General Comment

I recommend we adopt the New Green Deal immediately. AOC was right all along, but I bet she is not laughing. Meanwhile, the GOP denied climate change and practices other delay tactics to appease the oil and gas industry. The "Great Transition" must be sped up in America first to show the world we are not afraid and or corrupted to tackle the greatest threat to the planet and its inhabitants.

Any resources on America's public lands must be nationalized and not treated as a commodity and exported for profit.
