

TerraPower TFF EA -- Kemmerer Gazette Legal Notice

The U. S. Department of Energy (DOE) is requesting public input on the draft Environmental Assessment for TerraPower, LLC's (TerraPower) Test and Fill Facility (TFF) Project, located in Lincoln County, Wyoming. DOE is proposing to provide federal funding to TerraPower to construct and operate this facility under the Advanced Reactor Demonstration Program. The Test and Fill Facility is designed as testing site for the TerraPower Natrium reactor's non-nuclear operating systems, particularly those relating to the design's sodium coolant. This facility would receive, sample, process, store, and then deliver liquid sodium to areas where component tests are performed, including the planned Kemmerer Unit 1 reactor. The research conducted at this facility would serve the sodium reactor community around the world, as interest in this technology continues to grow globally.

DOE is the lead federal agency in the preparation of the Environmental Assessment. Pursuant to the requirements of the National Environmental Policy Act (42 U.S.C. 4321 et seq.; NEPA), Council on Environmental Quality regulations (40 CFR Parts 1500 to 1508), and DOE NEPA implementing procedures (10 CFR Part 1021), DOE prepared a draft Environmental Assessment to evaluate the potential direct, indirect, and cumulative impacts of the proposed project. DOE has identified the following resource areas and issues for analysis: biological resources; socioeconomics; environmental justice; cultural and historic resources; geology and soils; hydrology; infrastructure (emergency services, transportation, and traffic); and accidents and hazards.

Public involvement is a key component of the NEPA process. DOE welcomes your input on the **DOE/EA-2217: TerraPower, LLC's Test and Fill Facility Project, Lincoln County, WY**. In addition to this notice, you can review the draft EA at: <https://energy.gov/nepa/doeca-2217-terrapower-llcs-test-and-fill-facility-project-lincoln-county-wy-0>

DOE invites you to attend an informational public meeting at the South Lincoln Training & Events Center in Kemmerer, WY on the evening of November 16, 2023, from 5 PM – 8 PM MST. The meeting will be held in an open house format with project posters and subject matter experts available to provide information and help answer questions.

To ensure DOE receives your written comments in time for consideration in preparation of the draft EA, please provide them on or before **December 1, 2023**. DOE welcomes your comments by physical or electronic mail.
