Re: New Fortress Energy Louisiana FLNG LLC

Dear Ms. Sweeney:

On March 30, 2022, New Fortress Energy Louisiana FLNG LLC ("NFE") filed an Application ("Application") with the United States Department of Energy's ("DOE") Office of Fossil Energy and Carbon Management ("DOE/FECM"), requesting long-term, multi-contract authorization to export domestically-produced liquefied natural gas ("LNG") in an amount of up to approximately 145 billion cubic feet of natural gas per year from its proposed deepwater port export terminal project, the New Fortress Energy Louisiana FLNG Project (the "Project"). The Application requests authorization, on a non-additive basis, to export LNG via ocean going vessel to both (i) countries with which the U.S. has a free trade agreement ("FTA") requiring national treatment for trade in natural gas, and (ii) any country that lacks an FTA with the U.S. requiring national treatment for trade in natural gas, with which trade is not prohibited by U.S. law or policy and that has, or in the future develops, the capacity to import LNG. Exports from the Project are anticipated to commence within several months after all required authorizations have been received.

In the Application, NFE indicated that it was in the process of registering to do business in the state of Louisiana. NFE hereby informs DOE/FECM that effective April 12, 2022, it became fully registered to conduct business in the state of Louisiana, as did NFE FLNG 1 LLC and NFE FLNG 2 LLC.

Respectfully submitted,

/s/ Lisa M. Tonery
