# U.S. DEPARTMENT OF ENERGY OFFICE OF ENERGY EFFICIENCY AND RENEWABLE ENERGY NEPA DETERMINATION

RECIPIENT: Regents of the University of California, Berkeley

**PROJECT** TITLE:

Skewering the silos: using Brick to enable portable analytics, modeling and controls in buildings

**Funding Opportunity Announcement Number** 

**Procurement Instrument Number** 

**NEPA Control Number CID Number** 

STATE: CA

FOA-DE-0001825

DE-EE0008681

GFO-0008681-001

GO8681

Based on my review of the information concerning the proposed action, as NEPA Compliance Officer (authorized under DOE Policy 451.1), I have made the following determination:

#### CX, EA, EIS APPENDIX AND NUMBER:

Description:

**A9** Information gathering, analysis, and

Information gathering (including, but not limited to, literature surveys, inventories, site visits, and audits), data analysis (including, but not limited to, computer modeling), document preparation (including, but not limited to, conceptual design, feasibility studies, and analytical energy supply and demand studies), and information dissemination (including, but not limited to, document publication and distribution, and classroom training and dissemination informational programs), but not including site characterization or environmental monitoring. (See also B3.1 of appendix B to this subpart.)

**A11 Technical** advice and assistance to organizations

Technical advice and planning assistance to international, national, state, and local organizations.

### Rationale for determination:

The U.S. Department of Energy (DOE) is proposing to provide federal funding to the Regents of the University of California, Berkeley to develop an open-source common data schema, Brick, into a demonstrated and tested tool that, through the implementation of advanced algorithms and analysis, could enable the scaling of energy savings, improved building performance, and grid responsiveness across commercial buildings at low cost.

Project work would occur over a three-year period and would consist entirely of intellectual, academic, and analytical activities such as the development of models, algorithms, and applications toward the advancement of the Brick tool. A Technology Transition Plan would be developed to detail a roadmap for advancing the technology towards industry adoption. Training workshops would be conducted as part of the project to work with industry partners to provide information and gain feedback as well as train and engage building operators on the use of the tools and applications developed. Based on the types of project activities proposed, DOE does not anticipate any impacts to resources of concern.

#### NEPA PROVISION

DOE has made a final NEPA determination.

Notes:

**Building Technologies Office** 

This NEPA determination does not require a tailored NEPA provision.

## FOR CATEGORICAL EXCLUSION DETERMINATIONS

The proposed action (or the part of the proposal defined in the Rationale above) fits within a class of actions that is listed in Appendix A or B to 10 CFR Part 1021, Subpart D. To fit within the classes of actions listed in 10 CFR Part 1021, Subpart D. Appendix B, a proposal must be one that would not: (1) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders; (2) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities; (3) disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases; (4) have the potential to cause significant impacts on environmentally sensitive resources, including, but not limited to, those listed in paragraph B(4) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those listed in paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B.

There are no extraordinary circumstances related to the proposed action that may affect the significance of the environmental effects of the proposal.

The proposed action has not been segmented to meet the definition of a categorical exclusion. This proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211 concerning limitations on actions during preparation of an environmental impact statement.

The proposed action is categorically excluded from further NEPA review.

CNATUDE OF THE MEMORANDUM CONCTITUTES A DECORD OF THE DECISION
