General Comment

The Saguaro project is just not needed for the country or World benefit, and beside that, they choose the worst process possible, one that damages the animals and the sea, something we are already trying to keep safe.

It's as simple as that, it is not even necessary and it will only cause more damage to the planet and its animals

It's not rocket science, if they are still gonna do it, do it the right way, the safe way, and hopefully it doesn't work and they lose their investment for being assholes to the World that it's already f up!!!
