General Comment

To whom it may concern.

Mexican citizens demand the permanent suspension of operations by Mexico Pacific Limited LLC, as it represents a major environmental hazard, endangering the flora and fauna of at least two Mexican states. The company intends to cross protected areas and nature reserves with endemic flora and fauna species in the states of Sonora and Chihuahua. In the state of Sonora (Gulf of California) alone, Mexico Pacific Limited LLC intends to load its colossal vessels in the Upper Gulf of California and Colorado River Delta Biosphere Reserve, home to the highly endangered "Vaquita Marina," a cetacean. These vessels also intend to navigate the entire Gulf of California, which is home to a third of the world's marine mammals; for example, it is a breeding ground for the blue whale. In short, the activities of Mexico Pacific Limited LLC represent a grave danger to the Mexican population and a potential ecocide in Mexico. Please help us stop them now, not when it's too late.
