## General Comment

As a Mexican citizen, I strongly oppose this project. It will bring no benefit to our country or our people, and quite the opposite: it will destroy the habitat of whales and many other living beings. I want my young son to have a future in which the world still preserves its diversity of species and where he can experience the magnificence of beings like whales. I believe that alternative means and clean energy sources that do not harm the environment should be sought. Thank you for your attention.
