

Supply Chain Management Center (SCMC)

In 2006, the National Nuclear Security Administration (NNSA) created the SCMC as part of a commitment to be a responsible steward of tax dollars. The SCMC is a service organization that works closely with the U.S. Department of Energy (DOE) and the Office of Environmental Management (EM) prime contractors nationwide to leverage \$4B of annual spending. This service organization focuses on yielding lower prices, optimizing procurement systems, and generating cost savings and value to the DOE. The SCMC's success is built on close, collaborative working relationships with contractors that maintain a focus on their mission and vision while measuring performance to established goals.

- Approximately 75% of all agreement value have been awarded to small businesses
- Small business opportunities at 21 DOE locations across 12 states
- The SCMC seeks more competitive and qualified suppliers with multi-site capability
- Approximately 90% of all SCMC spend is through small business agreements

The Mission

The long-term objective of the SCMC is to collaborate with the small business contractor community to implement, maintain and continuously improve an enterprise system to achieve integration, leveraged spend, and reduced acquisition cost.

Focus Areas

- Strategic Tools: eSourcing/eProcurement, eStore/Marketplace
- Commodity Agreements
- Client Requirements: In-depth understanding of site purchasing needs
- Strategic Planning: Insight and knowledge of commodity/supply markets
- Approach: Inclusive, collaborative method used to drive solutions

The Vision

To enhance current small business contractor acquisition processes creating an effective, efficient and strategically driven enterprise-wide sourcing and procurement function.
