

SUSTAINABILITY GOALS AND YOU

Multiple Categories

- Reduce Scope 1 and 2 greenhouse gas (GHG) emissions by 50% by fiscal year (FY) 2025 from a FY 2008 baseline.
- Minimize Scope 3 GHG emissions.

HOW YOU CAN HELP

(Actions You Can Take listed in Green)

Energy Management

- Reduce energy intensity.
- Turn off lights when leaving a room.
- Put electronics to sleep or turn them off if you are stepping away for long periods.

Water Management

- Reduce potable water intensity.
- Use the minimal amount of water necessary.
- Don't let water run while performing other tasks.

Waste Management

- Divert at least 50% of non-hazardous waste (excluding construction and demolition debris (C&D)) from landfills.
- Contact LMSP Environmental Compliance or Personal Property when unclear about recycling pathways for waste and excess property.
- Recycle whenever possible.
- Choose biobased and reusable products, if available.
- Resist the urge to print.

Fleet Management

- Reduce petroleum consumption by 2.0% annually.
- Maintain 10% increase in consumption of alternative fuels annually.
- Idle vehicles and equipment less when not needed to accomplish the mission.
- Consolidate trips, carpool if possible, plan your activities in advance to decrease drive time and mileage.
- Use video teleconferences instead of commercial or GSA travel, when possible.
- Plan for and use alternative fuels whenever possible.
