Upper Molina Power Plant - Lower Molina Power Plant 115-kV Transmission Line Optical Ground Wire Installation and Access Road Maintenance Mesa County, Colorado *Project Number: 2019-038 Expiration Date: May 6, 2021*

A. <u>Brief Description of Proposal</u>: Western Area Power Administration (WAPA), Rocky Mountain Region, proposes to install approximately 4.5 miles of optical ground wire (OPGW), and perform routine maintenance on the access road associated with the Upper Molina-Lower Molina (UMW-LMW) 115-kV Transmission Line. The project is located in Mesa County, Colorado and is part of WAPA's ongoing program to update and improve its communication systems.

The OPGW will be installed from Structure 0/1 to Structure 4/4. To install the OPGW, "pulling sites" will be positioned within the right-of-way (ROW) at the Upper Molina Power Plant and outside the ROW on private land east of the Lower Molina Power Plant. The "pulling sites" will be used to pull OPGW from wire reel trailers, feed the OPGW through hardware on the transmission structures, tighten the OPGW between structure spans, and terminate the OPGW at both ends of the transmission line. Access road maintenance from 0/1 to 4/4 will be required to allow safe access of equipment along the project area. Equipment that will be used for this project may include an excavator, motor grader, bulldozer, dump truck, helicopter, bucket trucks, OPGW reel trailer, wire pullers, tensioners, cranes, and work trucks. The OPGW reel trailer will be anchored to a heavy piece of rubber-treaded equipment, therefore there will be no ground disturbance at the "pulling sites." The work will take place on WAPA's existing ROW, on private lands, and public lands managed by the Bureau of Land Management. WAPA will be required to obtain a temporary easement for use of the off-ROW "pulling site" near the Lower Molina Power Plant.

B. <u>Number and Title of the Categorical Exclusion Being Applied</u>: (See text in 10 CFR Part 1021, Subpart D.)

B1.3 Routine Maintenance B4.7 Fiber Optic Cable

- C. <u>Regulatory Requirements in 10 CFR 1021.410 (b)</u>: (See full text in regulation and attached checklist.)
 - The proposed action fits within a class of actions listed in Appendix A or B to Subpart D. For classes of actions listed in Appendix B, the following conditions are integral elements. To fit within a class, the proposal <u>must not</u>:
 - Threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders;
 - Require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities;
 - Disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases;

Upper Molina Power Plant - Lower Molina Power Plant 115-kV Transmission Line Optical Ground Wire Installation and Access Road Maintenance Mesa County, Colorado *Project Number: 2019-038 Expiration Date: May 6, 2021*

- Have the potential to cause significant impacts on environmentally sensitive resources. An environmentally sensitive resource is typically a resource that has been identified as needing protection through Executive Order, statute, or regulation by Federal, State, or local government, or a federally recognized Indian tribe. An action may be categorically excluded if, although sensitive resources are present, the action would not have the potential to cause significant impacts on those resources (such as construction of a building with its foundation well above a sole-source aquifer or upland surface soil removal on a site that has wetlands). Environmentally sensitive resources include, but are not limited to those listed in paragraph B. (4) (see Attachment A).
- 2) There are no extraordinary circumstances related to the proposal that may affect *the significance of the environmental effects of the proposal.*
- 3) The proposal is not "connected" to other actions with potentially significant impacts, is not related to other proposed actions with cumulatively significant impacts, and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211.

D. Special Stipulations Pertaining to the Proposal:

- 1) If the scope of work of this project changes, RMR's Environment Department must be contacted to determine whether additional environmental review is required.
- 2) **This Categorical Exclusion expires May 6, 2021.** If all project work has not been completed by the expiration date, or if the need for an environmental compliance extension is anticipated, RMR's Environment Department must be contacted for an updated environmental review.
- 3) Any injured or dead birds encountered on WAPA's ROW must be immediately reported to the RMR Avian Protection Leads by telephone at 970-593-8803 or 970-278-7119. Additional documentation, such as photographs and GPS coordinates, may be requested to support RMR's reporting requirements to the U.S. Fish and Wildlife Service.
- 4) If any cultural resources are inadvertently discovered during implementation of the proposed action, work within 100-feet of the discovery area must halt immediately, RMR's Archaeologist must be contacted immediately. Work in the area of discovery must not resume until notification to proceed is provided by RMR's Archaeologist.

Upper Molina Power Plant - Lower Molina Power Plant 115-kV Transmission Line Optical Ground Wire Installation and Access Road Maintenance Mesa County, Colorado *Project Number: 2019-038 Expiration Date: May 6, 2021*

- 5) If any possible human remains are inadvertently discovered during implementation of the proposed action, work within 100-feet of the discovery area must halt immediately and RMR's Archaeologist must be notified immediately by telephone (no later than 24 hours from the time of discovery). A reasonable effort shall be made to protect the remains from looting and/or further damage. Work in the area of discovery must not resume until notification to proceed is provided by RMR's Archaeologist.
- 6) To prevent the transport of non-native and invasive plants and animals, including noxious weeds and aquatic nuisance species, work crews must thoroughly wash all vehicles and equipment (trailers, trucks, UTVs, etc.) before entering the action area and working on the project.
- 7) Activities involving the use of fuel, oil, hydraulic fluid, or other petroleum products must comply with RMR's Spill Response Plan (SRP).
- **E.** <u>Determination</u>: Based on my review of information provided to me and in my possession concerning the proposed action, I have determined that the proposed action fits within the specified class of actions, the other regulatory requirements set forth above are met, and the proposed action is categorically excluded from requirements for an EA or an EIS.

ENVIRONMENTAL REVIEW FOR CATEGORICAL EXCLUSION DETERMINATION

Rocky Mountain Region, Western Area Power Administration

Upper Molina Power Plant - Lower Molina Power Plant 115-kV Transmission Line Optical Ground Wire Installation and Access Road Maintenance

Mesa County, Colorado Project Number: 2019-038 Expiration Date: May 6, 2021

ATTACHMENT A

Conditions That Are Integral Elements of the Classes of Actions in Appendix B That Apply to This Proposal Checklist for Categorical Exclusion Determination, revised Nov. 2011

Application of Categorical Exclusions (1021.410)	Disagree	Agree	Unknown
(b)(1) The proposal fits within a class of actions that is listed in		X	
appendix B to subpart D.			
(b)(2) There are no extraordinary circumstances related to the		X	
proposal that may affect the significance of the environmental			
effects of the proposal. Extraordinary circumstances are unique			
situations presented by specific proposals, including, but not			
limited to, scientific controversy about the environmental effects			
of the proposal; uncertain effects or effects involving unique or			
unknown risks; and unresolved conflicts concerning alternate			
uses of available resources.			
(b)(3) The proposal has not been segmented to meet the		Х	
definition of a categorical exclusion. Segmentation can occur			
when a proposal is broken down into small parts in order to			
avoid the appearance of significance of the total action. The			
scope of a proposal must include the consideration of connected			
and cumulative actions, that is, the proposal is not connected to			
other actions with potentially significant impacts (40 CFR			
1508.25(a)(1)), is not related to other actions with individually			
insignificant but cumulatively significant impacts (40 CFR			
1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or §			
1021.211 of this part concerning limitations on actions during			
EIS preparation.			
B. Conditions that are Integral Elements of the Classes of	NO	YES	Unknown
Actions in Appendix B.			
(1) Threaten a violation of applicable statutory, regulatory, or	Х		
permit requirements for environment, safety and health, or			
similar requirements of DOE or Executive Orders.			
(2) Require siting and construction or major expansion of waste	Х		
storage, disposal, recovery, or treatment facilities (including			
incinerators), but the proposal may include categorically			
excluded waste storage, disposal, recovery, or treatment			
actions or facilities;			
(3) Disturb hazardous substances, pollutants, contaminants, or	Х		
CERCLA-excluded petroleum and natural gas products that

Project Number: 2019-038 Expiration Date: May 6, 2021

preexist in the environment such that there would be		
uncontrolled or unpermitted releases;	37	
(4) Have the potential to cause significant impacts on	Х	
environmentally sensitive resources. An environmentally		
sensitive resource is typically a resource that has been		
identified as needing protection through Executive Order,		
statue, or regulation by Federal, state, or local government,		
or a federally recognized Indian tribe. An action may be		
categorically excluded if, although sensitive resources are		
present, the action would not have the potential to cause		
significant impacts on those resources (such as construction		
of a building with its foundation well above a sole-source		
aquifer or upland surface soil removal on a site that has		
wetlands). Environmentally sensitive resources include, but		
are not limited to:		
(i) Property (such as sites, buildings, structures, and	Х	
objects) of historic, archaeological, or architectural		
significance designated by a Federal, state, or local		
government, or property determined to be eligible for		
listing on the National Register of Historic Places;		
(ii) Federally-listed threatened or endangered species or	Х	
their habitat (including critical habitat) or Federally-		
proposed or candidate species or their habitat		
(Endangered Species Act); state-listed or state-proposed		
endangered or threatened species or their habitat;		
Federally-protected marine mammals and Essential Fish		
Habitat (Marine Mammal Protection Act; Magnuson-		
Stevens Fishery Conservation and Management Act);		
and otherwise Federally-protected species (such as		
under the Bald and Golden Eagle Protection Act or the		
Migratory Bird Treaty Act);		
(iii) Floodplains and wetlands (as defined in 10 CFR 1022.4,	Х	
-Compliance with Floodplain and Wetland		
Environmental Review Requirements: "Definitions," or		
its successor);		
(iv) Areas having a special designation such as Federally-	Х	
and state-designated wilderness areas, national parks,		
national monuments, national natural landmarks, wild		
and scenic rivers, state and Federal wildlife refuges,		
scenic areas (such as National Scenic and Historic Trails		
or National Scenic Areas), and marine sanctuaries;		

Upper Molina Power Plant - Lower Molina Power Plant 115-kV Transmission Line Optical Ground Wire Installation and Access Road Maintenance

Mesa County, Colorado Project Number: 2019-038 Expiration Date: May 6, 2021

 (v) Prime or unique farmland, or other farmland of statewide or local importance, as defined at 7 CFR 658.2(a), —Farmland Protection Policy Act: Definitions, or its successor; 	Х	
 (vi) Special sources of water (such as sole-source aquifers, wellhead protection areas, and other water sources that are vital in a region); and 	X	
(vii) Tundra, coral reefs, or rain forests; or	Х	
(5) Involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those of the Department of Agriculture, the Environmental Protection Agency, and the National Institutes of Health.
