Introduction

A consistent approach to communications products helps to ensure that EERE is viewed as a primary, authoritative source of information about renewable energy and energy efficiency technologies.

This framework includes guidance and requirements on the use of colors, fonts, visual identifiers and logos, and other aspects of EERE information products. The standards are intended to balance flexibility and consistency, by clearly delineating recommended versus required elements. EERE offices are encouraged to be innovative in their product writing and design, and to work with the Communications office early on for solutions to best meet audience needs.

Information specific to web requirements is available at <http://energy.gov/eere/communicationstandards>. Navigate to the section titled, EERE Website and Digital Media Standards and Guidelines.

Checklist of Required Elements

Required elements for all communication products

- Proper use of EERE identifier or DOE identifier or approved logos (See table on page 4)
- Proper use of color palette (See table on page 4)
- Proper use of fonts (See table on page 4)
- The EERE identifier must be placed on the front of all EERE communication products per page 5. For products with two or more pages, the identifier OR an approved logo/identifier must appear on the back cover per page 15
- Photo credits on page 14
- Square corners on layout elements such as photos and sidebars. In some cases, outlined photos may be approved. See page 13
- Include URL: Use energy.gov/eere/xxx URLs on your products. Do not use the www or https preface unless its absence would lead users to the wrong URL. Use marketing URLs (short URLs) that redirect to sites within energy.gov, when possible.

Additional requirements for print products

- Page numbers for documents with more than two pages, see page 14
- Publication number, see page 16
- Publication date, see page 16

What is Not Allowed

- Don't skew or distort text and graphics in any way
- Don't use drop shadows, strokes, or other visual effects
- Don't use watermarks
- Don't use gradients
- Don't use colors other than the EERE color palette
- Avoid using all caps in headlines and text
- Ensure charts and graphs are legible on screen and in print.
Recreate as needed for legibility.
- Don't put author names on the front cover but instead on the acknowledgements page.
- Include complete website url in the text of documents.
Do not include hyperlink language.

Identity Guidelines

The EERE identity table provides guidance on logo, color, and font treatments for EERE offices, activities, and partnerships.

EERE Identifier: positioning

The EERE identifier must be placed on the front and back of all EERE communication products. You may place the identifier in the location that works best for your product.

The minimum reproduction size allowable is based on the width of the identifier. Please do not disproportionately resize. The two pieces of the identifier can not be modified or used as individual components.

EERE Identifier: positive treatment

The positive treatment of the EERE identifier can be used in green, black, or gray.

EERE Identifier: reverse treatment

The reverse treatment uses the EERE identifier in solid white on a solid green, black, or gray background.

If appropriate for your design, you may also reverse the identifier out of a four-color photo or illustration. Please make sure there is enough contrast so the identifier can be clearly seen.

Use identifier on a solid-colored background.

Do not use identifier on a patterned background.

Color

- The EERE color palette establishes a consistent look and feel for your products. The EERE green and grey are the primary colors of the EERE brand. Green is the dominant color and grey is subordinate to green. The primary colors frame the content, and as such, green should be the most recognizable visual element of the EERE brand.
- The secondary colors are used for highlighting content, charts, illustrations, call out boxes, pull quotes, or other supporting graphics. These colors should be used sparingly and only for the purposes stated. These colors should never compete for attention with the primary color.

Primary

Pantone 356	CMYK	C95 M8 Y93 K27
	RGB	R0 G121 B52
	HEX	007934

Pantone 431	CMYK	C45 M27 Y17 K51

Typefaces

Consistent use of a font, or typeface, adds credibility and improves readability in your communication products. The preferred typeface is Franklin Gothic, which is a free font.

Franklin Gothic is used in print products for titles, subheads, captions, sidebars, and call outs. This is also the preferred font for exhibits, including posters, banners, table top exhibits, and floor exhibits. Times New Roman is the preferred font for body text because of readability, but Franklin Gothic may also be used. For templates using ITC Franklin Gothic, basic Franklin Gothic can be used as well.

EERE Elements: photo credits and captions

EERE requires photo and image credits. By giving proper credit, we demonstrate that we have permission to use a particular photo or image and thus are adhering to copyright law.

- Photo credits may be placed after the caption or on the back of the document.
- Please use the following language:
 - Photo (or illustration) from name of organization
 - Photo (or illustration) by individual name of person
 - Photo number (if referenced)
 - Source: Figures and tables
- Examples:
 - *Illustration from iStock 18309363*
 - *Photo from Alliance Autoglass*
 - *Photo by Patrick Corkery, NREL 12345*
 - *Cover photos starting at top left: Clean Fuels Ohio, Maryland Public TV/NREL 17180, iStock 18309363*
 - *Source: Alternative Fuels and Advanced Vehicles.*

Captions are a preferred element used to describe a photo.

- The preferred treatment for captions is left-justified and placed underneath the image in a Pantone 431 gray box with white text.
- Additional treatments include using gray text on white background.

EERE Elements: back page

Preferred

The required elements for the back page include:

1. EERE identifier (vertical or horizontal)
2. Appropriate URL is required; additional office contact information is preferred
3. Publication number*
4. Publication date
5. Partner logos may be placed on the back page with the prior approval of EERE Publication Manager Scott Minos (scott.minos@ee.doe.gov)

Alternate

Technology offices may also use the approved EERE identifier with office names as shown on page 9.

Note: The statement “Printed with renewable-source ink on paper containing...” is no longer required on printed publications.

* Executive order requires the use of an approved GPO publication number. GPO numbers are unique identifiers assigned by GPO-approved printers, including DOE HQ and national laboratories, and cannot be reused.

When publishing at a national laboratory, use the lab publication number. If a DOE employee, contractor, or someone not at a lab is producing a publication, request a publication number from Ken Sobszak at DOE.

[Introduction](#)[Checklist](#)[Identity Guidelines](#)[EERE Identifier](#)[Colors](#)[Typefaces](#)[EERE Elements](#)[■ Templates](#)[Icons](#)[Contact](#)

Templates: overview

EERE provides templates to make it easy for you to apply the EERE identity guidelines. Use of templates is strongly encouraged. If you are going to vary from the templates, please coordinate your exceptions with the [Product Governance Team](#).

EERE provides the following templates:

- Fact sheets
- Brochures (tri-fold and bi-fold)
- PowerPoint
- Technical reports
- Conference posters
- Name tags

You can find these templates at: energy.gov/eere/communicationstandards/communication-product-templates. Scott Minos, publications manager will grant access to templates within communication standards.

Several of the outreach templates include a design layer that provides the formatting tips outlined here. Even if you do not have Adobe InDesign, you can use the design layer PDF files as a reference for how to format your document using another publishing tool. Note that if you use a Word template or any other publishing tool, you must adhere to these standards to ensure a professional look and feel.

Should you have questions, or suggestions for developing additional templates, contact EERE Communications at ee.communications@ee.doe.gov.

Templates: brochures and report cover

These files are provided as Adobe InDesign CC files.

(for technical reports)

Because these are typically used as the standard templates, please involve EERE Communications early if you intend to develop a modified version of these types of files.

[Introduction](#)[Checklist](#)[Identity Guidelines](#)[EERE Identifier](#)[Colors](#)[Typefaces](#)[EERE Elements](#)[Templates](#)[■ Icons](#)[Contact](#)

Icons: overview

EERE's icons are simplified images representing the eleven technology offices plus the topic of homes and convey to the reader which technologies are included in your communications product. Icons may be used on websites, presentations, exhibits, infographics, social media, video, and print documents. These icons are NOT logos and should not be used as logos for the offices.

Contact scott.minos@ee.doe.gov with questions about the use of these icons. Approval to use them is not required.

Please contact Scott Minos about developing or using any icons that do not currently exist in the system. Icons must be approved by the branding manager.

What is an icon?

An icon is a simplified picture used to represent a concept or object

The purpose of icons

- Draw attention and emphasize important ideas
- Break up the content visually, making it less intimidating
- Enrich content by giving it more substance, enabling effective communication without wordiness
- Improve your reader's ability to scan, understand, and remember what they've read
