Based on my review of the information concerning the proposed action, as NEPA Compliance Officer (authorized under DOE Policy 451.1), I have made the following determination:

CX, EA, EIS APPENDIX AND NUMBER:

Description:

A9 Information gathering, analysis, and dissemination Information gathering (including, but not limited to, literature surveys, inventories, site visits, and audits), data analysis (including, but not limited to, computer modeling), document preparation (including, but not limited to, conceptual design, feasibility studies, and analytical energy supply and demand studies), and information dissemination (including, but not limited to, document publication and distribution, and classroom training and informational programs), but not including site characterization or environmental monitoring. (See also B3.1 of appendix B to this subpart.)

Rationale for determination:

The U.S. Department of Energy (DOE) is proposing to provide federal funding to Electric Power Research Institute, Inc. (EPRI) model and analyze the performance characteristics of pumped storage hydropower (PSH).

Work would include data collection of the baseline performance characteristics of PSH in the New York Independent System Operator territory and the Duke Energy Carolinas territory. Work would also include computer modeling based on the baseline data and then making modifications and improvements to the computer modeling based on possible future scenarios.

All work would be limited to intellectual, academic, and analytical activities, and would include data collection and computer modeling.

NEPA PROVISION

DOE has made a final NEPA determination.
