General Comment

En: The Saguaro Project threatens the biodiversity and communities of the Gulf of California. The risks for whales are enormous: collisions with 300-meter-long megaships, noise pollution that drives these species away from their natural transitional and breeding habitat. There's also the destruction of community fishing for whale-watching tourism and the livelihoods of families. It's a project with proven risks and zero benefits for the local community.

Es: El proyecto Saguaro atenta contra la biodiversidad y las comunidades del Golfo de California. Los riesgos son altísimos para las ballenas: colisiones con los megabuques de 300 metros, contaminación sonora que ahuyenta a estas especies de su hábitat natural de transición y crianza. También está la destrucción de la pesca comunitaria del turismo de avistamientos, y del sustento de las familias. Es un proyecto de riesgos comprobados y de cero beneficios para la población Mexicana.
