

# DOE Building Energy Asset Score

Overview and Deployment

U.S. DEPARTMENT OF  
**ENERGY**

Energy Efficiency &  
Renewable Energy

Andrew Burr  
Feb. 24-27, 2015

# Overview

---

National, free software tool for assessing the *physical and structural* energy efficiency of commercial and multifamily residential buildings

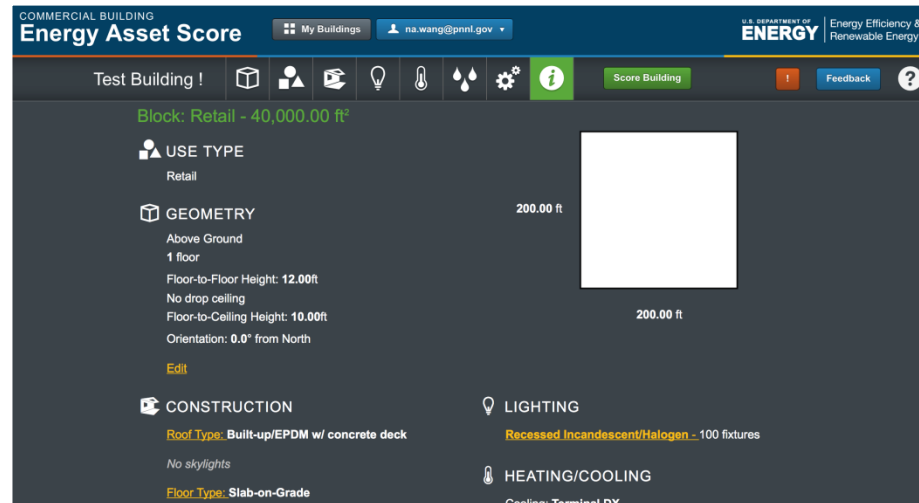

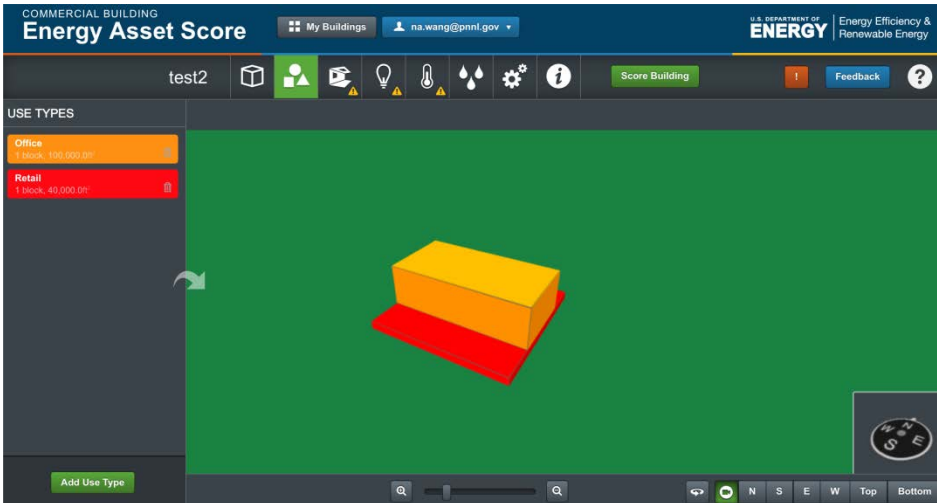

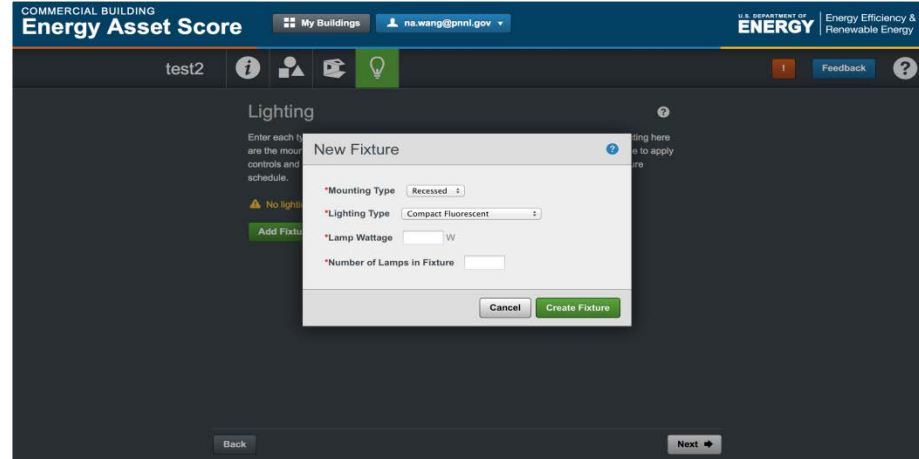

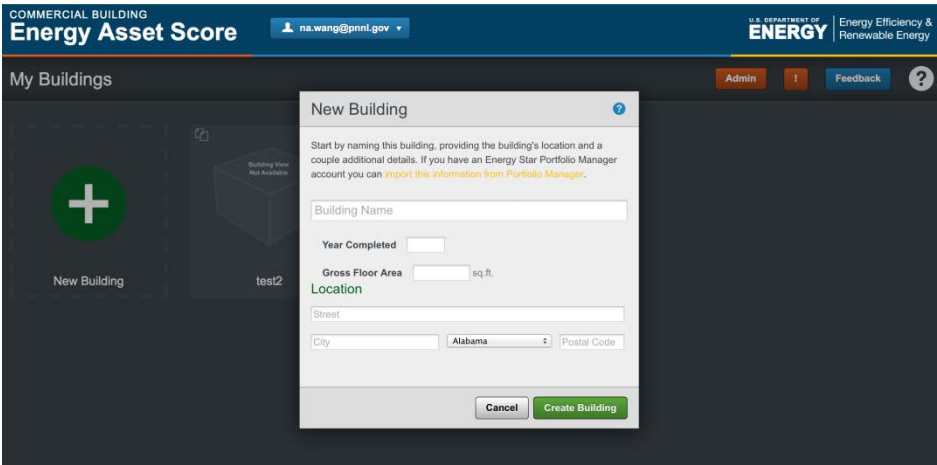

- Envelope (roof, walls, windows)
- Major systems and equipment (mechanical, electrical, service hot water)

# How it Works

Asset Score runs an *energy simulation* using a powerful building energy modeling engine (EnergyPlus)

- The simulation normalizes for building operations, occupancy and tenant behavior
- Users (owner, operator, service, provider, etc.) enter building information through an web interface
  - General information: # of floors, footprint dimension, orientation, use type
  - Envelope components: Roof, exterior wall, floor types, insulation levels
  - Fenestration: Skylights, windows, shading
  - Lighting: Fixture types, # of fixtures or % of served floor area, lighting controls
  - Mechanical components: Cooling/heating types, controls, equipment efficiency
  - Service water heating: Fuel type, distribution type, equipment efficiency

# How it Works

# Types of Buildings

Asset Score assesses the following *new and existing* building types:

- Multifamily (low/high-rise, 3+ units)
- Office
- Retail
- Assisted living
- City hall
- Community center
- Courthouse
- Educational (including K-12 schools)
- House of Worship
- Library
- Lodging
- Medical office
- Parking garage
- Police station
- Post office
- Senior center
- Warehouse (unrefrigerated)
- Mixed-Use (of the above types)

# Asset Score Report

## COMMERCIAL BUILDING ENERGY ASSET SCORE OVERALL BUILDING SCORE

Building ID #: XXXXX Gross Floor Area: 100,000 ft<sup>2</sup> Score Date: 02/21/2013 Building ID #: XXXXX

Assumed Occupancy and Operating Conditions	Estimated Source Energy Use (ashut)	Energy Use Intensity by Fuel Type
Number of Assumed Occupants: 500	Current Building: 159	Site Energy Use (ashut)
Hours of Operation: 49 hrs/wk	Upgraded Building: 107	Electricity: 44 kWh
Cooling Set Point: 75°F		Source Energy Use (ashut)
Heating Set Point: 70°F		Gas: 13
Misc. Elec. Loads: 0.75 W/ft <sup>2</sup>		District Heating: 0
		Fuel Oil: 0
		District Cooling: 0

The Commercial Building Energy Asset Score is a national rating system developed by the U.S. Department of Energy. The Score reflects the energy efficiency of a commercial building based on the building's structure, heating, cooling, ventilation, and hot water system. The building's Structure and Systems are individually evaluated and ranked. The Opportunities page provides recommendations to how to improve the building's energy efficiency, increase the building's Asset Score, and save money.

## COMMERCIAL BUILDING ENERGY ASSET SCORE UPGRADE OPPORTUNITIES

Building ID #: XXXXX Gross Floor Area: 100,000 ft<sup>2</sup>

### COST EFFECTIVE UPGRADE OPPORTUNITIES

Building Envelope	Energy Savings*	Cost†
• Add roof insulation in Office <a href="#">Learn More</a>	Medium	\$5
• Upgrade windows in Office with high performance double pane windows <a href="#">Learn More</a>	Medium	\$5
<b>Interior Lighting</b>		
• Upgrade fluorescent T8 lighting system in Office to compact fluorescent lighting system <a href="#">Learn More</a>	High	\$
<b>HVAC Systems</b>		
• Upgrade cooling system in Office with high efficiency electric DX cooling system <a href="#">Learn More</a>	High	\$55
• Add supply air temperature reset to HVAC system in Office <a href="#">Learn More</a>	Low	\$
<b>Hot Water Systems</b>		
• Upgrade service hot water system in Office with electric heat pump water heater <a href="#">Learn More</a>	Medium	\$5

\*Energy savings are calculated based on the current building's energy use and the proposed upgrade's energy use. The savings are based on the current building's energy use and the proposed upgrade's energy use. The savings are based on the current building's energy use and the proposed upgrade's energy use.

## COMMERCIAL BUILDING ENERGY ASSET SCORE STRUCTURE AND SYSTEMS

Building ID #: XXXXX Gross Floor Area: 100,000 ft<sup>2</sup>

### ABOUT THE BUILDING SYSTEMS ABOUT THE BUILDING ENVELOPE

Ranking†	Ranking†
Interior Lighting: Fair	Roof U-Value, Non-MTC: Good
Heating: Good	Floor U-Value, Mass: Good
Cooling: Good	Walls U-Value, Framed: Good
Overall HVAC Systems: Good	Windows U-Value: Fair
Hot Water: Fair	Walls + Windows U-Value: Fair
	Window Solar Heat Gain Coefficient: Fair

## COMMERCIAL BUILDING ENERGY ASSET SCORE BUILDING ASSETS

Building ID #: XXXXX Gross Floor Area: 100,000 ft<sup>2</sup>

### BUILDING SYSTEM CHARACTERISTICS SUMMARY

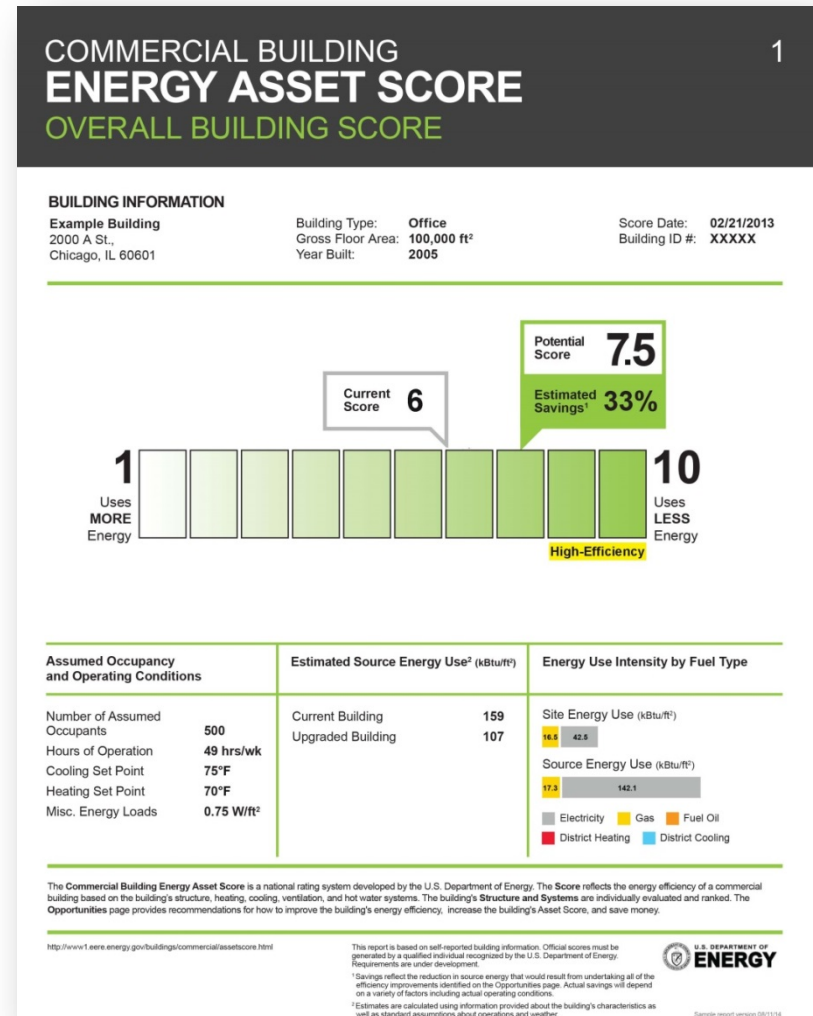

Geometry	Current Building
Above Ground: 2 floor	
Below Ground: 0 floor	
Floor-to-Floor Height: 14 ft	
Floor-to-Ceiling Height: 8 ft	
Orientation: S-Face South	
Use Type: Office	
Shading: No	
Exterior Shading Type: None	Exterior overhang: 0 ft
Height above Weather Protection: 2 ft	Height above Weather Protection: 2 ft
Skylight: No	Skylight: No
Daylight Included: No	Daylight Included: No
Indoor Lighting: T8	Indoor Lighting: T8
Lighting Type: T8	Lighting Type: T8
Percent of Total Floor Area Served: 100%	Percent of Total Floor Area Served: 100%
Occupancy Controls: Yes	Occupancy Controls: Yes
Daylight Controls: No	Daylight Controls: No
Lighting Power Density: Estimate†	Lighting Power Density: Estimate†
<b>Floor</b>	
Floor Type: Slab-on-Grade	
Windows	
Window Frame Type: Metal	
Glaze Type: Single pane	
Gas Fill Type: None	
Window Operation: Continuous	
Window to Wall Ratio: 0.4	
Window U-Value: U=0.88 (SI)U=4.75	
Window SHGC: 0.6	
Window VLT: Estimate†

# Asset Score Report

10-point scale based on predicted EUI

- Recently transitioned from 100-point scale
- Current and Potential Scores
- “10” represents lowest expected energy usage using current EE technologies
- Weather normalized
- Scale moves in half-point increments

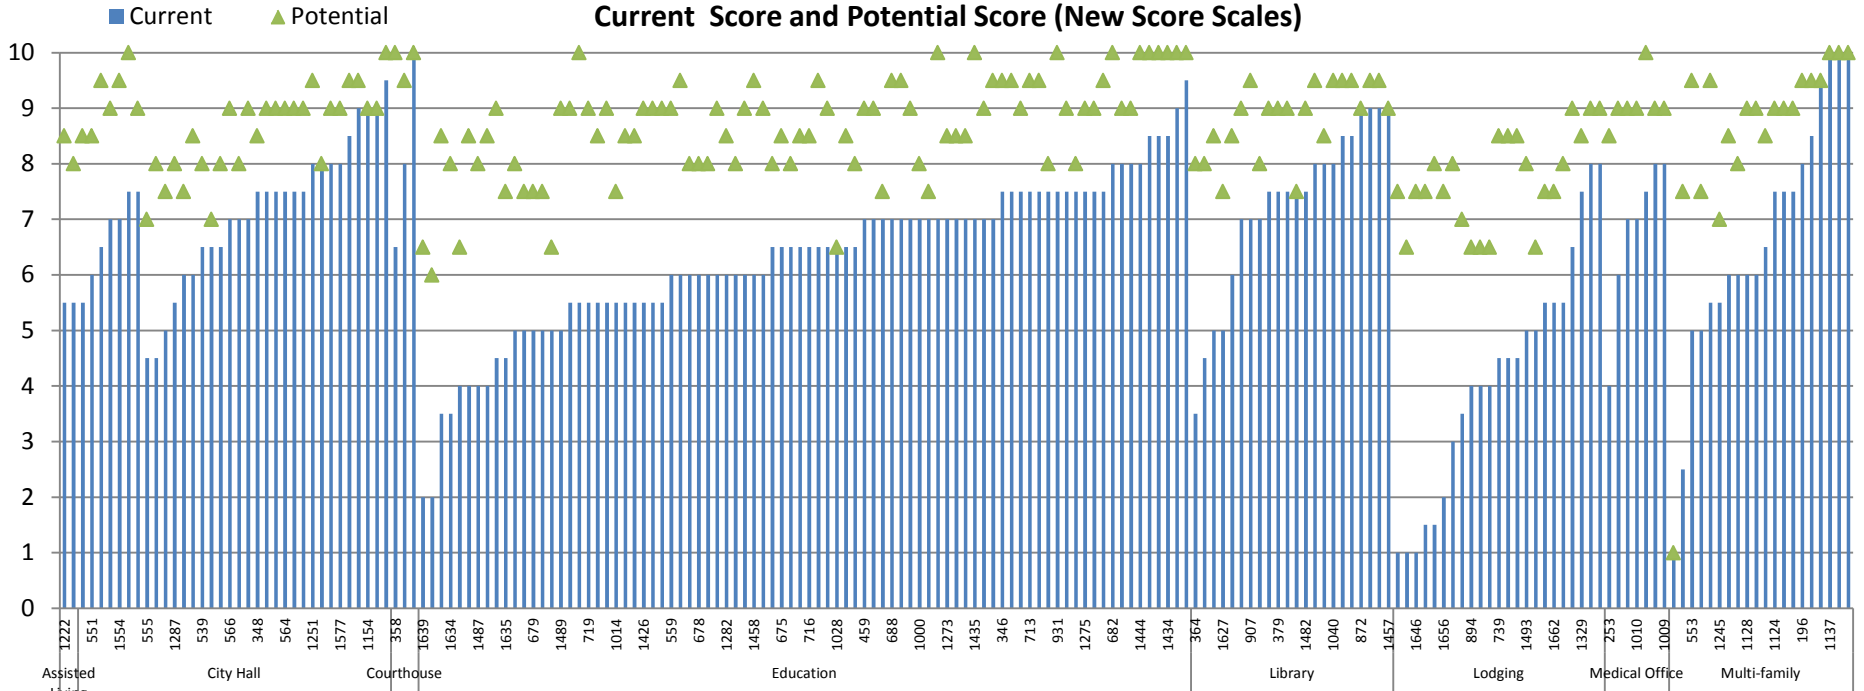

# Score Distributions - Office

# Score Distributions - Other

Current Score and Potential Score (New Score Scales)

# Value

---

EE Service Providers can use the Asset Score to:

- Strengthen your EE service offerings to clients and enhance business development
- Help clients communicate the efficiency of their assets to market with a DOE-validated score
- Use the Open Studio Model for further analysis
- Help utilities with DSM customer identification and acquisition
- Collect energy-related metrics across projects

# Call for Users

---

DOE Office of Energy Efficiency and Renewable Energy will recognize stakeholders that use, or commit to use, the Asset Score by May 2015

- Planned media release in late May 2015 recognizing current and committed users
- Technical assistance from Pacific NW National Lab will be made available
- Commitment does not require disclosure of any kind
- Further details TBD

---
