

Department of Energy
Washington, DC 20585

WEATHERIZATION PROGRAM NOTICE 21-1
ISSUED DATE: December 4, 2020

SUBJECT: PROGRAM YEAR 2021 WEATHERIZATION GRANT APPLICATION

INTENDED AUDIENCE: Weatherization Grantee Managers, Weatherization Subgrantee Managers

INTENDED USE: Content of this document, as well as the two attachments, is intended to provide programmatic information to Weatherization Managers to guide the development of an annual Weatherization Assistance Program (WAP) Grantee Plan to ensure that funds are dispersed to weatherization providers in a timely manner.

The Department of Energy (DOE) issues Weatherization Program Notice (WPN) 21-1 annually to specifically address changes from one Program Year (PY) to the next. These changes are often precipitated by Congressional inquiries, administrative priorities, including new initiatives from other federal agencies, monitoring in the field, and feedback from the network of stakeholders. The annual document, issued as a WPN, serves to highlight and remind Grantees of these issues and provide them with additional resources so they may include the information as appropriate to their specific circumstances in applying for the WAP formula funds.

The attachments to this WPN serve as programmatic, financial, and legal resources with clarifying information on areas of the Application Package that must be incorporated into the Grantee Plan. The WAP Grant Application Package materials and data are submitted through WAP's reporting system, Performance and Accountability for Grants in Energy (PAGE).

This WPN includes the following sections:

- 1.0 Purpose**
- 2.0 Program Priorities and Initiatives**
- 3.0 Funding**
- 4.0 Applications for WAP Annual Formula Grants**
- 5.0 Weatherization Program Notices and Memoranda**
- 6.0 Website Information**

1.0 PURPOSE

To issue grant instructions and management information for the WAP for PY 2021 based on the following documents:

- Attachment 1: Administrative and Legal Requirements Document (ALRD)
- Attachment 2: Application Instructions, to be used by all States, Territories, and Native American Tribes (and locals, if applicable) as supplemental information when applying for direct grants under the Weatherization Assistance Program for Low-Income Persons.

Currently, WAP is operating under a Continuing Resolution (CR) for Fiscal Year (FY) 2021. For planning purposes, until a final full year FY 2021 budget is passed and signed by the President, Grantees should develop their Grantee Plans using the same funding level as the DOE 2020 Appropriated Funds outlined in [WPN 20-2](#).

While WPN 20-2 allocations will suffice for FY 2021 planning purposes, DOE will adjust the allocations to Grantees based on final FY 2021 appropriations. Therefore, Grantees are advised to include language in their draft plans and in public hearing notices that clearly explains final WAP allocations will include adjustments from the planning numbers reflected in WPN 20-2 and the draft Grantee Plan necessary to align with final DOE appropriations for WAP.

Once a FY 2021 budget is passed and signed by the President, DOE will issue WPN 21-2, PY 2021 Grantee Allocations. At that time, all Grantees that have approved plans for PY 2021 will then begin a budget modification process, if necessary.

1.1 SCOPE

The provisions of this Guidance apply to Grantees or other entities named in the Notification of Grant Award as the recipient(s) of financial assistance under the DOE WAP.

1.2 LEGAL AUTHORITY

Title IV, Energy Conservation and Production Act (ECPA), as amended, authorizes the Department to administer the WAP (42 U.S.C. § 6861, *et. seq.*). All grant awards made under this Program shall comply with applicable law and regulations including, but not limited to, the WAP regulations contained in the Code of Federal Regulations (CFR) at [10 CFR 440](#) and DOE Financial Assistance Rules at [2 CFR 200](#).

A table has been updated in Section 5.0, which lists active WPNs. This table provides references to relevant Program matters to assist Grantees in the development of their Grantee WAP plans, policies and procedures. This section also includes Memoranda that have been issued by the Program Office updating Grantees on current activities and issues that are of general interest to the network.

2.0 PROGRAM PRIORITIES AND INITIATIVES

From time to time, DOE undertakes initiatives to improve WAP operations and effectiveness. This Section informs Grantees of these priorities. They are not considered Program policy until provided in a related WPN.

2.1 AMERICAN CUSTOMER SATISFACTION INDEX (ACSI)

In 2019, DOE WAP utilized the American Customer Satisfaction Index (ACSI) to survey Grantees and Subgrantees of the WAP for a second time – the first was conducted in 2017. This survey provided Grantees and Subgrantees the opportunity to give DOE WAP constructive feedback on where improvements have been made and identify areas where there are still opportunities for improvement. The intent of the survey is to provide the WAP network with a mechanism for continuous improvement of program management and to deliver maximum benefits to WAP clients. Grantees must include an overview of their ACSI Action Plan to reflect continued feedback on past surveys (based from the 2019 survey) that details their specific actions or initiatives to improve program operations, training, technical assistance and communications with Subgrantees, and quality of work.

See Section IV.7 Miscellaneous in the PY 2021 Application Instructions.

2.2 BUDGET/EXPENDITURES/CARRYOVER

The 2021 Program Year was slated to start a “New” application grant cycle, however, given the potential CR and production delays due to the COVID-19 pandemic, DOE will extend the project period of current grants for another year. Therefore, for programming purposes, DOE recommends Grantees use their 2020 funding levels to plan their 2021 Program Year Application Plan. In addition, Grantees should estimate carryover from the prior year and include that estimate in their Application Plan budget submission. See Section III.4 Carryover Explanation in the PY 2021 Application Instructions.

If a Grantee does not need to Combine Program Years:

If a Grantee **does not need** relief from the maximum allowable Average Cost Per Unit (ACPU) for PY 2020 and is not considering combining budget periods, the Grantee should simply incorporate the carryover of the prior year funds into the PY 2021 budget through the normal state plan process, as outlined in the 2021 Application Instructions, Section III - Budget.

Any PY 2020 funds not expended by the end of PY 2020 are available to be carried over and expended during PY 2021, even if the amount of unexpended funds will be significantly greater than originally anticipated because of the nationwide COVID-19 quarantines and shutdowns.

Option to Combine Program Years:

As in PY 2020, Grantees have the option to combine their 2020-2021 or 2019-20-21 Program Years. Combining program years allows a Grantee to have additional time to complete all partially-completed units, including final Quality Control Inspectors (QCI) Inspections and to ensure the statewide ACPU.

If you are considering this option, please contact your Project Officer (PO) as soon as possible.

2.3 WAP NATIONAL EVALUATION

DOE released the results of the [National Evaluation of the Weatherization Assistance Program](#) on September 16, 2015, that include a Summary Fact Sheet, Executive Summary and study report. Led by the Oak Ridge National Laboratory, the peer-reviewed evaluation was to conduct detailed analysis of the WAP Program Year 2008 (Retrospective Evaluation). The statistically robust results demonstrate that weatherization provides cost-effective energy savings and health and safety benefits to American families.

At this time, DOE does not have a schedule to conduct another comprehensive evaluation of this size. No action is called for on the part of Grantees on this matter.

2.4 PARTICIPATION IN ADDITIONAL EVALUATIONS/STUDIES

DOE encourages WAP Grantees and Subgrantees to participate in studies related to weatherization programs. Particularly, Grantees are urged to conduct regular program evaluations. While national-level studies allow us to see macro elements, by participating in well-designed state-level or regional-level studies, more clarity can be attained on the impact specific protocols have on the energy savings and other benefits garnered through WAP. Grantees are urged to establish a protocol for Subgrantees to follow when asked to participate in a study. This policy should include what the study is about and ensure that [WPN 10-08 Weatherization Guidance on Maintaining the Privacy of Recipients of Services](#) is followed. If Grantees need assistance in establishing or reviewing these protocols, please contact your respective DOE Project Officer (PO).

See Section V.6 Weatherization Analysis of Effectiveness in the PY 2021 Application Instructions.

2.5 HEALTH AND SAFETY

Health and safety for both workers and occupants is a top priority for DOE. Over the years, a number of new standards and concerns have been addressed to ensure that weatherization activities do not cause or exacerbate health and safety problems. As new standards and concerns arise, DOE strives to address them accordingly. DOE released a revised version of the WAP Health and Safety Program Notice, [WPN 17-7](#) on August 9, 2017. Grantees should review this document and provide the necessary training and technical assistance to Subgrantees to fully implement the requirements outlined in the guidance. Grantees are urged to consult with Subgrantees in developing the implementation plan.

See Section V.7 Health & Safety in the PY 2021 Application Instructions.

2.6 MULTIFAMILY RETROFIT TOOLS AND WORKFORCE RESOURCES

DOE supports the development of multifamily energy auditing tools to advance the WAP's ability to address this building type. DOE developed and maintains the Standard Work Specifications (SWS) for multifamily home energy upgrades to ensure that energy efficiency upgrades are effective, durable, and safe. The Multifamily Job Task Analyses (JTAs) define the knowledge, skills, and abilities (KSAs) that multifamily practitioners use to perform jobs effectively and safely. The JTAs provide a foundation for developing high-quality training and credentialing programs.

The Multifamily Tool for Energy Audits (MulTEA) produces an investment grade energy audit to provide auditors with an improved energy simulation and weatherization measure selection tool for multifamily buildings. The tool calibrates building energy use using historical weather data that prevailed during that utility billing period.

See Section V.5 Type of Weatherization Work to be Done in the PY 2021 Application Instructions.

2.7 QUALITY WORK PLAN IMPLEMENTATION

DOE works with Grantees and Subgrantees to ensure that independent, third-party quality control inspections are conducted on every weatherized home and results are shared with relevant parties. These inspections must be conducted by certified QCIs. DOE has provided two options to meet this requirement in [WPN 15-4](#) and [WAP Memorandum 034](#). DOE also permits Grantees to develop alternative approaches by working with their DOE PO.

Grantees are responsible for ensuring that Grantee technical monitors are QCI-certified, and that Subgrantee staff fulfilling this role possess the an active QCI-certification.

Grantee, Subgrantee and Contractor staff who repeatedly fail to perform to Program expectations must be disqualified from performing work in the future. Grantees must establish protocols to remove poor performers in their network.

In addition to trained and certified QCIs, Grantees must ensure their respective Training Plans include a provision to provide Comprehensive training for all Retrofit Installer/Technicians, Crew Leaders, and Energy Auditors on some regular basis. Per [WPN 15-4](#) and as clarified in [Memorandums 034](#) and [036](#), "Beginning in Program Year 2014, Grantee training plans must include routine, Comprehensive Training for all WAP workers that is aligned with the Job Task Analysis (JTA) for the position in which the worker is employed. The Grantee must determine what constitutes "regular" training, e.g., once every 3 years, every 5 years, or within a certain time after being hired into the network, for each job category."

WAP [Memo 048](#) was issued to notify the WAP network of upcoming changes to the content of the SWS, however, compliance with the current version of the SWS and the Grantee's approved installation standards is mandatory for all DOE WAP projects.

See Section V.8.4 Training and Technical Assistance (T&TA) in the PY 2021 Application Instructions.

2.8 NATIONAL ENVIRONMENTAL POLICY ACT INFORMATION (NEPA)

Effective with WPN 20-1, DOE determined certain activities are categorically excluded from further NEPA review, absent extraordinary circumstances, cumulative impacts, or connected actions that may lead to significant impacts on the environment, or any inconsistency with “integral elements” (as contained in [10 CFR Part 1021](#), Appendix B) as they relate to the activities listed in the PY21 NEPA determination. Recipients should review the NEPA determination specific to PY 2021 in their award documents for the list of activities that have been categorically excluded from further NEPA review.

2.9 HISTORIC PRESERVATION

DOE must comply with the requirements of Section 106 of the National Historic Preservation Act (NHPA) prior to authorizing the use of Federal funds. Section 106 requires federal agencies to consider the effects on historic properties with projects they fund. Most recipients have a DOE executed Programmatic Agreement (PA) to streamline the Section 106 process. All DOE executed PAs are available on the Weatherization and Intergovernmental Programs website: <https://www.energy.gov/eere/wipo/historic-preservation-executed-programmatic-agreements>. For recipients without a PA, they are restricted to activities on structures less than 45 years old, unless those activities are reviewed by DOE. A Historic Preservation Review form was developed to assist recipients in submitting review requests to DOE for structures which are 45 years old or older for review. All recipients must follow the restrictions in their NEPA determination for historic preservation.

3.0 FUNDING

WAP funding listed in the application and requiring DOE approval prior to expenditure may derive from several sources:

- Appropriated Weatherization Funding
- Low-Income Home Energy Assistance Program (LIHEAP) funds designated for expenditure under DOE regulations
- Leveraged Resources designated for expenditure under DOE regulations (e.g., utility funds, state trust funds, other)
- Petroleum Violation Escrow (PVE) Funds
 - Warner and EXXON oil overcharge funds
 - Stripper Well and other oil overcharge funds (including Texaco) which are subject to Stripper Well settlement rules
- Program Income

See Section III. Budget in the PY 2021 Application Instructions.

3.1 FY 2021 APPROPRIATED WEATHERIZATION FUNDING

As referenced, Grantees should create PY 2021 plans using WPN 20-2 funding amounts while the government is under a CR. Once a budget is passed and signed by the President, DOE will issue WPN 21-2 providing the final allocations of Weatherization funds appropriated this year.

3.1.1 ADJUSTED AVERAGE COST PER DWELLING UNIT (ACPU)

ACPU expenditure of financial assistance provided under WAP for labor, weatherization materials, and related matters cannot exceed \$6,500, as adjusted (see, [10 CFR §440.18](#)(a) and (c)). The adjusted annual average for PY 2021 is determined by using the percentage increase in the Consumer Price Index (CPI) (all items, United States city average) for FY 2020 or 3 percent, whichever is less. The percentage increase in the CPI for the previous 12-month period (September 2019 – September 2020) was 1.4%. Therefore, the adjusted average expenditure limit for PY 2021 is **\$7,776. This average includes units computed in a multifamily building of 5 units or greater.**

In accordance with [10 CFR Part 440.18](#)(b) and (c), the expenditure of financial assistance provided under WAP for labor, weatherization materials, and related matters for a renewable energy system, shall not exceed an average of \$3,000 per dwelling unit, as adjusted. The percentage increase in the CPI for the previous 12-month period (September 2019 – September 2020) was 1.4%. Therefore, the PY 2021 adjusted average for renewable energy measures is **\$3,815 for renewable energy system measures with a Savings to Investment Ratio (SIR) greater than 1.**

Note: The adjusted average for renewable energy measures is not a separate average, but part of the overall adjusted average expenditure limit of \$7,776. Currently Appendix A allows for use of solar (thermal) water heating systems. Some states have been granted approval for installation of solar photovoltaics when they have submitted it as part of their Grantee Plan, received approval from the DOE Contracting Officer (CO), and amended their 5-year DOE-approved energy audit process.

3.1.2 LIMITATIONS ON CERTAIN BUDGET CATEGORIES

Certain budget categories have limitations set by law, regulation, or Program policy and identify the percentage of grant funding that is allowed to be used for specific purposes other than Program Operations. Please review Section III. Budget of the Application Instructions for additional information.

3.2 LOW-INCOME HOME ENERGY ASSISTANCE PROGRAM (LIHEAP)

[LIHEAP](#) was first established in 1981 and is funded annually through federal appropriations to the Department of Health and Human Services (HHS). The mission of LIHEAP is to minimize the energy burden on low-income families. As such, if the Grantee elects, a percentage of the LIHEAP assistance funds received by the state from HHS may be transferred to the WAP and used for the purpose of weatherizing homes. Grantees have the option of administering the LIHEAP funds separately from the DOE award or including these resources in the DOE budget. The budget section of the grant application instructions provides a chart outlining some considerations for the Grantee in making this decision. Further questions or points of clarification should be directed to your DOE PO.

See Section III.1 SF424 Budget Preparations in Annual File in the 2021 Application Instructions.

3.3 LEVERAGED RESOURCES

Leveraged funds included in the budget of the DOE award must meet all WAP rules, regulations and guidelines. Grantees should carefully consider the advantages and challenges related to including leveraged funds in the DOE award. Landlord contributions are not considered leveraged resources. Grantees who require further clarification or guidance on leveraged resources should contact their DOE PO.

See Section III.1 SF424-A Budget Preparation in the PY 2021 Application Instructions.

3.4 PETROLEUM VIOLATION ESCROW (PVE) FUNDS

WAP can be funded by a number of sources, including PVE funds. PVE funds can be divided into two general categories based on the source of the funds. The first category of PVE funds is comprised of those funds appropriated by Congress or treated as if appropriated (generically referred to as Exxon funds, and includes funds provided under the Warner Act). The second category of PVE funds is comprised of those funds that were not appropriated (generically referred to as Stripper Well Settlement funds and includes Diamond Shamrock funds).

- PVE funds are subject to applicable requirements of the funding source.
- PVE funds included in a Grantee Plan are subject to the same Grantee Plan approval, Program oversight, and reporting requirements as the annually appropriated funds; and are subject to the **same** statutory and regulatory constraints as annually appropriated funds.
- Generally, if Exxon funds are used for weatherization projects, they must be included in the Grantee Plan. **Exxon funds cannot be used for administrative expenses.**
- A Grantee may elect to use Stripper Well funds for projects either separate from or included within the WAP. Stripper Well Settlement funds are not subject to WAP rules, oversight, or reporting requirements if used for activities separate from WAP. However, DOE urges Grantees to include Stripper Well funds in the Grantee Plan for informational purposes only.
- There is no requirement that Exxon or Stripper Well Settlement funds be expended during a particular period of time. A Grantee is permitted to reallocate these funds from one eligible program to another provided that their Plan has been amended and is reviewed by DOE. If PVE funds designated for expenditure in the prior program year are not expended, the amount of funding that may be used for administrative expenses in the following program year must be adjusted accordingly.
- No more than 5 percent of the combined total of Exxon and Stripper Well Settlement funds budgeted in a Grantee Plan may be used for T&TA. Up to an additional 5 percent of these funds may be used for evaluation of a Grantee's WAP and for innovative efforts to leverage program funds, provided these activities are approved by the DOE PO.

See Section III.1 SF424-A Budget Preparation in the PY 2021 Application Instructions.

3.5 PROGRAM INCOME

Program income is defined in [2 CFR 200.80](#) and subject to the specific requirements provided in [2 CFR 200.307](#). DOE considers program income as funds earned by Grantees and/or Subgrantees from non-Federal sources when performing DOE WAP activities. The income from these activities must be used for additional weatherization activities in accordance with DOE rules. It must be treated as an addition to program funds and is subject to the same rules as appropriated funds. Property owner (i.e. landlord). Landlord contributions and leveraged resources (i.e., or Grantee funds) are NOT considered to be “program income” for the purposes of the WAP. Grantees requiring further clarification on program income, as it applies to their specific program, should contact their DOE PO.

See Section III.1 SF424-A Budget Preparation in the PY 2021 Application Instructions.

3.6 ALLOWABLE COSTS

As a reminder, Grantees should be outlining information in their allocated funds among the Budget Categories consistently, in alignment with DOE guidance and application instructions, and particularly as concerns with regard to the costs allowable for weatherizing each dwelling. In addition, Grantees should consider their ability to use their T&TA funds in combination with those of other states, where possible, to enable economies of scale on those activities that may be of similar value/approach among a group of states.

- 3.6.1 ACPU:** Field audits of Subgrantee fiscal operations identified inconsistencies in the way ACPU calculations are performed. It is imperative that the Grantee define what costs are allowable in each Budget Category and how the Subgrantee should account for these costs when determining the ACPU. Consistent application of allowable cost by category ensures greater reliability in the ACPU calculation.

DOE has included detail for this calculation and cost categories within the Application Package Instructions (Section III.2 Budget Categories – Section B) and is requesting that Grantees closely monitor the way Subgrantees define costs within a Budget Category and ensure consistency in defining allowable costs within Budget Categories. This is necessary to better understand how Subgrantees are managing their WAP grants and controlling expenditures.

- 3.6.2 T&TA:** Congress limits the amount of T&TA funds available to DOE which limits the number of projects that can be funded. Grantees are encouraged to collaborate with their peers to pool their T&TA funds to perform projects or activities which were historically funded through the DOE T&TA set-aside. Please direct and any additional questions can be directed to your DOE PO.

See Section III.2 Budget Categories – Section B in the PY 2021 Application Instructions.

4.0 APPLICATIONS FOR WAP ANNUAL FORMULA GRANTS

To ensure public involvement and obtain timely suggestions in developing their WAP State Plan Application, DOE urges Grantees to hold a minimum of **three meetings**: a meeting with their Network at the beginning of the planning process, a meeting with their Policy Advisory Council (PAC), and arequired, formal public hearing on the completed final draft Grantee Plan Application. In addition, DOE urges Grantees to regularly consult with their Subgrantees throughout each Program Year to improve the Weatherization Program and the Annual Grantee Plan.

See Section IV.1 Annual File in the PY 2021 Application Instructions.

4.1 MULTI-YEAR GRANT AWARDS

All Grantees need to make an effort to effectively utilize the entire DOE allocation in the year it is awarded. DOE will review recent reporting results to assess proposed carryover funding from previous years when applications are submitted. Accordingly, Grantees are encouraged to include a provision within their respective annual plans to review and reallocate funds at least every quarter to those high performing Subgrantees that demonstrate a commitment to meeting/exceeding quarterly production and spending targets, as well as, include this information in the public hearing.

The existing grant awards were scheduled for completion at the end of PY 2020. These awards will be extended for one additional year. This results in a five-year grant cycle with a project period end date scheduled in 2022. At that time, DOE will issue new awards contingent on the availability of funding.

It is expected that Grantees will estimate carryover from the prior year and include it in the current Plan submission. Grantees must minimize carryover to the fullest extent possible and provide sufficient justification, or risk losing the option to select the budget category where carryover funds are reallocated.

See Section III. Budget in the PY 2021 Application Instructions.

4.2 INTERGOVERNMENTAL REVIEW

In the development, submission, and review of grant applications, the provisions of Executive Order 12372 (Intergovernmental Review of Federal Programs) and the DOE Implementing Order ([10 CFR 1005](https://www.e-efiling.gov/10CFR1005)) remain unchanged.

See Section I.1 Introduction in the PY 2021 Application Instructions.

4.3 APPLICATION PACKAGE

The application process is fully electronic and applications must be submitted on the PAGE website at <https://www.page.energy.gov/default.aspx>. The PAGE system contains all Federal forms required for the application. Please follow instructions in the ALRD, WPNs, and the Application Instructions attached to this Program Notice (Attachment 2).

4.4 APPLICATION REFINEMENTS THIS YEAR

DOE updated the Application Instructions for PY 2021. As a reminder, last year Section IV. Climatic Conditions was added back into the Master File in PAGE. All application sections in PAGE must be completed in their entirety.

4.5 REPORTING REQUIREMENTS

The reporting requirements are set forth in the Federal Assistance Reporting Checklist, DOE F 4600.2, attached to the award agreement.

In September 2018, Congress per H. Rept. 115-929 directed DOE to begin tracking the occurrence of window replacements, which supports the reduction of lead-based paint hazards. This information collection will allow DOE to collect information to track the occurrence of window replacements, which supports the reduction of lead-based paint hazards. In most all cases windows are replaced as an energy conservation measure, so reporting numbers should in most all circumstances be zero. If you have questions regarding this metric, please contact your PO. This requirement will start in PY2021 and Grantees will submit this information on a quarterly basis through PAGE.

5.0 WEATHERIZATION PROGRAM NOTICES (WPN):

All DOE-developed documents, [WPNs and other relevant policy documents](#), are available through the DOE website.

The following list of WPNs addresses the specific policy areas that must be adhered to by all Grantees and Subgrantees operating weatherization programs using DOE funds.

This list reflects active WPNs applicable to formula grants in effect at the time of WPN 21-1 issuance. Grantees are reminded additional WPNs may be issued that are “in effect as of the date stated in the WPN.” DOE will continue to send notices electronically and post them to DOE’s website to ensure all Grantees have access. The table is organized in date order with the major topic headings at the top to allow for easy reference.

In addition, the WAP memorandum process established a uniform communication mechanism to notify Grantees of upcoming events, clarify elements of existing WPNs, and also provide opportunity for comment by the Network on administrative direction and impact of future policies. Active Memoranda are listed following the WPNs.

WPN	Title	Funding	Grant Application	Procurement	Monitoring	Clients	Multifamily	Material Procurement	Rental Requirements	Energy Audit Criteria	Health and Safety	Renewable Energy Systems	Disaster Relief	Eligibility Levels	Defining Income	Priority Service	Fuel Switching	Incidental Repairs	Reweathering	Vehicle Purchases	Policy Advisory Council	Electric Baseload	Administrative Costs	Historic Preservation	Eligible Dwelling Units
19-4	Revised Energy Audit Approval Procedures, Related Audit, and Material Approvals			x						x		x					x	x				x			
19-5	Incidental Repair Measure Guidance										x								x						
19-6	DOE Guidance for Completing Recipients' Annual Historic Preservation Report																							x	
20-1	Grant Application		x		x											x			x		x		x		
20-2	WPN 20-2: Program Year 2020 Grantee Allocations	x	x																						
20-3	WPN 20-3: 2020 Poverty Income Guidelines and Definition of Income													x	x	x									
20-4	WPN 20-4: Weatherization Assistance Program Monitoring Procedures					x																			
21-1	Grant Application		x		x											x			x		x		x		

Weatherization Program Notices can be accessed via the following link
<https://www.energy.gov/eere/wap/weatherization-program-notices-and-memorandums>.

CONCLUSION: DOE is doing its best to gather feedback from Grantees and Subgrantees to make the Program more efficient and effective. Key to this is interaction between all levels of the Program: DOE, Grantees, and Subgrantees. Everyone involved in this Program makes a commitment to providing high quality service to the most vulnerable families in our communities. "Weatherization Works" is more than a slogan; it is the result of the collective effort of a national network committed to service. Thank you for being a part of this effort.

AnnaMaria Garcia
Director
Weatherization and Intergovernmental Programs Office
Energy Efficiency and Renewable Energy

Attachment 1: Administrative and Legal Requirements Document (ALRD)

Attachment 2: Application Instructions (December 2020)
