cited by management for her failure to establish and to maintain backups and an "unacceptable communication style" in e-mails to the Network Manager, who was her supervisor at the time. Although the Complainant asserts that she had backups and that she was in the process of complying with a May 24, 2001 request from the Network Manager to train others, the IAD found that the May 31, 2001 decision- making leave was accurately supported. Again, the IAD cited examples of the Complainant's own e-mails as persuasive evidence in the record.

With respect to the third alleged retaliatory action, the job transfer, management cited the Complainant's "withdrawal of her VSP application, the training of individuals to take her place, and the need for the Employee's skills in the Programmer Manager's area" as reasons for the transfer. Contractor Ex. 57. Although, the Complainant argued that other IM employees who rescinded their VSP application were able to stay in the same jobs, the IAD found that the Contractor "had strong reasons for the transfer" and that the facts cited in the transfer letter were accurate in that "there were individuals trained to take the Employee's place and the Programmer Manager had a need for the Employee's skills." IAD at 89,323. The IAD concluded that the Contractor would have transferred the Complainant to a different position in the absence of her protected disclosures and "that the designated position accommodated both the Employee's refusal to be on call and her desire not to work with the Network Manager." *Id*. at 89,324. Finally, the IAD concluded, and the record strongly supports the Contractor's position, that it had non-retaliatory reasons for transferring the Complainant.

Lastly, with respect to the July 2003 Involuntary Separation, the IAD found that it was clear that the Contractor's decision to conduct this involuntary separation was not related to the Complainant, but was rather one of a series of voluntary and involuntary separation programs associated with the upcoming site closure. In addition, "the Contractor's determination that it had an excess number of employees in the IM department had nothing to do with the Employee," nor did the Contractor's decision "to create two groups for IM staff members." *Id*. at 89,325. In regard to this alleged retaliatory action, the Complainant argued that she should have been evaluated according to the network group criteria and that her rating in the programmer group was too low. The IAD analyzed extensive evidence on this matter, first analyzing whether the Complainant was properly evaluated in the programmer group. During the hearing, the Complainant cited notes of manager discussions which recognized that some employees had skills in both the network and the programmer area. She further maintained that she would not have been evaluated in the programmer group if she had not been transferred as a result of her protected activity. The IAD, however, found that the diversity of the Complainant's skills did not affect whether she was evaluated in the network group or in the programmer group, and that the Contractor's treatment of the Complainant was consistent with its treatment of the other IM employees who had been separated. [4]

---

[4] The network group consisted of the staff members in the two network divisions, and the (continued...)

Also, with respect to the July 2003 Involuntary Separation, the IAD analyzed whether the Complainant merited a higher rating in the programmer group. At the hearing, the Programmer Manager testified as to how she assigned the ratings that she did. She explained in detail and provided examples of how she evaluated the employees against certain rating factors and relative to each other. The Hearing Officer believed the Programmer Manager's testimony was highly credible, finding that many of her "comments and examples were corroborated by documents, including e-mails from the Employee and the testimony of others." *Id.* at 89,326. During the course of the hearing, the Complainant objected to her rating by the Programmer Manager, arguing that it was inconsistent with the Complainant's November 2002 performance appraisal and that the written comments on her evaluation underestimated her skills. After the evaluation of extensive testimony on this issue, the IAD concluded that the Complainant's evidence did not cast doubt on the accuracy of her rating and further that the Programmer Manager evaluated the Complainant against the "relevant specified criteria honestly and fairly, notwithstanding the employee's objections." *Id.* at 89,329.

The IAD therefore found clear and convincing evidence existed to show that the Contractor would have taken the same action in the absence of the protected disclosures. In sum, the IAD concluded that the Complainant was not entitled to relief.

III. Analysis

The Complainant filed a statement identifying the issues that she wished the Director of the OHA to review in this appeal phase of the Part 708 proceeding (hereinafter Statement of Issues or Statement). The Contractor filed a Response to the Statement. [5] 10 C.F.R. § 708.33.

After fully reviewing the voluminous record in this case, in light of the arguments raised in the Complainant's Statement of Issues, I find that there is no basis for overturning the result in this case.

A. The March 27 Written Reminder

The Complainant first asserts that the Hearing Officer failed to require the Contractor to show by clear and convincing evidence that it would have issued the March 27, 2001 Written Reminder in the absence of the Complainant's protected disclosures. In this regard, the Complainant argues that "Fluor Fernald provided no clear and convincing evidence that Ms. Davis' work schedule was inappropriate . . . of Ms. Davis's failure to follow management direction and of her insubordinate conduct and that Ms. Davis's communications were inappropriate." Statement at 4-12. In her

---

[4](...continued)
programmer group consisted of the staff members in the two programmer divisions. The Complainant, who was in the programmer division, was evaluated by the manager in this group.

[5] There is no need in the instant case to set out the specifics of the contractor's response, some of which are incorporated into my analysis below.

statement, the Complainant asserts, *inter alia*, that the Hearing Officer "reverses the burden of proof, requiring Ms. Davis to establish her notification of [her supervisor] and selectively using emails that present Flour Fernald's version of Ms. Davis's insubordination, her inappropriate comments and her failure to follow management direction." *Id*. at 3. The Complainant further asserts that the Contractor did not submit any documentation that she failed to notify her manager or that she missed any assignment deadline. Id. at 4.

This assertion is incorrect. In fact, the Complainant misstates the burden of proof. She states that the Contractor provided no clear and convincing evidence that the Complainant's work schedule was inappropriate. However, the Contractor's burden is to prove by clear and convincing evidence that it would have issued the Complainant the March 27th Written Reminder without her protected disclosures. The Hearing Officer correctly evaluated the testimony and other evidence before her and correctly concluded that the Contractor had met its burden with respect to this issue.

With regard to the issue of whether the Complainant properly notified her manager about changes in her work schedule, the Complainant testified that she left notes, voice mails or emails when she intended to alter her work schedule. However, the Hearing Officer took note of the fact that she could not find any of these notifications to offer as evidence during the hearing. In addition, the Complainant argues that the Contractor failed to submit evidence of "similar treatment of similarly situated employees." Statement at 5. The issue, however, is not whether other employees were permitted to adjust their schedules, but whether other employees gave appropriate notification to their supervisors. The Contractor's position, which it asserted during the hearing and on this Appeal in its Response, is that no other employees received similar disciplinary action "because no one else in the department failed to provide the required notifications" to their managers. Further, the Complainant asserts that the Contractor provided no clear and convincing evidence of her failure to follow management direction and of her insubordinate conduct. Statement at 6. She claims that the Hearing Officer ignored pertinent testimony and overlooked the refusal of the Contractor "to follow up on Ms. Davis' very serious complaint that Mr. Arnett [supervisor] had used the Performance Review process as a weapon." Statement at 7. I do not agree with her contention. The Hearing Officer noted this issue in her Decision and decided the appropriate weight she would accord to it. She evaluated a voluminous amount of documents provided by both parties as well as the testimony of various witnesses to arrive at her factual conclusion that the Complainant failed to follow management direction and behaved in an insubordinate manner. The record well supports these Hearing Officer factual determinations. Finally, the Complainant asserts that the Contractor provided no clear and convincing evidence that her communications were inappropriate. Statement at 8. However, the record reflects that the Hearing Officer reviewed numerous e-mail messages, memos and testimonial evidence which led her to conclude, correctly in my view, that the Complainant engaged in unprofessional and inappropriate communications with her managers, subordinates and peers. Again, the wealth of evidence in the record well supports the Hearing Officer's factual determination on this issue.

The record reflects that the Hearing Officer analyzed all the testimony relating to the March 27th Written Reminder, and concluded that the Contractor's testimony relating to the disciplinary action was more persuasive and credible. She also determined that much of the Complainant's evidence not only failed to support but was contrary to her claims. In doing so she was fully engaged in the role

of the Hearing Officer: to listen to the testimony of witnesses, observe their demeanor, and make a judgment as to their credibility in light of the evidence. I see no error in the judgment of the Hearing Officer in reaching her conclusion that the Contractor met its burden on this issue.

B. The Decision-Making Leave

The Complainant next asserts that the Hearing Officer failed to require the Contractor to show by clear and convincing evidence that it would have issued the May 31, 2001 Decision-Making Leave in the absence of her protected disclosures. Statement at 12. According to the record, the circumstances leading up to this disciplinary action began on May 3, 2001 when the Complainant signed an application to participate in a Voluntary Separation Program (VSP) that was being offered by the Contractor. The Complainant requested a separation date of June 29, 2001, although she ultimately withdrew her VSP application. After accepting the Complainant's separation date, the Contractor found it necessary to plan for her departure by seeking to identify other employees to assume the duties she had performed. During the hearing, the Complainant did not dispute the necessity of the Contractor to plan for her departure and the necessary training of other employees. She also understood the importance of her personal participation in the training process. In a May 23, 2001 e-mail message, the Complainant's supervisor specifically directed the Complainant to train another employee in a specific type of Internet security software used by the Contractor. Strict deadlines were imposed on the Complainant due to the limited time remaining before her anticipated separation. The decision-making leave also cited the Complainant's failure to establish and maintain personnel backups. IAD at 89,323. In her Statement, the Complainant generally, asserts as she did during the hearing, that she had personnel backups and that she was in the process of complying with the Network Manager's May 24, 2001 direction to train others. However, the record is to the contrary. It indicates that she had a cavalier and insubordinate attitude about the managerial direction she was receiving. She ultimately did not follow these instructions. *Id.* Moreover, the Complainant sent a number of "inappropriate" and "unprofessional" e-mails in response to her manager's request to provide backups although she denies these e-mails had an unacceptable communication style. Based on her evaluation of the evidence in the record, the Hearing Officer correctly determined that the Contractor had non-retaliatory reasons for issuing the Decision-Making Leave in light of its legitimate need to plan for the Complainant's anticipated separation. Again, I see no error in the judgment of the Hearing Officer in reaching her conclusion that the Contractor met its burden in issuing this disciplinary action to the Complainant.

C. Job Transfer/Change of Duties

Next, the Complainant asserts that the Contractor failed to show by clear and convincing evidence that it would have issued the Complainant's Change of Duties in the absence of her protected disclosures. Specifically, the Complainant argues, *inter alia,* that the Contractor "failed to explain why it selected a reassignment option for Ms. Davis that resulted in a demotion when others where available and requested by Ms. Davis." Statement at 17. In addition, the Complainant asserts that the Contractor failed to justify her reassignment based on immediate need. Finally, the Complainant asserts that the Hearing Officer improperly considered her "refusal to continue managerial on-call" as a basis for the decision to reassign her. She refers to the Contractor's decision to transfer her job, which cited the Complainant's withdrawal of her VSP application, the need to train other individuals to take her place

and the need for the Complainant's skills in the Programmer Manager's area. The Hearing Officer found that "the job transfer was largely the result of the Employee's ongoing conflict with the Network Manager, including her repeated statements that she did not want to report to him, and her stated refusal to work after hours." IAD at 89,323. The record amply supports the fact that there was an ongoing conflict between the Complainant and the Network Manager. The record also supports the Programmer Manager's need for the Complainant's skills. It further indicates that neither the Complainant's pay nor her benefits were reduced as a result of the job transfer. Finally, the record indicates that the Complainant's April 2001 refusal to work after hours prompted the employee relations department head to conclude that the Complainant "should be moved to a job that did not require her to be on call." Id. at 89,324. The record strongly supports the Hearing Officer's conclusion on this issue – that the Contractor would have transferred the Complainant to a different position in the absence of her protected disclosures. I see no Hearing Officer error here.

D. Involuntary Separation

Finally and perhaps most significantly, the Complainant challenges the Hearing Officer's conclusion that the Contractor met its burden with respect to the Involuntary Separation. The Complainant asserts numerous arguments in support of this contention. [6] In asserting these arguments, the Complainant attempts to raise various factual matters in seeking to rebut the findings reached by the Hearing Officer after evaluating voluminous evidence including testimony subject to cross examination. The Complainant's contentions on appeal are not new but were addressed by the Hearing Officer in the IAD. It is well settled that the factual findings of the Hearing Officer are subject to being overturned only if they can be deemed to be clearly erroneous, giving due regard to the trier of fact to weigh evidence and to judge the credibility of witnesses. *Eugene J. Dreger*, 27 DOE ¶ 87,564 at 89,351-52 (2000), *citing Oglesbee v. Westinghouse Hanford Co.*, 25 DOE ¶ 87,501, 89,001 (1995); *O' Laughlin v. Boeing Petroleum Services, Inc*., 24 DOE ¶ 87,513, 89,064 (1995). For the reasons below, I have determined that the Complainant has failed to show that the Hearing Officer's findings were erroneous as a matter of fact or law, and the IAD must therefore be sustained.

At the outset of the hearing, the Hearing Officer found that neither the Contractor's decision to conduct the July 2003 ISP nor the Contractor's determination that it had an excess number of employees in the IM department had anything to do with the Complainant. During the course of the hearing, the Complainant never challenged these findings, but rather challenged the fact that she was evaluated according to the Programmer Group criteria instead of the Network Group criteria. The Hearing

[6] Those arguments include the following: (1) the Contractor failed to explain why the Complainant was not evaluated on a Network Individual Skills Rating Form instead of a Programmer Individual Skills Rating Form; (2) the Contractor failed to explain why none of the Complainant's network skills were considered even though she used them within the prior two years; (3) the Contractor failed to explain why it selected a reassignment for the Complainant to the Programmer Group when a continuing need for the Complainant's skills was not ascertained before the reassignment; (4) the Contractor failed to explain why it did not consider other reassignment options that were favored by the Complainant; and (5) the Contractor failed to explain inconsistencies in the testimony of an [IM Supervisor] as to her knowledge of the Complainant's Part 708 complaint when the supervisor was both a crucial member of the FRT [Function Review Team] and SRT [Senior Management Team].

Officer evaluated extensive documentary evidence and testimony, including evidence on whether the Complainant belonged in the Programmer Group and deserved a higher rating, and concluded (1) that the Contractor had a legitimate business reason for its ISP and (2) that it would have selected the Complainant for the ISP in the absence of her protected disclosures. Again, the Complainant presents no new evidence that indicates that the Hearing Officer's conclusions should be overturned.

In her Statement, the Complainant reasserts an argument she made during the hearing that "(1) Ms. Davis was the only IM employee whose primary job assignment was not within the group to which she reported; and (2) Ms. Davis was the only IM employee to cross over from the Network to the Programmer arena (or the reverse) within the last two years. Application of the two year rule only affected Ms. Davis." Statement at 18-19. The Complainant further asserts that the Contractor "never showed, by clear and convincing evidence, why Ms. Davis was evaluated as a Programmer when her primary assignment was as a Network Analyst." *Id.* at 19. As stated earlier, the record supports the Hearing Officer's finding, that the Complainant was properly evaluated as a member of the Programmer Group based on her primary assignment. I see no clear error. This is not the appropriate forum to conduct new fact-finding.

Further, I find no basis for the Complainant's assertion that she was the only employee affected by application of the "two year rule." According to the record, the "two year rule" relates to an employee's "skills transferability" where employees who have been selected for involuntary separation are eligible to transfer to available positions in other sub-groups "if they have demonstrated current skills for that position." Thus, to be eligible to transfer under this rule, an employee must have had actual experience in the other skill area within the last two years. It was determined and the record supports the fact that the Contractor applied this rule to all employees who were being considered for an ISP, not only the Complainant. Although the Hearing Officer did not discuss this "two year rule" in detail, she found, through her evaluation of the evidence in the record, that the "recognition of diverse skills, either in management discussions or on the evaluation form, did not affect whether an employee was evaluated in the network group or the programmer group." IAD at 89,325.

With respect to the Complainant's assertions that the Contractor failed to consider other reassignment options she favored, failed to explain why it selected a reassignment for the Complainant when a continuing need for the Complainant's skills was not ascertained, and finally that there were inconsistencies in the testimony of an IM Supervisor. The Complainant is wrong again. The Complainant has misstated the Contractor's burden of proof. The Contractor is not required to prove why it did not choose a variety of other possible options for the Complainant instead of the particular action it ultimately took. Rather, the Contractor's burden is to prove by clear and convincing evidence that it would have taken the same action absent the Complainant's protected disclosures. I agree with the Hearing Officer that the Contractor has met its burden here by persuasively demonstrating that it evaluated its employees properly, according to their demonstration of "core skills and the essential job-specific skills for their job classification or sub-classification." Further, I am equally persuaded by the strength of the testimony in the record, and I agree with the Hearing Officer, that the Programmer Manager evaluated the Complainant "against the relevant specified criteria honestly and fairly." IAD at 89,329.

E. Refusal to Consider Job Level/Title Change (Demotion) in Part 708 Complaint

Finally, the Complainant argues that the Contractor demoted her sometime in the mid-1990's and that she did not become aware of this "demotion" until August 2003 when she received the Contractor's personnel and employee relations files from the OHA Investigator in connection with her Part 708 complaint. The Complainant contends that this issue of "job level/title" change is part of the Contractor's "pattern of continuing retaliation against her, and should be considered with the other four retaliations." Statement at 22.

On November 12, 2003, the Hearing Officer issued a letter denying the Complainant's request to include the "job level/title" change as an additional issue to be a subject of the hearing. The Hearing Officer stated that the "mid-nineties job level/title change is beyond the scope of the proceeding." She further stated that the complaint "does not identify the mid-nineties job level/title change, and the investigator did not investigate it." Thus, the Hearing Officer concluded that the request should be denied. She declined to exercise her discretion to include "the alleged retaliation . . . , given its nature and age." Therefore, she ruled that the hearing proceeding was limited to the four alleged retaliations addressed in the IAD. The Part 708 regulations provide that a complaint must be filed by the 90th day after the employee knew, or reasonably should have known of the alleged retaliation in order to be timely. *See* 10 C.F.R. § 708.14(a). Although, as mentioned above, the Complainant asserts that she did not become aware of this alleged retaliation until she received documents from her personnel file in August 2003, there is no evidence in the record to support this assertion. Therefore, I find that the Hearing Officer correctly determined that this allegation, which the Complainant alleged occurred approximately eight years earlier, should not be included in the proceeding based on its untimeliness.

IV. Conclusion

As is evident from the above description of the IAD, this case involves factual issues which are strongly disputed. Ultimately, however, it was the role of the Hearing Officer to make findings of fact based on her assessment of the witnesses and their testimony, as well as the documentary evidence presented during the proceeding. The Hearing Officer did so, and after reviewing the entire record, I find no error. Complainant's attempt to reargue these factual matters is unavailing. As previously stated, there is deference given to the trier of fact to weigh evidence and to judge the credibility of witnesses, and unless the factual findings are deemed clearly erroneous they should not be overturned. In the interest of efficiency, it is inappropriate to relitigate the same matters that came before the Hearing Officer. Again, I see nothing in the Complainant's Statement of Issues that would cause me

to overturn the IAD in this case. Accordingly, the instant appeal should be denied and the IAD affirmed.

It Is Therefore Ordered That:

(1) The Appeal filed by S.R. Davis on May 19, 2004, Case No. VBA-0083, of the Initial Agency Decision issued on April 24, 2004 be and hereby is denied.

(2) This Appeal Decision shall become a Final Agency Decision unless a party files a petition for Secretarial review with the Office of Hearings and Appeals within 30 days after receiving this decision. 10 C.F.R. § 708.35.

George B. Breznay
Director
Office of Hearings and Appeals

Date: October 16, 2006

March 15, 2004
DECISION AND ORDER OF
THE DEPARTMENT OF ENERGY

Appeal

Name of Petitioner: Elaine M. Blakely

Date of Filing: July 9, 2003

Case Number: VBA-0086

This Decision considers an Appeal of an Initial Agency Decision (IAD) issued on June 25, 2003, involving a Complaint filed by Elaine M. Blakely (Blakely or the Complainant) under the Department of Energy (DOE) Contractor Employee Protection Program, 10 C.F.R. Part 708. In her Complaint, Blakely claims that her former employer, DOE contractor Fluor Fernald, Inc. (FFI or the contractor), retaliated against her for engaging in activity that is protected by Part 708. In the IAD, an Office of Hearings and Appeals (OHA) Hearing Officer determined that Blakely engaged in activity that is protected under Part 708, but that FFI showed that it would have taken the same personnel action in the absence of the protected activity. Blakely appeals that determination. As set forth in this decision, I have decided that overall, the determination is correct.

I. Background

A. The DOE Contractor Employee Protection Program

The Department of Energy's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste and abuse" at DOE's Government-owned or -leased facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purpose is to encourage contractor employees to disclose information which they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers. Thus, contractors found to have taken adverse personnel actions against an employee for such a disclosure, will be directed

by the DOE to provide relief to the complainant. See 10 C.F.R. § 708.2 (definition of retaliation).

The DOE Contractor Employee Protection Program regulations establish administrative procedures for the processing of complaints. Under these regulations, review of an Initial Agency Decision, as requested by Blakely in the present Appeal, is performed by the Director of the Office of Hearings and Appeals (OHA). 10 C.F.R. § 708.32.

B. History of the Complaint Proceeding

The events leading to the filing of Benson's Complaint are fully set forth in the IAD. *Elaine M. Blakely* (Case No. VBH-0086), 28 DOE ¶ 87,039 (2003)(*Blakely*). For purposes of the instant appeal, the relevant facts are as follows.

Blakely worked as a general engineer for FFI at the DOE's Fernald, Ohio site. She was terminated by reduction in force (RIF) on April 4, 2002. On April 9, 2002, Blakely filed a Complaint under 10 C.F.R. Part 708 with the Manager of the DOE Ohio Field Office, claiming that she was terminated in retaliation for filing a prior Complaint of Retaliation in February 2001, which was dismissed in March 2002. 1/

After completion of an investigation pursuant to 10 C.F.R. § 708.22, Blakely requested and received a hearing on this matter before an Office of Hearings and Appeals Hearing Officer. The hearing lasted three days. After considering the hearing testimony and other relevant evidence, the Hearing Officer issued the IAD that is the subject of the instant appeal.

II. The Initial Agency Decision

The IAD set forth the burdens of proof in cases brought under Part 708. The IAD stated that it is the burden of the complainant under Part 708 to establish "by a preponderance of the evidence that he or she made a disclosure, participated in a proceeding or refused to participate in an activity as described in § 708.5, and that such act was a contributing factor in one or more alleged acts of retaliation against the employee by the contractor." 10 C.F.R. § 708.29

1/ That dismissal was upheld on appeal in a determination that I issued on April 3, 2002. Case No. VBU-0080.

The IAD further noted that if the employee has met this burden, the burden shifts to the contractor to prove by clear and convincing evidence that it would have taken the same action without the employee's disclosure. 10 C.F.R. § 708.29. The IAD then proceeded to consider the application of these elements to the Blakely proceeding.

A. Protected Disclosures or Protected Activity.

The IAD first considered Blakely's contention that she made a protected disclosure in October 1998, when she submitted a note to the Waste Pits Remedial Action (WPRAP) project manager stating that she could not support him in connection with a review of hazard calculations, and that she would not act contrary to her conscience. The Hearing Officer found that there was nothing in the note that one could reasonably believe revealed a substantial violation of a law, rule or regulation; a substantial and specific danger to employees or to public health or safety; or fraud, gross mismanagement, gross waste of funds or abuse of authority. Thus, the Hearing Officer concluded that the note was not a protected disclosure under Part 708, and that prior to October 2000, Blakely had no other conversations that constituted protected disclosures regarding the WPRAP.

The IAD found that Blakely made several protected disclosures beginning in October 2000. These included a memorandum and a follow up E-mail to FFI management, with copy provided to the DOE Inspector General (IG). The subject of these disclosures was safety concerns regarding the WPRAP.

The IAD also found that Blakely participated in an activity protected under Part 708 when she filed the above-mentioned complaint of retaliation in February 2001. 2/

2/ In that Complaint, Blakely alleged that she was reassigned to a different project in March 1999, after making the alleged protected disclosures in 1998. The complaint, filed in February 2001, was dismissed because it was filed more than 90 days after the alleged retaliation. Section 708.14 provides that complaints must be filed by the 90th day after the date the complainant knew or should have known of the alleged retaliation.

B. Contributing Factor

As the IAD stated, a protected disclosure may be a contributing factor in a personnel action where the official taking the action had actual or constructive knowledge of the disclosure and acted within such a period of time that a reasonable person could conclude the disclosure was a factor in the personnel action. The IAD noted that Blakely was terminated as part of an ongoing process of downsizing at the Fernald site. The IAD further found that neither the overall RIF nor the decision of FFI management to reduce the number of engineer positions by five was motivated by a desire to terminate Blakely. The IAD noted that Shelby Blankenship was Blakely's supervisor at the time of the RIF, and was the official who ranked Blakely for purposes of the RIF. The IAD pointed out that Blakely received the lowest rating of all 23 employees who were ranked in the engineer job category.

The IAD next considered whether Blankenship had actual or constructive knowledge of Blakely's protected activity (filing the Part 708 Complaint in February 2001). In response to the question, as to whether he was aware that Blakely filed a Part 708 complaint with the Department of Energy in February 2001, Blankenship replied "I don't know if I was aware of this in that time frame or not." Transcript of December 10, 2002 Hearing (hereinafter Tr.) at 860. Based on this testimony the IAD indicated that Blakely had not met her burden of proof. The Hearing Officer stated that he could not find that Blankenship was aware of the February 2001 complaint. The IAD determined that Blakely's protected activity could therefore not have been a contributing factor to her low rating in the RIF process.

In my view, this determination was not well founded. After reviewing the record, and based on my knowledge of how DOE contractor workplaces function, I believe that Blakely's participation as a complainant in a Part 708 proceeding that lasted for approximately 13 months is in and of itself sufficient to permit a finding that it was a contributing factor in her termination, which took place within a matter of days after that initial Part 708 proceeding was concluded. I believe it is appropriate to impute knowledge of this earlier Part 708 proceeding to Blankenship, given the fact that he did not deny that he knew about it after being given the opportunity. Tr. at 860. Moreover, other FFI management officials were aware of the filing of the

complaint. 3/ See, *Jagdish Laul* (Case No. VBA-0010), 28 DOE ¶ 87,011 (March 9, 2001). However, as indicated below, this error does not affect the overall outcome of this case.

The IAD also found that Blankenship became aware of Blakely's complaints to the DOE/IG in either December 2000 or January 2001, shortly after he became her supervisor. Blankenship filled out Blakely's RIF form approximately 13 months later. The IAD concluded that this period is not sufficiently short to infer a connection between the protected activity (filing a complaint with the IG) and the adverse personnel action. The IAD also found that Blakely presented no other evidence to support a conclusion that her disclosures to the DOE/IG were a contributing factor to her termination.

C. Whether FFI would have terminated Blakely absent the Protected Activities

Even though the IAD found that Blakely had not shown by a preponderance of evidence that her protected disclosure and protected activity were a contributing factor to her termination, the Hearing Officer nevertheless went on to consider whether FFI showed by clear and convincing evidence that it would have "riffed" Blakely absent the protected activity. Overall, the Hearing Officer was convinced by Blankenship's testimony that the low rating he gave to Blakely in the RIF process was based on his judgment that she was relatively unproductive, needed too much supervision and tended to be argumentative. The IAD therefore found clear and convincing evidence that Blakely would have been terminated whether or not she engaged in protected activity under Part 708.

In sum, the IAD concluded that Blakely was not entitled to relief.

III. The Blakely Statement of Issues and the FFI Response

Blakely filed a statement identifying the issues that she wished the Director of the Office of Hearings and Appeals to review in this

---

3/ Dennis Carr and Robert Nichols deny that Blakely's filing of the complaint played a role in the termination, but do not deny knowing about it. Tr. at 404-05, 505. Blankenship testified that prior to Blakely's beginning to work for him, he had heard that she was difficult to work with. Tr. at 909.

appeal phase of the Part 708 proceeding (hereinafter Statement of Issues or Statement). FFI filed a Response to the Statement. 10 C.F.R. § 708.33.

A. Statement of Issues

1. The Statement first maintains that other FFI officials besides Blankenship were involved in the decision process that led to Blakely's termination. In particular, the Statement cites Dennis Carr, FFI Executive Vice President and Senior Director of Projects, as one member of a management team that reviewed the employee rankings and decided which employees from the list would be laid off. Tr. at 404. The Statement also points out that Carr knew about Blakely's 2001 Part 708 complaint, because he said he did not take this into account in the termination decision. *Id.*

2. The Statement then claims that the IAD erred in finding that Blankenship had no knowledge of Blakely's 2001 Part 708 complaint. The Statement cites Blankenship's testimony that he did not know of the Complaint in the February 2001 "time frame," and then points out that Blankenship never denied knowing about the complaint at a later time. The Statement argues that it should be deemed admitted that Blankenship knew of the 2001 complaint at the time of the RIF.

3. The Statement contends that the Hearing Officer incorrectly determined that the time between Blankenship's knowledge of Blakely's protected disclosures and the RIF action was too long to establish a causal connection. In this regard, the Statement claims that from time to time, Blakely reminded Blankenship about her DOE/IG and Part 708 complaints. The Statement also points out that since Blankenship learned of the 2001 Part 708 complaint sometime after it was actually filed, less than 13 months elapsed from the time he learned of it to the time that Blakely was terminated.

4. Citing some purported inconsistencies in the RIF ratings process, the Statement maintains that overall Blakely has proven by a preponderance of evidence that her protected activities were a contributing factor in her termination.

5. The Statement argues that the Hearing Officer erred in concluding that FFI had proved by clear and convincing evidence that it would have terminated Blakely in the absence of the protected disclosures. In support of this contention the Statement contends that the Hearing Officer incorrectly placed the burden of proof on Blakely to show that FFI would have terminated her absent the disclosures, whereas, under the regulations this burden lies with

FFI. The Statement cites to portions of the hearing transcript in which the Hearing Officer spoke to Blakely about the necessary showing. For example, the Statement cites the Hearing Officer's statement "the question is whether [Blankenship] would have reached the same conclusions absent the protected activity." Tr. at 934. *See also* Tr. at 934, 935, 936. The Statement concludes from this assertion and other similar assertions by the Hearing Officer that he improperly shifted the burden from FFI to Blakely to establish by clear and convincing evidence that she would have been terminated in the absence of her protected disclosures.

6. The Statement also maintains that there are inconsistencies and unexplained gaps in the RIF and other ratings data provided by FFI. The alleged anomalies include incorrect translation of the employee ratings from the individual employee rating form (IERF) to the overall employee comparison document (the Functional Ranking Report or FRR). The Statement cites as unfair the fact that the FRR does not include the names of any of the engineers to whom Blakely was compared, thus depriving her of the opportunity to cross-examine the decision makers about the ratings of these other employees. The Statement contends that there were "unacceptable" blanks in some of the comment fields in the FRR. Tr. at 506. The Statement also points out employees who were rated as weak in some areas, but who overall received a higher rating that Blakely. The Statement appears to argue that these anomalies and inconsistences establish that FFI has not shown by clear and convincing evidence that Blakely would have been terminated absent the protected disclosures.

B. FFI's Response

1. In response to the Statement's assertion that the Hearing Officer erred in determining that Shelby Blankenship was the official taking the action in connection with the Blakely RIF, FFI admits that other FFI officials had input into the RIF process. However, the FFI Response contends that Blankenship's role was the critical one in the selection of Blakely for termination.

2. The Response contends that Blankenship's testimony indicated that he did not know when he became aware of Blakely's 2001 Part 708 Complaint. The Response argues that since it was Blakely's burden to establish that Blankenship knew of the protected activity when he terminated her, Blakely has not met her burden with respect to the contributing factor showing.

3. The Response agrees with the IAD's conclusion that the 13 month period between the time that Blankenship learned of the DOE/IG

communication and the RIF is too long to establish a causal connection between the protected activity and the adverse personnel action.

4. The Response supports the overall conclusion in the IAD that Blakely failed to show that her protected activities were a contributing factor to her termination.

5. The Response maintains that the IAD correctly found that FFI would have riffed Blakely in the absence of her protected disclosures/activity.

IV. Analysis

As is evident from the above description of the filings in this case, the arguments are numerous, complex and involve some complicated factual contentions. However, after fully reviewing the voluminous record in this case, as well as the arguments raised in the Statement of Issues, I find that there is no basis for overturning the result in this case. As previously discussed, I believe that the complainant has shown that filing the prior Part 708 complaint was a contributing factor to her termination by FFI. However, as indicated below, I find that FFI has established by clear and convincing evidence that it would have terminated Blakely absent the protected activity.

The Statement argues that during the hearing, the Hearing Officer incorrectly placed the burden of proof on Blakely to show that FFI would have terminated her absent the disclosures. The Response cited several portions of the transcript for this proposition. Tr. at 932-37. As an initial matter, the argument that Blakely could or would be expected to make such a showing is illogical in the context of Part 708. It should thus be summarily dismissed as non-sensical. Nevertheless, in order to be completely fair to Blakely, I have reviewed the citations referred to in the Statement, and can find no indication that the Hearing Officer in any way improperly assigned the burden of proof.

The interchange cited by the Statement took place during the examination of Blankenship. As the Statement pointed out, the Hearing Officer made the following statements to Blakely: ". . . it's really to determine what influence your protected activities had on these conclusions,. . . whether [Blankenship] would have reached the same conclusions absent the protected activity." Tr. at 934. The Hearing Officer also stated "I want to know whether

[Blankenship] was improperly influenced by your protected activity in reach that conclusion." Tr. at 936.

In the cited portions the Hearing Officer was simply reviewing in plain language for Blakely's benefit the type of information he thought should be educed during the examination of Blankenship. I see no evidence whatsoever that the Hearing Officer was attempting to place the burden of this showing on Blakely. In fact, the Hearing Officer prefaced this discussion with Blakely with the following statement: "assuming that you can show that your disclosures were somehow a contributing factor to anything Mr. Blankenship did with respect to you, then Fluor Fernald would have to show that he would have done the same thing whether.. . you had made protected disclosures or engaged in protected activity or not." Tr. at 931-32. Thus, it is clear that the Hearing Officer understood the burdens of proof in this case. There is simply no evidence that the Hearing Officer incorrectly apportioned the burden of proof on this issue.

The Statement also maintains that there are inconsistencies and unexplained gaps in the RIF and other ratings data provided by FFI. The Statement argues that when these deficiencies are taken into account, FFI will not have met its burden of proof.

The Statement first points out that Blankenship's ratings of Blakely in her annual performance assessment (PA) dated January 15, 2002, were inconsistent with his rating of her for the RIF (Individual Employee Rating Form or IERF), which took place only one month later, on February 19, 2002. As an example, the Statement indicates that in the PA, Blankenship rated Blakely as "meets expectations" in the "Initiative" category, but in the IERF, he rated her in that same category as "occasionally fails to meet standards and expectations." The Statement claims the same inconsistency for the "Quality of Work," "Technical Knowledge," and "Communication Skills" categories.

After reviewing the hearing testimony on this very point, I find no inconsistency. The PA and the IERF are different. As FFI Program Director of Administration Paul Mohr explained, the performance assessment process looks at an employee's performance over the past 12 months and the rating serves as a point of discussion between the employee and supervisor on areas of improvement and employee strengths. This rating does not compare employees. However, in performing ratings for the involuntary separation process (RIF), the focus is quite different. In the RIF process the rating official will assess the types of work that will need to be performed in the

future, and how a particular employee's skills fit into future skill mix requirements in comparison to other employees. Thus, the two ratings can be different for the same employee for the same period. Tr. at 666-73.

Darlene Gill, who was FFI Human Resources Manager for Workforce Restructuring during 2001, also testified on this point. She stated that the skills assessment for the RIF was designed to evaluate behavior and skills necessary for closure and completing the Fluor Fernald/DOE project. She indicated that workforce restructuring is "looking at behaviors that are needed today, or that will be needed to help meet the goal [of] closure." On other hand, she stated that "performance assessments are looking at behaviors that happened for the past year performance and [on] evaluating goals, behaviors of the work that was done." Tr. at 683.

Based on this testimony, I find there was a clear and convincing reason for the different ratings of Blakely in the PA and IERF.

The Statement argues that there may have been some transcription errors in transferring ratings from the IERF to the Functional Ranking Report (FRR). The Statement argues that Blakely's rating in particular was inaccurately transcribed as 2.15 instead of 2.35. The Statement speculates that other ratings may have also been inaccurately transcribed. The Statement suggests that it is possible that Blakely was not among the lowest ranked employees, and should therefore not have been terminated. 4/

As an initial matter, the Statement does not provide any calculation that would allow me to evaluate that assertion. On the other hand, the FFI Response has laid out a fully documented calculation that indicates that the 2.15 rating was correct. FFI Response at 17.

In any event, the assertion that there may have been errors in the transcription of the scores of other employees is merely speculative, and I will not reopen the record at the point in the proceeding to test that possibility. In this regard, I note that the focus of our efforts here is to insure that an employee was not unfairly treated as a result of protected activity. These claims

---

4/ Even at the 2.35 rating level, Blakely was still the lowest ranked of all employees on the relevant FRR. FFI Exh. J. Thus, in order for Blakely not to be among those terminated, there would have to be errors committed with respect to rankings of other employees.

of unintentional error fall more within the purview of an employer's human resources operation. It is not the purpose of the Part 708 process to investigate and correct mathematical errors, transcription mistakes or other unintentional errors that appear unrelated to a retaliation against an employee for a protected disclosure/activity. Based on the record, there is no reason to believe that even if there were any errors, they were committed intentionally to insure the termination of Blakely.

The Statement then raises the possibility of overall discrepancies and inconsistencies in the Functional Rating Report. The FRR was entered into the record without identifying by name the individual employees who were rated and ranked, except for Blakely. The Statement questions the fairness and accuracy of the rankings of these other unidentified employees. The Statement points out that whether Blakely should have been retained instead of other employees cannot be fairly considered without knowing the identities of each rated employee and his qualifications.

It is true that Blakely's ability to challenge the ratings of FRR is limited by the fact that the names of the other employees are deleted from this material. Usually this information is deleted in order to protect these other employees from an unwarranted invasion of their privacy. However, this information could have been provided to Blakely under a protective order. If Blakely wished to probe the accuracy and fairness of the FFI ratings of other employees, she should have asked for an un-deleted version of this material prior to the hearing. There is no evidence that she ever made a request for this information. At this stage of the proceeding, it is far too late to reopen the record on this point. Accordingly, I will not give her assertions on this issue further consideration.

The Statement also mentions that Blankenship performed a "skills assessment" for Blakely, but did not perform one for another engineer, "John McCoy." 5/ The Statement speculates that the failure to perform this assessment for this employee may have allowed him to be retained instead of Blakely. FFI explains that this employee was not assigned to a group that fell into a declining category and therefore no skills assessment for him was necessary. Statement at 19. In this regard, Blankenship testified that he "only had one person in the engineer category that was shrinking." Tr. at 852. I therefore find this objection to be without merit.

5/ The correct surname of this employee is McCloy.

The Statement also raises a series of anomalies and discrepancies in the FFR. These include, for example, that a "comment area" on the FRR with respect to Blakely was left blank, in spite of the fact that it was allegedly unacceptable to leave blank any comment areas on the FRR. I am not persuaded by this argument. Overall, a RIF tends to be a long and complicated process, during which there may well be some inconsistencies and anomalies. This fact alone, an area left blank, does not mean that the RIF was unfair, or that it was performed in such a way as to target or eliminate a particular employee. In this case I see no reason to believe, nor has the Statement shown, that a minor deviation, such as failing to fill in all the blanks, suggests an error in the Hearing Officer's determination that there is clear and convincing evidence that the contractor would have riffed the complainant in the absence of the protected disclosure/activity.

Finally, the Statement alleges that FFI had a policy of reviewing lay-off candidates to see if there were any company job openings in which these employees could be placed. The Statement argues that FFI did not present evidence regarding whether this failure to place Blakely in another position was part of a retaliation effort. The FFI response included an affidavit from Ms. Gill to the effect that Blakely did not qualify for any of the open positions. I am inclined to accept that assertion. In any event, Blakely should have pursued this issue at the hearing if she believed that the failure to place her in another position was part of the firm's effort to terminate her because of her protected activities. The fact that FFI did not find her another job does not in and of itself mean that the firm has failed to meet its burden of proof. Thus, overall, the Statement has simply not raised any issues that even suggest that the Hearing Officer's determination regarding the contractor's clear and convincing showing was incorrect.

Further, from my review of the record as a whole, I believe that the Hearing Officer's determination regarding FFI's showing was well-founded. With respect to the clear and convincing showing, he based his determination largely on Blankenship's assessment that Blakely was relatively unproductive, needed too much supervision and tended to be argumentative. These were first hand opinions derived from working directly with Blakely, and were the basis for his low rating of her on the IERF. The IAD cited hearing testimony from Blankenship explaining and supporting his judgment that Blakely was argumentative, unproductive and needed excessive supervision. IAD at 17-19. I will not revisit the Hearing Officer's findings of fact on this issue. I believe that they are adequately supported. In fact, I note other testimony in the record suggesting that at least

one other FFI manager found Blakely difficult to work with. Mark Cherry, FFI project manager for the WPRAP, testified that he worked with Blakely beginning in January 2000. Tr. at 170. Cherry testified that he found Blakely "very difficult" to work with. Tr. at 188. He stated that she refused to accept closure of issues. Tr. at 202. He indicated that Blakely was seeking "an admission of guilt on somebody's part and on saying you [i.e. Blakely] were absolutely right." Tr. at 203. There is some testimony in the record from other witnesses who stated that they did not have problems working with Blakely. However, these same witnesses also indicated that they did not have any significant interaction with her. *E.g.*, Tr. at 230, 235, 243. Thus, these witnesses do not lend meaningful support to Blakely's position that Blankenship judged her unfairly. 6/

In sum, I am convinced that there was sufficient evidence in the record in this case to support the hearing officer's conclusion that FFI clearly and convincingly established that it would have terminated Blakely absent her protected activity.

V. CONCLUSION

As discussed above, I see nothing in the Blakely Statement of Issues that would cause me to overturn the IAD in this case. Accordingly, the instant appeal should be denied and the IAD affirmed.

It Is Therefore Ordered That:

(1) The Appeal filed by Elaine Blakely on July 9, 2003 (Case No. VBA-0086), of the Initial Agency Decision issued on June 25, 2003, be and hereby is denied.

6/ Another witness who found her to be competent and was satisfied with her performance, nevertheless thought her manner could be "abrasive" and "irritating." Tr. at 756. Overall, I believe this testimony tends to support Blankenship's assessment.

(2) This Appeal Decision shall become a Final Agency Decision unless a party files a petition for Secretarial review with the Office of Hearings and Appeals within 30 days after receiving this decision. 10 C.F.R. § 708.35.

Re: OHA Case No. VBB-0005

Dear Mr. Dwyer:

This letter concerns the complaint of reprisal that you submitted to the Department of Energy under 10 C.F.R. Part 708. You have filed a petition for Secretarial review of the appeal decision issued to you on July 24, 2000.

The Part 708 regulations applicable to the petition provide that the Secretary will reverse or revise an appeal decision by the Director of the Office of Hearings and Appeals only under extraordinary circumstances. 10 C.F.R. § 708.35(d). After fully evaluating all the issues that you raised in your filing dated September 8, 2000, I have determined that you have not shown that extraordinary circumstances warranting Secretarial review exist in this case. No modification to the appeal decision by the OHA Director is therefore warranted. Accordingly, the petition for Secretarial review is hereby dismissed, and the appeal decision I issued to you on July 24, 2000, constitutes the final agency decision on your complaint.

If you have any questions regarding this letter, please call Virginia Lipton at telephone number (202) 426-1436.

Sincerely,

George B. Breznay
Director
Office of Hearings and Appeals

Re: OHA Case No. VBB-0010

Dear Mr. Powell:

This letter concerns the complaint of reprisal submitted by Dr. Jagdish Laul to the Department of Energy under 10 C.F.R. Part 708. You have filed a petition for Secretarial review of the appeal decision issued in that case on March 9, 2001. You submitted a Statement of Issues to be reviewed (Statement) on June 11, 2001. On July 10, 2001, Ms. Alene Anderson submitted a Response to your Statement on behalf of Dr. Laul.

The Part 708 regulations applicable to the petition provide that the Secretary will reverse or revise an appeal decision by the Director of the Office of Hearings and Appeals only under extraordinary circumstances. 10 C.F.R. § 708.35(d). As discussed below, you have not shown that extraordinary circumstances warranting Secretarial review exist in this case.

Dr. Laul filed a Complaint alleging that his employer, Excalibur Associates, Inc. (Excalibur), a subcontractor of Kaiser-Hill Company, the DOE's M&O contractor at its Rocky Flats Field Office, retaliated against him for participating in an activity protected under Part 708. The retaliations took the form of four adverse personnel actions: (i) reducing Dr. Laul's authority, (ii) reducing the work available for Dr. Laul by entering into a subcontract with another firm, (iii) rating Dr. Laul the lowest of all 12 Excalibur employees, and (iv) discharging him. In a September 1, 2000 Initial Agency Decision (IAD), an Office of Hearings and Appeals Hearing Officer determined that Dr. Laul had established that his Part 708 protected activity was a contributing factor to the Excalibur adverse personnel actions, and that Excalibur did not show by clear and convincing evidence that it would have taken these same adverse actions in the absence of the protected activity.

In determining that the protected activity was a contributing factor to the Excalibur retaliations, the IAD found that it was appropriate to impute constructive knowledge of the protected

activity to Excalibur, even though Excalibur management had no direct knowledge of that activity. That determination was based on the following findings. First, the protected activity was directly known to Kaiser-Hill. In this regard, the Hearing Officer determined that a number of Kaiser-Hill management employees were aware of Dr. Laul's protected activity and made adverse comments about the activity and about Dr. Laul, himself. These "directly knowledgeable" employees worked closely with other Kaiser-Hill managers who were members of the Hazardous Assessment Committee (HAC Managers). Further, one HAC manager was a subordinate of a Kaiser-Hill employee who made specific negative comments about Dr. Laul's whistleblower activities. The HAC manager group was responsible for providing Excalibur with the negative ratings that led to the adverse personnel actions and ultimately to Dr. Laul's discharge.

Thus, the IAD found a two-part linkage from Kaiser-Hill knowledgeable employees through Kaiser-Hill HAC managers to Excalibur managers, in determining that Excalibur improperly terminated Dr. Laul. The linkage involved evidence that Kaiser-Hill knowledgeable employees held negative views of Dr. Laul's protected activity, and evidence that these employees had close contact with other Kaiser-Hill employees, who in turn gave negative reviews of Dr. Laul to Excalibur. The IAD found by a preponderance of evidence that Kaiser-Hill knowledgeable employees provided tainted, negative views of Dr. Laul to other Kaiser Hill employees who dealt directly with Excalibur. I affirmed the IAD in the appeal decision issued on March 9, 2001. Jagdish C. Laul, 28 DOE ¶ 87,011 (2001).

In your Statement of Issues you object to the finding of contributing factor and imputed knowledge through this two-part linkage from the directly knowledgeable Kaiser-Hill management employees via the Kaiser-Hill HAC managers to Excalibur management. In this regard, you contend that the Hearing Officer did not have a sufficient basis for concluding that the knowledgeable Kaiser-Hill employees offered negative opinions about Dr. Laul to Kaiser-Hill HAC managers, and that these negative reviews were then communicated to Excalibur employees.

In essence, then, the objections you raise relate to the credibility and weight that the Hearing Officer gave to the witnesses' testimony and to other evidence regarding Kaiser-Hill employees' negative assessments of Dr. Laul. These are matters clearly within the province of the Hearing Officer, who presided at the hearing and heard all the testimony. You have set forth no

reasonable basis for overturning any of those findings. The objections you raise indicate a simple disagreement with the Hearing Officer's conclusions regarding the credibility of witnesses and the weight assigned to their testimony.

In fact, the record clearly establishes that the Hearing Officer had a substantial basis for his findings. The Hearing Officer specifically referred to the remarks and conduct that he found demonstrated that Excalibur managers were ultimately tainted by negative opinions about Dr. Laul, which were initially communicated by Kaiser-Hill knowledgeable employees. E.g., Jagdish C. Laul, 28 DOE ¶ 87,006 at 89,051-53 (2000). In sum, your objection regarding the weight assigned to the evidence in this case suggests no extraordinary circumstances that merit review by the Secretary.

The other objection you raise concerns a purported unfairness in holding Excalibur fully responsible for providing a monetary remedy to Dr. Laul. In this regard, you state that Excalibur was not aware of Dr. Laul's protected activity, and that it is unfair to hold the firm wholly liable under these circumstances. You further note that Kaiser-Hill has never been a party to this proceeding, thereby implying that Kaiser-Hill should be held responsible for the remedy here. These assertions do not rise to the level of extraordinary circumstances warranting review by the Secretary. The Excalibur firm did not accept the offer by the Hearing Officer to join Kaiser-Hill in this proceeding. March 15, 2000 Letter from Thomas L. Wieker, Hearing Officer, to David Zwisler, Attorney for Excalibur. While Excalibur objects to its sole liability for the remedy here, this result came about through its own decision not to join Kaiser-Hill. Insofar as Excalibur was the employer that retaliated against the employee based upon his protected activity, as found by the Hearing Officer, Excalibur is properly held liable. Adopting the position Excalibur advocates would leave the employee without a remedy.

Accordingly, the petition for Secretarial review is hereby dismissed, and the appeal decision issued to you on March 9, 2001, constitutes the final agency decision on your complaint.

Re: OHA Case No. VBB-0037

Dear Mr. Roybal:

This letter concerns the complaint of retaliation that you submitted to the Department of Energy under 10 C.F.R. Part 708. You have filed a petition for Secretarial review of the appeal decision issued to you on June 14, 2001. That decision dismissed your complaint of retaliation on the grounds that your complaint has been substantially resolved, and you have already received a remedy that is at least equivalent to what you could have received under the Part 708 regulations. 10 C.F.R. § 708.17(c)(5) and (6).

The Part 708 regulations applicable to your petition provide that the Secretary will reverse or revise an appeal decision by the Director of the Office of Hearings and Appeals only under extraordinary circumstances. 10 C.F.R. § 708.19(d). After fully evaluating all the issues that you raised in your filing dated July 12, 2001, I have determined that you have not shown that extraordinary circumstances warranting Secretarial review exist in this case. No modification to the appeal decision is therefore warranted. Accordingly, the petition for Secretarial review is hereby dismissed, and the appeal decision I issued to you on June 14, 2001, constitutes the final agency decision on your complaint.

If you have any questions regarding this letter, please call Thomas Wieker at telephone number (202) 287-1543.

Re: Case No. VBB-0047

Dear Mr. Jontz and Ms. Matthews:

This letter concerns Edward Seawalt's Part 708 complaint against Contract Associates, Inc. Pursuant to the parties' request, the complaint was dismissed on December 4, 2000. Accordingly, the related petition for Secretarial review (Case No. VBB-0047) is hereby dismissed.

If you have any questions regarding this letter, please contact Janet N. Freimuth at (202) 287-1439.

Sincerely,

Thomas L. Wieker

Re: Case No. VBB-0061

Dear Mr. Hall and Mr. Cowan:

This letter concerns the Complaint of Retaliation filed with the Department of Energy (DOE) by Mr. Cowan (Complainant) under 10 C.F.R. Part 708. Mr. Cowan filed a Petition for Secretarial Review of a February 27, 2003 appeal decision issued by the Director of the Office of Hearings and Appeals (OHA) in connection with this proceeding. Mr. Hall also filed a Petition for Secretarial Review of the February 27 Decision. That Petition was filed on behalf of Argonne National Laboratory-West (ANL). Under the Part 708 regulations, the Secretary will reverse or revise an appeal decision by the Director of OHA only in extraordinary circumstances. 10 C.F.R. § 708.35(d). As discussed below, neither Petitioner has met the regulatory standard.

The ANL Petition for Review raises four matters. First, it objects to a finding that Complainant's whistleblowing activity was a contributing factor to ANL's three-day suspension of the Complainant ten months later. Second, ANL argues that the Complainant did not make a disclosure that qualifies for protection under Part 708. Third, ANL contests a conclusion by an OHA Hearing Officer that ANL did not present clear and convincing evidence that, in the absence of the Complainant's Part 708 protected activity, ANL would have suspended the Complainant for improper use of ANL E-mail. Finally, ANL contends that my conclusion in the February 27 determination that the Complainant's reinstatement to his former position was not a workable remedy was inconsistent with my finding that the transfer of the Complainant away from his former position was retaliatory.

In his Petition for Review, the Complainant takes issue with my finding that his own actions contributed to the negative attitude of the ANL managers who did not want him back in his former position. The Complainant also objects to my finding that he refused to cooperate with those investigating his allegations of criminal sabotage.

None of these arguments establishes a basis for Secretarial Review. ANL's first two arguments contest the application of legal principles well-established in this and other OHA proceedings and in the federal courts. ANL's other arguments, as well as the issues the Complainant raises, are wholly fact-bound objections that merely seek to reargue determinations with which each party disagrees. The arguments raised present nothing of an extraordinary nature.

The Deputy Secretary of Energy has reviewed the ANL and Cowan Petitions and concurs with the above determinations. He has authorized me to send you this letter dismissing the Petitions for Review for failure to demonstrate extraordinary circumstances.

If you have questions concerning this matter, please call Thomas L. Wieker, Deputy Director, OHA, at (202) 287-1543.

Sincerely,

George B. Breznay
Director
Office of Hearings and Appeals

Re: OHA Case No. VBB-0077

Dear Mr. Timm:

This letter concerns the complaint of retaliation that you submitted to the Department of Energy (DOE) under 10 C.F.R. Part 708. Your complaint involves alleged retaliation against your firm by the DOE for your disclosures involving safety concerns. On September 10, 2001, the Employee Concerns Manager at the DOE Albuquerque Operations Office dismissed the complaint for lack of jurisdiction. In an October 25, 2001 appeal decision, the Office of Hearings and Appeals (OHA) sustained that determination. The basis for that determination was that the Part 708 regulations apply to retaliation by DOE contractors, but they do not cover contractor-employee allegations of retaliation only by the DOE.

On November 23, 2001, you filed a Petition for Review by the Secretary of Energy of the October 25 appeal decision. The Part 708 regulations applicable to the petition provide that the Secretary will reverse or revise the OHA appeal decision only under extraordinary circumstances. 10 C.F.R. § 708.19(d). After fully evaluating all the issues raised in the filings in this case, I have determined that no extraordinary circumstances warranting Secretarial review exist in this case. No modification to the OHA appeal decision is therefore warranted. Accordingly, the petition for Secretarial review is hereby dismissed, and the appeal decision issued to you on October 25, 2001, constitutes the final agency decision on your complaint.

If you have any questions regarding this letter, please call Thomas Wieker at telephone number (202) 287-1543.

Sincerely,

George B. Breznay
Director
Office of Hearings and Appeals

Case No. VBD-0059

June 8, 2001

DECISION AND ORDER

OF THE DEPARTMENT OF ENERGY

Motion for Discovery

Name of Case: Janet L. Westbrook

Date of Filing: June 5, 2001

Case Number: VBD-0059

This determination will consider a Motion for Discovery filed with the Office of Hearings and Appeals (OHA) by UT—Battelle, LLC, the company that manages the Oak Ridge National Laboratory. The Motion relates to a hearing soon to be held on a complaint that Janet L. Westbrook filed under the Department of Energy's Contractor Employee Protection Program, 10 C.F.R. Part 708 (Part 708). For the reasons stated below, the motion is denied.

Ms. Westbrook worked at the Oak Ridge National Laboratory as a radiological engineer. She claims that she has persistently disclosed various safety-related concerns and as a result experienced hostility and negative treatment that ultimately resulted in her discharge on December 1, 2000. On March 20, 2001, a DOE investigator issued a Report of Investigation on Ms. Westbrook's retaliation complaint. The report found that Ms. Westbrook made protected disclosures in June 2000 and that those disclosures were a contributing factor to her discharge because of the temporal proximity between the disclosures and the decision to discharge Ms. Westbrook, which the investigator found occurred in August 2000, just two months after the disclosures. The investigator also concluded that at the time she had not uncovered sufficient evidence to conclude that UT-Battelle would have discharged Ms. Westbrook even in the absence of the protected disclosures.

In the present Motion, UT-Battelle requests that I order DOE's Oak Ridge Operations Office to disclose documents that it believes deal with concerns that Ms. Westbrook filed with the Operations Office. UT-Battelle states that it is aware that DOE's Oak Ridge Operations has hired an outside firm to investigate and report on the safety concerns underlying Ms. Westbrook's complaint. UT-Battelle states that it has requested from the Oak Ridge Operations Office all documents relating to that investigation, including a "separate report" on her employee concern, and a contract between the Operations Office and a contractor to investigate the employee concern. However, the Operations Office has denied UT- Battelle's request for the documents. UT-Battelle now seeks those documents through discovery in this proceeding and justifies its request by maintaining that the retaliation complaint that Ms. Westbrook filed should be addressed as an employee concern and that "due process considerations mandate the production of these agency documents that directly relate to the instant case."

The Part 708 regulations state that the "Hearing Officer may order discovery at the request of a party, based on a showing that the requested discovery is designed to produce evidence regarding a matter, not privileged, that is relevant to the subject matter of the complaint." 10 C.F.R. § 708.28(b)(1). UT-Battelle has made no showing that any of the documents it seeks contains information relevant to a Part 708 proceeding. In deciding whether an employee has made a disclosure protected by Part 708, one need conclude only that the employee disclosed information that he or she **reasonably believed** reveals a

substantial violation of law, a substantial danger to health or safety, or waste, fraud, or abuse. 10 C.F.R. § 708.5. After interviewing a number of supervisory personnel at UT-Battelle, the DOE investigator in this matter concluded that it was reasonable for Ms. Westbrook to have believed that some of the disclosures she made in June 2000 revealed substantial rules violations or danger. Whether the underlying actions **in fact** led to a dangerous situation or violated rules is not at issue here in this case. UT-Battelle has made no argument that all of the concerns that Ms. Westbrook raised in June 2000 were unreasonable and therefore not protected under the Contractor Employee Protection Program. Thus, the requested discovery would not lead to evidence that is relevant to Ms. Westbrook's retaliation complaint under Part 708. Nor is the requested discovery likely to assist UT-Battelle in preparing its defense to the complaint. The Motion for Discovery should accordingly be denied.

It Is Therefore Ordered That:

(1) The Motion for Discovery filed by UT-Battelle, Case No. VBD-0059, is hereby denied.

(2) This is an interlocutory order of the Department of Energy. This order may be appealed to the Director of OHA upon issuance of a decision by the Hearing Officer on the merits of the complaint.

Roger Klurfeld

Hearing Officer

Office of Hearings and Appeals

Date: June 8, 2001

Case No. VBD-0063

August 14, 2001

DECISION AND ORDER

OF THE DEPARTMENT OF ENERGY

Motion for Discovery

Name of Petitioner:Bruce R. Field

Date of Filing: August 2, 2001

Case Number: VBD-0063

This determination will consider a Motion for Discovery filed with the Office of Hearings and Appeals (OHA) by Bruce R. Field (Field). This Motion, dated August 2, 2001, concerns the hearing requested by Field under the Department of Energy's Contractor Employee Protection Program, 10 C.F.R. Part 708 (Part 708). Field requested this hearing on April 24, 2001 (Case No. VBH-0063) in connection with the Part 708 complaint he filed against the management and operating contractor, Midwest Research Institute (MRI) for the National Renewable Energy Laboratory (NREL).(1)

I. Background

Field's complaint arises from his employment at NREL as a Project Manager. During the period 1994 to April 2000, Mr. Field had a strained relationship with his direct supervisor Michael Glaser (Glaser), a Group Manager in Site Operations. In early April 2000, the two differed over a choice of contractor on pending construction contracts. This dispute led to Glaser allegedly sending a derogatory item of electronic mail to one of Field's engineers, Ray Jukkola (Jukkola), and later berating Jukkola in Jukkola's office. Glaser then personally solicited another contractor to perform the contract.

On April 21, 2000, Field and Glaser argued over the choice of a contractor for another project. This dispute resulted in an exchange of electronic mail which culminated in Glaser allegedly questioning Field's professional competence in selecting contractors. Field then sent an electronic mail to Glaser, the NREL Legal Office and the acting Human Resources Director charging that Glaser's remarks concerning Field's integrity and ethics were slanderous. Later in the day, when Field entered the NREL building where Glaser works, Field alleges that Glaser followed and confronted him in a manner Field believed was physically threatening. Field then obtained a Temporary Restraining Order (TRO) against Glaser from a County Court. On April 24, 2000, Field sent a memorandum to the NREL Legal Office detailing the confrontation with Glaser and explaining that Field believed that he had to get the TRO because Field's prior complaints to NREL had been unavailing.

In May 2000, Field sent three items of electronic mail to NREL officials alleging waste, fraud, and abuse on the part of Glaser and his supervisor, John Shaffer. NREL then turned over Field's messages and its files to the DOE Office of the Inspector General (IG) for investigation. IG took no action regarding Field's complaints. NREL also retained an outside investigator to examine the circumstances leading to the conflict between Field and Glaser. The investigator concluded that he found no basis for Field's claim that Glaser presented a physical threat to Field. The investigator also concluded that the working relationship between Field and Glaser was beyond retrieval. Subsequently, in a June 27, 2000 hearing, the County

Court denied Field's request for a Permanent Restraining Order (PRO), concluding that there was no imminent threat of serious injury, harassment, or molestation.

In July 2000, NREL decided to remove Field from his position in Site Operations and to move him to a temporary 60-day position. Afterwards, Field was then moved to another 60-day position. In November 2000, Field was then offered a permanent position in the Science and Technology Directorate at NREL.

Field then filed the Part 708 complaint which underlies this Motion. After conducting an investigation, the Department of Energy's Office of Hearings and Appeals issued a Report of Investigation (Report) on April 24, 2001. The OHA Investigator found that Field did make several protected disclosures and that the disclosures were a contributing factor in Field's transfer out of NREL Site Operations. However, the OHA Investigator concluded, based upon the facts available to him, that NREL would have transferred Field notwithstanding his disclosures.

In preparation for the hearing, Field has propounded to NREL a number of Interrogatories and Request for the Production of Documents. NREL responded. After receiving that response, Field has filed a request with me (which I deemed a Motion for Discovery) asking that I order NREL to provide fuller disclosure of information and documents concerning certain discovery items. These items are detailed below.

II. Analysis

The issuance of discovery orders in proceedings under Part 708 is within the discretion of the Hearing Officer. 10 C.F.R. § 708.28(b)(1). The regulations lay out the types of discovery that can be ordered. See 10 C.F.R. § 708.28(b). The regulations grant the Hearing Officer authority to arrange for the issuance of subpoenas for witnesses to attend the hearing on behalf of either party, or for the production of specific documents or other physical evidence, provided a showing is made that the requested discovery is "designed to produce evidence regarding a matter, not privileged, that is relevant to the subject matter of the complaint." 10 C.F.R. § 708.28(b)(1).

Arrangements for pre-hearing discovery are usually worked out between the parties, without the need of a formal discovery order from the OHA Hearing Officer. However, the OHA is prepared to issue a discovery order if necessary to ensure compliance with any reasonable discovery request. Since there are material disputes regarding Field's discovery request, I will consider those disputes in this Decision. In my discussion below, I will address Field's complaints concerning NREL's responses to various discovery items.

A. Interrogatory No. 1 and Requests for Documents Nos. 2, 3, 4 and 10

Interrogatory No. 1 requests that NREL submit information regarding individuals who have filed complaints against Shaffer and Glaser. Requests for Documents Nos. 2 and 3 request copies of Glaser's and Shaffer's personnel files, respectively. Request for Documents No. 4 asks for copies of all documents relating to disciplinary actions taken against Glaser and Shaffer. Request for Document No. 10 requests copies of all documents relating to any and all complaints asserted by any employees of NREL against Shaffer and Glaser.

In this case, to support his complaint, Field must establish by a preponderance of the evidence that he made a protected disclosure(s) (concerning fraud, gross mismanagement, gross waste of funds or abuse of authority) and that his disclosures were a contributing factor in NREL's alleged retaliation against him. See 10 C.F.R. § 708.5; 10 C.F.R. § 708.29. If Field meets this burden, the NREL must prove by clear and convincing evidence that it would have transferred Field, his April and May 2000 disclosures notwithstanding. 10 C.F.R. § 708.29. According to the Report of Investigation, NREL chose to transfer Field instead of moving the management team of Shaffer and Glaser.

Evidence concerning complaints and disciplinary actions taken against Shaffer and Glaser might be relevant in considering whether it was reasonable for NREL to retain Shaffer and Glaser. It thus would affect the issue of whether NREL would have transferred Field in the absence of his disclosures. These are both relevant inquires. Consequently, I will grant, in part, Field's request with regard to Interrogatory No. 1 and Requests for Documents Nos. 2, 3, 4 and 10. NREL shall provide information or documents related to complaints NREL has received, or disciplinary actions NREL has taken, against Shaffer and Glaser. See 10 C.F.R. § 708.28(b)(1).

B. Interrogatories Nos. 4, 5, 6 and 7

Interrogatories Nos. 4, 5, and 6 request information concerning various complaints Field made against Shaffer or Glaser in 1994, 1996 and 2000. Specifically, Field requests that NREL identify all actions taken in response to those complaints along with the names and other related information concerning all NREL employees acting on its behalf with respect to those complaints. As indicated in the Report of Investigation, Field alleged that he had submitted complaints in 1994 and 1996 concerning incidents where Glaser lost his temper with Field, yelled profanities, and questioned Field's professional competence. Report of Investigation at 3. In January 2000, Shaffer reportedly lost his temper with Field and ordered him out of his office. Id. For the reasons articulated above in Section A, NREL should comply, to the extent it has information, with Interrogatories Nos. 4, 5, and 6.

Interrogatory No. 7 requests that NREL identify all actions it undertook in response to Field's complaint concerning the April 21, 2000 incident, along with information concerning the NREL officials who undertook the actions. In my review of the relevant document, NREL appears to have responded to Interrogatory No. 7.

C. Interrogatory No. 9

Interrogatory No. 9 requests that if NREL contends that any employment decision concerning Mr. Field was in any way related to Field's performance, NREL should identify each such decision along with the perceived problem in Field's performance. This request is overbroad since not all employment decisions regarding Field would be relevant for purposes of his present Part 708 complaint. Only NREL employment decisions concerning Field made after his alleged disclosures would be relevant. In its response the Discovery Motion, NREL has stated that Field's transfer to the two temporary assignments and to his current permanent position (the retaliatory actions Field alleges NREL made against him in response to his April and May 2000 disclosures) were not motivated by performance problems. I deem this response to be adequate with regard to Interrogatory No. 9.

D. Interrogatories Nos. 10 and 11 and Requests for Production Nos. 8 and 9

These discovery items relate to salary and compensation information concerning various specific job positions at NREL. I have decided to bifurcate the hearing in this matter. I will first conduct a hearing on the merits now scheduled for August 29 and 30, 2001. If Field prevails on the merits of his Part 708 complaint, I will allow the parties to conduct discovery and make submission concerning damages to Field. Consequently, I will defer ruling regarding these discovery items.

E. Interrogatory No. 15

Interrogatory No. 15 requests that NREL identify all communications relating to any leave of absence taken by Glaser and "his impending departure from NREL." Field asserts this information is relevant given NREL's claim in the Part 708 investigation that removing Glaser would be potentially disruptive and whether Glaser provided NREL information supporting Field's position that Glaser was volatile and threatening. Nevertheless, I do not find that this Interrogatory would produce relevant evidence. The Report of Investigation states that NREL managers believed that the only alternative to removing Field

was to remove the Site Operation management team of Shaffer and Glaser. The fact that Glaser may have left subsequent to the decision to transfer Field does not provide relevant evidence concerning the NREL decision not to remove Shaffer and Glaser at the time Field made his complaint. Field's assertion that such leave of absence communications might contain admissions from Glaser is too speculative. Consequently, NREL need not respond to Interrogatory No. 15.

F. Request for Production No. 11

Request for Production No. 11 asks for information relating to communications between the parties concerning Field's Part 708 complaint. In its response to Field's Motion for Discovery, NREL stated that Field's Motion for Discovery has clarified the fact that Field seeks copies of communications between the parties pertaining to Field's Part 708 complaint. NREL has agreed to produce these documents for inspection and photocopying. Consequently, I will postpone further consideration of this issue.

G. Request for Production No. 14

Request for Production No. 14 asks for documents relating to any investigation made by NREL or its agents or representatives in response to complaints asserted by Mr. Field and other NREL employees against Glaser or Shaffer. For the reasons stated in Section A, NREL should comply with Request for Production No. 14.

It Is Therefore Ordered That:

(1) The Motion for Discovery filed by Bruce R. Field, Case No. VBD-0063, is hereby granted in part as described in the foregoing decision.

(2) This is an Interlocutory Order of the Department of Energy. This Order may be appealed to the Director of OHA upon issuance of a decision by the Hearing Officer on the merits of the complaint.

Richard A. Cronin, Jr.

Hearing Officer

Office of Hearings and Appeals

Date: August 14, 2001

(1)In this Decision, I will refer to MRI as NREL.

Case No. VBH-0002

November 2, 1999

DECISION AND ORDER

OF THE DEPARTMENT OF ENERGY

Initial Agency Decision

Name of Petitioner:Don W. Beckwith

Date of Filing:February 2, 1998

Case Number: VBH-0002

This Initial Agency Decision concerns a whistleblower complaint filed by Don W. Beckwith (the Complainant) against his former employer, Westinghouse Savannah River Company (WSRC), under the Department of Energy's (DOE) Contractor Employee Protection Program, 10 C.F.R. Part 708. At all times relevant to this proceeding, WSRC was the management and operating contractor at the DOE's Savannah River Site in Aiken, South Carolina. The Complainant alleges that in December 1997, he disclosed to WSRC that a WSRC management official had engaged in improper conduct. According to the Complainant, WSRC terminated him in January 1998 as a consequence of his disclosure. As discussed below, I have determined that the Complainant is entitled to relief because WSRC has not sustained its evidentiary burden in this case.

I. Background

A. The DOE Contractor Employee Protection Program

The DOE's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent fraud, mismanagement, waste and abuse" at DOE's government-owned, contractor-operated facilities." 57 Fed. Reg. 7533 (March 3, 1992). Its primary purpose is to encourage contractor employees to disclose information which they believe exhibits unsafe, illegal, fraudulent, or wasteful practices and to protect those "whistleblowers" from consequential reprisals by their employers.

The regulations governing the DOE's Contractor Employee Protection Program are set forth at Title 10, Part 708 of the Code of Federal Regulations. (1) The regulations provide, in pertinent part, that

a DOE contractor may not discharge or otherwise discriminate against any employee because that employee has disclosed, to a DOE official or to a DOE contractor, information that the employee reasonably and in good faith believes reveals a substantial violation of a law, rule, or regulation; or fraud, gross mismanagement, gross waste of funds, or abuse of authority. See 10 C.F.R. § 708.5(a) (1), (3). Employees of DOE contractors who believe they have been discriminated against in violation of the Part 708 regulations may file a whistleblower complaint with the DOE and are entitled to an investigation by an OHA investigator, an independent fact-finding and a hearing by an OHA Hearing Officer, and an opportunity for review of the Hearing Officer's Initial Agency Decision by the OHA Director. 10 C.F.R. §§ 708.21, 708.32.

B. Procedural History

On February 2, 1998, the Complainant filed a Whistleblower Complaint against WSRC pursuant to 10 C.F.R. Part 708. On April 16, 1999, the Office of Inspections of the DOE's Office of Inspector General transferred a number of pending complaints, including the subject complaint, to OHA. On April 26, 1999, the OHA Director appointed an investigator to examine the issues raised in the Complainant's Part 708 Complaint. The investigator promptly conducted an investigation, and issued a Report of Investigation on June 7, 1999. On that same day, the OHA Director appointed me the hearing officer in this case.

On August 24, 1999, I convened a hearing on the Complainant's Part 708 Complaint in Aiken, South Carolina. I received the hearing transcript on September 16, 1999 at which time I closed the record in the case.

II. Legal Standards Governing This Case

A. The Complainant's Burden

It is the burden of the complainant under Part 708 to establish "by a preponderance of the evidence that there was a disclosure, participation, or refusal described under § 708.5, and that such act was a contributing factor in a personnel action taken or intended to be taken against the complainant." 10 C.F.R. § 708.9(d). See Ronald Sorri, 23 DOE ¶ 87,503 (1993) (citing McCormick on Evidence § 339 at 439 (4th ed. 1992)). The term "preponderance of the evidence" means proof sufficient to persuade the finder of fact that a proposition is more likely true than not true when weighed against the evidence opposed to it. See Hopkins v. Price Waterhouse, 737 F. Supp. 1202, 1206 (D.D.C. 1990) (Hopkins); 2 McCormick on Evidence § 339 at 439 (4th Ed. 1992).

In the case at hand, WSRC stipulated at both the investigatory and hearing stages of this proceeding that (1) the Complainant had made a protected disclosure as defined in 10 C.F.R. § 708.5, and (2) the Complainant's protected disclosure can be considered a contributing factor to WSRC's decision to terminate the Complainant because of the temporal proximity that existed between the protected disclosure and the Complainant's termination. In view of WSRC's stipulations, the Complainant is deemed to have met his regulatory burden in this case, thereby shifting the burden to WSRC.

B. The Contractor's Burden

The regulations require WSRC to prove by "clear and convincing" evidence that the company would have terminated the Complainant even if he had not disclosed information about alleged misconduct by a WSRC management official. "Clear and convincing" evidence requires a degree of persuasion higher than mere preponderance of the evidence, but less than "beyond a reasonable doubt." See Hopkins, 737 F. Supp. at 1204 n.3. In evaluating whether WSRC has met its burden, I will consider the strength of WSRC's evidence in support of its decision to terminate the Complainant; the existence and strength of any motive to retaliate on the part of the officials who were involved in the decision to terminate the Complainant's employ from WSRC; and any evidence that WSRC takes similar actions against employees who are not whistleblowers but who are otherwise similarly situated.

III. Analysis

It is WSRC's position that even had the Complainant not made the protected disclosure at issue in this case, it would have nonetheless terminated him for dishonest acts, including his violation of WSRC's disability policy. WSRC maintains that it made the decision to terminate the Complainant because the Complainant was seen at a construction site working while drawing 100% disability pay from WSRC, a

fact that led WSRC to conclude that the Complainant could have been working at the Savannah River Site. Transcript of Hearing (Tr.) at 19-21.

WSRC also argues that under applicable state law no liability can be found against the company for terminating the Complainant. Id. at 20. WSRC asserts that since the State of South Carolina is an employment-at-will state and the Complainant had no contract with WSRC, WSRC had the right to terminate the Complainant's employment for any reason, as long as it was not a discriminatory reason. Id. According to WSRC, its argument is supported by a recent South Carolina Supreme Court decision, Prescott v. Farmers Telephone Cooperative Inc., 516 S.E.2d 923 (S.C. 1999)

Before addressing WSRC's legal argument and evaluating the evidence it has tendered, I will first set forth the facts in this case, including the substance of the protected disclosure and the events leading up to the Complainant's termination.

A. Factual Overview

WSRC or its predecessor employed the Complainant at the DOE's Savannah River Site from 1988 until 1998. Tr. at 277. During all or a part of his tenure at WSRC, the Complainant also owned and operated a residential contractor business. Ex. 17.

In 1994, the Complainant sustained a job-related back injury while working as a mechanic at WSRC's Separations Maintenance Department. Id. To accommodate the Complainant's back injury and for safety reasons, WSRC assigned the Complainant to WSRC's Training Department. Id.

In the summer of 1995, the Complainant alleges that a WSRC manager offered him a transfer to WSRC's Tritium Maintenance Organization as a shift maintenance mechanic, a position that provided the Complainant with greater earning potential than he had in WSRC's Training Department. Id. The Complainant alleges that the offer also included a subsequent promotion to the position of maintenance planner. Id. In exchange for these job enhancements, the Complainant claims the WSRC manager asked the Complainant to assist with a construction project at the WSRC manager's home. Id. The Complainant reports that he did indeed assist in the construction project by providing free labor, arranging for his subcontractors to install the roof, vinyl, and sheetrock on the project, and allowing the WSRC manager to use his contractor's discounts. Id. The Complainant also alleges that the WSRC manager provided paid leave to his third-line supervisor and other WSRC personnel in exchange for their assistance on the construction project. Id.

According to the Complainant, the WSRC manager arranged for his transfer to a maintenance mechanic's position in WSRC's Tritium Maintenance Organization in August 1996. Id. Due to impending layoffs at WSRC at the time, claims the Complainant, the maintenance planner positions were frozen. Id. The Complainant contends that the WSRC manager continued to ask him for favors, nevertheless, always assuring the Complainant he was working on the maintenance planner position for him. Id.

In the summer of 1997, some maintenance planner positions became available, and the Complainant was selected to interview for one of these positions. Id. According to the Complainant, he was absent from work due to recurring back problems and he missed his scheduled interview. (2) Id. The Complainant contends he discussed the matter with the WSRC manager who allegedly assured him he would be interviewed for the maintenance planner position at a later date. Id. When the Complainant returned to work in August 1997, he discovered that the maintenance planner positions were already filled. Id.

Shortly thereafter, the Complainant approached WSRC's Human Resources Representative (HR Representative) and complained generally about misconduct on the part of a WSRC manager in the Tritium Maintenance Organization. Id. To substantiate his allegations, the Complainant provided the HR Representative with a redacted copy of a hand-written note from the WSRC manager to the Complainant. Id. The Complainant had removed the WSRC manager's signature from the note prior to supplying it to

the HR Representative and did not otherwise reveal the WSRC manager's name at this point. Id.

On August 20, 1997, WSRC placed the Complainant on Short-Term Disability with full pay as he awaited back surgery. Ex. 36; Tr. at 308. The Complainant underwent back surgery in September 1997, and returned to work in early December 1997. Id.; Ex. 2h.

Sometime around December 12, 1997, the Complainant met with his third-line supervisor and a medical doctor from WSRC (WSRC Medical Doctor). According to the Complainant's testimony, the WSRC Medical Doctor told him at the meeting that he would never perform the duties of maintenance mechanic at WSRC again because of medical restrictions affecting his ability to do his job. Tr. at 284. The Complainant testified he was told he could either find another place of employment or apply for Total and Permanent Disability. Id. The Complainant signed the forms initiating the request for Total and Permanent Disability on December 22, 1997. Ex. 2c. (3) The Complainant claims that before he left the WSRC work-site in December 1997, he furnished to the HR Representative the name of the WSRC manager against whom he had made allegations of improper conduct (the protected disclosure) and the complete copy of the note bearing the WSRC manager's signature that purportedly supported those allegations. Id; Tr. at 334-35.

In January 1998, two of the Complainant's supervisors reported that they saw the Complainant doing physical labor at a house located 50 miles from the Savannah River Site. Ex. 1c, 1d, 1e, 34, 38; Tr. at 44-53, 119. As the result of the eyewitness accounts of the two supervisors, WSRC convened a constructive discipline meeting on January 19, 1998, to discuss whether the Complainant had committed disability fraud. Ex. 1a, 24b. After the meeting, the WSRC Disciplinary Committee (4) recommended that the Complainant be terminated. Ex. 24, 24b. A review committee consisting of the Complainant's first-, second-, third- and fourth-line supervisors, and the HR Representative, however, recommended that the Complainant be confronted with the information and allowed to respond to the allegations. Ex. 1a. On January 20, 1998, WSRC summoned the Complainant to a meeting to provide a response to the allegations that he had been seen performing physical contract work related to his private business while on short-term disability. Ex. 1b. The review committee refused to entertain statements from persons who, the Complainant alleges, would have contradicted the accounts of the two supervisors who allegedly saw the Complainant doing physical labor while on disability. The two supervisors who provided the eyewitness accounts also served as review committee members. Id. at 307. Sometime after the January 20, 1998 meeting, the first-, second-, third- and fourth-line supervisors (but not the HR Representative) memorialized their collective recollection of the subject meeting in an unsworn statement in which they relate that the Complainant admitted in the meeting that he had been on the roof of the house in question but had not performed any work. Id. According to the Complainant, however, he never "got on the roof to complete any roofing work or to supervise the subcontractor." Ex.19; Tr. at 301.

On January 22, 1998, another meeting occurred after which WSRC's President terminated the Complainant effective January 23, 1998. Ex. 17, 24; Tr. at 103.

B. WSRC's Testimonial and Documentary Evidence

To support its contention that WSRC would have terminated the Complainant absent his protected disclosure, the company presented the testimony of the following five witnesses at the hearing: the lead investigator for WSRC's Office of General Counsel (WSRC Investigator); the Complainant's first- and second-line supervisors; a recordkeeper from WSRC's Human Resources Department (HR Recordkeeper); and a former Policy Representative from WSRC's Human Resources Department (WSRC Policy Representative). In addition, WSRC submitted numerous color photographs of the house where the Complainant was allegedly seen working in January 1998, the streets immediately adjacent to the house in question and sketches of street grids in the area around the subject house. See Ex. 42, 43a, 43b, 43c, 43d, 43e and 43f.

1. The Complainant's Activities on January 12 and 16, 1998

The Complainant's first-line supervisor testified that he first observed the Complainant on the roof of the house in question on January 12, 1998. Tr. at 50. On that day, according to the first-line supervisor, the Complainant was overseeing a roofing crew. Id. The first-line supervisor also attested that at 1:00 p.m. on January 16, 1998, he saw the Complainant through binoculars at the subject house climbing a ladder, lifting things to a crew that was roofing the outbuilding, and sawing some material. Id. at 53, 86. When asked what the restrictions are in WSRC's short-term disability program as far as what the Complainant could and could not do, the first-line supervisor expressed his view that the Complainant should not have been working while collecting disability. Id. at 72. When pressed further about whether the first-line supervisor knew whether his view was substantiated by WSRC's policy, he reluctantly admitted that he did not know.

The second-line supervisor testified that he saw the Complainant on January 16, 1998, cutting siding with a table saw, transporting the siding to the workmen, jumping and throwing the siding to the workmen on the roof, picking up a wooden straight ladder and climbing on the roof. Id. at 119-120, 176. The second-line supervisor opined that what he saw the Complainant doing on January 16, 1998, was incompatible with his disability status because the Complainant had previously represented that he was unable to lift a five- to six-ounce package. Id.

The homeowner of the house in question (Homeowner) was to have testified as the Complainant's witness at the hearing. On the day of the hearing, the Complainant revealed that the homeowner refused to become involved in the matter. Prior to the hearing, the WSRC Investigator obtained an unsworn statement from the Homeowner which the company submitted at the hearing over the objections of the Complainant's attorney. In the unsworn statement, the homeowner states while he never observed the Complainant doing any work or heavy lifting, he recalls that the Complainant climbed up a ladder to the rooftop during the roofing work. Ex. 44.

In rebuttal, the Complainant presented three witnesses, the roofing subcontractors who were working at the subject house where the Complainant was allegedly seen on January 12 and 16, 1998. Tr. at 245-276. All three testified that they never saw the Complainant on the roof of the subject house on the dates in question, never saw the Complainant cut any plywood, and never saw the Complainant do any other kind of labor on the house. Id. The Roofing Crew Leader on the project was emphatic that the Complainant never did any physical labor on the job. Id. at 248, 257. What the Complainant did do, according to the Roofing Crew Leader, was to go to the hardware store and get whatever supplies the crew needed. Id. The Roofing Crew Leader testified that in addition to the two other members of his crew who testified at the hearing, he had two other laborers on the job whose function it was to tote shingles and plywood. Id. at 249. The Roofing Crew Leader related that it was he who cut the plywood on the job site, another laborer who pushed the plywood up the ladder, and a third crew member who took the plywood from the ladder and threw it in place. Id. at 258. The Roofing Crew Leader also advised that there were no wooden ladders at the house in question, only aluminum ones. Id. at 259.

The Complainant also testified about his activities on the two days in question. He and the roofing crew met the homeowner of the house in question on January 12, 1998, between 8:30 and 8:45 a.m. Id. at 292. He watched the crew work for awhile, left to purchase coffee to counteract drowsiness from medication, returned to the house around 11:15 or 11:30 a.m. and "hung around" until lunchtime. Id. He took the crew to lunch, returned to the house for 15 or 20 minutes and then went home for the day. Id. at 294. The Complainant asserts that he never was on the roof on January 12, 1998. Id.

As for January 16, 1998, the Complainant states he arrived at the house around 12:30 p.m. Id. He then went to the store to buy some continuous ridge band around 1:00 p.m. and returned to the home around 3:30 p.m. with the material. Id. The Complainant states his crew unloaded the continuous ridge band from the truck, installed it, and finished the job around 4:30 p.m. The Complainant asserts that he never went on the roof on the 16th of January, never climbed up and down a ladder that day, never cut any material that day, and never did any physical labor that day. Id. at 297-99. The Complainant did admit that he went up

on the roof of the subject house on Saturday, January 17, 1998, to view an area about which the homeowner had complained.(5)

Evaluation of Evidence and Credibility of Witnesses

The conflicting testimony in the record leads me to conclude that some of the witnesses were not completely candid in their testimony, their recollection of events were faulty, or their eyewitness accounts were inaccurate. After observing the demeanor of the witnesses at the hearing and considering the other evidence submitted, I am unable to determine whose version of events is the accurate one. It was simply not evident to me at the hearing that any of the witnesses were being untruthful. While I have doubts about all the details of the first- and second-line supervisors testimony (i.e. their claim they saw the Complainant cut siding when there is evidence that there was no siding work being done at the home on the dates in question; their testimony that they saw the Complainant move a wooden ladder when there was testimony only aluminum ladders were being used by the roofing crew; their claim they saw the Complainant working at 1:00 p.m. on January 16, 1998 when the Complainant claims he was en route to purchase some continuous ridge band at that time), those doubts are not so significant that I would discredit their testimony in its entirety.

I do have substantial doubts, however, about the objectivity of the first- and second-line supervisors, both of whom participated in the decision to terminate the Complainant and both of whose eyewitness accounts formed the basis for WSRC's termination decision. The Complainant's first- and second-line supervisors both acknowledged they knew that the Complainant's third-line supervisor (i.e. their boss) had assisted in the construction project that was the subject of the Complainant's protected disclosure. Tr. at 65, 139. In addition, the second-line supervisor acknowledged at the hearing that his immediate supervisor, the Complainant's third-line supervisor, typed the personal statement that set forth the details surrounding the second-line supervisor's viewing of the Complainant on the roof. Id. at 186. Curiously, there was no testimony proffered that the second-line supervisor could not type. Moreover, the second-line supervisor admitted he knew that the Complainant had provided documentation to the HR Representative that supported his protected disclosure, that he is still a friend of the WSRC manager about whom the protected disclosure had been made, and that the WSRC manager could influence the second-line supervisor's ability to remain employed at WSRC. Id. at 136.

I also considered that the Complainant provided a source of income to the roofing crew members when he hired them as subcontractors on various projects. Moreover, I noted that the Complainant typed the roofing crew members' written statement describing the events that transpired on January 12 and 16, 1998. Id. at 252.

It is indeed unfortunate that the Homeowner did not testify at the hearing, a person who presumably has no allegiance to either WSRC or the Complainant. Since I believe the Homeowner's testimony was potentially crucial to resolving one of the chief factual disputes in this case, I am unwilling to accord much weight to the Homeowners' unsworn statement that WSRC tendered in this case. As the Complainant's attorney noted, the inability to cross-examine the Homeowner in a situation such as this is highly prejudicial. I will also accord no weight to the WSRC Investigator's notes of a telephone conversation he had with the Homeowner because (1) the information in the notes is at divergence with that in the unsworn statement, and (2) there was no opportunity to cross-examine the Homeowner about the accuracy of those notes. Since the burden in this case rests with WSRC, it was the company's responsibility to produce witnesses, such as the Homeowner, to prove its case.(6)

The evidence in the record is simply not sufficient for me to find that the Complainant was on the roof and/or doing physical labor at the house in question on January 12 and 16, 1998. I find therefore that WSRC has not clearly and convincingly proven that it terminated the Complainant because he was on the roof of the house in question and/or engaged in physical labor at the subject house at the time he was drawing disability pay.

2. The Complainant's Purported Violation of WSRC's Short-Term Disability Policy

The WSRC Policy Representative testified that WSRC management convened the January 19, 1998 Constructive Discipline Meeting "because of a violation of the disability policy." Id. at 213. She related that the WSRC Disciplinary Committee, of which she was a member, recommended that the Complainant be terminated "due to the violation of our disability policy and fraudulent with [sic] working while being paid full salary to be out on disability." Tr. at 217.

According to the WSRC Policy Representative's testimony, from 1994 through 1998 she implemented all WSRC's Human Resource policies, made sure WSRC was consistent site-wide in its recommendations regarding disciplinary actions and termination, and served as a representative in constructive discipline cases. Tr. at 210. At the hearing, the WSRC Policy Representative stated that WSRC's "disability policy requires an employee to be at home, be available at any point in time for management or medical to get in touch with him. Our disability policy does not allow any other type of work." Id. at 221. When queried if Exhibit 23a, the exhibit tendered by WSRC in the record of this case, constituted WSRC's Disability Policy, the WSRC Policy Representative responded negatively. Id. at 232. She explained that Exhibit 23a, a part of WSRC's Employee Benefits Handbook, is merely a two- page summary of the company's 20-page Short-Term Disability Policy. Id. On cross-examination, the WSRC Policy Representative revealed that WSRC does not provide the disability policy to its employees; it is the employee's responsibility to obtain copies of whatever policy they need to have. Id. at 223.

I am unwilling to accord substantial weight to the WSRC Policy Representative's recollection of the terms of WSRC's Short-Term Disability Policy for several reasons. First, she has not had day-to-day responsibility for implementing WSRC's Human Resource policies for more than 18 months. Second, there was no indication in her testimony that she had recently reviewed WSRC's Short- Term Disability Policy in preparation for the hearing. Third, I found it hard to believe her testimony that WSRC's Short-Term Disability Policy required its employees to be at home and available at all times for the company to contact them. Under this scenario, an employee would be prevented from going to the doctor's office, or driving to the pharmacy to obtain medication or the grocery store to purchase food. All these concerns lead me to conclude that WSRC should have tendered its 20-page Short-Term Disability Policy to support its position that the Complainant's actions, whatever they were, violated the terms of that policy.

The only other evidence in the record regarding WSRC's Short-Term Disability Policy and its application to the Complainant's situation is the uncorroborated personal opinions espoused by the first- and second-line supervisors. While I am convinced that both line supervisors earnestly believed that the Complainant was defrauding the disability system, I must decide this issue on evidence before me, not the witnesses' viewpoints or moral convictions.

In the end, I find that it was uniquely within WSRC's power to produce the Short-Term Disability Policy that was in effect during the period in question in this case. Its failure to do so prevents me from finding that the Complainant's activities on the days in question, whatever they were, rise to the level of disability fraud or dishonesty, and constituted a non-retaliatory reason for terminating him.(7) I must therefore find that WSRC has not shown by clear and convincing evidence that it terminated the Complainant for violating the company's disability policy.

3. The Complainant's Alleged Dishonesty

The WSRC Policy Representative also asserted at the hearing that WSRC terminated the Complainant for lying to his managers during the January 20, 1998 meeting. Tr. at 218, 232-33. It is clear from the record, however, that the Complainant's purported lying did not form the sole basis for his termination. In fact, the record reveals the WSRC Disciplinary Committee recommended that the Complainant be terminated on January 19, 1998, a day before the Complainant purportedly lied. I view the January 20, 1998 meeting as a mere formality since two of the managerial participants at that meeting were the two eyewitnesses in this case, and WSRC refused to allow the Complainant to present corroborating evidence to support his side of

the story. In addition, the documentary evidence submitted by WSRC indicates that the Complainant's purported lying was inextricably intertwined with his alleged disability violation, on which I have already concluded that WSRC has failed to prove it justifiably relied in terminating the Complainant. The record of a Disciplinary Meeting held on January 22, 1998, reveals that WSRC terminated the Complainant for Dishonest Acts with the notation "fraud/disability violation." Ex. 24a. Handwritten notes on Exhibit 24a state, in relevant part, as follows: [The Complainant] was dishonest in discussing and making his statements concerning working on another job during work hours while out on disability." Ex. 24a.

As noted earlier in this Decision the two line supervisors upon whose eyewitness testimony WSRC's entire case hinges are not necessarily unbiased observers. The Complainant's second-line supervisor is a friend of the WSRC manager who was the subject of the protected disclosure and reluctantly admitted at the hearing that the WSRC manager could influence his continued employment at WSRC. The first-line supervisor also revealed the WSRC manager had been in his supervisory chain during a portion of his tenure at WSRC. In addition, the Complainant testified that in the summer of 1997, he reported his first-line supervisor for violating some safety procedures at the Savannah River Site, yet another reason to question the purity of the supervisor's motives.(8)

Moreover, WSRC failed to proffer the testimony of other more objective witnesses who might have provided relevant, probative evidence regarding the Complainant's alleged lying. (9) It might have been helpful, for example, if the Complainant's fourth-line supervisor had testified since he is the one who conducted the January 20, 1998 meeting. In addition, the HR Representative, the person to whom the Complainant made the protected disclosure and a participant at both the January 19 and 20 meetings, might have provided valuable information on a number of issues. Specifically, it is unclear why the HR Representative did not sign the document in which the Complainant's four-line managers memorialized their collective recollection of the January 20, 1998 meeting. Ex. 1b. Moreover, the HR Representative might have provided insight into the existence or absence of retaliatory animus on WSRC's part, specifically whether the Complainant's whistleblower complaint was alluded to during any of the meetings during which the Complainant's termination was discussed.(10)

Based on the foregoing considerations, I find that WSRC has not shown by clear and convincing evidence that it terminated the Complainant for lying during the January 20, 1998 meeting.

4. WSRC's Treatment of Similarly Situated Persons

At the hearing, the HR Recordkeeper testified that she tracks all constructive discipline meetings and grievances for WSRC. Tr. at 199. She attested that she reviewed all constructive discipline hearings at WSRC since April 1, 1994 and determined that there were 20 cases involving disciplinary action of some sort under the category, "Dishonest Acts." Of the 20 cases, three involved disability violations, according to the HR Recordkeeper. Id. at 203. Under questioning, the HR Recordkeeper revealed that one of the three cases involved the Complainant. Id. The second of the three cases involved a woman who was playing softball while on disability. Id. WSRC gave the woman a "corrective contact" which, according to the HR Recordkeeper, is the least severe form of disciplinary action on a continuum where the most severe form of punishment is termination. Id. at 203-4. The third of the three cases involved a man "playing horseshoes in a bar. . ." Id. at 204. WSRC terminated that man. Id. The HR Recordkeeper was unable to explain why WSRC accorded different treatment to one of the three individuals who received some sort of disciplinary action based on the unspecified disability violations. Id. at 207. The HR Recordkeeper opined that the WSRC Policy Representative was better suited to respond to this query.

The WSRC Policy Representative, however, was unable to explain why WSRC had handled one of the three disability violation cases differently. Id. at 224-25, 234. She knew few details relating to the other two cases, either, such as whether either of the other two WSRC employees had filed whistleblower complaints. Id. The WSRC Policy Representative further related that either the HR Recordkeeper or the person who took her place as the WSRC Policy Representative could have reviewed the records relating to the other two cases and readily ascertained from those records why WSRC had taken different disciplinary

actions against the two employees involved. Id. at 234-35. The WSRC Policy Representative concluded her testimony by asserting that WSRC makes individual decisions based on individual employees. Id. at 235.

Based on the record before me, WSRC has not proven that it consistently implemented its policy of terminating employees for violating its disability policy. Cf. Charles Barry DeLoach, 26 DOE ¶ 87,509 (1997) (the contractor showed that it consistently implemented its policy of terminating employees where there was conclusive evidence that the employees intended to steal government property).(11) WSRC's failure to explain the specific circumstances surrounding its treatment of two other employees similarly situated to the Complainant prevents me from finding that WSRC terminated the Complainant because its policy is to terminate employees who are found to have violated the terms of WSRC's Short-Term Disability Policy.

5. Summary

The unresolved conflicting testimony in this case makes it impossible to know with any confidence what the Complainant did or did not do on January 12 and 16, 1998. Nevertheless, it is clear from the record that WSRC has not presented clear and convincing evidence that it would have terminated the Complainant absent his protected disclosure. WSRC submits it terminated the Complainant for dishonest acts, including his violation of WSRC's short-term disability policy. Yet, WSRC failed to provide the most probative evidence of the Complainant's purported violation, the Short-Term Disability Policy itself. WSRC alternatively claims it terminated the Complainant for lying in the January 20, 1998 meeting. Yet, the record reveals that the WSRC Disciplinary Committee recommended that the Complainant be terminated on January 19, 1998. WSRC also claims it terminated the Complainant for working while on disability, a fact that lead it to conclude that the Complainant could have been working at the Savannah River Site. Yet, the evidence submitted by WSRC did not clearly and convincingly prove that the Complainant was either on the roof of the house in question or performing physical labor at the subject house. WSRC also has not provided clear and convincing evidence that it consistently terminates employees who violate the terms of its Short-Term Disability Policy. The limited evidence it presented to support this position, i.e., it terminated a man who was playing horseshoes while on disability but did not terminate a woman who was playing softball while on disability, raises more questions than it answers.

What is noticeably absent in this case is testimonial evidence from unbiased witnesses who might have provided relevant, probative information on the issue of the Complainant's activities on the days in question. It is possible, for example, that testimony from the Homeowner might have tipped the scales in WSRC's favor had the company elected to secure the Homeowner's presence at the hearing. In addition, testimony from the Complainant's fourth-line supervisor and the HR Representative might have provided insight into the January 20, 1998 meeting where the Complainant allegedly lied.(12)

C. WSRC's Legal Arguments

As a final matter, I reject WSRC's contention that no liability can be found against the company because the State of South Carolina is an employment-at-will state. WSRC agreed in its contract with the DOE to abide by the Part 708 regulations which are national in scope, further important DOE policy interests, and are intended to apply to all DOE management and operating contractors. Moreover, WSRC has cited no cases that suggest that the law in the State of South Carolina prevents the company from complying with this regulatory mandate.

The case cited by WSRC, Prescott v. Farmers Telephone Cooperative Inc. (Prescott), 516 S.E.2d 923 (S.C. 1999), is not controlling. Prescott involved a wrongful discharge action brought by an employee against his former employer alleging breach of an employment agreement, breach of the implied duty of good faith and fair dealing, defamation, intentional interference with an economic relationship, promissory estoppel, and specific performance. While holding that vague assurances of job security by the employer

in Prescott did not alter the employee's employment-at-will status, the Court recognized that the employment-at-will doctrine can be contractually altered by the employer and employee. In this case, WSRC contractually agreed with the DOE not to discharge or otherwise discriminate against any employee because that employee has made a protected disclosure as defined in 10 C.F.R. Part 708. It stands to reason that WSRC's employees are third-party beneficiaries of the contract between the DOE and WSRC, and that the WSRC employees' employment- at-will status is altered to the extent dictated by the Part 708 regulations. (13)

D. Conclusion

As set forth above, I am compelled to find for the Complainant because WSRC has not sustained its evidentiary burden in this case. Given the paucity of information in the record regarding the appropriate remedy in this case, and in fairness to both parties, I will permit the parties to submit information on this issue before I render a determination on it.

IV. Remedy

The Part 708 regulations provide that if the initial agency decision determines that an act of retaliation has occurred, it may order: reinstatement, transfer preference; back pay; reimbursement of reasonable costs and expenses, including attorney and expert-witness fees; and such other remedies as are necessary to abate the violation and provide the employee with relief. 10 C.F.R. § 708.36. At the hearing, the Complainant stated that he desired to be reinstated if he prevailed in this proceeding. Tr. at 330. Since neither party presented any information on the issue of remedy, I find it appropriate to allow the parties to submit briefs before determining the appropriate remedy in this case.

I am especially interested in the parties' views with regard to reinstatement since the current record suggests that the Complainant was unable to perform his job of maintenance mechanic at the time WSRC terminated him. I direct the Complainant to submit a detailed statement setting forth the precise remedy he is seeking, including a summary of his expenses and attorney fees within 15 days of his receipt of this Initial Agency Decision. WSRC will then have 15 days from its receipt of the Complainant's statement to respond to the Complainant's remedy request. The parties are also free, of course, to seek mediation regarding the issue of remedy. If they chose this course of action, I will hold the remedial phase of this case in abeyance for 30 days pending mediation on the issue.

It Is Therefore Ordered That:

(1) The Request for Relief filed by Don W. Beckwith under 10 C.F.R. Part 708 is hereby granted as set forth in paragraph (2) below.

(2) Within 15 days of receipt of this Initial Agency Decision, the Complainant shall submit to the Office of Hearings and Appeals and Westinghouse Savannah River Company a detailed statement setting forth the precise remedy he is seeking, including a summary of his expenses and attorney fees. Westinghouse Savannah River Company shall have 15 days from its receipt of the Complainant's submission to file a responsive document. Should the parties elect to seek mediation to resolve the remedial phase of this case, they shall notify me immediately and I will hold this proceeding in abeyance for a period of 30 days.

(3) This is an Initial Agency Decision, which shall become the Final Decision of the Department of Energy granting the complaint unless, within 15 days of the issuance of a Supplemental Order with regard to remedy in this case, a Notice of Appeal is filed with the Office of Hearings and Appeals Director, requesting review of the Initial Agency Decision.

Ann S. Augustyn

Hearing Officer

Office of Hearings and Appeals

Date: November 2, 1999

(1)On March 15, 1999, the DOE published an Interim Final Rule revising the regulations governing the Contractor Employee Protection Program. See 64 Fed. Reg. 12862 (March 15, 1999)(amending 10 C.F.R Part 708, effective April 14, 1999). Section of 708.8 of the revised regulations provides that the new procedures "apply prospectively in any complaint proceeding pending on the effective date of this part." Thus, the Interim Final Rule is applicable to the instant case. In this regard, under the revised Part 708 regulations, the DOE's Office of Hearings and Appeals (OHA) assumed investigatory jurisdiction over all pending and future complaints, including the one under consideration.

(2)The Complainant's medical records reflect that he has a long history of chronic back pain and suffers from degenerative arthritis of the spine. Ex. 2b, 2d, 2f, 2g, and 2h.

(3)The individual continued to receive Short-Term Disability Benefits during the time he was awaiting a decision on his Total and Permanent Disability request.

(4)The members of that committee were the Complainant's first-, second-, third-, and fourth-line managers, the WSRC Medical Doctor, the HR Representative, a WSRC Policy Representative, an EEO representative, and an HR Consultant. Ex. 1a.

(5)At the hearing, the Complainant had difficulty concisely articulating what he had communicated to others about his activities on January 12 and 16, 1998. He testified that after the January 20, 1998 meeting, he told the HR Representative, "I wasn't on the roof . . . If I was up there, I was only talking." Tr. at 308. Under questioning, the Complainant claimed, in essence, that he was only using a hypothetical and did not intend to communicate in any way that he was on the roof at anytime. Id. I found it quite unusual that the Complainant would use hypotheticals in response to direct questions calling for a yes or no response. It is understandable how WSRC might have construed a response such as the "hypothetical" described above as a contradiction of the Complainant's previous denials of being on the roof.

(6)I recognize, of course, that WSRC probably relied on the Complainant's representation during the pre-hearing conference that he would produce the Homeowner as a witness. Nevertheless, WSRC knew that it had the burden of proof in this case. WSRC knew from the Report of Investigation that the OHA investigator had identified the Homeowner as a person whose testimony at the hearing might be useful in resolving disputed issues of fact. In my opinion, WSRC could have, and probably should have, identified the Homeowner as its witness and taken steps to secure the Homeowner's testimony by subpoena.

(7)WSRC had ample opportunity before, during, and after the hearing to submit any evidence it deemed relevant to the issues at hand, including WSRC's 20-page Short-Term Disability Policy. I note that WSRC chose not to supplement the record with post-hearing briefs or evidence when given that opportunity. Tr. at 339.

(8)The Complainant's safety allegation against his first-line supervisor was apparently never presented by the Complainant as a protected disclosure under Part 708.

(9)It is understandable why WSRC did not present the testimony of the Complainant's third-line supervisor as he was accused by the Complainant of working on the home improvement project for the WSRC manager against whom the Complainant made the protected disclosure.

(10)There are differing recollections of whether the Complainant's Part 708 Complainant was discussed at any of the meetings leading up to the Complainant's termination. The WSRC Policy Representative testified that there was no discussion about the Complainant's allegations against the WSRC manager at

the meetings she attended. The first-line supervisor did not recall if there was any discussion about the Complainant's Whistleblower Complaint in the meeting with WSRC's President. Tr. at 103. The second-line supervisor testified that no one mentioned the allegations against the WSRC manager in any of the meetings discussing the Complainant's termination. Id. at 132. Upon further examination, however, the second-line supervisor revealed that while he did not recall the WSRC President discussing the Complainant's Part 708 Complaint, he did recall another high- level WSRC Executive alluding to a complaint filed against the WSRC manager. Id. at 197. The Complainant testified that at one of the meetings, he looked at his third-line supervisor and said, "This has got to do with [the WSRC manager] and that's it. I know it." Id. at 306. According to the Complainant, his first-, second-, and third-line supervisors said nothing in response. Id.

(11)WSRC also provided no evidence showing it routinely terminates its employees for lying.

(12)This assumes that WSRC had introduced into evidence its Short-Term Disability Policy and that the policy prevented the Complainant from being away from his home as recounted by the WSRC Policy Representative.

(13)It is instructive that the Supreme Court of the State of South Carolina held in a case involving a claim brought under the State Whistleblower Act that the trial court correctly refused to charge the jury on the employment-at- will doctrine, finding that the employment-at-will of the whistleblower was irrelevant under the version of the State Whistleblower Act in force at the time of the whistleblower's termination. Baber v. Greenville County, 488 S.E.2d 314 (S.C. 1997)

Case No. VBH-0005

May 2, 2000

DECISION AND ORDER

OF THE DEPARTMENT OF ENERGY

Initial Agency Decision

Name of Petitioner: Thomas Dwyer

Date of Filing: June 23, 1999

Case Number: VBH-0005

This Decision involves a whistleblower complaint filed by Thomas Dwyer under the Department of Energy's (DOE) Contractor Employee Protection Program. From January 1996 to October 1997, Mr. Dwyer was employed as a pipefitter by Fluor Daniel Fernald (FDF), a DOE contractor responsible for the cleanup of the Fernald Environmental Management Project, a former DOE uranium production facility located about 18 miles northwest of Cincinnati, Ohio. Mr. Dwyer alleges that FDF first suspended him and then terminated him in retaliation for taking certain actions and making health and safety disclosures.

I. Background

A. The DOE Contractor Employee Protection Program

The DOE's Contractor Employee Protection Program was established to safeguard "public and employee health and safety; ensur[e] compliance with applicable laws, rules, and regulations; and prevent[] fraud, mismanagement, waste and abuse" at DOE's government-owned, contractor- operated facilities. 57 Fed. Reg. 7533 (March 3, 1992). Its primary purposes are to encourage contractor employees to disclose information which they believe exhibits unsafe, illegal, fraudulent, or wasteful practices, and to protect those "whistleblowers" from consequential reprisals by their employers. The regulations governing the DOE's Contractor Employee Protection Program are set forth at Title 10 Part 708 of the Code of Federal Regulations.

B. Procedural History

In December 1997, Mr. Dwyer filed a complaint with the DOE's Office of Inspector General (IG). After making a preliminary determination that the complaint fell within the jurisdiction of Part 708, the IG referred the complaint to the DOE's Ohio Field Office (DOE/OH) for an attempt at informal resolution. After DOE/OH was unable to resolve the complaint, the IG began an investigation of the matter. The investigation was pending when, on April 14, 1999, revisions to Part 708 took effect. See 64 Fed. Reg. 12,862 (March 15, 1999). Under the revised procedures, investigations are conducted by the DOE's Office of Hearings and Appeals (OHA). On June 23, 1999, an OHA investigator issued a report of his investigation of the complaint, and the OHA Director appointed me to be the hearing officer in this matter. 10 C.F.R. § 708.23(a), 708.25(a).

On September 7, 1999, FDF filed a Motion to Dismiss Mr. Dwyer's complaint. FDF referred to the

decision of an arbitrator on a labor grievance filed by Mr. Dwyer's union, arguing that the "arbitrator considered the same issues and facts under a collective bargaining agreement with employee protections virtually identical to those in the [Contractor Employee Protection Program]. The Secretary should defer to the arbitrator's opinion and award." Motion to Dismiss at 1. FDF specifically cited a provision of the revised Part 708 regulations stating that a complaint may not be filed if a complainant has chosen "to pursue a remedy under State or other applicable law, including final and binding grievance-arbitration procedures, unless" the complainant has "exhausted grievance-arbitration procedures . . . and issues related to alleged retaliation for conduct protected under [Part 708] remain." 10 C.F.R. § 708.15(a)(3). I denied the Motion, finding that this provision of the revised regulations should not be retroactively applied to bar a complaint filed by Dwyer before the revised regulations took effect. Fluor Daniel Fernald, 27 DOE ¶ 87,532 (1999).

The hearing was held at Fernald, Ohio on January 18-19, 2000. At the conclusion of the hearing on January 19, the parties elected to forego oral argument, and requested permission to file post-hearing briefs. The OHA received post-hearing brief from both parties and closed the record on March 3, 2000.

II. Analysis

It is the burden of the complainant under Part 708 to establish "by a preponderance of the evidence that there was a disclosure, participation, or refusal described under § 708.5, and that such act was a contributing factor in a personnel action taken or intended to be taken against the complainant." 10 C.F.R. § 708.9(d). See Ronald Sorri, 23 DOE ¶ 87,503 (1993) (citing McCormick on Evidence § 339 at 439 (4th ed. 1992)). If the complainant meets his burden of proof by a preponderance of the evidence that his protected activity was a "contributing factor" to the alleged adverse actions taken against him, "the burden shall shift to the contractor to prove by clear and convincing evidence that it would have taken the same personnel action absent the complainant's disclosure . . . ." 10 C.F.R. § 708.9(d). See Ronald Sorri, 23 DOE ¶ 87,503 (1993) (citing McCormick on Evidence, § 340 at 442 (4th ed. 1992)). Accordingly, in the present case if Mr. Dwyer establishes that a protected disclosure, participation, or refusal was a factor contributing to his termination, FDF must convince me that it would have taken the action even if Mr. Dwyer had not engaged in any activity protected under Part 708. Helen Gaidine Oglesbee, 24 DOE ¶ 87,507 at 89,034-35 (1994).

After considering the record established in the investigation by the Assistant Inspector General and OHA, the parties' submissions, the testimony presented at the hearing, and the post-hearing briefs, for the reasons stated below I have concluded that Mr. Dwyer has met his burden of proving by a preponderance of the evidence that he made a protected disclosure concerning health or safety that contributed to his termination. However, I have concluded that FDF has shown by clear and convincing evidence that it would have terminated Mr. Dwyer absent this disclosure.

A. Whether Mr. Dwyer Engaged in Activities Protected Under 10 C.F.R. § 708.5

The Part 708 regulations prohibit discrimination by a DOE contractor "against any employee because the employee (or any person acting pursuant to a request of the employee) has,"

(1) Disclosed to an official of DOE, to a member of Congress, or to the contractor (including any higher tier contractor), information that the employee in good faith believes evidences--

(i) A violation of any law, rule, or regulation;

(ii) A substantial and specific danger to employees or public health or safety; or

(iii) Fraud, mismanagement, gross waste of funds, or abuse of authority;

(2) Participated in a Congressional proceeding or in a proceeding conducted pursuant to this part; or

(3) Refused to participate in an activity, policy, or practice when--

(i) Such participation--

(A) Constitutes a violation of a Federal health or safety law; or

(B) Causes the employee to have a reasonable apprehension of serious injury to the employee, other employees, or the public due to such participation, and the activity, policy, or practice causing the employee's apprehension of such injury--

(1) Is of such a nature that a reasonable person, under the circumstances then confronting the employee, would conclude there is a bona fide danger of an accident, injury, or serious impairment of health or safety resulting from participation in the activity, policy, or practice; and

(2) The employee is not required to participate in such dangerous activity, policy, or practice because of the nature of his or her employment responsibilities;

(ii) The employee, before refusing to participate in an activity, policy, or practice has sought from the contractor and has been unable to obtain a correction of the violation or dangerous activity, policy, or practice; and

(iii) The employee, within 30 days following such refusal, discloses to an official of DOE, a member of Congress, or the contractor, information regarding the violation or dangerous activity, policy, or practice, and explaining why he has refused to participate in the activity.

57 Fed. Reg. at 7542 (1992) (10 C.F.R. § 708.5(a)).(1) There are a number of activities in which Mr. Dwyer alleges he engaged that are potentially protected under Part 708.

1. April 1996 Refusal to Participate

First, Mr. Dwyer states that in or around April 1996, while working with another pipefitter on a job that required cutting pipe, liquid came out of the pipe. Mr. Dwyer immediately left the work area following what he believed was safety protocol, while his co-worker stayed. Even assuming that the complainant could demonstrate the dangerous nature of the activity and that he was not required to participate in this activity because of the nature of his employment, Mr. Dwyer has not alleged that continuing to work on the job would have constituted "a violation of a Federal health or safety law," that he, "before refusing to participate in an activity, policy, or practice ha[d] sought from the contractor and ha[d] been unable to obtain a correction of the violation or dangerous activity, policy, or practice" or that he, "within 30 days following such refusal, disclose[d] to an official of DOE, a member of Congress, or the contractor, information regarding the violation or dangerous activity, policy, or practice, and explaining why he . . . refused to participate in the activity." 10 C.F.R. § 708.5(a)(3). Thus, I do not find Mr. Dwyer's refusal to continue working on this particular job to be a refusal to participate protected under Part 708.

2. August 1996 "Job Stop"

Second, the complainant states that in late August 1996, he and his co-workers "were doing a walk-through and not wearing respirators and somebody was wearing a respirator and I put a job stop and we evacuated the building . . . ." Tr. at 190, 280-81, 330-31. However, neither of the two witnesses whom Mr. Dwyer questioned at the hearing about this incident could remember it taking place, and I found the demeanor of these two witnesses, compared with that of the complainant, to reflect more credibility. In any event, it is unlikely that this alleged activity by the complainant would be protected under 10 C.F.R. § 708.5(a). First, this activity fails to meet the same criteria for a protected refusal under 10 C.F.R. §

708.5(a)(3) as discussed above with regard to Mr. Dwyer's April 1996 refusal. Moreover, such a "job stop" would not constitute a protected disclosure under 10 C.F.R. § 708.5(a)(1) because the complainant does not allege that he made any disclosure regarding this incident that he believed evidenced a "violation of any law, rule, or regulation," a "substantial and specific danger to employees or public health or safety," or "[f]raud, mismanagement, gross waste of funds, or abuse of authority."

3. Internal Company Grievances

Third, Mr. Dwyer refers to a number of internal company grievances he filed during the course of his employment. These grievances include allegations that management officials and employees of the company's medical department were harassing him, and also complain about the person assigned to hear the grievances and the timeliness of the company's response to them. These grievances could only conceivably be considered to be protected activity under 10 C.F.R. § 708.5(a) to the extent they might evidence what the complainant believed was mismanagement or abuse of authority, since there is no allegation that what Mr. Dwyer objected to was a "violation of any law, rule, or regulation," a "substantial and specific danger to employees or public health or safety," "[f]raud," or "gross waste of funds, . . ." However, I have reviewed copies of the grievances and find that they do not contain disclosures that evidence mismanagement or abuse of authority. At the root of these grievances are disagreements between Mr. Dwyer and his employer as to the application of company policy on medical leave, usually whether particular illnesses or injuries reported by Mr. Dwyer were genuine and whether they merited excused absences from work.

In considering whether such disclosures are protected under Part 708, I note that the Deputy Secretary of Energy has addressed this issue and concluded that

[e]quating a particular type of disagreement to "mismanagement" as contemplated by the "whistleblower" regulation demands a careful balancing lest the term encompass all disagreements between a contractor and its employees. . . . [T]here must be some assessment as to whether the nature of the disagreement evidences the type of disclosure of mismanagement that the regulation was designed to protect, at the same time granting appropriate deference to traditional management prerogatives needed to conduct an organization through teamwork.

Narish C. Mehta v. Universities Research Association, 24 DOE ¶ 87,514 at 89,065 (1995)

The regulatory preamble to the version of Part 708 being applied in this case speaks of the DOE's responsibility "for safeguarding public and employee health and safety; ensuring compliance with applicable laws, rules, and regulations; and preventing fraud, mismanagement, waste, and abuse" and the need "to assure workplace conditions at DOE facilities that are harmonious with safety and good management." This language indicates an intent to address problems that are more systemic and serious in nature than relatively minor disputes between an employee and his employer over the employee's qualification for medical leave. Thus, I do not find the grievances filed by the complainant evidence "mismanagement" as that term is used in Part 708. For the same reasons, I do not find that the grievances contain evidence of the type of "abuse of authority" the Part 708 regulations were designed to protect.

4. September 1997 Disclosures

Finally, Mr. Dwyer alleges that he made protected disclosures in September 1997 at Fernald's Plant 6. One of the allegations relates to complaints Mr. Dwyer made to a safety engineer about laundry bags presenting a tripping hazard in the entry way to Plant 6. Tr. at 248. Though the safety engineer does not dispute that there was "excessive trash and clothing coming out of Plant 6" at this time, Tr. at 257, and that arrangements were made after Mr. Dwyer's complaints to increase the frequency of pick-up of the bags in response to Mr. Dwyer's concerns, there was conflicting testimony as to whether the bags presented a safety hazard. The safety engineer testified that there was a three- or four-foot opening

between the bags for workers to walk through, and that therefore the bags were not a safety issue, only a housekeeping issue. Tr. at 248, 249, 259; see also Tr. at 76, 467 (witness testified that "there was a four-foot wide opening or better that you could get around between where you enter into Plant 6 and the desk where you badge in."). The complainant contends that the presence of the bags was a safety hazard and testified that he saw two workers' feet "just hit [a bag] a little, a little trip, that's all." Tr. at 325. Yet Mr. Dwyer also testified that he believed he could walk through the opening between the bags without risking any danger to himself. Tr. at 326, 329. There is no allegation that Mr. Dwyer's disclosure evidenced a "violation of any law, rule, or regulation" and, on balance, I do not find a preponderance of evidence to support a good faith belief that the bags presented a "substantial and specific danger to employees or public health or safety." I found the testimony of the complainant on this issue to be equivocal and, similar to my impressions of the demeanor of the complainant compared to other witnesses noted above, I found the testimony of Mr. Dwyer to be generally less credible than that of the other two witnesses who testified as to any safety hazard caused by the bags.

The other allegations of protected disclosures made in September 1997 relate to a Plant 6 asbestos abatement job in which Mr. Dwyer was assigned to assist. On September 23, 1997, Mr. Dwyer questioned why he was not required to wear the same type of dosimeter that he had worn during a previous assignment in Plant 6, and also complained that there was dust falling from the rafters of the building. A safety engineer was called in to address Mr. Dwyer's concerns, and testified at the hearing that Mr. Dwyer was wearing a regular dosimeter that measures alpha/beta [radiation]. The one he wore before measured gamma [radiation]. What I found out after we talked to him, before -- I did go back and try to find where he had been. He was working in a high radiation [area].

What we tried to explain, like I said, you could go in Plant 6 one day and be dressed one way. You could go in another day and be dressed differently, . . .

Tr. at 238. Asked whether there was a "dust concern" at the time of Mr. Dwyer's complaint, the safety engineer testified,

No. There was -- Plant 6 is dirty and it is dusty, but we do continuous air monitoring in Plant 6 and the guys that would be doing the job were going to be dressed out in PAPRs [powered air purifying respirator] and PPEs [personal protective equipment]. And the area was going to be cordoned off where we were going to be doing our work.

Because Mr. Dwyer was not satisfied with the explanation of the safety engineer, a radiation engineer came to address Mr. Dwyer's concerns, and concurred with the safety engineer. Tr. at 241-42. Mr. Dwyer was still not satisfied, and so was given the telephone number of FDF's director of health and safety. Tr. at 243. Mr. Dwyer apparently did not call the number.

Again, because Mr. Dwyer does not allege that these disclosures about his dosimeter and dust were evidence of a "violation of any law, rule, or regulation," the relevant issue is whether Mr. Dwyer disclosed information that he in good faith believed evidenced a "substantial and specific danger to employees or public health or safety; . . ." 10 C.F.R. § 708.5(a)(1)(ii). Regarding Mr. Dwyer's questions about his dosimeter, I see no basis for finding that, by Mr. Dwyer merely asking these questions, he conveyed any evidence of danger to employees or public health or safety, let alone evidence of a "substantial and specific danger." Therefore, I cannot find that the questions about his dosimeter constitute a protected disclosure.

The concern raised by Mr. Dwyer about dust falling from the rafters of the building presents a more difficult issue. A FDF "safety and health team coach," the manager of the safety engineer to whom Mr. Dwyer reported his concern, testified at the hearing as follows:

HEARING OFFICER GOERING: And you are aware that they were doing [asbestos] abatement that was marked off in certain areas of Plant 6?

THE WITNESS: Mm-hmm.

HEARING OFFICER GOERING: And there were certain areas of Plant 6, outside of the abatement area, that respiratory protection was not required?

THE WITNESS: Right.

HEARING OFFICER GOERING: So somebody in that period of time in Plant 6 in an area outside of the abatement area, they look up, they see dust falling from the rafters . . .

- . . .
- . . either inside or outside the abatement area. Is either one of those grounds for a reasonable person to raise a safety concern?

THE WITNESS: Sure. Anything -- anything anybody is concerned about they should feel free to say, hey, I'm concerned about this, talk to the safety professional, what do you think, no matter what the concern.

HEARING OFFICER GOERING: Okay. Well, all right. It gets a little difficult when I ask this kind of question here because we've had testimony that it's the philosophy of Fernald that, you know, you'll respond to even baseless concerns.

THE WITNESS: That's true.

HEARING OFFICER GOERING: So what I'm trying to get at is whether or not a reasonable person in a situation seeing dust falling down, is it reasonable for that person to have a safety concern?

THE WITNESS: Sure, sure. That's reasonable for them to voice that concern, sure.

HEARING OFFICER GOERING: Okay.

THE WITNESS: I have an unfair advantage because I see all the [dosimetry] results that come out of Plant 6. I know there were never any issues. I see all the internal doses that were received.

HEARING OFFICER GOERING: Right. But somebody in a -- a pipefitter who doesn't have that advantage --

THE WITNESS: Right.

HEARING OFFICER GOERING: -- it's -- you would say it's reasonable for that person?

THE WITNESS: Sure, sure.

Tr. at 506-08. This testimony leads me to conclude that, whether the falling dust in fact posed a danger to health or safety, the presence of falling dust in that environment was evidence sufficient to support a *good faith belief* of a substantial and specific danger to employee safety. See Rosie L. Beckham, Case No. VBA-0044, 27 DOE ¶ (April 10, 2000) ("for purposes of Part 708, it does not matter whether the information a putative whistleblower disclosed is ultimately factually substantiated").

The respondent argues that while the concerns about "dust might have been reasonable in the first instance, . . . his persistence in refusing to accept valid, accurate explanations from responsible employees, considered together with [earlier] stall tactics before the start of the job, more reasonably suggest that delay was his objective as opposed to the articulation of a good faith safety concern." Post-Hearing Brief of Respondent at 22. The respondent cites a prior hearing officer's opinion in a Part 708 case to support the proposition that a "claimant's personal, non-safety-related motive supports [the] conclusion that [an] alleged disclosure is unprotected." Id. (citing Francis M. O'Laughlin, 24 DOE ¶ 87,505 at 89,030 (1994)).

First, I note that the hearing officer's conclusion in O'Laughlin as to the "self-serving nature" of the disclosures was only one of many factors he relied upon, among them his finding that the complainant did not "explicitly disclose any matter of health and safety" or "implicitly communicate[] a cognizable health and safety danger by his stated concerns . . . ." O'Laughlin, 24 DOE at 89,029-30. In any event, a recent decision of the OHA Director, reviewing a hearing officer's opinion, makes clear that the motivations of a complainant are not relevant to the determination of whether a disclosure is protected under Part 708.

The Hearing Officer also appears to have considered that Ms. Beckham may have made her disclosures in response to KENROB's negative comments about her job performance. In evaluating whether a person has made a disclosure in good faith, however, the person's motivations for making the disclosure are irrelevant. See Howard W. Spaletta, 24 DOE ¶ 87,511 at 89,051 (1995) (whether the Complainant was motivated to protect his reputation is irrelevant to the question whether the disclosures come within the ambit of Part 708 protection). Cases decided under the Whistleblower Protection Act also are in accord with this view. See Bump v. Dep't of Interior, 69 M.S.P.R. 354 (1996) (WPA makes no provision for considering whether the employee's personal motivation rendered his belief not genuine), Carter v. Dep't of Army, 62 M.S.P.R. 393, 402 (1994), aff'd, 45 F.3d 444 (Fed. Cir. 1995); see also Frederick v. Dep't of Justice, 65 M.S.P.R. 517, 531 (1994), rev'd on other grounds, 73 F.3d 349 (Fed. Cir. 1996). Hence, to the extent the Hearing Officer considered Ms. Beckham's motivations in communicating her concerns about KENROB's implementation of the FASA in finding that Ms. Beckman did not make a protected disclosure under Part 708, she erred.

Rosie L. Beckham, Case No. VBA-0044, 27 DOE ¶ (April 10, 2000).

Rather than calling for an inquiry into the motives of the complainant, "the good faith clause is intended to relieve complainants of the burden of proving that their allegations are correct or accurate. Under 10 C.F.R. § 708.5(a)(1), complainants must show only that they had a *reasonable belief* that their allegations were accurate." Howard W. Spaletta, 24 DOE ¶ 87,511 at 89,051 (1995). In this case, based primarily upon the testimony of the safety and health "team coach" discussed above, I conclude that Mr. Dwyer's belief as to the danger posed by falling dust in Plant 6 was reasonable, whatever the motive may have been for his disclosure of this information. Accordingly, I find that Mr. Dwyer thereby engaged in activity protected under Part 708.

B. Whether Mr. Dwyer's Protected Activity Was a Factor Contributing to his Termination

In prior decisions of the Office of Hearings and Appeals, we have established that,

A protected disclosure may be a contributing factor in a personnel action where "the official taking the action has actual or constructive knowledge of the disclosure and acted within such a period of time that a reasonable person could conclude that the disclosure was a factor in the personnel action."

Charles Barry DeLoach, 26 DOE ¶ 87,509 at 89,053-54 (1997) (quoting Ronald Sorri, 23 DOE ¶ 87,503 at 89,010 (1993)); Ronny J. Escamilla, 26 DOE ¶ 87,508 at 89,046 (1996).

In this case, there is fairly clear temporal proximity between Mr. Dwyer's protected disclosure in Plant 6 on September 23, 1997, and his subsequent suspension on October 6, 1997, and termination on October 16, 1997. It also appears that at least one of the two deciding officials in this case, FDF managers Mel Karnes and Jean West, knew of Mr. Dwyer's September 23 disclosure. Tr. at 15 (FDF opening statement recounting that "West and Karnes suspended him pending investigation."); Tr. at 215 (Mr. Karnes testimony that he was "the one who made the call on" Mr. Dwyer's termination). Mr. Karnes testified that he remembered the September 1997 events at Plant 6, that he "was brought into that one," and specifically that he "remember[ed] the concerns that were raised about dust." Tr. at 199-200. Thus, I find the preponderance of the evidence supports the conclusion that Mr. Dwyer's September 23, 1997 disclosure about dust in Plant 6 was a contributing factor to his suspension and dismissal.

C. Whether FDF Would Have Terminated Mr. Dwyer Absent His Protected Disclosure

For the reasons set forth below, I find based on my review of the record in this case clear and convincing evidence that FDF would have terminated Mr. Dwyer absent the protected disclosure described in section II.A above. My conclusion is based on compelling evidence that FDF's action was motivated by its finding that Mr. Dwyer violated two of the "Category A" rules of conduct governing FDF employees, violations that are considered "extremely serious misconduct." Respondent's Exhibit 24. The company's procedures for employee discipline define a "Category A Rule" as one "that, when not followed, may result in immediate discharge without oral reminder, written reminder, or decision-making leave." Respondent's Exhibit 21.(2) In Mr. Dwyer's case, the two violations at issue were "Willful hampering or interfering with work or production" and "Insubordination, including failure to carry out definite instructions or assignments." Respondent's Exhibit 2.

On October 6, 1997, Mr. Dwyer returned to work from medical leave. He had with him a note from his doctor dated October 3, 1997, stating that he could "return to work Monday 10/6/97, with light duty work. He cannot climb or lift anything over 10 lbs for the next two 2 wks." Respondent's Exhibit 13. Based on this restriction, FDF manager Jean West assigned Mr. Dwyer to work as a "porter," i.e. performing routine cleaning duties. Tr. at 516. According to Ms. West, this job did not require climbing, and that because Mr. Dwyer could control how much he lifted he would not have to lift over 10 pounds. Id. Mr. Dwyer refused to accept this assignment, telling Ms. West "that he was a pipefitter and that he was not a porter," id., and that he "had a walking restriction and . . . could not perform as a porter." Tr. at 21; see also Tr. at 370. At the hearing, Ms. West described her reaction.

I was giving him a direct assignment, which I had the power in [Industrial Relations] to do and did it frequently for other employees. And when he told me that he did not want to be a porter, along with some of the other things that Mel [Karnes] had brought to my attention, I thought at this point it might be best to suspend Mr. Dwyer. And he was very hostile. He was being very hostile, and I just needed to get him out of there at that point.

Tr. at 518-19. Mr. Karnes described his discussion with Ms. West leading to Mr. Dwyer's suspension.

At the time we stepped outside. I told Jean I hadn't had the time to look into a little bit more of Mr. Dwyer's past with other supervisors and told her that there was a definite pattern here to avoiding work. And we both decided at that time to put him under suspension to allow us time or allow me time to finish the investigation.

Tr. at 370-71. Mr. Karnes testified that he "went back and reviewed all the records, training records, time sheets, all the computer printouts that had anything attached with [Mr. Dwyer's] name, tracked down his supervisor[s]" and "went back and interviewed each one of them." He "talked to craft and talked to other rad techs and other safety individuals who had had contact with him." Based on the information he gathered, Mr. Karnes concluded "it was very obvious that [Mr. Dwyer] was avoiding certain types of training that he knew would keep him out of certain jobs in certain areas." Tr. at 371. While Mr. Dwyer's avoidance of training appeared to be Mr. Karnes' primary concern, he also found the following to be significant:

- "His constant visits to the medical department after jobs were assigned in the morning. He would go to the medical department. That was one of the traits; coming up with mysterious injuries, bleeding fingers, things of that nature. That was obvious."
- "The medical restrictions. Depending on who he worked for at the time, he would tell the supervisor he was under medical restriction where he couldn't do the work that they had for him."
- "The time spent in the restroom; a lot of the craft were complaining that they would get a job assignment and he'd go to the restroom, and he just happened to come out after the job and

everything was done in time to walk back to the shop with them."

- "Mr. Dwyer was quite famous, quite notorious for taking long times to dress out so that the crew who went in to do the work would be returning and, well, there was no sense of him going in, so he just returned with them."

Tr. at 372-73.

In addition to the information turned up by Mr. Karnes, Tr. at 23, Ms. West testified about her own observations of Mr. Dwyer on several occasions.

On one occasion -- on a couple of occasions you parked near me in the parking lot. We had to be here at 6:00. You would get here about quarter till or 10 till 6.

On a couple of occasions, you parked near me. I saw you get out of your vehicle, walk from your side of the car over to the passenger side, pick your crutches up, walk to the turnstile without the use of the crutches. And then, at the turnstile, you would put them under your arm and then proceed to limp.

Then, when you were assigned in the laundry, I saw you several times -- even though I was not your supervisor, but I was in that same area, I saw you, along with some of my other employees, walk around in the laundry without the assistance of crutches.

You would put them at the back of the building when you had to go over to the respirator side. You would . . . walk out of the building without the crutches without a limp.

You would go up at lunch time or break time up the hallway. I would stand in the back of the building and watch you walk up the hallway. You didn't limp or use the crutches.

Tr. at 24-25.

It is also clear, for several reasons, that FDF has not trumped up false or flimsy charges of insubordination or avoiding work as a pretext for terminating Mr. Dwyer in retaliation for protected conduct. First, the demeanor of the testimony of both Ms. West and Mr. Karnes convinced me that their motivation for terminating Mr. Dwyer was sincere--that he had been insubordinate and had a history of avoiding work.

Moreover, other hearing testimony and documentary evidence strongly supports the conclusion that Mr. Dwyer was in fact insubordinate and routinely tried to avoid work. As to the allegation of insubordination, Mr. Dwyer does not dispute that he refused to accept the work he was assigned on October 6, 1997. Instead, he claims that medical restrictions did not permit his to perform any job that required him to be on his feet, though the doctor's note he brought to work that day clearly contradicts this claim. In addition, the record is replete with testimony of Mr. Dwyer's co-workers and supervisors supporting the allegation that Mr. Dwyer had a pattern of avoiding work. See, e.g., Tr. at 69, 168, 425, 428-30, 442-43, 452-53, 484. While recounting all the testimony would extend the length of this decision considerably, the following excerpts capture the flavor of the opinions expressed, almost universally, at the hearing.

- "I believe the general consensus was you was a slacker and didn't want to pull your own weight." Tr. at 161 (testimony of co-worker).
- One of Mr. Dwyer's supervisors was reluctant to express his opinion. "It's kind of hard for me, because he's out of my local [union]. I don't really want to say anything bad against him." The supervisor continued,

I never had a good day with him, when I was his supervisor, not one good day with him. Every -- excuse me, folks. I just don't talk this way about people. But never had a good day. That's about all I could say.

. . . .

I had trouble with the folks working with him, because once they go on the job, they couldn't find him. You know, he'd be there with them, go to the job briefing whatever, then, from there, the guys would not see him, you know.

Tr. at 52-53.

· Another of Mr. Dwyer's co-workers summed up his opinion as follows, addressing Mr. Dwyer directly:

Well, I've done everything from flip hamburgers from 16 years old to working at General Motors and coming out here, and in my estimation, I've never seen anybody as sorry as what you were.

- . . .
- . . [Y]ou wanted everybody but yourself to do the work. You sit there and watched us, laughed at us while we worked, and sit there and had that stinking grin on your face. You know, you worked harder to get out of work than you did to do it. You made up excuses why you couldn't do it. It made me sick, to tell you the truth.

Tr. at 110.

Finally, there is both documentary evidence and hearing testimony supporting the opinion expressed by Mr. Karnes and Ms. West that Mr. Dwyer repeatedly attempted to avoid obtaining the training necessary to perform his job. See, e.g., Respondent's Exhibit 25 (training class attendance rosters); Tr. at 181-88 (testimony of training instructor).

I therefore conclude that the primary motivating factor behind the decision of Mr. Karnes and Ms. West to terminate Mr. Dwyer was their opinion that he had been insubordinate and had a history of work avoidance. Moreover, I am convinced that this factor, by itself, would have resulted in Mr. Dwyer's termination, i.e. would have occurred in the absence of Mr. Dwyer's disclosure that I found above to be protected under Part 708. Both Mr. Karnes and Ms. West testified credibly that, not taking into account the safety-related concerns raised by Mr. Dwyer, they would have nonetheless decided to terminate him based on the insubordination and avoidance of work described above. Tr. at 375 (testimony of Mr. Karnes that "10 percent, 20 percent maximum" of Mr. Dwyer's work avoidance due to his safety related concerns); Tr. at 376, 528. Bolstering this testimony is evidence that, in a five year period ending in 1999, sixteen FDF employees, including Mr. Dwyer, were terminated for committing Category A violations, in most cases based on only one violation. Respondent's Exhibit 21. Clearly, the finding of two Category A violations in this case would have led Mr. Karnes and Ms. West to terminate Mr. Dwyer absent the one instance in which Mr. Dwyer engaged in protected activity. In sum, I find that FDF has met its burden to "prove by clear and convincing evidence that it would have taken the same personnel action absent the complainant's disclosure . . . ." 10 C.F.R. § 708.9(d).

IV. Conclusion

As set forth above, I have found that the complainant has met his burden of proof of establishing by a preponderance of the evidence that he made a disclosure protected under 10 C.F.R. Part 708. I also have determined that the complainant's disclosure was a contributing factor in his termination. However, I found that FDF has proven by clear and convincing evidence that it would have terminated the complainant absent his disclosures. Accordingly, I conclude that the complainant has failed to establish the existence of any violations of the DOE's Contractor Employee Protection Program for which relief is warranted.

It Is Therefore Ordered That:

(1) The request for relief filed by Thomas Dwyer under 10 C.F.R. Part 708 is hereby denied.

(2) This is an initial agency decision that becomes the final decision of the Department of Energy unless a party files a notice of appeal by the fifteenth day after receipt of the decision.

Steven J. Goering

Staff Attorney

Office of Hearings and Appeals

May 2, 2000

(1)This decision applies section 708.5 as it existed prior to the revisions of April 15, 1999. Linda D. Gass, 27 DOE ¶ 87,525 at 89,141 (1999) (“drafters of the revisions to Part 708 did not intend to apply the expansion in scope of 10 C.F.R. § 708.5 to cases pending on April 15, 1999").

(2)Thus, although Mr. Dwyer has repeatedly complained that his violations were never documented or brought to his attention, see, e.g., Post-Hearing Brief of Complainant at 2, the company’s employee discipline procedures clearly do not require such a warning. Moreover, in grievance reports he filed as early as May 1996, Mr. Dwyer notes that he was warned of violations of company rules, pointing to these warnings as evidence of harassment. FEMP Grievance Report Nos. A7450, A7452.

Case No. VBH-0007

September 27, 1999

DEPARTMENT OF ENERGY

OFFICE OF HEARINGS AND APPEALS

Initial Agency Decision

Name of Case: Salvatore Gionfriddo

Date of Filing: June 23, 1999

Case Number: VBH-0007

On December 28, 1998, Salvatore Gionfriddo (Complainant) filed a Complaint of Reprisal with the Director of the Federal Energy Technology Center of the Department of Energy (DOE) pursuant to 10 C.F.R. Part 708, the DOE Contractor Employee Protection Program. The Complainant alleged that he made a protected disclosure under Part 708 and his employer, Energy Research Corporation (ERC) retaliated against him by terminating his employment. (1)

On July 19, 1999, ERC filed a Motion to Dismiss the complaint. The firm claims that its agreement with the DOE is not covered by Part 708 and that it is not obligated to participate in proceedings

under this Part. The Complainant filed a Memorandum in Opposition to the Motion on August 3. Thereafter, I requested that ERC submit a complete copy of its agreement with the DOE, and the firm filed this document on August 5. ERC also provided a copy of the agreement to the Complainant. I then permitted the parties to submit another round of briefs and responses discussing all the matters related to the jurisdictional issue. These filings were made on September 7 and 14. I have reviewed all the submissions on this matter and other relevant material and have concluded that the Motion to Dismiss should be granted. Accordingly, no further action is warranted with respect to the instant Complaint of Reprisal.

The relevant facts in this case are as follows. ERC engages in the research and development of advanced carbonate fuel cells and batteries used to generate and store electric power. Fuel cells convert fuels, such as natural gas, to electricity through an electrochemical reaction. ERC August 2, 1999 Brief at 2. According to the firm, this technology was developed by ERC through funding by many sources, including a series of research and development contracts, grants and cooperative agreements that ERC entered into with federal and state agencies including the DOE, contracts with public utilities, associations and commercial organizations and internally sponsored independent research and development efforts. ERC August 2, 1999 Brief at 1.

The Complainant was employed by ERC in the fuel cell area beginning in March 1982. In September 1998, he was given an assignment to compare a short fuel cell stack with a tall fuel cell stack, and in his report concluded that "unless the trend of cell shrinkage changes drastically, the loss of compressive load for tall stacks is highly probable." June 23, 1999 Report of Investigation at 4. On October 23, 1998, ERC terminated the Complainant's employment. It is the Complainant's position that his report was a protected disclosure because the individual cell shrinkage problem, if not corrected, poses the hazards of fire and explosion, which would qualify as significant safety risks under Section 708.5(a).

In its Motion to Dismiss, ERC states that its relationship with the DOE was in the form of a "Cooperative Agreement." The firm claims that it is not covered by the DOE's Contractor Employee Protection Regulations because it is not a DOE contractor. As discussed below, I find that ERC is correct.

Part 708 provides that for jurisdiction to adhere, the underlying procurement contract must include a specific reference either to Part 708 or to the requirements of DOE. The original version of Part 708 provided that this "part is applicable in complaints of reprisal filed after the effective date of this part that stem from disclosures, . . . involving health and safety matters if the underlying procurement contract described in § 708.4 contains a clause requirement compliance with all applicable safety and health regulations and requirements of DOE (48 C.F.R. 970.5204-2)." 10 C.F.R. §708.2(a)(emphasis added). The preamble to the current Interim Final Rule states that "this provision [10 C.F.R. §708.2(a)] is no longer necessary since DOE contracts now require compliance with Part 708 when specifically applicable." 64 Fed. Reg. 12862 at 12863 (March 15, 1999).

The ERC cooperative agreement does not contain any language requiring the firm to comply with DOE requirements as set forth at 48 C.F.R. 970.5204-2 or Part 708. This fact supports the firm's position that it is not required to participate in the Contractor Employee Protection Program.

However, the Complainant points to the following language in the agreement to support its position that ERC is bound by Part 708:

The Participant shall have in place, within 60 days of execution of the cooperative agreement, a safety and health program for the DOE work being performed consistent and in accordance with applicable Federal, State and local laws, including codes ordinances and regulations.

The Participant shall take all necessary precautions in the performance of the work under this cooperative agreement to protect the safety and health of employees and the public and shall comply with all legally required safety and health regulations and requirements.

Cooperative Agreement, Part II, 8A and B.

The Complainant maintains that these two paragraphs are sufficient to bring ERC within the coverage of Part 708. It points to 10 C.F.R. § 708.2 (prior regulations), which, as cited above, provides that the Contractor Employee Protection Program is applicable to complaints of reprisal where the underlying contract "contains a clause requiring compliance with all applicable safety and health regulations and requirements of DOE," or if the underlying contract "contains a clause requiring compliance with this part." The Complainant contends that the two paragraphs of the cooperative agreement cited above requiring ERC to comply with "all legally required safety and health regulations" require the firm to comply with Part 708.

I do not agree. Section 708.2 plainly provides that the underlying procurement contract must contain a clause requiring compliance with requirements of DOE. The cooperative agreement in the instant case contains no such language. It requires compliance with generally applicable health and safety rules. This language is not sufficient to put ERC on notice that it must comply with any particular or unusual requirements that DOE may have adopted in the area of contractor employee protection. It merely provides that ERC must comply with all applicable health and safety regulations. This general language refers to obligations to provide a safe and healthy working environment, as required by applicable laws and regulations. Any employer would be required to do as much. It does not mean that ERC is bound to provide other unspecified benefits, such as the protections afforded by the DOE Contractor Employee Protection Program.

In this regard, DOE contracts with firms that must comply with Part 708 are quite clear on this point, and thereby significantly different from the ERC/DOE cooperative agreement. For example, under the prior regulations, those in effect in 1994 when the ERC agreement was signed, a contract included language such as the following:

WHISTLEBLOWER PROTECTION FOR CONTRACTOR EMPLOYEES (DEC 1992) (DEAR 952.222-70)

(a) The Contractor shall comply with the requirements of the "DOE Contractor Employee Protection Program" at 10 C.F.R. Part 708, with respect to work performed on-site at a DOE-owned or leased facility, as provided in Part 708. (2)

There could be no doubt on the part of a firm that signed a contract containing this type of provision that it was to comply with Part 708. This language is entirely different from the broad, general language of the ERC agreement, requiring it to obey applicable health and safety laws and regulations.

In sum, the fact that the agreement between the DOE and ERC did not contain the necessary regulatory language requiring compliance with Part 708, while not necessarily conclusive, is in my view a strong indication that the firm is not bound by the requirements of that Part.

There is other evidence supporting this determination. After reviewing the cooperative agreement, I have concluded that the omission of the regulatory language was not inadvertent. As discussed below, the absence of the key language specifically mentioning Part 708 is consistent with the very nature of the instant agreement between ERC and the DOE.

Part 708 is also referred to as the "DOE's Contractor Employee Protection Program." As this title suggests, the regulations generally apply to contractors and their employees. 10 C.F.R. §§ 708.2 and .3. (3) In the present case, the cooperative agreement between the DOE and ERC does not seem to qualify as a contract for purposes of Part 708. There is persuasive evidence to the effect that contracts and cooperative agreements are distinct and different devices, and that these differences are not just technicalities. See 31 U.S.C. §§ 6303, 6305. The Federal Acquisition Regulations specifically state that "Contracts do not include grants and cooperative agreements covered by 31 U.S.C. 6301 et seq." 48 C.F.R. 2.101 (definition of contract). Those sections of Title 31 are also known as the Federal Grant and Cooperative Agreement Act.

The document memorializing the agreement between ERC and the DOE specifically cites the Federal Grant and Cooperative Agreement Act as the authority for the agreement. The instrument is not entitled or referred to as a "contract" between the DOE and ERC. The heading of the agreement refers to a "Notice of Financial Assistance Award." In the DOE/ERC agreement itself, there are no references to the arrangement between the DOE and ERC as being anything other than a "Cooperative Agreement." The arrangement is not referred to as a contract between DOE and ERC. Moreover, the ERC Cooperative Agreement consistently refers to ERC as "the Participant," or a "recipient," but never as "the Contractor." In contrast, the Part 708 regulations consistently refer to the firm involved as a contractor.

Thus, the characteristics of the DOE/ERC agreement itself indicate that the arrangement is not the type that should fall within the scope of regulations intended to apply to DOE contractors. This is consistent with the fact that, as discussed above, the cooperative agreement contained no requirement that ERC participate in Part 708. It lends support to my determination that the absence of a reference to Part 708 in the agreement was by design, and that ultimately ERC is not bound by that Part.

The Complainant raises several additional arguments in support of its position that ERC does fall within Part 708. They are not persuasive and can be dealt with summarily.

The Complainant maintains that the facts surrounding the relationship between the DOE and ERC show considerable involvement between the two entities. (4) For example, the Complainant points out that under the terms of the agreement, the DOE will monitor all aspects of the project and review technical reports and information required to be delivered by the Participant to the DOE. The agreement also allows the DOE to make visits to the ERC's site, as necessary. It further provides that ERC will present briefings to the DOE at the DOE's site in Morgantown, West Virginia or at other designated locations. Cooperative

Agreement, Part II, 2(a); Part IV, Attachment A, page 10. The Complainant contends that this level of involvement brings ERC within the coverage of Section 708.3, which provides:

This Part applies to a complaint of retaliation filed by an employee of a contractor that performs work on behalf of DOE directly related to activities at a DOE owned or -leased site.

The Complainant contends that the fact that ERC must deliver reports to the DOE at a DOE site establishes that its work is directly related to activities at DOE at a DOE site. The Complainant cites META, Inc., 26 DOE ¶ 87,501 (1996)(META) as support for this position.

The Complainant seeks to draw significance for Part 708 purposes from matters which are unrelated to the jurisdictional issue. I do not believe that the considerations at issue in META are applicable to the instant case, since META was clearly a subcontractor, and thus had a relationship with the DOE that was of the type that normally falls within the scope of Part 708.(5) Once a firm has agreed to be bound by Part 708, it is certainly appropriate to examine whether the work performed is of the type that will otherwise require it to comply with that Part.

In the instant case, there is no need to consider in detail the nature of any work performed by ERC at a DOE site. Since there is no agreement referring to Part 708, the nature of ERC's contacts with the DOE is irrelevant for purposes of that Part. (6)
