General Comment

Delfin LNG has continuously worked to improve the safety, efficacy, and economy of its FLNG business. Despite numerous challenges Delfin has continued to persevere with the goal of creating American jobs, increasing the market share of American energy on a global scale, and transform the delivery of liquified natural gas to reduce ecological impact.

This comment is in support of the extension for Delfin's non-FTE permit, but with the condition that no further extensions be granted if Delfin is unable to execute its operations by the end of the extension request if no significant progress has been made. Significant progress could be defined as having at least one operational FLNG ship by EOY2029, or FID achieved for one ship by EOY2025.
