AND ENERGY RELIABILITY  
WASHINGTON, DC**

**AUGUST 2017**

**Department of Energy**  
**Washington, DC 20585**  
August 2017

Dear Sir/Madam:

Enclosed is the final *Northern Pass Transmission Line Project Environmental Impact Statement* (DOE/EIS-0463) prepared by the Department of Energy (DOE) pursuant to the National Environmental Policy Act of 1969 (NEPA) and its implementing regulations.

The United States Forest Service (USFS) – White Mountain National Forest, United States Environmental Protection Agency (EPA) – Region 1, United States Army Corps of Engineers (USACE) – New England District, and the New Hampshire Office of Energy and Planning (NHOEP) are cooperating agencies in the preparation of the EIS.

The proposed DOE action in the final EIS is to issue a Presidential permit to the Applicant, Northern Pass LLC, to construct, operate, maintain, and connect a new electric transmission line across the U.S./Canada border in northern New Hampshire (NH).

DOE has prepared this final EIS to evaluate the potential environmental impacts in the United States of the proposed action and the range of reasonable alternatives, including the No Action alternative. Under the No Action alternative, the Presidential permit would not be granted, and the proposed transmission line would not cross the U.S./Canada border.

In addition to its Presidential permit application to DOE, Northern Pass LLC applied to the USFS for a special use permit that would authorize Northern Pass LCC to construct, own, operate and maintain an electric transmission line to cross portions of the White Mountain National Forest under its jurisdiction. The final EIS will be used by the Forest Supervisor of the White Mountain National Forest to inform the Record of Decision in regard to this requested use.

DOE will use the EIS to ensure that it has the information it needs for informed decision-making.

The final EIS will also be posted on the project EIS website, <http://www.northernpasseis.us/> and DOE's NEPA website at <https://energy.gov/nepa/listings/environmental-impact-statements-eis>.

Sincerely,

A handwritten signature in black ink, appearing to read "Brian Mills".

Brian Mills  
Transmission Permitting and Technical Assistance,  
Office of Electricity Delivery and Energy Reliability

## COVER SHEET

**RESPONSIBLE FEDERAL AGENCY:** U.S. Department of Energy (DOE), Office of Electricity Delivery and Energy Reliability

**COOPERATING AGENCIES:** United States Forest Service (USFS) – White Mountain National Forest (WMNF); United States Environmental Protection Agency (EPA) – Region 1; United States Army Corps of Engineers (USACE) – New England District; and New Hampshire Office of Energy and Planning (NHOEP)

**TITLE:** Northern Pass Transmission Line Project Environmental Impact Statement (DOE/EIS-0463)

**LOCATION:** Coös, Grafton, Belknap, Merrimack, and Rockingham counties in New Hampshire

**CONTACTS:** For additional information on this Environmental Impact Statement (EIS) contact:

Mr. Brian Mills, National Environmental Policy Act (NEPA) Document Manager  
Office of Electricity Delivery and Energy Reliability, OE-20  
U.S. Department of Energy  
1000 Independence Ave. SW  
Washington, DC 20585  
Telephone: (202) 586-8267  
[Brian.Mills@hq.doe.gov](mailto:Brian.Mills@hq.doe.gov)

For general information on the DOE NEPA process, please write or call:

Mr. Brian Costner, Acting Director  
Office of NEPA Policy and Compliance, GC-54

[askNEPA@hq.doe.gov](mailto:askNEPA@hq.doe.gov)  
Telephone: (202) 586-4600 or leave a message at (800) 472-2756

**ABSTRACT:** Northern Pass Transmission, LLC (Northern Pass) has applied to the DOE for a Presidential permit to construct, operate, maintain, and connect a 192-mile (309-km) electric transmission line across the United States (U.S.)/Canada border in northern New Hampshire (NH). This final EIS addresses the potential environmental impacts of the Project (Proposed Action), the No Action Alternative, and ten additional action alternatives (Alternatives 2 through 6, with variations). The NH portion of the Project would be a single circuit  $\pm 320$  kilovolt (kV) high voltage direct current (HVDC) transmission line running approximately 158 miles (254 km) from the U.S. border crossing with Canada in Pittsburg, NH, to a new direct current-to-alternating current (DC-to-AC) converter station to be constructed in Franklin, NH. From Franklin, NH, to the Project terminus at the Public Service of New Hampshire's existing Deerfield Substation located in Deerfield, NH, the Project would consist of 34 miles (55 km) of 345 kV AC electric transmission line. The total length of the Project would be approximately 192 miles (309 km).

**PUBLIC COMMENTS:** In preparing this final EIS, DOE considered comments received during the scoping period, which extended from February 11, 2011 to June 14, 2011, and was reopened from June 15, 2011 to November 5, 2013 (DOE accepted and considered all comments during the scoping period from February 11, 2011 to November 5, 2013), and the public comment period on the draft EIS (July 31, 2015 through April 4, 2016). Comments on the draft EIS were accepted during the 45-day period

following publication of EPA's Notice of Availability (NOA) in the *Federal Register* on July 31, 2015; the public comment period was extended until April 4, 2016 following publication of EPA's NOA of the supplement in the *Federal Register* on November 20, 2015. DOE held four public meetings on the draft EIS in Colebrook, NH on March 7, 2016; Waterville Valley, NH on March 9, 2016; Concord, NH on March 10, 2016; and Whitefield, NH on March 11, 2016. All comments were considered during preparation of this final EIS. Appendix L in Volume 3 of this EIS contains the comments received on the draft EIS and DOE's responses to these comments. This final EIS contains revisions and new information based in part on comments received on the draft EIS. Vertical bars in the margins marking changed text indicate the locations of these revisions and new information. Deletions are not indicated. Appendices J and K in Volume 2 and Appendix L in Volume 3 are entirely new parts of this EIS; therefore, they do not contain bars indicating changes from the draft EIS.

The EIS analyzes the potential environmental impacts of DOE issuing a Presidential permit for the proposed Northern Pass Project, which is DOE's proposed federal action. DOE will use the EIS to inform its decision on whether to issue a Presidential permit. Additionally, Northern Pass has applied to the USFS for a special use permit (SUP) authorizing Northern Pass to construct, operate, and maintain an electric power transmission line crossing portions of the WMNF. The WMNF Forest Supervisor will use the EIS to inform its decision regarding: 1) whether to issue a SUP under the Federal Land Policy and Management Act; 2) the selection of an alternative; 3) any need to amend the Forest Plan; and 4) what specific terms and conditions should apply if a SUP is issued.

Copies of the final EIS are available for public review at 30 local libraries and town halls, or a copy can be requested from Mr. Brian Mills. The EIS is also available on the Northern Pass EIS website (<http://www.northernpasseis.us/>). DOE will announce its decision on the Proposed Action in a Record of Decision (ROD) in the *Federal Register* no sooner than 30 days after the EPA publishes the NOA of the final EIS. The USFS will announce its draft decision on the Proposed Action in a draft ROD in the *Federal Register* shortly after the EPA publishes the NOA of the final EIS.

**APPENDIX L**  
**COMMENT RESPONSE DOCUMENT**

---

Thank you for the opportunity to address you this evening. As Chairman of the Board of Selectman it is my honor to speak on behalf of the residents of New Hampton and to continue to give voice to our opposition to the Northern Pass project as currently proposed.

Our observations, comments and objections submitted in writing September 10, 2015 remain unchanged. Our position that as a “participant funded merchant project” any disruption, inconvenience or financial impact be borne in its entirety by the applicant stands.

Tonight I have been asked by the residents of New Hampton to present you with copies of a petition, carrying 708 signatures, which reads:

“...New Hampton is the gateway to the White Mountains and the Lakes Region. Our viewscapes are directly related to the value of our properties and the tourist driven economy of our community will undoubtedly be negatively impacted if the transmission line is constructed above ground.

It is the intent of the New Hampton townspeople to protect the rural character of the community, protect property values and the natural beauty and resources that surround us, such as the Pemigewasset River Valley.

We the residents, business and property owners of New Hampton can ONLY support this project moving forward if the lines are buried along the entire route.”

We respectfully request that the DoE deny the Northern Pass Presidential Permit application as currently submitted.

1470-1

Thank you for your comment. The EIS evaluates several alternatives that include burial of the Project and/or specific segments of the Project. Each of these alternatives is evaluated and compared within the Socioeconomic section of the EIS (see Section 4.1.2). The EIS additionally analyzes the importance of tourism to New Hampshire, businesses, and the local and regional economy. The EIS (Section 3.1.2) and the Socioeconomic Technical Report describe the methods used to analyze potential impact to tourism for this EIS. As discussed in Section 4.1.2 of the EIS, no authoritative peer-reviewed studies were identified that address impacts to tourism as a result of the construction of transmission lines, and DOE did not attempt to develop such a study. No other resources were identified to allow for quantification of potential impacts. The EIS concludes that “while it is reasonable to conclude that the Project may have some level of impact on tourism within New Hampshire and on individual locations near the Project route, these are not quantifiable.” Additionally, Section 4.1.1 addressed potential impacts to Visual Resources which may result.

1470-1

### NORTHERN PASS PETITION

Over the last 5 years, public comment has been unwavering in its opposition to the proposed Northern Pass project. Giving no further consideration to the concerns of the public, most recently voiced at the September 2015 project sponsor meeting in Laconia, Northern Pass has moved forward and submitted their application to the NH Site Evaluation Committee (SEC).

New Hampton is the gateway to the White Mountains and the Lakes Region. Our viewscapes are directly related to the value of our properties, and the tourist driven economy of our community will undoubtedly be negatively impacted if the transmission line is constructed above ground.

It is the intent of the New Hampton townspeople to protect the rural character of the community, protect property values and the natural beauty and resources that surround us, such as the Pemigewasset River Valley.

WE the residents, business and property owners of New Hampton can ONLY support this project if the lines are buried along the entire route.

New Hampton is the gateway to the White Mountains and the Lakes Region. Our viewscapes are directly related to the value of our properties, and the tourist driven economy of our community will undoubtedly be negatively impacted if the transmission line is constructed above ground.

It is the intent of the New Hampton townspeople to protect the rural character of the community, protect property values and the natural beauty and resources that surround us, such as the Pemigewasset River Valley.

WE the residents, business and property owners of New Hampton can ONLY support this project if the lines are buried along the entire route.

**NORTHERN PASS PETITION**

Over the last 5 years, public comment has been unwavering in its opposition to the proposed Northern Pass project. Giving no further consideration to the concerns of the public, most recently voiced at the September 2015 project sponsor meeting in Laconia, Northern Pass has moved forward and submitted their application to the NH Site Evaluation Committee (SEC).

New Hampton is the gateway to the White Mountains and the Lakes Region. Our viewscapes are directly related to the value of our properties, and the tourist driven economy of our community will undoubtedly be negatively impacted if the transmission line is constructed above ground.

It is the intent of the New Hampton townspeople to protect the rural character of the community, protect property values and the natural beauty and resources that surround us, such as the Pemigewasset River Valley.

WE the residents, business and property owners of New Hampton can ONLY support this project if the lines are buried along the entire route.

# NORTHERN PASS PETITION

Over the last 5 years, public comment has been unwavering in its opposition to the proposed Northern Pass project. Giving no further consideration to the concerns of the public, most recently voiced at the September 2015 project sponsor meeting in Laconia, Northern Pass has moved forward and submitted their application to the NH Site Evaluation Committee (SEC).

New Hampton is the gateway to the White Mountains and the Lakes Region. Our views are directly related to the value of our properties, and the tourist driven economy of our community will undoubtedly be negatively impacted if the transmission line is constructed above ground.

It is the intent of the New Hampton townspeople to protect the rural character of the community, protect property values and the natural beauty and resources that surround us, such as the Pemigewasset River Valley.

WE the residents, business and property owners of New Hampton can ONLY support this project if the lines are buried along the entire route.

### NORTHERN PASS PETITION

Over the last 5 years, public comment has been unwavering in its opposition to the proposed Northern Pass project. Giving no further consideration to the concerns of the public, most recently voiced at the September 2015 project sponsor meeting in Laconia, Northern Pass has moved forward and submitted their application to the NH Site Evaluation Committee (SEC).

New Hampton is the gateway to the White Mountains and the Lakes Region. Our viewscapes are directly related to the value of our properties, and the tourist driven economy of our community will undoubtedly be negatively impacted if the transmission line is constructed above ground.

It is the intent of the New Hampton townspeople to protect the rural character of the community, protect property values and the natural beauty and resources that surround us, such as the Pemigewasset River Valley.

WE the residents, business and property owners of New Hampton can ONLY support this project if the lines are buried along the entire route.

Over the last 5 years, public comment has been unwavering in its opposition to the proposed Northern Pass project. Giving no further consideration to the concerns of the public, most recently voiced at the September 2015 project sponsor meeting in Laconia, Northern Pass has moved forward and submitted their application to the NH Site Evaluation Committee (SEC).

New Hampton is the gateway to the White Mountains and the Lakes Region. Our viewscapes are directly related to the value of our properties, and the tourist driven economy of our community will undoubtedly be negatively impacted if the transmission line is constructed above ground.

It is the intent of the New Hampton townspeople to protect the rural character of the community, protect property values and the natural beauty and resources that surround us, such as the Pemigewasset River Valley.

WE the residents, business and property owners of New Hampton can ONLY support this project if the lines are buried along the entire route.
