**U.S. Department of Energy**

**Re: URGENT: Opposition to Proposed CP2 LNG facility in Cameron Parish, Louisiana**

**To: President Biden and the U.S. Department of Energy**

Dear President Biden and Secretary Granholm:

In the past week alone, more than 3,403 Presente.org members have spoken out, **urging you to halt Venture Global's application to the Department of Energy (DOE) to export Liquefied "Natural" Gas (LNG) from its proposed CP2 LNG facility in Cameron Parish, Louisiana.**

As you know, CP2 LNG would be the largest volume of LNG ever approved for export. At full volume, the lifecycle emissions of fracking, liquefying, shipping, regasifying, and burning that much gas will add up to 190 million tonnes of CO<sub>2</sub>e each year — **20 times the annual emissions from burning the oil produced at the Willow drilling project in Alaska and equivalent to the emissions from more than 42 million gas-powered cars or 51 coal-fired power plants.**

**Below you will find the text of the petition signed by Presente.org members:**

*Dear President Biden and Secretary Granholm:*

*I am writing with an urgent request that you do not grant approval for Venture Global's gas export project, CP2 LNG, in Cameron Parish, Louisiana. This proposed liquefied "natural" gas terminal would be the largest volume of LNG ever approved for export.*

*The potential consequences of CP2 are devastating. At full volume, the unleashed emissions of fracking, liquefying, shipping, regasifying, and burning that much gas will add up to 190 million tonnes of CO<sub>2</sub>e each year – 20 times the annual emissions from burning the oil produced at the Willow drilling project in Alaska, and equivalent to the emissions from more than 42 million gas-powered cars or 51 coal-fired power plants.*

*CP2 LNG's sister facility, Calcasieu Pass LNG, which will be located next door, was found to have more than 2,000 air permit deviations, violating its permit on 286 out of the first 342 days it was in operation. CP2's pollution, traffic, sprawl, and visual impact would hurt nine communities, including Cameron, Creole, Grand Lake, the Lake Charles suburbs, Vinton, Starks, and Deweyville, Texas, and would destroy more than 1,700 irreplaceable wetlands, marshes, and chenieres along the Louisiana coast. Shrimpers and fishermen have helped lead the opposition to Calcasieu Pass LNG and CP2, citing the threats to their way of life.*

*I also urge the DOE to reassess how it determines whether new licenses for LNG exports are in the public interest. The current framework has led to the approval of LNG facilities to export gas overseas, burdening communities with the risks and impacts of extraction, transport, and export facilities. Consequently, the climate is impacted by the burning of this dirty fracked gas, and Americans and their families are further strained by rising prices of energy and other goods as a result of sending energy overseas for higher prices. In particular, DOE's current approach to making such determinations does not fully or accurately consider how LNG exports impact the climate, environmental justice, national security, or domestic energy prices.*

*I implore you to deny Venture Global's application to the Department of Energy to export LNG from their proposed CP2 facility due to the numerous negative impacts it would have on Gulf communities, the economy, and the climate.*

*Thank you for your consideration.*

*The Undersigned*

The potential consequences of CP2 are devastating. **We urge you to deny Venture Global's application and instead prioritize the health and safety of communities, while further expanding clean renewable energy.**

We join allied organizations including Fossil Free Media, Action for the Climate Emergency (ACE), Chesapeake Climate Action Network (CCAN), Earthworks, League of Conservation Voters, Hip Hop Caucus, Public Citizen, Earthjustice, Greenpeace USA, Sierra Club, Zero Hour, Beyond Extreme Energy, and Lead Locally in **urging the DOE to do right by communities who are already facing adverse public health outcomes.**

Black, Latine, indigenous, migrant, and families of color are experiencing the worst effects of climate change and **if CP2 is approved, greenhouse gas emissions will skyrocket, worsening air pollution, and threatening the health and safety of residents.**

I ask you to treat this with all due seriousness and urgency and to understand the public's commitment and opposition to CP2. **I welcome a response from your office and can be reached via email at [nancy@presente.org](mailto:nancy@presente.org) or by telephone at 786-201-8958.**

Thank you for your consideration,

Nancy Treviño  
Director of Power, Presente.org
