RE: Cameron LNG LLC, FE Docket No. 15-67-LNG NFTA

Dear Deputy Assistant Secretary Paula Gant,

On behalf of the West Cameron Port Authority, I am writing in strong support of Cameron LNG's application to increase their approved export volumes by 1.41 bcf/day of domestically produced LNG by constructing two additional liquefaction trains – Trains 4 and 5 (Expansion Project).

Cameron LNG's base export facility is currently under construction and is providing a boost to Louisiana's local and regional economy through increased economic activity. Over 140 permanent new quality jobs will be created at Cameron LNG through the base Liquefaction Project, many of these prior to the end of construction, and these jobs will directly benefit Louisiana's economy.

The Expansion Project will further expand these benefits to Southwest Louisiana over a longer duration and will likely provide an additional 50 permanent direct new jobs. Cameron LNG has been a good corporate citizen throughout its existence in Louisiana and we believe that their contributions to the success of SW Louisiana will continue.

Approval of this expansion project will help continue the dynamic partnership between Cameron LNG and the West Cameron Port

Sincerely,

A handwritten signature in blue ink, appearing to read "Stephen Broussard". The signature is fluid and cursive, with a long, sweeping line extending from the end of the name.

Stephen Broussard, CPE
Director
