**Department of Energy  
Administrative Records Schedule 3:  
Procurement, Supply and Grant Records  
August 2024  
Revision 8**

Procurement and supply records document the acquisition of goods and non-personal services, controlling the volume of stock on hand, reporting procurement needs, and related supply matters which are part of daily procurement operations. The basic procurement files reflect a considerable range of procedure, from simple, small purchases to complicated prime contractor and subcontractor operations.

Any records created prior to 1895 must first be offered to the National Archives and Records Administration (NARA) for appraisal before applying the disposal instructions. Frequently copies of procurement papers become integral parts of other files, such as project files of various types or general subject files pertaining to program operations; such copies are not covered by this schedule because they cannot be considered and evaluated separately from the files of which they are a part.

The General Accounting Office (GAO) no longer requires the Department to maintain a separate file of contracts for site audit. The contract files maintained in the contracting officer's office are accessible to GAO auditors and have generally been used by them in the past.

When a claim is filed by or against the Department, records relating to the claim should be retained without regard to the otherwise applicable records retention schedules which would have authorized destruction of the records prior to the time when the claim is finally resolved unless the Department has received written approval from the GAO [44 U.S.C. Section 3309 and 62 Comp. Gen. 42 (1982)]. A claim is finally resolved: (1) when it is disallowed and the time for appealing the denial or instituting suit on the claim has expired; or (2) when it is allowed and paid or the amount offered in compromise is accepted and paid; or (3) when the amount found due and owing proves uncollectible because time limits for collecting the indebtedness through legal proceedings or by way of setoff have expired.

Records documenting procurement and supply are largely standardized by various regulations of the Comptroller General and the Administrator of General Services. The key procurement file is the transaction case file containing the formal contract or informal purchase order or lease instruments and all related papers. The documents flowing into the transaction file differ in detail, but they include, in addition to the purchase document, specifications, bids, schedules of delivery, the initiating requisition, invoices, and correspondence. Other copies of these documents, made for expediting and other administrative purposes, are scattered throughout the inspection, shipping, expediting, and other units of procurement organizations.

Other files related to the procurement and supply function include reports used for supply management purposes. They also include local requisition and stock inventory files and other minor supply papers. Of a specialized character in the procurement field are the title papers documenting the acquisition of real property (by purchase, condemnation, donation, exchange, or otherwise). These papers are required by the Department as long as the property remains in DOE's hands or if it has been sold or released -- conditionally or with recapture clauses. (The actual owner of the property is the Federal government. For the sake of simplicity, the Department is substituted for the Federal government.) When properties are disposed of by quitclaim deeds, this fact should be confirmed prior to the disposal of title papers, since the title evidence might be needed by the Department to defend the title in the event the properties were disposed of by deeds containing general or special warranties.

It should also be ascertained that the title evidence relates only to the properties which were sold. In many instances, lands acquired are disposed of in different size parcels, and if the Department retains the title to any portion the title evidence should be retained.

This schedule also includes records relating to grant programs. Grant programs may involve projects that are contracted for between the Department and an outside party.

All records described in this schedule are authorized for disposal in both hard copy and electronic formats. Retirement of non-current records to inactive storage is authorized.

These records pertain to the sales by agencies of real and personal property surplus to the needs of the Government.

In no event may disposal be made of records pertaining to accounts, claims, or demands involving the Government of the United States which have not been settled or adjusted by the General Accounting Office without written approval of the Comptroller General, as required by 44 U.S.C. 3309.

Three forms are prescribed for use by an agency selling surplus personal property under GSA regulations:

- a. Standard Form 114 (SF-114), Sale of Government Property, Invitation, Bid, and Acceptance. Related papers that are maintained by the agencies, usually in case fashion, consist of correspondence, bids, other notices of sale, invoices, and sales slips.
- b. Standard Form 120 (SF-120), Report of Excess Personal Property, and Standard Form 121 (SF-121), Quarterly Report of Utilization and Disposal of Excess and Surplus Personal Property. Agencies use SF-120 to report excess personal property to the regional GSA offices, which initiate screening action. The quarterly reports are submitted to the Office of Property Management, Office of Federal Supply and Services, GSA, which consolidates the data.

**Department of Energy  
Administrative Records Schedule 5:  
Budget Preparation, Presentation, and Apportionment Records  
August 2024  
Revision 6**

Budget and apportionment records include the various files accumulated in the course of formulating the budget for submission to the Office of Management and Budget (OMB) and to the Congress; in defending its requests for funds before both bodies; and after enactment of an appropriation bill, in ensuring that the funds are used in such a way as to suffice for the appropriate period of time. OMB makes the funds available. The Department indicates and justifies regularly with OMB the proposed rate of expenditure. After the funds have been made available, the controls over the funds are in expenditure accounting records (ADM 7), and detailed information relative to expenditures is contained in the accountable officers' accounts (ADM 6).

Budget records are normally created at all organizational levels. They include proposals from operating levels as well as the Department-wide coordinating work done by budget offices. The records consist of detailed work papers and budgetary statements developed by operating units, the more significant budget statements and related papers representing consolidated submissions prepared to forward to the budget officers, and the records at the highest level pertaining to the budget submission for the Department.

Although OMB prescribes format and procedures for all Federal agencies, there are various internal reports and papers that support the budget and are used in its preparation. The budget submission, a record copy of which is usually designated by the Department, is a duplicate of the set of papers submitted to OMB. These include summary statements of appropriations and expenditures, statements of contract authorizations, and statements of receipts as well as narrative summary statements which highlight the principal features of the Departmental request and the immediately related supporting documents. The narrative presents the policies and the programs of the Department that the budget request is to support. In addition to the summaries, the submission includes schedules of obligations and statements pertaining to each type of appropriation and fund under which the Department operates. Finally, OMB requires additional supporting data pertaining to objects of expenditure, particular Departmental programs, and figures based on the cost of various types of service operations, such as personnel and payroll activities.

A new item has been added to this schedule to authorize the destruction of electronic mail and word processing records maintained by agencies in addition to the copy in the recordkeeping system. This item covers electronic copies of electronic mail and word processing records created and used solely to produce the recordkeeping copy, and electronic copies of electronic mail and word processing records that are needed in addition to the recordkeeping copy for dissemination, revision, or updating.

**Department of Energy  
Administrative Records Schedule 6:  
Accountable Officer's Accounts Records  
August 2022  
Revision 5**

This schedule covers accountable officers' returns and related records, including records under the cognizance of the General Accountability Office (GAO).

Accountable officers' accounts include record copies of all records concerned with the accounting for, availability, and status of public funds. There are several types of "accountable officers," such as: (a) the collecting officer, who receives monies owed to the Federal Government and ensures that it is credited to the proper account; (b) the disbursing officer who is responsible for providing documentation to GAO, since he/she accomplishes the actual payment of public monies to proper Federal creditors; and (c) the certifying officer, whose signature on a summary attests to the authenticity of vouchers listed on the schedule.

Disbursements are made by the Chief Disbursing Officer of the Treasury, who heads the Division of Disbursement of the Bureau of Government Financial Operations within the Treasury Department. Disbursements are made on the basis of certified schedules, with the detailed vouchers held in Departmental space for site audit. This procedure was extended and confirmed by GAO General Regulations No. 115, issued January 29, 1952, which promulgated a standard form voucher and schedule of payments (Standard Form 1166 and 1167) for use by the Department.

On-site audit by GAO covers vouchers, contracts, schedules, statements of transactions and accountability and other related supporting documents. If the records are no longer required for administrative purposes, all audited and any unaudited records more than one full fiscal year old may be transferred to Federal records centers. The transfer of unaudited accountable officers' accounts less than one year old requires obtaining permission from the Director, Records Management, GAO. The creation of memorandum copies as described in item 1b of this schedule is unnecessary because the records are retained for site audit in the Department.

Records relating to the availability, collection, and custody of funds include (1) the appropriation warrants, (2) other documents which deposit funds into the Treasury, and (3) documents which provide accountable officers with status reports on funds in their custody, such as the proofs of depository account and statements of funds to their credit. Departmental copies of these deposit and status documents are related to the accounts of these officers and are included in this schedule. All records described in this schedule are authorized for disposal in both hard copy and electronic formats. Retirement of noncurrent records to inactive storage is authorized.

**1. Accountable Officers' Files.** [See note after item 1b.] (GRS 6, item 1)

- a. Original or ribbon copy of accountable officers' accounts maintained in the Department for site audit by GAO auditors, consisting of statements of transactions, statements of accountability, collection schedules, collection vouchers, disbursement schedules, disbursement vouchers, and all other schedules and vouchers or documents used as schedules or vouchers, exclusive of commercial passenger transportation and freight records and payroll records, EXCLUDING accounts and supporting documents pertaining to American Indians. Under the Department's integrated accounting system certain required documents supporting vouchers and/or schedules are included in the site audit records. These records document only the basic financial transaction, money received and money paid out or deposited in the course of operating the Department. All copies except the certified payment or collection copy, usually the original or ribbon copy, and all additional or supporting documentation not involved in an integrated system are covered by succeeding items in this schedule.

## GENERAL RECORDS SCHEDULE 7

### Expenditure Accounting Records

Expenditure accounting records are the ledgers and related documents maintained by all Federal agencies to show in summary fashion how their funds, appropriated and nonappropriated, are spent after allotment by the Office of Management and Budget (OMB), and the sources and nature of any receipts. The key records are the general ledger accounts, which constitute, as a unit, the heart of the agency accounting system. These ledgers summarize the financial status and financial transactions of the agency, showing the current status of funds available for expenditure, the amounts due and collected for the account of the Government, accumulated expenditures and liabilities, and the values of stock, equipment, and other property in agency custody. They are controls that serve not only as central fiscal records, but also as a primary source of data for top management concerned with agency solvency, expenditures, and program costs.

The general ledgers are subdivided into arbitrarily created account titles, which are based on programs, projects, costs, and funds. Supporting them are a group of subsidiary ledgers and documents further detailing the information in the general ledgers or serving as posting media to the ledgers themselves. To the extent that they reflect appropriation expenditures, the general ledgers are supported by allotment ledgers, which at all times show the current unobligated balance of funds allotted for specific agency purposes and thereby provide a safeguard against overexpenditure by operating officials. The allotment ledgers are general controls over expenditures, and they, in turn, summarize and are supported by more detailed controls that normally take the form of project or job orders that authorize exact and specific expenditures.

The sources of data that are posted to the ledger files are somewhat diverse, but they fall into two general groups:

- a. Copies of various obligation or expenditure documents, such as vouchers and schedules, that flow through the ledger unit for posting.
- b. Journal vouchers and similar internal control documents created to authorize and convey entries to the general ledger.

As the centralized fiscal record, the general ledgers ultimately summarize stores, plant, and cost accounting data, which are treated in a separate schedule, but these are only several aspects of the total ledger accounts. Consequently, the ledgers are the source of the data included in the basic apportionment reports to the OMB and the Department of Treasury, and overall reports of agency fiscal condition which may be required by the General Accounting Office (GAO) (Schedules 6 and 8). The adequacy for audit purposes of the general ledger accounts is normally considered by GAO auditors to be indicative of the agency's entire accounting system and the reliability of its financial data.

This schedule does not apply to such records maintained on a Government-wide basis by the Department of Treasury and the OMB, or to those formerly maintained by the GAO. Any records created prior to January 1, 1921, must be offered to the National Archives and Records Administration (NARA) before applying these disposition instructions.

When a claim is filed by or against the Government, records relating to the claim should be retained without regard to the otherwise applicable records retention schedules that would have authorized destruction of the records prior to the time when the claim is finally resolved, unless the agency has received written approval from the GAO (44 U.S.C. Section 3309 and 62 Comp. Gen. 42 (1982)). A claim is finally resolved: (1) when it is disallowed and the time for appealing the denial or instituting suit on the claim has expired; or (2) when it is allowed and paid or the amount offered in compromise is accepted and paid; or (3) when the amount found due and owing proves uncollectible because time limits for collecting the indebtedness through legal proceedings or by way of setoff have expired.

## GENERAL RECORDS SCHEDULE 8

### Stores, Plant, and Cost Accounting Records

Specialized stores, plant, and cost accounting records are maintained by most agencies, particularly those with extensive plant and stock inventories. These records, which reflect the net monetary worth of an agency and its assets, are periodically reconciled with the supply data found in stock inventory records, but they do not include procurement papers. Any records created prior to January 1, 1921, must be offered to the National Archives and Records Administration (NARA) before applying these disposition instructions.

a. Stores Accounting. These records are maintained to provide personal accountability for the receipt and custody of materials and to document the monetary worth of such materials. Completed copies of material movement documents show custody, and stores accounting data are normally reviewed and consolidated by means of records and returns submitted to agency headquarters. There the information is used for procurement planning, budget, and other management purposes. These records do not include records reflecting the physical movements of material to and from storage points, although they may be involved in posting. Summary data on plant value are also available in pertinent ledger accounts.

b. Plant Accounting. These records document principal characteristics of each item of physical plant and equipment, including real property. They constitute primarily a type of inventory control, but in addition are a principal source of data on the capital investment in physical plant (as distinguished from maintenance or operating costs) and other items not normally represented in a store or stock inventory system. Summary data on plant value are also maintained.

c. Cost Accounting. These records are designed to show accumulated data on the costs of agency operation, the direct and indirect costs of production, administration, and performance of program functions of the agency. The data, which are normally accumulated by means of cost reports and statistics accumulated by operating personnel, are ultimately integrated into the accounts concerned with operating and program costs. Material cost information is collected by posting requisitions for material or procurement documents to intermediate records, and labor cost information is obtained by charging time expended on individual jobs and projects assigned control numbers for cost control purposes. Cost data are used in evaluating economy of agency operation and in preparing budget estimates.

1. ~~Plant, Cost, and Stores General Correspondence Files.~~

## GENERAL RECORDS SCHEDULE 10

### Motor Vehicle and Aircraft Maintenance and Operation Records

These records pertain to the management, maintenance, and operation of motor vehicles and aircraft used by agencies.

Motor vehicles. Items 1 through 7 pertain to motor vehicles used by agencies. 41 CFR 101-34 prescribes policies and procedures. Standard Form (SF) 82, which is an annual motor vehicle report required by the Federal Acquisition Service, General Services Administration, is the only standardized record. Certain cost and inventory control forms have been developed, but they are not mandatory. This portion of the schedule covers agency records pertaining to the daily use and operation of the vehicles.

In general, records pertaining to motor vehicles reflect a threefold responsibility: (a) the accumulation of cost and operating data for internal accounting and management purposes and for reports submitted to the Federal Acquisition Service (SF 82, Agency Report of Motor Vehicle Data); (b) the maintenance of the vehicles themselves; and (c) protecting the interest of the Government in accident claims against it. The records themselves consist of chauffeur service logs and reports, vehicle repair and maintenance checkoff sheets, cost ledgers, and claims correspondence and forms.

Aircraft. Items 9 through 13 pertain to the management, maintenance, and operation of aircraft used by Federal agencies. 41 CFR 102-33 prescribes policies and procedures. These items include Federal records accumulated in connection with the use of leased aircraft as well as records provided by contractors for government agencies. Specifically excluded from this schedule are previously approved records series from the Federal Aviation Administration, Department of the Air Force, Department of the Navy, and the Department of the Army.

[**Note:** Some of these records may be necessary for the investigation and preparation of accident/incident reports. Agencies conducting their own internal accident/incident investigation congruent with those conducted by the Federal Aviation Administration and the National Transportation Safety Board must maintain those records in accordance with item 13 of this schedule. The records of the Federal Aviation Administration and the National Transportation Safety Board are excluded from item 13 of this schedule.]

## GENERAL RECORDS SCHEDULE 15

### Housing Records

The housing records covered by this schedule include files and data accumulated in the maintenance and management of Federally owned and operated housing facilities within the continental United States for civilian employees of the Federal Government, military personnel, and others eligible by law to reside in the projects. These facilities may consist of low cost quarters located either within or adjacent to the confines of Federal installations or in a critical defense or other area. This schedule includes housing records maintained by housing managers and housing or quarters offices, but does not cover the headquarters or staff office files of the supervising agency, or the files of the Department of Housing and Urban Development, the Department of Health and Human Services, or the Department of Veterans Affairs pertaining to program operations in planning and financing housing facilities.

Maintenance records reflect repair and general upkeep of the housing project or units. Management involves the assignment and rental of units, rent collection and other fiscal operations, and overall supervision. However, rental charges for military personnel are normally represented by checkages made against pay accounts.

Certain housing records are subject to the provisions of other General Records Schedules. Supply and fiscal files are covered by General Records Schedules 3 and 6. Schedules 1, 2, 8, and 10 may also be involved. Many records of agent cashiers serving as housing rental managers are similar to those of other Federal accountable officers and are disposable under General Records Schedule 6.

**Department of Energy  
Administrative Records Schedule 16:  
Administrative Management  
August 2024  
Revision 7**

This schedule covers those administrative management activities not covered by other Administrative Schedules. Included are disposable records created in the course of organizational planning, development, and simplification of procedures; records management activities; and administration of management improvement programs. See ADM 1 (items 12 and 13) for the disposition of case files on individuals involved in incentive award and similar types of management improvement programs.

The organizational locations and titles of administrative management units vary. They may be scattered at numerous levels or locations, or may be centralized. For the purposes of this schedule, the nomenclature standards followed are : the first Departmental level is the Secretarial level, the next level is the program office; followed by the subordinate components of division, branch, section, and unit.

This schedule covers the records of management activities that are carried on by a specialized person or unit with wide responsibilities. Similar or comparable records created at lower organizational levels in the Department and in field offices are not covered by this schedule.

A relatively large proportion of administrative management records are of continuing value. Files of potential archival value must be scheduled by submission of an SF 115 to NARA. Among these records are organizational charts and reorganization studies, functional statements, delegations of authority, and histories. Certain materials related to these records that are not archival, however, include working papers that do not have a direct bearing on the transaction, preliminary or intermediate drafts of documents and preliminary work sheets that do not represent significant basic steps in the preparation of final drafts, letters or memoranda of transmittal and acknowledgment, routine slips, and extra copies of documents.

All records described in this schedule are authorized for disposal in both hard copy and electronic formats. (N1-434-98-19, entire introduction.)

**Department of Energy  
Administrative Records Schedule 17 Cartographic,  
Aerial, Photographic, Architectural, Engineering,  
and Facility Management Records  
April 2024  
Revision 9**

DOE creates and receives cartographic, aerial photographic, architectural, and engineering design records in connection with official activities. Many of these records have continuing historical value after they are no longer of use to the Department. This records schedule covers only disposable records. Guidelines for identifying and scheduling the records of continuing value are provided in “Managing Cartographic and Architectural Records: An Instructional Guide.” This Guide must be used in conjunction with this schedule to ensure proper disposition of all Departmental cartographic, aerial photographic, architectural, and engineering design records.

This schedule covers cartographic records prepared during intermediate stages of publication, unannotated aerial photographic negatives and prints, and architectural and engineering records. Cartographic and aerial photographic records created before January 1, 1950, must be brought to the attention of the National Archives before applying the disposition instructions in this schedule.

This schedule also covers records pertaining to the management and operation of DOE industrial facilities. Such facilities include, but are not restricted to, Naval, test, and production reactors; production facilities; laboratories; and separation plants. The records consist of a wide variety of facility management records such as progress, production, and status reports; quality control data files; equipment history and control records; special material accountability files; and product output summaries. Records accumulated in the operation of the facility would include such documents as logbooks; instrument monitoring charts; industrial X-rays and radiographs; equipment inspection and servicing records; work permits; and many other documents that are generated in the operation, monitoring, production, and maintenance of the plant and its equipment.

These records are accumulated by contractor offices in the management, maintenance, and general upkeep of facilities, such as buildings, structures, plants, laboratories, utilities, and houses. This schedule includes records documenting maintenance and repair of fixture-type equipment such as boilers, heating and ventilating systems, and equipment requiring the use of design and construction drawings to make repairs.

Records include those generally maintained by property and plant management personnel fulfilling their responsibility for the management, control, accountability, maintenance, and operation of mobile or stationary equipment and personal property. This schedule covers personal property, equipment, machinery, machine tools, vehicles, office equipment, accessory and auxiliary items, and spare parts, exclusive of motor vehicles (GRS 10). Equipment records may complement or supplement procurement and supply records and accounting records.

Equipment records may be segregated into groups by equipment kind, type, purpose, use, location, valuation, or other assigned category, e.g., plant, office, supplier-owned, personal-use, tool receipts, loaned property borrowed property, and controller-use equipment. Records may be either as brief or

as detailed as is required to efficiently manage equipment consistent with its value, usage, or servicing requirements. In some instance, copies of a primary control record are used for additional secondary record or indexing purposes, e.g., a duplicate equipment inventory card is filed by name of accountable employee.

Guidelines are provided for the disposition of design and construction drawings and related records that have been created or received by DOE or DOE management and operating contractors in connection with official activities. Drawings refer to the graphic or engineering records that depict conceptual as well as precise measured information essential for the planning, design, and construction of facilities such as building, structures, plants, utilities, and other public works projects, as well as miscellaneous engineering and fabrication projects such as machinery and equipment. Related records include engineering studies, design calculations, project performance documentation, indexes and finding aids, specifications, and three dimensional models. Most design and construction records lose their usefulness after specific periods of time. Generally, drawings pertaining to the conceptual or preliminary design process lose their administrative usefulness after the final construction plans are accepted; these records should be considered inactive after the completion of the construction project. Precise measured drawings which are used and finalized during the construction process have a continuing value during the life of the facility especially for repair and maintenance needs. The finalized (“as-built”) construction drawings as well as repair and alteration drawings (or microform copies) should be considered active while the structure is used, maintained, or owned by the Federal government.

After the design and construction files are no longer useful to DOE or contractors, certain records have continuing historical value, particularly for the architectural historian, historic preservationist, and social historian. Since it is uneconomic and unnecessary to retain a complete set of drawings and related records for each construction project sponsored by the Federal government, it is necessary to make a selection of records for permanent preservation. This selection must take into consideration not only the types of records but also the nature of the individual construction projects. The general intent of any selection should be based on documenting the structures and projects that are architecturally, historically, and technologically significant. The selection of individual buildings or project should be made by personnel with appropriate historical training subject to the approval of the National Archives and Records Administration (NARA). This schedule relates primarily to records on the design and construction of buildings. However, the principles established here can also be applied to other static structures and miscellaneous engineering projects. Those record which are developed during the design process generally consist of:

**Initial Design Planning Records** . Drawing and sketches that are conceptual in nature, and architectural renderings, that show the basic design features of the project, including building perspective, elevations, floor plans, and other general features; order-of-magnitude cost estimates and performance schedules; and may include three-dimensional models prepared for illustration or presentation purposes.

**Advanced Planning Records** . These cover the pre-Title I design activity documentation, including construction project data sheets of other types of project proposals, conceptual design studies and reports, conceptual safety and environmental impact analyses, cost estimates, performance schedules, methods of project performance, and the design criteria for the project; and development of the project management plan.

**Preliminary (Title I) Design Records .** Title I design studies and reports summarizing the design results (including more refined definition of project requirements, cost estimates, performance schedules, method of project performance, safety and environmental impact analyses) and preparation of preliminary drawings and construction specifications.

**Final (Title II) Design Records .** Title II (final working) drawings, final construction specifications, performance schedules, methods of project performance, final safety and environmental impact analyses (reports); and final project management plan for construction.

**Other Engineering and Design Records.** Engineering studies and reports, design calculations, analyses, and other engineering data and information developed during project planning and design which document engineering and design decisions.

**Other Documents and Information.** Information, correspondence, and other records developed during the planning and design phases, essential to the performance of the processes but not essential for project record purposes following project completion.

**Final Working Drawings.** (Developed during Title II Design) Architectural and engineering drawings which consist of the master tracings which are acceptable reproducibles. These drawings provide information about various aspects of the construction of the building or facility including architectural (floor plans, interior and exterior elevations, and sections), ornamental, structural, mechanical, electrical, heating, ventilating, and air-conditioning details, as well as site and landscaping plans. These are important records because they provide not only detailed instructions for the erection of the building, but also present a comprehensive and detailed picture of its design. Those records which pertain to or are developed during the construction process usually consist of:

**Final Construction Specifications.** (Developed during Title II Design.) Detailed requirements for the project which identify materials and workmanship requirements, and explain the materials and equipment items depicted on the related working drawings.

**Project Management Plans for Construction.** (Developed during project planning and design.) Details of the project work breakdown structure; authorities and responsibilities of participants; performance diagram; and technical, cost, and schedule control systems for the project.

**“As Built” Drawings.** Annotated copies of final working drawings or additional drawings which show changes in the construction from the original design.

**Shop Drawings.** Detailed drawings prepared by construction contractors or subcontractors of particular parts of the building which they are to supply or by manufacturers of products to be fabricated or assembled in their shops. These drawings which include plans for architectural features and interior design such as tile and marble work, special cabinet work, elevators, or heating, ventilating, and air-conditioning systems, not only provide instructions for assembling the products on the job site, but may also be necessary of future operation and maintenance.

**Repair and Alteration Drawings.** Original drawings which depict repairs and alterations to the building as it was originally constructed.

**Standard Drawings.** Final drawings for standard details and other documents created in their preparation.

**Reports and Other Documentation.** Progress reports, construction completion reports, equipment specifications, operating and maintenance instructions (manuals), warranty data, final inspection and acceptance reports, and other information documenting the construction process.

**Other Documentation and Information.** Information, correspondence, and other records developed during the construction process, essential to performance of the process but not essential for project record purposes following project completion (such as interim process reports and other interim project activity information).

Criteria for the selection of architecturally, historically, and technologically significant files:

## **Architectural Significance.**

- a. Original Design. Primary consideration should be given to those buildings and facilities which are essentially original in design. Although it may incorporate standard features, a uniquely designed building or facility is one that was designed to meet specific needs or functions, and whose basic design is not repeated in another building.
- b. Standard or Repetitive Design. If building or facilities use a standard or repetitive design, it is not necessary to permanently retain a file for each building. However, a file should be retained for the building or facility most representative of the basic design, for each variant of standard designs, and for each repetitive but slightly different design.
- c. Architectural Style. Buildings which embody the distinguishing characteristics of either a period or a regional architectural style.
- d. Innovations. Buildings or facilities which include architectural or engineering innovations.

## **Historical Significance.**

- a. Administrative Functions and Activities. Buildings which are associated with the major functions of the Federal government (executive departments, agencies, and bureaus) and the major activities of the various Federal agencies.
- b. Noted Architect. Drawings by noted architects or engineers of both proposed and constructed buildings or facilities.
- c. Controversial. Buildings or facilities which were involved in controversy in regard to their design, construction, or utilization. Projects terminated because of cost overruns, safety hazards, and environmental hazards are included.

## **Technological Significance.**

This category includes files for such projects as first-of-a-kind energy research, development,

or demonstration projects of other unique building or facility projects. Since this is a broad category which covers many different types of technical facilities, specific details have not been attempted. However, permanent records relating to these objects can be chosen more selectively than records relating to buildings. In general, files which show how the project was designed, constructed, and altered, should be retained for a selection of the most unique structures and for a representative sample of repetitive and similar structures.

A selection which is to be based on engineering and historical significance should consider projects which include engineering innovations or prototypes, projects which have achieved national acclaim or controversy, or projects which represent the major product of an agency (such as NASA's spacecraft or TVA's hydroelectric projects). Representative samples should be based on the type of structure or project, cost, and regional variation. Structures and criteria used by the Historic American Engineering Record and similar comprehensive lists can serve as a guideline and minimum standard. (N1-434-98-20, NCI-434-78-2)

## GENERAL RECORDS SCHEDULE 24

### Information Technology Operations and Management Records

This schedule provides disposal authorization for certain files created and maintained in the operation and management of information technology (IT) and related services. As defined in the Information Technology Management Reform Act of 1996 (now the Clinger-Cohen Act), "information technology" includes computers, ancillary equipment, software, firmware and similar procedures, services (including support services), and related resources.

This GRS does not cover all records relating to information technology operations and management. Offices with responsibility for IT operations also maintain administrative records covered by other GRS and records not in the GRS that must be scheduled by the agency. In addition, this GRS does not apply to system data or information content, which must be scheduled separately by submitting an SF 115, Request for Records Disposition Authority, to NARA.

The disposition instructions apply to records regardless of physical form or characteristics. Records may be maintained on paper, in microform, or electronically. Dispositions apply, however, only to records that are maintained as described in each item or subitem. If documents are part of a larger case file or recordkeeping system that contains records not covered in this GRS, agencies must separately schedule that file or system by submitting an SF 115 to NARA. If records covered by more than one item in this schedule are maintained together in one file or recordkeeping system, agencies must retain the records for the longest retention period authorized for those items.

~~Note that GRS 20, Electronic Records, remains in effect. GRS 20 covers certain temporary files associated with data base management. This new schedule supplements GRS 20 by providing disposal authority for temporary records relating to overall IT management, as opposed to the operation and use of specific systems. NARA is reviewing alternatives to GRS 20 and will develop revised requirements as it explores new approaches to managing electronic records.~~ **GRS 20 superseded by GRS Transmittal 24.**

Records pertaining to legislative branch and judicial ethics programs, the Hatch Act, the Whistleblower Protection Act, procurement integrity and other areas often associated with, but not expressly under the authority of executive branch ethics programs, are not covered by this schedule.

Master lists of financial disclosure report filers, individuals requesting outside employment and activities approval, and other types of ethics-related master lists are not included in this schedule. Master lists that are used for purposes in addition to tracking and controlling ethics records should be disposed of in accordance with the disposition for the underlying records as listed in this schedule or as otherwise scheduled.

## GENERAL RECORDS SCHEDULE 26

### Temporary Commissions, Boards, Councils and Committees

This schedule covers records created and maintained by temporary commissions, boards, councils and committees (including continuing entities governed by renewable charters such as agency advisory committees). In the case of interagency bodies, this schedule covers the records maintained by the designated secretariat as well as records accumulated by other commission members.

This schedule does not apply to the records of Presidential commissions, boards, councils and committees covered by the Presidential Records Act.

For convenience, the term “commission” is used in this schedule to cover all types of temporary organizations.

The record series described in this schedule are created and maintained in different media and formats, therefore this schedule is written to authorize the disposition of the records in any media (media neutral). Agencies are required to refer to the most current version of the Code of Federal Regulations (CFR) and other relevant guidance to ensure that the media and format that is chosen by the agency meets NARA’s transfer requirements for permanent records. See 36 CFR Sections: 1228.266 – Audiovisual Records; 1228.268 – Cartographic and Architectural Records; 1228.270 – Electronic Records; 1230.026 – Microform Records

When records are created and maintained electronically, NARA prefers that the archival copy be transferred to the National Archives in an approved electronic format.

## GENERAL RECORDS SCHEDULE 27

### Records of the Chief Information Officer

This schedule provides disposal authorization for certain records created and maintained by Federal Chief Information Officers (CIO) and their program offices. This schedule applies to the records of CIOs at agency or departmental headquarters as well as those of deputy and subordinate CIOs at the bureau or field office level. This schedule does not apply to officials with Government-wide responsibilities for information resources management (IRM) and information technology (IT) governance.

In accordance with the Clinger-Cohen Act (originally the Information Technology Management Reform Act), CIOs of 24 major departments and agencies have IRM as their primary duty. They are responsible for advising and assisting the agency's executive with IT acquisition and management; developing and maintaining the agency's IT architecture; promoting the efficient design and operation of the agency's major information resources management processes; monitoring the performance of IT programs of the agency; and developing the knowledge and skill of IT staff. CIOs may also lead, coordinate, or participate in programs to support the mandates of the Paperwork Reduction Act, Government Paperwork Elimination Act, Federal Records Act, E-Government Act of 2002, Privacy Act, Government Performance and Results Act, and other Federal laws and regulations relating to IRM.

This schedule does not cover all records relating to the work of CIOs. CIOs are often responsible for programs and activities whose records are already covered by an approved GRS. Records not described in this or any other GRS must be scheduled by submission to NARA of an SF 115, Request for Records Disposition Authority. If records are part of a larger case file or recordkeeping system that contains records not covered in this schedule, agencies must separately schedule those records or systems by submitting an SF 115 to NARA. If records covered by more than one item in this schedule are maintained together in one file or recordkeeping system, agencies must retain the records for the longest retention period authorized for those items.

The disposition instructions apply to records regardless of physical form or characteristics. Records may be maintained in any format on any medium.

~~Note that GRS 20, Electronic Records, remains in effect. GRS 20 covers certain temporary files associated with database management.~~ This schedule supplements GRS 20 by providing disposal authority for records relating to the administration of a CIO's office, as opposed to the operation and use of specific systems. This schedule does not apply to the data or information content of IT systems. Records relating to specific systems that support or document the agency's mission must be scheduled individually by submission of an SF 115 to NARA. **GRS 20 entirely superseded by GRS Transmittal 24.**

1. Information Technology (IT) Program Planning Records

Records relating to the development of agency IT programs. Included are records that document agency-wide IT goals; specify milestones to be achieved; identify performance measures for the agency's IT portfolio; or summarize the underlying principles and approach by which the agency will plan for and manage its IT resources. Records may include strategic and tactical plans documenting the implementation and maintenance of IT systems in support of the agency mission and also may include records supporting formally issued plans, such as records of concurrence, comments, clearances, justifications, and other issuance records.

Cut off annually. Destroy/delete when 7 years old or when no longer needed, whichever is later. (N1-GRS-04-4 item 1)

[**Note:** This item does not apply to the data content or design of individual IT systems. Records relating to specific mission-related systems must be scheduled individually by submission of an SF-115 to NARA. (N1-GRS-04-4 item 1 Note)]

2. Enterprise Architecture Records

Records identifying the IT systems and networks required to perform the agency's mission and the transitional processes required to implement comprehensive programs to support that mission. Records may include technical reference models, diagrams, graphics, models, and narratives that describe the agency's baseline architecture, target architecture, and related sequencing plans.

Cut off when superseded by a new iteration of the enterprise architecture. Destroy/delete when 7 years old or when no longer needed, whichever is later. (N1-GRS-04-4 item 2)

3. IT Capital Investment Records

Records documenting the integration of IT investments with agency-wide strategic planning, budgeting, procurement, and management. Records include routine and periodic reports on IT capital investments; capital asset plans; business cases for major investments, systems, acquisitions, or operational assets identified in the agency's capital investment portfolio; and clearance and review records.

Cut off annually. Destroy/delete when 7 years old or when no longer needed, whichever is later. (N1-GRS-04-4 item 3)

[**Note:** Records needed to support contracts are scheduled under GRS 3. (N1-GRS-04-4 item 3 Note)]

4. Legal and Regulatory Compliance Records

Records documenting agency compliance with Federal IRM laws and regulations, including systems and reports created to support compliance with the mandates of OMB, GAO, and other Federal IRM and IT oversight agencies. **Superseded by GRS 4.2, item 080 (DAA-GRS-2013-0007-0022).**

5. CIO Committee Records

Records maintained by committees, boards, task forces, conferences, or other IT advisory, governing, or policy bodies for which the CIO has designated sponsorship, leadership, or recordkeeping responsibilities. Cut off annually. Destroy/delete when 5 years old. (N1-GRS-04-4 item 5)

Cut off annually. Destroy/delete when 5 years old. (N1-GRS-04-4 item 6)

[**Note:** Official agency policy records generated by the CIO are not covered by this item. They are considered agency policy and issuance records and are scheduled elsewhere. (N1-GRS-04-4 item 6 Note)]

7. Schedules of Daily Activities

Calendars, appointment books, schedules, logs, diaries, and other records documenting meetings, appointments, telephone calls, trips, visits, and other activities by the CIO while serving in an official capacity, EXCLUDING materials determined to be personal and those that have been incorporated into other recordkeeping systems.

## **Frequently Asked Questions about General Records Schedule 27, *Records of the Chief Information Officer***

### **~~1. To whom does General Records Schedule 27 apply?~~**

GRS 27 provides disposal authorization for certain records created and maintained by Federal Chief Information Officers (CIO). This schedule applies to the records of CIOs at agency or departmental headquarters as well as those of deputy and subordinate CIOs at the bureau or field office level.

### **~~2. Does this schedule describe all of the records of Federal CIOs?~~**

Not necessarily. CIOs are often responsible for programs and activities whose records are covered by another General Records Schedule or approved agency records schedule.

### **~~3. How does this schedule differ from GRS 20, *Electronic Records*, and GRS 24, *Information Technology (IT) Operations and Management Records*?~~**

GRS 20 and GRS 24 cover certain records associated with the day-to-day operation of individual information systems and related support services. GRS 27 provides disposal authority for records documenting the administration of the office of the CIO and its agency-wide information resources management.

### **~~4. How does GRS 27/4, "*Legal and Regulatory Compliance Records*," differ from GRS 24/1, "*Oversight and Compliance Files*"?~~**

GRS 27/4 covers CIO records that document an agency's compliance with Federal laws and regulations governing information resources management. GRS 24/1 covers records that document an office's or a system's compliance with the IT policies, directives, and plans that are typically developed or issued by the agency CIO.

### **~~5. Does this schedule cover records related to IT security?~~**

Insofar as they document agency-wide efforts to comply with the laws and regulations that govern IT security, such CIO records would be covered by 27/4, "*Legal and Regulatory Compliance Records*." However, records that document the security of individual IT systems—including vulnerability assessments, audits, risk management analyses, and security plans—are covered by GRS 24/5, "*Files-Related to Maintaining the Security of Systems and Data*." Records related to specific security breaches or incidents are covered by GRS 24/7, "*Computer Security Incident Handling, Reporting and Follow-up Records*."

### **~~6. Does this schedule cover system data?~~**

This schedule does not apply to the data or information content of IT systems. Records relating to specific systems that support or document the agency's mission must be scheduled individually by submission of an SF 115 to the National Archives.

### **~~7. Do records have to be arranged in these categories?~~**

## **Department of Energy Environmental Schedule June 2025 Revision 8**

### **Introduction**

This schedule provides for the disposition of U.S. Department of Energy (DOE) records created to comply with or needed to support compliance with Federal environmental laws and implementing regulations. The laws and implementing regulations encompass but are not limited to Resource Conservation and Recovery Act of 1976 (RCRA), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Clean Air Act (CAA), Clean Water Act, Soil and Water Resources Conservation Act of 1977, United States Code (USC) Code of Federal Regulations (CFR), and National Environmental Policy Act (NEPA) requirements, as well as other regulatory requirements. When regulatory citations have been provided, they are referenced.

This schedule applies to all applicable records, regardless of format/media. When media changes are planned, special care should be taken to transfer information to media that can meet the specified retention. This becomes particularly important since electronic information technology changes rapidly. If electronic records need to be retained permanently, they should be in a format currently approved by the National Archives and Records Administration (NARA).

If records identified in this schedule are already in the existing DOE Record Schedules, a cross reference has been provided.

Because this schedule is intended to have a broad use within the DOE complex, state or local regulations have not been taken into account here. If any regulation requires a longer retention, the record should be kept to meet the longer term requirement. By their nature, environmental records may have significant legal or public interest aspects. After the environmental records have met their scheduled retention, a review of these records should be made for continued need. Each site should establish a review team composed of members who understand the records under evaluation and/or the records management function of the organization. The team should include the agency's Records Manager, Archivist, or Historian, Project Manager, current records holders, and/or subject matter experts. Ideally, the evaluation process would begin with an assessment of records written by the Project Manager during or shortly after the close of a project. This provides a basis for the review team to use in their subsequent evaluation of the project.

For the intent of this schedule the definition for "life of facility" is the period from the initial receipt of hazardous waste at the facility until documented closure. Facility may be defined as a tank, a building, a waste site, or a laboratory.

# UPDATED AUTHORITIES

The primary focus of this schedule is the retention and disposition of records of those activities that may affect the physical environment. The records covered by this schedule document the results of sampling and analysis, monitoring, permitting and disposal and cleanup activities affecting the physical environment. Environmental records include, but are not limited to, the administrative record (as defined/required by CERCLA/RCRA and other dangerous waste programs), permits, reports, studies, evaluations, characterizations, logbooks of various kinds, as well as more obvious burial or storage records, closure plans, and waste management documentation. Other issues such as, medical, health and safety concerns emanating from these activities, but not specifically required by environmental regulations, will not be addressed in this schedule.

These records may be organized and maintained as project case files to provide a more useful reference/retrievability or as individual record series. The project case file approach provides a reasonable record of an environmental project from start to finish which would allow for reconstruction or verification of relevant procedures and analyses (see Section 1.k).

Records covered by this schedule are grouped into the following seven categories:

- Administration
- Regulatory Compliance
- Permitting
- Electronic Mail and Word processing System Copies
- Monitoring
- Sampling and Analysis
- Disposal/Cleanup

There are overlaps between the identified six categories where records may fit into more than one category. The predominant activity should be taken into consideration when scheduling records.

## 5. SAMPLING AND ANALYSIS

Records included in this series document sampling and analysis activities for samples collected during environmental investigations, remediation, and restoration from sample acquisition to sample disposition. Documentation covers planning sampling operations, conducting sampling operations (collecting samples), documenting sampling operations, sample management and control, and reporting sampling results.

NARA accepts information relating to physical specimens, but not the specimens themselves. Because some requirements specify retention of samples, the responsibility for maintenance of them rests with the organization that gathers or collects such items. Related information is scheduled herein. Physical samples and specimens should be returned to the organization from which they originated per EPA requirements.

NOTE: See Section 1e for logbooks related to sampling and analysis.

### a. Procedures

These procedures detail the methods used and frequency of analysis of environmental samples. Includes records or correspondence which give the philosophy and scope of sampling, provide interpretations of results, and detail the plans for sampling and analysis of environmental samples.

Cutoff when superseded or obsolete. Destroy when 75 years old. (N1-434-98-28)

### b. Sampling Authorization Forms

These forms document field sampling requirements generated to initiate and perform sampling and analysis activities.

Destroy in 75 years. (N1-434-98-28)

### c. Sampling and Analysis Records

#### (1) Analytical Laboratory Data Packages

These data packages consist of documentation generated during transport and receipt of field samples (e.g., chain of custody), sample movement in the laboratory, preparation for analysis, laboratory analyses output, raw and processed data, analytical results (analysis reports), reanalysis, quality control sample results, and instrument
