#### Gore Pass-Hayden 138-kV Transmission Line Structure Replacement Routt County, Colorado Project Number: 2019-018 Expiration Date: 12/31/2021

A. <u>Brief Description of Proposal</u>: Western Area Power Administration (WAPA), Rocky Mountain Region (RMR), proposes to replace existing Structure 60/4 on its Gore Pass-Hayden (GOT-HDN) 138-kV Transmission Line in Routt County, Colorado. The existing wood three-pole structure would be replaced in-kind with a new wood three-pole structure. The new structure would be placed within the existing structure holes. The full scope of the structure replacement would include pad construction, removal of the existing structure, and installation of new wood poles, hardware, and anchors. Work would occur on private land. Equipment may include bucket trucks, truck-mounted augers and cranes, skid-steer loaders, utility trucks, pole trailers, and equipment trailers. All work would be confined to WAPA's ROW. Access would be via existing access routes and no road maintenance or road construction would occur.

# **B.** <u>Number and Title of the Categorical Exclusion Being Applied</u>: (See text in 10 CFR Part 1021, Subpart D.)

B1.3 Routine maintenance

- C. <u>Regulatory Requirements in 10 CFR Part 1021.410 (b)</u>: (See full text in regulation and attached checklist.)
  - 1) The proposed action fits within a class of actions listed in Appendix A or B to Subpart D.

For classes of actions listed in Appendix B, the following conditions are integral elements. To fit within a class, the proposal <u>must not</u>:

- Threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders;
- Require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities;
- Disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases;
- Have the potential to cause significant impacts on environmentally sensitive resources. An environmentally sensitive resource is typically a resource that has been identified as needing protection through Executive Order, statute, or regulation by Federal, State, or local government, or a federally-recognized Indian tribe. An action may be categorically excluded if, although sensitive resources are present, the action would not have the potential to cause significant impacts on those resources (such as construction of a building with its foundation well above a sole-source aquifer or upland surface soil removal on a site that has wetlands). Environmentally sensitive resources include, but are not limited to, those listed in paragraph B. (4) (see Attachment A).

#### Gore Pass-Hayden 138-kV Transmission Line Structure Replacement Routt County, Colorado Project Number: 2019-018 Expiration Date: 12/31/2021

- 2) There are no extraordinary circumstances related to the proposal that may affect the significance of the environmental effects of the proposal.
- The proposal is not "connected" to other actions with potentially significant impacts, is not related to other proposed actions with cumulatively significant impacts, and is not precluded by 40 CFR Part 1506.1 or 10 CFR Part 1021.211.

#### **D.** <u>Special Stipulations Pertaining to the Proposal</u>:

- 1) If the scope of work of this project changes, RMR's Environment Department must be contacted to determine whether additional environmental review is required.
- 2) **This Categorical Exclusion expires on December 31, 2021.** If all project work has not been completed by the expiration date, or if the need for an environmental compliance extension is anticipated, RMR's Environment Department must be contacted for an updated environmental review.
- 3) Any injured or orphaned birds, and all active nest relocations, must be immediately reported to the RMR Avian Protection Leads at 970-593-8803 or 970-278-7119. Any dead birds must be reported to the RMR Avian Protection Leads within twenty-four (24) hours of discovery. Additional documentation, such as photographs and GPS coordinates, may be requested to support RMR's reporting requirements to the U.S. Fish and Wildlife Service.
- 4) Transmission line components must be designed and constructed in conformance with the most current editions of *Suggested Practices for Avian Protection on Power Lines* and *Reducing Avian Collisions with Power Lines*, both published by the Avian Power Line Interaction Committee (APLIC) to minimize avian collision and electrocution risk while maintaining safe and reliable electrical service.
- 5) If any cultural resources are inadvertently discovered during implementation of the proposed action, work within 100-feet of the discovery area must halt immediately, RMR's Archaeologist must be contacted immediately. Work in the area of discovery must not resume until notification to proceed is provided by RMR's Archaeologist.
- 6) If any possible human remains are inadvertently discovered during implementation of the proposed action, work within 100-feet of the discovery area must halt immediately and RMR's Archaeologist must be notified immediately by telephone (no later than 24 hours from the time of discovery). A reasonable effort must be made to protect the remains from looting and/or further damage. Work in the area of discovery must not resume until notification to proceed is provided by RMR's Archaeologist.

#### Gore Pass-Hayden 138-kV Transmission Line Structure Replacement Routt County, Colorado Project Number: 2019-018 Expiration Date: 12/31/2021

- 7) To prevent the transport of non-native and invasive plants and animals, including noxious weeds and aquatic nuisance species, work crews must thoroughly wash all vehicles and equipment (trailers, trucks, UTVs, etc.) before entering the action area and working on the project.
- 8) Activities involving the use of fuel, oil, hydraulic fluid, or other petroleum products must comply with RMR's Spill Response Plan (SRP).
- **E.** <u>Determination</u>: Based on my review of information provided to me and in my possession concerning the proposed action, I have determined that the proposed action fits within the specified class of actions, the other regulatory requirements set forth above are met, and the proposed action is categorically excluded from requirements for an EA or an EIS.

#### ATTACHMENT A Conditions That Are Integral Elements of the Classes of Actions in Appendix B That Apply to This Proposal Checklist for Categorical Exclusion Determination, revised Nov. 2011

Application of Categorical Exclusions (1021.410)	Disagree	Agree	Unknown
(b)(1) The proposal fits within a class of actions that is listed in appendix B to		Х	
subpart D.			
(b)(2) There are no extraordinary circumstances related to the proposal that		Х	
may affect the significance of the environmental effects of the proposal,			
including, but not limited to, scientific controversy about the environmental			
effects of the proposal; uncertain effects or effects involving unique or			
unknown risks; and unresolved conflicts concerning alternate uses of			
available resources.			
(b)(3) The proposal has not been segmented to meet the definition of a		Х	
categorical exclusion. Segmentation can occur when a proposal is broken			
down into small parts in order to avoid the appearance of significance of the			
total action. The scope of a proposal must include the consideration of			
connected and cumulative actions, that is, the proposal is not connected to			
other actions with potentially significant impacts (40 CFR Part $1508, 25(a)(1)$ ) is not related to other actions with individually insignificant			
1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR Part 1508.27(b)(7)), and is not			
precluded by 40 CFR Part 1506.1 or § 1021.211 of this part concerning			
limitations on actions during EIS preparation.			
B. Conditions that are Integral Elements of the Classes of Actions in	NO	YES	Unknown
Appendix B.	NO	1 LS	UIIKIIOWII
(1) Threaten a violation of applicable statutory, regulatory, or permit	X		
requirements for environment, safety and health, or similar requirements	21		
of DOE or Executive Orders.			
(2) Require siting and construction or major expansion of waste storage,	Х		
disposal, recovery, or treatment facilities (including incinerators), but the			
proposal may include categorically excluded waste storage, disposal,			
recovery, or treatment actions or facilities.			
(3) Disturb hazardous substances, pollutants, contaminants, or CERCLA-	Х		
excluded petroleum and natural gas products that preexist in the			
environment such that there would be uncontrolled or unpermitted			
releases.			
(4) Have the potential to cause significant impacts on environmentally	X		
sensitive resources. An environmentally sensitive resource is typically a			
resource that has been identified as needing protection through Executive			
Order, statue, or regulation by Federal, State, or local government, or a			
federally-recognized Indian tribe. An action may be categorically			
excluded if, although sensitive resources are present, the action would not			
have the potential to cause significant impacts on those resources (such as			
construction of a building with its foundation well above a sole-source

	r	
aquifer or upland surface soil removal on a site that has wetlands).		
Environmentally sensitive resources include, but are not limited to:		
(i) Property (such as sites, buildings, structures, and objects) of historic,	X	
archaeological, or architectural significance designated by a Federal,		
State, or local government, or property determined to be eligible for		
listing on the National Register of Historic Places;		
(ii) Federally-listed threatened or endangered species or their habitat	Х	
(including critical habitat) or Federally-proposed or candidate		
species or their habitat (Endangered Species Act); state-listed or		
State-proposed endangered or threatened species or their habitat;		
Federally-protected marine mammals and Essential Fish Habitat		
(Marine Mammal Protection Act; Magnuson-Stevens Fishery		
Conservation and Management Act); and otherwise Federally-		
protected species (such as under the Bald and Golden Eagle		
Protection Act or the Migratory Bird Treaty Act);		
(iii) Floodplains and wetlands (as defined in 10 CFR Part 1022.4,	Х	
-Compliance with Floodplain and Wetland Environmental Review		
Requirements: "Definitions," or its successor);		
(iv) Areas having a special designation such as Federally-and state-	Х	
designated wilderness areas, national parks, national monuments,		
national natural landmarks, wild and scenic rivers, state and Federal		
wildlife refuges, scenic areas (such as National Scenic and Historic		
Trails or National Scenic Areas), and marine sanctuaries;		
(v) Prime or unique farmland, or other farmland of statewide or local	Х	
importance, as defined at 7 CFR Part 658.2(a), -Farmland		
Protection Policy Act: Definitions, or its successor;		
(vi) Special sources of water (such as sole-source aquifers, wellhead	Х	
protection areas, and other water sources that are vital in a region);		
and		
(vii) Tundra, coral reefs, or rain forests; or	X	
(5) Involve genetically engineered organisms, synthetic biology,	X X	
governmentally designated noxious weeds, or invasive species, unless the		
proposed activity would be contained or confined in a manner designed		
and operated to prevent unauthorized release into the environment and		
conducted in accordance with applicable requirements, such as those of		
the Department of Agriculture, the Environmental Protection Agency,		
and the National Institutes of Health.
