

FEDERAL UTILITY PARTNERSHIP WORKING GROUP SEMINAR

November 7-8, 2018
Herndon, VA

DoD Procedures for Successful UESC Projects - Army

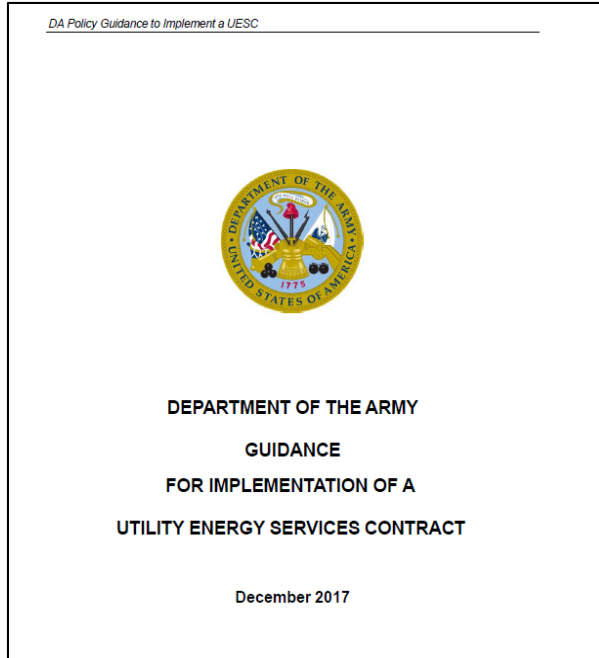

Hosted by:

Army UESC Process

- Installations develop general project requirements
- Work with Contracting Officer (KO) to release Notice/RFP and select utility
- Installation, KO, and Utility work together to do evaluations and develop project proposal
- Installation, Command, HQ Dept of Army approve award and KO awards
- Utility works with Installation to design and implement project
- During performance phase Utility provides performance assurance and installation & KO validate and make payments

Resources Available

- Army UESC Guidance released in Jan 2018
- Installation Energy and Water Plans, Energy Master Plans, Comprehensive Energy and Water Evaluations
- Randy Smidt – OACSIM UESC Program Manager
- Command HQ Energy Managers
- Contracting Offices
 - USACE-Huntsville
 - Mission & Installation Contracting Command

Tips for Good Projects

- Pay attention to the requirements that the installation has asked for
- Look for Energy security and resilience measures and ways to enhance mission
- Solve problems – Do they have UFRs?
- Be sure to include any incentives
- Comply with Cybersecurity requirements
- Provide performance assurance
