General Comment

We beg you to stop this project. We need to save the whales. Can't you see? There are many species that have dissapeared because of this type of projects that only involve money but never think about the ecosystem. Please, this project is gonna make boats collide with whales, it's gonna make their environment so noisy, can you imagine living with a blender in your ear? You are going to make them leave and that's not okay! Making them leave have other implications in the ecosystem, for example an imbalance in it. And that's not it, this kind of practices poison water, how can you live and feel in peace knowing your project is killing animals? We don't own the sea, not everything has to be money, please, we have lost so many species, your grandkids or great grandkids will never know the Vaquita Marina. This place is known as the aquarium of the world because so many mammals live there, so the impact of this project is gonna be extreme. Please, we beg you, stop this, save the animals, save the ecosystem, save the sea.
