General Comment

Hello, my name is Berenice I would like to express people's continued concern about the ecological risk posed by the SAGUARO PROJECT. First of all, I would like to emphasize the danger this project poses to whales, since this project interferes with/crosses the migration route of this species. It is a latent danger for the ecosystems as well as for the survival of the whales, emphasizing that where the project will pass interferes with the free circulation of said animal, As well as correct reproductive development. Emphasizing that it is not only about whales, but about many other marine species that live and coexist with each other in this area. The SAGUARO Project is a danger to the marine life in the area, and to our very future life.
