Name: OLC
URL: https://olc.energy.gov
Host: DOE
Cost: Federal Employees: Free
Contractors: Fee

The DOE On-line Learning Center (OLC) has a variety of free on-line courses available including cybersecurity courses and role-based and core competency training courses.

In an effort to provide DOE cyber professionals with the knowledge and skill sets needed to fulfill their cybersecurity and related IT functional roles, the OCIO has worked with an industry leader in on-line training development to provide a suite of role-based and core competency training courses. The following courses are currently available via OLC:

- *Authorizing Official (AO)/AO Designated Representative*
- *Security Risk Management (SRM)*
- *Supply Chain Risk Management (SCRM) for the IT Professional*
- *System Authorization*

For questions about the role-based/core competency courses, please send an email to cybsectrn@hq.doe.gov .

Any contractors needing an account should contact the OLC Helpdesk at energyolc@hq.doe.gov for registration information.

Name: FedVTE
URL: https://www.fedvte-fsi.gov/
Host: DHS
Cost: Free, must register through the DOE FedVTE POC

The Federal Virtual Training Environment (FedVTE) is a free Federal cybersecurity training resources sponsored by DHS for Federal employees and contractors. FedVTE provides a flexible, multi-media e-learning environment. The current course list is at https://www.fedvte-fsi.gov/files/FedVTE-CourseList.pdf.

To register for a FedVTE account, email your name, email address, Org code and site/location to the DOE **FedVTE POC at cybsectrn@hq.doe.gov.**

Name: DISA/IASE (Information Assurance Support Environment)
URL: http://IASE.DISA.mil
Host: DoD
Cost: Free

The Department of Defense has cybersecurity training products available on-line and/or on CD for Federal government use.

Name: FedCTE
Host: DHS
Cost: Free, must register through the DOE FedCTE POC

Federal Cybersecurity Training Events (FedCTE) is a Federal cybersecurity training resources sponsored by DHS for Federal employees and contractors.

FedCTE provides classroom training with hands-on exercises throughout the year at various times and locations, including Web-based. To be added to the DOE's FedCTE email distribution list to receive regular information on FedCTE offerings, send an email to cybsectrn@hq.doe.gov stating your request.

Name: NICCS
URL: www.niccs.us-cert.gov.
Host: DHS Office of Cyber Education and Awareness
Cost: Free or a Fee

The National Initiative for Cybersecurity Careers and Studies (NICCS) is an online portal developed to address the needs of the nation by making information on cybersecurity training, education (courses), and career opportunities available in a centralized, searchable, and usable online location. NICCS leverages efforts of government, industry, and academia to provide a comprehensive source to address the Nation's cybersecurity needs into the first website that compiles relevant and reliable cybersecurity information and makes it available to the public in one place. Simply put, NICCS is the implementation of the National Initiative for Cybersecurity Education (NICE).

NICCS allows people to find a career path that fits their interests, find degree programs or internships, learn about cyber competitions, or just find general information about cybersecurity.
