U.S. DEPARTMENT OF ENERGY OFFICE OF ENERGY EFFICIENCY AND RENEWABLE ENERGY NEPA DETERMINATION

STATE: MN

RECIPIENT: IDOM Inc.

PROJECT TITLE : Improved Design Standard for High Temp Molten Nitrate Salt Tank Design

Funding Opportunity Announcement Number	Procurement Instrument Number	NEPA Control Number CID Number
DE-FOA-0002378	DE-EE0009807	GFO-0009807-001

Based on my review of the information concerning the proposed action, as NEPA Compliance Officer (authorized under DOE Policy 451.1), I have made the following determination:

CX, EA, EIS APPENDIX AND NUMBER:

Description:

A9	Information gathering (including, but not limited to, literature surveys, inventories, site visits, and audits), data
Information	analysis (including, but not limited to, computer modeling), document preparation (including, but not limited to,
gathering,	conceptual design, feasibility studies, and analytical energy supply and demand studies), and information
analysis, and	dissemination (including, but not limited to, document publication and distribution, and classroom training and
dissemination	informational programs), but not including site characterization or environmental monitoring. (See also B3.1 of
	appendix B to this subpart.)

Rationale for determination:

The U.S. Department of Energy is proposing to provide funding to IDOM Inc. to develop an improved hightemperature molten salt Thermal Energy Storage (TES) tank design to become the basis for the first design standard for TES tanks, in order to address shortcomings of current TES tank designs. The proposed project would be completed over three Budget Periods (BPs) with the additional involvement of Lehigh University's Energy Research Center. Project activities would include a literature and code review, material study and metallurgical selection, development of welding, insulation systems, and foundation design guidelines, verification and validation of stress and deformation levels using computational fluid dynamics (CFD) and finite element (FE) analysis, and lastly the development of a design document specific to the service requirements of TES tanks.

The proposed project would consist solely of intellectual, academic, and/or analytical activities. All project activities would be conducted from existing offices or computational facilities and use no materials beyond basic office supplies, software, and computer hardware.

NEPA PROVISION

DOE has made a final NEPA determination.

Notes:

Solar Energy Technologies Office (SETO) Review completed by Alex Colling on 3/25/2022.

FOR CATEGORICAL EXCLUSION DETERMINATIONS

The proposed action (or the part of the proposal defined in the Rationale above) fits within a class of actions that is listed in Appendix A or B to 10 CFR Part 1021, Subpart D. To fit within the classes of actions listed in 10 CFR Part 1021, Subpart D, Appendix B, a proposal must be one that would not: (1) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders; (2) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities; (3) disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases; (4) have the potential to cause significant impacts on

environmentally sensitive resources, including, but not limited to, those listed in paragraph B(4) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those listed in paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B.

There are no extraordinary circumstances related to the proposed action that may affect the significance of the environmental effects of the proposal.

The proposed action has not been segmented to meet the definition of a categorical exclusion. This proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211 concerning limitations on actions during preparation of an environmental impact statement.

The proposed action is categorically excluded from further NEPA review.

SIGNATURE OF THIS MEMORANDUM CONSTITUTES A RECORD OF THIS DECISION.
