

Readiness Assessment for MF-628 Drum Treatment Facility - Advanced Mixed Waste Treatment Project – 5-07

ENVIRONMENTAL PROTECTION I WASTE HANDLING (ENV)

Objective:

ENV.1 Adequate and correct environmental permit requirements and hazardous waste procedures and limits are in place for operating the DTF ventilation system and conducting drum treatment operations in the DTF. (CR1, CR1O)

Criteria:

- a. Environmental permit requirements have been identified and included in new and revised procedures for drum treatment activities in the DTF.
- b. Appropriate limits, and waste handling practices for newly generated wastes have been identified and included in the applicable AMOW, PTW and procedures.
- c. Workers demonstrated adequate knowledge and application of environmental and waste handling/tracking requirements and practices during interviews and mockup operations.
