Subject: Consolidation of Nuclear Waste

To Whom it may Concern:

I am very much against the moving of spent nuclear waste to a central place in Texas or any other spot. It is dangerous enough that it exists on the nuclear power plant sites, but to add additional risk to even larger populations throughout the country is in my opinion, not thinking this through. There is much additional risk in transporting it , no matter how it is transported. I am totally against such a plan and the sooner we can get rid of nuclear plants all together, the better. Thank you for your attention.
