General Comment

A new project for LNG export has been submitted by New Fortress Energy, proposed off the coast of Grand Isle Louisiana in Jefferson Parish. New Fortress is looking to fast track approval to build several low cost LNG projects in the Gulf Coast MARAD, an agency of the Department of Transportation, and the U.S. Coast Guard are responsible for approving or denying New Fortress's plans for expanding harmful fracked gas export in the Gulf Coast Any new fossil fuel project undermines environmental justice and climate goals.

As grandmothers, we know we must protect our Earth to protect our grandchildren and their children and grandchildren We must end our reliance on fossil fuels and move our country to sustainable energy options. You must deny these plans proposed by New Fortress, for the sake of all our children and grandchildren

Respectfully,

Barbara Rhine, Chair, Legislative Working Group
Susan Penner, Liaison, Legislative Working Group
