theta (degree)

Hastellov

EHT = 3.00 KV Signal A = InLens Date :26 Apr 2017 WD = 3.6 mm Photo No. = 4370 Time :16:42:54 Z1135

is rocking curve and typical pole-figure from doped samples

(a) SEM: morphology of the device (b) XRD: 2theta omega curve. Inset

of Energy (DOE) SunShot Initiative program (Award #: DEEE0006711), Advanced Superconductor Manufacturing Institute, and Texas Center for Superconductivity at the University of Houston.
