001

**CID
Number**

Based on my review of the information concerning the proposed action, as NEPA Compliance Officer (authorized under DOE Policy 451.1), I have made the following determination:

CX, EA, EIS APPENDIX AND NUMBER:

Description:

**A9 Information
gathering, analysis,
and dissemination**

Information gathering (including, but not limited to, literature surveys, inventories, site visits, and audits), data analysis (including, but not limited to, computer modeling), document preparation (including, but not limited to, conceptual design, feasibility studies, and analytical energy supply and demand studies), and information dissemination (including, but not limited to, document publication and distribution, and classroom training and informational programs), but not including site characterization or environmental monitoring. (See also B3.1 of appendix B to this subpart.)

**A11 Technical
advice and
assistance to
organizations**

Technical advice and planning assistance to international, national, state, and local organizations.

Rationale for determination:

The U.S. Department of Energy (DOE) is proposing to authorize the administration of a prize competition (the Community Clean Energy Coalition Prize, or "Prize") to support capacity development through coalitions that address community-identified energy challenges. Awards would be provided for eligible entities to develop these coalitions as well as partnerships between organizations to address clean energy system issues that the coalitions identify. The resulting coalitions would be positioned to inform DOE on the Environmental Justice needs of communities in terms of clean energy, while also providing a voice for improved community input in decision-making.

DOE is launching the Prize under the umbrella of the American-Made Challenges and in alignment with the Office of Energy Efficiency and Renewable Energy (EERE) family of Inclusive Energy Innovation Prizes. The Prize is a three-phase competition with up to ten winners in Phase One (\$30k each), up to ten winners in Phase Two (\$115k each), and one Phase Three (\$50k) winner. Winners would be awarded for the development of administrative projects that improve collaboration between community-based organizations, such as development of facilitated discussions to align on priorities, improved understanding of local priorities, or government approaches and strategies for developing clean energy projects. Selected projects would be limited to intellectual and analytical activities; no physical project development would be allowed.

Based on a review of the Prize Official Rules and a description of the anticipated activities and goals associated with each Phase, DOE has determined that no adverse impacts to resources of concern are expected as a result of the administration of this Prize.

NEPA PROVISION

DOE has made a final NEPA determination.

FOR CATEGORICAL EXCLUSION DETERMINATIONS

The proposed action (or the part of the proposal defined in the Rationale above) fits within a class of actions that is listed in Appendix A or B to 10 CFR Part 1021, Subpart D. To fit within the classes of actions listed in 10 CFR Part 1021, Subpart D, Appendix B, a proposal must be one that would not: (1) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, or similar requirements of DOE or Executive Orders; (2) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities (including incinerators), but the proposal may include categorically excluded waste storage, disposal, recovery, or treatment actions or facilities; (3) disturb hazardous substances, pollutants, contaminants, or CERCLA-excluded petroleum and natural gas products that preexist in the environment such that there would be uncontrolled or unpermitted releases; (4) have the potential to cause significant impacts on environmentally sensitive resources, including, but not limited to, those listed in paragraph B(4) of 10 CFR Part 1021, Subpart D, Appendix B; (5) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements, such as those listed in paragraph B(5) of 10 CFR Part 1021, Subpart D, Appendix B.

There are no extraordinary circumstances related to the proposed action that may affect the significance of the environmental effects of the proposal.

The proposed action has not been segmented to meet the definition of a categorical exclusion. This proposal is not connected to other actions with potentially significant impacts (40 CFR 1508.25(a)(1)), is not related to other actions with individually insignificant but cumulatively significant impacts (40 CFR 1508.27(b)(7)), and is not precluded by 40 CFR 1506.1 or 10 CFR 1021.211 concerning limitations on actions during preparation of an environmental impact statement.

The proposed action is categorically excluded from further NEPA review.

SIGNATURE OF THIS MEMORANDUM CONSTITUTES A RECORD OF THIS DECISION.
