Snowy Range-Happy Jack 115kV Transmission Line Vegetation Management (Hand Work) Albany and Laramie Counties, Wyoming *Project Number: 2020-001 Expiration Date: December 31, 2024*

A. <u>Brief Description of Proposal</u>: Western Area Power Administration (WAPA), Rocky Mountain Region (RMR), proposes to conduct routine vegetation management along its Snowy Range-Happy Jack (SNG-HJ) 115-kV Transmission Line. Routine vegetation management will be conducted within WAPA's right-of-way (ROW) in Albany and Laramie Counties, Wyoming, between the Snowy Range Substation (SNG) and the Happy Jack Substation (HJ). Work will occur on private lands, public lands managed by the State of Wyoming, and lands owned by WAPA. The intent of WAPA's vegetation management program is to secure and maintain a manageable and stable ROW that minimizes vegetative threats to transmission system safety, security, and reliability, and ultimately does not require frequent re-treatments. Achieving a desired condition is a process that may require several treatments over an extended period of time. Once a desired condition, as stated in *WAPA Order 450.3C*, is consistent with American National Standards Institute (ANSI) A300 Part 7 and the minimum vegetation clearance distances (MVCD) as defined by North American Electric Reliability Corporation (NERC) standard FAC-003-4. The intent of this proposed activity is to continue to move the ROW closer to, or actively maintain, WAPA's desired condition.

The proposed activity will enlist trained vegetation management crews to assess the ROW condition, identify incompatible vegetation, and trim and/or remove incompatible vegetation, including "danger trees" as defined in *WAPA Order 430.1C*, using only hand cutting techniques. No mechanical vegetation removal is authorized for this project. Equipment used for vegetation management may include chainsaws, pickup trucks with pull-behind chippers, ATVs, measuring equipment, and bucket trucks. Only rubber-treaded vehicles will be used. The transmission line will be accessed via existing access roads; no road maintenance or new road construction is authorized.

B. Special Stipulations Pertaining to the Proposal:

- 1) If the scope of work of this project changes, RMR's Environment Department must be contacted to determine whether additional environmental review is required.
- 2) **This Categorical Exclusion expires on December 31, 2024.** If all project work has not been completed by the expiration date, or if the need for an environmental compliance extension is anticipated, RMR's Environment Department must be contacted for an updated environmental review.
- 3) Herbicide application is not authorized under this CX. If herbicide application is required, RMR's Environment Department must be contacted for an updated environmental review.
- 4) Vegetation management crews must carefully inspect vegetation for active avian nests prior to any vegetation management activities between April 1 and August 1. Vegetation must be inspected no more than five (5) calendar days in advance of vegetation management activities during this time period. If an active avian nest is found in vegetation that needs

Snowy Range-Happy Jack 115kV Transmission Line Vegetation Management (Hand Work) Albany and Laramie Counties, Wyoming *Project Number: 2020-001 Expiration Date: December 31, 2024*

trimmed or removed, vegetation management activities must be delayed until the nest is no longer active. An avian nest becomes active when the first egg is laid, and remains active until all offspring have fledged (left the nest) and the nest is empty. Inactive (empty) nests that do not belong to threatened species, endangered species, or eagles may be removed and destroyed in accordance with WAPA's Avian Protection Plan (APP). Contact RMR's Environment Department prior to nest removal to ensure conformance with the APP.

- 5) Any injured or orphaned birds, and all active nest locations, must be immediately reported to the RMR Avian Protection Lead at (970) 593-8803. Any dead birds must be reported to the RMR Avian Protection Lead within twenty-four (24) hours of discovery. Additional documentation, such as photographs and GPS coordinates, may be requested to support RMR's reporting requirements to the U.S. Fish and Wildlife Service.
- 6) If any cultural resources are inadvertently discovered during implementation of the proposed action, work within 100 feet of the discovery area must halt immediately and an RMR Archaeologist must be contacted immediately at (970) 286-3523 or (970) 302-4753. Work in the area of discovery must not resume until notification to proceed is provided by an RMR Archaeologist.
- 7) If any possible human remains are inadvertently discovered during implementation of the proposed action, work within 100 feet of the discovery area must halt immediately and an RMR Archaeologist must be notified immediately at (970) 286-3523 or (970) 302-4753 (no later than 24 hours from the time of discovery). A reasonable effort must be made to protect the remains from looting and/or further damage. Work in the area of discovery must not resume until notification to proceed is provided by an RMR Archaeologist.
- 8) To prevent the transport of non-native and invasive plants and animals, including noxious weeds and aquatic nuisance species, work crews must thoroughly wash all vehicles and equipment (trailers, trucks, UTVs, etc.) before entering the action area and working on the project.
- 9) Activities involving the use of fuel, oil, hydraulic fluid, or other petroleum products must comply with RMR's Spill Response Plan (SRP).

Snowy Range-Happy Jack 115kV Transmission Line Vegetation Management (Hand Work) Albany and Laramie Counties, Wyoming *Project Number: 2020-001 Expiration Date: December 31, 2024*

C. <u>Number and Title of the Categorical Exclusion Being Applied</u>: (See text in 10 CFR Part 1021, Subpart D.)

B1.3. Routine Maintenance

- **D.** <u>**Regulatory Requirements in 10 CFR 1021.410 (b)**</u>: (See full text in regulation and attached checklist.)
 - 1) The proposed action fits within a class of actions listed in Appendix A or B to Subpart D.

For classes of actions listed in Appendix B, the following conditions are integral elements. To fit within a class, the proposal <u>must not</u>:

- Threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders;
- Require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities;
- Disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases;
- Have the potential to cause significant impacts on environmentally sensitive resources. An environmentally sensitive resource is typically a resource that has been identified as needing protection through Executive Order, statute, or regulation by Federal, State, or local government, or a federally recognized Indian tribe. An action may be categorically excluded if, although sensitive resources are present, the action would not have the potential to cause significant impacts on those resources (such as construction of a building with its foundation well above a sole-source aquifer or upland surface soil removal on a site that has wetlands). Environmentally sensitive resources include, but are not limited to, those listed in paragraph B. (4) (see Attachment A).
- 2) There are no extraordinary circumstances related to the proposal that may affect the significance of the environmental effects of the proposal.
- The proposal is not "connected" to other actions with potentially significant impacts, is not related to other proposed actions with cumulatively significant impacts, and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211.

Snowy Range-Happy Jack 115kV Transmission Line Vegetation Management (Hand Work) Albany and Laramie Counties, Wyoming *Project Number: 2020-001 Expiration Date: December 31, 2024*

E. <u>Determination</u>: Based on my review of information provided to me and in my possession concerning the proposed action, I have determined that the proposed action fits within the specified class of actions, the other regulatory requirements set forth above are met, and the proposed action is categorically excluded from requirements for an EA or an EIS.

above a sole-source aquifer or upland surface soil removal on a site that has wetlands). Environmentally sensitive resources include, but are not limited to:		
(i) Property (such as sites, buildings, structures, and objects) of	Х	
historic, archaeological, or architectural significance designated by		
a Federal, state, or local government, or property determined to be		
eligible for listing on the National Register of Historic Places;		
(ii) Federally-listed threatened or endangered species or their habitat	Х	
(including critical habitat) or Federally- proposed or candidate		
species or their habitat (Endangered Species Act); state-listed or		
state-proposed endangered or threatened species or their habitat;		
Federally-protected marine mammals and Essential Fish Habitat		
(Marine Mammal Protection Act; Magnuson-Stevens Fishery		
Conservation and Management Act); and otherwise Federally-		
protected species (such as under the Bald and Golden Eagle		
Protection Act or the Migratory Bird Treaty Act);		
(iii) Floodplains and wetlands (as defined in 10 CFR 1022.4,	Х	
-Compliance with Floodplain and Wetland Environmental		
Review Requirements: "Definitions," or its successor);		
(iv) Areas having a special designation such as Federally- and state-	Х	
designated wilderness areas, national parks, national monuments,		
national natural landmarks, wild and scenic rivers, state and Federal		
wildlife refuges, scenic areas (such as National Scenic and Historic		
Trails or National Scenic Areas), and marine sanctuaries;		
(v) Prime or unique farmland, or other farmland of statewide or local	Х	
importance, as defined at 7 CFR 658.2(a), -Farmland Protection		
Policy Act: Definitions, or its successor;		
(vi) Special sources of water (such as sole-source aquifers, wellhead	Х	
protection areas, and other water sources that are vital in a region);		
and		
(vii) Tundra, coral reefs, or rain forests; or	Х	
(5) Involve genetically engineered organisms, synthetic biology,	Х	
governmentally designated noxious weeds, or invasive species, unless		
the proposed activity would be contained or confined in a manner		
designed and operated to prevent unauthorized release into the		
environment and conducted in accordance with applicable requirements,		
such as those of the Department of Agriculture, the Environmental		
Protection Agency, and the National Institutes of Health.
