Subject: RE: Revised Sampling Locations

Hugh –

Thank you for the updated figures. All the sample points are as agreed to during our conversation.

Based on the current forecast (and thunderstorm), I will not be heading over to the site today. Based the last lightning strike being only 2 miles from my location, I'm guessing there may not be much sampling activity today.

Steve, Bill – I'll check back in with you mid-morning tomorrow and let you know if I can get there tomorrow afternoon.

Thanks,
Lynn

Lynn,

Thank you for taking the time to discuss your comments on the SPRU ICM work plan. Attached are two figures showing the two added samples and one relocated sample point we agreed to.

As discussed, I will be on vacation next week and Steve Feinberg ((518) 395-4580) will be here regarding any on-site arrangements and coordination with URS. We've penciled in Tuesday afternoon, around 1:30, weather dependent.

Regards, Hugh
