GRID RESILIENCE STATE AND TRIBAL FORMULA GRANTS: NEVADA

As states, tribes, and territories face threats from severe weather, the **Grid Resilience State and Tribal Formula Grants** will distribute **\$2.3 billion** over five years to strengthen and modernize America's power grid against wildfires, extreme weather, and other natural disasters that are exacerbated by the climate crisis. The first round of funding applies to fiscal years 2022 and 2023.

In support of President Biden's Investing in America agenda, in June 2023, the U.S. Department of Energy awarded **\$10,543,609** to the State of **Nevada** via the Grid Resilience State and Tribal Formula Grants program, which is supported by the Bipartisan Infrastructure Law.

State awards are based on a formula that includes factors such as population size, land area, probability and severity of disruptive events, and a locality's historical expenditures on mitigation efforts. Under the administration of the **Nevada Office of Energy**, Nevada will hold a competitive selection process to identify projects for which the roughly \$10.5 million in federal funding will be deployed.

GOALS INCLUDE

- › Ensuring an equitable energy future that leaves no one behind, including underserved and disadvantaged communities and vulnerable populations, by equitably sharing the burdens and benefits of energy production and consumption, while reducing the likelihood and consequences of disruptive events.
- › Reducing the frequency and duration of outages by incorporating objectives for avoiding, preparing for, and recovering from energy disruptions.
- › Using hazard mitigation and hardening to adapt to climate-related hazards.
- › Creation of good-paying jobs with the free and fair choice to join a union and/or a workforce development option.
