I am writing to urge DOE to deny a license for exportation of liquified methane gas from a terminal on the Louisiana Gulf Coast: Calcasieu Pass 2 (CP2). This project is not in the public interest. I believe the public is interested in addressing climate change. To do this, we must as good citizens should, hold our government accountable to prioritize actions that reduce greenhouse gas. I urge the DOE to take the public interest and the planet seriously: deny the application for a license to export.

Thank you for your consideration,

Pam Elders
