General Comment

The gas project means to obliterate Mexico's untangible heritage. In a closer and more scientific approach, it means to endanger 40% of marine wildlife, including our whales. The department of energy can make a historical decision, to win the Mexican and American approval for further decisions, always siding with our global common interest. If you are a Lawyer, don't let it pass your hands. If you are an engineer prove your education was worth your time. If you are an entrepreneur, be the leader of the people. If you are a human, remember YOU ARE RESPONSIBLE.
