**Re: Cameron LNG, LLC
DOE/FE Order Nos. 3059 and 3391-A
FE Docket Nos. 11-145-LNG and 11-162-LNG
Semi-Annual Report**

To the Office of Oil and Gas Global Security and Supply:

On January 17, 2012, in Order No. 3059, the U.S. Department of Energy, Office of Fossil Energy (“DOE/OFE”), granted to Cameron LNG, LLC (“Cameron LNG”) a long-term, multi-contract authorization to export liquefied natural gas (“LNG”) to Free Trade Agreement nations. Subsequently, on September 10, 2014, in Order No. 3391-A, DOE/OFE granted to Cameron LNG a final, long-term authorization to export LNG to non-Free Trade Agreement nations. One of the conditions of each of those authorizations is that Cameron LNG file semi-annual written reports (on or before April 1 and October 1 of each year) describing the progress of the planned liquefaction facility from which Cameron LNG will export LNG. Cameron LNG hereby submits such semi-annual report for the six-month period ending September 30, 2014.

On December 7, 2012, Cameron LNG filed an application with the Federal Energy Regulatory Commission (“FERC”) pursuant to Section 3 of the Natural Gas Act for authorization to construct and operate the facilities necessary to export LNG. In an order issued on June 19, 2014, FERC granted that authorization. Cameron LNG has begun site preparation activities and expects to commence construction of the liquefaction project facilities in the fourth quarter of 2014. Based on the project construction schedule, Cameron LNG expects to achieve commercial operation of all three of its liquefaction trains in 2018, and have the first full year of production of LNG in 2019. As previously reported, Cameron LNG has executed long-term contracts with project customers for export of LNG from the project.

Cameron LNG, LLC Semi-Annual Report
FE Docket Nos. 11-145-LNG and 11-162-LNG

Please contact me with any questions regarding this filing.

Respectfully submitted,
