

Community Geothermal Heating and Cooling Design and Deployment Funding Opportunity

Is Your Community Ready for Geothermal Energy?

Let's find out with a quick guide to navigate the Community Geothermal Heating and Cooling Design and Deployment Funding Opportunity Announcement (FOA)!

The FOA will support the formation of U.S.-based community coalitions to develop, design, and install community geothermal heating and cooling systems, as well as to create related workforce training and identify and address environmental justice concerns. Applicants should be diverse teams with representatives for four key roles: community voice, analysis and design, workforce, and deployment. Coalitions can be from urban, suburban, rural, remote, island, or islanded communities where geothermal can reduce dependence on fossil fuels such as natural gas or heating oil.

This guide provides tips for the key items you'll need—but be sure to read the FOA in its entirety, too!

Read the full FOA located on EERE's Exchange: [EERE-Exchange.energy.gov](https://www.eere-exchange.energy.gov)

1

Determine if the opportunity is a good fit for you. If you're ready to develop, design, and install a community geothermal heating and cooling system, chances are the answer is yes!

- **Sections I.A. and I.B.** of the FOA provide details that can help you decide if such a project is the right fit for your community.
- **Sections II.A. and II.B.** provide information on the funding available and the cost share your coalition would need to provide to participate.

2

Make sure you're eligible by reviewing the eligibility requirements. You can find the information in Section III of the FOA.

3

Build a coalition. Many organizations can get involved! Be sure to select a primary applicant and then include at least the four required roles described in the FOA Specific Goals subsection in Section I.A.ii: community voice, deployment, analysis and design, and workforce training.

- A teaming partners list is available [here](#) to help connect you to potential partners. You can have as many partners as you'd like, as long as you include all four of the required roles.

4

Edit and review your application to ensure you have covered everything that's needed and that you meet the requirements in the **Application and Submission Information in Section IV.**
