Federal Employee Occupational
Safety & Health

What is FEOSH

The U.S. Department of Energy (DOE) Federal Employee Occupational Safety and Health (FEOSH) Program serves as DOE's corporate resource working to ensure safe and healthful working conditions for Departmental employees. There are approximately 13,500 DOE Federal employees, dispersed throughout the energy technology center, power marketing administrations, Headquarters, and operation/field offices. DOE's FEOSH Program is federally mandated by 29 CFR Part 1960, Section 19 of the Occupational Safety and Health Act and Executive Order 12196.

The Benefits of FEOSH

The FEOSH Program supports line management through the transfer of pertinent information, guidance, technical expertise and assistance, and program evaluation. The FEOSH Program operates successfully through continued open communication and effective partnerships among management, professionals implementing FEOSH Programs, and labor organizations.

FEOSH at Work

FEOSH is fundamentally committed to activities that: (1) ensure the safety and health of DOE Federal employees; (2) maintain a strong partnership with Departmental FEOSH Programs, labor organizations, and other Federal agencies; (3) recognize and respond to safety and health concerns; (4) focus on value-added activities; (5) conserve Departmental resources; and (6) build on the experience of others.
