A Vital and Important Mission

EM Mission: To complete the safe cleanup of the environmental legacy brought about from decades of nuclear weapons development and government-sponsored nuclear energy research.

EM's first priority is to ensure the safety and health of the public and EM's workforce while continuing to protect the environment.

Over **700,000 tons** of depleted uranium produced as a by-product of enriching uranium to weapons grade

Over **5,000 facilities** contaminated as a result of activities such as reactor operations and uranium enrichment (which produce fissile material for nuclear weapons)

Millions of cubic meters of soil and **billions of gallons of groundwater** contaminated by environmental releases of radioactive and hazardous materials

Over **1,000 metric tons** of weapons-grade uranium

Over **100 metric tons** of plutonium

Tens of thousands of nuclear warheads

Over **90 million gallons** of liquid waste produced as a by-product of the separation of plutonium and uranium from used nuclear fuel rods

Six Primary Mission Areas
