

Water Supply Update

- Old Hickory: The moratorium was lifted in May. Though several pre-applications meetings were held, no formal applications for intakes have been received to date.
- Center Hill: Cookeville has requested additional storage. At the same time, the Storage-Yield ratio has been updated showing the existing users' storage now yields less water than shown in the 2003 reallocation report, which triggers a 2nd reallocation study at Center Hill.
- J. Percy Priest: The storage agreement for the Town of Smyrna will go before their council on 12 Oct. After execution, SEPA will receive the crediting memo.
