Re: In the Matter of Freeport LNG Expansion, L.P. et al.
FE Docket No. 21-98-LNG
Application for Long-Term Authorization to Export Liquefied Natural Gas to Non-Free Trade Agreement Nations

I hereby write to ask the DOE to reject the request in the above referenced docket of Freeport LNG Expansion, L.P., FLNG Liquefaction, LLC, FLNG Liquefaction 2, LLC and FLNG Liquefaction 3, LLC (collectively "Freeport LNG") to the U.S. Department of Energy to increase export capacity at their LNG Liquefaction and Export Terminal in Brazoria County, Texas.

LNG exports have and will continue to force consumer prices for U.S. natural gas to historic high levels, Moreover, LNG exports are key to assisting our worst economic competitors in their efforts to undermine the United States economy. LNG exports support our worst competitors' efforts to use our natural resources, while preserving their own, allowing them to generate electricity and goods that they will sell back to us to undermine our economy even more by getting rid of American manufacturing jobs.

They also bring in ships to Quintana that exceed the permitted noise limits the entire time they are docked and loaded, so far with no consequences. These ships keep residents and visitors from sleeping at night on what is otherwise a peaceful public beach Island.

For these reasons, we hereby do not support Freeport LNG's export capacity increase request and ask that you move quickly to grant such request, as local, national and global communities stand to greatly benefit from the approval of Freeport LNG's application. Thank you for your consideration.

Sincerely,

Harold M Doty
800 Gulf Street
Quintana, Texas 77541
