

WYOMING FACT SHEET

President Biden's Investing in America Agenda: Growth in Jobs, Boon in Investments, and Boost in Savings

Growing Good-Paying Jobs

We are starting to see a burst of domestic job growth, manufacturing expansion, and savings for businesses thanks to President Biden's Investing in America Agenda.

The energy sector already in 2022 employed **46,000 Wyoming workers.**

The clean energy workforce especially will be turbo-charged with an estimated **\$22.6 billion of investment in large-scale clean power generation** and storage in Wyoming between now and 2030.

Wyoming is home to **73,300 small businesses**, representing 98.9% of businesses and

65% of workers in the state—and they will save money thanks to the Investing in America Agenda.

Commercial building owners can receive a tax credit up to \$5 per square foot to support energy

efficiency improvements that deliver lower utility bills. And small businesses also can receive tax credits covering up to 30% of the costs of installing low-cost solar power and of purchasing clean trucks and vans for commercial fleets.

Bringing Manufacturing Back to America

Thanks to President Biden's Investing in America Agenda, there's a clean energy boon happening from coast to coast – offering communities good-paying jobs, lower costs, and an expanded and reliable energy grid.

As of October 2023, there's already **3.2 GW of solar, wind, and storage**

capacity in Wyoming – and there is 3.8 GW of planned additional clean energy capacity in the works, enough to power the equivalent of 407,400 additional homes. On top of this, the **costs of solar and wind power are projected to drop by 24% and 33%**, respectively, over the next 30 years in Wyoming.

Since January 2021, the private sector has announced more than **\$190 billion in clean energy manufacturing**

investments in new or expanded facilities in more than 40 U.S. states, demonstrating a renaissance in domestic manufacturing and jobs. For more information, see www.energy.gov/invest.

Bidenomics = Savings for Consumers

Thanks to savings on utility and transportation costs, Americans will have more money in their pockets each month.

Since 2015, **1,050 homes in Wyoming** have benefitted

from reduced energy costs and improved health and safety thanks to the \$15 million in funding from the Energy Department's Weatherization Assistance Program and State Energy Program – **leading to 260 jobs.**

Low-income households in **Wyoming could save on average 34% on home energy bills** when they upgrade

their energy efficiency. Wyoming Households will get support for these types of upgrades to the tune of **\$69 million through DOE's Home Energy Rebate programs.**

The Inflation Reduction Act will help more families never pay at the pump again, with tax credits for eligible buyers and eligible vehicles of up to

\$7,500 for new electric vehicles and up to \$4,000 for used electric vehicles – **saving families an average of \$950 a year** on fuel and maintenance costs.■
