Rocky Mountain Region, Western Area Power Administration

Whiterock Substation (Stage 2) 115-kV Bay Expansion Platte County, Wyoming Project Number: 2020-049 Expiration Date: December 31, 2024

A. <u>Brief Description of Proposal</u>: Western Area Power Administration (WAPA), Rocky Mountain Region (RMR), proposes to expand the existing Whiterock Substation (WRK) to the north and west, to accommodate an additional 115-kV line bay to serve as a new 12 MW Network Load Point of Delivery (POD) for the proposed Finnerty Substation owned by Tri-State Generation & Transmission Association (TSGT), which is sited to the north of the Whiterock Substation, located in Platte County, Wyoming.

The project plans to grade the new yard with ballast rock, then install new fencing, a grounding net and poles, pour concrete for electrical equipment foundations, install three (3) 2000 Amp 115-kV Disconnect Switches (WRK-1165, WRK-1163, WRK-1161), one (1) 115-kV Power Circuit Breaker (WRK-1162), one (1) 115-kV Capacitor Voltage Transformer CVT, an Optic Fiber termination equipment box, and construct a new communication building.

All work will occur within the newly fenced yard on WAPA-owned property. Equipment used may include backhoe with hydraulic jack, compactors, bulldozer (tracked), skid-steer, equipment trailers, bucket trucks, crane, and utility trucks. No new roads will be constructed, and the substation will be accessed using existing driveway, roads, or overland routes.

B. Special Stipulations Pertaining to the Proposal:

- 1) If the scope of work of this project changes, RMR's Environment Department must be contacted to determine whether additional environmental review is required.
- 2) **This Categorical Exclusion expires on December 31, 2024**. If all project work has not been completed by the expiration date, or if the need for an environmental compliance extension is anticipated, RMR's Environment Department must be contacted for an updated environmental review.
- 3) Any injured or orphaned birds must be immediately reported to the RMR Avian Protection Lead at (970) 593-8803. Any dead birds must be reported to the RMR Avian Protection Lead within twenty-four (24) hours of discovery. Additional documentation, such as photographs and GPS coordinates, may be requested to support RMR's reporting requirements to the U.S. Fish and Wildlife Service.
- 4) Transmission line and substation components must be designed and constructed in conformance with the most current editions of *Suggested Practices for Avian Protection on Power Lines* and *Reducing Avian Collisions with Power Lines*, both published by the Avian Power Line Interaction Committee (APLIC), to minimize avian collision and electrocution risk while maintaining safe and reliable electrical service

Rocky Mountain Region, Western Area Power Administration

Whiterock Substation (Stage 2) 115-kV Bay Expansion Platte County, Wyoming Project Number: 2020-049 Expiration Date: December 31, 2024

- 5) If any cultural resources are inadvertently discovered during implementation of the proposed action, work within 100 feet of the discovery area must halt immediately and an RMR Archaeologist must be contacted immediately at (970) 286-3523 or (970) 302-4753. Work in the area of discovery must not resume until notification to proceed is provided by an RMR Archaeologist.
- 6) If any possible human remains are inadvertently discovered during implementation of the proposed action, work within 100 feet of the discovery area must halt immediately and an RMR Archaeologist must be notified immediately at (970) 286-3523 or (970) 302-4753 (no later than 24 hours from the time of discovery). A reasonable effort must be made to protect the remains from looting and/or further damage. Work in the area of discovery must not resume until notification to proceed is provided by an RMR Archaeologist.
- 7) To prevent the transport of non-native and invasive plants and animals, including noxious weeds and aquatic nuisance species, work crews must thoroughly wash all vehicles and equipment (trailers, trucks, UTVs, etc.) before entering the action area and working on the project.
- 8) Installation of equipment in substations must conform to WAPA's requirements and must be approved by WAPA. Oil-filled equipment, including bushings, must not contain polychlorinated biphenyls (PCB). In addition, oil-filled equipment must be permanently labeled by the manufacturer as No-PCB. Certification must be provided to RMR's Environment Department at or before the time of installation. Oil-filled equipment may require an oil spill containment system to comply with federal or state regulations.
- 9) WAPA Maintenance Staff or the Contractor, as applicable, must record quantities of SF₆, including:
 - a) Nameplate capacity in pounds of SF₆ gas containing equipment;
 - b) Pounds of SF₆ gas stored in containers, before transferring into energized equipment;
 - c) Pounds of SF₆ gas left in containers, after transferring into energized equipment;
 - d) Pounds of SF₆ gas purchased from equipment manufactures or distributors; and
 - e) Pounds of SF₆ gas returned to suppliers.

Scales used to weigh cylinders must be accurate to within +/- 2 pounds and must have current calibration sticker.

10) Activities involving the use of fuel, oil, hydraulic fluid, or other petroleum products must comply with RMR's Spill Response Plan (SRP).

Rocky Mountain Region, Western Area Power Administration

Whiterock Substation (Stage 2)
115-kV Bay Expansion
Platte County, Wyoming
Project Number: 2020-049
Expiration Date: December 31, 2024

- C. <u>Number and Title of the Categorical Exclusion Being Applied</u>: (See text in 10 CFR Part 1021, Subpart D.)
 - B4.11 Electric power substations and interconnection facilities
- **D.** Regulatory Requirements in 10 CFR 1021.410 (b): (See full text in regulation and attached checklist.)
 - 1) The proposed action fits within a class of actions listed in Appendix A or B to Subpart D. For classes of actions listed in Appendix B, the following conditions are integral elements. To fit within a class, the proposal <u>must not</u>:
 - Threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders;
 - Require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities;
 - Disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases;
 - Have the potential to cause significant impacts on environmentally sensitive resources. An environmentally sensitive resource is typically a resource that has been identified as needing protection through Executive Order, statute, or regulation by Federal, State, or local government, or a federally recognized Indian tribe. An action may be categorically excluded if, although sensitive resources are present, the action would not have the potential to cause significant impacts on those resources (such as construction of a building with its foundation well above a sole-source aquifer or upland surface soil removal on a site that has wetlands). Environmentally sensitive resources include, but are not limited to those listed in paragraph B. (4) (see Attachment A).
 - 2) There are no extraordinary circumstances related to the proposal that may affect the significance of the environmental effects of the proposal.
 - 3) The proposal is not "connected" to other actions with potentially significant impacts, is not related to other proposed actions with cumulatively significant impacts, and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211.

E. <u>Determination</u>: Based on my review of information provided to me and in my possession concerning the proposed action, I have determined that the proposed action fits within the specified class of actions, the other regulatory requirements set forth above are met, and the proposed action is categorically excluded from requirements for an EA or an EIS.

ATTACHMENT A

Conditions That Are Integral Elements of the Classes of Actions in Appendix B That Apply to This Proposal

Checklist for Categorical Exclusion Determination, revised Nov. 2011

Application of Categorical Exclusions (1021.410)	Disagree	Agree	Unknown
(b)(1) The proposal fits within a class of actions that is listed in appendix		X	
B to subpart D.			
(b)(2) There are no extraordinary circumstances related to the proposal		X	
that may affect the significance of the environmental effects of the			
proposal. Extraordinary circumstances are unique situations presented by			
specific proposals, including, but not limited to, scientific controversy			
about the environmental effects of the proposal; uncertain effects or			
effects involving unique or unknown risks; and unresolved conflicts			
concerning alternate uses of available resources.			
(b)(3) The proposal has not been segmented to meet the definition of a		X	
categorical exclusion. Segmentation can occur when a proposal is broken			
down into small parts in order to avoid the appearance of significance of			
the total action. The scope of a proposal must include the consideration of			
connected and cumulative actions, that is, the proposal is not connected to			
other actions with potentially significant impacts (40 CFR 1508.25(a)(1)),			
is not related to other actions with individually insignificant but			
cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not			
precluded by 40 CFR 1506.1 or § 1021.211 of this part concerning			
limitations on actions during EIS preparation.		*****	
B. Conditions that are Integral Elements of the Classes of Actions in	NO	YES	Unknown
Appendix B.	**		
(1) Threaten a violation of applicable statutory, regulatory, or permit	X		
requirements for environment, safety and health, or similar			
requirements of DOE or Executive Orders.	37		
(2) Require siting and construction or major expansion of waste storage,	X		
disposal, recovery, or treatment facilities (including incinerators), but			
the proposal may include categorically excluded waste storage,			
disposal, recovery, or treatment actions or facilities;	***		
(3) Disturb hazardous substances, pollutants, contaminants, or CERCLA-	X		
excluded petroleum and natural gas products that preexist in the			
environment such that there would be uncontrolled or unpermitted			
releases;	***		
(4) Have the potential to cause significant impacts on environmentally	X		
sensitive resources. An environmentally sensitive resource is			
typically a resource that has been identified as needing protection			
through Executive Order, statue, or regulation by Federal, state, or			
local government, or a federally recognized Indian tribe. An action			
may be categorically excluded if, although sensitive resources are			
present, the action would not have the potential to cause significant
