

**NOTE: Discussing the location and date of a TSCM service is often classified.**

Contact the tecsec team over a **secure medium** (ViPer, NSN, HAL...etc) to request classified tecsec services (TSCM Survey, In-Conference Monitoring, Special Services...etc). If you are unsure if your request is classified, contact your HSO or the tecsec office and ask for a secure contact number or email address regarding your inquiry. Do not discuss details of your request over an unclassified medium if you are unsure of the classification. This may result in a security infraction and your service request being rescheduled at a much later date.
