Re: Jordan Cove LNG L.P.  
Semi-Annual Report  
DOE/FE Order No. 3412, FE Docket No. 13-141-NG

Dear Sirs and Madams:

In compliance with Ordering Paragraph H. of the above-referenced Order 3412, Jordan Cove LNG L.P. (JCLNG) submits this semi-annual report for the period from October 1, 2015 through March 31, 2016 on the status of long-term contracts associated with the long term import of natural gas and any long term supply contracts for the LNG terminal and liquefaction facility planned by Jordan Cove Energy Project L.P. (Jordan Cove).

During the October through March period, Jordan Cove continued intensive negotiations with certain large-scale, prospective customers in the Asia Pacific region. On March 22, 2016, Veresen Inc., the owner of Jordan Cove and JCLNG, announced that it had finalized with JERA Co., Inc. (JERA), a joint venture of Tokyo Electric Power Company, Incorporated and Chubu Electric Power Co., Inc., key commercial terms for the long-term provision of natural gas liquefaction capacity at the Jordan Cove facility. The agreement covers at least 1.5 MMTPA for an initial term of 20 years. With JERA as the anchor customer, Jordan Cove expects that its continuing negotiations with other prospective customers will result in additional agreements in the near future. JCLNG expects that as Jordan Cove concludes these negotiations, JCLNG will conclude long-term supply contracts associated with the natural gas to be imported under this authorization.

Page Two

On March 11, 2016, the Federal Energy Regulatory Commission (FERC) issued an order denying the Applications of Jordan Cove and Pacific Connector Gas Pipeline (PCGP) for authorization for the LNG terminal and liquefaction facility and the connecting pipeline, respectively, in FERC Docket Nos. CP13-483-000 and CP13-492-000. Jordan Cove and PCGP will seek rehearing of that order.

Should you have any questions, please do not hesitate to contact me at (713) 400-2809.

Sincerely,
