General Comment

Mexican citizens are against Saguaro Project. It is a project that endangers biodiversity in the ocean, killing whales, marine flora, endangers endemic birds, and also increases air pollution affecting citizens from Sonora and Baja California, making it impossible to live and work there. Betting for more fossil fuels is a shame and many steps back in the progress of humanity. The consequences are too many to count and cost too much money to repair. We do not want this project in our country.
