RECIPIENT: Colorado School of Mines
STATE: CO

PROJECT TITLE: Post-growth Recrystallization by Halides for High Throughput CIGS Photovoltaics

Funding Opportunity Announcement Number: DE-FOA-0001387
Procurement Instrument Number: DE-EE0007551
NEPA Control Number: GFO-0007551-001
CID Number: GO7551

Based on my review of the information concerning the proposed action, as NEPA Compliance Officer (authorized under DOE Order 451.1A), I have made the following determination:

CX, EA, EIS APPENDIX AND NUMBER:

Description:

A9 Information gathering, analysis, and dissemination
Information gathering (including, but not limited to, literature surveys, inventories, site visits, and audits); data analysis (including, but not limited to, computer modeling); document preparation (including, but not limited to, conceptual design, feasibility studies, and analytical energy supply and demand studies); and information dissemination (including, but not limited to, document publication and distribution, and classroom training and informational programs), but not including site characterization or environmental monitoring. (See also B3.1 of appendix B to this subpart.)

B3.6 Small-scale research and development, laboratory operations, and pilot projects
Sting, construction, modification, operation, and decommissioning of facilities for small-scale research and development projects; conventional laboratory operations (such as preparation of chemical standards and sample analysis); and small-scale pilot projects (generally less than 2 years) frequently conducted to verify a concept before demonstration actions, provided that construction or modification would be within or contiguous to a previously disturbed or developed area (where active utilities and currently used roads are readily accessible). Not included in this category are demonstration actions, meaning actions that are undertaken at a scale to show whether a technology would be viable on a larger scale and suitable for commercial deployment.

Rationale for determination:

The U.S. Department of Energy (DOE) is proposing to provide federal funding to the Colorado School of Mines (CSM) to identify a method for post-growth recrystallization of copperium-gallium-selenide (CIGS) by halide compounds, demonstrate the kinetics, establish the changes in CIGS structure and optoelectronic properties, assess the effect on devices, demonstrate an implementation suitable for many manufacturing methods, and transfer the technology to three or more commercial manufacturers.

Proposed activities would include fabrication, characterization and modeling of materials and devices, down-selection and refinement of halides and processes, and reporting. These activities would take place on campus at CSM in Golden, CO with fabrication efforts supported by Old Dominion University from their campus in Norfolk, VA. The facilities in which this lab work would occur are purpose-built for the type of activities being proposed; therefore, no new or modified permits. Construction of new facilities or physical modifications to existing facilities would occur as a result of the proposed project.

Project activities proposed to be carried out at CSM would necessitate the use and handling of various hazardous materials, including metals, salts, chalcogenide compounds, and industrial solvents. All such handling would occur in-lab and all hazardous materials would be managed in accordance with federal, state, and local environmental regulations. Existing university health and safety policies and procedures would be followed including employee training, proper protective equipment, engineering controls, monitoring, and internal assessments.

Based on the review of the proposal, DOE has determined the proposal fits within the class of action(s) and the integral elements of 10 CFR 1021 subpart B outlined in the DOE categorical exclusion(s) selected above. DOE has also determined that: (1) there are no extraordinary circumstances (as defined by 10 CFR 1021.410(2)) related to the proposal that may affect the significance of the environmental effects of the proposal; (2) the proposal has not been segmented to meet the definition of a categorical exclusion; and (3) the proposal is not connected to other actions with potentially significant impacts, related to other proposals with cumulatively significant actions, or an improper interim action. This proposal is categorically excluded from further NEPA review.

NEPA PROVISION
DOE has made a final NEPA determination for this award.

https://www.eere-pmc.energy.gov/GONEPA/ND_Form.aspx?key=21868
8/15/2016
Insert the following language in the award:

If the Recipient intends to make changes to the scope or objective of this project, the Recipient is required to contact the Project Officer, identified in Block 15 of the Assistance Agreement before proceeding. The Recipient must receive notification of approval from the DOE Contracting Officer prior to commencing with work beyond that currently approved. If the Recipient moves forward with activities that are not authorized for Federal funding by the DOE Contracting Officer in advance of a final NEPA decision, the Recipient is doing so at risk of not receiving Federal funding and such costs may not be recognized as allowable cost share.

Note to Specialist:

Solar Energy Technology Office
This NEPA determination does not require a tailored NEPA provision.
Review completed by Rebecca McCord 08/10/2016

SIGNATURE OF THIS MEMORANDUM CONSTITUTES A RECORD OF THIS DECISION.

FIELD OFFICE MANAGER DETERMINATION

☐ Field Office Manager review required

NCO REQUESTS THE FIELD OFFICE MANAGER REVIEW FOR THE FOLLOWING REASON:

☐ Proposed action fits within a categorical exclusion but involves a high profile or controversial issue that warrants Field Office Manager's attention.
☐ Proposed action falls within an EA or EIS category and therefore requires Field Office Manager's review and determination.

BASED ON MY REVIEW I CONCUR WITH THE DETERMINATION OF THE NCO:

Field Office Manager's Signature: ____________________________  Date: ____________________________  Field Office Manager
