

**WISH YOU WERE HERE**  
GRACIOSA ISLAND, AZORES

Hi again, we're on the road with the DOE Office of Science visiting our science projects across the globe - and universe! Today, our travel takes us by plane to the Azores.

As we raced through the clouds over the Atlantic Ocean, it reminded us that in this island off Portugal the ACE-ENA campaign is launching its own G-1 aircraft loaded up with a 55-instrument system in the sky for two 40-day missions. Managed by the Atmospheric Radiation Measurement user facility, the G-1 aircraft will complement ground instruments to gather data and improve models of Earth's climate. We're doing our bit by laying on the beach and studying the clouds as they roll by!

Wish you were here ...
